This was not the only great work whose progress was hotly opposed by ignorant or interested people. James the First, who had promoted the ejection of the water from the fens, was quite as energetic, and a little more interested, in aiding Myddelton in introducing water into London. When, however, it was decided that the New River should bring

from Hertfordshire the pure water which was not to be found in sufficient supply in London, there was a stir on all the line, as if the end of the world were at hand, as a consequence. The landowners protested that they would be ruined: their meadows would be converted into bogs; their arable land would become squallid ground; farms and fields would be cut into fragments; the levels would be drowned whenever sudden rains caused the "cut" or "ditch," as they scornfully called the river, to overflow; the grass would perish, the highways be rendered impassable, and—happy thought!—the Church would be robbed of its righteously-earned tithes! The wail reminds one of the cry of anguish that went up when proposals were made to build a bridge at Kew, and to open a "New Road" from Paddington to the Bank. The utter ruin of our forefathers as a nation, and of ourselves as their vagabond sons, looking after their inheritance, was predicted; but, in spite thereof, the bridge was built, the road was cut, and we are all exceedingly comfortable under the circumstances.

It is satisfactory to know that Hugh Myddelton, who was a noble merchant and amateur engineer, was enriched and not impoverished, as the foolish old legend has it, by this achievement. The old conservatives, however, thought it a wicked matter, or would His most sacred Majesty have plumped over head and ears into it one day, as he was examining the great work? Moreover, it was subsequently asked, what Christian was to be expected to drink water brought into town by pipes? "Aye, marry!" cried the water-carriers, when they saw their occupation going—and their cry was a loud one—"Any pure river-water here! and none of your pipe-sludge!"

This little engineering feat, however, did not pay at first. For years there was no dividend at all; to-day each share produces 850*l.* a-year, and the capital value of a single share, at twenty years' purchase, would be about 17,000*l.*

Our good roads, it is to be observed, are of even later date than our supply of drinkable water. In the ancient days we possessed, indeed, finer highways than in the middle ages. Mr. Smiles says—"The Romans first brought into England the art of road-making"; but it is doubtful whether some of their own great lines were not founded on old British straight-ways. In the middle ages, the Government, caring more for the traveller than the route, ordered all trees and bushes to be cut away from roadsides,—not to render the latter drier for passage, but to prevent robbers from lying in ambush. In 1346, says Mr. Smiles, "a toll was levied by authority of Edward the Third, to maintain the road from St. Giles's to Charing Cross"; but he does not notice that, long previous to this, pious individuals who built bridges or made roads were generally permitted to establish a "hermit" on the spot, whose office it was to collect the tolls.

The circumstance that when our Kings went to Parliament, after the invention of coaches, faggots were thrown into the street-ruts in order to enable the precious freight to get along without an upset, is proof sufficient of a semi-barbarism of a very recent date. Had it been less in the royal Stuart's time, we should not hear of eight hundred horse being taken prisoners in the Civil Wars while sticking in the mud; but even when the case and the roads were amended, and the latter were made passable for stage-coaches and "fly-waggons" of equal dilatory swiftness, the public made an outcry against the innovation. Some declared that the national courage would be destroyed if a man who was wont to

ride over the country on horseback, and take his chance of meeting the highwaymen, were to slink along in carriages. "The public health will suffer," cried the philanthropists, who trembled for people shut up in a hot and dusty coach, instead of breathing the air from a high-peaked saddle. "Health—Trade will be annihilated!" exclaimed other parties. In the old ways, a suit of clothes was worn out in a single journey. A man might travel a year together in a stage without giving a tailor a fresh turn. "Where is the sun of England going to?" was the nearly universal cry.

The cry would almost seem to have been humoured, and the roads left fitter for horse-travelling than for driving. As late as 1789, the coach of George Prince of Wales, who was travelling near Newark, "was overturned by a cart in a narrow part of the road; it rolled down a slope, turning over three times, and landed at the bottom, shattered to pieces,"—without doing more than bruising the Prince. The old waggoners especially hated such travellers. The road was made for waggons, and gentlefolks had no right to be gadding about on them! Sometimes a coach-road ran near an old waggon-road; but, we believe, a pedestrian, in doubt which to take, would very much regret, after he had got half-way through either of them, that he had not selected the other.

The Turnpike, which was to levy the tolls by which these roads were to be made and kept generally useful, was a tremendous trial to the loyalty and patience of the unreasonable generation of the day. Why should people wish to travel faster? Their health would suffer; and country-inn landlords would find half their occupation gone! These results were grievous enough; it was still worse that the public must pay for them! Mr. Smiles has collected most of the pile of wrongs alleged by the contemporary public, but he has missed some good illustrations of the turn taken by the popular humour. Here is one, for example, which we cite from a poem, entitled 'The Adulteress,' published in 1773:—

There was a time this idle knew little sin,
When ladies wore their ruffs up to the chin;
When rosy country-dames were scarcely known
To go to Court,—or even come to Town.
But such an intercourse the Turnpikes make,
That every woman is become a rake;
They fly from Berwick, Beverley, and York,
To see a play and—pick up Tambour-work.
'Tis on the Turnpikes that we ought to rail—
The Turnpikes, where Vice runs upon the nail.
To keep them chaste, keep each to her abode,
And drive the plough through every Turnpike road!

It is a curious fact, that one of the best road-makers England ever possessed was blind Jack Metcalf, of Knaresborough—a poor fellow who could do everything, had never seen anything, and did nothing imperfectly. He was eminent, however, as a road-maker; and few things could better exhibit Mr. Smiles as a clever compiler and a perfect book-maker than his 'Life of Blind Jack,' taken from local histories and chap-books. As a bridge-maker, Metcalf was not surpassed by another peasant-engineer, the Welsh Edwards, who learned architecture by studying the ruins in his neighbourhood, who achieved triumphs by understanding his failures, and who reared the once famous Pont y Prydd only after two of his preceding bridges had tumbled to pieces. Thenceforward he knew his power.

We have expressed an opinion that there were tolerable, nay, good roads in Britain anterior to the Roman invasion. If the pre-Roman London was a city of some importance, it must have had roads for easy access and departure; and if the early bridges were British, many roads must have been of British work also. Such cavalry and chariots as Caesar speaks of

could not have moved over a merely wild country, nor crossed rivers, without some artificial aid. There is a portion of a British bridge still crossing the East Dart, between Moreton and Tavistock—"It is yet of a most durable character, otherwise it could not have withstood the fury of the Dart for full twenty centuries." No doubt; and they who could build such bridges must have been capable of constructing roads to lead to and from them.

In more modern times, the proposed erection of bridges to facilitate intercourse had its furious opponents, like all other projected improvements. The London Corporation fiercely opposed the erection of any second bridge over the Thames. We have already alluded to the outcry raised against the erection of a bridge at Kew. When one at Putney was first projected, the Lord Mayor declared "London would be destroyed by it." By which he meant that Putney Bridge would divert from the funds of the Corporation the amount of tolls for heavy traffic destined for the City, and down to that time compelled to cross the bridge at London. The Lord Mayor's cry, with a "consideration" tacked to it, touched the feelings of Charles the Second, and consent to erect the bridge was withheld.

The time arrived in England when roads and rivers combined did not suffice for the commerce and intercourse of the people. With the need came the remedy,—principally in the persons of James Brindley, a poor Derbyshire lad, born with powers of observation; and Egerton, Duke of Bridgewater, born with powers of purse, sound sense, and a great liking for the acute millwright from Derbyshire. These two men inaugurated the Canal system, so new, so useful, and so profitable the other day, but now partly superseded by its swifter rival of the rail. Mr. Smiles gives the following picture of the men amid whom, or their influences, Brindley was born:—

"The nearest town of any importance was Macclesfield, where a considerable number of persons were employed, about the middle of last century, in making wrought buttons in silk, mohair and twist—such being then the staple trade of the place. Those articles were sold throughout the country by pedestrian hawkers, most of whom lived in the wild country called 'The Flash,' from a hamlet of that name situated between Buxton, Leek and Macclesfield. They squatted on the waste lands and commons in the district, and were notorious for their wild, half-barbarous manners and brutal pastimes. Travelling about from fair to fair, and using a cant or slang dialect, they became generally known as 'Flash men,' and the name still survives. Their numbers so grew, and their encroachments on the land became so great, that it was at length found necessary to root them out; but for some time no bailiff was found sufficiently bold to attempt to serve a writ in the district. At length an officer was found who undertook to arrest several of them, and other landowners, taking courage, followed the example; when those who refused to become tenants left, to squat elsewhere, and the others then consented to settle down to the cultivation of their farms. Another set of travelling rogues belonging to the same neighbourhood was called the 'Broken Cross Gang,'—from a place called Broken Cross, situated to the south-east of Macclesfield. Those fellows consorted a good deal with the Flash men, frequenting markets and travelling from fair to fair, practising the pea-and-thimble trick, and enticing honest country-people into the temptation of gambling. They proceeded to more open thieving and pocket-picking, until at length the magistrates of the district took active measures to root them out of Broken Cross, and the gang became broken up. Such was the district and such the population in the neighbourhood of which our hero was born."

With Brindley may be said to commence the

portion of the book which best answers to the promise of the title-page. All previous is sketchy, very readable, and where not merely sketchy, still a mosaic—materials from very many sources, put together with true literary-engineering skill. Indeed, in these 'Lives,' replete with interest as they are, the biographer narrates very little that is positively new, but each Life is more complete, perhaps, than any biography of the same individual by any preceding writer. Mr. Smiles is skilled in the employment of materials brought to his door by preceding labourers; and this collection of biographical histories is as instructive and amusing a book as so cunning a hand could make it.

It is not uncommon to describe men who triumph over difficulties that seem insuperable, as geniuses. This is a profound error. Even so flimsy a dramatist as the elder Morton saw this; and his *Farmer Ashfield*, in 'Speed the Plough,' satirically remarks that his horse Genius is, despite his promise, the wildest and the laziest in the whole team.

Brindley, Smeaton, Telford, Rennie, and many a worthy brother of their class, were not "born geniuses"—that is, men born to achieve wondrous results, without thinking twice as to the method of effecting them. In proportion to the stupendous achievement was the amount of labour—of head, hand and heart—by which the glorious end was reached. Of all the noble army of workers, few have worked so nobly, so unselfishly, so willingly, so defiantly of despair itself, as the half-dozen heroes whom Mr. Smiles has here congregated. Some came from the lowlier hearths—others from homes of comfort and wealth. The starting-point was of no consequence. Each won his race by efforts of his own, and nothing was accomplished without effort, even when each engineer was surest of attaining the end triumphantly. "What is to be done now, Brindley?" asked the desponding and penniless Duke of Bridgewater, when his Canal system promised to break down. "You find the money, Duke, and I'll do the work," was the reply of the rough engineer,—who was as good as his word. This was confidence not ill-asserted, for expression was seldom given to it but on good grounds. Yet Winstanley perished in his own lighthouse, in one of those storms which he had almost invoked, to test it; and Smeaton, who fixed his column of light and life permanently on the Eddystone Rock, saw with a sigh, but with no diminution of self-respect or self-reliance, his own splendid bridge fall into ruins at Hexham. If Brindley trembled when the water flowed into the bed of his first canal; if Smeaton looked anxiously from the Hoe for the light from his pillar on the Rock; if Rennie held his breath when the arches of London Bridge were first left to their keystones; and if Telford hid his face and prayed when the grand test was applied to the marvellous and graceful bridge over the Menai, not one of them was influenced in the exhibition of such feelings by doubt or distrust of the power with which he had been endowed by Heaven, but by the thought that the neglect of some subordinate might bring disgrace upon the head that had to sustain every responsibility. The most accomplished worker of engineering miracles had blundered frequently enough at the outset, but there was instruction in every failure; and the comprehension of each early fault laid the foundations of many a later triumph. When Brindley was a wheelwright, he put in the whole of the spokes of one wheel the wrong way, and did not perceive his error till he had applied the gauge. Even the Duke, who so cordially took him by the hand

as a brother-labourer in the construction of the great water-ways of England, was accounted so meanly of in his youth, that an attempt was projected to cause his ducal inheritance to pass to the next heir; but the blundering wheelwright and the imbecile young Duke grew into strong and mighty men, with minds capable to carry out the great ideas by which they were alike possessed, and the realizing of which has enrolled them among the greatest benefactors of their country. The two men were worthy of each other; and we are only surprised that when Mr. Smiles recorded the entombing of the Duke at Little Gaddesden, he did not also quote his simple, noble, and appropriate epitaph there—

Impulit ille rates ubi duxit aratra colonus.

Of the great engineers whose lives are here recorded, Brindley was the worst paid, even when engaged on some of his greatest works. On this subject Mr. Smiles writes:—

"Long before Brindley's time, Inigo Jones was paid only eight shillings and fourpence a-day as architect and surveyor of the Whitehall Banqueting House, and forty-six pounds a-year for house-rent, clerks and incidental expenses; whilst Nicholas Stowe, the master mason, was allowed but four and tenpence a-day. When the Duchess of Marlborough was afterwards engaged in resisting the claims of one of her Blenheim surveyors, she told him indignantly 'that Sir Christopher Wren, while employed upon Saint Paul's, was content to be dragged up to the top of the building three times a-week in a basket, at the great hazard of his life, for only 200*l.* a-year'—the actual amount of his salary as architect of that magnificent Cathedral. Brindley, however, fared worse still, and for a long time does not seem to have risen above mere mechanic's pay, even whilst engaged in constructing the celebrated canal for the Duke of Bridgewater, which laid the foundation of so many gigantic fortunes."

Brindley, before a Committee of Parliament, was as practical in his explanations as Stephenson was at a later period:—

"Some curious anecdotes have, however, been preserved of his appearance as a witness on Canal Bills before Parliament. When asked, on one occasion, to produce a drawing of an intended bridge, he replied that he had no plan of it on paper, but he would illustrate it by a model. He went out and bought a *large cheese*, which he brought into the room and cut into two equal parts, saying, 'Here is my model.' The two halves of the cheese represented the semicircular arches of his bridge; and by laying over them some long rectangular object he could thus readily communicate to the committee the position of the river flowing underneath and the canal passing over it. On another occasion, when giving his evidence, he spoke so frequently about 'puddling,' describing its uses and advantages, that some of the members expressed a desire to know what this extraordinary mixture was that could be applied to so many and important purposes. Preferring a practical illustration to a verbal description, Brindley caused a mass of clay to be brought into the committee-room, and, moulding it in its raw untempered state into the form of a trough, he poured into it some water, which speedily ran through and disappeared. He then worked the clay up with water to imitate the process of puddling, and again forming it into a trough, filled it with water, which was now held in without a particle of leakage. 'Thus it is,' said Brindley, 'that I form a water-tight trunk to carry water over rivers and valleys, wherever they cross the path of the canal.' On another occasion, when Brindley was giving evidence before a committee of the House of Peers as to the lockage of his proposed canal, one of their Lordships asked him, 'But what is a lock?' on which the engineer took a piece of chalk from his pocket and proceeded to explain it by means of a diagram which he drew upon the floor, and made the matter clear at once."

Such was the man. Here is what was once

called his "master,"—the Duke whom he had helped to fertilize and enrich his country, and who loved to look on and over his own works:—

"One day a customer, of the poorer sort, having got his sack filled, looked about for some one to help it on to his back. He observed a stoutish man standing near, dressed in a spencer, with dark drab smallclothes. 'Heigh! mester!' said the man, come, gie me a lift wi' this sack o' coal on to my shoulder.' Without any hesitation, the person in the spencer gave the man the required 'lift,' and off he trudged with the load. Some one near, who had witnessed the transaction, ran up to the man, and asked, 'Dun yo know who's that yo've been speaking tull?'—'Naw! who is he?'—'Why, it's th' Duke his-sen!'—'The Duke!' exclaimed the man, dropping the bag of coals from his shoulder, 'Hey! what'll he do at me? Maun a goo an ax his pardon!' But the Duke had disappeared. He was very fond of watching his men at work, especially when any new enterprise was on foot. When they were boring for coal at Worsley, the Duke came every morning and looked on for a long time together. The men did not like to leave off work whilst he remained there, and they became so dissatisfied at having to work so long beyond the hour at which the bell rang, that Brindley had difficulty in getting a sufficient number of hands to continue the boring. On inquiry, he found out the cause and communicated it to the Duke, who from that time made a point of immediately walking off when the bell rang, returning when the men had resumed work, and remaining with them usually until six o'clock. He observed, however, that though the men dropped work promptly as the bell rang, when he was not by, they were not nearly so punctual in resuming work, some straggling in many minutes after time. He asked to know the reason, and the men's excuse was, that though they could always hear the clock when it struck twelve, they could not so readily hear it when it struck only one. On this, the Duke had the mechanism of the clock altered so as to make it strike *thirteen* at one o'clock; which it continues to do until this day."

One touch more of the benevolent and eccentric Duke:—

"In 1720, when Scroop Egerton, Earl of Bridgewater, had obtained the promise of a dukedom, he acquainted his brother with the circumstance, and told him, moreover, he had so much interest he could get the dukedom settled collaterally upon him and his heirs male, in case there should happen a failure of males in his own line direct, provided his brother would pay the additional office fees, which amounted to less than 320*l.*, for extending the patent. His brother, then Bishop of Hereford (and who, if he had lived, was to have been Archbishop of York), replied that if the Duke would consent to entail the old family estates upon the dukedom, he would consent to discharge the additional fees. To this the Duke answered that he himself had no immediate concern, and no particular interest, in the above proposal. He made it solely because he conceived it might be acceptable to his brother; he would bind himself, however, by no promise or condition in a matter which regarded the Bishop alone. If the Bishop thought it worth while to give about three hundred guineas for the chance, well; otherwise, the patent would stand as it was already directed to be made out. Hence the patent was not extended, and now there is a failure of males in the Duke's own line direct. The dukedom of Bridgewater is consequently become extinct, in the branch of the family of Egerton, by the death of Francis, the lake Duke; and the Earldom of Bridgewater is devolved to the direct heir of the above-mentioned Henry Bishop of Hereford."

The canals, when first rendered practicable, were looked upon as rapid ways of conveyance:—

"The following curious paragraph is from the *Times* of the 19th December, 1806. It relates to the despatching of troops from London for Ireland, during a time of great excitement:—'The first division of the troops that are to proceed by Paddington Canal for Liverpool, and thence by trans-

ports for Dublin, will leave Paddington to-day, and will be followed by others to-morrow, and on Sunday. By this mode of conveyance the men will be only seven days in reaching Liverpool, and with comparatively little fatigue, and it would take them above fourteen days to march that distance. Relays of fresh horses for the canal-boats have been ordered to be in readiness at all the stations.'

When Brindley proposed to carry a canal, by an aqueduct, over a river, an eminent (of course) engineer remarked, that he had often heard of castles in the air, but never before knew where they were erected. Brindley, in fact, was laughed at; but he not only had a "head" upon his shoulders, but his brains were in the right place, and he was no more discouraged than Smeaton was in his younger days, when his more lively and less thinking youthful contemporaries distinguished him by the name of "Fooly Smeaton." That he was not an ungenerous fool is clear from one of his many generous maxims, in which he observed that "the abilities of the individual are a debt due to the common stock of public happiness." When he had completed the Eddystone Lighthouse, he had not done all—he had to give courage to the keepers:—

"At first the men appointed as lightkeepers were much alarmed by the fury of the waves during storms. The year after the light was exhibited, the sea raged so furiously that for twelve days together it dashed over the lighthouse so that the men could not open the door of the lantern or any other. In a letter addressed to Mr. Jessop by the man who visited the rock after such a storm, he says:—'The house did shake as if a man had been up in a great tree. The old men were almost frightened out of their lives, wishing they had never seen the place, and cursing those that first persuaded them to go there. The fear seized them in the back, but rubbing them with oil of turpentine gave them relief.' Since then, custom has altogether banished fear from the minds of the lighthouse-keepers. The men became so attached to their home, that Mr. Smeaton mentions the case of one of them who was even accustomed to give up to his companions his turn for going on shore!"

In the following picturesque anecdote there is an excellent illustration of Smeaton's good common-sense:—

"Mr. Smeaton was walking with his wife in Ranelagh Gardens—the fashionable place of resort at that time—when he observed an elderly lady and gentleman fix their marked attention upon him. At length they came up, and the lady, who proved to be the eccentric Duchess of Queensberry, said to Mr. Smeaton, 'Sir, I do not know who you are or what you are; but so strongly do you resemble my poor dear Gay (the poet), that we must be acquainted. You shall go home and sup with us; and if the minds of the two men accord, as do the countenances, you will find two cheerful old folks, who can love you well; and I think (or you are a hypocrite) you can as well deserve it.' Mr. Smeaton and his wife accepted the invitation, and it proved the commencement of one of his most pleasant London friendships. It happened that the Duke and Duchess had a great love of card-playing, which Smeaton detested. But his good-nature would not permit him to hold aloof when asked to take a hand. He played, however, like a boy, his attention never following the game. On one occasion, when it was Pope Joan, and the stake in 'Pope' had accumulated to a considerable sum, it became Mr. Smeaton's turn by the deal to double it. Regardless of his cards, he took up a scrap of paper, made some calculations on it, and laid it on the table. The Duchess eagerly asked what it was. He replied, 'Your Grace will recollect that the field in which my house at Austhorpe stands may be about five acres, three roods, and seven perches, which, at thirty years' purchase, will be just my stake; and if your Grace will make a Duke of me, I presume the winner will not dislike my mortgage.' The hint thus given in a joke was kindly taken, and from that time they never played but for the merest trifle."

Watt nobly said of him, "His example and precepts have made us all engineers;" and Robert Stephenson declared that he was "the engineer of the highest intellectual eminence that had yet appeared in England." So was he lauded by men who surpassed him in many things, but who confessed they owed much of their superiority to his "preparing their way."

Then, to the great architect of lighthouses succeeded the builder of the three great London bridges, the raiser of the Plymouth breakwater, the engineer of the London and other docks, —Rennie, son of a humble Scottish farmer; and with him we may name—the last of Mr. Smiles's heroic men named in these volumes—"laughing Tam Telford," the son of a Scottish and "Unblameable Shepherd," the "Colossus of Roads," and the "Pontifex Maximus" of his times. Rennie's countryfolk were a hard people to deal with, as his master—Meikle—found, when he set up a winnowing-machine, with its pair of fanners:—

"Meikle was successful in setting his fanners to work; but they had a good deal of superstitious prejudice to encounter, the country people looking upon the grain cleaned by them with suspicion, as procured by 'artificially created wind.' The clergy even argued that 'winds were raised by God alone, and it was irreligious in man to attempt to raise wind for himself, and by efforts of his own;' and one clergyman even refused the holy communion to those of his parishioners who thus irreverently raised 'Devil's wind.'"

Earl Stanhope was not quite to Mr. Rennie what the Duke of Bridgewater had been to Brindley; nevertheless, the two men associated and harmonized, as they were likely to do from the following description:—

"Among the friends whom Mr. Rennie's practical abilities attracted about this time, was the eccentric but ingenious Earl Stanhope, who frequently visited his works to see what was going on that was new. His Lordship was one of the busiest mechanical projectors of his time, and England owes him a debt of gratitude for his many valuable inventions, one of the most useful of which was the printing-press which bears his name. He also made important improvements in the process of stereotype printing; in the construction of locks and canals; and among his lighter efforts may be mentioned the contrivance of an ingenious machine for performing arithmetical operations. He especially delighted in the society of clever mechanics, in whose art he took great pleasure; indeed, he was himself a first-rate workman, and it was truly said of him by his father-in-law, the Earl of Chatham, that 'Charles Stanhope, as a carpenter, a blacksmith, or millwright, could in any country or in any times preserve his independence and bring up his family in honest and industrious courses, without soliciting the bounty of friends or the charity of strangers.' Lord Stanhope even insisted that his children should devote themselves to acquire an industrious calling as he himself had done,—believing that a time of public calamity was approaching (arising from the extension of French revolutionary principles to England) which would render it necessary for them to depend for their livelihood upon their own personal labour and skill. Indeed a serious difficulty occurred between him and his wife on this very point, which ended in a separation; and the story went abroad that the Earl was crazed."

Scotland forms no exception to the rule that there is no honour for a prophet in his own country. Thus when Rennie had substituted, for the old, high-backed, dangerous bridge at Musselburgh, a new bridge, perfectly level with the road on either side, it was angrily remarked by a countryman, who was asked by a magistrate how he liked the new bridge:—"Brig! It's nae brig ava! ye neither ken when ye're on't, nor when ye're aff't!" Of Fulton, the American pretender to other men's inventions, there is this notice:—

"Mr. Rennie had a very mean opinion of Fulton, regarding him as a quack who traded upon the inventions of others. He considered that little merit belonged to him in regard to the invention of the steamboat. Thus, Jonathan Hulls, Miller of Dalswinton, and Symington had been at work upon the invention long before Fulton; Miller having actually made a voyage to Sweden and back with his steamboat as early as 1789, eighteen years before Fulton made his first successful experiment on the Hudson. Fulton's alleged invention of cast-iron bridges was not more original. Writing to Mr. Barrow of the Admiralty, in 1817, Mr. Rennie says: I send you Mr. Fulton's book on Canals, published in 1796, when he was in England, and previous to his application of the steam-engine to the working of wheels in boats. On the designs (as to bridges, &c.,) contained in that book, his fame, I believe, principally rests; although he acknowledges that Earl Stanhope had previously proposed similar plans, and that Mr. Reynolds of Coalbrookdale, in Shropshire, had actually carried them into execution; so that all the merit he has—if merit it may be called—is a proposal for extending the principle previously applied in this country. The first iron bridge was erected at Coalbrookdale in 1779, and between that and the publication of Fulton's book in 1796 many others were erected: so that, in this department, he has little to boast of. I consider Fulton, with whom I was personally acquainted, a man of very slender abilities, though possessing much self-confidence and consummate impudence."

Rennie, like all great men of his class, could turn his hand to anything:—

"A curious illustration of his expertness at smithwork occurred during a journey into Scotland, when on his way to visit the Earl of Eglinton at Eglinton Castle. He went by the stage-coach, in company with some Ayrshire farmers and one or two rather important 'Paialeys boddies.' When travelling over a very bad piece of the road, the jolting was such as to break the axle-tree of the coach, and it came to a stand on a solitary moor, with not a house in sight. Mr. Rennie asked the coachman if there was any blacksmith near at hand, and was told there was one a mile or two off. 'Well, then, help me to carry the parts of the axle there, and I'll see to its being mended.' The blacksmith, however, was not at home; but Mr. Rennie forthwith lit the forge fire, blew the bellows, and with the rather clumsy assistance of one of his fellow-passengers, he very soon welded the axle in a workmanlike manner, helped to carry it back to the coach, and after the lapse of a few hours the vehicle was again wheeling along the road towards its journey's end. Mr. Rennie's fellow-passengers, who had been communicative and friendly during the earlier part of the journey, now became very reserved, and the 'boddies' especially held themselves aloof from 'the blacksmith,' who had so clearly revealed his calling by the manner in which he had mended the broken axle. Arrived at their journey's end for the day, the travellers separated; Mr. Rennie proceeding onwards to Eglinton Castle. Next morning, when sitting at breakfast with his noble host, a servant entered to say that a person outside desired to have a word with the Earl. 'Show him in.' The person entered. He proved to be one of Mr. Rennie's fellow-travellers; and great indeed were his surprise and confusion at finding the identical 'blacksmith' of the preceding day breakfasting with my Lord! The Earl was much amused when Mr. Rennie afterwards described to him the incident of the mending of the broken axle."

Telford was as simple in his nature and as solid in his works as Rennie. The two, however, differed in their appreciation of music. Rennie had a musical ear. Telford, though he attempted poetry, had no conception either of harmony or melody. He had no music in his soul; but he was of such excellence besides, that Shakspeare's saying of such a man had no application to him:—

"Much more pleasant was his first sight of Mrs. Jordan at the Shrewsbury theatre, where he seems to have been worked up to a pitch of rapturous

enjoyment. She played for six nights there at the race time, during which there were various other entertainments. On the second day there was what was called an Infirmary Meeting, or an assemblage of the principal county gentlemen in the infirmary, at which, as county surveyor, Telford was present. They proceeded thence to church to hear a sermon preached for the occasion; after which there was a dinner, followed by a concert. He attended all. The sermon was preached in the new pulpit, which had just been finished after his designs, in the Gothic style; and he confidentially informed his Langholm correspondent that he believed the pulpit secured greater admiration than the sermon. With the concert he was completely disappointed, and he then became convinced that he could have no ear for music. Other people seemed very much pleased; but for the life of him he could make nothing of it. The only difference that he recognized between one tune and another was that there was a difference of noise. 'It was all very fine,' he says, 'I have no doubt; but I would not give a song of Jock Stewart for the whole of them. The melody of sound is thrown away upon me. One look, one word of Mrs. Jordan, has more effect upon me than all the fiddlers in England. Yet I sat down and tried to be as attentive as any mortal could be. I endeavoured, if possible, to get up an interest in what was going on; but it was all of no use. I felt no emotion whatever, excepting only a strong inclination to go to sleep. It must be a defect; but it is a fact, and I cannot help it. I suppose my ignorance of the subject, and the want of musical experience in my youth, may be the cause of it.'"

Incidental to Telford's great works on the Scotch harbours we have a singular record made against Aberdeen:—

"Down even to the middle of last century the Aberdonian notions of personal liberty seem to have been very restricted; for between 1740 and 1746 we find that persons of both sexes were kidnapped, put on board ships, and despatched to the American plantations, where they were sold for slaves. Strangest of all, the men who carried on this slave trade were local dignitaries, one of them being a town's baillie, another the town-clerk depute. Those kidnapped were openly 'driven in flocks through the town, like herds of sheep, under the care of a keeper armed with a whip.' So open was the traffic that the public workhouse was used for their reception until the ships sailed, and when that was filled, the tolbooth or common prison was made use of. The vessels which sailed from the harbour for America in 1743 contained no fewer than sixty-nine persons; and it is supposed that, in the six years during which the Aberdeen slave trade was at its height, about six hundred were transported for sale, very few of whom ever returned."

Of characteristics of the man himself, here are a few of his own describing:—

"He was himself accustomed to attribute much of his success to the thorough way in which he had mastered the humble beginnings of this trade. He was even of opinion that the course of manual training he had undergone, and the drudgery, as some would call it, of daily labour—first as an apprentice, and afterwards as a journeyman mason—had been of greater service to him than if he had passed through the curriculum of a University. Writing to his friend, Miss Malcolm, respecting a young man who desired to enter the engineering profession, he in the first place endeavoured to dissuade the lady from encouraging the ambition of her protégé, the profession being overstocked, and offering very few prizes in proportion to the large number of blanks. 'But,' he added, 'if civil engineering, notwithstanding these discouragements, is still preferred, I may point out that the way in which both Mr. Rennie and myself proceeded, was to serve a regular apprenticeship to some practical employment—he to a millwright, and I to a general housebuilder. In this way we secured the means, by hard labour, of earning a subsistence; and, in time, we obtained by good conduct the confidence of our employers and the public; eventually rising into the rank of what is

called Civil Engineering. This is the true way of acquiring practical skill, a thorough knowledge of the materials employed in construction, and, last, but not least, a perfect knowledge of the habits and dispositions of the workmen who carry out our designs. This course, although forbidding to many a young person, who believes it possible to find a short and rapid path to distinction, is proved to be otherwise by the two examples I have cited. For my own part, I may truly aver that "steep is the ascent, and slippery is the way." That Mr. Telford was enabled to continue to so advanced an age employed on laborious and anxious work, was no doubt attributable in a great measure to the cheerfulness of his nature. He was, indeed, a most happy-minded man. It will be remembered that, when a boy, he had been known in his valley as 'Laughing Tam.' The same disposition continued to characterize him even in his old age. He was playful and jocular, and rejoiced in the society of children and young people, especially when well-informed and modest. But when they pretended to acquirements they did not possess, he was quick to detect and see through them. One day a youth expatiated to him in very large terms about a friend of his, who had done this and that, and made so and so, and could do all manner of wonderful things. Telford listened with great attention, and when the youth had done, he quietly asked, with a twinkle in his eye, 'Pray, can your friend lay eggs?'"

Into regular biographical details of the men themselves, or into full notices of their many works, we have not space to follow Mr. Smiles, whose two volumes run to nearly a thousand pages. For such notices we must refer to the book itself, where readers will find them carefully and elaborately recorded. Nothing of value respecting either the men or their deeds is omitted; and it only remains for us to say, that if these volumes are the first of a series, they give fair promise of much instruction and amusement to come.

Colchester Castle, shown to have once been the Templar Citadel which the Roman Colonists raised to their Emperor Claudius at Colonia Camulodunum. By the Rev. H. Jenkins, B.D. (J. R. Smith.)

THERE is no town in the empire equal to Colchester in the antiquity and interest of its Roman remains, and we have to thank the Rev. H. Jenkins for this new contribution in illustration of them. As long since as December, 1853, we noticed a publication by him on the subject, and the tract we have now before us is to be taken as a continuation of his preceding investigations. We had then to complain of the polemical spirit displayed in pursuits that, of all others, seemed best adapted to allay and subdue it; but whatever angry feelings the Rev. Mr. Jenkins may then have evinced towards his antagonist, the Rev. E. L. Cutts, they have, with the lapse of time, subsided and disappeared, and we have now only to speak of his new production as one displaying both industry and learning. He has, also, during the interval, called in the scientific aid of a distinguished architect and antiquary, and, in general, the conclusions at which he has arrived are both sound and intelligible. We have, ourselves, again visited the scene, and can bear witness, at least, to the local accuracy of the statements and illustrations. We, however, venture to think that the Rev. Mr. Jenkins rather over-estimates the value of the three illustrations which accompany his remarks and quotations, when he calls them "beautiful plates": in the first place, they are not "plates" at all, but woodcuts, though executed sufficiently well for the purpose in view; and, secondly, they are mere ground-plans and elevations such as any architect's pupil could

readily furnish, and not picturesque representations at all meriting the praise bestowed upon them. There never was a time, since the invention of the art, when woodcutting was carried to anything like the pitch of excellence it has in our day attained, even for the commonest purposes; and we have at this moment on our table a country bookseller's penny list ornamented, we may say, by a woodcut of St. Michael's Mount that would do credit to any much more costly and permanent publication.

The main, indeed the sole object of the Rev. Mr. Jenkins is to establish that what is now called Colchester Castle was originally built as a templated citadel in honour of the deified Emperor Claudius, according to the testimony of Tacitus. The words of the reverend author are these:—

"Here, then, occurred those momentous events, which in the first century of the Christian era affected the destiny of Britain, but of which no record remains, save in the pages of Latin and Greek writers. On a perusal of them we seem to catch a view of the scenes described, and almost to participate in the hopes and fears, the joy and distress, of the conquerors and the conquered. Above the banks of the Colne, then flowing under a British name, and on the sites of modern Colchester and Lexden, stood Camulodunum, the metropolis of the Trinobantes, and the royal seat of their kings. Lexden, i.e. Lysdyn, the seat of royalty, equivalent to the Greek term *Βασιλειον*, still preserves in its name its ancient honour; and the long line of earthworks on Lexden Heath still marks the western boundary of the British town. Against it, A.D. 44, the Emperor Claudius led a resistless force of five legions, and on its capture formed his entrenched camp at its north-western extremity, occupying the space now comprised by the walls of Colchester. Six years later a large body of discharged veterans was transplanted hither as Colonists. From them the town of Colchester, the river Colne, and the district of the Colnes on its banks received their names. Many a gay and scattered villa, belonging to the chief functionaries of the colony, soon rose within the circuit of the legionary camp. There the public business was transacted; there, too, the Roman veterans raised to their deified Emperor a temple, which, in the cost of its erection, and of its maintenance, exhausted the wealth of the whole province, and in its massive strength seemed to the indignant Britons a presage of Rome's eternal domination."

We are of opinion that the author has satisfactorily established these various propositions; but, on the other hand, the chief point is avowedly by no means a novelty, for, as the Rev. Mr. Jenkins shows, General Roy, more than a century ago, maintained that the structure was Roman and not Norman, as had been asserted by Morant; and the Society of Antiquaries, as long since as 1732, published an engraving of Colchester Castle, expressly calling it *Arx Romanorum munitissima*. Of all this, the author affords evidence that he is aware, and, therefore, what he labours to prove is, not merely that the edifice was Roman, but that it was constructed as a temple, or templated citadel, in honour of the Emperor Claudius. Upon this part of the subject he has brought together all the authorities that, from time to time, have been referred to or quoted, and a few others that, we apprehend, are new.

We are unable to make out very clearly whether the Rev. Mr. Jenkins admits that any portion of the present structure is Norman: he seems to dispute it in some places, and, on the whole, we think that a negative may be gathered from what he advances. Certainly, when we first saw Colchester Castle, many years ago, it struck us that some of the additions and restorations had been made posterior to the Conquest; and when we last examined the building, our early impression was, in some

degree, confirmed. We appeal even to the representation of the principal entrance, as given by the Rev. Mr. Jenkins, on the authority of Mr. Buckler, the architect, to establish that if the original doorway were Roman, Norman columns and ornaments have since been introduced. This, however, is a minor point, of little importance, supposing it now to be settled, as we believe it is, that Colchester Castle was originally a Roman temple, and that that temple, being of a military character, was constructed in honour of Claudius.

Surrounded, as they are, with remains of the period of Roman occupation, the very walls of the town having been in many places preserved, and, as the Rev. Mr. Jenkins mentions, so many urns and other relics having been discovered, it is singular that on the spot so few people seem to possess any knowledge upon the subject. At the Infirmary, not long ago, that curious object the Sphinx was preserved; everybody in Colchester, we should suppose, would be anxious to inspect it; yet when we asked for it, the proper officer did not even know of its existence, but going away to inquire, brought back word that he believed they had in the house something that was called a *Spinix*. This answer was about of a piece with Morant's assertion that the Castle was Norman.

NEW NOVELS.

Maidenhorpe; or, Interesting Events about the Year 1825. By Jeremiah Briefless, Esq., of the Outer Temple, Fellow of No Society. 2 vols. (Bentley.)

A glance at the first two or three chapters of this story induced us to hope it would prove so grotesquely ludicrous that we should be justified in condensing its absurdities for the diversion of our readers. Chapter the First is entitled 'The Rescue,' and narrates the perils encountered by Lady Bewdley and her niece, Lady Susan Altham, in their journey across Yorkshire, to their seat, called Maidenhorpe, fifteen miles distant from York. At the close of a long day's drive, the ladies, just as their carriage is being lugged slowly along the verge of a precipice, "are overtaken by forked lightning, thunder of the most terrific growlness, and—robbers!" The purpose of the depredators is to take possession of the ladies' "portable property," and then hurl them, carriage, servants, horses and all, down the precipice, so that they may never again be heard of. The position is positively awful. The coachman swears and flogs his horses; the footman swears, and drops the umbrella with which he has been "preserving, as much as possible, the liveries of himself and his companion"; the robbers swear, and yell, and let off pistols in every direction. The thunder rolls, the blast howls, the wind rages, the forked lightning anon illumines the hideous gloom. Lady Bewdley faints away. Lady Susan Altham (the heroine) sits calmly awaiting death. At this awful conjuncture, Mr. Alfred Bohun (the hero), a barrister-at-law, who happens to be reposing somewhere in the neighbourhood of the precipice, springs out of the darkness, stabs one of the assailants to the heart, and prostrates two others. The rescue is effected; and Alfred Bohun sees three wretches lying in their blood beneath his feet. But the gallant hero is wounded; gore streams from his habiliments; he can scarce stand from faintness. "After leaning his head against Mike's (the coachman's) shoulder for a few seconds he recovered of his faintness, and desired to be set on the ground, with his head leaning against the wall,—after which Mike ran to the carriage, and was fortunately able to get

him a pocket-bottle of wine and some sandwiches, and was amazed at the avidity with which he took them, and said, 'They have saved my life for the present.' Having thus revived himself by leaning his head against a wall, and eating sandwiches with avidity, Alfred Bohun creeps along the road till he is near the carriage-window, when he asks Lady Susan Altham how she finds herself, and assures her she has no cause for alarm.—"You are very kind, sir," says the lady, 'for giving this information. I wish my poor aunt could have the benefit of it also; but, alas! she has fainted, and it seems impossible to restore her,—indeed, if the carriage had been going down hill, I should have been unable to keep her on the seat.'—"I am glad," answers Alfred Bohun, 'to see that she is upright at present: that is much the best posture for any one in a state of syncope; you have applied stimulants, of course?'—"Yes, but without any effect; however, if the horses can be set going, we shall be at home soon." Before the horses are set going, Lady Susan and her preserver have more conversation. "Indeed, sir," says the lady, 'I will attend myself to the matters you have mentioned.'—"You are very kind, and it encourages me to beg another favour, namely, that you will not allow me to be consigned to public-house quarters; the noise and detestable smells would kill me."—"There can be no doubt about that, for our house is sufficiently spacious to spare you a bed-room; were it otherwise, I would much rather sleep out myself than let you want good accommodation." The rain had now considerably abated, and the distant lightning enabled this pair to see one another; and the expression of our hero's warm and grateful acknowledgments for this were by no means unpleasant to the lady, who immediately called Mike, and told him that she was determined to have this gentleman into the carriage. Mike said, "Indeed, my lady, I am right glad to hear of it, for he's very faint, and it's a poor chance for him to stand in the wet and cold after losing so much blood, but it will spoil the lining of the carriage."—"Never mind the carriage, or my dress either. I insist on its being so." Our hero remonstrated also, but Mike bethought himself of tying him up in one of the horse-cloths which he had in the boot, and lifting him into his place like a bale of goods: indeed, by this time, what with wounds, excitement, fatigue and loss of blood, the unknown champion was at a very low ebb." Lady Bewdley remains in her upright posture and state of syncope for several hours; and Alfred Bohun, on arriving at Maidenhorpe, having "swallowed wine and bread eagerly," writes two long letters—one to his sister (to assure her that he is enjoying himself in Yorkshire), and another to a London friend, telling him to take precautions against a report of the "encounter with footpads" being inserted in the *Times* and other daily papers. Having finished his letters, Alfred wishes to know if he is in time to have them committed to the post that night. But though he has been able to indite the letters with his usual facility, he is unable to take his watch out of his waistcoat-pocket. "Our hero then told Mike to turn up the sleeve of his coat and put his hand into the left pocket of his (Bohun's) waistcoat, and pull out his watch and money; but when Mike complied with this, he drew out with the watch a large clotted mass of blood, which so shocked the lady that she drew back and sank into a chair just in the rear of Bohun." With such a beginning, we anticipated great fun out of this novel; but the hope was disappointed. The author has made a great mistake in putting so much spirit and action into his first

chapters. Every incident, after their intense excitement, falls flat and dull. The reader does not even shudder when the Lady Bewdley's malevolent kitchen-maid almost poisons Alfred Bohun with a basin of broth, seasoned with *three ounces of arsenic*! In the same way, Alfred Bohun's astronomical lecture, although it is reprinted in the body of Volume the First, with an engraver's illustrations, fails to afford so much amusement as might be expected from so singular an episode in romantic fiction. Of course, the hero, on recovering "of" his wounds, which are probed or bandaged or inspected in nearly every chapter of the first volume, marries Lady Susan in the second volume, and towards the conclusion of the tale sets up housekeeping on a prodigious scale, with wealth that comes to him through one of those many utterly impossible freaks of fortune by which gentlemen who rescue young ladies from the hands of robbers are accustomed to be enriched, in works of imagination.

Celebrated Friendships. By Mrs. Thomson. 2 vols. (Hogg & Sons.)

SINCE the days when Edmund Curll was represented as bequeathing for the benefit of his afflicted family a collection of "title-pages, which only wanted treatises wrote to them," the importance to a professional bookmaker of a taking title has certainly suffered no abatement. The idea of this work, Mrs. Thomson informs us, was "suggested by a literary friend." The "idea" is, of course, simply the title-page; and with this, as the experienced Mr. Curll was well aware, the book, meant only to sell, is as good as done. There have been published memoirs and biographies from many points of view and in many kinds of arbitrary connexion, but while friends can suggest and abundant materials are at hand, readers may be assured that the supply will not fail. We have had quarrels of authors and loves of poets, and have been called on to regard the men and women of past times, sometimes as "wits and beaux," sometimes as "Queens of Society," sometimes as people who have risen, sometimes as remarkable boys, but the characteristics of great men and their relations to each other and to society are endless. Even in the collection of memoirs before us we see numberless suggestions for more books of the kind. Here, for instance, is William Cowper, whose claim to be included is the fact that he maintained a long friendship with Mrs. Unwin. To-morrow, he may take place with Collins or Kit Smart in a book of 'Poets who became Insane,' or with Pope and Charles Lamb, two other of Mrs. Thomson's present heroes, in a collection of Bachelor geniuses. Addison and Pope, here figuring as the friends of Steele and Bolingbroke, may, of course, be brought into conjunction in a compilation of 'Celebrated Hatreds'; Marie-Antoinette and the Princess de Lamballe, disposed of in some fifty pages of the present work, may, ere long, rise again in the character of 'Persecuted Beauties,' while even the list of degrees of consanguinity in the Prayer Book may suggest new turns of the literary kaleidoscope; for every one of these 'Celebrated Friends' were, of course, Remarkable Sons, or Illustrious Daughters, or Famous Brothers, and may easily, if the demand holds out, be regarded in future works from those particular aspects.

Of course, if such books as these were really books—that is, works of original information, and not, as they generally are, mere bungling compilations, and shameless appropriations of the labours of others—there would be no serious objection to them. The assertion in the Preface

to the present work, that while its scope "may be limited, infinite care has been taken to render it accurate," induced us, therefore, to turn to a few of the best known biographies; but we had not read far before we discovered that Mrs. Thomson's claim to "infinite care" and accuracy are wholly without foundation. From a writer who some time ago produced two volumes of *Memoirs of "Viscountess Sundon"* without discovering that her heroine was not a Viscountess, but lived and died the wife of an Irish Baron, we should not indeed expect any great attention to trifles; but autumnal leaves of Valombrosa are not more thick than the blunders and absurdities scattered up and down these volumes. Not to mention such printer's errors as the "*Princess de Lambelle*," "*Easton Norton*" (for *Easton Neston*), "*Miss Gumby*" (the mistress of Bolingbroke) for *Miss Gumley*, "*Willis's*, where the wits congregated" (we suppose for *Will's Coffee-House*), and such French as "*bas-blue*," "*la Quietisme*," and "*savoirs-faire*," Mrs. Thomson informs us that Steele, "in order to impress upon his own erring heart principles of religion and self-control," wrote "a poem," which was "at first an anonymous work, and was called 'The Christian Hero.'" If so, it was certainly turned into *prose* before publication. Steele's illegitimate daughter, Elizabeth, we are told (i., 284), "became the wife of Mr. Arguston"; and, again (p. 292), her married name is stated to have been "Mrs. Ayreton"—the fact being, that her husband's name was neither Arguston nor Ayreton, but "Aynston," as Nichols, from whom Mrs. Thomson derives her information, several times informs his readers. So Lady Carteret, daughter of the Countess of Pomfret, figures (ii. 343) in the company of "the Duke of Bolton, who had married Lavinia Fenton;" but if this be correct, the Duke in addition to his other peccadilloes, must certainly have been guilty of bigamy; for his first Duchess, the daughter of the Earl of Carberry, did not die till 1751, when poor Lady Carteret had been dead several years. "The funeral of Mrs. Steele," says the author of '*Celebrated Friendships*,' "happened to be attended by a beautiful and charming woman of about twenty-nine years of age. She was the daughter of Jonathan Scullock, Esq., of Llandunno, Carmarthenshire; and Steele testified the great respect he bore her in his dedication to the '*Ladies' Library*.' Steele, it is hoped, testified his respect for this lady some years before, when (1707) he married her. The '*Ladies' Library*' was not published till 1714, and of course the dedication is "to Mrs. Steele."

With an air of great precision and laborious minuteness we are informed that Pope completed "his translation of Homer, which he had begun in 1712, in his twenty-fifth year, and which he finished in 1718, his thirtieth year." The fact is, that it was the *Iliad* which was finished in 1718—the "*Homer*" was only finished upon the completion of the translation of the *Odyssey*, in 1725. Nor is Mrs. Thomson more happy in her reflections than in her "facts." Steele, she tells us, sometimes wrote to his wife "from Bow Street, a suspicious address, indicative of his having been taken up to a police-station when fuddled," but unluckily Bow Street, though very suggestive of fines and imprisonment to modern readers of newspapers, at that time had no such associations, the police court not having been removed to Bow Street until many years after Steele was dead. By a similar unlucky flourish, Pope's father, whom the poet himself describes as

Born to no pride, inheriting no strife,
Stranger to civil and religious rage,

—is thus alluded to:—

"His father, indeed, was one of those staunch and resolute believers whom no son of so gentle a nature as Pope's could dare to contradict. No Jacobite of the sternest loyalty ever hated the new dynasties more than Alexander Pope, linen-draper (or, according to Mr. Ruffhead—merchant) as he was (and probably, as is now the case in Scotland, he might have been styled 'a merchant,' although a retailer of linen). Such was the tyranny of the liberal government under William the Third that Mr. Pope, senior, could not vest his money in real securities, on account of his being a papist. He scorned to lend it to a government which he did not acknowledge; and therefore he took with him, even into the then remote parts near Windsor Forest, the large sum of 20,000*l.*, upon which he lived, gradually consuming the capital, so that by the time of his death a great part had been consumed,—

For right hereditary tax'd and fin'd
He stuck to poverty with peace of mind.

To such a father Pope could not dare to betray the slightest deviation from the strictest rule of faith, far less to breathe a word of scepticism, or to utter a doubt of the authenticity of the Old Testament."

All this, as every reader of Johnson's '*Lives*' will easily perceive, is founded entirely on the absurd story of Pope's father locking up his fortune in a box rather than invest; although, as we showed some years since [*Athen.* No. 1393], by evidence beyond dispute, he had invested in every available security,—in lands, houses, mortgages, French *rentes*, &c. Again, Edward Blount, of Blagdon, Devon, Pope's friend and correspondent, does duty for Lister Blount, of Maple Durham, the father of Martha. "Amongst the friends dearest to Pope's heart was Edward Blount, of Maple Durham, a descendant from an ancient Roman Catholic family. To Mr. Blount many of Pope's letters were addressed in 1714; and they show a more than ceremonious interest in the father of one whom Pope loved with all the ardour of an impassioned nature." On which we may remark, that there is no letter from Pope to Mr. Blount, the father of Martha, of any date; he died, indeed, in June, 1710, and it is doubtful whether Pope ever knew him: and even to Edward Blount, with whom Lister had no connexion, there is but one letter in 1714, which is of doubtful authenticity.

Of Queen Anne and James Stuart, Mrs. Thomson says that the former "was too gentle at heart to issue proclamations against one whom, in spite of all calumnies, she believed to be her brother." But if Anne believed the Chevalier to be her brother, she must have been, not only a dull, but a despicable woman; for she it was who raised the question of his legitimacy; and her letters to her sister prove that she it was who poisoned the minds of the Prince and Princess of Orange on this point. The account which Mrs. Thomson gives of Swift is still more startling. Not only are the foolish speculations of others received and recorded as true, but the authorities have been read so carelessly, that undisputed facts are ridiculously misrepresented. Take an illustration:—

"The ramble down the Wye may chance, after viewing the beautiful fragment of Goodrich Castle, standing in its rich colouring, alone, away from the haunts even of peasants, to pass through the village that bears the same name. Let him pause at a half-ancient, half-modernized parsonage, and he will see above the entrance the arms of *Dean Swift's father*, who was, in 1667, when *Jonathan Swift was born*, vicar of the place. It is a modest yet solid building that parsonage, and the honoured incumbent shows you the armorial bearings of the Swift family with pride. How little in accordance with his after-life is that simple, delicious scene. Here, according to most records, *Jonathan was not, it is true, born*, but here his boyhood *must have been passed*; how simple, how secluded, must have

been Goodrich then: scarcely a high road there, save through the village—a bridle road, perhaps, may have skirted the base of Coppet Hill, on the other side of which flows the Wye. Swift's father, from his placing his arms on the house porch, must, probably, have owned the living. Can we imagine it? The author of 'The Tale of a Tub,' the murderer of the broken-hearted Stella,—above all, the writer of those incomparable yet despicable letters, so full of gossip, worldliness, wit, discrimination, and amusing beyond all other letters, because, perhaps, they are so remorselessly personal,—can he have wandered by that pure stream, and learned his first experience of this beautiful world in yon beechwood—or on the summit of the noble Doward Hills?"

This is circumstantial, but everybody knows that Swift was the posthumous son of Jonathan Swift, steward to the King's Inns, and born in Hoey Court, Dublin; that at six years old he was sent to school at Kilkenny, and at fourteen was admitted into Trinity College, Dublin. We say nothing of the "murderer." That is an absurd story which, having been countenanced by respectable authorities, we did not suppose that Mrs. Thomson would take the trouble to investigate, and it is re-echoed throughout the narrative; but let the reader think of a person who could write such circumstantial nonsense presuming to narrate and expound the career and character of Swift!

Upon the slender ground that Lady Hertford was said to have interceded with the Queen to save the life of Richard Savage, Mrs. Thomson gives us again the old story of the career of that "unhappy, misguided" man. Her sole authority is the well-known memoir by Johnson, which she adopts and paraphrases, evidently without a suspicion of its glaring inconsistencies and proved errors; for she assures her readers that "all its romantic events are well substantiated." We accordingly hear once more that the assumed unnatural mother, "to secure a release from the Earl of Macclesfield, made a voluntary confession that the wretched infant," &c., was "the offspring of the Earl of Rivers," though the annotators of Johnson have long ago discovered that this was all a mistake; and although the proceedings of the Earl in the Arches Court and in the House of Lords to procure a divorce, in the teeth of the Countess's strenuous resistance and denial of the charge of adultery, have actually been published. Of a piece with this curious proof of the vitality of romantic falsehoods, we have the following story of Dryden's funeral, once well known, but now, we must presume, forgotten, as Mrs. Thomson gives it merely *à propos* of the fact that Lord Jeffreys happens to be mentioned as the father of Lady Pomfret:

"On the Sunday morning after the poet's death, when the hearse was at the door and the poet's body in it, whilst eighteen mourning coaches were attending, a party of young rakes rode by the door, and one of them, Lord Jeffreys, seeing the procession, which had begun to move, asked whose funeral it was. He was told it was Mr. Dryden, whereupon he declared that so great a poet should not be buried in so private a manner, and he declared he would take upon himself the honour of interment, and give a thousand pounds for a monument. After a time he persuaded the servants to show him up to the room where Lady Elizabeth Dryden was still in bed: they complied, and he unfolded his wishes; Lady Elizabeth refusing, he fell on his knees and declared he would never rise till she granted his request. Poor Lady Elizabeth fainted away, and Jeffreys pretending that he had gained her consent, went down stairs, and ordered the body to be taken to Cheapside, to a Mr. Russell's, an undertaker, there to await further orders. Meantime the choir and the Abbey were lighted up, the grave was dug, and yawned to receive the dead. The Bishop awaited the corpse, and awaited for hours in vain. The following day Charles Dryden went

to the Bishop, and Lord Halifax, and stated the whole case to them. The undertaker repaired also three days afterwards—having heard nothing—to Lord Jeffreys for orders; but was told that his Lordship remembered nothing of the matter, and supposed it was a drunken frolic:—and added he might do what he liked with the body. Mr. Charles Dryden, in consternation, wrote to Lord Halifax and the Bishop of Rochester, who now refused to have anything to do with the affair, and the body remained unburied three weeks, until Dr. Garth, Dryden's intimate friend, sent for it to the College of Physicians. * * One heart throbbed with passionate grief and anger as the body of John Dryden was thus lowered into the earth. It was that of Charles Dryden; that ill-fated, high-spirited young man, whose nativity his father had cast. * * No sooner were the funeral obsequies over than he sent a challenge to Lord Jeffreys. It was not answered. Several others were sent. At last the young man went himself. Charles Dryden receiving no reply, waited and watched for the young lord; but waited and watched in vain; for Lord Jeffreys found it best to depart from London, and the insulted family of Dryden found no redress; and the matter was settled, as many disputes are, by the great arbitrator, death."

On the strength of this absurd narrative Mrs. Thomson remarks, that with the name of Dryden "the name of Jeffreys will henceforth ever be associated"; but we should have thought that every reader who has heard of the name of Dryden is aware that the circumstances of his funeral are well known, and that they bear no resemblance to this ridiculous fable. The whole story was, in fact, the mere invention of the notorious Mrs. Thomas, satirized by Pope in 'The Dunciad,' under the name of Corinna; and it first appeared in one of Curll's Grub Street pamphlets. Its groundlessness and absurdity were fully exposed by Malone some sixty years since; and Sir Walter Scott also alludes to it in his 'Life of Dryden' as a "memorable romance," which the industry of Mr. Malone has sent, with other fragments of the same lady, to the 'tomb of all the Capulets.' The "tomb of all the Capulets" was an unlucky metaphor; but Sir Walter could hardly have anticipated this new illustration of how that which is believed to be dead, and consigned to the "tomb of all the Capulets," may come forth and walk this world again.

An amusing illustration of the mere mechanical character of this kind of literary patchwork may be added. In the first volume we have the following anecdote of Sir Richard Steele and Lord Finch:—

"When the question of Steele's expulsion was mooted, Lord Finch stepped forward, and attempted to speak in behalf of the accused, but was overcome by modesty, and by deference to that assembly in which he had not hitherto spoken a word. As he sat down covered with confusion, he was heard to say, 'It is a struggle; I can't speak for this man, though I could readily fight for him.' His words being whispered from one to another, operated in an instant like electric fire; and a sudden burst from all parts of the House of 'Hear him! hear him!' with ineffable marks of encouragement, Lord Finch rose, and, with astonishing recollection and the utmost propriety, spoke a speech on the occasion, in which, as it was related to this writer, in the language of the theatre, 'there was not one word which did not tell.' The eyes of the whole company were upon him, and though he appeared to have utterly forgot what he rose up to speak, yet the generous motives which the whole company knew he acted upon, procured him such an acclamation of voices and cheering, that he spoke with clearness and magnanimity."

This is a fine story; though many of our readers have, no doubt, met with it before. But are we really to believe that an ear-witness "related it to the writer"? We are unwilling to make guesses upon such a

subject as a lady's age; but seeing that Steele's expulsion occurred nearly a century and a half ago, we must assume that in clipping this paragraph from some other book Mrs. Thomson merely forgot to strike out the puzzling voucher for its correctness. But when we come to another memoir we have, what is evidently the same story over again; though this time it is Lord Bolingbroke who is attacked, and General Ross who is the generous defender:—

"When the General [we are told] stood up to defend him he was so overpowered by his feelings that he could not utter a word. After remaining some time in an attitude to speak, he was about to desist, perfectly overcome. As he sat down in silence cheers burst from every part of the house. For a moment the General's composure returned; and he expressed his wonder that a hundred voices were not raised by those who were bound to Lord Bolingbroke by ties of friendship. Again his voice faltered: 'I have much to say,' he managed to say, 'in my friend's defence, but I must leave it to another opportunity.' He sat down amid loud cheers. 'It is strange,' he said to a gentleman near him, 'that I cannot speak for my friend, when I would willingly die for him.'"

No doubt, both these stories were found as they are given. It may be that General Ross ventured upon a plagiarism upon the young Lord Finch's anecdote, though, as the two events must have occurred in the very same place within a very few months of each other, such a fraud would have been somewhat bold. At all events, the coincidence should have been mentioned; but there is no such thing as memory in a pair of scissors, and a pastebrush can, of course, only secure mechanical coherence.

We have hastily noted these flagrant proofs of carelessness or incompetence, because Mrs. Thomson's work happens to belong to a class which is rapidly increasing, and which, if the useful aims of biography are not wholly given up, really form a serious obstacle to the spread of truth and sound information. The most ingenious apologist for bookmaking, the most hopeful believer in progress and improvement, could hardly, we think, maintain that any good purpose is served by the present wholesale production of compilations of this kind.

The American Union; its Effect on National Character and Policy, with an Inquiry into Secession as a Constitutional Right, and the Causes of the Disruption. By James Spence. (Bentley).

ALTHOUGH Mr. James Spence takes the right side on the main question raised in his book, and arranges with lucidity and force the arguments which establish the existence of a constitutional right to secede in the States of the American Union, he commits some errors of judgment, employs some unsound reasoning, and consequently we are unable to award to his volume, as a whole, the praise which is due to it in certain parts. Leading off with a general review of Republican institutions from the Amphyctionic Council of Greece to the Argentine Republic, Mr. Spence condemns Federal Republicanism on the ground that it is an arrangement liable, like all other systems of government, to decay, alteration and death. "In endeavouring to form an opinion of the real value of the Union, one of the first questions that arises in the mind is, whether this form of government—that of a Federal Republic—be really permanent in its nature." A reference to history enables Mr. Spence to state positively that we are not warranted in anticipating a perpetuity of vigour and harmonious action for republican

federations; and therefore he condemns them as mere chimerical delusions. This argument of durability might be applied with equal justice and effect to dynastic settlements of every sort and modification. In his first pages, also, Mr. Spence, while he expresses his distrust of republican federations, is not sufficiently precise as to the element of them which particularly rouses his suspicions; and to the last he seems at a loss whether he should attribute their rottenness to their Federalism, which he holds to be awkward and impracticable, or to their Republicanism, which he deems to be the source of every grave social evil. After thus surveying ancient and modern Republicanism Mr. Spence comes to the consideration of the American Union, and examines the origin, formation and adoption of its constitution, under the guidance of George Ticknor Curtis. With a loyal confidence in his teacher, Mr. Spence adopts implicitly all the mistakes, prejudices and misrepresentations of that partisan historian. The leaders of the Monarchist party, who, even during the War of Independence as well as after its successful termination, exerted themselves against the cause of constitutional liberty, are, to Mr. Spence, the philosophic leaders of Trans-Atlantic thought at the close of the last century. Alexander Hamilton is mentioned as "the master-spirit of the framers" of the Constitution! And *King Adams*, as he was derisively called for his absurd vanity and pernicious conduct, is mentioned as one of "the most eminent of the Fathers of the Republic." In the same way that this luckless hero of American history is eulogized with puerile ardour, Jefferson is covered with opprobrium and disdain. Indeed, under the influence of Curtis, Mr. Spence has lashed himself into such a fury with the great President and statesman, that he falls into the amusing blunder of stigmatizing the author of the Declaration of Independence as an upholder of the institution of slavery. Surely, decency as well as prudence requires that a writer should not address the public on questions affecting the character of the illustrious dead, until he has conscientiously taken pains to arrive at the truth; and that, when he has ascertained the "facts," he should state them fully and fairly.

On throwing aside the crutch lent him by the historian, Mr. Spence does not, at first, fare much better as a judicial observer of political and social phenomena. "What," he asks, "have really been the effects of the Union and the Constitution of the United States on the welfare and character of the people? Have they really worked for good or for evil? We know something of the period of Washington. Are the people now the same?" To answer these questions, Mr. Spence begins by enumerating the worst features of the ordinary, half-educated citizens of the United States,—their love of exaggeration, proneness to lie, laxity of political principle, readiness to adopt Lynch law, excitability and pecuniary immorality,—and ends by complacently setting down all these and divers other evil qualities to "The Union." In the period of Washington, the people were simple, honest, truthful, and the reverse of loquacious; since then, they have become an enormous nation of rogues, knaves and braggarts. The cause of this change for the worse is "The Union," by which term the author points to the rupture of the colonies from the mother-country, as well as their subsequent system of government. Had the States remained quietly attached to George the Third, the inhabitants would not have become remarkable for long talking, tobacco-chewing and addiction to exciting beverages. Such is Mr. Spence's position; and he maintains it with a

series of paradoxes, contradictions and gratuitous assumptions which point him out as peculiarly fitted to play the part of a stump-orator to those United States constituencies for whom he cherishes lively scorn. Most men of average common sense, endeavouring to trace the social and moral phenomena of a people to their sources, would consider all the anterior conditions of the nation, and see how far the phenomena and conditions had parallels in other societies. Had Mr. Spence pursued such a plan of inquiry, he would have found that nearly every characteristic he deplores in the United States makes itself manifest in our Australian colonies; where, though no disruption from the mother-country has taken place, the power of the aristocratic classes is small, and the influence of the multitude is paramount,—and where, in the absence of an adequate machinery for the instruction of a rapidly-increasing population, and in the presence of rich fields of industrial enterprise, offering no inducement to the young to undergo the irksomeness of continuous study, men are either only superficially educated or are left altogether to the tuition of life's chances. It would be useless if it were possible to enumerate all Mr. Spence's fallacies and self-contradictions in this portion of his work. "The Union" is represented as primarily the cause of the vulgar American's love of exaggeration; the said tendency to boast being immediately the effect of the rapid increase of the States in power, number and population. It never occurs to the philosophic writer that the rapid growth of the colonies set in generations before the Union was ever contemplated, and has, since the Union, progressed in obedience to laws, on which the political institutions of the country can have had only a trifling influence. The Union produced the enlargement of the colonies, and the enlargement of the colonies produced the habitual large-talking of the colonists; *ergo*, the Union produced the large-talking. Such is one of several similar propositions with which Mr. Spence entertains his readers. But the eccentricity of Mr. Spence's lawless argumentations is best seen by the *sang-froid* with which, after maintaining that the Americans have been gradually converted from honest Anglo-Saxon farmers into shameless rascals, by republican institutions, he proceeds to prove that those simple husbandmen of Washington's period (so enthusiastically lauded a few pages before) were as mean-spirited and corrupt as any of their descendants. To destroy and utterly sweep away the foundation on which his most elaborate argument against "The Union" rests, Mr. Spence quotes a letter, in which Washington says:—"Such dearth of public spirit, and such want of virtue; such stock-jobbing, and fertility in all the low arts to obtain advantage of one kind or another, in this change of military arrangements, I never saw before, and I pray God's mercy that I may never be witness to again."

Mr. Spence's introductory chapters are signal failures; but in the subsequent portions of his book, where, with a mind insufficiently stored and imperfectly trained, he no longer assumes the office of historical critic, but gives us his opinions, as a man of business, on recent events, he appears to much greater advantage. His chapter, entitled "Is Secession a Constitutional Right?" is so good that we regret he did not confine his attention to that one subject, and disseminate his views thereon in the form of a pamphlet. More than eight months since, when Mr. Lincoln was just about to enter on his disastrous tenure of the Presidential office, and had, a few days before, entertained the crowds thronging his road to Washington

with assertions that a State had no more constitutional right to secede from the Federation than a County had a right to secede from its State, we took occasion [No. 1740] to draw attention to the singular ignorance of constitutional law displayed by the nominee of the Abolitionists. At that time the question at issue was not so well understood as it is now; and we were almost alone, amongst the organs of public opinion on this side the Atlantic, in maintaining the doctrine of a constitutional right to secede being enjoyed by the separate States of the Union. The term "rebels" was almost universally applied in the columns of our contemporaries to the seceding States; and it required some courage at an ordinary London dinner-party to defend Mr. Jefferson Davis from a charge of treason to his country. Eight months have, however, wrought a change; and now it is only in the letters of vituperative New York journalists that disrespectful language is applied to the gallant defenders of Constitutional Liberty in the Confederate States. Discussion has effected a revolution of opinion, so that Mr. Spence will encounter scarcely any opposition to the following concise and forcible statement of his case:—

"Secession is by no means a novel doctrine. In the first session of Congress under the new Constitution, it was threatened in the first serious contest that arose; and this in the presence of several of the framers of the Constitution. Again, when Washington expressed reluctance to be elected as President for a second term, Jefferson wrote to urge his assent; and the weightiest reason he assigned, in proof that the country required experience at the head of affairs, was this,—that the coming election would involve great danger of a 'secession from the Union' of those who should be defeated. It can hardly be supposed that this right would have been openly declared by members of Congress, or that the probability of the event would have been thus urged on Washington, had it been regarded by public opinion as an illegal or treasonable act. It seems rather to be inferred that there existed in the minds of those who with the facts so recent were most competent to judge, a conviction that the right existed and might be exercised—that able and just government would avoid it—but still that it was there. The doctrine, indeed, has been maintained and loudly declared, both in the North and South, at frequent periods in the history of the Union. Jefferson, in his *Annals*, refers to that occasion of its being first raised in Congress, and observes that it was the Eastern, that is, the Northern States, who especially threatened to secede. He describes a walk with Hamilton, in which the latter painted pathetically the danger of the secession of their members, and the separation of the States. And the Northern States were the first to raise it practically. The war of 1813 was highly unpopular in that district, and when called upon by the President to supply their quotas of militia, they absolutely declined. In the words of Jefferson to Lafayette: 'During that war four of the Eastern States were only attached to the Union, like so many inanimate bodies to living men.' But they went far beyond inaction. They called a convention at Hartford, of which the proceedings were suppressed, but the object is well known; a flag appeared with five stripes, secession was threatened in the loudest terms, nor can there be a doubt in the mind of any one who studies the events of that period, that the New England States would have seceded from the Union had the war continued. The State of Massachusetts has threatened, indeed, on four separate occasions to secede from the Union. First, in the debates referred to on the adjustment of the State debts; secondly, on the purchase of Louisiana and its admission into the Union; thirdly, during the war of 1813; and fourthly, on the annexation of Texas, when, we believe, one chamber of her legislature actually passed a vote of secession. On these occasions it was no mere act of excited individuals, but the general voice of the community. Yet this

State is now the loudest in denouncing it, when inconvenient to herself; and a bastille is now said to be preparing in the vicinity of Boston, for the incarceration of those as political prisoners who simply utter the opinions which, when it suited, this very State has so often and so vehemently expressed. It has been a popular illustration with the advocates of the Union, that if a State may secede, so may a county from a State, or a town from a county, until society break up into chaos. The fallacy of this is very obvious. A State claims to secede in virtue of her right as a sovereignty. When a county becomes a sovereignty it may prefer an equal claim, but then it cannot be a county. The comparison fails in other respects. The secession of a State from others is the case of men who separate; the secession of a county would be that of a limb torn from the body. There is also no such practical danger as that which has been described. The secession of a single State would be suicidal; it would be surrounded with custom-houses, cramped with restrictions, and crushed under the expenses involved. North Carolina and Rhode Island, after refusing to join the Union, and holding out for more than two years, were at last constrained to accede, by the same causes which will always prevent any State from attempting to stand alone. Practically the right could not be exercised, even if conceded, except by a number of States together, sufficient in resources to enable them to maintain their position, and to endure the heavy cost of a separate government. Indeed, if justly governed, it is by no means clear why there should be any desire to secede."

It is often asked why the Constitution omitted to provide for the contingency of a State wishing to depart from the Federation. On this point, Mr. Spence observes:—

"On turning to the Constitution, it causes surprise to find that no prohibition of secession exists in it. Those who framed it were men well versed in public affairs, surrounded by angry passions, employed in the very act of breaking up a Constitution, if, indeed, it may not be said, of seceding from one of the States, for Rhode Island continued to adhere to it. They provided for a State dividing into two or more—for several uniting into one—for the admission of States yet to come into existence. Why, then, this remarkable omission? A contingency far more probable than these was that of a State becoming dissatisfied, and desiring to separate. Was such an omission the result of negligence, of inability to foresee so probable an event, or was it the result of design? It has been contended that it would have been improper to forbid a State to withdraw—that it would have been 'futile and undignified' to have added to a law, 'And be it further enacted that the said law shall not be violated.' But this is just what all law has to do; and that which does it not, is not law. Who had the powers of a lawgiver over independent, sovereign States entering into a compact of their own free will? And where is the law, either to be violated or obeyed? There is a provision for a State separating into pieces, and this appears quite as undignified as to provide against a State, whole and intact, separating from the rest. There is provision against the treason of individuals; and if a State can also commit treason, it would be strange law that provided against crime on a small scale, omitting to deal with it on a large one. The men who framed the Constitution were eminently practical men. It cannot be supposed that they would slight so formidable a danger. Why, then, the omission? For the soundest and wisest reasons, which we have on record from their own lips. In the first place, had there been inserted in the Constitution a compulsory clause of this nature, it would have been impossible to obtain the ratification of the States. Very difficult, at the present day, would it be to obtain the assent to such a clause even of the Northern States. Theoretically nothing would be easier, but when it came to the point it would hardly be possible to prevail upon Massachusetts, even at this day, to abandon, for ever, her often-asserted independence and sovereignty, and accept, in reality and truth, that position in which she is said now to exist—that of the province of a wider

power. And if there would now be such practical difficulty, with the State whose present professions are those most favourable to the step, how great would have been the obstacles when all the States were to be included, many hostile to, and jealous of, the rest, and when the task was regarded, and proved to be, all but impossible, without this further and strong element of repugnance?"

Mr. Spence shows so much ability in these and similar passages of his work that we sincerely regret the deficiencies and demerits of other parts. We heartily concur with nearly every opinion advanced in his chapter on 'Tariffs,' and the chapter entitled 'The Struggle to maintain the Union.' It is almost needless to say, that the author insists on the inability of the North to vanquish the South, and maintains "that a continuance of the war can have no other result than to leave the people of the South in possession of the political power they now possess, and to burthen the North with a crushing load of debt." Recent events indicate that the inhabitants of the North are already beginning to take this view of their case.

OUR LIBRARY TABLE.

A Million's Worth of Property and Five Hundred Lives Annually Lost at Sea by the Theory of Gravitation. A Letter on the Figure of the Earth, addressed to G. B. Airy, Esq., M.A. By Johannes Von Gumpach. (Stanford.)—If Government would send out an expedition to measure a degree at the equator, the knell of universal gravitation would be sounded, and the overweening pride of speculative science would be prostrated. For, Newton having made the earth flatter at the poles, instead of at the equator,—which the author is satisfied would be found the case if the expedition were set to work,—the consequence is such mistake in the methods of determining a ship's position as sends five hundred men to the bottom every year, each with two thousand pounds as an outfit. We are not much frightened by this, because we find that M. Von Gumpach and the mathematicians differ about the meaning of the words "degree of latitude" and "curvature." Moreover, for aught we can see in the tract, no such consequences would be incurred as the author describes, even if he were right. For if the wrong method of laying down places on the earth be accompanied by a correspondingly wrong method of going from place to place, the result is that the way from place to place is known. Many remember that, in the long Indian voyage, when no land whatever had been seen since the coast of England was lost, the captain would announce the approaching appearance of the flag-staff at Madras to his weary passengers, who would see it within an hour or two of his prediction, in the direction which had been given. This by no means proves that our author is wrong: all it proves is, that Madras and the way of looking out for it were made equally wrong; which will do. It would be better that both were right; but it seems that, practically, there is no astronomical danger in our actual navigation. The author has written one more of the tracts about the conclusions of which it is not necessary to inquire because, true or false, the methods are wrong.

Lays of Lovely Life. By Ruth Wills. (Simpkin, Marshall & Co.)—A nice little volume of pleasant verse by a worker in a warehouse, who began life in the lowliest homes of the poor. It is something for one in such a position to be able to commune with the masters of song, as the writer of this book speaks of doing, even to the responding with her whole soul, to the music of Milton's matchless poem. It is much to be thus endowed with the power of making one of the dark byways of life bright with the flashing magic lights of poetry, and weave one of its golden threads in the grey woof of a lowly lot. Only, as in many such cases, the writer will have to find in the reading of poetry, and the writing of her verse, her own exceeding reward. Not all who aspire are inspired to awaken in other souls those echoes which Poetry

may have awakened in their own. In this respect many are called, and but few are chosen. Nevertheless, we have nothing but a kindly word, and a hearty good wish for writers like Ruth Wills. If they never become famous, and win the ear and love of a world, may their passion for poetry create such a beauty in their lives, and such an illumination in their look, as shall be fully appreciated by some one who is more than all the world to them! To adapt the words of Wordsworth, may they croon over their verses, until the beauty born of murmuring sound, shall pass into their face. Perhaps the reader would like a specimen of Ruth Wills's verse. Here is one; and we hope the reader, like "Oliver," will ask for more.—

THE MAID IS NOT DEAD.

Oh, say not she is dead!
Breathe not a word so dread!
Though still and cold the graceful form reclineth.
Forget the beauteous clay,
High in a purer day—
A more exalted sphere, the spirit shineth.
What though her budding spring
Has felt the withering
Of mortal blight and merciless decay!
What though her life's young morn
Has darkened in its dawn,
Ere she had tasted of the golden day!

A nobler, purer life,
With fadeless beauty rife,
Of deeper consciousness and richer bloom,
Has all its fullness showered
On her young soul, and dowered
Her being with a bliss which knows no gloom.

Ah! why so sadly grieve
That your beloved should leave
Her earthly dwelling for a palace fair?
Your loss to her has been
A boundless gain I ween,
And heaven is richer for the loss ye bear.

For now another gem
Glows in the diadem
Of Him who fills the place with glory-beams;
Another precious flower
Blooms in the blissful bower;
Another lamb feeds by the crystal streams.

Another minstrel flings
Music from sweet harp-strings;
Another star illumines the spirit-land;
Another white-robed form
Beaks in the radiance warm;
Another seraph joins the sister band.

Ah, weep! but not in woe;
Rather should joy-tears flow,
That your sweet child hath found a home so fair.
Let hope and faith be strong,
And ye will both, ere long,
In all her joy and all her glory share.

Paul Duncan's Little by Little: a Story for Young Folks. Edited by Frank Freeman. (Low & Co.)—Here in this month of November, 1861, are Mr. Frank Freeman and his publishers presenting the public with a story of high moral purposes, and a commercial statement unquestionably false. Paul Duncan is a brave-hearted, honest, noble lad who does his business on great waters, and, "little by little," raises himself from the condition of a poor orphan sailor lad to be a thriving, happy and good man. The story of how he saves little Carrie Littleton from a watery grave, and eventually marries her, will interest children, who will also approve their hero's conduct in refusing to desecrate Sunday by entering his boat on that day, either for work or amusement. Paul is a fine fellow, and disdains to say anything at variance with the truth. Such, however, is not the case with Paul's historian and the publishers of his achievements, who audaciously avar, in the face of facts and calendars, that their book has been published in 1862. Perhaps the recent frosts have effected in them mental confusion as to the course of time, making them think that we are already in the heart of the winter. It is right to add, that Mr. Frank Freeman's 'Little by Little' is an adaptation for English children of Mr. William T. Adams's American tale entitled 'Little by Little.'

The Children's Picture-Book of the Sagacity of Animals. Illustrated with Sixty Engravings by Harrison Weir. (Low & Co.)—A better reading-book for young children than this illustrated 'Picture-Book of the Sagacity of Animals' we have not seen for many a day. The stories are numerous, brief, and of great variety. Mr. Harrison Weir's illustrations are all of them good, some of them being very good. For a few weeks, however, a grave objection can be urged against this meritorious work.

It teaches little children to tell falsehoods. Put forth by its publishers for sale at the next opening of a new year, it bears on its title-page the date 1862. When, however, time shall have removed the more apparent evidence of this "trade fib," papas and mammas will do well to think about buying the 'Picture-Book' for the nursery bookshelf.

Gabrielle: a Tale. By S. B. and C. D. (Weston-super-Mare, Wheareat; London, Hamilton, Adams & Co.)—This is one of those anomalies—a religious novel—where texts and flirtations are placed alternately one on the top of the other. A proposal is made with a solemn prayer for the more fortunate object of the lady's affections, and this prayer is supposed to result in her final conversion, after a great many years of trial and disappointment. There are two heroines in the book: one very religious, and the other very worldly-minded. They correspond constantly. Gabrielle marries a rich colonel, "a most fascinating man," and Emmeline espouses only a poor curate. They both have children, and we are led to infer much, from the different tones the ladies take in regard to their educational systems. Presently, their husbands die. Gabrielle Belmont is impatient and rebellious under her trials; Emmeline Trelawny is patient and submissive. The sons of each become college friends, and Augustine Belmont falls in love with his mother's namesake, Gabrielle Trelawny, who refuses him on the spot, because she has caught a glimpse of a book of doubtful tendencies lying on his table. But as soon as Mr. Belmont gives evidence that he has become very serious, and has rebuilt the church, and given her brother Alban a living, Gabrielle thinks better of it, and relents sufficiently to allow her brother to unite her hand to Augustine's "in the sacred bond of marriage." We have serious doubts whether this mixture of romance and religion has a very good effect upon the rising generation; but to those who approve of that style of book, 'Gabrielle' will, no doubt, prove acceptable.

Book of the Savages, from the Point of View of French Civilization. (Tribner & Co.)—The text of this book, with topics of some of the illustrations from the Abbé Domenech's pretended manuscript of American Pictography, is a fine satire on the swaggering assertion of M. Walewski, that France is at the head of human civilization, and that the world receives instruction from her. If the illustrations here produced are faithful copies of the original, we fear that the civilizers among the French statesmen and savants who adopt the Abbé's interpretations are something worse than mere swaggering insulters of other nations. If the plates in this critical pamphlet were simply silly, he who took them for Indian hieroglyphics of solemn significance might be allowed to pass either as a dupe or a hoaxer; but some of them are so hideously filthy that people should be warned not merely to refrain from buying or looking into the book, but even from speaking of it.

The Principles and Practice of Common School Education. By James Currie, A.M. (Hamilton, Adams & Co.)—Mr. Currie, the Principal of a Church Training College at Edinburgh, must needs have attended to his subject. He has methodized it in thirteen heads, involving four hundred and thirty points, each of which is treated in something more than a page, one point with another. Such an account of a book is refreshing, in this day of wordy dissertation without arrangement: it smacks of mastery in the writer and of utility to the reader. We recommend Mr. Currie's work to all who read on the subject. We are much in agreement with by far the greater part of what we have closely examined: and in every case in which we differ we recommend Mr. Currie to those who take our side, as an opponent worth consulting.

A First Latin Reader, by A. H. Bryce (Nelson), has been prepared upon a similar plan to that of the 'First Greek Reader,' by the same author. It contains the *Accidence* of the Grammar, intermingled with easy exercises for translation from Latin into English and *vice versa*, followed by extracts from Phædrus's 'Fables' and Prof. Lhomond's 'De Viris Illustribus Urbis Romæ,' with vocabularies and a brief synopsis of the syntax of

simple sentences. We fear the reading extracts will be found difficult without explanatory notes.—There is no room for any such fear in the case of *Easy Latin Exercises for Beginners, on the Accidence and the Simpler Rules of Syntax in the Latin Grammar*, by Rev. T. H. L. Leary (Mozley), which consist too often of isolated phrases or even single words. The exercises might have been made more suitable by an earlier use of a few verbal forms, and the introduction of longer sentences.—The principal feature in *The Edinburgh High School French Conversation Grammar*, by C. H. Schneider (Black), is, as indicated by the title, the insertion of questions and answers in French upon the grammatical rules, for the purpose of accustoming the pupil to converse in French. But if he is to commit the answers to memory, without understanding either the English or the grammatical construction, we do not think much will be gained. Besides the conversations, there are exercises for translation both ways, and the ordinary rules of grammar, first in English and afterwards in French.—There is a complexity about *The School Grammar, combined throughout with Aids to English Composition*, by J. Stormonth (Black), which we cannot think desirable. Too many things are attempted at once for all to be well done. The omission of illustrative examples after each rule or definition is another serious drawback.

LIST OF NEW BOOKS.

- Anderson's Ministers' Directory, 2nd edit. cr. 8vo. 5/6.
 Arnold's Henry's First Latin Book, new edit. 12mo. 3/6.
 Athelstan: a Poem, fc. 8vo. 6/6.
 Barnes's Tie, or, a View of English as a Teutonic Tongue, 5/6.
 Beeton's Dictionary of Universal Information, Vol. 3, 8vo. 6/6.
 Bible Readings: the Life of Abraham, 12mo. 3/6.
 Blunt's Duties of the Parish Priest, 4th edit. cr. 8vo. 7/6.
 Booker's Meditations in Poetry and Prose, fc. 8vo. 1/6.
 Bradley's Dark and Bright Spots in Life, 12mo. 1/6.
 Brewer's Guide to Roman History, 8th edit. 12mo. 3/6.
 Coleman's Paul's Epistle to the Romans, new transl. cr. 8vo. 7/6.
 Cullingworth's Guide to the Colony of Port Natal, 12mo. 2/6.

SIR JOHN FORBES.

THUS distinguished physician died at the residence of his son, Mr. Alexander Clark Forbes, of Whitchurch, near Reading, on Wednesday, the 13th inst. He had for the last three years retired from the active duties of his profession, on account of failing health. He was a native of Scotland, and was born at Cuttlebra, in Banffshire, on the 18th of October, 1787. He received his early education at the Fordyce Academy, after which he commenced the study of medicine at Marischal College, Aberdeen, and at Edinburgh. At school and at college he was the companion and friend of Sir James Clark. They entered the public service of their country at the same time, by joining the Navy in 1807. Sir John continued in active service in the Navy till

1816, when he again returned to Edinburgh and graduated in that University in 1817. He commenced the practice of his profession on shore, as physician at Penzance, in Cornwall. Here he entered on his scientific and literary career, by the preparation of a paper, entitled 'Observations on the Climate of Penzance and Land's End,' which was published in 1820. He afterwards contributed a paper 'On the Geology of the Land's End District and St. Michael's Mount,' which was published in the *Transactions* of the Royal Geological Society of Cornwall. These papers indicate the enlarged views which he took of the nature of disease, and its relations to climate and soil. He had, in fact, obtained promotion whilst in the Navy, for an able Report which he made to the Admiralty on the Meteorology of the West India Station.

In 1820 he married, and, leaving Penzance, settled at Chichester. Here he soon obtained a large practice, and was one of the principal founders of the Infirmary. He took an active interest in all the local institutions of the place, and showed his sympathy with popular education by delivering several lectures to the Philosophical Society, many of which were published. He was one of the first members of the Provincial Medical and Surgical Association, and contributed a very valuable memoir, 'On the Medical Topography of the Hundred of Penrith,' to the first and second volumes of the *Transactions* of that body. It is to be regretted that so little has been done by the medical profession in this direction; and that Sir John Forbes should have died without seeing his desire fulfilled, that the profession should possess something like a scientific natural history of the diseases of the British Islands.

He was one of the first physicians in this country to appreciate the value of the methods of percussion and auscultation, introduced on the Continent by Avenbrugger and Laennec. In 1831 he published a translation of Laennec's 'Traité sur Auscultation and Diseases of the Chest'; and in 1833 he translated the work of Avenbrugger, giving a series of "original cases illustrating the use of the stethoscope." In the same year he commenced, in conjunction with Dr. Tweedie and Dr. Conolly, 'The Cyclopædia of Practical Medicine.' To this great national work he contributed numerous articles, and also wrote for it 'A Select Medical Bibliography,' which was afterwards published as a separate work.

No sooner was this great labour terminated than he started *The British and Foreign Medical Review*. This was begun in 1836; and he discontinued his connexion with it in 1848. This Review was published quarterly, and, more than any other journal, has exercised a powerful influence in elevating the character of medical study, and giving a scientific tendency and philosophical basis to the practice of medicine. Nevertheless, its projector, editor and proprietor for twelve years, was pecuniarily a loser by his speculation. This did not deter him from publishing a copious Index, which is, indeed, a model of how such a work should be executed, and will always remain a most valuable guide to the literature of a highly-interesting period in the history of medicine.

His connexion with this *Review* ceased with a remarkable contribution from his pen 'On Homœopathy, Allopathy and Young Physic.' In it he protested against the senseless practice of administering large quantities of medicine in disease, without a precise knowledge of either one or the other. He advocated the necessity of a rational study of the nature of disease, and an abandonment of the practice of giving medicines whose actions were unknown. He gave great offence by this essay, and exposed himself to the attacks of those whose less-advanced studies did not enable them to appreciate the scientific soundness of his positions. He was not, however, a man to be deterred from the declaration of his convictions by clamour and one of his last medical works, which he published in 1859, was written as a "Legacy" to his 'younger brethren,' and which, with the title 'Nature and Art in the Cure of Disease,' developed further the views he had previously enunciated in the pages of the *Review*.

Sir John was an easy and graceful writer, and,

in his hours of leisure from his severe medical studies, he contributed several volumes to popular literature. Besides his Lectures at Chichester he published, in 1849, his 'Physician's Holiday; or, a Month's Tour in Switzerland,' which is one of the pleasantest books on small travel in our language. In 1852 and 1856 he published similar volumes, giving an account of two holiday tours, one in Ireland and the other in Germany and the Tyrol.

With all his scientific attainments he was more the literary man than the accurate observer, the thinker than the investigator. Hence he displayed a tendency to receive with toleration doctrines and theories which the thorough student of induction would have rejected, without serious inquiry. He was the patron of, if not a believer in, a modified form of Phrenology; he backed up the views of the total-abstinence party, and exposed himself to the danger of not being able to detect the impostures of Clairvoyance and Animal Magnetism. In his investigations of the last of these follies he came off triumphant, and succeeded in detecting the tricks and exposing the frauds of several disciples of the school of Mesmer. The result of these experiments was given at the time, in a series of letters published in our own pages, and in papers in the *Medical Gazette*. These he published separately, under the title 'Illustrations of Modern Mesmerism, from Personal Investigation,' in 1846.

It is not to be supposed that a man of Sir John's active mind and habits could rest satisfied with a residence in a provincial town. Shortly after the commencement of the *Review* he removed to London. He soon obtained the appointment of Physician in Ordinary to Her Majesty's Household. He was made a Fellow of the Royal Society, and became known for his sympathy with the advancement of science and the spread of education. He became a Fellow of the Royal College of Physicians, and was one of the active spirits that initiated the large reforms in that institution, which bid fair to place it once more at the head of the medical profession. During all the stages of the agitation for medical reform, he was found amongst those who advocated the principle of the changes which have been accomplished by the passing of the recent Medical Act.

He was not what is called a successful practitioner in London. The Metropolis will not tolerate even an apparent attention to other pursuits than prescribing at the bedside. But Sir John had other objects in view. He felt he had the power to draw the attention of his profession to its highest and noblest development. For this he wrote and worked; and few men, we believe, have left a more indelible impression upon the literature of his profession, in the first half of the nineteenth century, than the late Sir John Forbes.

THE CYRENE MARBLES.

THE following extract from a letter of an officer on board the *Melpomene*, which conveyed the marbles to Malta, will be read with interest:—

"We reached Marsa Sousa on the evening of the 26th September. Lieut. Porcher arrived early the next morning, and made all necessary arrangements; so that afternoon, at 4 P.M., I landed with one corporal and nine men, as a guard for Cyrene, and eleven carpenters. Cyrene is 12 miles from where we landed. At the above hour the men and myself started, carrying our haversacks, water-bottles and arms. The first part of the road was very fatiguing, for we had to climb the height of 2,000 feet on a road not of the best, a great portion of which was very precipitous. At first I could hardly keep up with my men; however, we maintained a good pace, halting occasionally to have a pull at our water-bottles, for it was awfully dry work, till about 6:30 P.M., when it became dark. At this time the men began to lag; and, for the last 4 miles, I had great difficulty in keeping them from halting altogether. However, by persevering, I succeeded in reaching Cyrene about eight. The carpenters and one or two of my men got so foot-sore they could hardly walk; some began reeling about, like drunken men, and

these were the men with whom, on first starting, I could with difficulty keep up. The great reason of their feet becoming so sore was, because they never wear shoes on board ship, and each man had served out to him, only that morning, a pair of ammunition boots, and these, of course, are indifferent fits. We surprised Lieut. Smith, who had just finished dinner, not thinking for one moment we should be marching in such a rough country at so late an hour, for we could not get the Arabs to hurry the loading of their camels at Marsa Sousa. Capt. Ewart thought it better I should push on at once, leaving the baggage to follow; so the men that night, having only what they stood up in, had to make themselves as comfortable as they could in a tomb, which Lieut. Smith used as a kitchen, and, having a number of grass mats, they spread them on the ground. Being so very tired, the men were almost instantly stretching themselves at full length upon them; but, as for sleep, not one of them got a wink the whole night, on account of the fleas, of which there are millions. Smith gave me a comfortable shake-down in his tomb, on a cork mattress on the top of some boxes; so that, by being off the ground, I managed, in some measure, to cheat the fleas, for I slept about half the night. Next day the camels arrived with our tents and baggage, and with wood with which to make the cases to receive the marbles. One camel was missing, and never afterwards turned up. I have not the least doubt, appearing the most valuable, it was coveted and stolen by the Arabs, for they are most inveterate thieves; it does not matter from whom they rob, whether friend or foe, all is fish that comes into their net. As ill luck would have it, it happened to bear my portmanteau, bed and bedding, and four great-coats and blankets belonging to the men of my guard.

I was at Cyrene for sixteen days, during which time my duties were not very arduous, so I had plenty of leisure time to wander in all directions in and about Cyrene, everywhere meeting with the most interesting ruins of temples and other public buildings, and immense columns of marble and red granite, the ground being much broken with mounds which, no doubt, cover some magnificent remains, and may be some day excavated. Lieuts. Smith and Porcher, in the few places they dug, have succeeded in making a splendid collection of marble statues, statuettes, heads and several inscriptions. Some of the statues are more than 8 feet high, and are pretty perfect, very beautifully sculptured, especially the drapery. Some of the statuettes, particularly those of women, are superb; the heads also are very beautiful, and strange to say, the hair is dressed much in the same fashion as at the present day. "*A l'Impératrice*" seems to have been the general mode in those days. The tombs are still very perfect, and extend on the hill side for a distance of 4 or 5 miles, the hill side being intersected by ravines, on each side of which they are to be seen; most of them are hewn out of the living rock, some are of great extent. Smith and Porcher counted in one no less than 108 niches for sarcophagi—the majority, however, hold only from seven to ten, with a few small niches, evidently for children; the faces of the tombs are still very perfect, and carved in the Doric style. Traces are still to be seen of the painted decorations, which were principally of gladiators, birds and flowers; they apparently only used the primary colours. Several of the sarcophagi are still well preserved, some being of the best marble, measuring about 7½ feet in length by 2½ in width—others are built tombs; all have been opened and rifled ages ago; the spoiler's hands have not left even a solitary one untouched. The site of the city is magnificent, and the country very rich and fertile. Were the water not allowed to run to waste, there would be an ample supply; the view is grand, and the horizon must be at least a distance of from 40 to 50 miles.

The working party from the ship consisted of about ninety seamen and marines, who were told off to three artillery waggons used for the purpose of transporting heavy guns,—they managed to get up from Marsa Sousa to Cyrene in two days, resting always a day at Cyrene, carrying with

them by camels their tents, baggage and water; there being no water between the two places: that at Marsa Sousa was left under the charge of a small guard at the beach, where two tanks are sunk in the sand and well supplied from the ship. The men worked very well, and made three trips in sixteen days, taking on each waggon two or three heavy statues, some weighing more than a ton. It was no joke taking them down the hill-side to the beach; and great care had to be used, the whole of the men being required to lower one waggon at a time. The statuettes were all sent down by camels. It was well we managed everything so quickly, for the Arabs were becoming very troublesome and threatening, one tribe on the road being anything but friendly: they did their best to extort as much as possible, but only succeeded in getting two bullocks' hides as a peace offering. The chief of this tribe was a Sheikh Sayed, who tried to pick a quarrel with us, collecting about 400 men at the Fountain of Apollo. He made washing clothes and the bathing of our men at the fountain the cause of dispute. These practices we gave up, on learning the commotion they produced, for although we were strong and well armed, it was good to keep friends almost at any price, for their fanaticism is very great, and very little would have brought the whole country down upon us. I do not know what lengths they might not have gone to, had it not been for one or two friendly tribes. Affairs looked so serious a day or two before leaving, that it was thought necessary to apply at the nearest military station to the governor, and acquaint him with the state of matters, that he might hold himself in readiness to co-operate with us in case of need. There is no government in the country, the natives are perfectly free and lawless, and the Turks with difficulty squeeze a heavy tax out of them. Their meetings are very stormy, attended with firing of guns in the air, and other noises; they look down with contempt upon any one who is not armed.

The most luxurious bath I ever indulged in was in the Fountain of Apollo—a natural basin, 6 feet by 2, and 1 foot deep, formed just at the exit of the water from the rock, at the foot of the hill, close to the ruins of the temple, the water always running at the rate of about 5 miles an hour, and always at the same temperature of 63°, nice and cool in summer, and comfortable in winter. The climate is splendid, the temperature all last summer never exceeding 80°. After the hot summer I had experienced, I was very loath to leave the place. The day before leaving, two or three men belonging to No. 2 waggon party, in walking about the ruins, came upon a beautiful statuette, about 4 feet 5 inches long, the arms alone being wanting. It was an Egyptian figure, and, for want of a better name, we christened it *Melpomene*: the men were very proud of their trophy. There is still much to be done in the way of excavation at some future time. Smith's collection, though, is very large and valuable. We brought away in all sixty-three cases, and twenty-seven had already been sent home."

HARRÂN OF THE COLUMNS.

Bekesburne House, Kent, November 1861.

THERE is probably no place mentioned in early Biblical history, respecting whose position there exists generally so little doubt as Haran in "Mesopotamia." In the latest authoritative work, Dr. Smith's 'Dictionary of the Bible,' page 755, it is stated that about midway in the district between the Khabour and the Euphrates, is "a town called Arrán, which seems never to have changed its appellation, and beyond any reasonable doubt is the Haran or Charran of Scripture."

Notwithstanding this weight of authority, I have for more than a quarter of a century questioned the correctness of the received identification of Haran. In my 'Origines Biblicæ,' published in the year 1834, after giving the reasons for my opinion that that town was certainly situate somewhere in the vicinity of Damascus, I asserted it to be highly probable that "the country watered by the Pharpar and Abana—the fertile district known in after-times as the Ager Damascenus, was Padan-

Aram, the country into which, by the Divine direction, Terah and his family removed, and in which was situate the city of Haran or Charran, whence Abraham was called, and which afterwards was the residence of Laban."

It is not surprising that this opinion of a young and unknown writer should have found little favour with the learned. My work became the object of a hostile, though courteous, critique in the *Quarterly Review*, attributed to a learned and accomplished dignitary of the Established Church, and of a less measured attack in the 'Heidelberger Jahrbücher,' from the pen of the well-known rationalist, Dr. Paulus. As I was not then in a position to point out the precise locality of Haran, I had only to wait patiently till the truth should manifest itself. At length I had the satisfaction of being able to announce the discovery of a place, named Harran, precisely in the locality which I attributed to the Haran of Scripture. This place is described in Murray's 'Handbook for Syria and Palestine,' (p. 497), as "a village called Harran-el-Awamid—Harran of the Columns. It gets its name from three Ionic pillars, which rise up all solitary in the midst of the mud houses. They stand on pedestals six feet high, and the total height to the top of the capital is forty feet. The stone is a hard black basalt. In the streets and lanes of the village are also some broken shafts and old hewn stones."

Harraa "of the Columns," was visited in November 1852, by the Rev. J. L. Porter, the editor of Murray's Handbook, whose description of it there given is abridged from that contained in his 'Five Years in Damascus,' (vol. I. p. 250). Yet so unconscious was Mr. Porter of having thus found for me what I had so long been waiting for, and so unaware is he even now of the value of the discovery, that in the article GILEAD in Dr. Smith's 'Dictionary of the Bible,' written by him and published only last year, when speaking of Jacob's flight from Harran to Gilead, he says:—"Jacob, having passed the Euphrates, set his face towards Mount Gilead; he struck across the desert, by the great fountain of Palmyra, then traversed the eastern part of the plain of Damascus, and the plateau of Bashan, and entered Gilead from the north-east."

Haran being, however, situate where it is now found to be, it follows that Jacob never came within three hundred miles of the Euphrates. His flight commenced in "the eastern part of the plain of Damascus," and a seven days' journey, or about one hundred miles, brought him to Gilead, where he was overtaken by his father-in-law, Laban.

It would occupy too much space, and is besides quite unnecessary, to show here how completely and satisfactorily Harran of the Columns answers to the requirements of the Scriptural history throughout. But I may be permitted to adduce two remarkable instances, in which seeming inaccuracies and inconsistencies under the generally received identification of Harran instantly vanish under my rectification.

The first instance is that of "Eliezer of Damascus," who is described by Abraham (Gen. xv. 3), as "one born in my house." These words of the Patriarch give rise to the following criticism:—"There is a contradiction in the authorized version; for it does not appear how, if he was 'of Damascus,' he could be 'born in Abraham's house.'"

In the second instance, we have the declaration of the proto-martyr Stephen, in Acts, vii. 2-4:—"The God of glory appeared to our father Abraham, when he was in Mesopotamia, before he dwelt in Charran, and said unto him, Get thee out of thy country. . . . Then came he out of the land of the Chaldeans, and dwelt in Charran;" on which simple and explicit statement we find this comment:—"Both Ur of the Chaldees and Haran were, properly speaking, in Mesopotamia, though Haran was much nearer to Canaan than Ur was."

Thus an erroneous traditional interpretation is first given to the text of Scripture; and then it is pretended, in the one case cited, that there is a "contradiction" in the text itself, and in the other that the words of Scripture are, "properly speaking," untrue!

But Harran in Aram-Naharaim (literally "Syria of the Two Rivers" being now found to

be situate in the plain country of Syria,—that is to say, Padan-Aram,—between the two rivers of that country, "Abana and Pharpar, rivers of Damascus," and not at all within Mesopotamia, beyond the Euphrates, there is no longer any pretence for the alleged contradiction and untruth. For it is now manifest that Abraham came out of Mesopotamia, the land of the Chaldees, to dwell in Harran; and Harran being in the eastern plain of Damascus, the patriarch was properly called Abraham of Damascus—"Ibrahim-esh-Shami," as he is styled throughout the East to this day; and Eliezer having been born in his master's house, and having accompanied him into Canaan, was with equal propriety described by him as "this Eliezer of Damascus."

Mr. Porter's visit to Harran of the Columns having become known to me in the year 1859, while I was resident in Mauritius, I decided on proceeding thither last year on my way home to England. The deplorable disturbances in Syria, of which the intelligence met me in Egypt, forced me to postpone my undertaking. I am now on the point of leaving England for the purpose of renewing my attempt. But, lest anything should happen to prevent the realization of my intention, I deem it my duty to make my views publicly known, and I trust that you will afford me the means of doing so by allowing this letter to appear in your journal.

CHARLES BEKE.

OUR WEEKLY GOSSIP.

OUR readers will be glad to hear that the Post-Laureate has complied with the request of the Commissioners of the Exhibition to write an Inauguration Ode. The ode, we understand, is now in the hands of Mr. Sterndale Bennett, who has undertaken to compose appropriate music for it.

It is said that the executors of the late Royal Academician, Turner, are in possession of unpublished letters and papers which illustrate, in a new way altogether, the details of Turner's life.

The first volume of a complete edition of the whole of Hood's writings, except the two series of 'Hood's Own' and the novel 'Tyne Hall,' will appear with the New Year. The works will be chronically arranged, with notes incorporating letters from the author's contemporaries.

Of new works brought forward at Mr. Murray's recent trade-sale, nearly 8,000 copies were subscribed for. The book most coveted was 'Aids to Faith,' a reply, by various competent writers, to the various authors of 'Essays and Reviews.' 3,000 copies of this book were sold,—the next on the list being Mr. Smiles's 'Lives of Engineers.' Of Mr. Dyer's 'History of Modern Europe' and Prof. Rawlinson's 'Ancient History,' the latter extinguishing Rollin, 700 copies were ordered respectively. Dr. Percy's new work on Metallurgy was also greatly in demand, considering the limited circle to which such a work is addressed. Fresh sales of books already published were also made to the amount of 43,500 copies. Of these, 34,000 were exclusively educational works. While noticing sales of books, we may note the fact, that Mr. Luther Holden's 'Manual of Dissection' is said to have had the largest sale of any book, connected with medical literature, of the year.

In Lett's 'Diaries for 1862,' French dates are placed side by side with English dates; we can hardly see how this change will "meet the increased commercial intercourse between the two nations." A Table of French Weights and Measures, with their equivalents in English, would have been a more useful step in the direction alluded to, especially if a few notes on commercial laws and customs in France were added.

Messrs. Ward & Lock publish a Bible, "illustrated by a selection from Raphael's pictures in the Vatican, freely adapted and drawn on wood, by Robert Dudley." This book has an embossed or moulded leather binding, which would be estimable if its designs were in the first case more truly artistic, and, in the second, more appropriate than a mere assemblage of vine-leaves, grapes and wheat-ears can well be. As to the illustrations,—the free adaptation by Mr. Robert Dudley, whose

initials appear on every example, seems to us somewhat superfluous, our prejudice being hitherto to the effect that Raphael knew what he was about in designing the works in question under certain conditions which Mr. Robert Dudley may not have taken into consideration. Under these circumstances, we do not hesitate to designate these "adaptations" as extremely impertinent and uncalled for. Even if they had been well executed, which they are not, being commonplace and tame to the lowest degree, the publication would deserve the heartiest condemnation. Intended for a cheap, showy, gift-book, the engravings in question are calculated to do much harm in depreciating the popular taste for noble works of Art. The truly valuable portion of the publication, the annotation to the text, is what the publishers have no claim to, being procurable of Her Majesty's printers for a trifling sum.

Messrs. Griffith & Farran publish, as a gift-book, with illuminations by Mr. S. Stanesby, 'The Wisdom of Solomon,' the text of which is inclosed in rather heavily-designed coloured borders. We have seen much better productions from the hands of Mr. Stanesby, and hoped that a careful study of his subject, much needed at the best of times, would enable him to improve upon those tolerable works; in this we are disappointed.

Messrs. Routledge & Co. publish a selection of English Sacred Poetry, made and edited by the Rev. R. A. Willmott, and illustrated by Messrs. Holman Hunt, J. D. Watson, J. Gilbert, J. Wolf, &c. The literary portion of the work has been sensibly performed by the editor; and while we miss some, we find many another old and loved friend. It would have been easy to have crammed the volume with the operose religious poetry of the sixteenth and seventeenth centuries; indeed, some that is included, of that style, might have been omitted; but, on the whole, the selection is satisfactory. Of the illustrations, Mr. Holman Hunt's single, manly and expressive design to Dean Trench's poem, 'The Lent Jewels,' is incomparably the best in the series; the execution is truly artistic, broad, bold and original. We only wish the artist had chosen a better subject than the poem affords him, which, in its climax, sousing the reader, as it were, with a moral, is of a very low order of Art, that touches the melo-dramatic. The remaining contributors to this series have, in general, done well. A design, by Mr. F. Sandys, to Wither's 'Life's Journey,' though not very well produced, does him very great credit. The same artist's illustration to Alford's 'Little Mourner'—a child clearing snow from a grave—wants the repose of action characteristic of good Art. Many of Mr. J. D. Watson's drawings are tame, but some deserve praise; notably, for rendering of tone, the design showing the Return of the Kine, from Gray's 'Elegy in a Country Churchyard.' The children in the famous Return are also prettily done. There is a good deal of effectiveness in the last design to the poem in question—two men examining a tombstone. That to Ebenezer Elliott's 'Sunday in the Fields' is, perhaps, the best of all. All of Mr. Martin's designs are characteristic, although not always very refined or subtle. That to 'The Two Weavers' of Haanah More is a capital piece of prosaic rendering of the subject and nature; nevertheless, it is a sad mistake to substitute these things as works of Art. Mr. H. H. Ormstead's designs err in extravagance of strength, which, without being vulgar, is coarse. Of these, that heading Mr. Tennyson's 'When Lazarus left his Charnel Cave' is much the best, notwithstanding the ugliness of Mary's face. Two of Mr. Sliegh's drawings from rural nature are truly charming. Mr. F. R. Pickersgill is responsible for a miserable illustration—singularly out of comparison in merit with those above named—to Byron's 'Destruction of Sennacherib.'

Lord Palmerston has contributed his name as a subscriber to the national (Italian) edition of the 'Divina Commedia,' intended to commemorate the *risorgimento* of the Italian nation.

The sum subscribed to the Shakespeare Fund exceeds 3,000*l*. Mr. Henry Huth has contributed a second 100*l*. The Prince Consort gives a like sum, and three editors of Shakespeare's works—Mr.

Payne Collier, the Rev. W. Harness and the Rev. A. Dyce send the first, 50*l.*; the second, 10*l.*; and the third, 5*l.* to the rapidly-increasing fund.

Mr. F. Masson makes the following remarks on a quotation from 'The Life of J. M. W. Turner, R.A.' in our last number,—“which,” says Mr. Masson, “contains a disrespectful reference to my revered friend, the late Mr. Thomas Tomkison, the well-reputed pianoforte-maker. Mr. Tomkison died in the year 1853, at the advanced age of ninety-two; he must have therefore been born in 1761, eleven years before Turner, and by those years only his senior; so that he could not have been the individual at whose house the embryo artist gave signs of his future greatness. Mr. Tomkison's father was a silversmith in the neighbourhood of Maiden Lane, Covent Garden, and Turner's father, ‘the barber,’ attended him (the elder Tomkison) in that capacity,—one which, in those days, was a diurnal necessity. It was upon one of these occasions that the young artist made the sketch from the silver salver which enlisted the sympathies and gained the support of his father's employer. How far the epithets ‘self-conceited and fussy’ may apply to the bearing and character of Turner's original patron I am unable to say; but of their total misapplication to my late venerable friend, Mr. Tomkison (a man of singular urbanity), I and a host of others are ready to attest.”

In reference to the article in our last, ‘The New Othello,’ Mr. Otley, whose pamphlet was therein noticed, requests us to insert the following paragraph from that pamphlet, as explanatory of what was said touching the scene when Bianca is on the stage:—“In the ordinary acting edition, the scene is laid within the castle, but divided into two scenes, in two several apartments. This last arrangement, it must be allowed, does not meet the requirements of the case (even with the omission of the scene with Bianca); and if M. Fechter had returned to the original arrangement instead of adopting the ‘traditional’ stage arrangement (aggravated in extent and force of error by scenes he restores), he would have, indeed, ‘done the state some service,’ and entitled himself to the thanks of every true Shakespearian.” With regard to the leave-taking between Cassio and Bianca, Mr. Otley says, that when he described it as “coarse,” he did not refer to the words spoken, but to the following stage-business introduced:—

[Cassio conducts BIANCA to the arcade, embracing her. IAGO appears at the door on the left and breaks into a loud laugh as he kisses the hand of BIANCA, who runs off at the noise.]

CASSIO. I'll see you soon.
[He returns towards IAGO, making him signs to be silent. IAGO, with comical gravity, puts his finger on his lips, stretching out his hand, as if to make oath. The curtain falls.]

Mr. Boucicault's new drama, ‘The Octoroon,’ narrowly escaped entire failure from a singular cause,—namely, the death, instead of the triumph, of the heroine. This shows a sympathy in the audience, at which Mr. Boucicault, in a published letter, affects surprise. But the English do not like to see their heroines sacrificed. Richardson married Pamela to her rich lover, only because he saw which way the public feeling went for her; and when this was discovered by a reading-club at Slough, they turned out and rung the church-bells in honour of the wedding.

The obituary of this week records the death of Arthur Hugh Clough, an Inspector attached to the Educational Branch of the Privy Council Office. The deceased had not completed his half century of life, but was well known to literary students for his masculine and vigorous English hexameter poem, ‘The Bothie of Toper na Fousich,’ published about fifteen years ago, relating the adventures and mental experiences of a vacation reading-party in the Highlands. Mr. Clough had been a tutor at Oxford, and could, therefore, write with knowledge of the subject. He also took a share in the production, together with Mr. Burbage, of a small but notable volume of poems, styled ‘Ambarvalia.’ He held high University honours; his official post was an honourable one; his reputation in a literary point of view was much enhanced by an admirably-spirited translation of Plutarch, noticed in our columns some time ago.

Pilfering tourists having long since carried away all vestiges of the tombstone placed over the remains of Flora Macdonald, in the Isle of Skye, her grandson, Capt. J. Macdonald, has given directions to have a new tombstone, of Italian marble, placed over her grave at Kilmuir. It is to bear the following inscription:—“In the histories of Scotland and England is recorded the name of her by whose memory this tablet is rendered sacred, and mankind will consider that in Flora Macdonald were united the calm heroic fortitude of a man, together with the unselfish devotion of a woman. Under Providence, she saved Prince Charles Edward Stuart from death on a scaffold, thus preventing the House of Hanover incurring the blame of an impolitic judicial murder.” This last sentence seems to us a pure impertinence.

The holders of tickets admitting to the Reading-Room of the British Museum are warned that they must be always prepared to produce them on demand, and that the non-renewal of them, at the end of six months from the date they bear, will expose the holder to forfeiture of privilege.

A remark which appeared in the *Athenæum* a few weeks since, to the effect that the Temple Fountain was the most elegant and artistic example of its kind in London, must not be taken to apply to that ridiculous exhibition of bad taste which now vulgarizes the almost classic Fountain Court: a poor New-Road work with two basins, badly designed and as badly executed, even for the cheap material employed, so that it is already cracked and all awry. It is truly unfortunate that the light-springing and simply pleasant little jet of water which played under the old trees, an agreeable sight to all eyes, should have yielded place to the present unfortunate production, even temporarily, for we conceive the authorities intend to restore our old and graceful friend.

With reference to Torell's ‘Spitzbergen Expedition,’ a very interesting fact has not been hitherto noticed, viz., that seven reindeer were shot with their ears cut or marked. As these cannot possibly be Lapland deer, they must have found their way from Siberia to Nova Zemlia and thence to Spitzbergen. This would indicate that there must be some undiscovered islands between Nova Zemlia and Spitzbergen, as the distance would otherwise be too great for them to traverse. The Samoides mark the reindeer the same as the Laplanders. A Correspondent states that he recollects thirty-five years ago a similar story was brought by Norwegian hunters to Hammerfest. No doubt the members of the Royal Geographical Society would be glad to see one of these marked reindeer.

The following is extracted from a letter addressed by Mrs. Richard French (Author of ‘A Visit to Germany, in 1799-1800’) to Mrs. Leadbeater:—
“December 26, 1815.

“You ask me of Mrs. Piozzi. She is a lively, animated woman, far advanced in years, peculiarly agreeable in countenance, conversation and manners. So she appeared to me who have only met her in mixed company, and so I have heard her described by others. She is a woman of very high spirits, and only two years ago (being then seventy-three) went to a masquerade in Bath, disguised as a constable, Lady Belmore (the Dowager) and Miss Colwell attending her as watchmen; and they amused themselves, throwing the whole company into confusion by pretending they had a warrant to disperse and imprison them as engaged in an illegal amusement.”

The Commissione Reale per l'Insegnamento Nautico, instituted by the Italian Government, is actively engaged in collecting and arranging all statistics referring to navigation, and in carefully examining the resources of the country in this respect. For this purpose it has wisely determined to call in aid the Italian maritime grandeur of times gone by; it tries, so to speak, to excavate its former nautical greatness, not, indeed, for the sake of curiosity or philosophical speculation, but to be taught by it, and to take example for the present re-organization of the navy. The Commission trusts to find valuable matter as regards navigation, maritime legislation and administration in those sea-ports which once acquired such fame, splendour

and power—scientific treasures which have lain concealed and unnoticed for centuries, and which, at all events, have not been collected and arranged till now. These historical elements of Italian seafaring are now to be gathered, and compiled into a complete Nautical Bibliography; which will contain accurate information of the travelling reports and memoirs of Italian navigators, of the sources for the history of the Italian colonies, of the maritime law, and the works relating to the science of this law, of the international compacts; in short, of all the documents and records referring to the navy, as well as of all the works bearing any relation to it, as works on geography, statistics and commerce, &c. The Commission has addressed itself to all the libraries, especially in seaport towns, and to private persons in possession of rare books or manuscripts of this description, requesting them to aid its labours by communicating all bibliographical details that may be in their reach.

The Expedição Scientifica, despatched by the Brazil Government to the Northern province of Ceará, has returned to Rio de Janeiro, after having devoted two years to exploration and making collections. The appointed historian and ethnographer of the expedition, Senhor Gonçalves Dias, has not returned to Rio. Well used to the equatorial climate of the Amazon district, he has preferred to stay and continue his researches, especially on the Indians of those countries,—a task for which he is thoroughly prepared, as he has proved by his work ‘Diccionario da Lingua Tupy’ (Leipzig, 1858). The head of the Expedition, and at the same time its zoologist and botanist, Prof. Freire Allemão, has been fortunate enough to bring safely home all his collected materials; the natural philosopher and geologist of the party, S. Schlich de Capanema, however, had the mortification to find his meteorological, hypsometrical and geological notes, together with a great many photographic sketches, lost on their transport by water from Granja to Fortaleza. The result of the Expedition will soon be made public to the literary and scientific world.

FRENCH GALLERY, 130, Pall Mall.—The NINTH ANNUAL WINTER EXHIBITION OF CABINET PICTURES by living British Artists is NOW OPEN daily, from Half-past Nine to Five.—Admission, One Shilling.

M. ROBIN, the original French Wizard, will RE-APPEAR in his SOIRÉES FANTASTIQUES, at the Egyptian Hall (which has been comfortably and elegantly refitted throughout), on the 25th of November, and following Evenings, at 8 o'clock (Saturday excepted), with an entire New Series of Magical Illusions and Scientific Experiments never Exhibited in Great Britain.—Balcony, 5*z.*; Reserved Stall Chaises, 3*z.*; Arms, 2*z.*; Gallery, 1*z.* Children under 10, Half-price. Morning Performance every Wednesday and Saturday, at Half-past Two.—Tickets may be obtained at Mr. Mitchell's, 33, Old Bond Street; the principal Libraries, Music-sellers, and at the Hall.

SCIENCE

A Manual of Chemistry, Descriptive and Theoretical. By William Odling, M.B. Part I. (Longman & Co.)

THE science of Chemistry is just now going through one of those transitions in nomenclature which occur in all natural sciences, much too rapidly for the comfort of dilettante philosophers, and are always puzzling to the student commencing his career. It has long been apprehended by some of the more philosophical chemists of the day, that the views of the relations of one element to another, originally propounded by Laurent and Gerhardt in France, must be accepted universally by chemists, and all other systems must yield. Many of those, however, who have advocated these views in private have not dared to make them the basis of their public teachings. We believe we are correct in stating that the only public teachers in England who have recognized the “unitary system” as it is called in opposition to the old “rational” system, are the Reader in Chemistry in the ancient University of Oxford, and the Professor of Chemistry in University College, London. The reason why this system has not been more generally introduced in accordance with the conviction of its value, has

undoubtedly arisen from the want of any English manual in which it was adopted. We noticed in the *Athenæum* some two or three years since, two capital guides to laboratory work, the one by Mr. Conington, the other by Messrs. Northcote & Church, and both written under the guidance and inspiration of the distinguished Professor at Oxford. These were, however, insufficient to serve as guides in a course of lectures in the class-room, and teachers have waited for the promised book. The work by Dr. Odling,—of which we have here a first, and, we fear, but a small instalment,—has been expected a long time, and teachers have been waiting for it as for a deliverance from the bondage of the old rational formulæ. Not that the change is very great, but that it runs through all compounds in nature and necessitates a re-writing of every formula. To teach one set of formulæ in the class-room and send the poor student to his books to find another was a cruelty that only the two Professors we have named had scientific courage enough to inflict.

The principal changes required in the new or unitary system is the doubling the atomic weights of ten of the elementary bodies. These ten are—oxygen, sulphur, selenium, tellurium, carbon, boron, silicon, tantalum and tin. The student might have smiled at the unitarians, and accepted their doctrine without discussing either its convenience or heresy, if it had not been for the oxygen, the carbon, and the sulphur; but when it is considered that probably these three elements enter into at least two-thirds of the compounds known to the chemist, the undoing and doing of chemical formulæ involved is something very extensive. The way this is done, however, is not always simply to double the number of the changed element in the compound, but one or other of the elements with which it is combined is halved. An illustration will, perhaps, make this better understood. Under the old, and perhaps we ought to say orthodox, system—for the majority will probably still hold to it—the way in which water is expressed is H_2O , signifying one part by weight of hydrogen, and eight parts by weight of oxygen, 1 and 8 being the respective atomic numbers of hydrogen and oxygen. But we have seen above that the atomic weight of oxygen is doubled, which makes it 16; and as the real relation of the weight of oxygen to hydrogen is as 8 to 1, there is a necessity of doubling the quantity of hydrogen, and, according to the new system, water is written H_2O . These alterations have been made in relation to those substances only whose weights, when solid or liquid, do not agree with the measures of their elements when they exist as gases. Thus, nine pounds of water really contain eight parts by weight of oxygen, and one part by weight of hydrogen; but if these are expanded into gases, it will be found that the hydrogen gas occupies twice the space of the oxygen gas: and as hydrogen, not oxygen, is the standard of unity, the composition of water should be calculated from two measures of hydrogen and one of oxygen. This gives to water the atomic composition of $\text{H}_2 + \text{O} 16 = 18$. Into whatever compound oxygen enters, the atomic number of the compound is altered; and any one acquainted with the rudiments of chemistry will, at a glance, see the havoc such a system must make in all the old formulæ. Well may the chemist, advanced in years, hesitate before committing his old familiar compounds to the new unitarian dress.

This, however, is not the only peculiarity of Dr. Odling's book. Those accustomed to the old nomenclature will be surprised to meet

with such expressions as sulphate of sodium and nitrate of potassium, instead of sulphate of soda and nitrate of potash. According to the old theory, all acids combined with an oxide; and thus sulphuric acid and nitric acid were regarded as combining with the oxide of sodium (soda) and the oxide of potassium (potash), and written thus: $\text{SO}_3 + \text{Na}_2\text{O}$, and $\text{NO}_3 + \text{K}_2\text{O}$. But the view adopted by Dr. Odling supposes that the acid is really to begin with a sulphate or nitrate of hydrogen, thus: $\text{SO}_4 + \text{H}$ and $\text{NO}_3 + \text{H}$, not $\text{SO}_3 + \text{H}_2\text{O}$ and $\text{NO}_3 + \text{H}_2\text{O}$, as written by the older chemists. The metals in the new formula do but take the place of the hydrogen, and we have the compounds mentioned above, written $\text{SO}_4 + \text{Na}$ and $\text{NO}_3 + \text{K}$. We have put down the above formulæ to explain the nature of the changes in the book; but we remind our chemical readers that the new notation of sulphuric and nitric acids, according to the unitarians, is $\text{SO}_4 + \text{H}_2$ and $\text{NO}_3 + \text{H}$.

Another feature in Dr. Odling's book which will strike chemical readers is, the absence of any distinction between inorganic and organic chemistry. This is such a time-honoured and popular distinction, that Dr. Odling must have determined to risk all consequences in abandoning it. Yet it must have been very evident to every thoughtful mind, that from the time when Wöhler prepared artificially from inorganic products the organic compound urea, the barrier between the two departments of chemistry was broken down. The application of the theory also of compound radicals to inorganic substances has shown, in the other direction, that there is really no difference between inorganic and organic chemistry. The theory of substitution, which has been so admirably worked by Hoffman in his investigation of ammonia-compounds, shows also how thoroughly the two branches of inquiry are one, and that only mischief can arise from distinction, especially if it should be supposed that organic chemistry can be studied independently of inorganic.

Of course, this plan involves a novel way of arranging and treating the various elements. Dr. Odling has placed them in groups according to their likeness to each other. Thus hydrogen is first studied. Then follow fluorine, chlorine, bromine and iodine. To this group succeed oxygen, sulphur, selenium, tellurium. Then come nitrogen, phosphorus, arsenic, antimony and bismuth. Here the Part very ominously ends. Carbon stops the way. We should be glad to know that the author has satisfactorily got through the compounds of this element with a volume half the size of the present. If so, we may expect the whole work soon, and of a bulk not too large for the purposes of the student. In order to afford himself the opportunity of giving a really good systematic account of the elements and their chief compounds, the author has dispensed altogether with chemical physics or experimental philosophy. This is a judicious curtailment, as it is now almost universally agreed that the forces—heat, light and electricity—demand separate and fuller treatment than they get in our manuals of chemistry. We may, in fact, congratulate the chemists of this country that there is amongst them a class of philosophical inquirers who will not confine their teachings to the limited demands of the medical student, but are determined to vindicate for themselves a name amongst the philosophers of Europe. In such a class we have no hesitation in placing the author of the present manual; and whether he succeeds or not in obtaining for his work the position of a text-book in our medical and technological schools, there can be no question with

regard to the scientific ability and philosophical insight which he has brought to bear on this first attempt to introduce the new system of chemistry to the scientific schools and class-rooms of this country.

MEETINGS FOR THE ENSUING WEEK.

MON.	Actuaries, 7.—'Mortality Experience of Scottish Amicable Life Society,' Mr. Spens.
—	Royal Academy, 8.—'Anatomy,' Mr. Partridge.
—	Geographical, 8.—'Australian Explorations, Probable Fate of Leichhardt.'
TUES.	Engineers, 8.—'Measuring Distances by Telescope,' Mr. Bray; 'Lock Key Vinduct, Port Patrick Rail,' Mr. Blyth.
—	Zoological, 9.—'Mantehourian Crane, Society's Gardens,' Mr. Bartlett; 'Land Shells,' Dr. L. Pfeiffer.
WED.	Society of Arts, 8.—'Comparison of '61 with '61,' Mr. B. Jerrold.
—	Society of Literature, 8.
—	Archæological Association, 8.—'Discoveries on Site of the Priars, Ludlow,' 'Discoveries, Worcester,' Mr. Wright; 'Excavations, Netley Abbey,' Rev. E. Kell; 'Roman Antiquities, Devon,' Mr. Syer Cuming.
THURS.	Philological, 8.
—	Antiquaries, 8.
SAT.	Royal, 4.—Anniversary.

FINE ARTS

THE WINTER EXHIBITION.

THIS is the ninth annual Exhibition held at this time of the year in the French Gallery, and, unlike all its predecessors, it shows a lamentable want of selection in the works it contains. Few of the artists who were wont to contribute have done so on the present occasion; and of such as do, still fewer send notable works. Eliminating such as are thoroughly bad and worthless, even beyond censure, much of the interest derived from the remainder is due to certain pictures which have been before exhibited. Of these, it may be right to name a few:—amongst them, Mr. A. Johnstone's *Highland Coronach* (No. 3); Mrs. J. E. B. Hay's *Tobias patris oculos curans* (9), from the Royal Academy, being now hung where it can be seen, will receive more consideration than has hitherto fallen to the work of an excellent artist—a lady who is rapidly developing a meritorious style, such as may place her name in a very honourable position;—Mr. Dobson's *Charity of Dorcas* (84), which brought great increase of reputation to the painter, is amongst these;—the late Frank Stone's "*And Jesus answered, and said unto her*" (104);—most notably, *Goths in Italy* (119), by Mr. P. F. Poole, which preserves its force and brilliancy to a marked degree;—and the *Sketch* for Mr. Arthur Hughes's picture, recently at the Royal Academy, styled *The King's Orchard* (27). Every one of these the visitor will gladly see again, and, for so much, thank the proprietors for the opportunity. We can now observe the feeling for expression and the clever design of Mrs. Hay's picture; its want of vigour in execution, and occasional disproportion in drawing, and see the promise of power in colour, which thoughtful study may develop greatly. Mr. Dobson's '*Dorcas*' was well seen before, yet it will be examined again with interest, as it can be compared with a new work that displays greater manliness of style, and a more genuine range of feeling attained to, the result of a more unhesitating faith in nature, and elevation out of the somewhat bloodless system of treatment erst adopted by the painter. Mr. Hughes's little study is fascinating in delicate and elegantly-arranged colour; the figure of the page sitting at the feet of the little queen, who reclines along the bent bough of an orchard-tree, is indeed charming and delightful in every sense,—that of the girl-queen herself, notwithstanding its disproportionately large head, is sweet and fair and fresh; while the landscape behind is such as children dream of when reading an old romance. This work suffers greatly from its position,—in a narrow and half-lighted lobby. Such hanging is the rule here:—a charming picture by Mr. J. Clark, on the whole the most important of all the works exhibited for the first time, has a place out of sight and behind a screen, while specimens of a kind of Art that ought never to have been seen at all hold honourable spaces.

Mr. E. M. Ward sends *The Prisoner's Solace* (206), a study of a figure in the well-known Marie-Antoinette picture—a young lady pouring water into a bowl, treated with much delicacy of

colour and manly handling, and, while less bold than late productions of this artist, having a refinement and clearness from which he has somewhat departed. Equally solid with these last, this specimen of an earlier style is less heavy and opaque in treatment.—No. 15, *Elaine*, by Mr. C. Goldie, is a promising and expressive study for the head of Mr. Tennyson's heroine, which is delicate without weakness, and elegantly posed, as lying back, dead, with lilies upon the breast, and deep golden hair spread out upon a pillow.—Mr. Dicksee's *Ophelia* (7) is cleverly painted, in a somewhat meretricious, sentimental feeling; likewise a head only.—Mr. Gale has two little works of similar limitation; these are of unequal merit. No. 212, *The Rake*, is an extremely sweet head of a child, with a garden-rake thrown over its shoulder, and hair crowned with asters and poppy flowers. Not without vulgarity of feature, hard and ivory-like in painting, the second, *The Goblet* (213), a smiling child, with a jewelled gold goblet in its hand, and a wreath of berries and flowers upon its head, pleases us much less than the last.—Mr. Hayllar sends a head, *A Boulogne Fisherman* (214), cleverly but too showily handled. The same artist exhibits a landscape, *A Barley Field* (71), just as dashingly treated, showing considerable love of nature, and the same neglect of solidity.—Mrs. Robinson's not unsuccessful imitation of the inferior qualities of Mr. MacIise's manner of painting in oil, styled *The Love-Birds* (72), representing a child crowned with mayflowers, and holding two such birds upon her finger, needs refinement in the face to be pretty. The portrait of a bouncing child stiffly posed and without motive, lacks interest, and by its hard and tinty treatment lessens the merit of some careful as well as powerful handling. The lace the subject wears looks like paper cut out, and the shrubs behind suggest stamped metal, coloured green.—Far broader, and with signs of a genuine feeling for colour, Mr. Tourrier's half-length of a singularly odious-looking young woman plucking away petals from a sunflower, to the old theme, "*Love me, love me not*" (167), has for its better part the huge flower.—The venerable model with a beard, seated in a prison-chamber, styled by Mr. Maguire *Dr. Manette* (18), shows more dexterity of touch than feeling for colour, being clay-like and opaque,—hard without finish,—a blind, hopeless method of execution, unredeemed by sympathy with the subject.—Miss Ellen Edwards sends a prettily-painted, but flimsy, little picture of a young lady watering flowers. This trifle displays a feeling for bright and sparkling colouring which, cultivated heedfully with an eye to nature, may come to something notable; it is styled *La Belle Jardinière*.

With a good deal of commonplace character and tintiness of colour, Mr. Rossiter's *Making Music* (4) is amusing in a mild way. Considerable ability is wasted upon it.—Mr. Marks's *Sunshine* (106) is a very heavy attempt at the subject—an old man seated at a cottage door. Much vigour of treatment does not make the execution of this work other than coarse.—Mr. Long's *Zoe* (126), a Greek girl at a cottage door, heavily and conventionally French, has some grace of design.

There is not a man in England who can paint in so utterly vulgar a manner as Mr. T. P. Hall: his *Not half Good-looking Enough* (118), shows a postman looking at the portrait of a housemaid, who, with a companion, stands before him to receive the usual compliment.—Mrs. E. M. Ward's "*Fetch it*" (14), a young lady throwing a ball before a dog, has a good deal of spirit and elegance in the action. By the same artist is *Baby going for a Ride* (171), a work, despite its opacity, delightful to look at for the grace and vitality of a girl who stands attending a young brother in a little chaise. There are three figures, prettily composed.—Mr. P. R. Morris's *Shore Moorings* (122), an old sailor seated on a rusty anchor, attended by his grandchild, with a fleet of saluting ships in the background, shows a singular want of feeling and taste. Even out of childhood Mr. Morris has failed to get freshness or beauty. In painting such a subject we do not demand perfection of beauty; but mere dull portraiture of the characterless common-place is to be

condemned.—*The Pensioner* (16), M. Lutyens, is a clever opaquely-painted study of an old man filling a pipe.—Mr. F. S. Cary's *Neglected Bride* (98), is a tolerable imitation of the modern Flemish manner: a young woman seated with her back towards us, holding a peacock fan.—Opaque and painty as well as dull is Mr. Storey's *Consolation* (172), representing two girls, one of whom is looking heart-broken at some love disappointment, while the other, smiling, puts a letter in her hand; but this work is full of expression, and, though simply, is not inelegantly composed.—Very grimy and earthy is M. Hagelstein's *Chalk Seller* (28),—a *gamin* with a basket of cut chalk on his back, and not a grain of chalk on his clothes. Much the same is No. 33, *The Crossing Sweeper*, by the same, a boy with a broom, smoking a pipe,—both expressive and characteristic.—Mr. Lawless's pictures are crude, unpleasantly thin and oftentimes dirty in colour. No. 66, *The Letter*, a man reading, is no exception to this character; much care, though far less than is apparent, and considerable skill are marred by the little taste with which they are employed. The rawness of No. 185, by the same, *The Idler*, a man dozing over a book, mars, as it does in the former case, the cleverness and real accomplishment displayed in the design and drawing of the single figure.

M. Trayer's pretty single figure, *The Fair Correspondent* (6), a lady re-perusing a letter she has written, is pleasing in its sober, solid colour and natural pose. By the same is *The Artist in his Studio* (23).—Why Mr. F. Smallfield, who can paint sweetly and beautifully, should take to making bad imitations of M. Meissonier's manner, is a marvel to us; yet his *Family Discussion* (45) is a marked attempt to reach the hard and marvellously elaborate manner which is so characteristically popular in Paris. As a design, there is much spirit in Mr. Smallfield's little work, which represents three brothers in council; one of them kneels in a chair energetically expounding his views to a second, while a third, a little deaf, turns his best ear to catch the voluble wisdom.—Heavy and coarse in handling, and vulgar in one or two points of design, Miss Brownlow's *Lobesang at Berne* (179), interior of a Swiss church during service, has real merits of a high class, in portrayal of character, grouping and expression.—Mr. Calderon has a sketchy, clever picture, No. 34, *Le Secret des Amoureux*—a girl listening to a lover's talk; a picture notable for showing with how little effort a good feeling for Art may be ruined.

Miss Solomon has improved immensely with her picture here, *A Young Teacher* (77)—a girl of twelve teaching an Ayah and a younger sister of her own. Rather wanting in colour; a faint hope of something agreeable for the future may be obtained by this work. The expressions are good and genuine. *The Appointment* (90), by the same—a young lady impatiently awaiting her lover, whose advent we see by the reflexion in the looking-glass behind the girl herself. Her expression is good, and, as far as it goes, the work is creditable.—Mr. Deane's *In the Streets of Seville* (159) shows how a painter may succeed with a style in one subject, with which he fails lamentably in another. The mules and the boy in front are painted with spirit.—Mr. Dobson's "*How Pretty!*" (35), a little girl, who, standing on a bank, has a brightly-coloured handkerchief tied over her head by an elder sister, is extremely agreeable in its naive expressiveness and simple sentiment. The background of sapling trees, though thin, is bright, and very skilfully painted.—*Sunshine and Shadow* (60), by Mr. G. Smith—a young woman seated in a cliff-path, looking as if posed for her portrait—is hard, heavy in handling (particularly the sea), and opaque. Two children standing by are pretty, and a shaded bit of cliff to the left of the picture is admirable in colour.

Of the landscapes, there are more productions of the trashy Boddington class than any well-wisher to the Exhibition would like to see. Mr. Oakes has two notable pictures, *A Quiet Morning* (82), a sea-shore, with glassy waves just tumbling in upon the sand, overhead misty grey clouds and well-

painted herbage in the front, a little icy in colour, but bright and, with that reservation, faithful. Bolder is No. 88, *The Trout Stream*, amongst woods, a little over-green in the colour of parts of the foliage, showing singular dexterity in dealing with the foreground.—Mr. W. Field's *Thames* (39) is a very cleverly done sketch of the river bank.—Mr. E. G. Warren's water-colour drawing, *Wood Scene* (13), a sunny glimpse amongst trees, is charming, brilliant and fresh, as his works ever are.—Mr. Hargitt is an Edinburgh painter, whose works, despite their smeary texture and smoky colour, are only too seldom seen in London. *Looking over Bidstone, Cheshire* (85), boldly effective, is by this artist; a good study for one quality of a good picture, but not a picture in itself.—M. Daubigny's *Landscape* (61) is remarkable for rendering of reflexions in water, and gives breadth of effect, though careless and brown.—Mr. Ansdell has a picture, *Harvesting* (151), which shows how he has improved, for it is an old and feeble work.—Mr. F. R. Lee has a sketch of *Tangiers* (111), cold, hard and chilly, but bright, and more like, in feeling, his '*Gibraltar*,' that astonished us all last year, than anything else we have seen.—Mr. Cropsey has a bold, opaque and dull, but dashing and effective, representation of waves breaking, in his *Sea-Coast at Bonchurch, Isle of Wight* (128).

FINE-ART GOSSIP.—The copies made by the students of the School of Painting attached to the British Institution are now displayed. On the whole, while there seems to be an unusually large number of them, the works in question promise better than ordinary for the future of the practitioners. We trust they will not forget, while going through this phase of Art-study, that to copy, however well, is but a means, and not an end, of practice. Some of the students appear likely to forget this. Amongst the subjects placed before them is a noble '*Portrait of an Old Lady*,' by Rembrandt, the property of Mr. Allnutt. Mr. R. B. Paul, to whom our remark above particularly applies, seeing that he occupied just the same position last year,—one by no means honourable when held twice,—has produced by far the best, though not an entirely satisfactory, complete copy. Far better in all qualities of colour and tone, as well as drawing, is a study from a single hand in this portrait, by Mr. S. Le Resche. Mr. W. Weir has done best with '*The Head of a Jew*,' by the same master, belonging to Mr. Fordham.—Reynolds's '*School-boy*,' the property of Lord Warwick, has also found in that student the best copyist. A fine Canaletto, '*The Rialto*,' belonging to Sir Culling-Eardley, has been reproduced with singular felicity on a very small scale, but remarkable for broad feeling, for colour and tone, by Mrs. Player. Reynolds's '*Portrait of Lady Eardley*' has been very cleverly dealt with by Mrs. Sykes, in water-colour.

We understand it is intended to exhibit Mr. Holman Hunt's picture, '*The Finding of Our Saviour in the Temple*,' for the third annual occasion, next year, in London. The success of the previous exhibitions has been so great, that the proprietor feels justified in expecting the like when all the world comes here to see the grandest Art-gathering of modern works that has been known.

Messrs. Winsor and Newton publish a pamphlet upon colour, entitled '*The Chromatic Scale of Water-Colours*,' with a sketch of the science of colour, embodying six propositions from M. de Chevreul, together with three of the author's own. The chromatic scale, which is given on a large sheet of paper, has the disadvantage of being scattered in its disposition, so that it is a journey to travel from violet-blue to violet-blue at either end of the scale. The nature of the author's assumed new proposition will be understood by the initiated, when we state that he refutes certain deductions ordinarily made from the proposition, that 'material colours may be considered to produce white, or neutralize each other, in proportion of five red to three of yellow and eight of blue.'

A statue, by Mr. Theed, of Sir William Peel, has been placed in Sandy Church, near St. Neot's.

This is of marble, life-size, represented in the act of drawing a sword. This, or a cast, was in the last Royal Academy Exhibition.

We read in the *Monde* the following accounts, from Rome, of the terrific natural phenomenon which visited the Holy City on the 30th of October last, and threatened destruction to Raphael's frescoes in the Vatican:—"For two days the sirocco blew fiercely; great black clouds gathered over the city, and discharged themselves now and then in torrents of rain. Towards evening a waterspout, in shape of a cone, with broad shining base, approached from south-west. It took its way through the gardens and vineyards, swept close by the Janiculus and the Porta San Spirito, and precipitated itself down on the Vatican. The eighty-nine conductors which protect the dwelling of the Pope received the first charges of this fearful battery; then the point of the cone was seen whirling in the large court-yard of Sandanaseo, into which the loggie of Raphael look; at the same time the large glass doors and the immense windows of the galleries were wrenched off and smashed to atoms. All the lights went out, and the numerous inhabitants of the Vatican, stunned and half-suffocated, believed that entire destruction was going on around them. The fearful noise, the terrible thunderbolts, which shook the palace to its foundations, made every one think, in the first moment, that a mine had exploded under the rooms of the Pope. Pio Nono, during the uproar of the elements, knelt in prayer. He remarked to somebody entering his apartment, 'I am like Job; the Evil Spirit attacks me from all parts.' In the large saloon of Constantine, which contains the frescoes of Giulio Romano, all the windows have been destroyed and thrown out. Pieces of the glass globes on the gas-chandeliers in the large saloon of state were found in a neighbouring court, some sticking tight in the wall. Large Genoese tiles, which covered the Belvedere, of the thickness of a centimètre, whirled about in the air like feathers. Raphael's great paintings have escaped miraculously; none are injured."

MUSIC AND THE DRAMA

SACRED HARMONIC SOCIETY, Exeter Hall.—Conductor, Mr. COSTA.—Thirteenth Season.—FIRST CONCERT ON FRIDAY NEXT, November 22. Mendelssohn's, ATHALIE and Handel's *DETINGEN TE DRUM*. Principal Vocalists: Miss Louise Pyne, Miss Sorie, Madame Laura Baxter and Mr. Winn. The Illustrative Verses to 'Athalie' recited by Mr. George Vandenhoff. Tickets, 3s., 5s. and 10s. 6d. each, at the Society's Office, No. 6, in Exeter Hall.

Note.—On a few more Stalls or Reserved Gallery subscriptions can be received.

ROYAL ENGLISH OPERA, COVENT GARDEN.—Under the Management of Miss LOUISA PYNE and Mr. W. HARRISON.—On MONDAY, November 25th, THE MARRIAGE OF GEORGETTE. After which, at Eight o'clock, last time but one, ROBIN HOOD, supported by Messrs. Stanley, George Honey and Henry Halsey; Miss Susan Pyne and Madame Guerrabella. TUESDAY, THE TOY-MAKER. After which, at Eight o'clock, last time, JURLINE. Messrs. Stanley, W. Harrison and Miss Louise Pyne. WEDNESDAY, THE MARRIAGE OF GEORGETTE, and, last time, ROBIN HOOD. THURSDAY, THE TOY-MAKER, and, at Eight o'clock, for the last time, RUY BLAS. Messrs. Stanley, W. Harrison and Louise Pyne. FRIDAY, THE TOY-MAKER. After which, at Eight o'clock, first time this Season, MARIANA. By Messrs. Henri Corri, George Honey, W. Harrison; Miss Susan Pyne and Madame Guerrabella (her first appearance in this opera). SATURDAY, THE TOY-MAKER. After which, at Eight o'clock, will be produced (first time an entirely new and original Opera, in Three Acts, by J. V. Bridgman and Mr. Balfe, to be entitled THE PURITAN'S DAUGHTER; and in which Messrs. Stanley, Henri Corri, George Honey, A. St. Albans and W. Harrison; Miss Susan Pyne and Miss Louise Pyne will appear.—Conductor, Mr. Alfred Mellon.—Commence at Seven.

ROYAL ENGLISH OPERA, COVENT GARDEN.—Under the Management of Miss LOUISA PYNE and Mr. W. HARRISON.—On SATURDAY Next, November 30th, will be produced the New Grand Opera, in Three Acts, to be entitled THE PURITAN'S DAUGHTER, by J. V. Bridgman and M. W. Balfe.

GLEES, MADRIGALS AND OLD BALLADS.—Egyptian Hall, (Gladstone's Gallery).—EVERY EVENING (except Saturday) at Half-past 7 o'clock, and on Wednesday and Saturday Afternoons at Half-past Three.—Mr. Mitchell has the pleasure to announce that the popular and eminently successful Entertainments of the LONDON GLEE and MADRIGAL UNION (Miss J. Wells, Miss Eyles, Mr. Baxter, Mr. W. Cummings, Mr. Lawler, Mr. Land, director) are NOW RESUMED. The Analytical Programmes, compiled by T. Oulton, Esq., Literary Illustrator. Reserved and Numbered Seats, 3s.; Unreserved Seats, 2s.; a few Fauteuils, 1s., may be secured at Mr. Mitchell's Royal Library, 25, Old Bond Street.

CONCERTS OF THE WEEK.—Those answerable for the music at the *Crystal Palace* are, as usual, bestirring themselves to give new music. This day week, a cheerful, pretty and cleverly scored overture, by Herr Pauer, to his comic opéra (very much what a prelude to a military comic opera should be), was performed there. Herr Sessel-

berg was one of the singers. — There seems a never-ending supply of dreary deep bass voices from Germany, whose owners, as a matter of course, sing the Priest's solemn ballad from 'Die Zauberflöte,' and some of whom do not sing it well.—This new *basso* is among the latter party.

The fourth season of the *Monday Popular Concerts* began on Monday last, with the players already announced, and no striking novelty in the music selected,—the least known piece being Dussek's Sonata in G, Op. 52, for pianoforte and violin.—It is perfectly true that a public is gathering every day to whom the music of the great masters is next to unknown. Still, unless critics are to beat the same ground over and over again, the amount of discovery which they have to explain and of characteristics to be discoursed upon, under circumstances like the present, must, in process of time, become exhausted,—unless there be a perpetual change among the performers—in regard to whose "reading" the world of amateurs, neither young nor old (one well worth catering for in its turn), may desire to hear some report. The givers of the *Popular Concerts*, however, know their own affairs best.—In the course of the ensuing series of concerts the whole of the Posthumous Quartets and last Pianoforte Sonatas of Beethoven are to be given; besides some revivals from Dussek and other great pianoforte composers; and a trio for pianoforte, violin and violoncello by the composer of 'Masaniello':—The last promise is one to excite some curiosity; meanwhile, we have no misgiving that our English public, renowned for constancy, will fail to do its part in the success of these well-prepared entertainments. Monday's concert is to be devoted to the works of Mozart.

Herr Pauer's *Performances of Pianoforte Music* continue to be full of interest. At his second, he introduced, among other elders, Froberger, Purcell, Rameau. The third contained names stranger still to the ears of pianoforte-players—Dumont—Lulli's charming *Suite* in D,—some elegant and quaint variations by Murschhauser (both of which last two pieces figure in the third part of Dr. Rimbauld's work on the Pianoforte),—and, among other pieces of the eighteenth century, an *Allegrò* by Domenico Scarlatti, in which there are passages as elegant and expressive as if Beethoven had fancied them,—and one of Sebastian Bach's sixteen transcriptions of Signor Vivaldi's violin Concertos. These works are little known; and the fact of their existence may be commended as a matter of meditation to those who have been outraged by the sacrilege done to a certain Prelude of Sebastian Bach, in a certain arrangement which has been the delight of half the concert audiences in Europe.—We must have done; though a word still remains to be added of hearty admiration of the *Fantasia* in C, (dedicated to his wife) by Mozart, which, again, is little known,—also of Herr Pauer's playing of the solemnly beautiful *Adagio* to Dussek's 'Invocation' Sonata.—Chamber concerts welcome more to those who desire to extend their list of pleasures in music have not come within our notice. To the specimens from more modern masters, we do not refer for obvious reasons.

DRURY LANE.—Mr. G. V. Brooke has followed up his *Othello* by *Sir Giles Overreach*, in Massinger's play of 'A New Way to pay Old Debts' and *Matthew Aylmer* in Mr. Lovell's play of 'Love's Sacrifice.' Mr. Brooke's merits in those parts have perhaps not diminished since he formerly played them in England; but the taste of the London public has so thoroughly changed that we are not at all surprised at his appearance in them producing no sensation. To increase the attractions of the house, a troupe of "Lilliputian Singers and Dancers" have been introduced to the audience,—last week at the morning performance, and this week as part of the evening's entertainment. This juvenile company, amounting to fifty in number, are said to have been brought from Spain, and to have achieved a reputation in the great capitals of Europe. They have evidently been carefully trained, and both in Donizetti's operetta of 'Il Campanello' and the ballet of *Caterina*; or, *La Fille du Bandit*, acquitted themselves well. The national theatre, however, should devote itself to higher aims than

the production of infant prodigies and dimmed stars. Under an intelligent direction, it would naturally take the lead of other theatres, instead of attracting little attention and deserving less.

ST. JAMES'S.—Mr. Wigan has adopted Mm. Dumanois and Lafargue's drama, *Le Pauvre Gentilhomme*, which was performed by the French company, during the recess, at this theatre, and taken to himself the character in which M. Paul Devaux made so good an impression. The English version bears the title of 'The Poor Nobleman,' and follows the original with similar accuracy, the task of adaptation requiring but slight alterations either in the texture or dialogue of the work. The principal character is one entirely in Mr. Wigan's way, and admits of all that detail in the feelings and failings of refined and artificial people which is so rich in domestic pathos. The pride, in the midst of poverty, that supports his aristocratic hero, was most carefully portrayed; and afterwards, when playing an honest art as the means of procuring subsistence, he commanded the sympathy of his audience. Miss Herbert, as the daughter, wise, unknown to her father, resorts to similar expedients for earning an income, likewise merits commendation. Mrs. Wigan threw considerable humour into the part of the rich widow, *Madame Bonbon*. Altogether, this pleasing drama acts exceedingly well in English, and will, no doubt, secure a permanent place on our stage.

ADLPHI.—After many postponements, the new sensation-drama was produced on Monday. 'The Octoroon' is one of a series of plays which have been tried and proved by Mr. Boucicault, in America, as remarkably effective with that mixed class of audiences which requires in a drama an exciting story, with a scene or two calculated to cause a thrilling sensation in the majority. And it is a "sensation" properly so called;—not an emotion of the mind, not a tragic feeling in response to passion, not sympathy with suffering or heroism, but the impression made on the nervous system by an actual occurrence passing before the senses, calculated to awaken fear or expectation, or wonder, and to give a shock, not always pleasant, to the frame. Here, as it were, the whole audience meet on the same level, receiving an impression affecting the lower powers of the mind, compounded of sights and sounds that cause a certain degree of apprehension for the safety of an individual, for whom a strong dramatic interest has been created. Mr. Boucicault has reduced the means of producing such an effect to an art; and, by calling in the scene-painter and machinist to his aid, has augmented the effect in a manifold manner. 'The Octoroon,' in this respect, is not inferior to 'The Colleen Bawn'; perhaps is charged even more strongly with the elements of sensational effect;—but its manners are not so familiar nor so easily accessible to the public mind, as those of the singularly-profitable drama which it has succeeded. America is more distant from the popular affections than "dear old Ireland." The scene of 'The Octoroon' is Louisiana, where the marriage of an "eight bleed" with a white is illegal; and the interest of the story turns upon that prejudice. The hero, *George Peyton* (Mr. Billington) succeeds to an incumbered estate, which has been much mismanaged by a villainous overseer, *Jacob M'Closkey* (Mr. Emery), who is in love with Zoe, the natural child of its late possessor, Judge Peyton. Her emancipation he discovers to have been incomplete. Zoe (Mrs. Boucicault) has been brought up in luxury, and acquired the affection of the heir to the plantation, who is anxious to prevent its sale, more particularly as the beautiful Octoroon must be sold with it. Mr. Peyton, therefore, awaits with impatience the arrival of a remittance from Liverpool, which will enable him to avoid the necessity of parting with the property. He sends Paul, a negro (Miss Denzil), with an Indian, *Wahnotee* (Mr. R. Phillips), to the landing-shed on the river, where the letter-bag is thrown ashore, that he may obtain his packet sooner. M'Closkey endeavours to intercept them, but fails;—but afterwards falling in with the negro, kneels him on the head. But a daguerrotype machine,

worked by Salem Scudder (Mr. Boucicault), another over-seer of the Peyton plantation, having all the apparatus ready set, takes a picture of the murder, which subsequently serves to convict M'Closkey, and subject him to Lynch-law. Previous to this, however, the villain has succeeded in his object. He has driven Peyton to sell the plantation, with the slaves on it, and has himself purchased the fair Octoroon. This is the exciting sensation-scene;—the bidding for the poor girl, and the determined out-bidding by the remorseless villain, whose lawless love is her ruin. This scene is most skillfully handled;—there is neither exaggeration nor apparent seeking for effect in it;—but it is a literal representation of such transactions in the South, and tells all the more forcibly by reason of its naked truth. Justice, as we have said, comes up at last with M'Closkey, who is confined in the hold of a steamer, but, while there, contrives to throw a lighted lantern among some tar-barrels, and to escape in the confusion consequent on the conflagration. He falls, however, into the power of the Indian, who sacrifices him on the grave of little Paul. The packet, also, reaches the hands of Peyton, but too late;—for poor Zoe has, in her despair, taken poison.

It is probable that this tragic ending will somewhat impair the popularity of the new drama; for mixed audiences, after having enjoyed the sensations that accompany the presence of danger, expect a happy deliverance, as a reward for the terrors they have voluntarily suffered, and, if denied this, are apt to regard themselves as defrauded of their due rights. Some such feeling was manifested at the conclusion of this exciting drama. But the elegance of the dialogue, the novelty of the situations, and the merit of the acting, particularly on the part of Mrs. Boucicault, had already extorted an abundance of applause, and the curtain fell upon an unquestionable triumph. For the rest, the beauty of the scenery, and the general completeness of the accessories, will secure it a prolonged success; if the steamer on fire do not, some night, prove more "sensational" than was originally intended.

STRAND.—A new piece, written by Mr. T. L. Greenwood, entitled 'Is it the King?' has been introduced here for the purpose of giving *éclat* to the debut of Miss Ada Swanborough, the sister of the late conductress of this theatre. The plot is curious, and takes for granted a political position which would be sought for in vain in history. The Salic law is supposed to prevail in Denmark, and *Christian*, the supposed King (the part supported by Miss Ada Swanborough), is opposed by the *Duchess of Oldenburg* (Mrs. Manders);—who plots with the Duke, her husband, in order to gain the crown for herself. Accordingly, they unite to bring about a repeal of the offensive law. They succeed in the last part of their project, but not in the first. *Christian* appears in female attire, and declares the fact that her sex has hitherto been concealed, to evade the law, the repeal of which renders such concealment no longer needful. A faithful adherent, the young Count *Eric of Holstein*, is also named as her future husband; and thus her power is secured against further attacks. The part is one well calculated to set off the young lady's elegant figure; and is, in other respects, within the compass of her powers.

NEW ROYALTY.—This place of amusement, recently known as the Soho Theatre, was last week opened by Mdle. Albina di Rhona, for other than the amateur purposes to which hitherto it has been principally devoted. The announcement of this lady's intention was made a considerable time ago, but some "unforeseen difficulties" interfered with the immediate fulfilment of her design. It was expected that light pieces would have been chosen for so small a stage and so diminutive a house; but Mademoiselle's advisers have thought differently, and we have had, therefore, to encounter, on our first acquaintance with the fair manager, an elaborate melo-drama in three acts and five tableaux, stuffed to repletion with startling and astounding effects. This prodigious piece of attraction has been adapted by Mr. B. Barnett, from

Eugène Sue's romance of 'Atar-Gull,' and bears the same name. The hero is a slave in St. Domingo, who is well inclined to his master, whom he saves from violence, but who is perverted to malignity by the simultaneous fact of his own father being hanged by the planters. He swears revenge; and, taking advantage of his good character, binds his employer to him by ties of gratitude and affection, and even establishes a place in the heart of his master's daughter,—only for the purpose of ultimately insuring their misery, and exulting over it. Mr. Sinclair enacts *Atar Gull* with force and judgment; and Mr. Graham, as Mr. Thompson, the planter, and Miss Fanny Clifford, as his eldest daughter, *Emma*, are also as judicious and effective as the limited stage will permit. Miss Ellen Terry, as his younger daughter, *Clementine*, acted with an interesting naïveté, and had a situation of some difficulty to realize. She is attacked in a summer-house, the door of which is locked, by a large serpent, and forces her way out of the window, with the coils about her neck, shrieking with terror. The young lady depicted this fearful incident so naturally, that she deservedly obtained very great applause. Mr. W. Worboys, as *Snazles*, a cockney servant to Mr. Thompson, is a meritorious low comedian, and is likely to prove beneficial to the management. We met with this gentleman again in the new *vaudeville*, constructed for the purpose of introducing Mdle. Albina in two national dances; and, as the valet to an artist, recognized in him full power to give importance to trifles, and by his own personal humour to create an interest in the audience. The two dances executed by Mdle. Albina were the celebrated *Les Folies d'Espagne* and *La Hongroise*. They were superbly interpreted. We should also mention, that Mr. R. Hall performed some Aron-variations and 'The Last Rose of Summer' on his Magic Bugle, which recently won the Gold and Silver Medal of the Lowell Association.

MUSICAL AND DRAMATIC GOSSIP.—There is a talk that among the sights and sounds of next year will be an English opera at Drury Lane Theatre, to combine, it is added, Mademoiselle Tietjens and Mr. Sims Reeves. The plans for improving the sonority of the orchestra in the Crystal Palace for the Handel Festival of 1862 are complete, and so far as a judgment can be passed on them, satisfactory.

Mr. Macfarren is said to have made great progress in another opera on an English subject.—The *Musical World* states that Mr. F. Scott Clarke is engaged in the composition of an opera.

All lovers of music—and especially those who, like ourselves, are opposed to centralization—will be glad to hear of the flourishing estate of Mr. C. Halle's Concerts at Manchester.—The subscription-list (for a series of twenty) is said to be very large: a fact increased in value by the commercial anxieties of the writer;—and, besides a nucleus of subscribers, there is a floating public mounting to upwards of a couple of thousand persons at favourite performances.—We may return to these concerts as of the highest importance.

Other of the provincial manufacturing towns are setting an example, not to be disdained by our cathedral cities, nor even by London.—Last evening a concert was held in the Town Hall, Birmingham, by the *Birmingham Amateur Harmonic Association*, at which a new one-act Oratorio 'Hezekiah,' by Mr. Gaul (who belongs to Warwickshire, we believe), was to be given, and after a short miscellaneous act, Dr. Bennett's 'May-Queen.'

The following is from the column of Chatham news in the *Morning Post* of Monday last:—"A very amusing and highly instructive Lecture 'On Music and Part Singing' was delivered the other evening, by Capt. Charles Prevost, 31st Regiment, at the newly-erected school-rooms, Military Road. The entertainment was given specially for the military, who were admitted free, but, of course, a charge for entrance was made to civilians. The room was excessively crowded, and the audience seemed fully to appreciate the excellent manner in which the proceedings were carried out. The sing-

ing was good; the chorus numbered about forty voices, and several of the choristers of Rochester Cathedral lent their assistance. The profits, if any were realized, are to be handed over to the fund for the *Soldiers' Institute*, now building at the rear of Chatham Barracks."

A list of the orchestra of the *Amateur Bristol Musical Society*, with a programme of its first concert, indicates that the gentlemen composing it are strong enough to grapple with good music. M. C. Boosé is the conductor.

It is not our wont to announce schools undertaken by private individuals; but we may state that the form of Dr. Wyld's advertisement of the Musical Academy, at the head of which he has placed himself, indicates an attempt to provide, what the Royal Academy of Music does not, efficient education; and further that the defects of that establishment are becoming more and more openly acknowledged.

By a slip of the pen in last week's *Athenæum*, the commencement of the *Glee and Madrigal Union's* concerts was ante-dated. They were resumed on Monday last.

In respect to the treatment of the third act of 'Othello,' a discovery has been made in reference to the day of the week on which the action takes place. Clearly as this is defined in the text, the commentators have never yet hit on it:—

OTH. Not now, sweet Desdemona; some other time.

DES. But shall't be shortly?

OTH. The sooner, sweet, for you.

DES. Shall't be to-night at supper?

OTH. No, not to-night.

DES. To-morrow dinner then?

OTH. I shall not dine at home;

I meet the captains at the citadel.

DES. Why, then, to-morrow night—or Tuesday morn—

Or Tuesday noon, or night—or Wednesday morn.

The to-morrow was the day before Tuesday, *argued* Monday;—and the day on which this interesting discourse was held, of course, was Sunday. This was the day of all days, selected by the irreverent and malignant Iago for tempting his master into his fatal jealousy. A mocking Correspondent suggests that, in future, advantage should be taken of this interesting discovery, and particularly in reference to the open-air action of the scenes intended by the author. All parties might be made to meet accidentally as going to and from church; and, at a convenient part of the action, the congregation could be shown processional, as just emerging from the place of worship. It might be then supposed that Othello himself referred to his morning's experience when he said of Emilia—

And yet she'll kneel and pray! I have seen her do't!

Opera affairs seem moving on but slowly in Paris.—The *Grand Opéra* seems to be perpetually trying new singers who do not turn out well,—thus at once making a repetition of works worn threadbare necessary,—while contributing to tire the public of accepted favourites, and to sink the reputation of the better artists, who can hardly help singing spiritlessly when they have to go over the old ground as part of an ill-composed team. And where are the composers? No want of new names, but the fruit withers quickly.—A new ballet, 'L'Etoile de Messina,' was to be produced on Wednesday last.—Meanwhile, it would appear that 'Alceste' grows in favour; since we read of *encores* beginning to be heard in that opera. The *solo* of the *High Priest*, with chorus, 'Dieu puissant,' was repeated at the fourth performance; for the first time, it is said, since the music was written.—At the *Opéra Comique*, two of the less excellent operas of the octogenarian composer, M. Auber, 'La Sirène' and 'La Circassienne,' go the round of the week. A new work, however, 'Le Joaillier de St.-James,' by M.M. Grisar, Saint-Georges and Leuven, is in active rehearsal.—At the *Théâtre Lyrique* some fresh trial and failure seem to take place every ten days—not worth chronicling. There must be mismanagement in all this, or else a sad exhaustion of invention and diligence among those who are indulged with opportunities.—An opera by M. Jules Beer (nephew, we believe, of M. Meyerbeer), which is forthcoming there shortly, is expected to make a sensation.—Meanwhile, a German comic-opera company, headed by Madame Ida Brünnig, who bears the name, we are told, of the German Deje-

zet, are playing and singing little pieces (some of them nearly as old as the century), at the *Théâtre des Jeunes Artistes*.

M. Padeloup, the spirited conductor of the Concerts of the *Société des Jeunes Artistes*, in Paris, has just established three cheap concerts, consisting of the best instrumental music, which we are assured have a prodigious success. We are especially glad to record the great favour which attended M. Jacquart's performance of the Violoncello Concerto, by our excellent townsman Herr Molique.

A friend on whom we can rely confirms the impression already stated as regards the indifferent success of the late meeting of the Orphéonistes in Paris. There appeared to him great disunion in the body—and the numbers to be less than had been announced in the advertisements, by some thousands.

The St. Cecilian Mass, performed according to usage, in the Church of St. Eustache, Paris, yesterday, was to be the one by Signor Bonetti, already given there in 1860.

Our London amateurs will gather some idea of the plight of the *Teatro San Carlo*, Naples, by reading that the season commenced with 'La Traviata,' in which Mdlle. Sarolta and Signor Aldighieri were two of the principal singers.

The Arch—(how should he be named?) of that haunt of luxury and ruin, Baden-Baden, M. Bénazet,—has commissioned two new French operas for the inauguration of the new theatre, which he is about to add to the temptations of that lovely watering-place;—'Erostrate,' by MM. Reyer and Méry, in two acts, and a two-act work, the words and music by M. Berlioz, founded on a Shakspearian subject.

It is said that Dr. Liszt is about to leave Weimar definitively, if, indeed, he have not already done so. We cannot but fancy that the party of which he has been so chivalrous a champion is breaking up.

Note should be taken of the communication addressed to the French papers by Mr. Dion Boucicault, explaining that 'Le Lac de Glenaston,'—the new piece with "the header" which has been drawing the Boulevard public to see it,—has little or nothing to do with 'The Colleen Bawn,' save inasmuch as that stage effect is concerned.—This can surprise no one: since how was the brogue-drama to be "discussed in French"?—Elsewhere, however, our far-famed neighbours, from whom we are taking plots by the dozen, are beginning to pay themselves by appropriating our "transformation" tricks.—The effect in 'La Prise de Pékin,' which all Paris has been running to see, was invented for the Lyceum Theatre when under the management of Madame Celeste.

We may have something to say next week of Mr. G. Linley's "entirely new and original operetta," 'The Toy-maker' (to quote from the Covent Garden bills).

MISCELLANEA

Australia, Colonization and Cotton.—At the opening of the Session of the Royal Dublin Society, this week, Mr. Locke, Chairman of the Meeting, stated that he had received a letter from Adelaide, notifying the return of Mr. J. M'Douall Stuart from "one of his dashing rides into the interior," after a third unsuccessful attempt to cross the continent. He had discovered, however, vast districts, peculiarly suitable for the growth of cotton; and was preparing to start again, with the determination to solve the geographical mysteries of the central country, and plant the British flag on the shore of the Indian Ocean. Mr. Locke had communicated an account of Stuart's second expedition in 1860, for which that indomitable traveller had been awarded the medal of the Royal Geographical Society; and he expected, by the Southampton mail, the journal of this last expedition, the results of which, together with a chart of the route, he hoped to lay before the Royal Dublin Society, at their December meeting.

MACMILLAN'S NEW LIST.

1.

3 vols. 12. 11s. 6d. on Monday next, the SECOND EDITION of

TOM BROWN AT OXFORD.

May be had at all Libraries and Booksellers' in the Kingdom.

2.

Immediately, pot 4to. handsomely printed and bound, with Four Illustrations from the Author's Designs,

THE LADY OF LA GARAYE.

By the Hon. Mrs. NORTON.

Dedicated to the Marquis of Lansdowne.

3.

Now ready, SIXTH THOUSAND,

Small pot, handsomely printed and bound, with a Vignette from design by T. Woolmer, 4s. 6d.

THE GOLDEN TREASURY

OF THE BEST SONGS AND LYRICAL POEMS IN THE ENGLISH LANGUAGE.

Selected and Arranged, with Notes, by F. T. PALGRAVE,
Fellow of Exeter College, Oxford.

** Also kept in morocco binding, plain, 7s. 6d.; extra, 10s. 6d.

4.

Immediately, small pot, uniform with the 'Golden Treasury,'

THE CHILDREN'S GARLAND FROM THE BEST POETS.

Selected and Arranged by COVENTRY PATMORE.

5.

Immediately, small pot, uniform with the 'Golden Treasury,'

THE PILGRIM'S PROGRESS FROM THIS WORLD TO THAT WHICH IS TO COME.

SHAKSPEARE'S COMPLETE WORKS.

Edited and Annotated by Rev. ALEXANDER DYCE.

"A minute examination has satisfied us that this is the best text of Shakspeare which has yet been given to the world.... Mr. Dyce has succeeded in a department where so many have failed. He unites, indeed, the necessary qualifications in a singular degree. He is an admirable classical scholar, is deeply read in Elizabethan literature, has a fine ear for metre, and a strong sense of poetic beauty. His industry is on a par with his accomplishments.... This at least is beyond doubt, that we have never possessed so admirable a text of Shakspeare before; and we would suggest to the thousands of people who are always inquiring for something interesting to read, that they should read again the works of the monarch of literature, and read him in the edition of Mr. Dyce."—*Quarterly Review*.

Messrs. GRIFFIN, BOHN & CO. having purchased the entire remainder of the above Work, are enabled to offer it at the marvellously low price affixed. Early application is necessary to secure copies.

London: GRIFFIN, BOHN & Co. Stationers' Hall-court.

Now ready, in 1 vol. 8vo. Plates of Runic Inscriptions, cloth, 15s.

FRENCH LITERATURE.

Just published, in crown 8vo. cloth, pp. 500, price 4s. 6d.

CLASS-BOOK OF FRENCH LITERATURE: comprehending Specimens of the most distinguished Writers, from the Earliest Period to the Beginning of the Present Century. By GUSTAVE MASSON, B.A., Assistant-Master at Harrow School, &c.

By the same Author, in 18mo. cloth, price 2s. 6d.

INTRODUCTION to the HISTORY of FRENCH LITERATURE.

"As a Companion Volume to Mr. R. Demaus' Introduction to the History of English Literature, Messrs. Black have published a similar volume by M. G. Masson, Assistant at Harrow, on the History of French Literature. We have already spoken favourably of Mr. Demaus' book, and can do so of its companion in still higher terms. It is excellently adapted for its purpose, as a handbook for the upper classes of Schools, in which something more than the mere grammar of the language is attempted to be taught. As he classes each period of his review, M. Masson gives a very useful table of authors to be consulted by those who wish to study the subject, which his limits do no more than allow him to introduce to his readers. The extensive study requisite for the production of a small volume like the present, has but little opportunity of displaying itself otherwise than in the judicious remarks and general mastery of his subject, which M. Masson everywhere displays. The book is remarkably well fitted for the purpose it has in view, and will, we should think, meet with the welcome it deserves at the hands of those engaged in education."

Westminster Review.

Edinburgh: Adam & Charles Black. London: Longman & Co.

Lately published, Tenth Edition, 8vo. 762 pp. price 18s. cloth,

HAYDN'S DICTIONARY OF DATES,

RELATING TO ALL AGES AND NATIONS,
FOR UNIVERSAL REFERENCE;

COMPREHENDING

REMARKABLE OCCURRENCES, ANCIENT AND MODERN—THE FOUNDATION, LAWS AND GOVERNMENTS OF COUNTRIES—THEIR PROGRESS IN CIVILIZATION, INDUSTRY, LITERATURE, ARTS AND SCIENCE—THEIR ACHIEVEMENTS IN ARMS—THEIR CIVIL, MILITARY AND RELIGIOUS INSTITUTIONS—AND PARTICULARLY OF

THE BRITISH EMPIRE.

By JOSEPH HAYDN.

TENTH EDITION, revised and greatly enlarged by BENJAMIN VINCENT, Assistant Secretary and Keeper of the Library of the Royal Institution of Great Britain.

"My aim throughout has been to make the book, not a mere Dictionary of Dates, but a Dated Encyclopedia,—a digested summary of every department of the History of the World."—*Preface*, 10th Edition.

London: EDWARD MOXON & Co. 44, Dover-street.

Thirty-nine Maps, price One Guinea strongly half bound,

THE CYCLOPÆDIAN ATLAS OF GENERAL MAPS,

Designed by the USEFUL KNOWLEDGE SOCIETY, containing Thirty-nine Maps, beautifully coloured, with Index, price 14. 1s. strongly half bound.

The following Notice was issued on the Completion of THE ENGLISH CYCLOPÆDIA:—

"Soon after the commencement of the GEOGRAPHICAL DIVISION OF THE ENGLISH CYCLOPÆDIA, the Publishers announced their intention to produce an Atlas especially suited for this work. They now feel it their duty to state that they have, at least for the present, abandoned that intention. The essential difficulty in producing such a collection of Maps consists in reconciling the two opposite demands of cheapness and completeness. A cheap Atlas can only consist of the general Maps of Countries. For example, a general Map of Russia would only therein find a place. But in a general Map of Russia, the Crimea is a mere speck. If a particular Map of the Crimea were introduced, upon the principle we should require a special Map of the Principalities; and thus a large Atlas would have to be produced, in which the condition of cheapness would necessarily be thrown aside. For these reasons, at the present time, the Publishers recommend those who desire Maps to accompany the Cyclopædia of Geography, to make a selection from the Maps of the Society for the Diffusion of Useful Knowledge, which were prepared under the same superintendence as the Penny Cyclopædia, upon which the English Cyclopædia is founded.

"The General Maps of that series have been collected and published under the title of 'The Cyclopædian Atlas,' This selection consists of Thirty Maps, with Index; and is sold, very neatly half bound, at 15s. plain, and 21s. coloured.—*December, 1855.*"

N.B. 'The Cyclopædian Atlas' now contains Thirty-nine Maps, with all important discoveries introduced.—*December, 1861.*

London: EDWARD STANFORD, 6, Charing Cross, S.W.; and all Booksellers.

NEW NOVEL by the AUTHOR of 'MARGARET MAITLAND.'

HURST & BLACKETT, Publishers, Successors to Henry Colburn, 13, Great Marlborough-street.

This day is published, beautifully printed by WHITTINGHAM in Old English Type, with the Borders and Initial Letters in red, square 8vo. price 21s. cloth elegant; 27s. calf extra; 31s. 6d. Turkey morocco antique,

SPIRITUAL CONCEITS.

Extracted from the Writings of the FATHERS, the OLD ENGLISH POETS, &c.

With One Hundred entirely New Designs, forming Symbolical Illustrations to the Passages, by W. HARRY ROGERS.

* * * The special characteristics of the work are, that unlike its predecessors, it does not consist of any former collection of emblems, but of a series of entirely new designs, forming symbolical illustrations to one hundred available passages from the Fathers, the Old English Poets, &c. The illustrations unite boldness with elaboration, and are uniformly engraved by Swain, while the subject-matter is calculated to direct the attention of the reader to works, many of which are possibly new to him, but eminently worthy of his acquaintance, if not indeed of his affectionate study.

THE WISDOM OF SOLOMON.

From the BOOK of PROVERBS. Every page richly Illuminated in Gold and Colours from Designs by SAMUEL STANESBY.

Small 4to. price 14s. cloth elegant; 18s. calf extra; 21s. morocco antique.

Dedicated, by permission, to Alfred Tennyson.

GRIFFITH & FARRAN, the corner of St. Paul's Churchyard.

EQUITABLE ASSURANCE OFFICE,

NEW BRIDGE-STREET, BLACKFRIARS.

ESTABLISHED 1762.

DIRECTORS.

THE RIGHT HON. LORD TREDEGAR, President.

William Dacres Adams, Esq.
Philip Hardwick, Esq.
William Samuel Jones, Esq.
John Aldin Moore, Esq.
William Frederick Pollock, Esq.

Charles Pott, Esq.
Rev. John Russell, D.D.
James Spicer, Esq.
John Charles Templer, Esq.
Right Hon. Lord Tredegar.

John Charles Burgoyne, Esq.
Lord George Henry Cavendish, M.P.
Frederick Cowper, Esq.
Richard Gosling, Esq.
Peter Martineau, Esq.

THE EQUITABLE is an entirely MUTUAL Office. The reserve, at the last "rest," in December, 1859, exceeded three-fourths of a million sterling, a sum MORE THAN DOUBLES the corresponding fund of any similar Institution.

The Bonuses paid on Claims in the Ten Years ending on the 31st December, 1859, exceeded **Three Millions and a Half**, being more than 100 per Cent. on the amount of all those Claims.The amount added at the close of that decade to the Policies existing on the 1st January, 1860, was **£1,977,000**, and made, with former additions then outstanding, a total of **£4,070,000**, on Assurances originally taken out for **£6,252,000** only.

These additions have increased the Claims allowed and paid under those policies since the 1st January, 1860, to the extent of 150 per Cent.

The Capital at this time consists of

£2,730,000—Stock in the Public Funds.**£3,006,297**—Cash lent on Mortgages of Freehold Estates.**£300,000**—Cash advanced on Railway Debentures.**£83,590**—Cash advanced on security of the Policies of Members of the Society.Producing annually, **£221,482**.The total Income exceeds **£400,000** per Annum.

POLICIES effected in the current year (1861) will participate in the distribution of Profits made in December, 1859, so soon as Six Annual Premiums shall have become due and been paid thereon; and, in the Division of 1869, will be entitled to additions in respect of every Premium paid upon them from the year 1862 to 1869, each inclusive.

On the surrender of Policies, the full value is paid, *without any deduction*; and the Directors will advance *nine-tenths* of that value as a temporary accommodation, on the deposit of a Policy.

No extra Premium is charged for service in any Volunteer Corps within the United Kingdom, during peace or war.

A Weekly Court of Directors is held every Wednesday, from 11 to 1 o'clock, to receive Proposals for New Assurances; and a Short Account of the Society may be had on application personally, or by post, from the Office, where attendance is given daily, from **Ten to Four** o'clock.

ARTHUR MORGAN, Actuary.

Second Edition, enlarged and improved, with 10 Coloured Illustrations by Harrison Weir, price 7s. 6d.

THE HENWIFE: her Own Experience in her Own Poultry-Yard.

THE ATHENÆUM

Journal of English and Foreign Literature, Science, and the Fine Arts.

No. 1779.

LONDON, SATURDAY, NOVEMBER 30, 1861.

PRICE
THREEPENCE
Stamped Edition, 4d.

NOTICE.

The price of THE ATHENÆUM is now THREE-PENCE.

Thirty years ago, when THE ATHENÆUM came into the hands of its present Proprietors, its price was Eightpence, and its contents, with advertisements, forty-eight columns. Convinced that the circulation of Literary Journals was restricted by high price, and that every advantage offered to the public would bring increase of circulation and authority, the Proprietors reduced the price one-half—to Fourpence. The experiment succeeded, and cheap Literary Journals became the rule.

The Proprietors have always held to the principle then proved. They have given to the public the benefit of every change in the law, increasing the size of the paper without increase of price, until the average has become double its former size—above ninety-six columns.

The Proprietors, taking advantage of the abolition of the Paper Duty, therefore resolved that the price of THE ATHENÆUM should be reduced to THREEPENCE.

LIVERPOOL INSTITUTE.—HIGH and COMMERCIAL SCHOOLS.—The Directors desire to receive Applications for the HEAD-MASTERSHIP of the above-named Schools from Gentlemen competent to undertake that office, and go advise and assist in the Management of the Evening School of the Institute. A minimum salary of £500 per annum will be guaranteed. Further particulars of salary and duties, and all requisite information, may be obtained by applying by letter to the undersigned, to whom Candidates are requested to send in their applications, with copies of their testimonials, on or before the 31st of December next. **ASTRUP CARISS, Secretary.**
Liverpool, November 19, 1861.

MANCHESTER MECHANICS' INSTITUTION.—WANTED, a SECRETARY, to enter upon his duties on the 1st of February, 1862. Salary, £500 per annum. Applications and Testimonials to be sent to the Undersigned, not later than the 14th of December next, indorsed, "Application for Secretaryship." By order, **THOS. MARSHALL, Sec.**
David-street, Nov. 22, 1861.

POLYTECHNIC INSTITUTION.—Professor J. H. PEPPER, F.R.S., A. Inst. C.E., can accept a limited number only of ENGAGEMENTS to LECTURE at Institutions, Colleges and Schools; and his CHEMICAL LABORATORY for Analyses, Private Pupils, Instruction in the Scientific Portion of the Civil Service and Military Examinations, and for Morning and Evening Classes, is at the Polytechnic, 399, Regent-street.
N.B. The Laboratory is carefully fitted with every necessary Apparatus.

CRYSTAL PALACE.—In accordance with general desire, M. BLONDIN will COMMENCE a RENEWED ENGAGEMENT of a series of Daily Performances on the TIGHT-ROPE on MONDAY, December 9th. The enormous lavished on the occasion of M. Blondin's display of these marvellous feats last summer, renders it unnecessary to dilate upon them. For their complete display, a Platform will be erected immediately in front of the Great Orchestra, the Rope being fixed a few feet above the lowest step of the Orchestra.
The Performances, accompanied by the Full Orchestral Band, will be varied daily.
Admission, ONE SHILLING. Schools of Ten or more Pupils will be admitted at Half-price.
M. Blondin's Performance will commence at Three o'clock each day.

PRIZE CATTLE SHOW of the Smithfield Club.—The Annual Exhibition of Prize Cattle, Seeds, Roots, Implements, &c., commences on Tuesday Morning and closes on Friday Evening, 10th, 11th, 12th and 13th of December.—Bazaar, King-street and Baker-street. Open from Daylight till Nine in the Evening. Admission, One Shilling. Last year at the Bazaar.

THE BIRMINGHAM CATTLE and POULTRY SHOW, 1861.

The THIRTIETH GREAT ANNUAL EXHIBITION of CATTLE, SHEEP, PIGS, DOMESTIC POULTRY and ROOTS, will be held in Bingley Hall, on MONDAY, TUESDAY, WEDNESDAY and THURSDAY, the 2nd, 3rd, 4th and 5th of December.

The PRIVATE VIEW on Monday, December 2nd. Admission: Monday, 6s.; Tuesday, Wednesday and Thursday, 1s. The Doors will be opened at Nine o'clock each Morning.
For SPECIAL RAILWAY ARRANGEMENTS, see the Advertisements and Bills of the several Companies.

NATIONAL EXHIBITION OF DOGS.

THE SECOND GREAT ANNUAL EXHIBITION of SPORTING and other DOGS will be held in extensive Premises, in TENNANT-STREET, Broad-street, near Bingley Hall, BIRMINGHAM, on Monday, Tuesday and Wednesday, the 2nd, 3rd and 4th of December next, the first three days of the Cattle and Poultry Show. The PRIVATE VIEW on Monday, December 2.

Admission: MONDAY, 6s.; TUESDAY and WEDNESDAY, 1s. For SPECIAL RAILWAY ARRANGEMENTS, see the Advertisements and Bills of the several Companies, and of the Cattle and Poultry Show.

LITERARY PROPERTY.—A LITERARY GENTLEMAN wants to BORROW 5000. on his Copyrights, or would sell an interest in the same for 6000. the whole of which Sum would be realised within six months. None but Principals with real income answered.—Address A. D., Post-Office, Chancery-lane, Fleet-street.

THE GOVERNESSES' INSTITUTION, 34, SOHO-SQUARE.—MRS. WAGHORN, who has resided many years abroad, respectfully invites the attention of the Nobility, Gentry, and Principals of Schools, to her REGISTER of English and Foreign GOVERNESSES, TEACHERS, COMPANIONS, TUTORS, and PROFESSORS. School Property transferred, and Pupils introduced in England, France, and Germany. No charge to Principals.

BRUNSWICK SCHOOL, LEAMINGTON.
OXFORD MIDDLE-CLASS EXAMINATIONS.

The only First-Class Certificate awarded for the last two years at Birmingham, the Examining Centre for the Midland Counties, has just been gained by a Pupil of Brunswick School, Leamington. Three other Boys from this School passed their Examination. Prospectuses on application.
J. H. HAWLEY, Principal.

MILITARY EXAMINATIONS.—COMPE-
TITORS for Sandhurst, Woolwich, or the Staff College, and Candidates for Direct Commissions or Staff Appointments, are PREPARED in all the Branches (compulsory and optional) of their Programmes, at the Practical Military College, Sunbury, S.W.—Apply for Prospectuses, &c. to Captain LEXNBY.

QUEENWOOD COLLEGE, four miles from Dunbridge Station, South-Western Railway, Hampshire.—The Course of Instruction embraces Mathematics, Natural Philosophy, Theoretical and Practical Chemistry, English, Classics, Foreign Languages, Practical Surveying, Levelling, &c., Mechanical and Free-hand Drawing and Music. The Principal is assisted by ten Resident Masters. The position of the Establishment is beautiful, and the advantages various and unusual. Attention is invited to the Prospectus, which may be had on application.

HARROW or RUGBY.—A Married M.A., of Trinity College, Cambridge, Senior Optime and First Classman in the Classical Tripos, Head Exhibitor of his year at Rugby, who Prepares Boys for the Public Schools, except Eton, has VACANCIES for next Half-year. His house, recently enlarged for the purpose, is situated in a beautiful and healthy part of the country. Terms, 30 Guineas per year, with no extras.—Address M. L., 71, High-street, Birmingham.

Soc., Prof. Eloquence.—TWO LANGUAGES TAUGHT in the same lessons, or alternately, on the same Terms as One, at the pupils' or at his house. Each language spoken in his PRIVATE Lessons, and select CLASSES for Ladies and Gentlemen. Preparation for all ordinary pursuits of life, the Universities, Army and Civil Service Examinations.

TO CLERGYMEN and OTHERS.—A GENTLEMAN is about DISPOSING of his SCHOLASTIC ESTABLISHMENT: consisting of a twelve-roomed house, large School-room, Coach-house, Stables, &c., &c., together with between three and four acres of land, including Shrubbery, Flower and Kitchen Gardens, Orchard and Play-ground. The situation cannot be surpassed for health or beauty; there is every accommodation for a First-class School of from twenty to thirty Pupils. The Premises are held on an unexpired term of eleven, eighteen or twenty-five years, at the low rental of 500. per annum. The neighbourhood is highly fashionable, and the house and grounds, surrounded by park-like country, are within thirty miles of London. Good-will for Lease, Furniture, School Books, &c., about 3000. No School Agent need apply.—Address A. A., care of Kingsbury & Co., 30, Clements-lane, London, E.C.

SCHOLASTIC.—The sole Direction and Proprietorship of a high-class Institution for Gentlemen's Sons is, through the impaired health of the Principal, OFFERED to a competent successor. The position and income are good. The present Principal could, if desired, continue his nominal help and presence.—For particulars, address Messrs. ALLEN, Clerical and Educational Agents, 8, Craig's-court, Charing Cross, S.W.

TO CLERGYMEN and OTHERS GOING ABROAD.—The Resident Surgeon to a London Dispensary GIVES PRACTICAL INSTRUCTION in MEDICINE and SURGERY. Terms moderate.—Address M.R.C.S., the Dispensary, Church-road, Brixton, S.

A MEDICAL MAN, married and practising in the most beautiful and healthy Suburb, four miles from London, having a larger house than he requires, DESIRES to meet with a LADY or GENTLEMAN invalid or not, to reside with him. Separate accommodation could be offered.—Address, post-paid, M.D., Foreign Newspaper Office, 3, St. Ann's-lane, General Post-Office, E.C.

LADIES' PRIVATE DRAWING-CLASSES, 41, FITZROY-SQUARE.—Mr. B. R. GREEN, Member of the New Water-Colour Society, begs to announce that he RECEIVES SIX YOUNG LADIES, two mornings in the week, for Instruction in Drawing and Painting. Green's RUSTIC MODELS, enabling the Pupil to sketch at once from Nature.—Sold at the principal artists' Repositories, in sets, at 10s. and 35s., or singly, at 2s. 6d.

DIED, November 26th, at his Residence in Hoxton-square, London, Mr. JAMES NICHOLS, Author and Printer, in the Seventy-seventh Year of his Age.

WANTED, a HEAD-MASTER for the MANCHESTER SCHOOL of ART, who must have received a Certificate from the Department in London. The minimum Salary is 3000. He must devote the whole of his time to the duties of the office, and be fully competent to instruct in every branch of Art taught in the Institution.—Application, with Testimonials, to be forwarded to the Secretary on or before the 1st of January next. **RICHARD ASPDEN, Sec.**
92, Mosley-street, Manchester.

TO AUTHORS, PUBLISHERS and NEWS-PAPER PROPRIETORS.—A LADY, thoroughly experienced in Literary matters, good musical critic, perfect mistress of French and Italian, desires a RE-GIG. An apt Translator, amanuensis and Corrector of the Press.—M. S. S., Pelham Library, Fulham-road, Brompton.

REPORTER.—A Young Man wants an ENGAGEMENT as JUNIOR REPORTER. He has had some years' experience, writes Short-hand verbatim, and can read Proofs, if necessary.—Address O. P., Reporter, Mr. Henry Green, Advertising Agent, 8, Chancery-lane, W.C.

TO EDITORS of JOURNALS and MAGAZINES.—THE ADVERTISER is open to an Engagement as LONDON CORRESPONDENT to a Country Journal, or as Contributor of Literary and Art Critiques to a Magazine.—Address, stating terms, to DALRYTH, 14, North-crescent, Bedford-square, W.C.

TO PUBLISHERS.—A GENTLEMAN of capital is desirous of embarking in the PUBLISHING BUSINESS, either as Partner or by Purchase.—Address, in the first instance, to X. Y. Z., care of Mr. Lindley, 19, Catherine-street, Strand, W.C.

WANTED, by an English Gentleman, aged 50, PARTIAL ENGAGEMENT, as English, Italian or French Correspondent, Confidential Secretary, Interpreter, Reader, Translator, Teacher, Clerk, or otherwise. First-rate City and West-End references. Security, &c.—Address, p. p., to Mr. CURR, 33, Great Portland-street, Regent-street.

TO CHEMISTS.—Wanted in an Old-Established Manufactory in the Country, the PERMANENT SERVICES of a GENTLEMAN, thoroughly qualified to develop, by experiments, the articles manufactured. One who has been engaged in connexion with the Oil and Colour Trades would be preferred. Salary, 8000. per annum and occasional bonuses. Applications will be considered confidential and should specify age and antecedents, with references for personal and professional character (not to be made available without prior communication), and addressed X. A., care of Charles Barker & Sons, 8, Birch-lane, E.C.—Testimonials will be returned to unsuccessful candidates.

MEDICAL.—A proportionate Bonus will be given by the Advertiser to any one who may legally procure for him a good and permanent Civil or Foreign MEDICAL APPOINTMENT in a healthy Locality. The Advertiser is a fully qualified, married man, of considerable Experience.—Address or apply, in strictest confidence, with full particulars, to 1,093, care of Wm. Eames & Co., Medical Agents, 21, Abchurch-lane, E.C.

LEIGH'S SCHOOL of FINE ART, 79, New-man-street, Oxford-street.—Conducted by Mr. THOMAS HEATHERLEY.—Hours of Study, from 10 to 4 A.M. and from 7 to 10 P.M. Living Model 5 hours daily. Ladies and Gentlemen prepared for the Royal Academy. A fine Gallery of Casts, Life and Costume Models alternate Evenings.—Monthly Fee, 7s. 6d. A Lady desirous of a thorough Art-education can be received as a boarder.

EXHIBITION of WATER-COLOUR DRAWINGS, ROYAL MANCHESTER INSTITUTION.—In order to afford a more especial recognition of the claims of Water-colour Art than is possible at the General Annual Exhibition in the Autumn, the Council have again determined to OPEN an EXHIBITION of WATER-COLOUR DRAWINGS in APRIL NEXT, and the opportunity of exhibiting will not be confined to artists and private individuals, but will be extended to the trade generally. The Exhibition will continue open until the end of June, and Drawings will be received under regulations stated in the usual printed Circular. Works should be forwarded so as to arrive not later than April 10.

Mr. Joseph Green, of 14, Charles-street, Middlesex Hospital, will take charge of any works sent to him to forward. Parties willing to contribute, are requested to communicate particulars to the Honorary Secretary as early as possible, as it is desirable to ascertain the extent of the proposed Exhibition, and what space will be required.

HENRY COOK, Honorary Secretary.

ARTICLED MUSIC PUPIL.—The Organist and Choir-Master of York Cathedral will RECEIVE ONE MORE PUPIL into his House. Age, about 15.—For Terms, &c., address Dr. Moss, Minster-yard, York.

TO the NOBILITY and GENTRY.—A GERMAN GENTLEMAN, who besides his Native Language thoroughly understands English, French and Latin, is desirous of permanent or occasional EMPLOYMENT in a Library, in reading with Pupils, Translating, or in any other Literary Capacity. References unexceptionable.—Address B. S., care of Messrs. Hookham, 15, Old Bond-street.

TO NOBLEMEN and GENTLEMEN about to travel with their Families or alone, a PHYSICIAN, of mature age and ample experience, OFFERS his SERVICES.—Address, by letter only, appointing an interview.—M. D., care of Messrs. J. Bell & Co., 338, Oxford-street.

ORIENTAL GENERAL CARRIERS.
THE ORIENTAL INLAND STEAM COMPANY (Limited), under subsidy from the Indian Government.
Capital, 500,000l.

This Company acts as general carriers both by land and water, and as general forwarding Agents throughout the East. They receive goods in England for transmission to different points of India, whether on the Coast or in the Interior; they convey goods by railway, by steamboat, or other available means, from one part of India to another; and they receive goods at the different stations in India for transmission to England. They forward both by the Cape and Overland Routes, as shippers may desire; and parcels or merchandise entrusted to them, whether in India or in England, will be conveyed to their destinations at the lowest possible charge, without further trouble to the shipper or consignee, than the present risk of detention, and without requiring the intervention of any other agency.

For tariff of rates, and all other necessary information, apply at the Company's Offices, 9, Billiter-street, London, or 2, Queen's-terrace, Southampton, or to the Company's Agents at the different Stations in the East. A number of these Agencies have been already established, and the others are being formed as rapidly as possible.

The following are some of the existing or proposed Stations:—

TO STATIONERS, BOOKSELLERS and OTHERS.—In a beautiful District within a few miles of Town, Messrs. BAYLY & NEWMAN, Auctioneers, to SELL the TRADE of a BOOKSELLER, STATIONER and DEALER in PRINTS. Advantageously situated in a Locality of surpassing beauty annexed to which there is a Foundation School, which will at all times command a respectable Trade. About 4000 required, after the purchase-money is paid. Money not all required down, if good security can be given. A portion of the business moves the house. The purchaser may have a lease for any term required, with option of purchase. 4000 spent on improving the premises in 1857. 8000 will carry on the business comfortably, after the purchase-money is paid. Money not all required down, if good security can be given. A portion of the furniture may be bought by valuation if a purchaser wishes to have it. Very good profits obtained, and the connexion a general one. This is a first-class opportunity for any one to settle for life.—For particulars, address Mr. Holmes, Accountant and Valuer to the Trade, 42, Paternoster-row.

TO PRINTERS AND OTHERS.—A Capital City Trade.—Messrs. BAYLY & NEWMAN have been instructed by the owner to SELL a LETTER-PRESS, BOOKWORK and JOBBING Trade, together with a Lithographic Business. There is a good connexion. About 5000 required. Apply to Messrs. BAYLY & NEWMAN, Auctioneers and Valuers to the Trade, 10, George-yard, Lombard-street, E.C.

TO BOOKSELLERS, STATIONERS and PRINTERS.—MR. HOLMES is instructed to SELL the BUSINESS of a BOOKSELLER, Stationer and Printer, established above 30 years, in a large and flourishing town. The returns are between 3,000l. and 4,000l. a year, and the amount to purchase will not exceed 1,800l. to 1,900l. Excellent stock, all new within the last four years; and printing-office well fitted with every requisite of the trade. Rent 500l. Commanding premises situate in centre of market-place. Proprietor of the business owns the house. The purchaser may have a lease for any term required, with option of purchase. 4000 spent on improving the premises in 1857. 8000 will carry on the business comfortably, after the purchase-money is paid. Money not all required down, if good security can be given. A portion of the furniture may be bought by valuation if a purchaser wishes to have it. Very good profits obtained, and the connexion a general one. This is a first-class opportunity for any one to settle for life.—For particulars, address Mr. Holmes, Accountant and Valuer to the Trade, 42, Paternoster-row.

IDEAL VIEWS OF THE PRIMITIVE WORLD
 In its GEOLOGICAL and PALEONTOLOGICAL PHASES. By Dr. F. UNGER, of Vienna. Edited by SAMUEL HIGGLEY, F.G.S., F.C.S. &c. Illustrated by 17 Photographic Plates of the Silurian, Devonian, Transition, Carboniferous, Permian, Trias, Muschelkalk, Keuper, Lias, Oolite, Wealden, Chalk, Eocene, Miocene, Diluvium, and Alluvium or Recent Periods.

"The subjects, far from being the mere diagrammatic sketches which we are apt to associate in our minds with geological illustrations, are, on the contrary, poetical, pictorial works of art of no mean order, pleasing when viewed as isolated specimens, still more so when regarded as a series, and to which the perusal of the *new series* adds an additional charm."
British Journal of Photography,
 Samuel Highley, 70, D'Arny-street, Soho, London, W.

Just published, in 2 vols. price 21s.

CELEBRATED FRIENDSHIPS.

By Mrs. THOMSON,
 Author of 'Memoirs of the Duchess of Marlborough,' 'Life of George Villiers, Duke of Buckingham,' &c.

From the OBSERVER.
 "Among the various forms of historical literature the plan of this work is certainly novel, and it has, no doubt, many advantages. There are few great men who have not had their intimates and their loving friends to whom all their inmost thoughts are laid bare; and the correspondence which has passed in this familiar strain would show the natural thoughts and feelings far better than those public acts that are prepared and arranged beforehand for special objects. Instead of adopting the usual method of writing biographies, the author has chosen particular aspects of character, only glancing at political events, and has given the details of private affairs and the analyses of human feelings, unhackneyed by a narration of those graver events which affect the public weal and act upon the destiny of nations. The scope of this work enables the author to place two characters in such a position as to show the influence of the one upon the other; and it portrays the inner life of man with many of the secret springs by which that life is directed. No particular period has been chosen for these outlines of character; and we find John Evelyn and Robert Boyle standing beside the Earl of Surrey and Sir Thomas Wyatt, and William Cowper and Mary Unwin beside Marie-Antoinette and the Princess de Lamballe. In addition to the above, the first volume contains the friendships of Addison and Steele, Magdalen Herbert and Dr. Donne, and Sir Kenelm Digby and Sir Anthony Van Dyke; sufficient, as any one will acknowledge, to make a very interesting book. In the second volume we have Sir Philip Sydney and Sir Fulke Greville, Samuel Taylor Coleridge and Charles Lamb, Fénelon and Madame Guyon, Mrs. Carr and Miss Talbot, Lord Bolingbroke and Pope, Garrick and Mrs. Clive, the Earl of Clarendon and Viscount Falkland, and the Countess of Hertford and the Countess of Pomfret. From these names, all of them so celebrated in history, it will be at once seen that the work contains subjects of considerable interest; and the care and talent brought to bear upon the elucidation of facts connected with the lives of these persons cannot be spoken of in too high terms of praise."

From the DAILY NEWS.

"Mrs. Thomson has certainly produced an interesting work. She says little of public events, nor does she submit to historical sequence in the arrangement of her chapters. The object she has had in view has been to develop the peculiar qualities of each pair of friends, and show how they fitted one another; she deals much, therefore, in analysis of feelings, as they are interpreted by actions, and shows very clearly that absolute similarity of character, so far from being essential to intimate friendship, often causes people to move in parallel lines without ever meeting."

London: JAMES HOGG & SONS.

Price 5s.
THE SUNBEAM; or, the Misused Gift: a Tale by the Author of 'My Christian Home,' 'Ready and Desirous,' &c.

CELEBRATED FRIENDSHIPS.

By Mrs. THOMSON,
 Author of 'Memoirs of the Duchess of Marlborough,' 'Life of George Villiers, Duke of Buckingham,' &c.

From the OBSERVER.
 "Among the various forms of historical literature the plan of this work is certainly novel, and it has, no doubt, many advantages. There are few great men who have not had their intimates and their loving friends to whom all their inmost thoughts are laid bare; and the correspondence which has passed in this familiar strain would show the natural thoughts and feelings far better than those public acts that are prepared and arranged beforehand for special objects. Instead of adopting the usual method of writing biographies, the author has chosen particular aspects of character, only glancing at political events, and has given the details of private affairs and the analyses of human feelings, unhackneyed by a narration of those graver events which affect the public weal and act upon the destiny of nations. The scope of this work enables the author to place two characters in such a position as to show the influence of the one upon the other; and it portrays the inner life of man with many of the secret springs by which that life is directed. No particular period has been chosen for these outlines of character; and we find John Evelyn and Robert Boyle standing beside the Earl of Surrey and Sir Thomas Wyatt, and William Cowper and Mary Unwin beside Marie-Antoinette and the Princess de Lamballe. In addition to the above, the first volume contains the friendships of Addison and Steele, Magdalen Herbert and Dr. Donne, and Sir Kenelm Digby and Sir Anthony Van Dyke; sufficient, as any one will acknowledge, to make a very interesting book. In the second volume we have Sir Philip Sydney and Sir Fulke Greville, Samuel Taylor Coleridge and Charles Lamb, Fénelon and Madame Guyon, Mrs. Carr and Miss Talbot, Lord Bolingbroke and Pope, Garrick and Mrs. Clive, the Earl of Clarendon and Viscount Falkland, and the Countess of Hertford and the Countess of Pomfret. From these names, all of them so celebrated in history, it will be at once seen that the work contains subjects of considerable interest; and the care and talent brought to bear upon the elucidation of facts connected with the lives of these persons cannot be spoken of in too high terms of praise."

From the DAILY NEWS.

"Mrs. Thomson has certainly produced an interesting work. She says little of public events, nor does she submit to historical sequence in the arrangement of her chapters. The object she has had in view has been to develop the peculiar qualities of each pair of friends, and show how they fitted one another; she deals much, therefore, in analysis of feelings, as they are interpreted by actions, and shows very clearly that absolute similarity of character, so far from being essential to intimate friendship, often causes people to move in parallel lines without ever meeting."

London: JAMES HOGG & SONS.

NEW BOOKS AND PRESENTS.

London: BELL & DALDY, 186, FLEET-STREET.

"This is such a Dictionary as perhaps no other language could ever boast."

Quarterly Review.

DR. RICHARDSON'S NEW ENGLISH DICTIONARY. In 2 vols. 4to. with the Supplement, 4l. 14s. 6d.; half russet, 5l. 15s. 6d.; russet, 6l. 12s.

In this Dictionary the Words are traced to their origin and etymologically explained; and the various usages are subjoined in a copious Selection of Illustrative Quotations, chronologically arranged, so as to make a Complete Philosophical Lexicon of the English Language. The great first principle regulating the explanation of the word is, "that a word has one meaning, and one only; that from it all uses must spring and be derived; and that this single intrinsic meaning must be found in its Etymology."

The first extension of the use of Words from this Literal Meaning is to supposed or assumed similar or correspondent objects, or actions, or operations in the human mind. This, the metaphorical application of the Literal Meaning, has, for the sake of brevity, been called the Metaphorical Signification.

From this Literal Meaning and Metaphorical Signification, the next step may be named the Consequential; and hence descend, in wide and rapid course, the application of Words in all their variety.

These Explanations have been given as briefly but accurately as possible, and copiously illustrated by the quotation.

DR. RICHARDSON'S SMALLER DICTIONARY of the ENGLISH LANGUAGE: combining Explanations with Etymology. New Edition, 8vo. 15s.

A Series of Grammatical and Etymological Questions suited to the Dictionary, and specially adapted to the Public Examinations in the English Language, is prefixed.

London: BELL & DALDY, 186, Fleet-street.

DR. WEBSTER'S COMPLETE DICTIONARY of the ENGLISH LANGUAGE. New Edition, Revised and greatly Enlarged, by CHAUNCEY A. GOODRICH, Professor in Yale College. New Edition, much Enlarged and Improved, price, in cloth, 12. 11s. 6d.; or 2l. 2s. bound in calf.

Though the circulation of Dr. Webster's celebrated Dictionary, in its various forms, in the United States, in England, and in every country where the English Language is spoken, may be counted by hundreds of thousands, it is believed that there are many persons to whom the book is yet unknown, and who, if seeking for a Dictionary which should supply all reasonable wants, would be at a loss to select one from the numerous competitors in the field.

In announcing this New Edition, the Proprietors desire to call attention to the features which distinguish it, and to put before those who are in want of such a book the points in which it excels all other Dictionaries, and which render it the best that has as yet been issued for the practical purposes of daily use.

1. ACCURACY OF DEFINITION.

In this department Dr. Webster has always been pre-eminent, as a reference and comparison will show. Thoroughness, clearness and accuracy is aimed at, and vague verbiage avoided.

2. PRONUNCIATION INTELLIGIBLY MARKED.

Each word has its syllabic division; the length of doubtful syllables is marked, and the accent is placed over the syllable requiring the stress to be laid upon it. Letters of doubtful sound, such as c, g, are so distinguished that the reader may know whether they are to be pronounced hard or soft.

3. COMPLETENESS.

In this respect Dr. Webster may claim to be unrivalled. A careful examination has been made during the last ten years of all scientific vocabularies and original works on science, and 9,000 words principally bearing on technical subjects, are added. This portion will be found particularly valuable to readers of a more educated class.

4. ETYMOLOGY.

The Etymology has been adopted after a careful comparison of twenty different languages, and a study of the modern European languages.

5. OBSOLETE WORDS.

Many of the words in use by our greatest writers are now obsolete; but all those that appeared necessary for the understanding of their works have been preserved.

6. UNIFORMITY in the MODE of SPELLING.

Words that, from caprice, or disregard of analogy, have hitherto been spelt differently, are brought to one standard.

7. QUOTATIONS.

Quotations, helping to the understanding of a word, or happily indicating its use, are largely used. This particular distinguishes it from all abridgments.

8. CHEAPNESS.

The Volume, containing 1,624 pages, is sold at 12. 11s. 6d. in cloth, and will be found, on comparison, to be one of the cheapest books ever issued. In this New Edition One Hundred and Seventy Pages have been added, without any addition to the Price.

With the determination that the superiority of the work shall be fully maintained, and that it shall keep pace with the requirements of the age and the universal increase of education, the Proprietors have added to this New Edition, under the editorship of Professor Goodrich,

A TABLE of SYNONYMS.

Giving brief discriminations between many hundreds of words closely allied in meaning. This table will be found very useful for literary purposes, and where complete accuracy in the use of words is desired.

AN APPENDIX of NEW WORDS.

Giving more than Nine Thousand Words collected by the Editor, and including all recent Scientific Terms.

When educated people refer to a Dictionary, it is most frequently for some recent scientific word with which they are unacquainted, and they are generally unsuccessful in finding it: this will not be found to be the case with Webster's.

TABLE of QUOTATIONS, WORDS, PHRASES, &c.

This Table contains brief explanations of Words, Phrases, Proverbs, and Colloquial Expressions, from the Latin and other Languages, current in Modern Literature.

This GENUINE EDITION, the property of the Author's Family, of WEBSTER'S COMPLETE DICTIONARY, is in 4to. 1,624 Pages, with a Portrait of the Author.

PRACTICAL AIDS

TO THE STUDY OF

Natural History, Botany, Geology, Mineralogy and Technology.

Adapted for the Use of Schools and Families.

By Dr. CARL ARENDTS, Professor at the Military School of Munich.

Translated and Edited by G. M. L. STRAUSS, Ph.D.

. This very instructive and interesting Work discourses in a popular manner on the various Forms and Developments of the Earth, Animate and Inanimate.

London: Ward & Lock, 158, Fleet-street.

This day, Illustrated with 500 Descriptive Engravings, price 3s. 6d. crown 8vo. pp. 450,

THE HOME TUTOR:

A TREASURY of SELF-CULTURE and Complete LIBRARY of USEFUL KNOWLEDGE, by the BEST MASTERS.

London: Ward & Lock, 158, Fleet-street.

On the 1st and 15th of every Month, in fcap. 8vo. paper covers, in the French Style of Binding,

THE SHILLING VOLUME LIBRARY.

The CHANCELLOR of the EXCHEQUER, when proposing the Repeal of the Paper Duty, used as an argument for its removal the superiority, both in paper and print, of French popular Literature over the same class of works produced in England; and he attributed the reason of this difference to the fact that paper was untaxed in France, while it was taxed in England. Happily this distinction no longer exists. On the 1st October paper became free of Taxation. Therefore the

SHILLING VOLUME LIBRARY

is projected with the view of giving to the reading public the full benefit of the abolition of the Paper Duty. Each book in the

SHILLING VOLUME LIBRARY

will present to the buyer the utmost possible value both in quantity and quality.

The greatest care will be taken, so as to render the

SHILLING VOLUME LIBRARY

in all respects unexceptionable reading both for the young as well as for the old.

The following are now ready:—

1. FAMILY CREDIT. By WESTLAND MARSTON.
2. WHICH WINS—LOVE OR MONEY? By the Author of 'WHITEFRIARS.'
3. RECOLLECTIONS of a BELIEVING OFFICER. By E. P. ROWSELL.
4. LADY LISLE. By M. E. BRADDON.
5. The ROUND of WRONG. By EDMOND ABOUT. Translated by LASCELLES WRAXALL.
6. MEMOIRS of a LADY-IN-WAITING.

. Future Volumes, never before published, on the 15th and 1st of every Month.

London: Ward & Lock, 158, Fleet-street.

WORKS BY WATTS PHILLIPS.

On December 10, fcap. 8vo. ornamental boards, price 3s.

AMOS CLARK; or, the Poor Dependent. A Story of Country Life in the Seventeenth Century. By WATTS PHILLIPS, Author of 'The Dead Heart,' &c.

CANARY BIRD: a Story of Town Life in the Seventeenth Century. (Sequel to 'Amos Clark.')

London: Ward & Lock, 158, Fleet-street.

NEW POPULAR WORKS.

In uniform volumes, price 3s. each. Ornamental Covers, printed in clear type and on good paper. Also an Illustrated Edition, on superior paper, cloth gilt, price 3s. 6d.

GUSTAVE AIMARD'S TALES OF INDIAN LIFE AND ADVENTURE.

1. TRAIL HUNTER.
2. PIRATES of the PRAIRIES.
3. TRAPPER'S DAUGHTER.
4. TIGER SLAYER.
5. GOLD-SEEKERS.
6. INDIAN CHIEF.
7. PRAIRIE FLOWER.
8. INDIAN SCOUT.
9. BORDER RIFLES.
10. FREEBOOTERS.
11. THE WHITE SCALP.

The above are now ready, and other Volumes are in active preparation.

NOTICE.—GUSTAVE AIMARD was the adopted son of one of the most powerful Indian tribes, with whom he lived for more than fifteen years, in the heart of the Prairies, sharing their dangers and their combats, and accompanying them everywhere, rifle in one hand and tomahawk in the other. In turn squatter hunter, trapper, warrior and miner, Gustave Aimard has traversed America from the highest peaks of the Cordilleras to the ocean shores, living from hand to mouth, happy for the day, careless of the morrow. Hence it is that Gustave Aimard only describes his own life. The Indians of whom he speaks he has known; the manners he depicts were his own.

London: Ward & Lock, 158, Fleet-street.

CHOICE BOOKS OF THE SEASON.

By his Son, JAMES LORD DUNFERMLINE.

"The life of such a man is well worth studying; and through
the judicious composition of this Memoir it may be studied easily.
The book has the unusual merit of not containing a superfluous
page."—*Saturday Review*, Oct. 19.

In 1 vol. demy 8vo. with Illustrations, price 8s. 6d.

OBSERVATIONS ON CLINICAL SURGERY.

By JAMES SYME,

Professor of Clinical Surgery in the University of Edinburgh.

Now ready, New Edition, 2 vols. fcap. 8vo. 15s.

HORÆ SUBSECIVÆ.

By JOHN BROWN, M.D. F.R.S.E.

"Of all the John Browns, commend us to Dr. John Brown, the
physician, the man of genius, the humourist, the student of men,
women and dogs. By means of two beautiful volumes, he has
given the public a share of his by-hours, and more pleasant hours
it would be difficult to find in any life. Dr. Brown's master-
piece is the story of a dog called 'Rab.' The tale moves from the
most tragic pathos to the most reckless humour, and could not
have been written but by a man of genius. Whether it moves to
laughter or tears, it is perfect in its way, and immortalizes its
author."—*Times*, Oct. 21.

Nearly ready, 1 vol. crown 8vo. with Illustrations,

A SELECTION FROM DASENT'S POPULAR TALES FROM THE NORSE.

Now ready, in 1 vol. 4to. price 6s.

AUNT AILIE and her BELONGINGS.

By CATHERINE D. BELL,
Author of 'Cousin Kate's story.'

Edinburgh: EDMONSTON & DOUGLAS.
London: HAMILTON, ADAMS & Co.

COMPLETION OF THE ENGLISH CYCLOPÆDIA.

CONDUCTED BY

CHARLES KNIGHT.

The ENGLISH CYCLOPÆDIA is published in
FOUR DIVISIONS, each Division being complete in
itself, and sold as a separate work.

THE CYCLOPÆDIA OF GEOGRAPHY.

THE CYCLOPÆDIA OF BIOGRAPHY.

THE CYCLOPÆDIA OF NATURAL HISTORY.

THE CYCLOPÆDIA OF ARTS AND SCIENCES.

Each Division of the English Cyclopædia
is sold as a separate Work.

GEOGRAPHY, 4 Vols. £2 2 0
or 2 Vols. half morocco, 2l. 10s.

BIOGRAPHY, 6 Vols. 3 0 0
or 3 Vols. half morocco, 3l. 12s.

NATURAL HISTORY, 4 Vols. 2 2 0
or 2 Vols. half morocco, 2l. 10s.

ARTS AND SCIENCES, 8 Vols. 4 16 0
or 4 Vols. half morocco, 5l. 12s.

* * For List of Writers, and full details, see Prospectus,
which may be had from the Publishers, or through any
Bookseller.

From the *TIMES*, Oct. 4, 1861.

"As regards the contents of this Cyclopædia, it is, however,
impossible to give any sufficient impression of an aggregate which
includes somewhere or other all the information generally required
upon every conceivable topic. A good Encyclopedia, as every
one knows, is a compendious library, and though students may
require further information upon some points than its summaries
contain, even students will be surprised in this instance to find
the materials at their disposal when they once adopt the habit of
resorting to its pages. For all practical purposes a large propor-
tion of the articles may be said to be exhaustive; they are accu-
rate to a degree which will strike even those who know what pains
have been taken to render them so; and, as they are concise as
well as full, every column being rammed like a sky-rocket, the
owner has a reservoir out of all proportion to the library shelves it
will occupy."

From the *SATURDAY REVIEW*, Sept. 28, 1861.

"Upon the whole, then, we are able to speak very favourably of
this new Cyclopædia. Its great recommendation is not its com-
parative cheapness (though the cost only averages about half-a-
guinea a volume), but its originality, completeness, and general
trustworthiness. We may express a hope that its enterprising
Publisher will have no reason to regret his considerable venture.
He is not likely, we think, to have to complain of want of patron-
age, if it is sufficiently remembered that any one of his four great
Divisions may be purchased separately as a work complete in
itself. Few may be able to afford the whole series; but there are
many who will be glad to procure, for example, a Biographical
Dictionary, while others will require, for their peculiar tastes or
studies, the Geographical Cyclopædia, or those of the Arts and
Sciences, or of Natural History."

BRADBURY & EVANS, 11, Bouverie-street,
Fleet-street, E.C.

ILLUSTRATED WORKS.

In Three Handsome Folio Volumes, price 12s. each.

PICTURES OF

LIFE AND CHARACTER.

DR. EDWARD SMITH on the CYCLICAL CHANGES in the HUMAN SYSTEM.—Health and Disease as influenced by the Daily, Seasonal and other Cyclical Changes in the Human System. Small 8vo. 10s. 6d. "We said at the beginning of our review, that we regarded this as a most remarkable, valuable, and useful work; and we now appear with confidence to the outline we have given of its contents, imperfect and meagre as it is, in confirmation of our judgment." *Dublin Medical Journal.*

V.

LIEBIG'S FAMILIAR LETTERS on CHEMISTRY, in its Application to Physiology, Dietetics, Agriculture, Commerce and Political Economy. Fourth Edition, with Additional Letters. Small 8vo. 7s. 6d.

VI.

LIEBIG'S LETTERS on MODERN AGRICULTURE. Small 8vo. 6s.

"The Author has for years occupied himself with the elucidation of the laws of the nutrition of plants; passes in review, in these Letters, the mass of practical facts thus acquired; and by the light of science endeavours to give them their true import, and to deduce from them fundamental laws of general application in agriculture."—*Editor's Preface.*

VII.

GUESSES AT TRUTH. By Two BROTHERS. Fifth Edition. Small 8vo. 10s. 6d. cloth, red edges.

"Various, however, as are the matters discussed or touched on in the following pages, I would fain hope that one spirit will be felt to breathe through them. It would be a delightful reward, if they may help the young, in this age of the Confusion of Thoughts, to discern some of those principles which infuse strength and order into men's hearts and minds. Above all, I would desire to suggest to my readers, how in all things, small as well as great, profane as well as sacred, it behoves us to keep our eyes fixed on the star which led the Wise Men of old, and by which alone can any wisdom be guided, from whatever part of the intellectual globe, to a place where it will rejoice with exceeding great joy." *J. C. H.—From the Preface.*

HURST & BLACKETT'S NEW WORKS.

The LIFE of J. M. W. TURNER, R.A.

From Original Letters and Papers furnished by his Friends and Fellow Academicians. By WALTER THORNBURY. 2 vols. 8vo. with Portraits, &c. 30s.

"Mr. Thornbury has been engaged, during the last four years, in collecting materials for this biography. He has had every possible advantage for the accomplishment of his task—a personal acquaintance with Turner, the advice of Mr. Ruskin, and the ready assistance of all Turner's friends. Every one to whom Mr. Thornbury applied for information appears to have given it willingly. Of the immense mass of materials thus brought together, Mr. Thornbury has made skillful use, and constructed an honest memorial of the great painter. He has done his part ably. The artist will refer to these volumes frequently for authentic information regarding the great modern master and his works, and the student of life and manners will find in them a rich store of entertainment."—*Daily News.*

The LIFE of Admiral Sir CHARLES

NAPIER, K.C.B.; with HIS CORRESPONDENCE. From his Private Papers. By Major-General ELLERS NAPIER. 2 vols. 8vo. with Portraits and Charts. 30s.

"Sir Charles Napier will undoubtedly rank among the first of our sea worthies. He has found a worthy biographer and chronicler in the person of his Step-son. The biography abounds in traits of character, and there are details of love, marriage and home-life which contrast very pleasantly with the more exciting scenes. The work is very honestly put together; without pretence, it accomplishes much; bringing all the incidents of the Admiral's life together, so as to create a story of great interest, with much that is amusing for the general, and more that is instructive to the professional reader."—*Athenæum.*

FRENCH WOMEN of LETTERS.

By JULIA KAVANAUGH, Author of 'NATHALIE,' &c. 2 vols. 21s.

TRAVELS in the HOLY LAND.

By FREDRIKA BREMER. Translated by MARY HOWITT. 2 vols. [Next week.]

The OKAVANGO RIVER. A Nar-

ative of Travel, Exploration and Adventure. By CHARLES JOHNSON. Author of 'LAKE NGAMI,' &c. 8vo. with Portrait of the Author and numerous Illustrations. 21s.

"Mr. Anderson's book, from the number of well-told adventures, its rich fund of information, and spirited illustrations, will command a wide circle of readers. The interest of his story never flags for a moment."—*Athenæum.*

LADY CHARLOTTE PEPYS' DO-

MESTIC SKETCHES in RUSSIA. 2 vols. 21s.

"We recommend these interesting and agreeable volumes to all who wish for pleasant reading, besides acquiring a knowledge of the ways and customs of another country."—*Sun.*

TRAVELS in the REGIONS of the

AMOO, and the Russian Acquisitions on the Confines of India and China. By T. W. ATKINSON, F.R.G.S. F.G.S., Author of 'Oriental and Western Siberia.' Dedicated, by permission, to Her Majesty. Second Edition. With Map and 83 Illustrations. 2l. 2s. bound.

THE SECRET HISTORY of the

COURT of FRANCE under LOUIS XV. Edited, from rare and unpublished Documents, by Dr. CHALLICE. 2 vols. with Portraits. 21s.

THE VALLEY of a HUNDRED

FIRES. By the Author of 'MARGARET and her BRIDESMAIDS.' Illustrated by J. E. MILLAIS, A.R.A. 5s. bound. Forming the New Volume of HURST & BLACKETT'S STANDARD LIBRARY of CHEAP EDITIONS.

"Whether in delineation of character, in lucidity of plot, in description of scenery, in representation of life as it is, or in sound well-enforced moral, we know no novel of the last three or four years to equal this production of the popular Author of 'Margaret and her Bridesmaids.' If asked to classify it, we should give it a place between 'John Halifax' and 'The Cartons.'"—*Herald.*

THE NEW NOVELS.

The LAST of the MORTIMERS.

By the Author of 'MARGARET MAITLAND,' 'THE HOUSE on the MOOR,' 'ADAM GRAEME,' &c. 3 vols.

"The reader of these volumes will find enough to rivet his attention and to awaken his liveliest sympathy. His feelings will be deeply stirred by the natural pathos and tenderness of the narrative, the interest of which grows more and more intense as it nears its dénouement. We have nowhere met with language more natural and touching than that employed in these volumes to express the various feelings of the narrators. There is immense power exhibited in the delineation of Sarah Mortimer, and we do not remember a more truly humorous conjunction of characters than that of Lizzie, the rough Scotch maid, and Domenico, the fat, polite, good-tempered Italian."—*Daily News.*

WHITE and BLACK. A Tale of

the SOUTHERN STATES. 3 vols.

SIR RICHARD HAMILTON.

"The reader will be delighted with this book, and will be the better for reading it. It is full of action, life and character. The plot is well constructed, and the style vigorous. The hero is a faithful portrait of a thorough English gentleman, and the pictures of English society are very agreeably drawn."—*John Bull.*

The HOME at ROSEFIELD.

By EDWARD COPPING. 3 vols.

"A very touching and life-like story, of great simplicity and beauty, and, indeed, almost the only one unaffected by its genuine tenderness and pathos."—*Daily News.*

The CASTLEFORD CASE.

By FRANCES BROWNE, Author of 'MY SHARE OF THE WORLD,' &c. 3 vols. [Just ready.]

NEW WORKS AND ANNOUNCEMENTS FOR DECEMBER.

In Two Volumes, price 21s.

RIDDLES IN RHYME

A BOOK OF ENIGMAS, CHARADES AND CONUNDRUMS.

Selected from those contributed during the last thirty years to Fulcher's 'Ladies' Poetical Miscellany.'

Edited by EDMUND SYER FULCHER.

London: JAMES HOGG & SONS.

LONDON, SATURDAY, NOVEMBER 30, 1861.

LITERATURE

French Women of Letters: Biographical Sketches.
By Julia Kavanagh. 2 vols. (Hurst & Blackett.)

WHETHER Miss Kavanagh has not in some measure limited the interest of her agreeable book, which may be accepted as a sequel to her 'Woman in France,' by confining herself to novelists, may be questioned.—She is discreet, however, in only dealing with those who have passed away, though the interest of these volumes might have been increased had their retrospect come nearer to our own times,—so as (for instance) to include the Gays—mother and daughter,—and that less famous, but still remarkable writer, Madame d'Arboville. These women of talent, however, are possibly reserved for a future day; meanwhile what is given affords, it may be repeated, agreeable reading.

Miss Kavanagh's list is opened by Mdlle. de Gournay, Montaigne's adopted daughter, with a sketch of her 'Alinda and Leontine,' "the first genuine novel written in French by a woman," and a glance at the Hôtel de Rambouillet. This is accompanied by a study of Mdlle. de Scudéri. For the sayings and doings of the intellectual exquisites who assembled in that Palace of Conceit a defence is stoutly made out against the ridicule which they were sure to excite, and *did*.—Miss Kavanagh points out how the affectation, the super-delicacy, the prudish refinement of language, the high-flown daintiness of sentiment, to exchange which formed the main business of life among a society of clever ladies and gentlemen,—were not merely wholesome, at the period of their existence, but inevitable, as a protest on behalf of good manners and high morals.—A like argument, it may be recollected, has been ingeniously used in apology for the dandyism of our English Regency. A Brummell with his "one pea" had been held as merely an extreme consequence of a state of society in which such brutes as *Squire Western* were too common. Allowing—not the pea, but the plea—all its weight, and avoiding all deduction from the success of such an important item as the amount of miserable imitation bred by this coterie-work, the laughs and the satirists had still the best of it.—The speeches of *Madelon* and *Cathos* in 'Les Précieuses' have passed into the world's stock of good things, while the 'Grand Cyrus' of Mdlle. de Scudéri and her 'Clélie' have gone down "full fathom five" to the depths from which they will never again emerge.—Miss Kavanagh is probably the only living Englishwoman who has waded through them. This, however, she seems to have courageously accomplished, and with a fair amount of pleasure to herself. The analysis she offers is well executed, and reasoned out with a womanly steadiness and clear-sightedness which give us a higher opinion of her power than we had derived from her former works. On one point, however, we are at issue with her. We do not admit that the reputation of a novel must of necessity be ephemeral;—neither wholly depend on the fashions of the time. Leaving on one side such a tale as 'Don Quixote' or 'Gil Blas,'—what has become of those novelists as John Bunyan and Daniel Defoe? They have a place in every house of ours, even as Shakespeare has, though far lower than the dramatist's. Then there are people who still read the novels of Richardson, and there will be so long as England has readers. The flight of *Clarissa*, the insanity of *Clementina*, are "of all time."—'Udolpho' (to come on Miss

Kavanagh's own ground) is not dead; though Mrs. Bennet's 'Beggar Girl,' admired by Coleridge, possibly is. But the strongest example which could be cited is Miss Austen, whose novels on their appearance produced no effect, the world being for the moment in chase of romance, or else of national humours,—carried away by the Porters, Edgeworths, Morgans—who deified Poles and other patriot heroes, or else drew attention, with womanly prescience and tenderness, to neglected places and to neglected races. She was retired in her gentle life, not therefore obscure, and while living enjoyed no celebrity. Her novels are made up of common-place incidents and common-place people. Nevertheless, they have passed into the small library of English fiction, containing the tales which may endure so long as men and women read "story-books."

From Mdlle. de Scudéri, thus rescued, in some measure, from the hearsay ridicule too indiscriminately attached to her name, we pass by Madame de Sévigné's friend, the charming Madame La Fayette, whose 'Princess of Cleves' has yet readers;—by the unscrupulous and corrupt Madame de Tencin, and from these ladies to Madame Riccoboni, who may be described as marking the transition from what may be called the chivalric period of Fiction to that in which the beatings of the human heart were thought worthy of being watched,—though the heart belonged to a personage less august than a victorious commander or an ermined countess. Madame Riccoboni, however, only bettered the instruction of her predecessors in one respect. Whereas Mdlle. de Scudéri had paraded the courteous knights and the exquisitely-refined dames of the Hôtel de Rambouillet in her interminable procession-novels,—Madame Riccoboni told her own story in her first fiction—'The Letters of Mistress Fanni Buttlerd!'—(its title reminding us of the perverse resolution on the part of our neighbours to spell English as some of them "spike" it).—It may have been this descent to what is more intimately familiar with us than the adventures of *Alexanders* and *Mandanes* which gave Madame Riccoboni's novels for a while so wide a vogue in this country. When the Walpoles and Selwyns were solacing their essentially coarse tastes by the novels of the younger Crébillon, the Thrales and the Montagues talked of Riccoboni; and when 'Evelina' surprised the Streatham coterie, as a new manifestation of female genius, Miss Burney's place was adjusted by comparison with the popular French authoress, to whom, and justly, she was found superior. 'Evelina' and 'Cecilia' are not yet dead, though possibly it might be hard to find a copy of either in the railway libraries of to-day; but what lover of novels belonging to this generation has read a line of 'The Marquis of Cressy'?

Next in Miss Kavanagh's list figures that strange, versatile, active woman, Madame de Genlis. Few things have been more remarkable than the manner in which one who had played so conspicuous a part as hers, outlived her fame, and seemed to slide out of public recollection during her lifetime. Whereas, to the last, a woman like Madame Récamier, with little to sustain her social reputation save her remains of great beauty, elegance of manners, her friendship with Chateaubriand, and the tradition of her impenetrability to lovers, could attract the attention of Europe, so that it was a distinction and a seal to be admitted to her fireside,—the lively old authoress of 'Tales of the Castle,' and half-a-hundred more stories,—the Governess who lived to hail on the throne the Prince whom she had educated,—was as

much forgotten as if herself, and her harp, and her tales, and her pupils, and the charming nose—the charm of which, when she was an aged woman, she disfigured by tumbling over a trunk—had never existed,—had never been set down, one and all, with as much vivacity as vanity, in her Memoirs.—When Madame de Genlis was met, for the last time, in the Memoirs of Amelia Opie,—during her visit to *Friend Lafayette* in Paris,—the encounter amounted to something like a case of resurrection: so entirely had she passed out of sight, out of mind. Madame Gay had already given up her throne to her daughter, Delphine de Girardin,—Madame Dudevant was beginning to be heard of in the midst of the convulsionary school of writers brought together by the heavings of the '30 Revolution. A score of clever men had come and gone—among them that most "gifted of men in woman's disguise" (as Talleyrand called Necker's daughter),—yet the authoress of 'The Palace of Truth' was extant in Paris, had still not thrown away her pen.—There is something in such longevity, outliving renown, mournful to study, especially if the subject be a woman. The once favourite actress, who has thirty years to wear out, after she has vanished (reluctantly) from the gaze of those who are beginning to weary of her wane, has always struck us to be one of the saddest figures presented by the world of society. But little less rueful is the old wit and beauty, writing on, writing to the last, when there is no longer a circle of admirers, new or old, to listen to her anecdotes and to applaud her sallies, or to read that which her pen mechanically pours out on the paper.—We cannot help feeling as if the world has not been just to Madame de Genlis.

It was in the year 1844 that an ingenious and minute article (unless we are mistaken, by M. Sainte-Beuve), in the *Revue des Deux Mondes*, may be said to have disinterred another authoress, less recollected than she deserved to be—Madame de Charrière,—another of those Frenchwomen whose lives may be said to have been sacrificed to man's selfishness. She was one of the many who had cause to mark with a black stone the day when she met, at the house of the Neckers, with Benjamin Constant:—

"Like all sensitive men who have lost their mothers in youth—his died at birth—he seemed impelled to seek in woman the friendship and tenderness home deprived of its great charm could no longer yield. In Madame de Charrière he found friendship tender and indulgent; a charming mind, just sceptical enough to suit his, and that seduction which the remains of beauty give to a woman at every age. For a time she was all-powerful. Then he married a German, Wilhelmina, whom he soon divorced; then came the reign of Madame de Staël, fervent and stormy; then a second marriage, of which we know little, and, last of all, when Benjamin Constant was fifty, when he seemed to have exhausted every passion, even gambling, and every political opinion—for he had passed through all—the mystic, penitent Madame de Krüdener helped to soothe the passionate sorrow caused by the inexorable beauty of Madame Récamier. That Madame de Charrière was his first genuine friend, the first who exercised real influence over him, is certain. Her years did not allow the feeling that bound them to go beyond friendship; but it had much of the exclusiveness of love, and some of its jealousy, too. * * Happiness was not likely to be the lot of one so perverse. After a dissipated life in Paris, he went off to England with a few guineas in his pocket; thence he wrote half-polite, half-ironical letters to Madame de Charrière. On his return to Lausanne he was rather sharply received by his family, and took refuge at Madame de Charrière's country home, Colombier. Two

pleasant months he spent there; but the friends were too much alike to be long happy. They began by exchanging notes from their apartments in Colombier, by writing weekly after their first separation, then a bitter and insolent letter of Benjamin's broke their correspondence for a while. It was resumed, but never with the old warmth. Benjamin Constant's passion for Madame de Staël pained and annoyed Madame de Charrière, who called her the talking machine. Her letters to Benjamin Constant became scarce, and she complained that he left them unanswered, and lost the MSS. she sent him. He complained in his turn that her letters were all filled up with the *errata* in her works; and he is said to have spoken of her slightly. And thus ended, in something worse than the silence in which so many friendships lie buried, a feeling which promised to be life-long, and which, with a little more faith on either side, might surely have lasted a life-time. But it was to Madame de Charrière that Benjamin Constant wrote, 'I like poetry in no language.' Would he have dared to write this to Madame de Staël? It was to her, even at Colombier, at the dawn of their friendship, in one of the familiar and affectionate notes sent from his room to hers, that he exclaimed, talking of mankind, 'Poor little insects!—what is happiness or dignity?' * * * Madame de Charrière was attached to her young friend, forgave him constantly, and loved him to the last. He admired and appreciated her, and for years felt and expressed a friendship that was tender for him. But, alas! there were no illusions on either side, and even friendship cannot do without illusions. What Madame de Charrière thought of Constant we do not well know; she is generally thought to be the original of the following portrait taken from his bitter novel of 'Adolphe':—'At the age of seventeen, I witnessed the death of an elderly lady, whose remarkable and eccentric mind had helped to develop mine. Like many, she had, in the beginning of her career, stepped into life with the consciousness of a strong mind and of great intellectual powers; like many, too—and for having refused to bend to factitious but necessary conventionalities—she had seen her hopes destroyed, and her youth spent without pleasure. Old age had reached her at last, but had not subdued her. She resided in a château near our property. She led a dissatisfied and retired life. Her mind was her last resource; and she used it to analyze everything. For a year we contemplated life, under every aspect, in our endless conversations, and death as the only end of all; and after having so long talked of death with her, I saw death strike her before me.' There is more tenderness in Benjamin Constant's letter of farewell to Madame de Charrière, one of the last she received from him, and which he wrote on the eve of the journey to France which gave him a political career and a new country. 'Farewell! you who have made lovely eight years of my life; you whom, spite a sad experience, I cannot imagine either constrained or false; you whom I appreciate better than any will ever appreciate you! Farewell!'

We will allow (for argument's sake) that Miss Kavanagh has coloured highly the character of the stronger party in this unequal bargain. But, after such allowance has been made, it is impossible to avoid recognizing the cruel inequality of the lot, in all such cases of capricious affection and chilled intercourse and broken friendship, which meant something more than friendship in its outset, and which at its close ended in something less. The man could, to the last, make new ties, embrace new enthusiasms, accept new sensations,—Madame Récamier could dangle him on her hook, after Madame de Staël was no more,—he could go through the semi-mystical, semi-political performances of Madame de Krüdener's fanaticism with a great show of unction, finding in them something to pique his jaded appetite,—he could always stand before the world as a being somehow misplaced, if not spited, by Fortune, who had somehow failed to fulfil expectation.

—The man's is a notoriously fascinating character; provided the grievance be worked adroitly, and the melancholy be intimated, not obtruded, to importunity. But the woman could only gather herself up—in silence, in disappointment partially expressed, when she was too old to make new heart-ventures—to die. There have been as many variations of the Swift and the Stella story as there are versions of every old tune. This is one among them.

After Madame de Charrière—with her 'Neufchâtel Letters'—comes Madame de Krüdener; whose 'Valérie' some few may have read, but whose literary reputation is entirely effaced by the European attention drawn to the saintly quackery of one who, when self-installed on the tripod, managed to bring thither, as a listener to her oracles, no auditor less distinguished, conscientious and credulous than the Czar of all the Russias. By her prophecies may Madame de Krüdener be recollected—not by her books. She managed admirably in choosing her time and place for taking leave of adventure, and for exchanging robe of festival for robe of mortification. She chose, with a true feminine acuteness, her principal patient. The Czar was fond of toying with spiritual excitement or quietism, as might be. When William Allen, the benevolent Quaker, returned from a visit to Russia, on a philanthropic errand, he said, speaking of Alexander the Emperor, 'He is one of us'!—M. Tourguenev has told us how strong is the element of fanaticism in the Muscovite character—that Russia has her own sects, her own saints,—has had her own martyrs, without dream of self-illustration, whose names are utterly unknown. All this Madame de Krüdener—an Esthonian by birth—seems to have divined, and to have arranged her altar in Paris,—with that shrewdness of decision which is not incompatible with distemper of brain or of morals. She vanished, however, as an authoress, before she set a-going those meetings for prayer and prophecy, at which Madame Récamier was requested by the ticket-taker to suppress some of her beauty, and at which the inconstant Constant excited so much remark by his devout genuflections.

Lastly in Miss Kavanagh's gallery comes Madame de Staël. That most remarkable of women who have written poetical prose, is a subject beyond the grasp of the gentler English authoress. Cleopatra's self had not moreameleon colours than Madame de Staël. With so much power, and so much weakness, with such an intuitive grasp on great questions, and such a fearlessness in confronting strange opinion, whether popular or unpopular,—with her Swiss blood, as Rousseau's countrywoman must have—the training of her Calvinistic mother, contradicted by the passion of temperament, poetical and personal, which breathes in every line of 'Corinne,'—with the intense appetite for social distinction bred in the French minister's daughter, who, in her child's chair, kept a little *salon* at Paris,—with the later notable persecutions of her life, during which she could say to herself 'I and Napoleon'! or, 'Napoleon against me'!—with her triumphant pilgrimages into Germany, and her lionism in England,—with her luckless investments of heart in such marriages as her second, after a former one,—with all these incidents and characteristics (to sum up) Madame de Staël is no easy subject to handle;—and Miss Kavanagh's chapters on her life and works make the weakest part of these two volumes.

Nevertheless, the book has engaged us. Why should not its writer, who analyzes fiction with so fine a touch, speak of her own sister

novelists? Clara Reeve,—the Lees of Bath, one of whom suggested an invention to Byron,—Hannah More, Mrs. Garrick's 'Chaplain,' tiresome on one hand in 'Coelebs,' on the other hand, wise in her practical attempts to benefit the poor,—Mrs. Bennet,—Charlotte Smith (underrated as regards imagination),—Mary Wollstonecraft,—still wait their characters; not to count up such more famous female novelists as the Porters, Opie, Edgeworth, Morgan, Austen. The taste and feeling shown by Miss Kavanagh in this book account for the above recommendation.

The Four Georges: Sketches of Manners, Morals, Court, and Town Life. By W. M. Thackeray. (Smith, Elder & Co.)

To such readers as the respectable Mrs. Clapham Rise, whose life has perhaps been innocent of plays, novels and naughty memoirs; or as the pious Miss Hackney Wick, whose personal profligacy may have been limited to sitting under a pet preacher with dark eyes and clouded reputation—the 'Four Georges' should prove a most delicious work. The book contains among its galleries of brilliant portraits, among its treasures of anecdote and humour, a good many things that such women always want to know, without daring to seek for them in the improper quarter, and that women of liberal culture are supposed to know through the processes of a more general education. It is full of the wickedness of the great world. Its pages flutter with the satins of fine ladies and the feathers of fine gentlemen. There is in them a riot of laughter, dancing, love-making, gaming, swearing and forswearing; a pulse of music, a whisper of flirtation, an odour of *boudoirs*, a sinner of scandal, a savour of banquets; all the noise, reek, roll and devilry of that court and society of the Brunswick line, which succeeded to the more picturesque, but not more wicked, court and society of the Stuarts—of which we are promised by His Grace of Manchester the Story from Elizabeth to Anne. Will not the respectable British maid and matron—timidly anxious, it may be, about the lives of celebrated sinners—like to get a peep behind the scenes of this comedy in the castle and the palace?

Some portion of our respectable middle classes—the portion which in jest and farce is supposed to reside in the pleasant old dwellings about Hackney and on the sunny slopes of Clapham, and which in jest and farce considers the whole duty of man to consist in keeping with strictness the Ten Commandments and paying their rent punctually on quarter-day—are a little dainty, perhaps a little hypocritical, in their notions of what is proper for the females of their families to read. For fear of offence, good fathers deny their daughters much that is wholesome for the intellect and strengthening for the character. As a rule, the fathers of families exclude plays, romances, poetry (except Cowper and Mrs. Hannah More, and in some cases, liberal cases, Milton), and for the most part histories and memoirs—unless expurgated and reduced to the due level of Family Reading. To such people Shakespeare is profane, Fielding dissolute. Macaulay, who had sprung from them, said, 'the Bible itself is not good enough for them.' We are not quarrelling with the fact—we are not laughing at it—we are only stating it. The objection of this portion of our middle classes to polite literature, and especially to its influence on the female mind, is of old account, and is not likely to disappear in our day. It is as old as the Puritans and as staunch as the Ironsides. It may be lived down, but it will

never be reasoned down, still less laughed down, though all the jesters who take wit to market should turn their merry faces on it. Time only will convince these people that women who are better educated than their own make, in spite of their familiarity with works of fancy and with the history of mankind, as good mothers and as pure wives as the Dorcas and Marthas who have never wept over Ophelia, and never heard of Molly Lepell. In the mean time, let us note the living facts. Some people refuse to read memoirs and novels, some people refuse to see plays. They made the fortune of 'Mont Blanc.' We predict they will take up a large edition of 'The Four Georges.'

It will suit them thoroughly and will do them good. Though it is full of the beauty and frailty of famous women, and the weakness and debauchery of famous men, the tone of it is highly decorous, and the morals of the vice exhibited are put in at the due places, and are seasoned with exquisite shreds of humour. Yet, in spite of its good intentions and its cleanly execution, the book has the charm of being perpetually and extremely wicked; wicked as one of Latimer's sermons, or as a favourite chapter in Taylor's 'Holy Living.' To the staid British female whose reading has been narrow and selected, it will present many attractions. A little wickedness is very alluring when we have it in good company and served up by an eminent pen. The author of this book is known to be a man of mature years, a good husband and father, an excellent companion, a worthy patriot; and the discourse which he now addresses to all the world, through Messrs. Smith & Elder, he had previously rehearsed before audiences of intellect and rank in many parts of England and America. Here, then, there can be no harm. Women who from delicacy or from timidity might shrink from Hervey or Walpole, and who would tremble at the thought of Fielding or Defoe, may safely take into their hands a record of good and evil to which duchesses have listened with a languid approval. Profligacy is modified by time and place. We may hear things at church, for example, which would not be borne in the House of Commons or from the Judicial bench. Allusions are coarse according to those who make them. In some people's opinion, the pulpit can never be stained, the theatre can never be purified. This notion is another of our middle-class hypocrisies and make-believes, the root of which lies deep in the very heart of our society. The blush is often for the manner rather than for the matter. But the Lecturer on the Four Georges has been delicate in his words, as there was very great need for him to be. He knows that the references to wicked things which are often enough found tolerable in a sermon, would be frightful in a book. He has not the recognized right, as a mere painter of manners, to allude to breaches of the Seventh Commandment with such plainness of speech as his neighbour, the gentleman in the black coat, and he wisely remembers that he writes among wiser, but not more curious, people, for those who think "the Bible not good enough for them."

Mr. Thackeray opens his discourse with happy art. "Very few years since, I knew familiarly a lady who had been asked in marriage by Horace Walpole, who had been patted on the head by George the First." These two lives, as he tells us, cover the period of his tale. The lady mentioned was of course Miss Berry, who passed from among us only the other day. She had been a beauty in her youth, and had inspired the gouty old beau with a whimsy which he thought a passion. She had rejected his

suit and the suits of other gay gentlemen, and died in her virgin state—a personage who had known the world and its ways longer than Samuel Rogers, and had kept her wit bright and her reputation untouched through all. We are glad to meet her shade, thus affectionately introduced as a link between the old world of wits and beaux and our own more sober times. Horace Walpole and Miss Berry—lover and mistress—lived through all that wicked, whirling, valiant, reprobate, inventing and exhausting Georgian era—gone, most happily, with its blunders and successes, its prejudices and its virtues, never to return on earth. If Mr. Thackeray has painted it truthfully, who would like to look on it again?—

"As one views Europe, through contemporary books of travel in the early part of the last century, the landscape is awful—wretched wastes, beggarly and plundered; half-burned cottages and trembling peasants gathering piteous harvests; gangs of such tramping along with bayonets behind them, and corporals with canes and cats-of-nine-tails to flog them to barracks. By these passes my lord's gilt carriage floundering through the ruts, as he swears at the postillions, and toils on to the Residenz. Hard by, but away from the noise and brawling of the citizens and buyers, is Wilhelmstul or Ludwigruhe, or Monbijou, or Versailles—it scarcely matters which,—near to the city, shut out by woods from the beggared country, the enormous, hideous, gilded, monstrous marble palace, where the prince is, and the Court, and the trim gardens, and huge fountains, and the forest where the ragged peasants are beating the game in (it is death to them to touch a feather); and the jolly hunt sweeps by with its uniform of crimson and gold; and the prince gallops ahead puffing his royal horn; and his lords and mistresses ride after him; and the stag is pulled down; and the grand huntsman gives the knife in the midst of a chorus of bugles; and 'tis time the Court go home to dinner; and our noble traveller, it may be the Baron of Pöllnitz, or the Count de Königsmarck, or the excellent Chevalier de Seingalt, sees the procession gleaming through the trim avenues of the wood, and hastens to the inn, and sends his noble name to the marshal of the Court. Then our nobleman arrays himself in green and gold, or pink and silver, in the richest Paris mode, and is introduced by the chamberlain, and makes his bow to the jolly prince, and the gracious princess; and is presented to the chief lords and ladies, and then comes supper and a bank at Faro, where he loses or wins a thousand pieces by daylight. If it is a German court, you may add not a little drunkenness to this picture of high life; but German, or French, or Spanish, if you can see out of your palace-windows beyond the trim-cut forest vistas, misery is lying outside; hunger is stalking about the bare villages, listlessly following precarious husbandry; ploughing stony fields with starved cattle; or fearfully taking in scanty harvests. Augustus is fat and jolly on his throne; he can knock down an ox, and eat one almost; his mistress Aurora von Königsmarck is the loveliest, the wittiest creature; his diamonds are the biggest and most brilliant in the world, and his feasts as splendid as those of Versailles. As for Louis the Great, he is more than mortal. Lift up your glances respectfully, and mark him eyeing Madame de Fontanges or Madame de Montespan from under his sublime periwig, as he passes through the great gallery where Villars and Vendôme, and Berwick, and Boissuet, and Massillon are waiting. Can court be more splendid; nobles and knights more gallant and superb; ladies more lovely? A grander monarch, or a more miserable starved wretch than the peasant his subject, you cannot look on. Let us bear both these types in mind, if we wish to estimate the old society properly. Remember the glory and the chivalry? Yes! Remember the grace and beauty, the splendour and lofty politeness; the gallant courtesy of Fontenoy, where the French line bids the gentlemen of the English guard to fire first; the noble constancy of the old king and Villars his general, who fits out the last army with the last crown-piece from the treasury, and goes to

meet the enemy and die or conquer for France at Denain. But round all that royal splendour lies a nation enslaved and ruined; there are people robbed of their rights—communities laid waste—faith, justice, commerce trampled upon, and well-nigh destroyed—nay, in the very centre of royalty itself, what horrible stains and meanness, crime and shame! It is but to a silly harlot that some of the noblest gentlemen and some of the proudest women in the world are bowing down; it is the price of a miserable province that the king ties in diamonds round his mistress's white neck."

This for the general; but the particular, according to our humourist, was not a whit more noble. English society in the times when Farmer George ruled at Windsor is painted in passages which the representative ladies of Clapham and Hackney will perhaps devour with eager interest. This is in Mr. Thackeray's manner:—

"Lord Carlisle was one of the English fine gentlemen who was well-nigh ruined by the awful debauchery and extravagance which prevailed in the great English society of those days. Its dissoluteness was awful: it had swarmed over Europe after the Peace; it had danced, and raced, and gambled in all the courts. It had made its bow at Versailles; it had run its horses on the plain of Sablons, near Paris, and created the Anglo-mania there; it had exported vast quantities of pictures and marbles from Rome and Florence; it had ruined itself by building great galleries and palaces for the reception of the statues and pictures; it had brought over singing-women and dancing-women from all the operas of Europe, on whom my lords lavished their thousands, whilst they left their honest wives and honest children languishing in the lonely, deserted splendours of the castle and park at home. Besides the great London society of those days, there was another unacknowledged world, extravagant beyond measure, tearing about in the pursuit of pleasure; dancing, gambling, drinking, singing; meeting the real society in the public places (at Ranelagh, Vauxhalls, and Riddottos, about which our old novelists talk so constantly), and outvying the real leaders of fashion in luxury, and splendour, and beauty. For instance, when the famous Miss Gunning visited Paris as Lady Coventry, where she expected that her beauty would meet with the applause which had followed her and her sister through England, it appears she was put to flight by an English lady still more lovely in the eyes of the Parisians. A certain Mrs. Pitt took a box at the opera opposite the countess; and was so much handsomer than her ladyship, that the parterre cried out that this was the real English angel, whereupon Lady Coventry quitted Paris in a huff. The poor thing died presently of consumption, accelerated, it was said, by the red and white paint with which she plastered those luckless charms of hers. (We must represent to ourselves all fashionable female Europe, at that time, as plastered with white, and ruddled with red.) She left two daughters behind her, whom George Selwyn loved (he was curiously fond of little children), and who are described very drolly and pathetically in these letters, in their little nursery, where passionate little Lady Fanny, if she had not good cards, flung hers into Lady Mary's face; and where they sate conspiring how they should receive a new mother-in-law whom their papa presently brought home. They got on very well with their mother-in-law, who was very kind to them; and they grew up, and they were married, and they were both divorced afterwards—poor little souls! Poor painted mother, poor society, ghastly in its pleasures, its loves, its revelries!"

In Mr. Thackeray's manner, but not in his best manner. If the dry, sardonic humourist loves to paint the rag and waste of beauty, the littleness of fine gentlemen, and to laugh over many things which a healthy, if an artificial, convention has agreed to screen, he loves with a yet warmer heart to select and praise the homelier and manlier virtues, and his passages of deepest power and brightest charm are those in which he treats of genuine heroism, of honest

affections, of the love that is always true, of the friendship that is always strong. There are few things in our language finer in style, none nobler in feeling, than the paragraphs in which he compares George the Fourth with the real gentlemen of his time. Few, we think, will read these few extracted lines on Cuthbert Collingwood without beating hearts:—

"Beyond dazzle of success and blaze of genius, I fancy shining a hundred and a hundred times higher, the sublime purity of Collingwood's gentle glory. His heroism stirs British hearts when we recall it. His love, and goodness, and piety make one thrill with happy emotion. As one reads of him and his great comrade going into the victory with which their names are immortally connected, how the old English word comes up, and that old English feeling of what I should like to call Christian honour! What gentlemen they were, what great hearts they had! 'We can, my dear Coll,' writes Nelson to him, 'have no little jealousies; we have only one great object in view,—that of meeting the enemy, and getting a glorious peace for our country.' At Trafalgar, when the Royal Sovereign was pressing alone into the midst of the combined fleets, Lord Nelson said to Capt. Blackwood: 'See how that noble fellow, Collingwood, takes his ship into action! How I envy him!' The very same throb and impulse of heroic generosity was beating in Collingwood's honest bosom. As he led into the fight, he said: 'What would Nelson give to be here!' After the action of the 1st of June, he writes:—'We cruised for a few days, like disappointed people looking for what they could not find, until the morning of *little Sarah's birthday*, between eight and nine o'clock, when the French fleet, of twenty-five sail of the line, was discovered to windward. We chased them, and they bore down within about five miles of us. The night was spent in watching and preparation for the succeeding day; and many a blessing did I send forth to my Sarah, lest I should never bless her more. At dawn, we made our approach on the enemy, then drew up, dressed our ranks, and it was about eight when the admiral made the signal for each ship to engage her opponent, and bring her to close action; and then down we went under a crowd of sail, and in a manner that would have animated the coldest heart, and struck terror into the most intrepid enemy. The ship we were to engage was two ahead of the French admiral, so we had to go through his fire and that of two ships next to him, and received all their broadsides two or three times, before we fired a gun. It was then near ten o'clock. I observed to the admiral, that about that time our wives were going to church, but that I thought the peal we should ring about the Frenchmen's ears would outdo their parish bells.' There are no words to tell what the heart feels in reading the simple phrases of such a hero. Here is victory and courage, but love sublimer and superior. Here is a Christian soldier spending the night before battle in watching and preparing for the succeeding day, thinking of his dearest home, and sending many blessings forth to his Sarah, 'lest he should never bless her more.' Who would not say Amen to his supplication? It was a benediction to his country—the prayer of that intrepid loving heart."

There is in this book a good deal that we do not indorse—views of history, characters of men, which are not ours. We cannot accept the portraits of Pope and Swift. We utterly reject the etching made of Marlborough. We should shade the character of George the Third in quite another way. We could even find in our hearts to say some kindly words for his debauched and erring son. We have, therefore, praised 'The Four Georges,' not because it expresses in any great degree our own sentiments or advocates with any precision our own views; but because, in itself, taken on its own ground, it is an airy, humorous and brilliant picture of English life and manners, produced by honest reading out of many books, and

lighted with the glow of individual sympathy and intellect.

Tom Brown at Oxford. By the Author of 'Tom Brown's School-Days.' 3 vols. (Macmillan & Co.)

It was an unfortunate day for Mr. Hughes when the success of 'Tom Brown's School-Days' induced him to enter the lists as a novelist. The popularity of that capital story for schoolboys was due to causes distinct from the purely literary capabilities of the writer. Though it possessed none of the highest qualities of fiction, 'Tom Brown's School-Days' was a vivid picture of the brighter side of a school-boy's life under Dr. Arnold. A fresh, hearty, honest tone pervaded its pages; and fathers who bought the book for their children, and turned over its leaves before giving it to the young people, were charmed with the sunny reminiscences it presented them of long-forgotten interests in days, about which men always love to romance as they advance in years. The tale gave a pleasant filipp to the memory of Paterfamilias, and the praise he awarded it over the dinner-table was the language of gratitude, not tempered by discretion. The 'School-Days' had also points that strongly recommended it to the ordinary run of ladies, inasmuch as it praised Dr. Arnold, and displayed in an agreeable light those public schools, to which their curly-pated urchins are consigned on emancipation from the nursery. Boys, of course, approved it, in consideration of the countenance it gave to manly sports, spiced with just a little playground ruffianism. Again, in appealing to the school-pride of Rugby men, powerful beyond other public schools amongst professional writers, it secured a strong hold on those who were, in due course, required to speak critically on its merits. No one, however, grudged the book its success; for it possessed so much sterling merit, that had its author been content with his one rich harvest of honour, he might, as "single-work Hughes," have sustained to the last the enthusiasm of admirers eloquent about the great things he could do as he would. It is solely to himself, and in no degree to the proverbial fickleness of mankind, that his fall in public estimation is due. 'Tom Brown at Oxford' is no mere negative failure. A worse novel, written by a gentleman of education and ability, we do not remember to have ever perused. We have read it through—as far as it is possible to read so uninteresting a novel through,—and we have not been sufficiently fortunate to light on any single passage that atones for its prevailing dullness. Nor is inability to amuse by any means the gravest charge that can be preferred against it. The sketches of University life are unreal and offensive, repulsive to delicacy, and extremely unjust to those resident Fellows who have for years been steadily raising the reputation of Oxford as a seat of learning and a place of education. Oxford has either greatly altered since Mr. Hughes honoured her with his presence, or he was singularly unlucky in the selection of associates during his undergraduate career. The history given of St. Ambrose College is a sample of the *animus* the author displays to the University authorities, whom he delights to paint as corrupt, imbecile and indolent. St. Ambrose had, in days long past, been a reading college, and gained for its scholarship a wide and enduring reputation. Its fame attracted men of all ranks to its walls, until a youth was deemed lucky who gained admittance to its roll of undergraduates. Under these circumstances, the authorities of the college deliberately resolved to sell the

honour of their house for private advantage. "Go to," said these shrewd men; "why should we not make the public pay for the great benefits we confer on them? Have we not the very best article in the educational market to supply—almost a monopoly of it—and shall we not get the highest price for it?" Such are the words put by Mr. Hughes into the lips of the resident Fellows of St. Ambrose, who forthwith relax the discipline of their domus in order to attract gentlemen-commoners who "pay double fees to the college and have great expectations of all sorts." Of course, in the hands of such dishonest stewards, who put "the double fees" of gentlemen-commoners and the pleasure of dining in hall with beardless scions of the aristocracy, before considerations of duty or self-respect, St. Ambrose becomes demoralized. The undergraduates do not read, and the tutors do not urge them to read. Although attempts at reform have been inaugurated, the college is still little more than a club for vicious, idle young men, when Tom Brown joins it, and gains admission to "the fast set." At first Tom finds Oxford very dull, and he is disappointed with the place. His dissatisfaction, however, is not a consequence of his removal from home amusements and old friends, but is mainly due to a cause which surely none but a model monitor of Dr. Arnold's rearing would have imagined. Tom Brown, the Oxford freshman, looks back to Rugby with regret because "there he had a share in the ruling of 300 boys, and a good deal of responsibility." Unhappy at not being allowed a share "in the ruling" of the St. Ambrose undergraduates, poor Tom comforts himself with much boasting, some drinking, and continual idleness, and with hanging about a public-house, where he makes love to the pretty barmaid. In short, Tom Brown becomes what the better style of Oxford men would designate "a stupid young cad." We cannot enumerate all his acquaintance within and without the walls of St. Ambrose; nor do we care to reproduce the scenes of vulgar debauchery in which he figures. No good purpose could be answered by doing so: for the side of Oxford life illustrated by them is only the vicious side of that life—the side that concerns only the movements of the small minority of undergraduates who pass their lives in a continued excess of meat and drink, consort with money-lenders and dog-fanciers, and periodically steep themselves in revolting sensuality at Abingdon and Woodstock. It is no mystery that such foolish and depraved lads are to be found in the University; but we must exclaim against the writer who points to them as fair average specimens of *Alma Mater's alumni*. When Mr. Farrar, in 'Julian Home,' gave a picture of Cambridge life, he showed the reader the fast men, moving to and fro in their dull rounds of unpleasurable excitement; but, with equal truth and good taste, he kept them in the background, and made the interest of his story turn on the ambitions and pleasures and achievements of well-bred and gentle-mannered young men, who could enjoy their wine without drunkenness, could read hard without adopting the affectations of scholastic pedantry, could pull a good oar without emulating watermen in slang; and on proper occasions could enter with zest on the enjoyments of foreign travel or British field-sports, without forgetting that their amusements were only amusements, and that as gentlemen and scholars they had better work before them in life than mere indulgence in passing pleasure. To University-men of this stamp, the pleasant cheery youngsters who keep our country homes alive at Christmas and in long vacations, and who at

the close and opening of term come up to town in crowds to have a peep at the theatres. Mr. Hughes never introduces his readers. Indeed, it is clear he does not believe in the existence of such a class amongst Oxford undergraduates—and yet we can undertake to say that they abound in the University at the present time, and abounded also years since, when Mr. Hughes attended lectures and chapels in St. Ambrose. If he did not know them, the fault was not *theirs*.

As a contrast to indolent "dons," who bow with servile cringe before the wearers of tufted caps, and to undergraduates whose highest enjoyment is to get drunk and sing unchaste songs, Mr. Hardy, one of the servitors of St. Ambrose is introduced to the reader as a specimen of what an Oxford undergraduate should be. But apart from his poverty (of which he makes a parade) and his muscular development (which he employs in boating and sparring), there is little in the gentleman to excite either sympathy or admiration. Even the author seems to regard Mr. Hardy's position as servitor as his best recommendation to the goodwill of generous readers, who are again and again entertained with an unmanly wail over the meanness of rich undergraduates, who decline to live on intimate terms with servitors. Of all the various cries with which Mr. Hughes has ineffectually attempted to rouse our indignation against University "dons" and the insolence of wealth, this is about the weakest. Far from thinking that the gentlemen-commoners of St. Ambrose ought to have called on Mr. Hardy, the servitor, and invited him to their wine-parties, we think that had they done so they would have acted very foolishly, in cumbering themselves with an unsuitable companion, and causing him, if he were a gentleman, infinite discomfort. The members of a small college ought to know each other intimately, or not at all. A mere nodding acquaintance is an embarrassment to men who, if they do not live on the same staircase, have their rooms within a stone's throw, and meet each other a score times a day in lecture-room and quadrangle; but close intimacy between two men of widely different fortunes can very rarely be maintained without sacrifice of personal dignity. In college life such an alliance, without such a sacrifice, is utterly impossible where, within certain limits, a man's expenses are regulated by the habits of his companions. Whatever "set" a man may live with, he knows them intimately, and without those formalities which render it easier for people of diverse fortunes to meet together in London society. He has the *entrée* of their rooms at all hours, and takes part in their pleasures, whatever the expense of them may be. Under such circumstances, any attempt to force together the rich nobleman and the poor scholar in University society would be followed by even greater inconveniences and evils than invariably follow in the outer world from a constrained intercourse of persons of different estates and conditions.

To make his picture of Oxford life as lively as possible, Mr. Hughes brings up to "Commemoration" a bevy of lionesses, and sets them down amongst Tom Brown's friends; but however pleasant this change of society may have been to them, it affords little relief to the reader, who is introduced to the young ladies through the medium of a series of the most prolix conversations that were ever inserted in a work of fiction. These "talkies" cover from ten to fifteen pages, printed more closely than the ordinary run of novels; and as it is only occasionally that they are illustrated by the

introduction of a "said he" or a "replied she," before he has perused the first five leaves an ordinary reader is quite unable to assign the remarks to their proper characters. The following extract is taken from the body of about fourteen pages of similar matter:—

"And not avoid first-year men?" "Exactly so." "Because they are foolish, and therefore fit company for ladies. Now, really—" "No, no; because they are foolish, and, therefore, they ought to be made wise; and ladies are wiser than dons." "And therefore, duller, for all wise people, you said, were dull." "Not all wise people; only people who are wise by cramming—as dons; but ladies are wise by inspiration." "And first-year men, are they foolish by inspiration and agreeable by cramming, or agreeable by inspiration and foolish by cramming?" "They are agreeable by inspiration in the society of ladies." "Then they can never be agreeable, for you say they never see ladies." "Not with the bodily eye, but with the eye of fancy." "Then their agreeableness must be all fancy." "But it is better to be agreeable in fancy than dull in reality." "That depends upon whose fancy it is. To be agreeable in your own fancy is compatible with being as dull in reality as—" "How you play with words; I see you won't leave me a shred either of fancy or agreeableness to stand on." "Then I shall do you good service. I shall destroy your illusions; you cannot stand on illusions." "But remember what my illusions were,—fancy and agreeableness." "But your agreeableness stood on fancy, and your fancy on nothing. You had better settle down at once on the solid basis of dullness, like the dons." "Then I am to found myself on fact, and try to be dull? What a conclusion! But perhaps dullness is no more a fact than fancy;—what is dullness?" "Oh, I do not undertake to define; you are the best judge." "How severe you are! Now, see how generous I am. Dullness in society is the absence of ladies."

Mr. Hughes is by no means felicitous in his delineations of feminine beauty and character. Tom Brown falls in love with Miss Mary Porter (a very elegant and fascinating young lady, whom he eventually marries), but the author can devise no better machinery for exhibiting Tom's passion and tenderness to the pretty girl than the following incident, which terminates a nutting excursion:—

"He was standing up in the hedge, and reaching after a tempting cluster of nuts, when he heard a short sharp cry of pain behind him, which made him spring backwards, and nearly miss his footing as he came to the ground. Recovering himself, and turning round, he saw Mary lying at the foot of the bank, writhing in pain. He was at her side in an instant, and dreadfully alarmed. 'Good heavens! what has happened?' he said. 'My ankle!' she cried; and the effort of speaking brought the sudden flush of pain to her brow.—'Oh! what can I do?' 'The boot! the boot!' she said, leaning forward to unlace it, and then sinking back against the bank. 'It is so painful. I hope I sha'n't faint.' Poor Tom could only clasp his hands as he knelt by her, and repeat: 'Oh, what can I do—what can I do?' His utter bewilderment presently roused Mary, and her natural high courage was beginning to master the pain. 'Have you a knife?' 'Yes—here,' he said, pulling one out of his pocket, and opening it; 'here it is.' 'Please cut the lace.' Tom, with beating heart and trembling hand, cut the lace, and then looked up at her. 'Oh, be quick, cut it again; don't be afraid.' He cut it again; and, without taking hold of the foot, gently pulled out the ends of the lace. She again leaned forward, and tried to take off the boot. But the pain was too great; and she sank back, and put her hand up to her flushed face. 'May I try?—perhaps I could do it.' 'Yes, pray do. Oh, I can't bear the pain!' she added, next moment; and Tom felt ready to hang himself for having been the cause of it. 'You must cut the boot off, please.' 'But perhaps I may cut you. Do you really mean it?' 'Yes, really. There, take care. How

your hand shakes. You will never do for a doctor.' His hand did shake certainly. *He had cut a little hole in the stocking; but, under the circumstances, we need not wonder—the situation was new and trying. Urged on by her, he cut and cut away, and, at last, off came the boot, and her beautiful little foot lay on the green turf.* She was much relieved at once, but still in great pain; and now he began to recover his head. 'The ankle should be bound up; may I try?' 'Oh, yes; but what with?' Tom dived into his shooting-coat pocket, and produced one of the large, many-coloured neck-wrappers which were fashionable at Oxford in those days. 'How lucky,' he said, as he tore it into strips. 'I think this will do. Now, you'll stop me, won't you, if I hurt, or don't do it right?' 'Don't be afraid; I'm much better. Bind it tight—tighter than that.' He wound the strips as tenderly as he could round her foot and ankle, with hands all alive with nerves, and wondering more and more at her courage as she kept urging him to draw the bandage tighter yet. Then, still under her direction, he fastened and pinned down the ends; and, as he was rather neat with his fingers, from the practice of tying flies and splicing rods and bats, produced, on the whole, a creditable sort of bandage. Then he looked up at her, the perspiration standing on his forehead, as if he had been pulling a race, and said: 'Will that do? I'm afraid it's very awkward.' 'Oh, no; thank you so much! But I'm so sorry you have torn your handkerchief.' Tom made no answer to this remark, except by a look. What could he say, but that he would gladly have torn his skin off for the same purpose, if it would have been of any use. But this speech did not seem quite the thing for the moment.—'But how do you feel? Is it very painful?' he asked.—'Rather. But don't look so anxious. Indeed, it is very bearable. But what are we to do now?'"

The sprained ankle being thus bandaged, Mary tries to walk; but finding herself unable to proceed, she allows Tom to carry her.—

"But what am I to do?" she said. 'I must get back somehow.'—'Will you let me carry you?'—She looked in his face again, and then dropped her eyes, and hesitated.—'I wouldn't offer, dear, if there were any other way. But you mustn't walk. Indeed, you must not; you may lame yourself for life.'—He spoke very quietly, with his eyes fixed on the ground, though his heart was beating so that he feared she would hear it.—'Very well,' she said; 'but I'm very heavy.'—So he lifted her gently, and stepped off down the ride, carrying his whole world in his arms, in an indescribable flutter of joy, and triumph, and fear. He had gone some forty yards or so, when he staggered, and stopped for a moment.—'Oh, pray put me down—pray do! You'll hurt yourself. I'm too heavy.'—*For the credit of muscular Christianity, one must say that it was not her weight, but the tumult in his own inner man, which made her bearer totter.* Nevertheless, if one is wholly unused to the exercise, the carrying a healthy young English girl weighing a good eight stone, is as much as most men can conveniently manage."

If this be muscular Christianity, the less we have of it the better. We are at a loss to see what object Mr. Hughes's muscular Christianity can have had in constructing the above passages, if it was not to suggest the pleasure to be derived from such gambols as Squire Western wished Tom Jones to indulge in with Miss Sophia.

History of the Four Conquests of England.
By James Augustus St. John. 2 vols.
(Smith, Elder & Co.)

HERE are two volumes which reflect credit on the patience, research, industry and learning of the author. The story of the Four Conquests is not now told for the first time; but it has never been narrated more lucidly or less drily. The one is not made to succeed to the other as an independent narrative; but each is shown to have been a natural and inevitable consequence of the one by which it was pre-

ceded,—and thus to the four divisions in which the series of wars is portrayed is given the interest and the warmth of a continuous history. Mr. St. John has done his work well and honestly; and although we detect one or two contradictory opinions here and there, and encounter an expression of feeling in which our sympathies have small share, we think nothing the worse of a couple of volumes so creditable to the head and the hand by which they have been produced.

If, like most of his predecessors over the dark and difficult road by which he has travelled, Mr. St. John can throw little light on the pre-Roman condition of Britain, he evidently, and, as we believe, justly, conceives that there existed a higher civilization, a more numerous people, a better trained martial force, and a more perfectly organized social and political system, than are generally allowed to have been then in existence. Assuredly, the first Roman who invaded the land, now nearly two thousand years ago, found a worthy and a most obstinate foe. The first attempt was clearly a defeat, the second lacked many of the essentials of success, and many years were allowed to pass before the Roman eagles descended on the green pastures of the Britons, held all in subjection beneath their talons,—and only let go their hold when, the head growing faint and sick, the talons themselves became relaxed and nerveless.

Whatever policy or luxury may have prevailed anterior to the Roman Conquest, the Britons owed much increase of the latter, if not of improvement in the former, to their invaders. These brought with them “the vine, which beautified with its purple and golden clusters the neighbourhood of London, the Vale of Gloucester, and many other southern districts.” Durweston, in Dorsetshire, still cherishes the tradition of the old beauty and flavour of her vineyards. “Fruit trees, the knowledge of which Rome itself owed to Greece or the East, accompanied the eagles into Britain; and plums, apples and pears, improved by grafting, augmented the stores of the British farmer.”

We fear the British youth who did not take to the mountains, and thence bade defiance to successive generations of invaders, fell easily into the ways and fashions of the enemy, and were assuredly objects of the bitter hatred of the old conservative skin-bearers. After centuries of splendid, and not useless dominion, the legions left the island to its fate; but more than one cry of anguish crossed the waters, and implored the return of the old masters and the protection of their arms. The echo of the cry reached the ear of the rough and coveting Saxon, who became thereby aware that Britain's calamity was the Saxon's opportunity. For this opportunity he had long been watching; but the record of how the Saxon availed himself of it, how he profited by it, what battles he fought and what victories he won,—all this is darker, more doubtful, less satisfactory, and altogether more mythical, than the story of the earlier invasions of Julius, and the subjugation of the later Britons in the reign of Claudius.

One circumstance, however, is indisputable; namely, that again the invader had a formidable foe to encounter, one who was not to be subdued in one—no, not in one hundred fights. The Romanized Britons “encountered the invaders bravely on a thousand fields, and all the vast body of marauders which Northern Germany could put to sea took upwards of 200 years to subdue even a portion of England, though the divisions of the natives, and their fierce mutual hostilities, facilitated the projects of the invaders.”

Then followed the foreshadowing of king-

doms: though similar clanships and chieftainships are to be traced in Britain before the Romans began driving the sea out of Romney Marsh. Under leaders who transmitted their power to “sons or natural successors,” came in a worse Paganism than that which the Romans found here, and which had given way to the early missionaries of Christianity. As times improved the new opportunity was seized by new conquerors in a holy war, and Saxon kings and people embraced Christianity, in name if not in principle, and our early six or seven English bishops were enthroned in sees whose limits, we believe, were exactly co-terminous with the respective kingdoms. Thus there became in fact, as there exists in some Eastern governments, a duplex royalty, a secular and a religious, a governing and a teaching king.

Again, after a few centuries of rule, the quiet of the Saxon was rudely disturbed by the wild incursion of the Dane. Here again, however, the conquest was not the swift result of “coming” and of “seeing.” “In contemplating the subjection of England,” says Mr. St. John, “by the barbarians of Scandinavia, modified in manners through their settlement in France, we are apt to confine our views to the circumstances of Edward the Confessor's reign, and the nine brilliant months of Harold. But the Conquest, in reality, occupied three centuries; having begun A.D. 787 with the landing of the Danes, in three piratical galleys, at Dorchester” (on the coast of Dorsetshire, as the author subsequently and more correctly remarks), “and terminated A.D. 1007, when William the Bastard transmitted the crown of England to his son.” Mr. St. John describes the savage Northmen as coming over hither “intoxicated with blood and ale,” which must be taken as one of the unpleasantest forms of inebriety. East, west, north and south we meet the Danes “burning, murdering, plundering, violating, and covering the land with ruins.” It is when occupied with this subject that Mr. St. John is given to flounder a little, and to become contradictory, and while recording in detail the horrible and unprofitable atrocities of the Danes, adding, by way of running commentary, the apologetic assurance that their object was not to carry on a war of extermination. It is singular to see men of ability stumbling so continually when they are handling this Danish question. Mr. St. John evidently thinks that the Danes, with some objectionable points about them, were a sort of hilarious good fellows; and he has a weakness for them something like that of Mr. Mackenzie Walcott, who, after writing a guide through the counties where those sanguinary ruffians rioted before they ruled—even destroying Oxford University out of mere wantonness—dedicated his book to the King of Denmark, in honour to the memory of the sons of violence who erst laid waste our land.

In 1042, nine-and-twenty years after England was overrun by King Sweyn, “the Saxon element again became predominant”; but in 1066 the Norman invasion, ostentatiously prepared and menacingly announced, touched our shore at Bulverhythe, and made good its footing at Hastings. At that time, says the author, “the Saxons, after occupying England for six hundred years, and passing through every species of vicissitude, addicting themselves to trades and handicrafts, to gardening and agriculture, to industry and commerce, and in some degree to literature and the fine arts, had attained a pitch of civilization unknown on the Continent, except, perhaps, in Italy and among the Mohammedans of Spain.” If there be any who think this picture overcharged, we have only to refer them to Dr. Hook's volume of the ‘Lives of the

(Saxon) Archbishops of Canterbury,’ where they will find confirmation resting upon proof. Even William of Poitiers says of the Englishwomen of this period, that they excelled all others in cunning plying of the needle, and especially in works of golden tissue. Mr. St. John, who never misses an opportunity to be civil to the ladies, declares of those Saxon-English dames that “they excelled those of all other countries by their acquirements and domestic virtues as much as by their beauty. . . . From the earliest times, moreover, they had been addicted to poetry, and knew, by heart, the popular songs and ballads of their country. The knowledge even of Latin was not uncommon among them, and they are said occasionally to have amused themselves with a style of reading to which few ladies of Europe could now be found equal.” This is, perhaps, somewhat highly pitched, but Mr. St. John must be allowed some gallantry when he is treating of ladies. He appears to look upon the Norman Invasion as a check to civilization. The social condition of the Saxons he pronounces as having been far superior to anything introduced by the Normans, “among whom feudalism prevailed in its most repulsive form.” All virtue, however, did not go out with the Saxon, whom we suspect of being not altogether so excellent a gentleman as Mr. St. John takes him to be. Whatever be the fact, on this matter we may rest satisfied that the amalgamation of races produced one of the most energetic, persevering, valiant and self-reliant, yet modest, people on the earth. If the few pure Celts whom we occasionally encounter are to be taken as excellent samples of the original race, the latter were a stunted, low-browed, pig-eyed, snub-nosed, obstinate, yet hearty race. Where they did not take to the rocks, but remained on the pasture-lands, went into towns with the Romans, married and intermarried, and left sons and daughters to do the same with the Saxons, as those did with the fair-haired Danes, and the descendants of these again with other Saxons whose daughters and widows, when sires and husbands had fallen before or been enslaved by the Norman, mated with the new comers,—the issue of all was a race whom the world cannot excel—in men for honest-heartedness and valour, in women for purity of mind, gentleness, virtue and beauty. “Thank God, if you will,” said the late Dominican Preacher, Lacordaire, to his congregation,—“thank God that you have been baptized; but certainly thank Him that you are baptized Frenchmen!” Let us thank God that we are what He has made us by the Conquests here narrated—British-Roman-Saxon-Norman, in sum “English” neither courting the favour nor fearing the hostility of any would-be invader,—be he “baptized” or otherwise.

Codex Zacynthius. *Æ. Greek Palimpsest Fragments of the Gospel of St. Luke obtained in the Island of Zante by the late General Colin Macaulay, and now in the Library of the British and Foreign Bible Society.* Deciphered, Transcribed and Edited by Samuel Prideaux Tregelles, LL.D. (Bagster & Sons.)

AMONG the scholars of this country there is no one to whom we are so much indebted as to Dr. Tregelles for his indefatigable labours in the textual criticism of the New Testament. On the Continent even he has no rival in this respect, with the single exception of Tischendorf. Between them they have collated or re-collated almost every known early MS. of the New Testament or its parts; not working together, but independently of each other, though occasionally communicating on the

subject of their labours. Of the two, certainly Tischendorf has done the more in transcribing and publishing texts of ancient MSS. He has also discovered many himself, the most important of which, named the 'Codex Sinaiticus,' is now on the eve of publication at the expense of the Russian Government. Dr. Tregelles's labour has been more that of collation; but in this he has not confined himself to the Greek text. He has examined all the ancient versions of the New Testament and all the passages quoted in the Ante-Nicene Fathers, and has sought to demonstrate the value of authorities by comparative criticism. His first published work of great importance was a critical edition of the Book of Revelation in Greek and English, published in 1844: the object of which was to put the reader in possession of some of the results of criticism in connexion with that book, the Greek text of which was revised entirely upon ancient evidence. In 1848, he put forth the Prospectus of a new edition of the entire New Testament, the text to be based upon a collation of the most ancient MSS., and upon that work he has been sedulously engaged ever since. The first portion of it, containing Matthew and Mark, was delivered to subscribers in 1857, and the second, containing the other two Gospels, has been just completed. We are sorry to hear that ill health is likely to interfere, for a while, at least, with the progress of the remainder. In the interval between 1844 and 1861 Dr. Tregelles has published many other works well known to Biblical scholars, and has also re-written an entire Part of the volume on the New Testament in the last edition of Horne's 'Introduction,' namely, that which treats of the textual criticism and study of the New Testament, besides carefully editing and revising the other two parts.

Although so many years of Dr. Tregelles's life have been occupied in collation, there being few known and accessible MSS. which he has not subjected to that process, the present 'Codex' is the only one of which he has published the complete text. It comes before us in a handsome quarto volume, printed from the types cast for the fac-simile of the famous Alexandrine MS., edited many years ago by Mr. Baber, of the British Museum, which types have been liberally lent for the purpose by the Museum Trustees, through the intervention mainly of Dr. Cureton. Dr. Cureton, who has himself edited an ancient Syriac version of the Gospels from the Nitrian MSS. in the British Museum, besides giving us the genuine text of St. Ignatius and other ancient Fathers from the same sources, naturally feels a strong interest in all persons engaged in kindred pursuits; and the present is only another instance of the benefit which scholars derive from his appointment as Royal Trustee. The first intimation that Dr. Tregelles received of the existence of the 'Codex Zacynthius' was in a letter from Dr. De Lagarde, of Berlin, on the 11th of August, 1858, who had been shown it a few years previously by Mr. Knolleke, one of the Secretaries of the Bible Society, but was not allowed to carry it with him out of the country for collation. Dr. Tregelles then inspected it, and found it to be a *Palimpsest* or *Codex Rescriptus*, on vellum, of a great portion of the Gospel of St. Luke, accompanied by a Catena. A *Palimpsest* MS., we may observe for the benefit of the uninitiated, is one which has been obliterated or partially obliterated by scraping the vellum (whence the word *καλὴμψρον*, from *πάλιν*, again, and *ψάω*, to rub or scrape), so as to admit of its being written upon again—a process that was frequently had recourse to in times when the

materials for writing were scarce. But in the course of centuries the earlier writing re-appears in a greater or less degree, so that it may be deciphered with minute attention, or with the aid of a chemical application. And in this way many valuable fragments of antiquity have been discovered by Cardinal Mai and others: such as the Epistles of St. Paul in the Gothic version of Ulphilas, the Institutes of Gaius, Cicero 'De Republica,' and more recently the fragments of Homer edited by Dr. Cureton. The Greek *Palimpsests* are generally written in the large Uncial letters, and such is the case in the MS. before us, which, at first sight, inclined Dr. Tregelles to assign to it as early a date as the sixth century. The text of St. Luke, which is in round, full and well-formed Uncial letters, has quite this early appearance, but then the Catena with which it is accompanied has the round letters so cramped as to appear to belong to the eighth century. Dr. Tregelles takes it for granted that the texts of the Gospel and of the Catena were both written by the same hand; but with due submission, may it not be possible that the former is of the sixth century, and the latter of the eighth? In the fac-simile here given of one page of the MS. we see nothing that need hinder us from arriving at such a conclusion. The later writing, which was intended to supersede the original MS., consists of an Evangelistarium or Lectionary from the Four Gospels, and from its style of execution appears to belong to the thirteenth century.

Such is a brief description of this MS., which was obtained in the island of Zante, in the year 1820, from Prince Antony Comuto, by the late General Colin Macaulay, who, in the following year, presented it to the Library of the British and Foreign Bible Society. General Macaulay was the brother of the late Zachary Macaulay, and consequently uncle of the historian. Of Prince Comuto we have very little information, except that he was a pious elderly man at the time when General Macaulay visited Zante, and that he bore a part in some discussions with respect to the value of the Bible Society's Modern Greek version of the New Testament. It would be interesting to know how or where he obtained this MS.; but the time has now gone by for instituting any inquiries upon the subject. "But," says Dr. Tregelles, "while the history of the MS. before it passed into the hands of Prince Comuto is buried in obscurity, it is, at least, worthy of note that this is the only Greek New Testament MS. which seems to have come to us from Greece itself; Egypt, Constantinople and Mount Athos having been, it seems, the ordinary localities from which our libraries in Western Europe have been furnished with these precious documents."

Dr. Tregelles, following the usual custom of giving a notation to the MSS. of the New Testament, according to the letters of the alphabet, has designated the 'Codex Zacynthius' by the letter *Ξ*, that being the first convenient letter hitherto unappropriated. Whatever may be its date, certainly not later than the eighth century, he claims for it a high importance from the character of its readings, which throughout exhibit a strong affinity to those of the "very best codices." It is also the oldest Greek Codex, accompanied by a Catena, with which we are acquainted, and "is the only Uncial *Palimpsest* of the Greek Testament yet described of which the later writing is also Biblical." In the Catena nine ecclesiastical writers are cited by name, at the head of the pages, as authors of the extracts, viz., "The Holy John (Chrysostom), Bishop of Constantinople," "Origen," "Eusebius," "Isidore,

Presbyter, of Pelusium," "Victor, Presbyter," "The Holy Basil," "The Holy Cyril," "The Holy Titus," and "The Holy Severus, Archbishop of Antioch." With respect to the last-mentioned, Dr. Tregelles notices a curious fact. Severus was a Monophysite, and in this Catena he is quoted five times, which would indicate on the part of the author or scribe an adherence to the Monophysite teaching, but in the MS. before us the name of Severus has been carefully deleted. "This erasure of the name of Severus," says Dr. Tregelles, "is worthy of notice; for whatever be the date of the MS. this alteration seems to have been made by some one who stood in fear of the Edict of Justinian, against all who possessed or transcribed the writings of Severus. . . . The penalty against any one who dared to transcribe them was the loss of his right hand." Now if we knew how long this Edict of Justinian, passed in the year 536, remained in force, it might help us to determine the date of the present MS. But there is scarcely any means of ascertaining this fact in Byzantine history; failing which, "it is worthy of inquiry," as suggested by Dr. Tregelles, "whether the MS. *Ξ* may not have been really written before the Synod of the year 536, and whether the erasure of the name of Severus did not take place in consequence."

The City of the Saints; and Across the Rocky Mountains to California. By Richard F. Burton. (Longman & Co.)

HAVING visited Memphis, Benares, Jerusalem, Rome, Mecca, the New Jerusalem of the distant West had to be added to the number. It shows the growing interest in the Saints and their ways, that two books so good as those of M. Remy and Capt. Burton should appear in England within a few months. Capt. Burton is one of the best travellers we have. One would like him better if he had a little more faith and a little less credulity. It is surely possible to mix with the Beloochees, to be chased for one's life by the Somalis, and to treat an Indian of the West to a glass of whiskey, without losing faith in humanity. It would do all London good to watch him as he packs up his kit,—so simple, so real, so jolly is he. One India-rubber blanket, he tells us, pierced in the centre for a poncho, and serving in an emergency for a carpet bag; a buffalo robe, a coat, two revolvers and a bowie-knife served "to defy the dangerous 'bunks' of the stations." No doubt he grumbles now and then, in no unmistakeable manner, as belongs to his nation all the world over, but there is always an occasion when he complains, which cannot always be affirmed of John Bull. His commendation is as hearty as his disapproval. No one requires to be told that he is a great linguist, who is perpetually astonishing his reader by quoting stray scraps of Hindustani or Arabic, Hebrew or Persian, Latin or French, German or Italian, or that he could read off by head-mark the nationality of every inhabitant of the globe as readily as most of us could an American Indian. Though "not spoiled by books," as Randolph said of Johnson, he seems to know a great deal more of them than any of his readers is likely to carry away. There is no end to his "quips and cranks and wanton wiles"; his good humour and fun seem positively inexhaustible. He hugs reality like a bride. If one would see him in his element, he must look at him face to face with a wild Dakota of the Rocks, a hundred miles from any human abode, rather than among the half-civilized inhabitants of Great Salt Lake City. One

cannot help feeling that the description of his journey over the Rocky Mountains from east to west exceeds in interest by a great degree his sojourn among the Mormons. He seems as if he had been so long "among the savage men" that he can describe them alone with interest.

When the party of which Capt. Burton formed one were some nine days on their journey from St. Louis to the New Jerusalem, they encountered a train of Mormon waggons slowly wending their way under the "captaincy" of Brigham Young, a nephew of the Mormon Pope, towards the Promised Land. It was impossible to mistake the nationality of the emigrants,—“British-English” was written, he tells us, “in capital letters upon the white eyelashes and tow-coloured curls of the children, and upon the sandy-brown hair and staring eyes, heavy bodies and ample extremities, of the adults.” When he entered the colony on the 26th of August, 1860, after a journey over the Rocky Mountains of 19 days, the same thing struck him regarding the whole territory. The modified English appearance of the colony as exhibited in the prodigious number of white-headed children is frequently referred to in this book, and from unmistakable statistics this shrewd guess is amply borne out.

The traveller confesses to a feeling of sadness, such as is apt to haunt the pleasure-seeker on entering a new place, on his arrival at Great Salt Lake City. The reader, likewise, will soon have to confess to a kindred emotion as he trudges patiently the dirty roads of the Holy City. In the summer visit which M. Remy paid to it, everything was dry and clean; but the winter rains break up the roads or streets, and render them next to impassable. Here is Capt. Burton's description of the houses of the Saints, which, we must say, possesses much more verisimilitude than the sunny picture of the Frenchman:—

“The houses are almost all of one pattern—a barn shape, with wings and lean-to's, generally facing, sometimes turned endways, to the street, which gives a suburban look to the settlement; and the diminutive casements show that window-glass is not yet made in the Valley. In the best abodes the adobe rests upon a few courses of sand-stone, which prevent undermining by water or ground-damp, and it must always be protected by a coping from the rain and snow. The poorer are small, low and hut-like; others are long, single-storied buildings, somewhat like stables, with many entrances. The best houses resemble East Indian bungalows, with flat roofs, and low shady verandahs, well trellised, and supported by posts or pillars. All are provided with chimneys, and substantial doors to keep out the piercing cold. The offices are always placed, for hygienic reasons, outside; and some have a story and a half—the latter intended for lumber and other stores. I looked in vain for the out-house harems, in which certain romancers concerning things Mormon had informed me that wives are kept, like any other stock. I presently found this but one of a multitude of delusions.”

The latter portion of this statement must be received with caution, contrary as it is to all the anti-Mormon writers who have visited the settlement. Capt. Burton, no doubt, is out of sight the most accomplished traveller who has ever set foot in the Great Salt Lake City: one is forced to own this before he has been long in his company. He is constantly comparing the results of his past travels in Asia and Africa with the scenes which are passing before him. But a danger arises from this consciousness of superiority, and this very reputation is apt to beget in an observer a disposition to see things precisely the reverse of every other body. In

the course of his remarks Capt. Burton has occasion often to differ from, seldom to agree with, any previous traveller whatever. From novelists to natural historians, all share alike. Yet he candidly confesses that “no Gentile can expect to see anything but the superficialities” of Mormonism, or of any other religion into which he would penetrate from without. Why did not Capt. Burton, so facile in creeds, assume the Mormon garb, as he did that of the Eastern Dervish, when he penetrated to Mecca? This is a dangerous experiment, and for one to risk it more than once in a lifetime, might be attended with danger. Elder Stenhouse, a Scot by birth, went round the City and showed him the “lions.” The Elder told him that most of the new arrivals “expect to be at the top of the tree at once, and they find themselves in the wrong box; no man gets on here by pushing; he begins at the lowest seat; a new hand is not trusted; he is first sent on a mission, then married, and then allowed to rise higher if he shows himself useful.”

The energy and secrecy of the police force in Utah city is somewhat remarkable. Some thirty of a police staff, presided over by one Sharp, a Scotsman by birth, keep this great straggling town in as perfect order as any lone plain in all America. Two notorious horse-stealers were sauntering idly home one fine evening through its quiet streets when suddenly, as if launched by the hand of fate, “a bullet placed accurately under the heart-arm” of each sent both of them into the dark land in an instant. Nobody knew who did it, and nobody cared to inquire; but it was rumoured by the Gentiles to be the work of Brigham Young and his myrmidons. No murder was committed among the Saints during the twenty-five days' stay of Capt. Burton; while in Carson City, which he denominates Christian, there were no less than *three* in as many days. The “Danite Band,” otherwise called the “Daughters of Gideon,” the “Destroying Angels,” the “Devils,” or “Death Society,” were organized in 1837, as assassins in the name of the Lord. This company was originally set on foot by D. W. Patten, popularly known as Capt. Fearnot, to act as avengers of blood on every Gentile or apostate Mormon whom the Saints had reason to dislike. One Ephe Hanks is the present captain of the corps, whom Burton describes as a rough, cordial man, “frank as a bear-hunter,” and with nothing of that infernal bloodthirstiness for which he popularly gets credit. Yet the band which he commands, by their secrecy, mystery and decision, are well calculated to inspire terror in every Gentile breast. However, the Mormons all aver that the existence of the Danites, like that of the spiritual wives, is altogether a Gentile illusion. The Utah Militia and the old Nauvoo Legion are still in existence. The latter, which was organized in 1840, and originally included all male Saints between the ages of sixteen and fifty, now numbers 6,000 or 8,000 men. The Utah battalion consists of 2,821 men; but in case of war it would have the assistance of some 30,000 or 40,000 Indian warriors, whom the Saints do all they can to propitiate. As an essential portion of the arrangements for maintaining order, and for affording amusement to the Saints, theatres, dancing and music play an important part. All the inhabitants of Great Salt Lake City who can afford it go periodically to a great feast, which is invariably wound up by a dance, often protracted into the morning. The finest party of the season (tickets, 2*l.* per couple), including prayers and benedictions, spread over thirteen mortal hours while Capt. Burton was there. He describes the revellers as

straggling irregularly home chanting a national hymn,—

Let the Chorus still be sung
Long live Brother Brigham Young,
And blessed be the Vale of Deseret—*rét-rét*;
And blessed be the Vale of Deseret,

to the tune of ‘Ole Kentucky Shore.’ Prophets, apostles and bishops, all exultate their sacred limbs in the dance; and they point to the Singer of Israel and even to the hero of Africa as shedding a lustre on this venerable pastime by their example. Perhaps Sir E. Bulwer Lytton will be pleased to hear that his ‘Lady of Lyons’ excited a prodigious *furor* among the Saints of the Latter Day, and Mr. Wilkie Collins that his ‘Woman in White’ had lost nothing of her attractions by being transported across the salt water. The public library in Great Salt Lake City contains already about 1,000 volumes.

Capt. Burton has obviously bestowed considerable care on a portrait which he has drawn of Prophet Brigham Young; but it is far too elaborate for insertion here. In all the great essentials it corresponds with the one which was given of him in this journal in the month of June last, although in some accidental particulars the one given in the volume under notice is much more favourable. The Captain heard Brigham speak at the Bowery, and was somewhat disappointed with the Prophet. His Holiness said he would dance like a Shaker, and, suiting the action to the word, gave an exceedingly comical imitation of the flings of the descendants of Ann Lee. This little touch of buffoonery seemed to tickle the Saints immensely. Listen to the contempt Brigham pours out upon the gentler sex, in his grand, dignified way. Englishwomen, we hope, will not forget that the Prophet simply speaks of *Mormon* ladies. “If I did not consider myself competent,” he says, “to transact business without asking my wife, or any other woman's counsel, I think I ought to let *that* business alone.” Verily, this must be a great one! The milk of human kindness must be quite dried up in that arid Utah territory. And yet, strange to say, this Moslem of the West takes to his bosom some seventeen or thirty-six—for accounts differ—of those weak creatures on whom he pours so much scorn, and has a family of considerably over seventy members. Is the difference great between the Seraglio of Constantinople and the Bee-house of Utah? Young's second man, Kimball, a rough-and-ready Boanerges, who talks much more noise than he does of sense, is accused by the Gentiles of occasionally being very indelicate, and of sometimes alluding to his young wives as his “little heifers.” Though the Temple of the Lord is merely represented by a hole in the ground, Brigham, his prophet, rejoices in his Palaces and Kanyons, his Bee-houses and Saw-mills. The gateway of the Pope's palatial residence is surmounted by a plaster group, consisting of a huge vulturine eagle, perched, with wings outspread, neck bent, as if snuffing the carrion from afar, and talons clinging to a yellow beehive. All this noise about bees is merely emblematical, as there is not an insect of the kind in the territory. Deseret, it is said, signifies the “land of the honey-bee.” Brigham, still mindful of number one, like the Imam of Muscat, is the chief merchant of the place, and his possessions value upwards of 50,000*l.*, a prodigious sum for a Rocky Mountaineer. We were prepared to take most of Capt. Burton's statements respecting Brigham *cum grano salis* until he told us that the Prophet's “favourite food is baked potatoes and butter-milk, and his drink water.” A practical cause, for which he had been looking, now

presented itself, why there were so few Irish among the Saints. Depend upon it, if Patrick is aware of the food relished by His Holiness, he will think twice before leaving the Green Isle. The Captain winds up his somewhat flattering portraiture of His Holiness in these words:—"The arts by which he rules the heterogeneous mass of conflicting elements are indomitable will, profound secrecy and uncommon astuteness."

The projected Temple, a pile of prodigious size, and with which all who merely saw the outside of M. Remy's book will be familiar, unlike the sacred edifice of Nauvoo, is of human design, and consists of a syncretism of Greek and Roman, Gothic and Moorish styles, emblematic, no doubt, of the professed eclecticism of the faith which is to raise it. Joseph Smith said in 1843, that every system had a "little truth mixed with error," which, of course, it is the duty of the pure Mormon industriously to sift out of divine knowledge. Yet, strange to say, in the face of all this professed charity, no negro is admitted within the pale of the Mormon Church, while its adherents stoutly allege that there is no salvation out of it. Yet slavery is legalized in Utah solely, we are told, to induce the Saints to buy negro children who have been abandoned by their parents. According to the census taken in 1860 by a Gentile, General Burr, the negro slaves numbered twenty-nine in Great Salt Lake City. Liberty and slavery, professed eclecticism and real exclusiveness, freedom of judgment, and yet absolute intolerance, co-exist in this young Mecca of the West. There are about 9,000 Gentiles in Utah, of whom some 300 are merchants, who as soon as they have made from 120*l.* to 600*l.* per cent. on capital are obliged to decamp, so overwhelming is the Mormon pressure from without.

In 1859, M. Remy estimated the number of Mormons in Utah at 80,000, and throughout the world at 180,000. But the last official census, taken by a United States official, makes the Saints in Utah little more than half that number. The Saints, no doubt, grumbled prodigiously over the 40,266 as the grand total, and alleged, in the loudest manner, that 90 or 100,000 would have been nearer the figure.

Of the young Mormons, regarding whose character the most flattering pictures have not been drawn, Capt. Burton speaks rather dubiously, but nevertheless approvingly. Unlike their parents, unaccustomed and disinclined to severe toil, their constitutional indolence, induced, no doubt, by the climate, strikes every visitant to the Great Salt Lake City. "Pleasurable physical exertion" is all they care for. At fifteen a boy can use a whip, brandish an axe, or wield a hoe; but he does not take quite so readily to the plough. He sits a bare-backed horse like a Centaur, handles his bowie-knife skilfully, never misses a mark with his revolver, and on the sly can "punish" half a bottle of raw whiskey without winking. This is the perfection of physical training, according to Capt. Burton; though he says drily that he would not commend it to the youths of London or Paris. One would say not.

The condition of the Mormon women is a topic of ever-increasing interest. Girls hardly ever remain single past sixteen, and they pity that community, such as England, where women cannot marry until thirty. If a Mormon woman marry a Gentile, as Mrs. Joseph Smith did, she is instantly cut off from Mormon society. The Mormon apostles have bribed their women with glowing pictures of paradise,

and they have subjugated them with threats of annihilation. But, in truth, the great majority of these poor creatures would, we fear, prefer being the fiftieth "sealing" of Dives, to being the single drudge of Lazarus. Now that polygamy is an express command from on high, no Saint, unless he be at heart still a sinner, will dream of violating it. The first wife has the preference in Utah, as all over the world where polygamy is practised; she is queen over the rest of the sisters, both in this world and in the next. Rivalry, jealousy, envy, malice, spite, hatred, may exist in Utah, but Capt. Burton was too gallant a gentleman to notice them, or indicate that they existed. All that he cares to notice is the fact of Bossuet and some of the reformers countenancing polygamy, and the present Bishop of Natal defending it in his diocese "on the ground of religion and humanity." Of the three forms that unite the sexes, polygamy increases, monogamy balances, and polyandry diminishes progeny. As was acutely guessed long ago by Montesquieu and Bruce, the former custom has lately been proved by the statisticians to give a preponderance of female births, while the latter acts in the inverse order, and produces an advantage in favour of males. Both of these propositions have now been abundantly established. That polygamy, as in Utah, always produces a large preponderance of females, and that polyandry, or the union of one woman with many men, as in many parts of India, always produces a preponderance of males, are two statements, particularly the latter one, that the "statists" must take under their especial protection. Into the arguments, religious, physiological, social and economic, which the Saints are accustomed to advance in favour of polygamy, we cannot now enter. About four-fifths of the population of the world are said to be polygamists.

'The City of the Saints' is as eminently human a book as we have perused for a long while. It is full of humour, laughter and good sense, but, as we said before, the Desert is the author's natural home.

OUR LIBRARY TABLE.

Tiny Tadpole, and other Tales. By Frances Freeling Broderip. With Illustrations by her Brother, Thomas Hood. (Griffith & Farran.)—The author of 'Funny Fables for Little Folks' steadily improves as she continues her literary labours. Of all the children's books put forth as yet by publishers, in readiness for the approaching Christmas sale, this little volume is the best we have seen. Most tragic is the fate of Tiny Tadpole, who gives the title to the volume, in which her folly and destruction are recorded. "Mother," said Tiny Tadpole, "when shall I get bigger? When shall I be a full-grown frog?"—"Have patience," answered the frog mamma, a venerable being. But Tiny cannot have patience. Those who wish to know the terrible end of this foolish little Tiny, discontented with a childhood free from care, must buy Mrs. Broderip's book. The best story of the collection, however, is that of "The Gilt Pin." The "Gilt Pin" simply because she looks like real gold, and lies in the upper tray of the jewel-case, gets the most preposterous and stuck-up notions of her own value and dignity. She brags about her grand acquaintances—the Brooch and the Bracelet, the Gold Chains and the Precious Stones,—and sneers at the Bodkin, for spending all her days in low life. Miss Bodkin retorts, "I dare say you may like the show and appearance, but I would rather be a plain honest bodkin, and do my daily work in my own fashion, than be a gilt trifle like you. Why, with all your smart looks, you are sure to get dirty and discoloured soon, and then you'll be thrown into the fire." But a more ignominious death than that of being burnt punishes Miss Gilt Pin. The foolish thing, unable to "take to her work well," slips out of the shawl, which it

was her appointed business to keep securely fastened, and falls upon the muddy pavement, when she is instantly trodden upon and destroyed. "Ah, well, nevere mind!" says the lady's maid, "it was only vun poor gilded peen. Ce n'est rien." Long after the Gilt Pin has been thus disposed of, the honest, industrious Bodkin goes on working, and doing lots of good in the world, like her grandmother—

Old Mother Twitchett, who has but one eye,
And a long tail, which she lets fly;
And as she whips through every gap,
She leaves a piece of her tail in the trap.

The pencil of Tom Hood the younger has done good service in illustrating his sister's humorous tales.

Guy Rivers; or, a Boy's Struggles in the Great World. By Alfred Elwes. With Illustrations by H. Anelay. (Griffith & Farran.)—Mr. Alfred Elwes, who is known as a writer of children's stories, sustains his reputation with the history of Guy Rivers, a poor lad who wanders up from the Weald of Kent to seek work in London, and eventually becomes a prosperous merchant. In his Preface, Mr. Alfred Elwes states that he tells his story as it was told him by "the veritable Guy Rivers, a successful London merchant." The effect of this announcement, however, is lessened to the mind of the critical reader, by the description of Guy's narrow escape from robbers, under circumstances which precluded him from consciousness of the peril in which he had been placed. As the text does not explain how the hero was subsequently informed of the danger avoided, the reader experiences an uncomfortable suspicion that either "the veritable Guy Rivers" drew on his imagination for that portion of his "veritable history," or that the author has attributed words to "the veritable Guy Rivers," which that "successful London merchant" never used. This trifling blunder excepted, 'Guy Rivers' is a capital story. Its moral tone is excellent; and boys will derive from it both pleasure and profit.

Meadow Lea; or, the Gipsy Children. A Story founded on Fact. By the Author of 'The Triumph of Steam.' With Illustrations by John Gilbert. (Griffith & Farran.)—The "fact" foundation of this story is so slight, that though we have burrowed after it with pick and shovel—paper-knife and spectacles—for several minutes, our search has been in vain. Of the superstructure we can speak with certainty, as being silly, romantic stuff about tent-loving gipsies and their ignorance of the sweet experiences of Divine grace. The advent of Christmas always disposes us amiably towards the caterers of literary amusement for the young; but, out of the depths of our benevolence, we cannot find a single word of commendation for 'Meadow Lea.' Its only point of interest is a misquotation. "There is no use in attempting to convert you," replied Mrs. Harcourt,

"A man convinced against his will
Is of the same opinion still."

The pious Author of 'Meadow Lea; or, the Gipsy Children,' of course is not familiar with the profane writings of Samuel Butler; but if she refers to 'Hudibras,' Part III. Canto III. line 547, she will find—

He that complies against his will,
Is of his own opinion still.

Compliance and conviction are two words with widely different significations. If the author would show how a person can be convinced of the truth of a new doctrine, and at the same time believe in the old error which it corrects, the achievement would be even more wonderful than any of "the triumphs of steam."

Live Toys; or, Anecdotes of our Four-Legged and other Pets. By Emma Davenport. With Illustrations by Harrison Weir. (Griffith & Farran.)—As on former occasions, Miss Emma Davenport, in her present attempt to amuse children, completely achieves her object. The stories told of the Four-Legged Pets are clearly narratives of actual occurrences, and are therefore well calculated to please those little people who like their nursery tales to be "all true." Praise is due to Miss Davenport, and still greater praise to her engraver. Harrison Weir's illustrations are capital. The pictures of 'The Sparrow Hawk and the Cat,' and 'Drake, the Retriever,' will win the

applause of any child who has the full use of a pair of eyes.

Distant Homes; or, the Graham Family in New Zealand. By Mrs. J. B. Aylmer. With Illustrations by J. Jackson. (Griffith & Farran.)—An unexpected loss of fortune compels Mr. and Mrs. Graham, with their children, to quit England, and emigrate to New Zealand. The adventures in colonial life furnish the subjects which Mrs. Aylmer, with much good taste and knowledge of the juvenile mind, dresses up into a series of entertaining pictures. English children, who are about to migrate to the colonies, or who have relations in New Zealand, will be delighted with the history of "the Graham Family," and be enabled, by its pages, to form pleasant and sufficiently truthful conceptions of the "distant homes" inhabited by their kindred.

Harry at School: a Story for Boys. By Emilia Marryat (daughter of the late Capt. Marryat). With Illustrations by John Absolon. (Griffith & Farran.)—Miss Marryat, in this story, is rather over-anxious to inspire her juvenile readers with sentiments of sound morality; but though she does not altogether hold herself secure from a charge of "preaching," she will not fail to amuse little children. In Dr. Owen's school, Elton is the model boy, and Tom Lawton the wicked urchin. Harry is an impulsive, high-spirited, well-trained lad, anxious to do right, but too easily influenced by his companions for evil as well as for good. Placed between Elton and Tom Lawton, Harry finds a representative of human iniquity on his right hand, and a representative of moral excellence on his left. Of course, he fares ill or well, just in proportion as he listens to the former, or is guided by the latter. At the close of the tale, Justice awards to Elton a liberal meed of praise, and to Tom Lawton an overwhelming share of disgrace, whilst Harry comes to the conclusion that it is foolish for little boys to be naughty. This is as it should be. But Elton had no need to be priggish with his goodness. Parents who like a book of this sort may buy 'Harry at School' with confidence that their money spent will bring them their money's worth.

Montrose, and other Biographical Sketches. (Low & Co.)—La Tour, the Acadian adventurer of the seventeenth century, Beau Brummell, Dr. Johnson, and James Graham, Marquis of Montrose, are the four celebrities who reap the advantages and disadvantages of biographical treatment in the present volume. The most ambitious and the worst executed of the four memoirs is the sketch of Montrose, about whom the author has nothing new to say. The article on Samuel Johnson contains some kindly and discerning observations on his personal character. The notice of the famous arbiter of fashion is simply a condensation of what is best in Capt. Jesse's 'Life of George Brummell, commonly called Beau Brummell.' The materials for the portrait of La Tour are taken from various published histories. Each of the four sketches is up to the average standard of magazine writing; but the entire volume does not contain much to recommend it. The author would have succeeded better if he had not aimed at reproducing the more striking peculiarities of Carlyle's style.

Of lectures and miscellaneous publications we have to mention Mr. Goldwin Smith's *Lectures on Modern History* (J. H. & J. Parker),—Dr. Bernays's *Syllabus of the Course of Lectures on Chemistry and Natural Philosophy* (Adlard),—*Two Lectures on the Present American War*, by Prof. Bernard (Parker),—*Poland, a Letter to the Earl of Ellenborough*, by General Count L. Zamoyski (Ridgway),—*Outside Belgravia, a Word to Mothers*, by Rebecca Raboteau (Shaw),—*'The Times' the Looking-glass of the Nation, a Sketch from Nature*, by A. Fitzadam (Ridgway),—*An Anti-Slavery Pamphlet*, by Otto Wenkster (Mann Nephews),—*Speech of the Bishop of Capetown in the Supreme Court of the Colony of the Cape of Good Hope* (Street),—*County Education, a Letter addressed to the Earl of Devon*, by the Rev. J. L. Brereton (Ridgway),—*The Thirty-Fourth Report of the Directors of James Murray's Asylum for Lunatics* (Morrison),—*The Bastille in America; or, Democratic Absolutism*, by an Eye-Witness (Hardwicke),—*Mis-expenditure*, by W. Cham-

bers, being No. IV. of 'Chambers's Social Science Tracts' (Chambers),—and Sir J. K. Shuttleworth's Letter to Lord Granville on the *Revised Code of Regulations contained in the Minute of the Committee of Council on Education* (Smith, Elder & Co.).

LIST OF NEW BOOKS.

About's Round of Wrong, 12mo. 1/ swd.
Alford's Gold-Seekers, illust. 8vo. 3/6 cl.
Alford's Indian Chief, illust. 8vo. 3/6 cl.

Verses and Translations, by C. C. C., 8vo. 5/ cl.
Wellington's Supplementary Despatches, ed. by his Son, Vols. 8, 9/6
Wentworth's Australia, its Rise, Progress & Present Condition, 2/6
White and Black, a Story of the Southern States, 3 vols. 21/6 cl.
Young Musicians; or, the 'Sweet Power of Music,' 8vo. 3/6 cl.
Young Painters; or, Tales of the Studio, 8vo. 5/ cl.

NEW TESTAMENT CRITICISM.

270, Strand, Nov. 27, 1861.

MUCH interest having recently been excited in Germany by the discovery of the long-lost Codex of Reuchlin, may I claim a corner for the following translation of a letter on that subject, which I have just received from the discoverer of the Codex—the learned and well-known Prof. Delitzsch, of Erlangen:—

"The importance of the Codex does not consist so much in its high antiquity, as in the facility which it affords for controlling the Erasmusian Text of the Apocalypse. Erasmus's Text is the foundation of the Textus Receptus, of Luther's translation, as well as of King James's version, and of most of the translations of the Churches which came into existence at the Reformation. Many passages, in which Erasmus misled Luther and the other translators, are now perfectly intelligible, and require rectification. Among others, the following may be quoted:—

"I. 9. 'I, John, who also am your brother.' This singular 'also' is owing to the misapprehension of a K (kappa), which in only trace the scissors have left of the word *Κεῖμενος* (text), following the *Ἐγὼ ὁ ὡνάμηνος*.

"XV. 3. 'Thou, King of Saints.' This 'of saints' is the Erasmusian interpolation of a bad

Vulgate reading, in which the abbreviation of 'Sanctorum' is confounded with 'Seculorum.' The Codex has 'King of the Heathen.'

"XVII. 8. 'The beast that was, and is not, and yet is.' This 'and yet is—though he is' rests on a non-Hellenic reading fabricated by Erasmus.

"XXI. 24. 'And the nations of them which are saved,' or 'of those which are saved.' In this reading the words of the commentator, Andrew the Cappadocian, are confounded with the genuine words of the Apostle.

"The Codex is of considerable importance as regards the history of the Text of the New Testament, affords an excellent and long-wished-for opportunity for the purification of the critical apparatus, and is a striking proof of the necessity of a thorough revision of the translation of the Apocalypse. The work upon which I am engaged is not an edition of the text of the Apocalypse, as in the Codex, but a critical edition of the Commentary of Andrew, and will, no doubt, be sincerely welcomed by the countrymen of a Tregelles, a Wordsworth and a Kelly, whose distinguished labours have more particularly benefited the text of the Apocalypse."

From the pen of Prof. Delitzsch an interesting exhibition of these corruptions of the text of the Apocalypse has just appeared, as a pamphlet, under the title 'Handschriftliche Funde.' D. NUTT.

HARAN OF THE BIBLE.

Nov. 27, 1861.

ABRAHAM, after he had been called from Ur of the Chaldees, tarried at Haran, or Harran, till his father Terah died, when he proceeded to the land of Canaan. (Gen. xi. 31, 32; Acts vii. 4.) The elder branch of the family still remained at Haran; which led to the interesting journeys thither described in the patriarchal history—first, that of Abraham's servant, to obtain a wife for Isaac (Gen. xxiv.); and next, that of Jacob, when he fled to evade the wrath of Esau. (Gen. xxviii. 10.) If Dr. Beke is correct in his surmise, that Haran is identical with Harran-el-Awamid, between the rivers of Damascus, all previous ideas of the geography of the Bible, regarding one of the earliest and most interesting events recorded therein—the emigration of Abraham from Chaldaea to Canaan—will be so utterly overthrown, that I do hope you will allow me to point out at least some of the difficulties involved in the question.

It is as impossible to say positively that Harran in Mesopotamia is the Haran of the Bible, as it is that Harran-el-Awamid represents that ancient city. The mere fact of going to the one or the other will not determine the question. I have been to Harran, in Mesopotamia, and am but little the wiser; if Dr. Beke goes to Harran-el-Awamid, and discovers a cuneiform or Hebrew inscription, recording that Abraham dwelt there and his father Terah died there, the question might be set at rest; but as it is, it is simply a question of comparative amount of evidence, and of common sense as applied to that evidence. We have, in the first place, the preservation of name, as dwelt upon by the Rev. Mr. Porter and by Mr. Vaux, in Dr. Smith's 'Dictionary of Greek and Roman Geography,' and in Kitto's 'Cyclopædia of Biblical Literature,' albeit that name was modified by the Greeks and Romans, into Karrai, Carrhae, Charran, &c.; we have the country between the two rivers, *per excellence*; we have the site of a large and important city, which Harran-el-Awamid (if, as is possible, a second Haran) does not seem to have been, and in which the Sabians had a temple dedicated to Abraham; we have extensive ruins of Carrhae of old, still standing upon a vast mound of ruin belonging to primeval times, and well worthy of archaeological exploration; and, lastly, we have local tradition, which, as dwelt upon in my 'Assyria,' p. 152, still preserves the memory of the patriarch's movements, where he tarried, where he crossed the Euphrates, and how he, and his followers and herds, found a resting-place at Bernea, now Aleppo. A mosque, at Urfa, still preserves the memory of Ibrahim-el-Khalil, "Abraham the beloved," (the designation of Ibrahim-sh-Shami is not used, at least in that part of

the East,) and, at its foot, is a reservoir, in which, to the present day, are fish, said to be sacred to the memory of Abraham, although, no doubt, revered from quite different associations. We have, also, another patriarchal site, Serag, afterwards Betne, and where are two colossal lions of Assyrian times, in the same neighbourhood.

Against this accumulative, albeit not positive, evidence, Dr. Beke adduces that "Harran being situated where 'it is now found to be,' Jacob's flight commenced in the eastern part of the plain of Damascus." This is begging the whole question, and implies a satisfactory determination of Gilead, which Michaelis ('Mos. Reicht.' i. 86.) says must be situated beyond the region sketched in our maps, and somewhere about the Euphrates. That Eliezer of Damascus should be described (Gen. xv. 3.) as one born in Abraham's house, presents as great a difficulty in regard to Harran-el-Awamid, as to Haran in Mesopotamia. The passage quoted by Dr. Beke from Acts vii. 2-4, and which establishes a difference between the land of the Chaldees and Charran, might be explained by supposing that a distinction existed between Ur in the land of the Chaldees, looked upon as Urfah, and Charran, which was a city of the Sabians; or that, according to Sir Henry Rawlinson, Ur was identical with Mugayir, on the Lower Euphrates, and to which territory the term Mesopotamia was then more particularly applied. But it would by no means establish that Abraham travelled all the way from Ur to the plain of Damascus before he reached Haran. The old statement is to the effect that the patriarch went forth from Ur of the Chaldees to Haran, and not from "the land of the Chaldees," as it was put in more recent times in the Acts. If Abraham went from Mugayir to Haran, near Damascus, he would not have had to cross the Euphrates at all.

The idea that Haran was in Syria, and not in Mesopotamia, is not new. Harduin believed that place to be Palmyra. The Helam of 2 Sam. x. 16, has been identified with Haran as belonging to the Syrians "that were beyond the river," and *ergo*, as in Syria. Judith (ii. 14) has also been quoted as proving that Mesopotamia was, on the other hand, in Syria. This from an error, however, easily rectified. Certain it is, that Jacob is clearly described, in Genesis xxix. 1, as proceeding on his journey to the people in the East. That was on his way to Haran. Could that have been said had he been going to the plains of Damascus? He is also said (Gen. xxviii.) to have been ordered to Padan-Aram, a portion of Aram Naharaim, "the land of the rivers,"—*universally* admitted, says a writer in Kitto's 'Cyclopædia,' to be Mesopotamia, "with the exception only of Mr. Tiltton Beke, who, in his 'Origines Biblicæ,' among many other paradoxical notions, maintains that 'Aram Naharaim' is the territory of Damascus."

I am ready to admit that there is no positive proof in all this. It would require, indeed, far greater space than you can be expected to place at my disposal to discuss a moiety of all the points of detail that are connected with the question. But I cannot help expressing a feeling, that if Dr. Beke thinks that he can decide it by going to Harran-el-Awamid, he should also, in justice to the advocates of the opposite view, go to Haran in Mesopotamia. I feel convinced that he, as well as others, would then feel the force of local traditions which he would meet with at almost every step, and that such would have due weight with him (when combined with a fair and common sense handling of critical and comparative geography) in ultimately affecting his opinion.

W. F. AINSWORTH.

FRENCH SURVEY OF THE ISTHMUS OF DARIEN.

63, North Cumberland Street, Dublin, Nov. 26, 1861.

I have lately learnt with great satisfaction that several French engineers, under the direction of M. Bonardiol, have made a partial exploration of the Isthmus of Darien, and are to sail for Darien again next month, to make a detailed survey of the line for a ship canal between the Atlantic and Pacific Oceans. There is thus at length a prospect of this grand project being carried into execution. The line about to be surveyed, which was discovered

by me in 1849, after several long and perilous explorations in different directions through the forests, extends from the Gulf of San Miguel on the Pacific, in a direction N.E. by E. & E. by compass, to Caledonia Harbour and Port Escocoes on the Atlantic. The Gulf of San Miguel receives numerous rivers, the largest of which are the Tuyra and the Savana, which unite together just before falling into it. The Savana is navigable for the largest ships up to the confluence of the Lara with it, that is, for 14 miles towards the Atlantic. From the confluence of the Lara with the Savana, at which point the future canal will commence, the line extends to the Chuquanaqua, a distance of 12 miles. From the Chuquanaqua the line follows the bed of the Sucubti, one of its tributaries, up to the confluence of the Asmati with the Sucubti, a distance of 9 miles; and then continues along the bed of the same river Sucubti to a point 9 miles higher up. From that point to the Atlantic the distance is 6 miles. The whole length of the projected canal will therefore be 35 nautical, or nearly 41 English miles.

After my first explorations in 1849, for which previous travels in the interior of British Guiana (Demerara, Essequibo, &c.), Spanish Guiana (Venezuela), and many other forest countries in both hemispheres had well qualified me, I made subsequent voyages to and explorations in Darien in 1850, 1851, and 1852, alone, and at my own expense. I then proceeded to Bogota, the capital of New Granada, where I applied to the Congress, who passed a law, granting a privilege for cutting the canal, together with a concession of all the lands necessary, and of 200,000 acres in addition, to Edward Cullen, Charles Fox, John Henderson, and Thomas Brassey. The above law received the *executur* of José Hilario Lopez, the President, and of José Maria Plata, the Secretary for Foreign Affairs, on the 1st of June, 1852.

Soon after my return to London with the concession, the Atlantic and Pacific Junction Company was formed with the object of carrying the project into execution. On the 29th of March, 1853, the Emperor Napoleon gave an audience to a deputation of fifteen, consisting of Sir Charles Fox, Mr. Brassey, several of the directors of the company, and myself, invited us to dine with him at the Tuilleries, and declared his determination to cut the canal, if it were practicable.

On the 17th of December, 1853, Mr. Lionel Gisborne, Messrs. Forde, Bennett, Devenish, Armstrong, and Bond, the company's engineers, and myself, sailed from Southampton in the West India mail steamer, Orinoco, for St. Thomas, whence the assistant engineers proceeded to Navy Bay and Panama, and thence to the Gulf of San Miguel and the river Savana, to survey the line from the Pacific towards the Atlantic side; whilst Mr. Gisborne and myself proceeded to Jamaica, in the Teviot, and thence, in H.M.S. *Espiegle*, to Caledonia Harbour, where we arrived on the 21st of January, 1854. In February and March, 1854, H.M.S. *Espiegle*, Commander Hancock, H.M.S. *Devastation*, Commander De Horsey, the French war-steamer, *Chimère* (*avis*), Capt. Jauréguiberry, and the United States sloop of war, *Cyane*, Capt. Hollins, lay at anchor in Caledonia Harbour; and H.M. steamer *Virago*, Commander Marshall, lay in the Savana River, with the object of affording assistance to the engineers. At the same time H.M. surveying ship *Scorpion*, Commander Parsons, was engaged in surveying the Atlantic harbours and coast for the Hydrographic Office. It may be necessary to state that no British, French, or American man-of-war had ever before anchored either in Caledonia Harbour or in the Savana River. During the above two months the line, from the Pacific to the point on the Sucubti, mentioned above as being 6 miles distant from the Atlantic, was surveyed by the assistant engineers, and found, so far, to present every facility for the excavation of a canal. But, of the 6 miles not surveyed, Mr. Gisborne, after a most cursory, hurried and imperfect reconnaissance in a wrong direction, reported that 3 miles would require to be tunnelled, although he admitted, in the same Report, that "his examination of the country was by no means complete." Upon this, the company,

deeming the presumed necessity for a tunnel a formidable obstacle, immediately dissolved, returning the shareholders the amounts of their deposits without any deduction.

Five months afterwards, however, the Admiralty published the 'Survey of Caledonia Harbour and Port Escocoes,' by Commander Parsons, of H.M. surveying ship *Scorpion*, in which a wide and low valley is plainly laid down immediately to the north-west of the mountain, which, according to Mr. Gisborne's Report, would render a tunnel necessary. The existence of that valley, which is marked in Parsons's 'Survey,' precisely in the position assigned to it by me four years before the Expedition went out, completely obviates the necessity for a tunnel. I repeatedly offered to guide Mr. Gisborne to it, and had accompanied the Expedition for that purpose; but that gentleman was actuated by so strong a desire to find out a valley for himself, and to mark out a line in a direction different from that indicated by me, that he not only refused me permission to accompany him, but gave directions that I was not to be allowed to leave the ship; so that I was actually a prisoner on board the *Espiegle* whilst Mr. Gisborne was "botching" my project. Having failed in his rambling and ill-directed attempts to find a valley between the range of mountains which runs parallel to the coast, Mr. Gisborne hastily "concluded his surveying operations on the 29th of March," and returned to London with his celebrated Report about the tunnel, which threw complete discredit on my statements. Fortunately for me, however, the Survey made by that distinguished officer, Commander Parsons, completely stultifies Mr. Gisborne's Report, and confirms the veracity and accuracy of my original statements as to the existence of the valley.

In 1857 the Emperor Napoleon carefully examined the maps, plans and documents which I submitted to him, and referred the question to a Commission of Engineers of the Corps Impérial des Ponts et Chaussées. The Report drawn up by that Commission, and presented to the Emperor by Count Walewski, was decidedly in favour of the practicability of the canal without a tunnel.

In 1859 I went again to Bogota, and on my return to Paris I had the honour, on the 30th of October, of a third audience with the Emperor, who declared his decided conviction of the feasibility of the canal, saying, that he could see no difficulty in it, and expressed his determination to cut it. I hope that the Expedition about to sail, the sending out of which may be considered as the first step towards the carrying out of His Majesty's determination, may conduct its operations in a scientific manner, and avoid the errors which proved fatal to the success of the Expedition of 1854.

E. CULLEN, M.D., M.R.C.S.E.

NOTES ON THE HISTORY OF PERSPECTIVE.

(No. VI.)

November 25, 1861.

Brook Taylor (died 1731, aged 46) was a *Sieur*—we call it a *Squire*—as well as Desargues: but not so easily disgusted by opposition. His name is a household word with mathematicians; of whom those who attend to biography would be interested to know whether the *gens* of Taylor of Bifrons still exists, and in what relation the present head stands to Taylor of Taylor's Theorem. I think I have heard that the late Sir Herbert Taylor was of this race. Taylor left a daughter, whose son, Sir William Young, printed an account of his ancestors in 1798 for private distribution. As Sir W. Y. was not an entire worshipper of his foregoers, but gave a dash of satire to their weak points, we may probably trust his account when he says that Taylor's early paintings do not need the allowance made for amateurs, but will bear to be judged as the works of an artist. He was also an excellent musician, and a fine—we now say accomplished—gentleman.

I cannot give any full account of the previous history of Perspective in England: nor does it fall within my plan to do so, as no originators can be named, no ordinarators of specious figments, as Viator said. I find that the *Practical Perspective*

of Joseph Moxon (London, folio, 1670) comes between a translation of Serlio in 1611, and a reprint with translation of Pozzo in 1707: and I suspect that this is the epitome of the most important facts previous to the publications of Taylor. John James's edition of Pozzo is a splendid specimen both of typography and engraving. All that has any relation to the subject in the 'Catalogue of the most vendible books in England,' 1658, which has been attributed, with little reason, to Thomas Guy, may be seen in the following extract, of which I leave the spelling uncorrected:—
 "Shinerli Ars nova delineandi—Fundamentum Opticum. Vignola, the Compleat Architect.... English, 8vo. The same Latin, folio. The following works of Architecture, all folio: Parrallele de Architecture; Vitruvius; Sebastian Shirley (Serlio); Hans Blooms. S. Colloms; And. Poladio; Albrecht Duer; Ving boon."

Joseph Moxon (born 1625), author of more than a dozen creditable works, was an original, as any one may see, if not with half an eye, at least with two-thirds, for he always spells the word *eye* without the second *e*: and he managed to make the printer follow him. He says that nothing but the translation of Serlio had been published in England. His book is an excellent performance on the basis of the points of sight and distance; with various curiosities. His title is as follows:—

"Practical Perspective: or Perspective made easie. Teaching, By the Opticks, How to Delineate all Bodies, Buildings, or Landscips, &c. By the Catoptricks, How to Delineate confused Appearances, so as when seen in a Mirror a Pollisht Body of any intended shape, the reflection shall shew a Designe. By the Dioptricks, How to draw parts of many Figures into one, when seen through a Glass or Chrystal cut into many Faces. Usefull for all Painters, Engravers, Architects, &c. and all others that are any waies inclined to Speculatory Ingenuity. By Joseph Moxon, Hydrographer to the King's most Excellent Majesty. London: Printed by Joseph Moxon, and sold at his shop in Russell Street, at the sign of Atlas. 1670."

The last treatise before Taylor was that of Humphry Ditton in 1712, a small work. Ditton, anything in Swift to the contrary notwithstanding, was an able man: but though he could quote Vitruvius and Tzetzes as to ancient points, he mentions no modern except Pozzo. And he demands calculation from the draughtsman, on certain occasions: one of our time would stare at being asked to find a point on the picture by help of a square root.

It is important to remember that Taylor published two different works; not two editions of one work. To enable the reader to know which he possesses, I give the full titles of both:—

"1. Linear Perspective: or a new method of representing justly all manner of objects as they appear to the eye in all situations. A work necessary for Painters, Architects, &c. to judge of, and regulate designs by. By Brook Taylor, LL.D. and R.S.S. London: Printed for R. Knaplock at the Bishop's Head in St. Paul's Churchyard. mdcxcv. (8vo. pp iv + 42, plates 18). 2. New Principles of Linear Perspective: or the art of designing on a plane the representations of all sorts of objects, in a more general and simple method than has been done before. By Brook Taylor, LL.D. and R.S.S. London: Printed for R. Knaplock at the Bishop's Head in St. Paul's Churchyard. mdcxcix. (8vo. pp xvi + 70, plates 13)."

Colson reprinted the second work in 1749, and called it the *third* edition. Hachette mentions a French translation of 1757, which I have never seen. It is often thought that Joshua Kirby's work is a reprint of Taylor's, because its title is 'Dr. Brook Taylor's Method of Perspective': this, as the author says, is "out of gratitude"; I suspect Taylor would not have thanked him.

What reading Taylor had on the subject cannot easily be gathered, except as it may be surmised from his general character. He names no man alive or dead except Newton as to light and colours; and the only taste of foreign in the whole book is the information that the Italians call light and shadow by the name of *Chiaroscuro*. In one and the same year, 1715, he produced the book on Perspective and the famous *Methodus Incrementorum*, which contains his theorem. He was then but thirty years old. I take it to be exceedingly probable that Taylor never troubled himself to read on the subject, to any extent which can by stretch of fancy be called erudition. An artist from early youth, he had of course become possessed of some rules; and rules, in a mind like his, generate principles. Possibly, when he came to read, he found it easier to go on with the velocity acquired than to wait for his author's propul-

sion. The exceeding newness and freshness of his combinations lend force to this supposition.

Taylor did nothing after 1721; those who look at Sir W. Young's account, or at the *Penny Cyclopædia*, will see the reason of this cessation, and one of the probable causes of his early death. There is, at this distance of time, something grotesque in a name which, even as it is, must be repeated in every language to which civilization finds its way, being deprived of its growth because the owner married a wife, whose fortune his father did not think duly proportioned to the measure of Kentish importance which the husband was one day to inherit.

It is very commonly said that Taylor was the first who conceived the idea of vanishing points out of the horizontal line. This, as we have seen, is not true. Many, I dare say, have thought that he was the first who divided every line whatsoever in a given ratio perspectively: this also is not true. But no one that I know of has given him what, so far as I can make out, is peculiarly his: the conception and use of the *vanishing line*, which stands to parallel planes in the same relation in which a vanishing point stands to parallel lines. Until contradicted by evidence, I shall hold that this was Taylor's especial part in the matter: and it is certainly what he claims. Observe that, in the following passage, he distinctly asserts his having put all planes on the footing on which till his time only horizontal planes had stood: while he does not make any claim to anything which has been given to others in the preceding notes:—

".... I found it absolutely necessary to consider this Subject entirely anew, as if it had never been treated of before: the Principles of the old Perspective being so narrow and so confined, that they could be of no use in my Design: And I was forced to invent new Terms of Art, those already in use being so peculiarly adapted to the imperfect Notions that have hitherto been had of this Art, that I could make no use of them in explaining those general Principles I intended to establish. The term of Horizontal Line, for instance, is apt to confine the Notions of a Learner to the Plane of the Horizon; and to make him imagine that that Plane enjoys some particular Privileges, which make the Figures in it more easy and more convenient to be described, by the means of that Horizontal Line, than the Figures in any other Plane; as if all other Planes might not as conveniently be handled, by finding other Lines of the same nature belonging to them. But in this Book I make no difference between the Plane of the Horizon, and any other Plane whatsoever; for since Planes, as Planes, are alike in Geometry, it is most proper to consider them as so, and to explain their Properties in general, leaving the Artist himself to apply them in particular Cases, as Occasion requires."

Taylor's merits appear to me to be—1. The conception and use of the vanishing line. 2. The systematic introduction of all kinds of vanishing points into use. 3. The excessive simplification of the perspective division, by the connexion of it with the vanishing plane. 4. The junction into system of the results of Ubaldo and Desargues, and all others who had given results. 5. The presentation of the whole under a geometrical form which geometers at least could read. 6. The creation of the subject in England, which had always been far behindhand. Any one of these points would have made the character of a book. I lay much stress on the fourth: genius is never more truly at work upon its own proper duty than when it is combining the separate things of which nothing but genius can see the connexion. *Novum tulit punctum qui miscuit antiqua antiquis* (not Horace).

The artists of the time would not read Brook Taylor's first book, because it seemed to deal more in geometrical propositions than in the description of instances, cubes, solids, buildings, &c. To meet this objection the second book was published, which looks more like the older ones in the particular objected to. But the artists read the second no more than the first: the fact is, that then, as now, few had the slight amount of elementary geometry requisite for the acquisition of perspective; and they wanted the merest routine directions for their usual cases. Mr. Ruskin's recent book is, in structure, a return to the method of Taylor, so far as it breaks up the subject into its elements. I suppose that Taylor reinvented the method of perspective division. Nobody of his time must, without proof, be held to have seen a work of Desargues, or of Bosse. It is indeed

possible that some work of the seventeenth century may have contained the result, though not likely. This is one of the points which must be left open for further research.

Joshua Kirby is better known than Taylor. The first edition was published in 1754: it was furnished with a new title and an appendix in 1755, and called the second edition. There was another edition in 1768. It is a return to the old plan of writing, with considerable adoption of Taylor's generalizations: but, as I have said, Taylor would not have thanked Kirby. According to Watt, Kirby (who is *John* Joshua both in Watt and Chalmers) published in 1757 some strictures upon the then recent translation of Sirigatti by Isaac Ware, maintaining the superiority of Taylor, which I presume Ware had contested. I mention this tract because I never heard of it otherwise, and it is not in the British Museum.

Kirby's Treatise is noted for the frontispiece by Hogarth, a ludicrous plate purporting to set forth the errors to which those are subject who draw without attention to perspective. Nothing can be further from the point: but if any one would draw another picture which truly represents absence of all notion of perspective, the two put together would be the best sermon on the distinction between sins of ignorance and sins against light and knowledge that ever was made. Hogarth's picture is a masterpiece of successful crime, made to represent unconsciousness of the difference between right and wrong.

I should be glad to see a republication of the two works of Taylor, the second *emptied* into the first, with sufficient notes. There are now geometers enough spread about to relish such a work: and the young artists would soon become aware, if a really good geometrical book on Perspective were published, that they must not allow the external world to get ahead of them in the graphical principles of their own pursuit. A good geometrical beginning is especially wanted, as leading the way to a sound discussion of the manner in which Art must break rules for its own higher purposes. For the eye is not a point; and a large picture requires certain modifications of rule in extreme cases. But no two persons are fit to discuss these cases, except upon true geometrical perspective as a starting-point. Nothing could beat the geometry given by Taylor, which wants very little additional explanation. The late Peter Nicholson, who to sound mathematical knowledge added immense experience of practice, says of Taylor's works that "although mere pamphlets they contain all the elementary knowledge necessary on the science of Perspective." This I have always thought, though not knowing until lately that I could produce so weighty an opinion of our own time.

I now conclude these Notes. I have given what may be definitely augmented, corrected, or opposed: those who have access to books which I have not seen may be able to reinforce some of my statements, and to amend others.

A. DE MORGAN.

THE UNIVERSITY OF NAPLES.

Naples, November 21, 1861.

ON the 18th of this month, the Royal University of Studies in Naples was opened to the youth of Italy. After having been reduced to a nullity by the Bourbons, an institution scantily provided with professors, some of whom were utterly incompetent and chosen entirely for their servility, whilst others, who were able men, were afraid to discuss any subject with independence, the University of Naples has been re-opened with a fair list of professors of acknowledged merit, who will attract to this ancient city young men of talent from every district in the Province. There are, I perceive, five Faculties, viz., of Philosophy and Literature, Jurisprudence, Mathematics, Natural Science, Medicine,—embracing almost every subject of human inquiry. Amongst the subjects enumerated are many which were prohibited under the late dynasty, or were necessarily treated with such limitations as to discourage and disgust Professors, and leave the minds of students sterile. As an

instance, I may speak of Geology, which was formerly under the care of Cavalier Sacchi, a name well known to science, now Professor of Mineralogy. The reason of his confining himself to the latter subject was originally, as I can tell you from his own lips, that he was restricted in the mode in which Geology was to be treated. All new theories were watched with a jealous eye by the priests, who had anticipated the investigations of science and laid down the system to be taught. The present able Professor of Geology, Signor Guiscardi, was, when I knew him first, under the ban, scarcely tolerated in Naples, and contending with many difficulties for existence. Giuseppe Fiorelli, Professor of Archaeology, was only saved from a prison by the late Count of Syracuse, who, to his honour, employed him as his secretary, and when his residence was no longer possible here, himself took him on board the steamer which bore him to a more friendly country. Bertrando Spaventa and Emilio Scubiani, the one Professor of the Philosophy of Law and the other Professor of Philosophy, were long in exile, whilst Cavalier Seticulbrini, Professor of Italian Literature, was, within my recollection, condemned to death, and saved by the paternal mercies of an "adored sovereign, more father than king," to linger out many years in an *ergastolo*. In the same way, I might give you short histories of many other men who now occupy and adorn Professorial Chairs in our University, and whose very names are so many protests against a dynasty which loved darkness rather than light, and existed only by cramping the intellect. Altogether, there are fifty-six Professors attached to the University, most of them known to science—many of them schooled in adversity. I have remarked on the qualifications which recommended a Professor to the Bourbons; and when, by chance, any man of merit was continued as a public instructor, I have pointed out prohibitions which were imposed on him, directly or indirectly, in the proper development of the subject on which he was called upon to treat; but I have said little of pupils. Let me add a word or two, then, from incidents and facts of which for many years I was an attentive witness. Fearing the reunion of any body of men, more especially of young men of ardent minds, it was the policy of the Bourbons to drive them from the capital, and they did so by affecting to encourage the provincial Lyceums, and by throwing every obstacle in the way of students anxious to come up to Naples. I remember one case, and it was not an exception, of a young man who was desirous of coming up here to finish his studies for the medical profession. But he could not move without the sanction of the local police authorities, confirmed by the Intendente, and finally approved by the central authorities. A year passed away, and the sanction was still withheld; the young man became learned in the evolutions of the *ballerine*, and finished up with being a worthless debauchee. This case I knew well, because application was made to me for counsel or assistance; but it was the history of the whole generation from 1848 to 1861, and a retributive Providence converted the men whom the Bourbons had done their utmost to ruin into being their scourges. To return to the Lyceums: the Professors were men of inferior intellect, and the students, baffled in their strongest wishes, were careless of improvement. Of what use was learning to them? So reasoned many of the more promising of the youth of Southern Italy; in Naples, too, where the Professors were for the most part time-servers, or incapacitated from giving free instruction, the attendance fell off to one-tenth of the numbers who once crowded the University, and those who did attend were registered in the police books, and almost literally treated like small boys, whipped and put to bed at an early hour by a sbirro. The wonder is that the people of the Neapolitan province are as they are; but I can have no hesitation in saying that the present generation in point of acquirement is greatly inferior to the last. Better days are now in prospect, and if the political difficulties which still avowedly exist can be got over, if kind and generous allies do not contrive to smother the rising fortunes of

Italy with too much affection, an impulse will be given to the mind of Italy which it has not felt for ages.

H. W.

OUR WEEKLY GOSSIP.

THE warmest partisans of poetical justice must begin to feel satisfied with the misfortunes rained down on those who have had art and part in what Mr. Disraeli calls "that unfortunate book—the Essays and Reviews." Of the publishers, the first, it is remarked, is dead, and the second has had his house burnt down. Of the writers, one is dead; a second has lost the whole of his private fortune; a third is under prosecution by his bishop; and a fourth, Prof. Jowett, has just failed to obtain the remuneration due to him as Regius Professor of Greek. We have not heard of any divine or other catastrophe at Rugby; on the contrary, we hear that the school is more popular and prosperous than ever. But there is always time for the marvellous to happen. The rejection of the statute to pay Prof. Jowett the wages of his labour is far from creditable to the University—the rejection having been made on grounds altogether foreign to those which properly concern the teaching of Greek.

The Kensington vestry have petitioned the committee of the Privy Council on Education for aid in improving the approaches to the Great Exhibition. The Chelsea vestry had an interview yesterday (Friday) with the Metropolitan Board of Works, on the same subject. We are glad to see the great bodies taking up this important work; and we trust that, either with or without aid from the Royal Commissioners, they will succeed in effecting their purpose.

For some months past we have heard rumours of dissensions among the Trustees of the Soane Museum. We now hear of the sudden resignation of two of these Trustees, Mr. Jones and Mr. Tidd Pratt, a resignation which cannot, and need not, be concealed from the public. What this act may mean, we do not pretend to understand; but it is obvious to every one familiar with the working of the Soane Trust that great reforms are needed in the management of the Institution in Lincoln's Inn Fields. The powers claimed by the life trustees, as opposed to those exercised by the representatives of great public bodies, is in itself a fertile source of discord. The only real cure for the evils inherent in the constitution of the Soane Trust is a new Act of Parliament, with a better definition, and a more liberal direction, of its powers.

Warwickshire is stirring in good earnest on behalf of the Shakespeare Fund. At Birmingham an influential committee has been formed, chiefly through the exertions of Mr. A. Ryland, the late mayor. Sir Robert Hamilton, Bart., of Avon Cliffe, near Stratford-on-Avon, acts as Local Secretary for Stratford and neighbourhood, assisted at Leamington by Dr. Thomson, and at Warwick by Mr. R. C. Heath.

Mr. Montgomery Martin is preparing from official papers an account of the dependencies of Great Britain, under the title of 'India and the Colonies: Present State and Prospects.'

We are requested by Mr. Van Voort to say that a cancel of four pages having been printed to complete the third edition of Yarrell's 'History of British Fishes,' edited by Sir John Richardson, those who possess this edition may obtain these pages through the bookseller who supplied them with the work.

A change has been made in the cast of 'The Octoroon,' which strengthens the play—now running more freely than at first. A question of Mr. Boucicault's claim to any considerable share in the merit of authorship has arisen, and a mass of evidence has been placed in our hands against that claim. This evidence suggests the unpleasant inference that what Mr. Boucicault put forward at the Adelphi Theatre as the result of his own experience and observations in Louisiana is derived in substance and in spirit from Capt. Mayne Reid's story of 'The Quadroon.' "Octoroon," it is urged, is but a colourable alteration of "Quadroon." Zoe is Aurore, Dora is Eugénie. The change introduced into the story, by means of the poisoning, is not a

happy effort of art. One who knows the life of Louisiana assures us that the scenes introduced into 'The Octoroon' originally, or from some other source than 'The Quadroon,' are so unlike the real life of that country as to suggest the idea that Mr. Boucicault has found his original on the stage of New Orleans, not in the plantations. The captain of the Mississippi steamer, we are assured, is a very gross caricature; the original being as well-dressed, well-bred, *débonnaire* a gentleman as the captain of the Quirinal or the Alhambra. The French planters of the coast are not less vilified, we are told, in 'The Octoroon.' In dress and manners the real men resemble their countrymen on the Boulevards and the Rue Rivoli. These points have an appearance of supporting the charge made against Mr. Boucicault, that he has adopted without permission or acknowledgment the work of a literary brother; but our readers know that appearances are often extremely misleading; and it would be unjust to condemn Mr. Boucicault until he has had, and neglected, the opportunity of justifying his acts. As the case now stands before the public, Capt. Mayne Reid appears in the position of a man of letters who has suffered a literary wrong. Can Mr. Boucicault show that the wrong is unsubstantial?

The University of Tübingen has conferred on Mr. Leone Levi the degree of Doctor of Economical and Political Sciences.

Messrs. Trübner & Co. have been appointed by the Commission in Florence as London agents for the 'National Edition of the Works of Dante Alighieri.' The first volume is expected to appear early in the ensuing year.

Prizes to the amount of 20l. were recently offered by Mr. Benson, of Ludgate Hill, to the various Schools of Art throughout the kingdom in connexion with the South Kensington Art-School, for designs for watch-ornamentation. The Inspector-General has just notified "that none of the designs which have been received are of a character to merit the full prize in any one of the three classes into which they were divided; he has, however, made the following awards:—Two guineas to Mr. R. F. W. Liddle, Durham School of Art; two guineas to Mr. W. A. Boon, South Kensington School; two prizes of three guineas and one guinea respectively to Miss Annie Wharry, Charterhouse School, and two guineas to Mr. George O. Blacker, of Wolverhampton School.

Two portraits of distinguished characters have recently been added to the National Portrait Gallery. John Wesley (painted by Hone), when he was sixty-three years of age. He is represented life-size to the knees, in his own brown, flowing hair, preaching in the open air, at the foot of a tree. He wears a black gown, with bands; his right hand is raised; the left firmly grasping the Gospel. His calm attitude contrasts strikingly with that of his contemporary and associate, Whitfield, as seen in the picture purchased for the Gallery a few months ago. The second portrait added during the recess represents Sir Richard Arkwright, well known from engravings, and the picture which Arkwright himself presented to Dr. Darwin, in acknowledgment of the testimony which he had given in favour of Arkwright's invention. The portraits of the two friends, both by Wright, of Derby, are placed side by side. The pictures in the Gallery are now seen to better advantage, as the walls have been more richly coloured, and the bare wooden floors and furniture have been covered with carpets and cloths of tints no longer injurious to the pictures themselves. The portraits are now becoming very crowded, and bid fair soon to rival the Royal Academy in the manner in which pictures are over-lapped and squeezed together. Many have been lowered to touch the floor; but, in these narrow rooms, it appears that the best lights are obtainable at this level.

The poet's vision of the magic belt encircling the globe is in a fair way of being realized. Intelligence has arrived of the completion of the last link of the American telegraph, connecting Cape Race with the Golden Horn, traversing nearly 5,000 miles, with one continuous wire, and bringing these two points within two hours' telegraphic time of

one another. The next westward extension of the line will be by the way of Behring's Straits to the mouth of the Amoor river, to which point the Russian Government is already constructing a line commencing at Moscow. San Francisco is now at the end of the longest telegraphic line in the world:—70 degrees of longitude—St. John's, Newfoundland, being in 52° 43' long. W., Greenwich, while San Francisco is in 122°. The news which starts from Newfoundland at 4 o'clock in the afternoon will reach the Pacific coast about half-an-hour before noon of the same day.

Sir John Franklin will not be one of those who have extended the renown of England without due appreciation for distinguished services. The Government has commissioned Mr. Nash to execute a full-length statue of the illustrious navigator, to be placed in Trafalgar Square; and Lincolnshire, Sir John's native county, has done itself and him honour by erecting a statue of him in Spilsby, the town of his birth. This statue was inaugurated on Tuesday last by Sir John Richardson, Franklin's old companion in his famous Arctic explorations, who delivered an appropriate address. The statue, which is in bronze, was executed by Mr. Bacon, the cost being defrayed by subscriptions from the relatives and friends of Sir John Franklin. Lady Franklin was at great pains to insure a faithful likeness; and we are enabled to state that Mr. Bacon has perfectly succeeded in carrying out Lady Franklin's wishes.

A card with "Mr. Charles Mathews at Home" on it, has a humorous and pleasant look. Many persons have asked, "Why Mr. Mathews did not, like his father before him, entertain his friends, the Public, at Home?"—and he has answered by appearing at Her Majesty's Concert Room, in the character of a Monologist, with a budget of Reminiscences belonging to his own life. The programme was inaugurated on Monday, and, though susceptible of many improvements, showed so much merit and promised so much more that it was warmly received. Strange to say, Sir Charles Coldstream was so nervous that the lecture suffered from his anxiety, and will evidently be better delivered on future occasions. The matter of the entertainment is of a higher class than usual, and contains more than one character which nobody but Mr. Mathews could personate. We may mention the Neapolitan expounder of Ariosto, and the Italian street-preacher. In both these Mr. Mathews pronounced the Italian with as much fluency as his own language. He had previously sung a song in French, *à la Perlet*, with national gesture and emphasis, true to the very life. In these impersonations he will distance competition. Mrs. C. Mathews is associated with her husband in the exhibition, and assumes several parts in costume with characteristic vigour. The Fag at Merchant Taylors', the English Lady's-Maid in Italy, the irate Bethnal Green Housekeeper, who refuses to pay the District Surveyor's fee, and the Yankee Gal, were embodied with a distinctness of outline and a force of humour that went direct to the mark. Mr. Mathews's entertainment is divided into two parts. The first relates to his journeys in Italy and Scotland, and is entitled the "romance" of his life; the second to his managerial and theatrical experiences, and is entitled its "reality." He describes his arrest and incarceration in Lancaster Castle, and represents the treatment of debtors there as disgraceful to a civilized country. The lecture is illustrated by scenes painted by Mr. O'Connor from sketches made by Mr. Mathews himself on the several spots they represent, which are really well executed, and will aid considerably in securing popularity for the entire entertainment.

Mr. Charles Dickens, a few years ago, advocated the hanging of criminals in private—in the presence of proper functionaries,—and the Bishop of Oxford introduced a Bill into the House of Lords to make such executions legal. The idea, lost to us, has been adopted in Munich. The last public execution in Bavaria—so, at least, it is hoped and expected—took place a few days ago. "As for capital executions," says Bacon, "men need not to be put in mind of them; yet are they not to be

neglected." By the new laws, from the 1st of July, 1862, capital punishment, in Bavaria, is to be inflicted with closed doors, in the presence of certain officials, of the criminal's advocate, and of twenty-four citizens, as witnesses. So much has been written for and against public executions in England, that many will be interested to hear of this measure, and curious as to the efficacy of its workings. There is something still stranger connected with capital punishment in countries where the Lottery exists—the habit of staking on numbers connected with the criminals and their victims. In Prague, the other day, a father, aged 43, and 4 of his children, were murdered, and their bodies were found on the 28th of October. Consequently, everybody put into the Lottery on the numbers 28, 4, 43, and, what rarely happens, all three numbers came out. It is said that no less than 300,000 florins (30,000*l.*) were won on those very numbers. As a crowning point in this series of coincidences, the Lottery in Bavaria is to come to an end just six months before the adoption of capital punishment in private. The Liberal party has won the victory that so long seemed doubtful, and finally effaced gambling from the resources of the State.

A Correspondent writes:—"I see that the authorities of the British Museum declare that a recent announcement, that readers must be prepared to produce their tickets on demand, and to strictly observe the rules for renewing them, has been issued without their sanction. Whether a Napoleonic policy of airing a projected measure by unofficial announcements has been decided on, I know not; but perhaps few readers who have observed the signs of the times would be surprised to find that the author of this now-repudiated statement had, after all, an inkling of coming events. We have had lately a succession of such warnings. A conspicuous notice has forbidden us to peruse in the Reading-room publications not belonging to the Library; we have been publicly and officially charged with not keeping silence; and other intimations more painful have for some time been staring us in the face. The propriety of these various public notices I do not question; but it has become impossible for a reader not to suspect that our rapidly increasing number is rendering us unmanageable, and compelling the Trustees, like the Poor-Law Reformers, to adopt severer tests and to administer their literary assistance in a somewhat less palatable form. How, indeed, can it be otherwise? There are readers old enough to remember the days when fourteen or fifteen students, in the little apartment which then did duty for the Reading-room, was considered a full muster. From that we came to a larger room; from that to two small rooms; thence to two rooms each as big as a church, and, finally, we removed to Mr. Panizzi's magnificent dome, with its luxurious accommodation for some three hundred and fifty persons. Even this, however, is already outgrown. I have heard that as many as forty new readers sometimes sign the books in one day; and I believe that it is not uncommon to have more than five hundred actually attend on a Saturday. To find a seat is of course frequently impossible; and, doubtless owing to the great pressure upon the assistants, readers (as I can testify) are sometimes kept a full hour waiting for a book. It is obvious that these are evils which are progressively increasing, and for which, sooner or later, some remedy must be found. I could suggest that it is time to consider whether some attempt cannot be made to render the Library less attractive to merely idle or objectless readers. The maintenance of such an institution at the expense of the State can only be defended on the ground that it secures to the public important advantages which could not be as well provided by private enterprise. As a depository of our national literature, and a guarantee that one copy, at least, of every publication issued from the press will be preserved for public use, no one who knows the labour of collecting copies of the publications of the past will be disposed to underrate the value of our great Library; but books which can easily be obtained elsewhere ought not to be supplied to readers. While the law compels authors to furnish gratuitous

copies of their works, the Museum surely ought not to attempt to rival the neighbouring establishment of Mr. Mudie. I am strongly of opinion that justice and sound principle require that books should not be available, without special reasons given, until an average term of copyright had expired; but even a step in this direction would be beneficial. It might be fairly assumed, for instance, that all works published during the last ten years could be easily obtained by purchase or by a small subscription to a private library. The principle is already conceded in the case of newspapers, which are, I believe, never entered in the catalogue until four years old, the only reason, of course, being that files may always be consulted elsewhere. I will undertake to say, that even the banishment from the Reading-room of recent school and university books, and law reports—not to speak of long rows of reviews and magazines—would speedily reduce our numbers, and perhaps render henceforth impossible the spectacle which I lately saw of an eminent historical writer gazing wistfully at the convenient seat of a young gentleman who had dropped asleep over a volume of Miss Strickland's 'Queens.'

FRENCH GALLERY, 120, Pall Mall.—The NINTH ANNUAL WINTER EXHIBITION OF CABINET PICTURES by living British Artists, is NOW OPEN daily, from Half-past Nine to Five.—Admission, One shilling.

ROHMANN HUNT'S Great Masterpieces of Sacred Art "BEHOLD! I STAND AT THE DOOR AND KNOW" specially valuable as the highest most complete expression of the genius of this eminent English Painter, is NOW ON VIEW at the GERMAN GALLERY, 188, New Bond Street, prior to its being returned to its private possessor, and final exclusion from public exhibition altogether.—Admission, Staircase, from Ten to Five. A perfect light insured at all times.

M. ROBIN, the French Wizard, will give at the EGYPTIAN HALL his SOIRÉES FANTASTIQUES, consisting of a New Series of Magical Illusions, Every Evening at Eight (Saturday excepted), and Wednesday and Saturday Afternoons at Half-past Two.—Admission, 1*s.* and 2*s.*; Stall Chairs, 3*s.*; Balcony, 5*s.*—Tickets at Mr. Mitchell's, 33, Old Bond Street; the principal Libraries and at the Hall.

SCIENCE

ROYAL.—Nov. 21.—Sir B. C. Brodie, Bart., President, in the chair.—The following papers were read:—"On some Varieties of Tannin,"—"On Larixinic Acid, a Crystallizable Volatile Principle found in the Bark of the Larch Tree (*Pinus Larix*, Linn.), by J. Stenhouse."—"On the Great Magnetic Disturbance of August 28 to September 7, 1859, as recorded by Photography at the Kew Observatory," by Balfour Stewart, M.A.—"On the Aquiferous and Ovoidal System in the Lamellibranchiate Mollusks," by G. Rolleston, M.D. and C. Robertson.—"Notes of Researches on the Polyanmonias, No. XVI. Triatomic Ammonias, No. XVII. Mixed Triammonias, containing Monatomic and Diatomic Radicals, No. XVIII. Tetrammonium Compounds," by Dr. Hofmann.—"On the Lead-Zinc and Bismuth-Zinc Alloys,"—"On some Gold-Tin Alloys," by A. Matthiessen and M. Von Bose.—"On the Sensory, Motory and Vaso-Motory Symptoms resulting from the Refrigeration of the Ulna Nerve," by Dr. A. Waller.—"Note on the Oxidation and Disoxidation effected by the Peroxide of Hydrogen," by Prof. B. C. Brodie.—"On the Contact of Curves,"—"On the Calculus of Functions," by W. Spottiswoode.—"On the Action of Hydriodic Acid upon Mannite," by J. A. Wanklyn and Dr. Erlenmeyer.—"The Lignites and Clays of Bovey-Tracey, Devonshire," by W. Pengelly.—"The Fossil Flora of Bovey-Tracey," by Dr. Oswald Heer.

GEOGRAPHICAL.—Nov. 11.—Sir R. I. Murchison, V.P., in the chair.—Mr. Galton read a paper 'On the Expedition to the Upper Yang-tee-Kiang, in China,' by Lieut.-Col. Sarel, of the 17th Lancers, who was accompanied by Capt. Blackiston, Dr. Barton, and an American missionary.—Capt. Cameron, late Consul at Poti, in the Caucasus, read 'Notes, Geographical, Ethnological and Statistical, from the Caucasus.'

Nov. 26.—The Earl De Grey and Ripon in the chair.—Mr. Galton read a paper, by Mr. MacDougall Stuart, describing the last Expedition he had made in exploring the interior of Australia.—Mr. R. Dalrymple read a paper 'On Queensland,' showing that the land which had a few years ago

been nothing but a waste, was now a thriving and fertile colony.—The last paper read was from the Governor and the Bishop of Western Australia, respecting the Expedition of Messrs. Deasgaster, which penetrated into the interior, east of Perth.

GEOLOGICAL.—Nov. 20.—Sir R. I. Murchison, V.P., in the chair.—Messrs. C. Sanderson, H. Worms, R. Tate, J. R. Eddy and H. Dennys were elected Fellows.—The following communications were read:—‘On the Bovey Basin, Devonshire,’ by J. H. Key, Esq.—‘On two Volcanic Cones at the Base of Etna,’ by Signor G. G. Gemmellaro.—‘On some Fossil Brachiopoda of the Carboniferous Rocks of the Punjab and Kashmir, collected by A. Fleming, M.D., &c., and W. Purdon, Esq., F.G.S.,’ by T. Davidson, Esq.

ASIATIC.—Nov. 23.—Lord Strangford, President, in the chair.—A. Russell, Esq., M.P., and C. Wells, Esq., were elected Resident Members, and Prof. Max Müller, with Dr. J. R. Ballantyne, were elected Honorary Members.—At this, the first Meeting of the Session, a paper was read by O. De Beauvoir Prieux, Esq., ‘On the Indian Embassies to Rome, from the Reign of Claudius to the Death of Justinian.’

ANTIQUARIES.—Nov. 21.—Earl Stanhope, President, in the chair.—G. Stephens, Esq., Professor at the University of Copenhagen, was elected a Fellow.—D. Bruce, Esq. exhibited an urn and a celt stated to have been found in Ireland.—W. Tite, Esq., M.P., V.P., exhibited a stamp inscribed c. H. CRESCENTIS, and a steel ring of early sixteenth-century work, engraved with the letter I.—W. L. Lawrence, Esq. exhibited the impression of a seal of Gaufrid Pourcell, the last Abbot of the Monastery of St. Peter, Mauléon (1317 circa), on which C. Knight Watson, Secretary, communicated some remarks.—Mrs. Mayle exhibited the impression of a seal of Beatrice Domina De Torp.—C. F. Angell, Esq. exhibited his warrants for the committal to the Tower of—Stafford, Envoy to the Court of Spain (June 24th, 1690), and of George Villiers, Duke of Buckingham (December 19th, 1686). On these warrants the Secretary communicated some remarks.—A. W. Franks, Esq. communicated a letter from M. Troyon on some recent excavations in the Canton du Vaud.—C. Reed, Esq. exhibited a document (printed in Morant’s ‘Colchester’) on the refounding of the guild of St. Helen’s, Colchester, with remarks.—The Secretary laid before the Society the transcript of a letter in the Library of Corpus Christi College, Oxford, dated Rome, June 11th, 1667, and written by F. Parry, of C.C.C. College, to Dr. Paris, of the same College. The letter contained some curious particulars on the death of Pope Alexander VII., and on the election of his successor. These particulars received ample illustration from Octavius Morgan, Esq., V.P.—W. L. Lawrence, Esq. presented and exhibited a photograph of the principal votive crown included among five which have recently come into the possession of the Queen of Spain, and which were found near Guarrázar. Nine crowns of a similar nature were deposited three years ago in the Maison Cluny, at Paris. On this photograph the Secretary communicated some remarks, which he followed up with the official Spanish account of their discovery, an account differing as materially from the previous accounts as they did from each other.

ROYAL SOCIETY OF LITERATURE.—Nov. 27.—J. G. Teed, Esq. in the chair.—The following gentlemen were elected Members:—J. O. Roe, F. W. Madden, J. A. Horne, and M. Farrow, Esqrs.—Mr. Vaux read extracts from Letters and Journals of D. E. Colnaghi, Vice-Consul of Missolonghi, giving an interesting account of a tour recently made by him through parts of Acarnania, with some details relative to the ruins of the ancient city of New Pleuron.—Mr. Vaux also called the attention of the Society to a work just published by C. Simonides, containing *fac-similes*, translations, &c., of what purport to be portions of the Gospel of St. Matthew, and of the Epistles of St. James and St. Jude, written on papyrus of the first century, and now in the museum of Joseph

Mayer, at Liverpool. Mr. Vaux stated that the antecedents of C. Simonides were well known to the scholars of this country and Germany; and expressed a hope that his work would be carefully examined by those who have paid especial attention to the subjects of which he treats, and particularly by Members of the Royal Society of Literature, to whom many of his most doubtful MSS. were exhibited so long ago as 1853.

NUMISMATIC.—Nov. 21.—W. S. W. Vaux, Esq., President, in the chair.—Morley Farrow, Esq., J. H. Hartwright, Esq., Rev. J. H. Pollexfen, Prof. W. Ramsay, and George Sim, Esq., were elected Members of the Society.—Mr. Boyne exhibited two Antioch coins of Diadumenianus, and one of Elagabalus.—Mr. Sharpe exhibited a groat of Edward the Third: the peculiarity consisting in the bust being carried beyond the circle.—Mr. Evans read a paper, communicated by S. Sharpe, Esq., ‘On a Sterling of Marie d’Artois,’ the widow of John the First, Count of Namur (who died in 1331), bearing on the reverse the legend, ‘MONETA MERAUD.’—Mr. Madden read a paper, communicated by the Rev. Churchill Babington, B.D., ‘On some unpublished Jewish Coins.’ Among them may be mentioned—one of Antigonus, the smallest known, and remarkable for having a Greek inscription on the same side as the Horn of Plenty; two of Herod the Great, with the rude tripod and rude helmet; two varieties of Herod Archelaus, and one of the reign of Tiberius, supposed to belong to the class struck under the Procurators. On all of these Mr. Babington made some interesting observations.—Mr. Madden read a paper by himself, ‘On the Imperial and Consular Dress.’

STATISTICAL.—Nov. 19.—Col. Sykes, V.P., in the chair.—W. R. D. Gilbert, Esq. was elected a Fellow.—A paper by Mr. J. T. Danson, ‘On the Growth of the Human Body in Height and Weight in Males, from 18 to 30 Years of Age,’ was read.—Mr. Danson stated that his observations had been made upon the prisoners confined in the Liverpool Borough Gaol, and extended over 4,800 cases. Rejecting, for various reasons, the ages under 18, he confined his inquiries to males from that age up to 30. The lowest number at any age, from which he had constructed an average, was 95, the highest was 200. As regards both height and weight the results were extremely irregular, and did not indicate progression. For instance, the average height of 185 men at 24 was less than that of 200 men at 23; and 100 at 26 gave a lower average than 200 at 25; while 100 at 30 gave a lower average than 95 at 29. With regard to weight, the observations indicated an excess at age 25, while at ages 24, 26, 28 and 30 it seemed deficient.

LINNEAN.—Nov. 21.—G. Bentham, Esq., President, in the chair.—E. Clapton, Esq., M.D., was elected a Fellow.—Mr. D. Hanbury exhibited a specimen of the resinous wood of *Aquilaria Agallocha* (Roxb.), the aloes, or lignum aloes of the Bible.—Mr. Darwin read a paper ‘On the Two Forms (or dimorphic condition) in the Species of *Primula*.’—Mr. H. W. Bates read a paper, entitled, ‘Contributions to an Insect Fauna of the Amazon Valley,—Lepidoptera, Heliconide.’—Dr. Cobbold made some observations, illustrated by sketches, on the mode of reproduction of *Gyrodactylus elegans*, a parasite on the common stickleback.

ZOOLOGICAL.—Nov. 26.—Dr. J. E. Gray, V.P., in the chair.—Mr. A. D. Bartlett read some notes ‘On the Reproduction of the Manchourian Crane in the Society’s Gardens,’ and ‘On the Changes of Plumage exhibited by the Young Birds.’—Dr. A. Gunther communicated a List of a Collection of Fishes sent to the Society by Capt. Dow, Corresponding Member from the Pacific coast of Central America. Out of fourteen species contained in this small but valuable collection, no less than nine proved to be new to science.—Dr. Sclater exhibited some original drawings, by Mr. G. T. Vigne, of two species of Wild Sheep, from Northern India; and some new Birds from Panama, from the collection of G. N. Lawrence, Esq., Corresponding Member. Dr. Sclater also read papers describing some new species of South American Birds from his own col-

lection, and a new species of Finch of the genus *Sycalis*, from Mexico, proposed to be called *Sycalis chrysops*.—The Secretary read papers, by Dr. L. Pfeiffer, entitled ‘Descriptions of Sixteen New Species of Land Shells,’ and by Mr. H. Adams, ‘On some New Genera and Species of Shells from Mr. Cuming’s Collection.’—Mr. A. White exhibited some new species of Coleoptera, of the genera *Carabus*, *Geotrupes* and *Anomala*, from Japan.—Mr. Leadbeater exhibited three heads of a species of true Deer, from specimens obtained in the Imperial Gardens of the Summer Palace at Peking, by Lieut.-Col. Sarel.

CHEMICAL.—Nov. 21.—Dr. Hofmann, President, in the chair.—Peter M’Owan, Esq. was elected a Fellow.—Dr. Thudichum read a paper ‘On Leucic Acid, and some of its Salts.’ The acid was made by treating leucine with nitrous acid gas and exhausting the product with ether. Its formula was determined to be $C_{12}H_{13}O_6$.—Dr. Bence Jones read a paper ‘On the Occurrence of Crystalline Deposits of Phosphate of Lime in Human Urine.’ The formation of these crystals was shown to depend upon the amount of lime in the urine and upon the degree of its acidity. They could be produced at will by the administration of acetate of lime.—Mr. E. J. Mills read a paper ‘On Sparteine,’ the volatile oily base obtained by Stenhouse from *Spartium scoparium*: 150 lb. of the plant yielded 22 cubic centimetres of sparteine. It was shown to be a diammonic base, having the formula $C_{30}H_{26}N$.

INSTITUTION OF CIVIL ENGINEERS.—Nov. 19.—G. P. Bidder, Esq., President, in the chair.—The whole of the evening was occupied by the discussion upon Mr. Longridge’s paper ‘On the Hooghly and the Muttia.’

Nov. 26.—J. R. M’Clean, Esq. V.P., in the chair.—The paper read was ‘On Measuring Distances by the Telescope,’ by Mr. W. B. Bray.

MEETINGS FOR THE ENSUING WEEK.

Nov. Royal Academy, 8.—‘Anatomy,’ Mr. Partridge.
— Entomological, 8.
— Architects, 8.
Tues. Ethnological, 8.—‘Dyaks of Borneo,’ Bishop of Labuan; ‘Languages of West Port of N. America,’ Mr. Tyley.
— Engineers, 8.—‘Discharge from Under-drainage,’ Mr. Bailey Denham.
— Photographs, 8.
Wed. Society of Arts, 8.—‘Building for International Exhibition,’ Capt. Philpotts.
— Geological, 8.—‘Bracklesham Deposits,’ Rev. O. Fisher.
Thurs. Linnean, 8.—‘Tunicata,’ Mr. Macdonald; ‘*Scyllarus arctus* in England,’ Mr. Couch.
— Chemical, 8.—‘Camphor of Peppermint,’ Dr. Oppenheim; ‘Picric and Hydropicric Acids,’ Mr. Foster; ‘Tin-Lead Alloys,’ Prof. Bailey.
— Royal Soc., 8.—‘Crystallisation and Liquefaction,’ Mr. Thomson; ‘Magnetic Declination &c. in the Islands,’ Col. Smythe; ‘Calculus of Functions,’ Mr. Russell; ‘Tschirnhauser’s Transformation,’ Mr. Cayley.
— Antiquaries, 8.
Fri. Archaeological Institute, 4.

FINE ARTS

Medieval Alphabets and Initials for Illuminators. By F. G. DelaMotte, with an Introduction by J. Willis Brooks. (Spon.)

Suggestions for Illuminating. By W. Randle Harrison, chromolithographed by Vincent Brooks. (Barnard & Son.)

Handbook of Initial Letters and Borders. By V. Touche. (Barnard & Son.)

A Guide to Beginners in the Art of Illumination. By Albert H. Warren. (Barnard & Son.)

A Manual of Illuminated and Missal Painting. By Edwin Jewitt, with a Historical Introduction by Llewellyn Jewitt. (Barnard.)

Guide to the Art of Illuminating and Missal Painting. By W. and G. Audsley, Architects. (Rowney & Co.)

THESE little books are of different degrees of merit; upon more than one it would be as absurd to waste serious criticism as if we were to analyze and examine a Guide to Potichomany, and find serious fault with the misdirections for carrying on the recondite processes of that happily almost forgotten ladies’ amusement.

Mr. F. G. DelaMotte’s name and style should be guarantees for accuracy and fidelity; and,

among the flimsy things which appear to flatter an idle fancy of the day, whatever comes from him should be sound to the limit of its pretensions. What is the case? let us see. The chief object of the text, by Mr. J. Willis Brooks, seems that of recommending a certain 'Primer' for the use of illuminators, to furnish information which is heedfully excluded from the pages of the present little publication bearing the name of Mr. F. G. DelaMotte. What is the value of this recommendation may be ascertained when we say that, in reference to a certain Plate showing some initial letters of the fourteenth and fifteenth centuries, which are distinguishable by beautiful pen-strokes and elaborate flourishes of the most delicate character, known to all students as amongst the most intricate and difficult of illuminating tasks, and perhaps requiring more previous study and practice of the art *per se* than any other of its developments, we have the following remark:—"On page 9 will be found a few specimens of a style at once easy to practise and effective in execution. The pen may here be used with almost reckless freedom." Mr. J. Willis Brooks considerably says that, in the illuminations following his text, and for which, we presume, he as well as Mr. F. G. DelaMotte is responsible, "care has been taken to select that class of characters (of lettering) which tends most directly to develop the normal form. At the same time an endeavour has been made to choose with judgment." Then he proceeds thus:—"For our selection our own taste is responsible. In the large majority of instances, the letters have been literally copied from works of ascertained authority; in some the principles deduced from many years' study of such works have been made the basis of original design." It is difficult to say to which of the examples in the book before us either of these peculiar claims upon our attention is to be attached; but if it is seriously intended that the letters on Plate 1, professedly showing initials of the ninth century, are specimens of the normal forms developed in that age, the news indeed comes upon us rather like a surprise, seeing that we had hitherto believed them to be almost peculiar to the eleventh of the Christian era.

The second-named book on our list bases its hopes of success upon the originality of the designs it contains for initial letters and borders, and the practical nature of its instructions; for, unlike the foregoing, we have now before us practical instructions for the illuminating art itself. These instructions are simple and sensible enough, evidently the production of a practised workman, and, so far as they go, may be serviceable to the student, whose intelligence does not outrun a very limited amount of practice. With regard to the Plates, we cannot say so much that is complimentary, for, like the writer we have just dealt with, Mr. Harrison mistakes the whole function of illuminating art, and, led away by the taste of the day, treats it rather as a pictorial than a decorative study; and his opening recommendation of the famous 'Hours' of Anne of Brittany shows the bias of his feelings as much as it evinces his miscomprehension of the ends of the art he treats upon. Here are fancy borders for poems, which are really coloured vignettes of the most commonplace and trivial order; the tawdriness of Plate 19 is painful.

Mr. V. Touche's book is a mere compilation or congregation of letters and borders from manuscripts in the British Museum, reproduced with such typographical coarseness that it is not worth our while to find fault with them: the offence of vulgar colour is not added to the above, seeing that these specimens are not "illuminated," as the phrase goes, but merely

printed in self-colours. In Mr. Albert H. Warren's production we are told that illumination, being established as a requirement of advancing civilization, renders necessary Mr. A. H. Warren's little book. Then follows a recommendation like that famous one of "first catch your hare," to the effect that the embryo artist should first find a subject worthy of his pencil. The reader will thank us for not entering further into this poor stuff.

If Mr. Llewellyn Jewitt were less clumsy in his peculiar views of grammar, we might have read his little book with more satisfaction than we actually experienced. His condensed and popular account of the history of the illuminating art is little more than a chronological catalogue, enlarged. With regard to the practical advice given in the second section of the book, it is poor and incomplete. The author's aim seems to be rather to introduce a string of feeble and commonplace chromolithographs by his text, than to make that text a vehicle for the reader's instruction. In short, this book is a toy, and no "Manual" at all. The illustrations are only less bad than those in the books we have already noticed because they are better printed, which gives to them an appearance of superior finish and delicacy.

The last of the above-named books is of a very different stamp from that of its companions, being really what it professes to be—a practical and sensibly written little Manual, such as the student may profitably use. It is not given to every one, as the above examples show, to compile intelligently even a history of the art of Illuminating, still less to write a series of practical instructions for its study. The Messrs. Audsley have done both. The sketch of the history of the art during the middle ages, so far as the object of the publication goes, which is entirely introductory and practical, is concise, correct and comprehensive. A tolerable idea of the characteristics of the styles of conventional ornament in their progress may be obtained from it, notwithstanding the merely outline nature of its illustrations.

FINE-ART GOSSIP.—Pictures intended for the forthcoming Exhibition at the British Institution must be sent to the Gallery on Monday the 13th, and Tuesday the 14th, of January next, between ten and five o'clock, and sculptures, on Wednesday the 15th of the same month, between the same hours. No quotation exceeding eight lines can be inserted in the Catalogue. No picture will be received for sale that is not *bona fide* the property of the artist.

Turner's 'Liber Studiorum,' at least those thirty original drawings now in the possession of the Department of Art at South Kensington, which constitute so large a proportion of the whole, have been photographed "under the superintendence of the Department of Science and Art," and published by Messrs. Cundall & Downes, of New Bond Street. Mr. Thurston Thompson made the negatives. The highest praise we can give to these is to say they so perfectly resemble the originals that for a few shillings each the world may obtain good fac-similes of the set of glorious landscapes. What the English School owes to these works of Turner is beyond estimate. We believe no student of Art can look even casually at them without considerable benefit. No lover of Nature can regard them without delight, that increases the longer they are examined. The photographs before us render admirably the vast mountain wilderness of the 'St. Gothard,' its startling rock-cut road, the huge shadow, the falls from one mountain to the opposite, swallowing up a whole valley in its depths, and the peaks beyond peaks that overlook each other in the distance. Here is 'Blair Athol,' the river running in its rocky path, hung about with trees;—and the impressive 'Solitude,' the lonely

castle ruin upon the margin of the sea. Busy little 'Thun,' with the wonderfully-rendered avenue of trees and delicious reflections on the lake;—and that ineffable sunny mystery styled 'Hindoo Devotions.' Life-like 'Greenwich Hospital,' with the sweeping wreaths of smoke and streams of dun sunlight falling upon the great city. 'St. Catherine's Hill,' with its vista and lines of shadow. The lovely 'Pastoral Scene,' rich in evening softness, umbrageous trees, and the infinitely varied plain, through which goes the slow-winding river, with the bluff cliff rising suddenly up to catch the failing golden light. The airy, shadowy 'Fall of Clyde,' with its mist of broken water. Inimitable 'Norham Castle,' its details absorbed in a haze of shadow, but distinct with solid form against the sky. The 'Bexhill,' with its wealth of piled clouds, worlds of darkness at their feet, and sunlight entangled in their summits, rearing their mighty masses over against the shore while the flying gleam marks the sea-towers with pallid fire. Here are the 'Jason,' 'The Tenth Plague,' and that image of perfect peace the ruin-guarded bluff that overlook the 'Wye,' the arcades of 'Rivaux,' seen in stormy sunlight, with trees straining in the wind, and the bold shoulder of 'Hindhead Hill,' 'Holy Island,' 'Inverary,' the famous 'Peat Bog,' 'Dunstanborough,' 'Flint Castle,' the 'Storm on the Lake of Thun,'—and many more whose names have become household words in Art. We feel ourselves performing a duty in commending to the utmost this magnificent series. It is our conviction that more knowledge of the soundest and purest Art is to be gained by study of these marvellous drawings than by visiting the public galleries for a lifetime. They are lectures, sermons or poems, just as the mind is fitted to receive them.—The same publishers produce a portrait of the Laureate, taken from life, which is as perfect a likeness as photography can render.

Mr. Noel Paton is engaged upon a picture for the Royal Academy Exhibition, representing two clowns seated upon a hillock, watching a raid of fairies by moonlight. Some of the spirits are habited as knights and ladies, and others appear as goblins, after the manner of the work by which Mr. Paton first became known to the public, the 'Titanias.'

Mr. Mitchell publishes four oval medallion portraits of Mr. Buckstone in various characters, and, in the centre of the sheet, the gentleman when off the stage. These are from photographs by Mr. H. Watkins, drawn on stone by Mr. R. J. Lane: they are executed with great spirit, and are full of character. The same may be said for a companion sheet, representing Mr. C. Mathews in a similar manner. The photographs from which the same draughtsman has executed his work are, in this case by Messrs. C. Watkins and H. B. Lee. As likenesses, both of these are irreproachable.

We understand it is the intention of the authorities having charge of Mr. Butterfield's Church in Wells Street, Oxford Street, to replace those portions of the stonework of the exterior which are reported to be much decayed. Also, to have the interior re-decorated, which is reported to look rather dingy already.

Some stained glass is to be placed in the range of windows of Oxford Cathedral, on the north side of the Latin chapel. This glass is ancient, having been originally placed where it will be restored, and moved therefrom about half-a-century ago by a zealous Canon to the great west window of the Cathedral, which it, until now, filled rather incongruously. The monument to Bishop Fell has been removed to the west end.

A memorial window, to the memory of the late Lord Holland, has been erected, not in the parish church at Kensington, where it would have been appropriate, but in a district church in the neighbourhood. The principal subjects illustrated are, "Our Saviour Blessing Little Children," occupying the greater part of the three centre lights, surrounded by a series of smaller subjects, illustrating the Nine Beatitudes. The window was designed and executed by Messrs. Heaton & Butler.

MUSIC AND THE DRAMA

ROYAL ENGLISH OPERA, COVENT GARDEN.—Under the Management of Miss LOUISA FINE and Mr. W. HARRISON.—MONDAY, December 3rd, and Every Evening until further notice, Balfe's New Opera of THE PURITAN'S DAUGHTER (Libretto by J. V. Bridgeman, supported by Miss Louisa Fine, Miss Susan Fyne, Messrs. Santley, Henry Corri, George Honey, A. St. Albans, Percy C. Loyal, Walworth, T. Distin, E. Dusek and W. Harrison.—Conductor, Mr. Alfred Mellon.—Commence at Seven.—The New Scenery by Mr. William Callcott. Private Boxes from 10s. 6d. to 4s. 4s.; Stalls, 7s.; Dress Circle, 5s.; Amphitheatre Stalls, 3s.; Pit, 2s. 6d.; Amphitheatre, 1s.—Box-office open daily from Ten till Five. No charge for Booking.

GLEES, MADRIGALS AND OLD BALLADS.—Egyptian Hall, Dudley Gallery.—EVERY EVENING (except Saturday) at Half-past Eight, and on Wednesday and Saturday Afternoons at Half-past Three.—Mr. Mitchell has the pleasure to announce that the popular and eminently successful Entertainments of the LONDON GLEE and MADRIGAL UNION (Miss J. Wells, Miss Eyles, Mr. Baxter, Mr. W. Cummings, Mr. Lawler, Mr. Land, directors) are NOW RESUMED. The Analytical Programmes, compiled by T. Oliphant, Esq., Literary Illustrator.—Reserved and Numbered Seats, 3s.; Unreserved Seats, 2s.; a few Fautouls, 5s., may be secured at Mr. Mitchell's Royal Library, 33, Old Bond Street.

NEW PUBLICATIONS.
MARCHES.

A given rhythm, precisely insisted upon, may serve as a spur, instead of a fetter, to imagination. What could be conceived, at first thought, more inexorable (to avail ourselves of one of the favourite epithets of M. Berlioz) than the measure of the quick, old 'Vienna Waltz'?—Yet the varieties given to it by Lanner and Strauss and Labitzky are countless. The March—even if funeral or pathetic marches are not taken into the list—admits of still greater differences, because every conceivable local colour can be thrown over it.—Think of Schubert's four-handed Marches (among the most stirring things in music),—of the tune of Weber's gipsies in 'Preciosa',—of the quick step, stolen from Theophilus Muffat by that splendid thief, Handel, for his 'Judas',—of Mendelssohn's 'Wedding March'.—Here are before us four publications, as distinct as possible—all of march music. The first, *Marche des Bohémiens, Russes, &c.*, par W. Krüger, Op. 104 (Ewer & Co.), is rather a piece of fancy-work than a march which could be scored, and to which a pageant or military troop might defile,—but it has a peculiar and wild character, whether the theme be imagined and recorded, which is not unpleasant.—Of *Marche du Tannhäuser*, de R. Wagner.—*Transcription de Concert*, same composer, Op. 105, No. 1 (same publishers), we have spoken, ere meeting it thus dressed up—as containing one of its composer's best eight-bar phrases, and then wandering away into devices of another school and humour. As arranged here, its incoherences are, in part, disguised, and it makes a fair concert-piece.—The excitement of volunteering seems to have called into being *Five Marches for the Pianoforte, with Words ad libitum*, by John Oxenford, Esq., composed and arranged by Arthur O'Leary (same publishers). These are not bad of their kind; but brisk and manly music, creditable to their composer.—No. 9, *Second Series of Gems from the Great Masters*, contains Handel's 'Dead March in Saul,' arranged for the pianoforte, by George Frederick West (Cocks & Co.). Simple as the task might seem to set forth this glorious and solemn procession tune—the style of modern execution and the fullness of modern instruments considered—Mr. West has missed accomplishing it well. Other versions are extant which are far more effective.—Let us here again offer an idea to some publisher, home or foreign, who follows the excellent fashion of the day in republishing and collecting that by the great masters which has been overlaid or forgotten. A complete edition—or a skillfully executed transcription—of Handel's Marches, from his oratorios, operas and other compositions, would be a work of great interest.

ROYAL ENGLISH OPERA.—Let managers believe it or not, as they please,—there is some virtue in an opera having a good story which lends itself to music, and in its singers having common sense to sing. One half of these truths was vividly brought home to us on Tuesday week by the presentation of the English reproduction of the book of 'La Poupée de Nuremberg,' set for the *Théâtre Lyrique* in 1852, by Adolphe Adam,—already known here as 'Magic Toys,' and the present version purported to have been made and re-set by Mr. G. Linley.

Though the story encourages more "breadth" in the actors than is always safe, it is sprightly as a piece of broad farce, and excites curiosity. So much for an operetta advertised as "new and original"! But how much share has Mr. Linley really had in the work? The overture is by one M. Auber, that to 'Le Philtre,'—re-scored, if we mistake not,—and it was said in the theatre, re-scored by an English composer of repute (not Mr. Linley), who does well to recognize the questionable nature of such an artistic transaction by concealing his name. This is a return to the worst practices of past times; when Bishop, to please his managers, consented to arrange Signor Rossini's music! It need surprise no one, should it prove that every other bar of the music has been suggested. We were haunted from first to last by an air of coincidence, to which it will be remembered Mr. Linley has been proved liable, in no common degree, by the literal resemblance of his 'Springtime Returning' to a melody by Herr Lindblad. Why not announce obligations frankly? Provided the rights of property are respected, no one would object to a *pasticcio* avowedly made up from minor French operas not strong enough to be worth giving in all their completeness.

PRINCESS'S.—This theatre finds it profitable to indulge in Shakespearian revivals; wherefore, on the alternate nights we find 'The Merry Wives of Windsor' changing places with 'Othello.' Mr. Ryder's success in the character of Iago has marked him as a rising actor, and encouraged the management to confide to him the impersonation of *Falstaff*. Mr. Ryder has certain advantages of figure for the assumption; and, though he lacks the unction which would be shown by a humorous actor, presents an outline that is at once intelligent and effective. He makes the most of the text, and throws the entire force of his conception into the character. The whole is evidently the effect of much study on the part of the actor, and is, therefore, the more deserving of special notice. What he has thoroughly thought out in the closet he carefully depicts on the stage. The knightly qualities of the jovial wassailer he marks with capital discrimination, while he solicitously softens the grosser features. Miss Elsworth and Miss Carlotta Leclercq respectively fill the parts of the merry *Mrs. Ford* and *Mrs. Page*. Mr. J. G. Shore is decidedly good in *Master Slender*; and Mr. Widdicombe of course excellent in *Justice Shallow*. The comedy, in fact, is well cast throughout, and evidently well appreciated.

OLYMPIC.—A new comedy, by Mr. Palgrave Simpson, taken from the French of 'La Frileuse,' a work ascribed to M. Scribe, but claimed for M. Augustin de Bercy by the actors of the Vaudeville, was produced on Monday. It is called 'Court Cards'; and, as its name imports, is courtly in style and manners. Miss Sedgwick is the heroine, the princess *Amelia*, who in her wanderings visits the hut of Lieutenant *Conrad* (Mr. W. Gordon), and warms herself at his fire. Of course they become mutually enamoured. But there is an obstacle in the way of their happiness. She is destined to become the bride of *Prince Max* (Mr. Neville), who, however, is in love with a maid of honour (Miss Cottrell). Conrad, having deserted his post, is condemned to death by a court-martial, and seeks refuge in the chamber of the lady, where he is found by the *Duchess* (Mrs. Leigh Murray) who insists on his immediately marrying her, or naming the lady of whom he was actually in pursuit. Afterwards, he penetrates to the oratory of the princess, who sees her opportunity and claims him for her husband. Prince Max, who is of a diffident disposition, is made jealous in the course of these incidents, suspecting that the object of the lieutenant's pursuit is the favourite maid of honour. The Grand-Duchess, too, is herself compromised by an intriguing baron, and is only too happy to escape the consequences by calling in the aid of the princess, who thus has everything her own way. The piece, which is in two acts, was well acted, and proved successful.

NEW ROYALTY.—The management have now got rid of 'Atar Gull,' and substituted a light piece, called 'All in the Dark,' in which Mr. Worboys, as an amorous grocer, provokes much mirth. The piece is so confused as to be scarcely intelligible; but this is intended as the general effect, and alluded to in the title. Mdlle. Albina di Rhona appeared on Thursday week in the ballet-farce of 'Smack for Smack,' with its three national dances, as well as in that of 'Camelia,' with its two. The farce of 'The Thumping Legacy' was also enacted.

MUSICAL AND DRAMATIC GOSSIP.—A confusion made in foreign musical journals, which, we have reason to know, has startled and misled others besides ourselves, should be here set right. The announcement of Herr Molique's death as having recently taken place at Stuttgart, refers to a relative of the great violinist, our townsman.

The Mozart Night "came off" duly at the Popular Concerts, with the well-known players, and Madame Lancia and Mr. Winn as the singers. —The fourth of Herr Pauer's performances of pianoforte music included works by Matheson, Zipoli, Handel, Muffat, Porpora, Cramer, Ries, Kalkbrenner, Czerny, Mendelssohn, Hiller, Döhler, and Heller.

The Philharmonic Concerts for next season, eight in number, will commence on the 10th of March. The Jubilee Meeting is to be held on the 14th of July.

That rising young pianist, M. Ritter, has passed through London on his return from a concert tour, in company with M. Sainton, Madame Sainton-Dolby, and Signor Piatti.

Among the courses of lectures to be given before Easter, 1862, at the Royal Institution, are announced four on National Music, by Mr. Henry F. Chorley.

Gluck's 'Orpheus,' with its English words, will be performed at one of Mr. C. Halle's concerts, in Manchester, on the 12th of December.—Lovers of musical reading are recommended to the carefully-executed series of studies on 'Alceste,' published by M. Berlioz in the *Journal des Débats*, as full of information and interest. Many will learn from them, for the first time, that not merely was the brief part of *Hercules*, in the closing act of the opera, an afterthought interpolated by Du Rollet, but that the air given to him was composed by Gossec during Gluck's absence from Paris, and accredited by him—as was the *bravura*, by Guadagni and Bertoni, which now closes the first act of 'Orphée'.—Yet, this was the man whose preface to 'Alceste,'—as we had occasion to point out not long since,—has passed in its stern perquisitions as "a law of the Medes and the Persians."

The following note from Naples only takes up the weary tale of decadence in music there, to which we have had so often to call attention.—"After long promise and much expectation, the 'Trovatore' was given in San Carlo on Thursday, the 7th inst. The principal voices on the occasion were Signora de Vries, who made her *début* in Naples, and the tenor, Malvezzi, who is no stranger here. They were accompanied by the baritone Aldighieri, who has sung in the 'Traviata,' and the contralto Signora Grossi. In the first acts almost all the choice bits were applauded, and particularly the cavatina of the *prima donna* in the final *terzetto* of the first act, the act of the baritone, and the duett between the tenor and the contralto; but the applause was afterwards disputed. 'We cannot,' says the critic in the Official Journal, 'pronounce judgment on a first performance, because we know well the trepidation of a *début*, but we cannot abstain from saying that the *prima donna*, Signora de Vries, has a beautiful voice and very great compass, which appears to us better adapted for that music in which the artist is not compelled to strain it for excited dramatic declamation. We are of opinion that De Vries will please yet more when she is not embarrassed by the agitation of a first appearance. The Signora Grossi distinguished herself by the

truth of dramatic expression. Signor Aldighieri sang with that perfect cultivation for which our public have admired and applauded him in the 'Traviata.'

'Les Huguenots,' an opera, long barred out by censure, has at last got into the Papal States, having been recently given at Bologna with great care, under the direction of the Chevalier Mariani. Three of the principal singers were French—Mesdames Barbot and De Joly and M. Junca.

M. Rubinstein's 'Children of the Moorland' is to be performed at Berlin.—Four Concerts, directed by Mynheer Von Bree the younger, have been organized at Amsterdam with the purpose of bringing forward the works of Dutch composers, many of which are of real solid merit. A new Mass, by Mynheer Verhulst, has been lately an object of attention and discussion in the German journals.—From the *Deutsche Musik Zeitung* we learn that Haydn's Oratorio, 'The Return of Tobias,' has been performed at Munich—that on behalf of the German fleet,

Which is not yet in sight;

—Cherubini's 'Requiem' and Handel's 'Dettingen Te Deum' (an odd choice!) are to be performed at Leipzig;—that M. Gounod's 'Faust' has travelled to Coburg;—and that the prize for the best Piano-forte Trio, offered by the "*Deutschen Tonhalle*," has been awarded by Herren David, F. Hiller and F. Lachner (the appointed umpires) to Herr Julius Schepfler.

The Cherubini Concert at the Conservatoire of Paris, where Signor Rossini will emerge into public hearing after his long silence, is, for the present, says the *Gazette Musicale*, fixed for the 28th of December.

MISCELLANEA

A newly-discovered Caxton.—Mr. Bradshaw, of Cambridge, a name well known to bibliographers, has had the good fortune, to discover in the Library of Corpus Christi College another work that must be added to the long list of books printed by Caxton. This is the 'Rhetorica Nova, fratris Laurentii Gulielmi de Saona,'—a work considered by Ames, and afterwards by Herbert, to have been among the first-fruits of printing at Cambridge. It is thus described by them:—"In this famous University they received the art of printing among them soon, though which was their first book is difficult to ascertain, or who were the persons that brought it there." Mr. Bagford, in a letter to Bishop Tanner, dated in November, 1707, and communicated to Mr. Ames by his brother, has these words:—"I cannot but impart unto you that very lately good Mr. Strype gave me an account of a booke, which Archbishop Parker gave to the publick library of Bennet (or Corpus Christi) College, and is a piece of rhetoric by one Gull. de Saona, a minorit, printed at Cambridge, 1478...It is in folio, without the number of page, catchwords or signatures; the types very much like Caxton's largest. At the end, *Complatum autem fuit hoc opus in alma universitate Cantabrigie, anno Domini 1478, die 6 Julii, quo die festum sancte Marthe recolitur. Sub protectione serenissimi regis Anglorum Edwardi quarti.*" Ames and Herbert were evidently deceived by the position of the word "Cantabrigie" at the end, where the place of imprint is usually given in old books, into imagining that the book was printed at Cambridge, whereas it was only compiled there; and as few since their time may have seen it, owing to the restrictions upon seeing the Corpus books and MSS., first imposed by the donor of them, Archbishop Parker, and still continued, the mistake has been perpetuated until now. It needed only Mr. Bradshaw's experienced eye to detect at once that it is a Caxton, printed in the same type as the 'Myrrour of the Worlde.' So far as is at present known, the copy at Corpus Christi is unique. It may be mentioned that the same work was printed at St. Alban's in the year 1480, and that a copy of it is in the King's Library, British Museum.

TO CORRESPONDENTS.—F. J. F.—M. H.—J. B. S.—W. H.—J. S.—J. L.—J. G. T.—M. R.—received.

SAMPSON LOW, SON & CO.'S LIST.

ILLUSTRATED AND JUVENILE BOOKS FOR 1862.

* * ILLUSTRATED SPECIMEN LIST, 8vo. gilt edges, price 6d., ready this day.

Illustrated by Eminent Artists.

I. SHAKSPEARE'S SONGS and SONNETS. Illustrated by John Gilbert. With 10 large fac-simile Water-coloured Drawings, and 23 Woodcuts. Super-royal 4to. price 48s.; or morocco, 68s. [Ready Dec. 1.]

II. POETRY of the ELIZABETHAN

AGE: a Selection of Songs and Ballads. 24 Illustrations by Birket Foster and others. Cloth, bevelled antique, price 7s. 6d.; morocco, 12s. [Ready Dec. 1.]

III. The PSALMS of DAVID. With

Illustrated and Ornamental Borders, designed by John Franklin, and Initial Letters printed in Colour. Small 4to. price 21s.; morocco antique, 42s. [Ready Dec. 1.]

IV. FAVOURITE ENGLISH

POEMS of the LAST HUNDRED YEARS—THOMSON to TENNYSON. With 200 Illustrations. An entirely new and Improved Edition. Demy 8vo. cloth elegant, price 21s. [Ready Dec. 1.]

V. The POETRY of NATURE.

Selected and Illustrated with 25 Engravings by Harrison Weir. Small 4to. handsomely bound, 12s.; morocco, 21s.

VI. Mr. TENNYSON'S MAY

QUEEN. Illustrated with 25 Designs by E. V. R. Small 4to. cloth, bevelled boards, 7s. 6d.; crown 8vo. Edition, cloth, 4s.; morocco, 10s. 6d.

VII. ART STUDIES.—The OLD

MASTERS of ITALY. By JAMES J. JARVES. 2 vols. medium 8vo. printed on toned paper, with 49 Engravings on Copper (uniform style with Kugler's Works on Painting, edited by Eastlake), price 32s.

VIII. A SERIES of CHOICE EDI-

TIONS of CHOICE BOOKS. Illustrated by the first Artists. Crown 8vo. cloth, 5s. each; bevelled boards, antique cloth, 5s. 6d.; or in morocco, gilt edges, 10s. 6d.

Farmer's Boy. Pleasures of Hope. Ancient Mariner. Deserted Village. Vicar of Wakefield.	Eve of St. Agnes. L'Allegro. May Queen. The Hamlet. Pastoral Poems.
---	---

Elegy in a Churchyard.

For Young People, beautifully Illustrated.

I. LIFE AMONGST the INDIANS.

By George Catlin, the Indian Traveller. With 24 Illustrations. Small 8vo. cloth, price 6s.
"To compare a child's book with 'Robinson Crusoe,' and to say that it sustains such comparison, is to give it high praise indeed; this commendation, however, we bestow on Mr. Catlin's work, which is one of the best volumes for the nursery or the schoolroom we have ever read."—*Athenæum*, Oct. 25.

Also uniform, price 5s. each.

The BOY'S OWN BOOK OF BOATS.

ERNEST BRACEBRIDGE; or, School-Boy Sports.

The VOYAGE of the CONSTANCE.

II. LITTLE BIRD RED and

LITTLE BIRD BLUE: a Song of the Woods told for Little Ones at Home. Beautifully printed, with Coloured Illustrations and Borders, price 8s. bevelled boards.

"The appearance of a book like this, full of innocent fun, and altogether childlike, is positively refreshing."—*The Queen*, Oct. 25.

Also uniform, price 5s. each.

CHILD'S PLAY, Illustrated in Colours by E. V. R.

III. GREAT FUN for LITTLE

FRIENDS. By the Author of 'The Voyage of the Constance.' With 29 large Illustrations by Edward Wehnert. 4to. cloth, 5s.; Coloured, 7s. 6d.

Also, price 5s. with 200 Pictures, THE NURSERY PLAYMATE.

IV. The CHILDREN'S PICTURE-

BOOK of the SAGACITY of ANIMALS. With 25 Engravings. Square, cloth, gilt edges, price 2s.; Coloured, 3s.

Also uniform, price 5s. each.

CHILDREN'S PICTURE FABLE-BOOK.
CHILD'S PICTURE TREASURY of PLEASURE BOOKS.

V. PAUL DUNCAN'S LITTLE BY

LITTLE; or, the Cruise of the Flyaway. Edited by FRANK FREEMAN. Fcap. cloth, gilt edges, price 3s. 6d.

Also uniform, price 2s. 6d. each, cloth, gilt edges.

DIFFICULTIES OVERCOME.

JACK BUNTLINE; or, Life on the Ocean.

THE BOY MISSIONARY.

THE BABES in the BASKET.

VI. The CHILD'S PICTURE AL-

PHABET. Edited by MARK WILSON. Price 6d.

Also shortly,

WILSON'S PICTURE PRIMER.

STANDARD AND POPULAR WORKS.

PLUTARCH'S LIVES. Best Edition.

Edited by A. H. CLOUGH. 5 vols. 8vo. 50s.

AN EXTENSIVE COLLECTION of

ENGLISH and SCOTCH BALLADS. By J. F. CHILDS. 6 vols. fcap. 8vo. 32s.

COMMANDER MAURY'S PHYSICAL

GEOGRAPHY of the SEA. Tenth Edition, enlarged and revised by the Author. 8s. 6d.

The TWELVE GREAT BATTLES of

ENGLAND—HASTINGS to WATERLOO. Cloth, 8s.

DR. WORCESTER'S NEW and EN-

LARGED ENGLISH DICTIONARY. 4to. half-morocco, 42s.; cloth, 24s. 6d.

The COTTON KINGDOM: a Traveller's

Observations on Cotton and Slavery in America. By FREDERICK LAW OLDMSTED. With a Map. 3 vols. post 8vo. 21s.

The FIRE SHIPS: a Tale of the Sea.

A New Novel. By W. H. G. KINGSTON. 3 vols. post 8vo. [Just ready.]

A STRANGE STORY. By the Author

of 'Rienzi,' and 'Last of the Barons.' [Shortly.]

ROUGH DIAMONDS: in Four Stories.

By JOHN HOLLINGSHEAD. With Illustrations by H. Sanderson. Square 16mo. cloth, price 2s. 6d. [Det. 4.]

AFTER ICEBERGS with a PAINTER:

a Summer Voyage to Labrador and Newfoundland. By the Rev. LEWIS L. NOBLE. 6 Tinted Lithographs, 10s. 6d.

CROSS COUNTRY. By WALTER

THORNBURY. Author of 'Ice-bound,' &c. With Frontispiece on Steel, handsomely bound in cloth, price 5s. Forming the Seventh Volume of "Low's Popular Library of Favourite Books."

The Volumes now ready are—

- | | |
|-------------------------|-------------------------|
| 1. The Eye Witness, 5s. | 4. Woman in White, 5s. |
| 2. Antonina, 5s. | 5. My Lady Liddlow, 5s. |
| 3. Dead Secret, 5s. | 6. Hide and Seek, 5s. |

London: SAMPSON LOW, SON & Co. 47, Ludgate-hill.

WORKS ON SCIENCE.

With nearly 1,500 Engravings on Wood, fcap. 8vo. cloth, 12s. 6d.

A MANUAL of BOTANY. By Robert Bentley, F.L.S., Professor of Botany, King's College.

Second Edition, with 378 Engravings on Wood, fcap. 8vo. cloth, 12s. 6d.

The MICROSCOPE and its REVELATIONS. By W. B. CARPENTER, M.D. F.R.S.

Eleventh Edition, Illustrated, post 8vo. cloth, 7s. 6d.

VESTIGES of the NATURAL HISTORY of CREATION.

Eighth Edition, carefully revised, fcap. 8vo. cloth, 12s. 6d.

FOWNES' MANUAL of CHEMISTRY. Edited by H. BENCE JONES, M.D. F.R.S., and A. W. HOFMANN, Ph.D. F.R.S.

8vo. cloth, 14s.

The GENEALOGY of CREATION, newly Translated from the Unpointed Hebrew Text of the Book of Genesis; showing the general Scientific Accuracy of the Cosmogony of Moses and the Philosophy of Creation. By HENRY P. A. PRATT, M.D.

Fourth Edition, with numerous Engravings on Wood, 8vo. cloth, 24s.

COMPARATIVE PHYSIOLOGY. By W. B. CARPENTER, M.D. F.R.S.

Post 8vo. cloth, 5s.

On DROWNING and other FORMS of SUSPENDED RESPIRATION: the Ready Method of Restoration. By MARSHALL HALL, M.D. F.R.S.

8vo. cloth, 2l. 10s.

MANY THOUGHTS OF MANY MINDS;

BRING

A TREASURY OF REFERENCE,

Consisting of SELECTIONS from the WRITINGS of the most CELEBRATED AUTHORS.

By HENRY SOUTHGATE.

Third Edition, thoroughly revised.

London: GRIFFIN, BORN & Co, Stationers' Hall-court.

NOTICE. — "*THE SEVEN SONS OF MAMMON*," by *GEORGE AUGUSTUS SALA*, Author of '*William Hogarth*,' '*Twice Round the Clock*,' &c., is now ready at every Library.

Now ready, price 5s.

DUTCH PICTURES:

With SOME SKETCHES in the FLEMISH MANNER.

By GEORGE AUGUSTUS SALA,

Author of '*Seven Sons of Mammon*,' '*Twice Round the Clock*,' &c.

"There is a genuine air of homespun earnestness about such a picture as the following, which, though it might have been written by Dickens, has more in it of Mr. Sala's personal bias."—*Spectator*.

"Mr. Sala is a masterly inventor of strange incident and delineator of strange character: herein there is no man living who has shown anything like similar power."—*Press*.

"The title of the volume indicates well enough the style in which it is written, but gives no idea of the endless variety of subjects over which it ranges. All classes in society, except the highest, all conditions and phases of life, all possible and many imaginary combinations of circumstances, are here photographed with admirable skill."—*Daily News*.

London: TINSLEY BROTHERS, 18, Catherine-street.

Now ready, at every Library, in 3 vols. price 12s.

THE SELF-DIVORCED;

OR, THE SCHOOL FOR WIVES.

By Capt. CURLING,

EVANS'S ENGLISH HARMONIUMS for Cottages, Schools, Drawing-Rooms, Churches, Literary and other Public Institutions, are made in every possible variety at Prices from 6 to 140 Guineas. The Manufacturers have to announce the complete success of a New Patent Self-Acting Blowing Machine, the only self-acting blower that has ever succeeded, which may be seen in operation at Holles-street daily.

The most distinguished living Musicians, including Balfe, Sterndale Bennett, Cipriani Potter, Best, Henry Smart, &c., have testified to the extraordinary merits of Evans's Harmoniums. See Testimonials attached to Illustrated Catalogues of Harmoniums, to be had gratis of the Manufacturers, Boosey & Ching, 24, Holles-street, London, W.

EVANS'S ENGLISH MODEL HARMONIUM, with Two Rows of Keys, price 66 Guineas in Oak Case, or 70 Guineas in Rosewood Case, combines every modern improvement. The most beautiful and varied orchestral effects can be produced upon this Instrument, which possesses every gradation of tone from the greatest power to the most delicate Pianissimo. The English Model Harmonium is managed with that facility which characterizes all Evans's Harmoniums, and is equally effective both in the Drawing-room and Church.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

EVANS'S PEDAL HARMONIUMS, with independent Pedal Reeds, can be had either with a Single or Double Row of Keys, at Prices from 51l. to 130 Guineas. Also, with the New Patent Self-Acting Blowing Machine.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

RAWLINSON'S HERODOTUS.

* * Purchasers of this Work who have neglected to complete their sets, may obtain the Volumes wanted, provided they order them at once of their respective Booksellers. Extra copies of the New Edition, which is printed in volume form, though not page for page, with the old, will be struck off for those who apply in time; otherwise, the next Edition will not be sold in separate Volumes.

John Murray, Albemarle-street.

Edited and illustrated with Notes and Historical and Literary Prolegomena, in English, containing confirmatory fac-similes of the same portions of Holy Scripture from Papyri and Parchment MSS. in the Monasteries of Mount Athos, of St. Catherine on Mount Sinai, of St. Sabas in Palestine, and other sources, by the Discoverer, C. SIMONIDES, Ph.D.

London: Trübner & Co. Paternoster-row.

PAUL JERRARD & SON'S NEW GIFT-BOOK FOR
CHRISTMAS AND ALL SEASONS,
Price 51s. 6d.

THE NIGHT-FLYERS; Intended as a companion volume to 'Butterflies in their Floral Homes,' by the same Author. The habits and haunts of the Night-flying Moths are illustrated and described in this work as those of their cousins, the Butterflies, were in the previous volume.

An entirely novel feature will distinguish the present volume, in those Plates which represent portions of woods and glades by night, in which the Moths are seen sporting among the foliage, in the half light of the moon or twilight.

In a handsome and novel cover, introduced especially for this elegant Gift-Book without regard to cost.

London: Paul Jerrard & Son, 170, Fleet-street.

Price 1s.

To be continued Quarterly.

RIVINGTONS, Waterloo-place, London; and all Booksellers.

UNITED KINGDOM LIFE ASSURANCE COMPANY,
8, WATERLOO-PLACE, PALL MALL, S.W.

The HON. FRANCIS SCOTT, Chairman.

CHARLES BERWICK CURTIS, Esq., Deputy-Chairman.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the Fourth Division of Profits to be declared on Policies effected prior to the 31st of December, 1861, should make immediate application. There have already been Three Divisions of Profits, and the Bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these Bonuses amount to, the three following cases are given as examples:—

Sums Insured.	Bonuses added.	Amount payable up to Dec. 1854.
£5,000	£1,987 10	£6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the Premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the Policy.

The Assets of the Company at the 31st of December, 1860, amounted to £730,665 7s. 10d., all of which has been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy stamps paid by the office.

For Prospectuses, &c. apply to the Resident Director, No. 8, Waterloo-place, Pall Mall.

By order,

E. L. BOYD, Resident Director.

EQUITABLE ASSURANCE OFFICE,

NEW BRIDGE-STREET, BLACKFRIARS.

ESTABLISHED 1762.

DIRECTORS.

THE RIGHT HON. LORD TREDEGAR, President.

William Dacres Adams, Esq.
Philip Hardwick, Esq.
William Samuel Jones, Esq.
John Aildin Moore, Esq.
William Frederick Pollock, Esq.

Charles Pott, Esq.
Rev. John Russell, D.D.
James Spicer, Esq.
John Charles Templer, Esq.
Right Hon. Lord Tredegar.

John Charles Burgoyne, Esq.
Lord George Henry Cavendish, M.P.
Frederick Cowper, Esq.
Richard Gosling, Esq.
Peter Martineau, Esq.

THE EQUITABLE is an entirely MUTUAL Office. The reserve, at the last "rest," in December, 1859, exceeded three-fourths of a million sterling, a sum more than DOUBLES the corresponding fund of any similar Institution. The Bonuses paid on Claims in the Ten Years ending on the 31st December, 1859, exceeded Three Millions and a Half, being more than 100 per Cent. on the amount of all those Claims.

The amount added at the close of that decade to the Policies existing on the 1st January, 1860, was £1,977,000, and made, with former additions then outstanding, a total of £4,070,000, on Assurances originally taken out for £6,252,000 only.

These additions have increased the Claims allowed and paid under those policies since the 1st January, 1860, to the extent of 180 per Cent.

The Capital at this time consists of

£2,730,000—Stock in the Public Funds.
£3,006,297—Cash lent on Mortgages of Freehold Estates.
£300,000—Cash advanced on Railway Debentures.
£83,590—Cash advanced on security of the Policies of Members of the Society.

Producing annually, £221,482.

The total Income exceeds £400,000 per Annum.

POLICIES effected in the current year (1861) will participate in the distribution of Profits made in December, 1859, so soon as Six Annual Premiums shall have become due and been paid thereon; and, in the Division of 1869, will be entitled to additions in respect of every Premium paid upon them from the year 1862 to 1869, each inclusive.

On the surrender of Policies, the full value is paid, without any deduction; and the Directors will advance nine-tenths of that value as a temporary accommodation, on the deposit of a Policy.

No extra Premium is charged for service in any Volunteer Corps within the United Kingdom, during peace or war.

A Weekly Court of Directors is held every Wednesday, from 11 to 1 o'clock, to receive Proposals for New Assurances; and a Short Account of the Society may be had on application personally, or by post, from the Office, where attendance is given daily, from Ten to Four o'clock.

ARTHUR MORGAN, Actuary.

THE TEA TRADE.

[ANNUAL CIRCULAR.]

ROYAL BANK BUILDINGS,

Liverpool, December 2nd. 1861.

The Fine Black Teas, purchased at the new Port of HANKOW, alluded to in our Circular of September, have now arrived, and the qualities will be found (as we reported) truly fine,—and prices, moderate—**4s. and 4s. 4d.**—Very good Mediums much lower—**3/—3/4—3/8.**—Those Families who can make it convenient to comply with our Terms of doing business—viz. Payment—in about **twenty days** after the receipt and approval of Tea—will find combined advantages, as regards Quality and Price.

English Families and others residing abroad will find in our extended arrangements continued care in the execution of Foreign Orders, (under Bond—duty free). The distinctive feature of our system of business—during the past twenty-one years—has brought to us a large amount of Foreign Trade.

BANKERS.

For the special convenience of Families, we have an account open with "The City Bank," London,—“Bank of Ireland,” Dublin,—“National Bank of Scotland,” Edinburgh and Glasgow,—the “Gloucestershire Banking Co.” Cheltenham,—the “Br. Bank of England,” in Liverpool, and “Royal Bank of Liverpool.”—Amounts paid into any of above Banks, on our account, advising us of the same, will be duly passed to credit. Remittances can also be made direct to us by Bankers' Cheques, Post-office Orders, &c.

*Your obliged and faithful Servants,***ROBT. ROBERTS & COMPY.**

Tea and Coffee Salesmen,

Entrance up the Steps—Leading to the Royal Bank,**LIVERPOOL.**

CLASS-BOOK of FRENCH LITERATURE: comprehending Specimens of the most distinguished Writers, from the Earliest Period to the Beginning of the Present Century. By GUSTAVE MASSON, B.A., Assistant-Master at Harrow School, &c.

By the same Author, in 12mo. cloth, price 2s. 6d.
INTRODUCTION to the HISTORY of FRENCH LITERATURE.
"As a Companion Volume to Mr. R. Demaus' Introduction to the History of English Literature, Messrs. Black have published a similar volume by M. G. Masson, Assistant at Harrow, on the History of French Literature. We have already spoken favourably of Mr. Demaus' book, and can do so of its companion in still higher terms. It is excellently adapted for its purpose, as a handbook for the upper classes of Schools, in which something more than the mere grammar of the language is attempted to be taught. As he classes each period of his review, M. Masson gives a very useful table of authors to be consulted by those who wish to study the subject, which his limits do no more than allow him to introduce to his readers. The extensive study requisite for the production of a small volume like the present, has but little opportunity of displaying itself otherwise than in the judicious remarks and general mastery of his subject, which M. Masson everywhere displays. The book is remarkably well fitted for the purpose it has in view, and will, we should think, meet with the welcome it deserves at the hands of those engaged in education."
Westminster Review.
Edinburgh: Adam & Charles Black. London: Longman & Co.

THE MAHABHASHYA, i.e., the "Great Commentary," by Patanjali, on the Grammatical Aphorisms of Panini, with its Commentary the Bhashya-Pradipika, and the Commentary thereon, The Bhashya-Pradipikayota. CLASS-BOOK OF ENGLISH PROSE, Comprehending Specimens of the most Distinguished Prose Writers, from Chaucer to the present time. With Biographical Notices, Explanatory Notes, and Introductory Sketches of the History of English Literature.

By the Rev. ROBERT DEMAUS, M.A.

"A very excellent class-book."—*Westminster Review*.
"A volume which the more general reader may peruse with pleasure, and which the student of English Composition may consult with advantage."—*Notes and Queries*.
"We have met with no book better arranged, or furnished with a more judicious selection of extracts, than Mr. Demaus's Class-Book."—*Guardian*.

By the same Author, in 12mo. cloth, price 2s.

INTRODUCTION TO THE HISTORY OF ENGLISH LITERATURE.

"We have been much pleased with an 'Introduction to the History of English Literature,' by Robert Demaus, M.A., which, though a comparatively small Manual, is of sufficient extent to give a very good notion of our literature from the earliest times to the present. The leading writers and works are ably described, and even of those more concisely. It is so often that so much condensed information is conveyed in so lively and agreeable a manner."—*Athenæum*.

"One of the most convenient manuals, introductory to a fuller study of the history and progress of English literature, that we have ever seen."—*English Churchman*.
Edinburgh: Adam & Charles Black. London: Longman & Co. and all Booksellers.

LISTER WORKS, HOLLOWAY.

WENHAM'S BINOCULAR MICROSCOPE.

Having increased our facilities for the manufacture of the Prisms, as well as the other parts of this important improvement in the Microscope, we are now enabled to make the addition to any Microscope, when it is really practicable, at the cost of 7l. 10s. In the case of new Instruments, the extra price will be only 6l.

SMITH, BECK & BECK.

September, 1861.

CATALOGUES, giving full particulars respecting Microscopes, Stereoscopes, &c., may be had on application, or sent post free.

J. H. DALLMEYER (Son-in-Law and Pupil of the late ANDREW ROSS) Respectfully begs to inform the Scientific Public that he exclusively manufactures the ASTRONOMICAL TELESCOPE according to A. R.'s processes, who has also bequeathed to him the whole of that faculty.
For particulars of J. H. D.'s recent IMPROVEMENTS in MICROSCOPIC OBJECT-GLASSES, PHOTOGRAPHIC LENSES, &c. see Catalogue, which may be had on application at 19, BLOOMSBURY-STREET, Oxford-street, W.C.

UNIVERSAL LIFE ASSURANCE SOCIETY,
No. 1, KING WILLIAM-STREET, LONDON, E.C.
Established in the Year 1854.
Committees in Calcutta, Madras and Bombay.
Agents throughout India.

The last Annual Reduction of Premium amounted to 45 per cent., so that a person being assured for 1,000l. at the age of 30 is now paying 13l. 7s. 7d. instead of 24l. 8s. 4d.
INVESTED CAPITAL UPWARDS OF 750,000l.
M. E. IMPEY, Secretary.

METROPOLITAN LIFE ASSURANCE SOCIETY,
No. 3, PRINCES-STREET, BANK, E.C. Established 1865.

Advantages of assuring with this Society:—
Economic management, no paid agents, and no commission allowed.
The whole of the profits applied to the reduction of the premiums of members.
The guarantee of an accumulated fund exceeding 925,000l.
A gross annual income of 148,000l.
Amount paid in claims without a single instance of dispute, 600,000l.
Returned to members in reduction of their premiums, 500,000l.
HENRY MARSHALL, Actuary.

NORTH BRITISH INSURANCE COMPANY,
Head Office—44, PRINCES-STREET, Edinburgh.

London Office—4, New Bank-buildings, Lothbury.

LIFE DEPARTMENT.

Policies opened before 31st December will be entitled at next Distribution of Profits, in 1865, to rank for five years' bonus.

PROGRESS OF BUSINESS.

	Policies	Sum Assured.
For five years, from 1853 to 1857 inclusive, the annual average was	267	256,946
In 1858, the Policies issued	455	277,420
1859	605	449,913
1860	741	475,649

This increase in the business of the Company will, it is expected, beneficially affect the Bonus to be declared at next Division of Profits.

New and liberal conditions of Assurance have recently been adopted, particulars of which, together with Prospectuses and all necessary information, may be had as above, or will be forwarded.
ROBERT STRACHAN, Secretary,
4, New Bank-buildings, October, 1861.

INSTITUTED 1834.
SCOTTISH UNION FIRE AND LIFE INSURANCE COMPANY.

London Office, 37, Cornhill; Edinburgh, and Dublin.
The books closed for the quinquennial division of profits on the 31st July last.

The bonus will be declared at the Annual General Meeting of the Company, on the 4th December next.
Persons desiring life insurances now, and before the end of July next, will be entitled to five full years' profits at the division in 1865.

Mercantile and other Fire Insurances on the most liberal terms and conditions.

No. 37, Cornhill, London.

EMPOWERED BY ACT OF PARLIAMENT, 3 WILL. 4.

THE ECONOMIC LIFE ASSURANCE SOCIETY,
6, NEW BRIDGE-STREET, BLACKFRIARS, LONDON.
Established 1853.

Directors.

ROBERT BIDDULPH, Esq., Chairman.
WILLIAM ROUTH, Esq., Deputy-Chairman.

Alfred Kingsford Barber, Esq.	Sir Alexander Duff Gordon, Bt.
Henry Barnett, Esq.	Rear-Admiral Robert Gordon.
The Right Hon. E. Playdell	Charles Morris, Esq.
Bouverie, M.P.	George Kettibby Rickards, Esq.
Edward Harrington, Esq.	Augustus Keppel Stephenson, Esq.
Passcoe Charles Glynn, Esq.	

Actuary—James John Downes, Esq. F.R.A.S.
Secretary—Alexander Macdonald, Esq.

The Society offers the following advantages:—
The Lowest Rates of Premium on the Mutual System.
The whole of the Profits divided every Fifth Year.
Reversionary Bonuses have been added to Policies to the extent of 1,365,000l.

The last Bonus, declared in 1859, which averaged 63 per cent. on the Premiums paid, amounted to 475,000l.
8,471 Policies are now in force, yielding an annual income of 180,000l., assuring the sum of 6,637,572l., which, with 610,337 Bonus additions, makes a total liability of 7,308,390l.
The Invested Capital is 1,911,500l., producing upwards of 74,000l.
—Thus making the present Annual Income of the Society 255,000l.
Service in the Militia, Yeomanry or Volunteer Corps will not affect the validity of Policies.
Prospectuses and further particulars may be obtained on application.

ACCIDENTS OF ALL KINDS, AND FROM ANY CAUSE, may be provided against by an Annual Payment of 2l. to the RAILWAY PASSENGERS' ASSURANCE COMPANY, which secures 1,000l. at death by Accident, or 6l. weekly for Injury.
NO EXTRA PREMIUM FOR VOLUNTEERS.
ONE PERSON in every TWELVE insured is injured yearly by ACCIDENT.

75,000l. has been already PAID as COMPENSATION.

For further information apply to the Provincial Agents, the Railway Stations, or at the Head Office, 64, Cornhill (late 2, Old Broad-street).

ANNUAL INCOME, 40,000l.

CAPITAL, ONE MILLION.

WILLIAM J. VIAN, Secretary.

64, Cornhill, E.C., January, 1861.

THE SCOTTISH WIDOWS' FUND
LIFE ASSURANCE SOCIETY, the oldest Life Office in Scotland, is now, in annual revenue and extent of business, the largest Mutual Life Office in the world.

I. BONUS SYSTEM.

Bonuses are declared on the original sum assured, and on Bonuses added at previous Divisions of Profits; and, accordingly, the Policies of this Society increase in a ratio similar to a sum of money laid out at compound interest. At the last Division of Profits for the seven years ending 31st December, 1859, the additions varied from 1l. 6d. per cent. to 3l. 6s. per cent. per annum under the youngest policy, up to 3l. 6s. per cent. per annum on the older policies. These additions formed one of the largest bonuses ever declared by any insurance company, being equal to an average Bonus of from 50 per cent. on the seven premiums paid on the more recent policies, to 107 per cent. on the older policies.

Persons intending to effect assurances will bear in mind that these unusually large bonuses have all been declared out of profits actually realized at the respective terms of division, and that every element of profit ever possessed by the Society, with vastly increased resources, remains for the increase of present and new members' policies.

II. CASH VALUE OF POLICIES PAYABLE ON DEMAND.

Many offices decline giving any surrender value, unless the policy shall have been of a certain number of years' standing, although the premiums paid greatly exceed the risk borne by the office and the proper expenses of the assurance. The practice of the Scottish Widows' Fund is, and always has been, to pay at any time from the day of the issue of a policy the actual office value, and even when the policy is issued by non-payment of the premiums during the 12 months within which they can be received, an allowance equal to the full surrender value is paid.

These two important features, viz.—1. The largeness of the bonuses declared out of realized profits; and 2. The certainty from the first of a fixed cash value being paid to the member himself in the event of his desiring to discontinue his assurance—render policies in the Scottish Widows' Fund, whether held for family or business purposes, instruments of the highest value.

III. FUNDS AND REVENUE.

Invested Funds, 3,700,000l. Annual Revenue, 430,000l.

A NEW PROSPECTUS.

containing detailed tables, explanations, and examples of the practical results of the above, and other important features, will be sent free on application to the Head Office, or any of the Society's Agents.

SAMUEL RALEIGH, Manager.

J. J. P. ANDERSON, Secretary.

GLENFIELD PATENT STARCH,
WHEN YOU ASK FOR
SEE THAT YOU GET IT,
AS INFERIOR KINDS ARE OFTEN SUBSTITUTED.
WOTHERSPOON & CO., GLASGOW AND LONDON.

FOR DEAFNESS, arising from the accumulation of Cerumen, SAVORY & MOORE'S PATENT EAR DOUCHE is a valuable substitute for ordinary Syringes. Patients use it without assistance, and the possibility of injury to the interior of the Ear and the splashing and inconvenience attending the use of Syringes are entirely obviated. — SAVORY & MOORE, Chemists to the Queen, 143, NEW BOND-STREET, LONDON.

MANUFACTURERS OF IMPROVED ENEMAS.

RUPTURES.—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 300 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of a steel spring, so often hurtful in its effects, is here avoided: a soft bandage being worn round the body, while the elastic resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive Circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the Manufacturer.

Price of a Single Truss, 16s. 31s. 36s. 6d. and 31s. 6d.; postage, 1s. 8d.
Double Truss, 31s. 6d., 42s. and 53s. 6d.; postage, 1s. 8d.

P. O. O. made payable to JOHN WHITE, Post-Office, Piccadilly.

ELASTIC STOCKINGS, KNEE-CAPS, &c.
for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are worn on both an ordinary stocking. Price 4s. 6d., 7s. 6d., 10s. and 18s. each; postage 6d.
JOHN WHITE, Manufacturer, 233, PICCADILLY, London.

DENT, CHRONOMETER, WATCH and CLOCK MAKER to the Queen and Prince Consort, and **MAKER OF THE GREAT CLOCK FOR THE HOUSE OF PARLIAMENT**, invites attention to the superior Workmanship and elegance of Design of his extensive Stock of Watches and Drawing-room Clocks.

Guinea.		Guinea.

DUBLIN—College Green.
LIVERPOOL—Church-street.

MANUFACTORY and SHOW ROOMS, Newhall-street, Birmingham.
Estimates, Drawings and Prices sent free by post. Engraving and Gilding as usual.

STAINED GLASS WINDOWS for CHURCHES and DWELLINGS.

HEATON & BUTLER will forward, post free, on receipt of thirty stamps, their **ILLUSTRATED PRICED CATALOGUE** of Stained Windows, with a Treatise on the Principles and Practice of the Art.

STAINED GLASS WORKS, 24, CARDINGTON-STREET, Hampstead-road, London, N.W.

MORTLOCK'S CHINA WAREHOUSE, 250, OXFORD-STREET.—**SELLING OFF**.—In consequence of the Marquis of Westminster's refusal to renew the Lease of the above Premises (in connection with Park-street), JOHN MORTLOCK is anxious to decrease his **RICH STOCK**, and is prepared to make a great allowance for Cash.—250, OXFORD-STREET, and 58, PARK-STREET, near Hyde Park.

ALLSOPP'S PALE ALE, in Bottle, recommended by Baron Liebig and all the Faculty, may now be had in the finest condition of Messrs. **HARRINGTON PARKER & CO.**, 44, Pall Mall, and 144, Regent-street, Waterloo-place, S.W.

CAUTION.—SMEE'S SPRING MATTRESS. TUCKER'S PATENT, or SOMMIER TUCKER. Comfortable, cleanly, simple, portable and inexpensive. Purchasers are respectfully warned against infringements and imitations, in which somewhat of the general appearance of the **SMEE'S SPRING MATTRESS** is carefully preserved, but all its essential advantages are sacrificed.

WILLIAM SMEE & SONS, having now the entire of the Patent Right, are able to announce the following considerably **REDUCED SCALE OF PRICES.**

Size No. 1 for Bedsteads 4 feet wide	25s. 6d.
" " " " " "	37s. 6d.
" " " " " "	45s. 6d.

Other sizes in proportion. To be obtained of almost all respectable Upholsterers and Bedding Warehousemen.

ESPECIAL NOTICE should be taken that each Spring Mattress bears upon the side the Label, "Tucker's Patent."

FENDERS, STOVES, FIRE-IRONS and CHIMNEY-PIECES.—Buyers of the above are requested, before finally deciding, to visit **WILLIAM S. BURTON'S SHOW-ROOMS**. They contain such an assortment of **FENDERS, STOVES, RANGES, CHIMNEY-PIECES, FIRE-IRONS and GENERAL IRONMONGERY**, as cannot be approached elsewhere, either for variety, novelty, beauty of design or excellence of workmanship. Bright Stoves, with or without ornaments, at two sets of prices, 2s. 6d. to 32s. 6d.; Bronzed Fenders, with standards, 7s. 6d. to 12s.; Metal Fenders, 3s. 6d. to 11s.; Ditto, with rich or-molu ornaments, from 2s. 6d. to 18s.; Chimney-pieces, from 1s. 6d. to 100s.; Fire-irons, from 2s. 6d. to 4s. 6d.—The **BURTON** and all other **PATENT STOVES**, with radiating hearth-plates.

BEDSTEADS, BATHS and LAMPS.—**WILLIAM S. BURTON** has **SIX LARGE SHOW-ROOMS** devoted exclusively to the **SEPARATE DISPLAY** of Lamps, Baths and Metallic Bedsteads. The stock of each is at once the largest, newest and most varied ever submitted to the public, and marked at prices proportionate with those that have tended to make his establishment the most distinguished in this country.

Bedsteads, from	12s. 6d. to 50s. 0d. each.
Shower Baths, from	8s. 0d. to 25s. 0d. each.
Lamps (Moderate), from	6s. 0d. to 27s. 0d. each.

(All other kinds at the same rate.)
Pure Colza Oil, 4s. 6d. per gallon.

CUTLERY, WARRANTED.—The most varied assortment of **TABLE CUTLERY** in the world, all warranted, is on **SALE** at **WILLIAM S. BURTON'S**, at prices that are remunerative only because of the largeness of the sales. 24-inch ivory-handled table knives, with high shoulders, 12s. 6d. per dozen; deserts to match, 10s.; if to balance, 6d. per dozen extra; carvers, 4s. 3d. per pair; larger sizes, from 20s. to 27s. per dozen; extra fine ivory, 32s. 6d. if with silver ferrules, 40s. 6d.; white-bone table knives, 6s. per dozen; deserts, 5s.; carvers, 2s. 6d. per pair; black-horn table knives, 7s. 4d. per dozen; deserts, 4s.; carvers, 2s. 6d.; black wood-handled table knives and forks, 6s. per dozen; table steels, from 1s. 6d. The largest stock in existence of plated cutlery knives and forks, in cases and otherwise, and of the new plated silver carvers.

WILLIAM S. BURTON'S GENERAL FURNISHING IRONMONGERY CATALOGUE may be had gratis, and free by post. It contains upwards of 500 Illustrations of his Iron, Brass, and Copper Goods, and Electro-Plated Nickel Silver and Britannia Metal Goods, Dish-Covers, Hot-water Dishes, Stoves, Fenders, Marble Chimney-pieces, Kitchen Ranges, Lamps, Gasaliers, Tea-Trays, Urns and Kettles, Clocks, Table Cutlery, Baths, Toilet Ware, Furniture, Iron and Brass Bedsteads, Bedding, Bed-room and Cabinet Furniture, &c. with Lists of Prices, and Plans of the Twenty large Show-rooms, at 20, Oxford-street, W.; 1, 1A, 2, 3, and 4, Newman-street, 4, 5, and 6, Perry's-place; and 1 Newman-mews, London.

TEA.—DR. HASSALL'S ("The Chief Analyst of the Sanitary Commission of the Lowest on Food") Report on the Tea and Coffee sold by Messrs. STRACHAN & CO. 26, Cornhill, London, E.C.—Having purchased through my own agents, and in the ordinary way of business, a variety of samples of the several qualities of Tea and Coffee vended by Messrs. Strachan & Co., I have subjected the whole of them to Microscopical Examination and Chemical Analysis. The result of the examinations obtained was in the highest degree satisfactory.

A full Report of the above Analysis, also List of Prices, can be had on application to Messrs. STRACHAN & CO. 26, Cornhill, E.C. London. Cards to all parts of London daily.

A MOST DESIRABLE BREAKFAST BEVERAGE.

EPPS'S COCOA, (commonly called Epps's Homoeopathic Cocoa).

The delicious aroma, grateful smoothness, and invigorating power of this preparation, have procured its general adoption as a most desirable breakfast beverage. Each packet is labelled "James Epps, Homoeopathic Chemist, London." 1 lb., 1 lb., and 1 lb. Packets, at 1s. 6d. per lb., by Grocers everywhere.

LOCK-STITCH SEWING MACHINES, Manufactured by the **WHEELER & WILSON** Manufacturing Company, with Recent Improvements. Crystal Cloth Presser, new style Hemmer, Binder, Cord, &c. Offices and Sale Rooms, 139, REGENT-STREET, W. LONDON (late 483, Oxford-street). Instructions to every part of the world. The Lock-Stitch Sewing Machine will Gather, Hem, Fell, Bind, or Stitch, with great rapidity, is the best for all descriptions of work, is simple, compact, and elegant in design, the work will not wrack, and is the same on both sides; the speed is from 1,000 to 3,000 stitches per minute; a child 12 years old can work it, and the Machine is suitable alike for the Family or the Manufacturer. Illustrated Prospectus, with Testimonials, gratis and post free.

STOVES for ENTRANCE HALLS, SCHOOL ROOMS, CHURCHES, &c. all made with fire-brick linings, and entirely free from the objections found to so many, which, from their liability to become overheated, are dangerous, and render the atmosphere offensive. These Stoves burn little fuel, may be had with or without open fire, and to burn throughout the cold season, if required, without going out. Illustrated Prospectus forwarded. **FREDERICK EDWARDS & SON**, General Stove and Kitchen Range Manufacturers, 49, GREAT MARLBOROUGH-STREET, W. For 26 years in Poland-street, adjoining.

DR. DE JONGH'S (Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world, as the safest, most digest and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS. Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir **JOSEPH OLLIFFE, M.D.**, Physician to the British Embassy at Paris.—"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

Sir **HENRY MARSH, Bart. M.D.**, Physician in Ordinary to the Queen in Ireland.—"I consider Dr. de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to cause disgust, and a therapeutic agent of great value."

Dr. **LAWRANCE**, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr. de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr. **LANKESTER, F.R.S.**, Superintendent of the Food Collection, South Kensington Museum.—"I consider the Cod Liver Oil sold under Dr. de Jongh's guarantee to be preferable to any other kind as regards genuineness and medicinal efficacy."

Dr. **de JONGH'S LIGHT-BROWN COD LIVER OIL** is sold only in bottles, 2s. 6d.; 1 lb., 5s. 6d.; 2 lb., 10s. 6d.; 4 lb., 20s. 6d.; and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.

SOLE COUNTRYMEN: **ANSAR, HARFORD & CO.** 77, Strand, London, W.C.

CAUTION.—Beware of proposed Substitutions.

JENNER & KNEWTUB have just OPENED

their **NEW SHOW-ROOMS** with a superb Selection of **ELEGANCES and NOVELTIES** for the **BOUDOIR, Toilet and Writing Table**, Dressing Bags and Writing Cases, Photograph Books, and Albums, in every variety of Binding, 5s. to 30 guineas. All the new Almanacks, Pocket-Books, &c. 3,000 Carte-de-Visite Portraits. Lists post free. **JENNER & KNEWTUB**, 33, St. James's-street, and 66, Ferny-street, E.W.

HARVEY'S SAUCE.—CAUTION.—The admirers of this celebrated Sauce are particularly requested to observe that each bottle bears the well-known label, signed "Elizabeth Lazenby." This label is protected by perpetual injunction in Chancery of the 9th July, 1856, and without it none can be genuine.

ELAZENBY & SON, of 6, Edwards-street, Portman-square, London, as sole Proprietors of the receipt for Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.

Sold by all respectable Grocers, Druggists and Oilmen.

ELAZENBY & SON beg to offer to notice their selections of **NEW FOREIGN PRESERVED FRUITS** for Dessert—Apricots, Greenages, Peas, Strawberries, Angelica, and other kinds, Crystallized and Girded; Dried Cherries, Almonds, Muscadel Raisins, Figs, French and Elvas Plums, Normandy Pippins, Valencia and Sultan's Raisins, Currants, &c. Their Sauces, Pickles, Jam, Fruit, Tea, Coffee, Sugar, Spices, Sops, Colza and other Oils, Candles, and General Groceries, will also be found of the best descriptions.

6, Edwards-street, Portman-square, London, W. N.B.—Sole Proprietors of the receipt for HARVEY'S SAUCE.

SAUCE—LEA AND PERRINS beg to caution the Public against Spurious Imitations of their world-renowned **Worcestershire Sauce**.

Purchasers should **ASK FOR LEA AND PERRINS' SAUCE**, Recommended by Counselors at Law.

"THE ONLY GOOD SAUCE."

* * * Sold Wholesale and for Export, by the Proprietors, Worcester; Messrs. **CROSSE & BLACKWELL**, London, &c. &c.; and by Grocers and Oilmen universally.

TAIT'S ORIENTAL BALM.—The most efficacious means yet discovered for Strengthening, Preserving, Restoring, and Beautifying the Hair. Prepared from a receipt by the late John Oldridge, inventor of the celebrated Balm of Columbia, under the experienced superintendence of his daughter and son-in-law, Mr. and Mrs. Tait. To be had of all Perfumers, in bottles, at 1s., 2s., 6d., 5s., and 10s., and at the Manufactory of John Tait, 6, Cosmo-place, Southampton-row, Russell-square, W.C.

FOR WEAKNESS, INFLAMMATION and IRRITATION of the EYES, caused by the Winds, Blight, Close Application to Literary and other Professional Occupations, the **EYE-DOUCHE or FOUNTAIN**, invented by **SAVORY & MOORE**, for the perfect application of Cold Water, Eye Lotions, &c. The effects produced are grateful and refreshing, and the sight is improved and permanently strengthened by the regular use of the Douche.—**SAVORY & MOORE**, Chemists to the Queen, 124, NEW BOND-STREET, LONDON.—N.B. As the foundation of these Douches causes competition of the Vessels of the Eye, it is important to observe that the names of **SAVORY & MOORE** are conspicuous on all instruments of their manufacture.

BLAIR'S GOUT and RHEUMATIC PILLS.

Price 1s. 14d. and 2s. 9d. per box. This Preparation is one of the benefits which the Science of Modern Chemistry has conferred upon mankind; for, during the first twenty years of the present century, to speak of a Cure for the Gout was considered a romance; but now the efficacy and safety of this Medicine are so fully demonstrated, by uncollected testimonials from persons in every rank of life, that Public Opinion prescribes it as one of the most important Discoveries of the Present Age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all Medicine Vendors, and at 289, Strand, London.

METCALFE, BINGLEY & CO.'S New Palm-leaf Brushes and Penetrating unbleached Hair Brushes, Improved Flesh and Cloth Brushes, and genuine Smyrna Sponges, and every description of Brush, Comb, and Perfumery. The Tooth Brushes search between the divisions of the Teeth—the hairs never come loose. M. B. & Co.'s New and Delicious Perfumery. The Cherry Bouquet, the Orange and Cambrige Bouquet, in bottles, 2s., 3s., 4d. and 5s. each.—Metcalfe's celebrated Alkaline Tooth Powder, 2s. per box.—Sole Establishment, 120s. and 131, OXFORD-STREET.

DURABILITY OF GUTTA-PERCHA TUBING.—Many inquiries having been made as to the Durability of Gutta-Percha Tubing, the Gutta-Percha Company have pleasure in giving publicity to the following letter:—From **SIR RAYMOND JARVIS, Bart.**, VENTNOR, Isle of Wight.—"Second Testimonial.—March 14th, 1853.—In reply to your letter, received this morning, respecting the Gutta-Percha Tubing for Pump Service, I can state with much satisfaction, it answers perfectly. Many builders, and other persons, have lately examined it, and there is not the least apparent difference since the first laying down, now several years; and I am informed that it is to be adopted generally in the houses that are being erected here."—N.B. From this Testimonial it will be seen that the **CORROSION WATER of the ISLE of WIGHT** has no effect on Gutta-Percha Tubing.

THE GUTTA-PERCHA COMPANY, PATENTERS, 18, WHARF-ROAD, CITY-ROAD, LONDON.

CAPTAIN WHITE'S

CURRY or MULLIGATAWNY PASTE, Curry Powder, Curry Sauce, and Oriental Pickle, may be obtained from all Sauce Vendors, and wholesale of

CROSSE & BLACKWELL, Purveyors to the Queen, Foho-square, London.

DINNEFORD'S PURE FLUID MAGNESIA

has been, during twenty-five years, emphatically sanctioned by the Medical Profession and universally accepted by the Public, as the Best Remedy for acidity of the stomach, heartburn, indigestion, gout and indigestion, and as a mild aperient for delicate children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescent Draught, in which its Aperient qualities are much increased. During Hot Seasons and in Hot Climates, the regular use of this simple and elegant remedy has been found highly beneficial. It is prepared with the utmost attention to strength and purity, by **DINNEFORD & Co.** 173, New Bond-street, London; and sold by all respectable Chemists throughout the Empire.

THE ATHENÆUM

Journal of English and Foreign Literature, Science, and the Fine Arts.

No. 1780.

LONDON, SATURDAY, DECEMBER 7, 1861.

PRICE
THREEPENCE
Stamped Edition, 4d.

NOTICE.

The price of THE ATHENÆUM is now THREEPENCE.

Thirty years ago, when THE ATHENÆUM came into the hands of its present Proprietors, its price was Eightpence, and its contents, with advertisements, forty-eight columns. Convinced that the circulation of Literary Journals was restricted by high price, and that every advantage offered to the public would bring increase of circulation and authority, the Proprietors reduced the price one-half—to Fourpence. The experiment succeeded, and cheap Literary Journals became the rule.

The Proprietors have always held to the principle then proved. They have given to the public the benefit of every change in the law, increasing the size of the paper without increase of price, until the average has become double its former size—above ninety-six columns.

The Proprietors, taking advantage of the abolition of the Paper Duty, therefore resolved that the price of THE ATHENÆUM should be reduced to THREEPENCE.

ATHENÆUM OFFICE, Dec. 7, 1861.

NOTICE.—It is requested that Advertisements intended for insertion in the current week's publication be sent to this Office not later than Wednesday.

KING'S COLLEGE, LONDON.—INTERNATIONAL LAW.—Dr. Leone Levi, Professor of the Principles and Practice of Commerce, will deliver, at King's College, a Course of Six Lectures on the LAW OF NATIONS, including—the History, Principles and Authority of International Law—the Rights and Duties of Nations in time of Peace—Rights of Belligerents, Blockade and Privateers—Rights of Neutrals and Right of Search, and "Contract of War"—on the Evenings of the 12th, 16th, 19th and 23rd of December, 1861, and the 6th and 9th of January, 1862, at 6 o'clock.—Tickets for the Course, 1l. 1s. to be obtained at the College Office. R. W. JELF, B.A., Principal.

ROYAL INSTITUTION OF GREAT BRITAIN.

ALBEMARLE-STREET, LONDON, W.

November, 1861.

EGYPTIAN DESERT SANITARIUM, for the TREATMENT of PULMONARY and OTHER INVALIDS. The above Establishment, beautifully situated in the Desert, near Cairo, surrounded by Grounds and Gardens for Exercise, is intended to supply a want long felt by Invalids visiting Egypt, where they may, with the great advantage generally derived from the pure air of the Desert, have regular Medical Attendance, combined with domestic comfort.

The domestic arrangements are conducted by the Matron, Mrs. MICHAEL, under the medical and general superintendence of Dr. PATTERSON, the resident English Physician of Cairo. A limited number only can be admitted this season.—Terms: 30 Guineas per Month.

ALBUMS, 4s., hold 25; post free, 48 stamps, LONDON STEREOSCOPIC COMPANY, 54, CHEAPSIDE.

The Largest Selection in London.
ALBUM PORTRAITS, 10 for 10s.
"Theirs are the finest."—*Photographic News*.
"None are superior."—*Art-Journal*.
"Full of life."—*Athenæum*.

MAYALL'S PORTRAIT GALLERIES, 224 and 226, REGENT-STREET.
Photographs, Stereographs, and Daguerreotypes Taken Daily.

"Mr. Mayall stands supreme in Portraits, and is unrivalled for breadth, manner and finish. Either from the character of his sitters, or the taste of his composition, his portraits appear more dignified, self-possessed, and aristocratic, than those of any other photographer."—*Athenæum*.

BRITISH NATURAL-HISTORY SOCIETY.—The following Sets of FOSSILS are now being made up for distribution:—

Any one or more of the Collections may be subscribed for; the Subscription to be remitted when notice is sent that the Collections are ready for delivery.

EDWARD CHARLESWORTH, Secretary. Subscribers wishing to possess larger suites of Species are requested to communicate with the Secretary.

York, December, 1861.
An Association of Naturalists under the name of the British Natural History Society was formed in 1848, for the purpose of collecting Fossils, recent Shells, &c., and distributing the Specimens found (named and made up in sets amongst the Subscribers whose pre-paid contributions had furnished the means for setting the Association on foot. Of the beautiful Tertiary Fossils of the Isle of Wight and Barton Cliff, about 3,000 sets were issued; but the preparation of the specimens, and the correspondence with the Subscribers, occupied so much more time than was originally contemplated, that the delivery of the Collections fell into arrears. The liquidation of the arrears is now nearly accomplished, and for the future Naturalists who may wish to subscribe will not be expected to pay their Subscriptions until notice is given that the Collections are ready for delivery.

WIT AND WISDOM, PHILOSOPHY AND FUN.
MR. KIDD'S HOLIDAY "GOSSIPS."

"Let those now laugh who never laughed before, And those who always laughed now laugh the more."

From the SURREY EXPRESS.
"All the World knows that WILLIAM KIDD is a Philosopher, and there can be few who do not know that he is a laughing Philosopher—a Nature Magician too, gifted with the marvellous and happy power of charming the human heart at will.... Never shall we forget Mr. Kidd's recent visit to our town (Lewes). For more than two hours did he keep his large and happy audience in tip-top glee, winning the affections of every person present long before his 'Gossip' was over.... To give an additional zest to his Entertainment, Mr. Kidd noted both Worlds; and he was especially eloquent in praise of Animals. Birds, Beasts and Fishes, all were introduced in turn, and all contributed largely to the fun of the evening. The boys laughed, the girls laughed, the President laughed, the Secretary laughed, the ladies laughed; in fact, all laughed, including the Lecturer, who was (to the last) merry as the rest."

*. Particulars on Application; and (early) Previous Engagement absolutely necessary.
Apply, by letter only, to Mr. WILLIAM KIDD, 8, Great Castle-street, Regent-street, London, W.

EVANS'S ENGLISH HARMONIUMS for Cottages, Schools, Drawing-Rooms, Churches, Literary and other Public Institutions, are made in every possible variety at Prices from 6 to 140 Guineas. The Manufacturers have to announce the complete success of a New Patent Self-Acting Blowing Machine, the only self-acting blower that has ever succeeded, which may be seen in operation at Holles-street daily.

The most distinguished living Musicians, including Balfe, Sterndale Bennett, Cipriani Potter, Best, Henry Smart, &c., have testified to the extraordinary merits of Evans's Harmoniums. See Testimonials attached to Illustrated Catalogues of Harmoniums, to be had gratis of the Manufacturers, Boosey & Ching, 24, Holles-street, London, W.

EVANS'S ENGLISH MODEL HARMONIUM, with Two Rows of Keys, price 66 Guineas in Oak Case, or 70 Guineas in Rosewood Case, combines every modern improvement. The most beautiful and varied orchestral effects can be produced upon this instrument, which possesses every gradation of tone from the greatest power to the most delicate Pianissimo. The English Model Harmonium is managed with that facility which characterises all Evans's Harmoniums, and is equally effective both in the Drawing-room and Church.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

EVANS'S PEDAL HARMONIUMS, with independent Pedal Reeds, can be had either with a Single or Double Row of Keys. Prices from 51s. to 130 Guineas. Also, with the New Patent Self-Acting Blowing Machine.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

Digitized by Google

Scale, 54½ miles to an inch; Size, 6 feet by 4 feet 8 inches. Price, coloured and mounted, roller or case, 3l.; morocco case, 3l. 13s. 6d.; spring roller, 6l.

UNITED STATES AND MEXICO.

MAP of the UNITED STATES and MEXICO, with CANADA, NEW BRUNSWICK, NOVA SCOTIA and NEWFOUNDLAND, and PARTS of CENTRAL AMERICA and the WEST INDIES.

This Map, the materials for which have been collected by Professor H. D. ROGERS, of Boston, and others who, from official position, are intimately acquainted with the Countries represented, and the preparation for which has involved a large outlay of labour and expense, gives the correct Names and Position of Places; the Sea-board, as laid down in the elaborate Coast Surveys undertaken by the United States' Government and the British Admiralty; the Discoveries, resulting from recent explorations of the Countries situated east and west of the Rocky Mountains; the basin of the Great Salt Lake, and the regions of California; the recently erected Townships in Canada, and the fullest information regarding Canal and Railway communication. Enlarged Plans of the principal Cities and Ports are also introduced. At the present moment the Map will be viewed with the more interest on account of its elaborate delineation of the Mexican Territory, which it exhibits on a scale exceeding that of the largest General Atlas. The Island of Cuba is also a prominent feature; and it may be said that the Map embraces all the great points of interest now attracting so much attention to these parts of the world.

London: EDWARD STANFORD, 6, Charing Cross, S.W.

Size, 57 inches by 36 inches. Price, Two Sheets, coloured, 21s.; case, 25s.; rollers, varnished, 30s.

UNITED STATES OF NORTH AMERICA.

STANFORD'S NEW RAILWAY and COUNTY MAP of the UNITED STATES and TERRITORIES, CANADA. &c.

This Map will be found upon comparison to be very superior to those of a smaller scale. It exhibits the Subdivision of every State into its Counties, by which means the position of the smallest localities may be ascertained within narrow limits; the Railways of the United States are very elaborately delineated, and brought up to the present time; the numerous Ports and Harbours along the Atlantic and Gulf Coasts are fully distinguished; and the important Frontiers on the Great Lakes are seen to advantage on such a scale. The Map also embraces the whole of Upper Canada and the chief portion of the Lower Province, and shows the connexion of the Canadian Railway System with that of the States. The Pacific Coast is also included, together with the debateable Islands in Juan de Fuca Strait; the New Territories along the Rocky Mountains, which have been only very recently formed, are also laid down from official information.

London: EDWARD STANFORD, 6, Charing Cross, S.W.

Size, 52 inches by 40 inches. Price, 10s. 6d. in sheet; or mounted, in case, 16s.

MEXICO.

A GENERAL MAP of the REPUBLIC of MEXICO. By the Brigadier-General PEDRO GARCIA CONDÉ. Constructed from the Survey made by order of the Mexican Government.

London: EDWARD STANFORD, 6, Charing Cross, S.W.

Scale, 50 miles to an inch; Size, 48 inches by 44 inches.

Full Coloured, in sheet, 21s.; case, 25s.; roller, varnished, 30s.

AUSTRALIA.

STANFORD'S NEW MAP of AUSTRALIA. Delineating the

Colonies of New South Wales, Victoria or Port Philip, South Australia, Queensland, and Western Australia, divided into Counties; as well as all the Discoveries towards the Interior, including those of Messrs. Stuart, Gregory, Sturt, Kennedy and others. Tasmania is also shown in its relative position to Australia.

London: EDWARD STANFORD, 6, Charing Cross, S.W.

Just published,

Demy 8vo. handsomely bound in cloth, with Portraits and numerous Illustrations, price 21s.

RECOLLECTIONS OF A. N. WELBY PUGIN,

AND HIS FATHER,

AUGUSTUS PUGIN.

WITH NOTICES OF THEIR WORKS.

By BENJAMIN FERREY, Architect, F.R.I.B.A.

With an Appendix, by E. SHERIDAN PURCELL, Esq.

"But through the dim architectural lantern herein held forth, there gleam such glimpses of a passionate human soul, hard driven, but never overmastered till the end of its career, that we cannot refrain from attempting to elucidate a little more clearly this Agonistes' life, contending for forty years with a world of material difficulty, which it could and did overcome, and with a spiritual might which repulsed it hopelessly, and drove it to its rest through the anguish of madness and premature death;—a life not perfect, nor entirely noble—a hasty, rude, peremptory, unreasonable existence, incapable of repose, in many respects deficient, wanting in grace, gentleness and patience; but still according to its arbitrary and impatient strain, a life worth noting—the passion and conflict of a full-blooded and genuine man, through a world of phantoms, and creatures half alive."—*Blackwood's Magazine*.

"Abundant knowledge and warm interest in his subject entitled Mr. Ferrey to write Welby Pugin's life; and he has written it with an unaffected heartiness deserving the warmest praise; and, as to all essentials, as in dealing with the religious element in the life of one who was a convert to Catholicism, with good feeling and great tact."—*Examiner*.

London: EDWARD STANFORD, 6, Charing Cross, S.W.

LITERARY INTELLIGENCE.

Opinions of the Press.

The *Literary Budget* (which has of late excited some small attention in the world) is conducted with considerable energy and skill.—*Literary Gazette*.

Amongst the monthlies we would notice the *Literary Budget*, a summary of news in literature, drama, science and art. It is very cleverly done.—*Guardian*.

The *Literary Budget* certainly has no small pretensions to merit. It is written with great spirit, the articles being moulded palpably on the model of those in the *Saturday Review*. The collection of news, gossip and information is very extensive. *Illustrated London News*.

The *Literary Budget* is conducted with great vigour, and we understand that writers of distinction contribute to its pages. Literature, the Drama, Science and Art are impartially treated, and nothing can afford readers a better general idea of the progress of events. We should add that the printing is admirable. *John Bull*.

The *Literary Budget* is a periodical which aims at being a kind of monthly *Athenæum*. It seems exceedingly well done—the reviews and literary leaders being equal to the best kind of writing going. It deserves to succeed—and the public will be to blame if it does not.—*Press*.

The articles are ably written.—*Notes and Queries*.

Useful and well executed: the *Literary Budget* more than fulfils its object of being a monthly *Athenæum*.—*Spectator*.

The *Literary Budget* is a successful attempt to supply a thoroughly independent record of literary matters. The reviews are ably written; the *résumé* of literary news which is given attests a thorough knowledge on the part of the writers of what is passing in the literary world; and the gossip which it gives is interesting and valuable. If it adopts the same tone of independence which pervades the first number, it is not hazzarding much to predict for it a prosperous career.—*Observer*.

The *Literary Budget* is a monthly literary review of more than ordinary merit; the vigorous style adopted is a novelty, and it is pursued with great ability.—*News of the World*.

Although not, strictly speaking, a Magazine, the *Literary Budget* is so useful a periodical, that it may be fairly included with the number. The object of the work is to furnish a complete review of English and foreign literature. For this end, a list is given of new works published during the month, together with capital notices of nearly all of them. Works of importance are honoured with long, well-written reviews, whilst minor ones are dismissed with a few pointed sentences. In addition the *Literary Budget* contains all literary and artistic news, and some smart essays. For completeness, the Periodical stands unrivalled. *Shipping Gazette*.

The *Literary Budget* is one of the best monthlies, if it does not rank A.1. It is truly a marvel for the amount of matter it contains, the literary portion of the *Literary Budget* being the most extensive, complete, and admirable of all literary contemporaries; while the spirit and ability which characterize its reviews must render it invaluable to the man of letters, the author or student. As a complete Digest of News for the month, in Literature, Art, Science, Music and the Drama, and Politics, we honestly believe that the *Literary Budget* stands alone and foremost.—*Brd*.

Considering the variety of the subjects brought forward and the vigour and breadth that pervade their tenor, we must congratulate this new Serial on its excellent arrangement, and on the superiority of its contents. If it is carried on with all the same spirit and energy as marks its onset, there will be no cause to fear it will have other than a favourable reception, or not fulfill its promise of being a *Literary Budget* on an extended scale and an elevated principle.—*Sun*.

The *Literary Budget* is decidedly the most racy budget of literature issued from the press.—*Liverpool Albion*.

No other publication supplies such a mass of literary news as the *Literary Budget*.—*Hastings News*.

The only known publication to which we can liken the *Literary Budget* is the *Saturday Review*.—*Wigan Standard*.

We will not depreciate other publications, but we would say to the most popular, 'Look to your laurels, for the *Literary Budget* will prove a formidable rival.' With critical acumen equal to the best of similar publications, the *Literary Budget* possesses a mission all its own. If it has any fault, it is that of young writers inclined to the too mercenary use of the tomahawk and scalping-knife. Still, however the unfortunate victims may feel, the public will enjoy the freshness and earnestness which have been surely wanting of late years in most literary publications.—*Jersey Independent*.

CHAPMAN & HALL, 193, Piccadilly.

NEW ILLUSTRATED GIFT-BOOKS, PUBLISHED BY GRIFFITH & FARRAN, CORNER OF ST. PAUL'S CHURCHYARD.

Beautifully printed by Whittingham in Old English Type, with the Borders and Initial Letters in Red. Square 8vo. price 21s. cloth elegant; 27s. calf extra; 31s. 6d. Turkey morocco antique.

Spiritual Conceits.

Extracted from the Writings of the FATHERS, the OLD ENGLISH POETS, &c.
 With One Hundred entirely New Designs, forming Symbolical Illustrations to the Passages.
 By W. HARRY ROGERS.

"There is more thought in this beautiful book than is seen at a glance. The central emblem on its singularly elegant cover is of cross and crown; its central thought is that through struggle against evil we attain to good.... Apart from its meaning, nearly every drawing pleases the eye as a choice ornament by the arrangement of its lines and shadows.... Printed throughout in black letter, with red initial letters, it is by far the most complete and beautiful specimen of modern black letter we have ever seen."
 Examiner, Nov. 30.

THE WISDOM of SOLOMON,

FROM THE BOOK OF PROVERBS.

LONDON: JAMES NISBET & CO. BERNERS-STREET.

NEW ILLUSTRATED EDITION OF AIMARD'S TALES.

In Uniform Volumes, printed in clear Type and on superior Paper, with Illustrations by the most Popular Artists, cloth gilt, price 3s. 6d.

GUSTAVE AIMARD'S

TALES OF INDIAN LIFE AND ADVENTURE.

- | | | |
|-----------------------------|--------------------|------------------------|
| 1. TRAIL HUNTER. | 5. GOLD SEEKERS. | 9. BORDER RIFLES. |
| 2. PIRATES OF THE PRAIRIES. | 6. INDIAN CHIEF. | 10. FREEBOOTERS. |
| 3. TRAPPER'S DAUGHTER. | 7. PRAIRIE FLOWER. | 11. THE WHITE SCALPER. |
| 4. TIGER SLAYER. | 8. INDIAN SCOUT. | |

** An Edition, in ornamental boards, price 2s. each, is also ready.

NOTICE.—GUSTAVE AIMARD was the adopted son of one of the most powerful Indian tribes, with whom he lived for more than Fifteen Years, in the heart of the Prairies, sharing their dangers and their combats, and accompanying them everywhere, rifle in one hand and tomahawk in the other. In turn squatter, hunter, trapper, warrior and miner, Gustave Aimard has traversed America from the highest peaks of the Cordilleras to the ocean shores, living from hand to mouth, happy for the day, careless of the morrow. Hence it is that Gustave Aimard only describes his own life. The Indians of whom he speaks he has known; the manners he depicts were his own.

London: WARD & LOCK, 158, Fleet-street; and all Booksellers.

FOR CHRISTMAS.

On December 15 (Never before Published), price 1s. fcap. 8vo. pp. 256,

London: WARD & LOCK, 158, Fleet-street.

In Monthly Parts, Ninepence, to be completed in Fifteen Parts,

Parts I. to VI. ready December 23,

ILLUSTRATED UNIVERSAL GAZETTEER.

Edited by W. F. AINSWORTH, F.R.G.S.

On Dec. 23 will be published Parts V. and VI. of AINSWORTH'S ILLUSTRATED UNIVERSAL GAZETTEER, and the issue of two Parts every Month will be continued regularly till completion of the Work.

The Proprietors have much pleasure in announcing that this most valuable work is now far advanced at press, and that it will be completed in about Four Months from this time. The imperative necessity of accuracy, and the great labour and time involved in the production of the illustrations and letter-press, have caused an unavoidable delay, and compelled the periodical issue to be temporarily suspended. Subscribers are gainers by this, for the delay has afforded only necessary time to verify the accuracy of every statement, and to properly engrave the Photographs of the chief cities of the world specially obtained for this Gazetteer. It is emphatically asserted that the 'Illustrated Universal Gazetteer,' edited by W. F. Ainsworth, F.R.G.S., will be the fullest, cheapest, most recent, and most accurate Work of the kind extant.

London: HOULSTON & WRIGHT, 65, Paternoster-row.

Ready this day, with 400 Illustrations, cloth gilt, price 3s. 6d.

PRACTICAL AIDS

TO THE STUDY OF

Natural History, Botany, Geology, Mineralogy and Technology.

Adapted for the Use of Schools and Families.

By Dr. CARL ARENDT, Professor at the Military School of Munich. Translated and Edited by G. M. L. STRAUSS, Ph.D.
** This very instructive and interesting Work discourses in a popular manner on the various Forms and Developments of the Earth, Animals and Inanimate.

London: Ward & Lock, 158, Fleet-street.

This day, Illustrated with 500 Descriptive Engravings, price 3s. 6d. crown 8vo. pp. 450,

THE HOME TUTOR:

A TREASURY of SELF-CULTURE and Complete LIBRARY of USEFUL KNOWLEDGE, by the BEST MASTERS.

London: Ward & Lock, 158, Fleet-street.

On the 1st and 15th of every Month, in fcap. 8vo. paper covers, in the French Style of Binding,

THE SHILLING VOLUME LIBRARY.

The CHANCELLOR of the EXCHEQUER, when proposing the Repeal of the Paper Duty, used as an argument for its removal the superiority, both in paper and print, of French popular Literature over the same class of works produced in England; and he attributed the reason of this difference to the fact that paper was untaxed in France, while it was taxed in England. Happily this distinction no longer exists. On the 1st October paper became free of Taxation. Therefore the

SHILLING VOLUME LIBRARY

is projected with the view of giving to the reading public the full benefit of the abolition of the Paper Duty. Each book in the

SHILLING VOLUME LIBRARY

will present to the buyer the utmost possible value both in quantity and quality.

The greatest care will be taken, so as to render the

SHILLING VOLUME LIBRARY

in all respects unexceptionable reading both for the young as well as for the old.

The following are now ready:—

1. FAMILY CREDIT. By WESTLAND MARSTON.
2. WHICH WINS—LOVE OR MONEY? By the Author of 'WHITEFIARS.'
3. RECOLLECTIONS of a RELIEVING OFFICER. By E. P. ROWSELL.
4. LADY LISLE. By M. E. BRADDOCK.
5. The ROUND of WRONG. By EDMOND ABOUT. Translated by LASCELLES WRAXALL.
6. MEMOIRS of a LADY-IN-WAITING.

Will be ready, December 15,

7. CRUISE of the BLUE JACKET. By Lieut. WARNEFORD, R.N., Author of 'Tales of the Coast Guard,' &c.
8. SCENES WHERE the TEMPTER has TRIUMPHED. By Author of 'Gael Chaplain,' &c.

** Future Volumes, never before published, on the 15th and 1st of every Month.

London: Ward & Lock, 158, Fleet-street.

London: Ward & Lock, 158, Fleet-street.

A. W. BENNETT'S NEW PUBLICATIONS.

Crown 8vo. cloth, with Twenty Illustrations, price 10s. 6d.

WILL ADAMS, the FIRST ENGLISHMAN in JAPAN. A Romantic Biography. By WM. DALTON.

"We have no hesitation in recommending 'Will Adams' to any one who is interested either in Japan or in the history of the Christian religion."—*Saturday Review*.
"The book is exceedingly interesting. All that relates to Japan is as good as the best fairy tale."—*Spectator*.
"Possesses all the fascination of a romance, while it is richly deserving of a careful perusal on the ground of the *bond fide* information it so pleasantly conveys."—*Morning Star*.

Crown 8vo. Illustrated, price 7s. 6d.

MALTA, under the Phœnicians, KNIGHTS and ENGLISH. By WILLIAM TALLACK.

"It [the book] is probably the best guide the intended visitor to Malta can take with him. In a tone partly historical, partly scientific, partly antiquarian, and everywhere religious, the author tells us about all that is interesting in Malta, from the Bakery to the Religious Procession of Passion-week; from the Cabiri to the hammer-headed sharks."—*Literary Gazette*.
"The book is good reading, being both informing and interesting; and is likely to be often and long sought for for clear and accurate particulars of the natural history and the modern social condition of Malta."—*Nonconformist*.
"A pleasant volume on one of the pleasantest spots of the South of Europe."—*London Review*.

Crown 8vo. Illustrated, price 5s.

PETER JONES and the OJEB- WAY INDIANS; with special reference to their Conversion to Christianity. By Rev. PETER JONES (Kahkewagonahy), Indian Missionary. With a brief Memoir of the Writer.

"The quotations we have given will certainly recommend this graphically-written book to the Christian philanthropist."—*Nonconformist*.
"There is nothing connected with the character, mode of life, social institutions, government or religion of the Indians which is not described in a simple and instructive manner."—*Morning Star*.
"Full of graphic pictures and most interesting details of Indian life, manners, customs, religious feasts and sacrifices, wars, amusements, &c."—*Caledonian Mercury*.

Crown 8vo. Illustrated, price 5s.

NEW ZEALAND SETTLERS and SOLDIERS; or, the War in Taranaki: being Incidents in the Life of a Settler. By Rev. THOMAS GILBERT, formerly Pastor of the General Baptist Church, Ditchling, Sussex.

"The volume is a well-executed 'picture in little' of a highly-interesting portion of the globe, intimately connected with the mother-country."—*Morning Advertiser*.

Crown 8vo. cloth, price 2s. 6d.

The EARTH we INHABIT: its PAST, PRESENT and PROBABLE FUTURE. By Capt. A. W. DRAYSON, R.A.

"The book is neatly turned out, is a complete *multum in parvo*, and deserves to be examined with great care, and without prejudice; for the editor, to a mind gifted with common sense, is certainly most convincing. There will, however, probably, be considerable opposition offered to it by those whose fame has been built upon the various and intricate theories which are now supposed to explain all the above-mentioned facts, but which, in too many cases, merely mystify the reader, and leave the causes more obscure than ever."—*Kentish Independent*.

"The book broaches a curious and interesting theory: the author sustains it in a manner to compel attention, and writes with a vast amount of knowledge and profound scientific scholarship."—*Illustrated Paper*.

Fourth Edition, price 1s.

The SEARCH for a PUBLISHER; or, COUNSELS for a YOUNG AUTHOR. It contains Advice about Binding, Composition, Printing and Adver- tising; also Specimens of Type and Sizes of Paper. It is a complete *Literary Guide* for a Novice, and full of exact and trustworthy information. Sent post free.

"We wish we had seen such a book fifteen years ago, that's all. It is full of necessary information; and if thoroughly digested, it will save some head-aches, heart-aches, and perhaps—despicable as the consideration must be to the child of genius, quaffing nectar above the clouds—a few golden sovereigns, bearing the image and superscription of Victoria the First."—*Christian Weekly News*.

ALFRED W. BENNETT, 5, Bishopsgate-street
Without.

HOULSTON & WRIGHT, 65, Paternoster-row.

Elegy in a Churchyard.

A FAC-SIMILE of the AUTOGRAPH
ORIGINAL MANUSCRIPT of GRAY'S ELEGY in a
COUNTRY CHURCHYARD. Beautifully photographed by
Cundall & Downes. 8vo. 10s. 6d.

For Young People, beautifully Illustrated.

LIFE AMONGST the INDIANS. By
GEORGE CATLIN, the Indian Traveller. With 13 Illus-
trations. Small 8vo. cloth, price 6s.

"To compare a child's book with 'Robinson Crusoe,' and to
say that it sustains such comparison, is to give it high praise
indeed; this commendation, however, we bestow on Mr. Catlin's
work, which is one of the best volumes for the nursery or the
schoolroom we have ever read."—*Advertiser*, Oct. 26.

Also uniform, price 5s. each.

THE BOY'S OWN BOOK OF BOATS.
ERNEST BRACEBRIDGE; or, School-Boy Sports.
THE VOYAGE of the CONSTANCE.

LITTLE BIRD RED and LITTLE
BIRD BLUE: a Song of the Woods told for Little Ones at
Home. Beautifully printed, with Coloured Illustrations and
Borders, price 5s. bevelled boards.

"The appearance of a book like this, full of innocent fancy
and altogether childlike, is positively refreshing."
The Queen, Oct. 26.

Also uniform, price 5s.

CHILD'S PLAY, Illustrated in Colours by E. V. B.

GREAT FUN for LITTLE FRIENDS.
By the Author of 'The Voyage of the Constance.' With 29
large Illustrations by Edward Wehnert. 4to. cloth, 5s.;
Coloured, 7s. 6d.

Also, price 5s. with 200 Pictures,
THE NURSERY PLAYMATE.

The CHILDREN'S PICTURE-BOOK
of the SAGACITY of ANIMALS. With 60 Engravings.
Square, cloth, gilt edges, price 5s.; Coloured, 9s.

Also uniform, price 5s. each,

CHILDREN'S PICTURE FABLE-BOOK.
CHILD'S PICTURE TREASURY of PLEASURE BOOKS.

PAUL DUNCAN'S LITTLE by
LITTLE; or, the Cruise of the Flyaway. Edited by FRANK
FREEMAN. Fcap. cloth, gilt edges, price 3s. 6d.

Also uniform, price 2s. 6d. each, cloth, gilt edges,
DIFFICULTIES OVERCOME.
JACK BUNTLINE; or, Life on the Ocean.
THE BOY MISSIONARY.
THE BABES in the BASKET.

The CHILD'S PICTURE ALPHABET.
Edited by MARK WILSON. Price 6d.

Also shortly,
WILSON'S PICTURE PRIMER.

London: SAMPSON LOW, SON & CO.
47, Ludgate-hill.

MR. BENTLEY'S NEW PUBLICATIONS.

1. **MARY GRANVILLE.**—Mrs. DELANT'S AUTOBIOGRAPHY. Second Part; containing her Life at the Court of Queen Charlotte. 3 vols. demy 8vo. with numerous fine Engravings, 50s. [Immediately.]

2. **LIVES of the ARCHBISHOPS of CANTERBURY**, from the Mission of Augustine to the Death of Howley. By WALTER FARQUHAR HOOK, D.D., Dean of Chichester. Vol. II. 8vo. 15s. [Immediately.]

3. **LIVES of WITS and HUMOURISTS.** By JOHN TIMBS, F.S.A.

Dean Swift.	Theodore Hook.
Sir Richard Steele.	Rev. Sydney Smith.
Brinsley Sheridan.	The two Colman.
Goldsmith.	Forster.
Samuel Foote.	Horace and James Smith.

2 vols. crown 8vo. with 4 Portraits, 18s. [Nearly ready.]

4. **A RESIDENCE at NAGASAKI and HAKODATE in 1859-60.** With an Account of Japan. By C. P. HODGSON, Her Majesty's Consul at those Ports. With LETTERS on JAPAN, by his Wife. Crown 8vo. with numerous Illustrations, 10s. 6d. [Just ready.]

5. **THE AMERICAN UNION; its Value and real Effects on the Well-being of the American People.** The Causes of its Disruption and probable Results of the present Conflict; with an Examination of our own Interest in the Issue; and an Inquiry into Secession as a Constitutional Right. By JAMES SPENCE. 8vo. 10s. 6d. [Now ready.]

6. **MR. HENEAGE JESSE'S MEMOIRS of KING RICHARD III.** 8vo. price 15s. With Portrait and coloured Illustration. [Now ready.]

"This is a complete Memoir of Richard, tracing his career from his peaceful infancy at Middleham to its stormy close on Bosworth Field. We have here the story of his youthful love, of his marvellous heroism in battle, of his wisdom as a ruler, and of his crimes. The story is more exciting than any romance." *Daily News.*

7. **FRANCATELLI'S COOK'S GUIDE.** With 1,100 Recipes, and 40 Woodcuts, price 5s. [Now ready.]

8. **LORD DUNDONALD'S AUTOBIOGRAPHY.** Popular Edition, with Portrait, 5s. [Now ready.]

9. **EAST LYNNE: a Story of Modern Life.** By Mrs. HENRY WOOD. 3 vols. [A New Edition, now ready.]
"A tale of remarkable power; the whole story exhibits unquestionable genius and originality." *Daily News.*

&c. &c.	&c. &c.

[Now ready.]

14. **THE INGOLDSBY LEGENDS; or, Mirth and Marvels.** Twenty-eighth Thousand. New Illustrated Edition, in 2 vols. with all the Illustrations by Cruikshank and Leech, 15s.; or in 1 vol. with Illustrated Frontispiece, 5s. [Now ready.]

15. **M'CAUSLAND'S (Dr.), Q.C., SERMONS in STONES; or, Scripture Confirmed by Geology.** Eighth Edition, 4s. [Now ready.]

London: RICHARD BENTLEY, New Burlington-street.

HURST & BLACKETT'S NEW WORKS.

FRENCH WOMEN of LETTERS.

By JULIA KAVANAGH, Author of 'NATHALIE,' 'ADELE,' &c. 3 vols. 21s.

"Miss Kavanagh has shown taste and feeling in this agreeable book." *Athenæum.*
"A most attractive work, especially to the ladies of England." *Observer.*

"The name of the author of these charming volumes is a guarantee for their excellence. Miss Kavanagh's previous writings have been so sensible and attractive, that it was scarcely possible she could fail when undertaking the interesting task of relating the incidents in the lives of these celebrated French women of letters who flourished during the last few centuries, and most of whom exercised a marked influence on the times in which their lot was cast. The entire volumes abound with pleasing and interesting characteristics, and are also specimens of a style of composition as elegant as it is chaste." *Messenger.*

TRAVELS in the HOLY LAND. By FREDRIKA BREMER. Translated by MARY HOWITT. 3 vols. 21s.

The LIFE of J. M. W. TURNER, R.A. From Original Letters and Papers furnished by his Friends and Fellow Academicians. By WALTER THORNBURY. 2 vols. 8vo. with Portraits, &c. 30s.

"Mr. Thornbury may be congratulated on the completion of an arduous task, the difficulties of which, however, have been alleviated by the ready co-operation he has met with on all hands from the friends of the deceased artist, who have only been too glad to place their stores at his disposal. Impressed with the importance of the subject, the author has treated it with reverence and earnestness. Mr. Thornbury has honestly endeavoured to paint Turner truly, regarding him neither with the eyes of an enthusiast nor with those of a cynic. Mr. Thornbury's work must not only be considered as the very best he has written, but as a valuable addition to our artistic biography. To the professional student it will be especially interesting." *Spectator.*

The LIFE of Admiral Sir CHARLES

NAPIER, K.C.B.; with HIS CORRESPONDENCE. From his Private Papers. By Major-General ELMER NAPIER. 3 vols. 8vo. with Portrait and Charts. 30s.

"Sir Charles Napier will undoubtedly rank among the first of our sea worthies. He has found a worthy biographer and chronicler in the person of his stepson. The biography abounds in traits of character, and there are details of love, marriage and home-life which contrast very pleasantly with the more exciting scenes. The work brings all the incidents of the Admiral's life together, so as to create a story of great interest, with much that is amusing for the general, and more that is instructive to the professional reader." *Athenæum.*

The OKAVANGO RIVER. A Nar-

rative of Travel, Exploration and Adventure. By CHARLES JOHN ANDERSON, Author of 'LAKE NGAMI.' 8vo. with Portrait of the Author and numerous Illustrations. 21s.

"Mr. Anderson's book, from the number of well-told adventures, its rich fund of information, and spirited illustrations, will command a wide circle of readers." *Athenæum.*

TRAVELS in the REGIONS of the

AMOOH, and the Russian Acquisitions on the Confines of India and China. By T. W. ATKINSON, F.R.G.S., F.G.S., Author of 'Oriental and Western Siberia.' Dedicated, by permission, to Her Majesty. Second Edition. With Map and 83 Illustrations, 21s. bound.

MEMOIRS of QUEEN HORTENSE,

MOTHER of NAPOLEON III. Edited by LASCELLES WRAXALL. 3 vols. with Portrait, 21s. [Just ready.]

The VALLEY of a HUNDRED

FIRES. By the Author of 'MARGARET and her BRIDESMAIDS.' Illustrated by J. E. MILLAIS, A.R.A. 5s. bound. Forming the New Volume of HURST & BLACKETT'S STANDARD LIBRARY of CHEAP EDITIONS.

THE NEW NOVELS.

The LAST of the MORTIMERS. By

the Author of 'MARGARET MAITLAND,' 'THE HOUSE on the MOOR,' 'ADAM GRAEME,' &c. 3 vols.

"The reader of these volumes will find enough to rivet his attention and to awaken his liveliest sympathy. His feelings will be deeply stirred by the natural pathos and tenderness of the narrative, the interest of which grows more and more intense as it nears its dénouement. We have nowhere met with language more natural and touching than that employed in these volumes to express the various feelings of the narrators." *Daily News.*

"The Last of the Mortimers' has given us much pleasure. It is not only good in itself, but is quite as clever in its way as 'Mrs. Margaret Maitland,' and has something stronger in the fibre of its romance. The story is really so interesting that it would be injurious to tell it, as all novel readers must read it for themselves. It is the most powerful and most interesting novel by this authoress; and the world will thank her for more tales as good and as amusing." *Globe.*

WHITE and BLACK: a Story of the SOUTHERN STATES. 3 vols.

SIR RICHARD HAMILTON.

"This story is thoroughly thought out and well written. Its style is animated, and it contains many passages fraught with sound judgement and highly-toned feeling. It deserves a hearty welcome, for it is that pleasant rarity, a novel which evinces talent and taste." *Post.*

The HOME at ROSEFIELD. By

EDWARD COPPING. 3 vols.
"A very touching and life-like story, of great simplicity and beauty." *Daily News.*

The CASTLEFORD CASE. By

FRANCES BROWNE, Author of 'MY SHARE OF THE WORLD.' 3 vols. [Just ready.]

CHRISTMAS PRESENTS.

English Sacred Poetry of the 16th, 17th, 18th, and 19th CENTURIES: Selected and edited by the Rev. ROBERT ARIS WILLMOTT. Illustrated by Holman Hunt, Watson, Gilbert, Wolf, &c. 4to. cloth elegant, 21s.

Tennyson's Princess; with numerous Illustrations by D. MacIac, R.A. Large 8vo. cloth elegant, 10s. 6d.

Keats's Poetical Works. With a Memoir by R. MONCKTON MILNES, and 120 Illustrations by George Scharf, F.S.A. 8vo. cloth, gilt edges, 2s.

Bunyan's Pilgrim's Progress. Edited by GEORGE OFFOR. With a Portrait, and 110 Illustrations by J. D. Watson. 4to. cloth, gilt edges, 21s.

Tennyson's Poems. Illustrated by Mulready, MacIac, Creswick, Millais, Stanfield, and Hornsey. 4to. cloth elegant, 21s.

James Montgomery's Poems. Edited by WILLMOTT. Illustrated by Birket Foster, Gilbert, and Wolf. 4to. cloth elegant, 21s.

Wordsworth's Poems. Edited by WILLMOTT. With 100 Illustrations by Gilbert, Wolf, and Birket Foster. 4to. cloth, gilt edges, 21s.

Eliza Cook's Poetical Works. With Portrait, and Illustrations by Gilbert, Watson, and Wolf. 4to. cloth elegant, 21s.

Longfellow's Poems. With Portrait, and 140 Illustrations by John Gilbert. 4to. cloth, 21s.

Goldsmith's Poetical Works. Edited by WILLMOTT. Printed in Colours, from Designs by Birket Foster. Cloth elegant, 21s.

The Poets of the 19th Century. Edited by WILLMOTT. With 100 Illustrations by Birket Foster, John Gilbert, &c. 4to. cloth elegant, 21s.

Barnard on Landscape Drawing in WATER-COLOURS. Illustrated by Drawings printed in Colours, and numerous Illustrations. Large 8vo. cloth, gilt edges, 21s.

Campbell's Poetical Works. With Illustrations on Steel, from Designs by J. M. W. Turner, R.A., and a Portrait. 8vo. cloth, gilt edges, 16s.

Moore's Lalla Rookh. Illustrated by Corbould, Birket Foster, Thomas, &c. 4to. cloth elegant, 12s.

Rhymes and Roundelays in Praise of a COUNTRY LIFE. Illustrated by Ansell, Birket Foster, &c. 4to. cloth elegant, 15s.

Summer Time in the Country. By the Rev. R. A. WILLMOTT. Illustrated by Birket Foster. 4to. cloth, gilt edges, 10s. 6d.

Odes and Sonnets. Illustrated by Birket Foster and Bleigh. Cloth elegant, 10s. 6d.

Beattie's Minstrel. With 35 Illustrations by Birket Foster. Cloth elegant, 7s. 6d.

Jack Manly's Adventures by Sea and LAND. By JAMES GRANT. With Illustrations by Kirby Halswell. Fcap. 8vo. cloth, 5s.

The Red Eric; or, the Whaler's Last CRUISE. By R. M. BALLANTYNE. Illustrated by Coleman. Fcap. 8vo. cloth, 5s. 6d.

The Nursery Picture-Book. With 640 Illustrations, 5s.

A Book of Nonsense. By Edward LEAR. With 112 Funny Illustrations by the Author. 2s. 6d.

How to Make the best of It: a Book for Young Ladies. By ANNE BOURNEM. Illustrated by Absolon. Fcap. 8vo. cloth, 3s. 6d.

Through Life and For Life: a Tale for Young Ladies. By the Author of 'Annie Maitland.' Illustrations by J. D. Watson. 3s. 6d.

Tales of Charlton School. By the Rev. H. C. ADAMS. With Illustrations. Fcap. 8vo. cloth, 3s. 6d.

Eildon Manor: a Tale for Girls. By the Author of 'The Four Sisters.' Illustrations by Watson. 2s. 6d.

Shakespeare. Edited by H. Staunton. With 1,200 Illustrations by John Gilbert. 3 vols. royal 8vo. cloth, 21s. 10s.

The Picture-Book of Birds. By the Rev. J. G. WOOD. 322 Illustrations by Wolf, &c. 5s.

London: ROUTLEDGE, WARNE & ROUTLEDGE.

LONDON, SATURDAY, DECEMBER 7, 1861.

LITERATURE

Fac-similes of Certain Portions of the Gospel of St. Matthew, and of the Epistles of St. James and St. Jude, written on Papyrus in the First Century. By Constantine Simonides. (Trübner & Co.)

Is there no limit to public credulity? Is there no limit to the power of abusing this credulity? M. Simonides is not before the public for the first time; but he has never made a more singular appearance before it than as author of these "Fac-similes." It would seem that in the opinions of some men there is no possible folly that the British people may not be expected to accept and approve, if it be only presented to their notice with the requisite assurance. This view is, indeed, not wholly erroneous. The editor of 'Uranus' has found a printer and publisher, and he may, therefore, hope to find a public. When you find an ass's shoe, you may expect to find an ass. Weak and amiable people love to be gulled by an enterprising genius. Lancashire is not so critical as Berlin. After a long silence, M. Simonides speaks from an unexpected Lancashire home, without the fear of Lepsius and his myrmidons, and with the wealth, if not the learning, of Liverpool to sustain him,—an "honorary" member of a distinguished northern Society, the glory of provincial newspapers, the chosen associate—to quote the words which he so freely and offensively uses—of "those who love the Lord." No wonder that he makes the most of a position to which the incredulity of English scholars and the ready zeal of the Berlin police have raised him, and shows how resolutely he still adheres to the character which, some years since, he played in Eastern Europe and Germany.

Before we notice the wonderful Fac-similes now printed, it may be desirable for us to remind our readers of some of this Greek gentleman's antecedents, that we may not be deemed discursive should we value his lucubrations at a lower figure than Mr. Mayer and the Cheshire archaeologists. In the whirl of events the practices of M. Simonides must have been partially, if not wholly, forgotten, and thus an opportunity was afforded him of emerging from his retirement, armed with a mass of documents far weightier than any he has produced as yet. Now, of the early history of this gentleman we know so much as this, if we accept the story he has repeatedly told of himself: that he was the nephew of an old gentleman who had something to do with the MS. treasures preserved at Mount Athos, and that in this way he early acquired a taste for deciphering and copying MSS. Other stories, possibly as credible, declare that he came from Syme, in Caria, a statement in some degree confirmed by his publication of a work entitled 'Symais: a History of the School of Syme,' the genuineness of which no scholar has ever ventured to advocate. It is certain that many years ago M. Simonides came to Athens with a collection of the rarest MSS., sacred and classical, professedly obtained at Mount Athos, and containing, *inter alia*, an ancient Homer, with the complete Commentary of Eustathius, of which the Homer, on close examination, turned out to be a minutely accurate copy of Wolf's edition of that poet, *errata* included! We know, also, that in 1851 he proposed at Constantinople to publish a complete Sanchoniathon—but did not; that he, then, declared himself the possessor of an ancient Greek work on hierogly-

phics, whereby he attempted, but utterly failed, to read an inscription on a figure belonging to M. Cayol; that, on this, he asserted he had some cuneiform inscriptions in MS., with a transcript in Phœnician—which, however, he did not exhibit to the Constantinopolitan sceptics; and that, finally abandoning, perhaps fearing, Christian critics, he turned, though with little more success, to the Armenians and Turks. For the former he produced a history of Armenia, in which the names, through the clumsiness of the inventor, happened not to be Armenian; for the latter he promised the discovery of an Arabian MS. in Syriac characters, from an excavation then in progress near Atmeidan. The box containing the precious MS. was duly found; and M. Simonides, for a few minutes, was able to boast of being a prophet in his own land. Unfortunately, however, his "enemies" prevailed here as elsewhere, the workmen declaring they had seen M. Simonides burrowing in the hole while the excavators were indulging in luncheon! Need we wonder that the East could not afford room enough for his enterprise, and that he came soon after to Western Europe, bearing with him a goodly stock of rarities, and a reputation which the Cretans of the Apostolic times would have envied. Of course, poor England was to take the Levantine to her bosom:—wiser, more scholarlike Germany having been warned in time. Was this really so? M. Simonides did come to England; but his fame had preceded him, and when, at a solemn meeting of the Royal Society of Literature in May, 1853, he produced four books of the Iliad from his "uncle Benedictus" of Mount Athos, and spoke largely of an "Egyptian Hieroglyphical Dictionary containing an exegesis of Egyptian History," and the "Chronicles of the Babylonians, in Cuneiform writing, with interlinear Greek," men admired, as they well might, the zeal that could collect such treasures. They would, doubtless, have wondered still more had they known, as was pointed out that evening, that the so-called cuneiform characters belonged to no recognized form of these writings, while the Greek letters suspiciously resembled badly or carelessly formed Phœnician characters. Let it be borne in mind that if, in the course of his many dealings, M. Simonides has sometimes persuaded simple men like Sir Thomas Phillipps to purchase his pretended MSS., such good luck tells but little in his favour. Nothing is more easy than to deceive a red-hot collector, especially if the object produced be just what he chances to have sought far and wide. So it was that Lepsius, and Bunsen, and Dindorf fell, when exposed somewhat later to the wily blandishments of M. Simonides. The Germans wanted a confirmation of their own wild dreams; the Greek had the wit to cater for their wants: and some few scholars of a nation eminent for sagacity, heedlessly swallowed all he had ready for them. Not so, however, in England:—neither the British Museum nor the Bodleian failed to discriminate the chaff from the wheat, though the former institution bought no less than eleven genuine MSS. from him. From England M. Simonides migrated to Germany, and, as we have said, made fools, for a short time, of the ablest scholars of that country. They were, and are, very angry to have been made the dupes of a wholesale dealer in suspicious papers,—and we sympathize with them.

Such is a brief and a very inadequate sketch of the life and deeds of M. Simonides, so far as they had become public property, up to the explosion of the Uranus bubble. Since then we have heard nothing of him; and, for the comfort of biblioplists, and the repose of public libraries, we had hoped he had found

his way to the obscurity from which he had unhappily emerged. But he is among us again,—lively as ever, audacious as ever;—this time with a goodly folio, containing some fifteen lithographed plates of Papyri, &c., besides other illustrations.

As our readers may like to be amused, and may, at the same time, be curious to learn something of the discoveries which M. Simonides proposes for their acceptance, we give the following list. M. Simonides discovers:—1. Three fragments of St. Matthew, written by the hand of Nicholas the Deacon; 2. Two fragments of the Epistle of St. James; 3. A fragment of the Epistle of St. Jude; 4. Part of the eight first chapters of Genesis; 5. The Ten Commandments in Greek and Egyptian Demotic character; 6. The Voyages of Hanno the Carthaginian, more perfect, he tells us, than any yet known; 7. A piece of Aristæus; 8. The Oracles of Zoroaster Magus. All these, he asserts, are on Papyri, and written in the first century of our era. Then follow—Fragments of various historical writings; Seven Epistles of Hermippus, the son of Eumenides, of Berytus; A fragment of the Oikistika of Androsthenes, of Thassos; Two more Epistles of Hermippus, on Hieroglyphics and the Kings of Egypt; most, or all of which, he asserts, belong to the second century A.D.

Besides these, which we should think, if genuine, were wonderful enough, and, if real discoveries, far exceeding those made by Young, Champollion or Rawlinson,—indeed, by all the inquirers whose learning has adorned the nineteenth century,—M. Simonides claims a personal knowledge of MSS. of the earliest date, at Mount Sinai, at the Monastery of St. Sabbas, at that of St. Dionysius, of the first, second and third centuries respectively, together with one in the handwriting of the Emperor Theodosius, and a mass of miscellaneous documents relating to Papias and to Heliodorus the Elder, which, he tells us, are still "unfortunately unpublished."

Most of these extraordinary fragments M. Simonides declares he found among papyri collected by the Rev. H. Stobart, and now in Mr. Mayer's Museum, at Liverpool. The remainder are said to have belonged to a once well-known dealer in curiosities, Mr. Sams. M. Simonides appears to have made Mr. Mayer acquainted as quickly as possible with his discoveries; and that gentleman, with laudable zeal, at once assembled an archaeological meeting in his Museum, May 1, 1860, to whom he communicated them. The local journals vied with each other and with a London literary journal in trumpeting forth the wonderful news. "Many of the learned in Liverpool," says M. Simonides, "called on me in order to see the passages, and, after a minute inspection, heartily glorified God." Could M. Simonides oblige mankind with the names of these Liverpool sages? Many wise men of the metropolis, we are also told, saw these fragments, and were delighted at these discoveries; especially "the amiable and truly evangelical family of N. Banyard, Esq., who invited to their house, for the purpose of seeing and examining the fragments, several learned persons, all of whom were in ecstasies at the sight, and particularly the brother of Mrs. Banyard, a genuine servant of the Lord (whose name, unfortunately, I do not remember), who took for his text at evening devotions the 28th of St. Matthew, and offered up prayer and thanksgiving for the discovery of these sacred fragments of the oldest version of the New Testament!" What a pity that M. Simonides should have forgotten the name of this "genuine servant of the Lord." Perhaps

it may be recovered. What reason, scholars will ask, is there for putting more faith in this work of M. Simonides than in his previous labours, seeing that exposure has no terrors for him, and that he is ready to bring forward again, in 1861, what has been repeatedly shown in previous years to be forgeries? Perhaps he rests his claim to be heard again on the portrait of St. Matthew, which forms the frontispiece of his new work, and which, he says, "was executed in the fifth century by Hierotheus of Thessalonica, the saint portrait painter. . . . The original is preserved among frescoes of Athos. The copy here given was taken from it by C. S." Fifth century, indeed! either language must have lost its usual meaning, or M. Simonides must have gone stark mad. Byzantine art! why the original of this portrait, if, indeed, there be any original at Athos, is assuredly later than the times of Raphael or Michael Angelo, probably of a date not earlier than 1600. If M. Simonides really believes that such a portrait could be of the fifth century, the fact only proves that he knows no more of Art than of Theology and History.

The reader will have gathered from what we have already stated our opinion of the documents; but it may not be wholly useless to subject them to a closer examination. Now, in the first place, we consider it would require nothing short of a miracle to bring together in one place, at the bidding of any one person, so extraordinary a collection of rarities as M. Simonides avers he has found in Mayer's Museum during the researches of only two or three days. It may not be generally known, but it is an undoubted fact, that no MSS. of any kind, if we except the Hieratic papyri, are known to ascend to the first or second century, and that of those of the fourth or fifth there are not more than five or six throughout all the libraries of Europe; yet M. Simonides, if he is to be believed, has got these wonders "plenty as blackberries," there being, as it would seem, no limit to the treasures with which he kindly proposes to flood the world. Again, when we remember with what zeal the MS. treasures of antiquity have been hunted during the last three centuries, and especially within the last fifty years, we may pronounce it wholly past belief that so many and such valuable fragments should be huddled together in one small collection. More than this, as regards Mr. Stobart's papyri, though it may be true they were not all minutely examined while in the Museum, yet sufficient research was made among them to detect 'The Funeral Oration of Hyperides over Leosthenes,' which has been edited so admirably by the Rev. C. Babington. It could hardly be that every one of the important documents M. Simonides professes to have discovered among them should have been overlooked during the researches then made. On these and similar grounds, we hold that the *à priori* evidence against M. Simonides' new discoveries is irresistible. We are, however, prepared to go much further than this, and to declare, unreservedly, that we have no confidence whatever in any one of the documents he has just put forward; and this, not from the subject-matter of which they treat, but from the manner in which these MSS. have been made. We may add our belief, that there is not one person, however little acquainted with palæography, who will not condemn them wholly at the first glance; and more than this, that a careful examination of them has convinced us, that they are quite modern, and probably the work of some scribe of the nineteenth century. Of course, we have no means of knowing how it is that they have found their way into Mr.

Mayer's Museum, nor how many of them may actually have belonged to either Mr. Stobart or Mr. Sams. But if they are the product of one scribe — as would appear on the face of them — it is remarkable that they should have been found in one collection, in such suspicious company as Uranius & Co. and under the supervision and editing of M. Simonides. That the handwriting of all of them is that of one and the same person, we appeal with confidence to every one who has any acquaintance with early MSS. Let them compare, for instance, the Θ s, Es, As, Δ s, and they will not fail to perceive running through them all the most striking family likeness — a resemblance too remarkable to be the result of accident, and such as we nowhere find in genuine MSS. differing by centuries in date. The examiner will further notice, or we are greatly mistaken, on some of the MSS. what may be called fanciful or impossible letters; in other words, such letters as are met with nowhere else, and which we should be justified in declaring are not ancient Greek at all. We allude particularly to the transcript of a stone said to have been found at Thyatira, and published here in Plate I. B, p. 14. With some knowledge of palæography, we do not scruple to say that we have never yet seen a Greek inscription containing such a jumble of characters as this page presents; while among them we observe also a MS. Θ , if not some other letters, the form of which, so far as they resemble anything Greek, approach more nearly to MS. than to lapidary writing.

But our space warns us that we must bring to conclusion an article which, to do full justice to M. Simonides, might easily be extended through many pages. We omit, therefore, to remark on the theological bearing of these presumed discoveries and make no remarks on the words of many of his so-called ancient MSS., which read to our ears, in many cases, strangely like the most modern schoolboy's Greek. We are compelled also to pass over the interesting fact that M. Simonides speaks of an inscription proving that Pontius Pilate's wife was named Pempelpe, with his argument that, in the Received Text of the New Testament, the name Πεμπελη has been corrupted into Επεμψεν!! and his still more elaborate reasonings (mainly founded, as he asserts, on unpublished MSS. still in his possession) to prove the now well-settled question, whether St. Matthew's Gospel was first written in Greek or Hebrew. All these points will, we doubt not, be duly handled ere long by competent critics and scholars; nor will any one of those who can read the Greek Delectus, be found, we imagine, to accept either the MSS. or the arguments of M. Simonides.

For the same reason, we are compelled to pass over M. Simonides' further claim to have made known to the world the discovery of *Heliotypy*, which, he asserts, also from a MS. in his safe keeping, to have been invented by one Panselenus in the fourth century, and to have been stolen (from information received at Mount Athos) by a certain Frenchman named Daguerre; to say nothing of the properties of gun-cotton (*Βαμβάκοπυρίτις*!), which M. Simonides, from an equally authentic source, published to the world in 1843, in a tract entitled, *Χημικά Ἀθωϊκῶν*. So, too, we can only mention that M. Simonides professes to possess, indeed exhibited at the opening of the Brown Free Library, at Liverpool, an "Egyptian theological work in hieroglyphics, with a Greek translation, by Melambus, written on human (female) skin in the first century after Christ"; and, also, a Greek poem, by "Cenopides, written on pre-

pared human (female) skin," of the same date; though by what ingenuity M. Simonides can detect whether his presumed skin be male or female, is hard enough to conjecture.

Mr. Mayer, if he values his collection, should be more careful how he uses his MS. treasures. The Historic Society of Lancashire and Cheshire has surprised everybody by their selection of an "honorary" member. Our own opinion is, that not one of these pretended documents is genuine. We are not alarmed by the threat which M. Simonides levels against all those who object to his pretended relics of antiquity. We are content to share the abuse levelled at Dr. Cureton, Dr. Tregelles, and the authorities of the British Museum.

Supplementary Despatches, Correspondence and Memoranda of Field-Marshal Arthur Duke of Wellington, K.G. Edited by his Son the Duke of Wellington, K.G. Vol. VIII. *The Peninsula and South of France, June 1813 to April 1814.* (Murray.)

ALTHOUGH the hand of the Duke is less seen, perhaps, in this volume than in its predecessor, and there is more correspondence addressed to, than written by him, yet even the former serves to illustrate the man, and this volume, accordingly, sustains the interest and character of the series.

The period, as will be seen by the dates on the title-page, was an eventful one. The war was drawing towards a close, though its thunders boomed crashingly as ever over the world. The glory was now at almost uninterrupted flood, on the part of the army commanded by the Duke; and the last victories of those who drove the invading French from Spain were only the prelude to the triumphant entry and career of the invading Anglo-Spanish army into France.

Of this career and course the one thing remarkable in this volume is the respect which the men of most exalted rank pay to, and the reliance which the humblest as well as the highest place on, the Commander-in-Chief. Occasionally, indeed, we meet with negligent officers forgetting their duty and responsibilities, but as a rule every one immediately or remotely under his command exhibits zeal in the fulfilment of his office, and an earnest desire to find reward in their chief's commendation. He, meanwhile, is as unexcited as an Olympian deity; and as polite as a master of the ceremonies. Nevertheless, he can be moved by ignorant and injurious interference from home, as well as by mistakes and failures of his own officers in matters of greater or smaller importance; but in either case, he never loses his temper; he can be severe, but never, as it would seem, unjust; his commands and his censures are delivered with equal clearness and coolness, and "My Lord" is alike unimpassioned, whether he touches on the cutting of green corn, or directs the proper officer to be good enough to look to the shooting of a deserter.

In a certain prolixity of courtesy, Lord Wellington's notes differ greatly from those penned by "F.M. the Duke of Wellington." A General of Division is politely requested to be kind enough to press the enemy as much as he conveniently can; another is not ordered, but prayed to have the goodness to repulse the foe at a certain point; and a third is told that if he can contrive to effect a certain object which the Commander-in-Chief has in view, one of course very unpleasant to the enemy, he, the aforesaid Commander, will be exceedingly obliged to him. It was assuredly agreeable to

Lord Wellington's subordinate officers to be thus directed; but they were well aware that the order was not the less stringent for being conveyed in dainty phrase.

The sentiment which Nelson conveyed in his one memorable signal was implied, more or less, in every command or note of commendation addressed to his army by Wellington. Of acquiring glory he very rarely spoke; of the performance of duty, most frequently. Never, we believe, after the hardest-won victory did he vauntingly tell his men that they had covered themselves with "glory." They were informed that they had done their duty, and the men learned to value such expressions, for to be conscious that they had done what they ought to do, and what he expected from them, was praise enough; and it was warmly appreciated.

Again, when reference is made to the enemy, there is no vapouring, no railing, no denunciation of them, nothing of the malignity and mendacity which flowed especially from the pen of Napoleon, whose violations of truth occasionally staggered his not too scrupulous Marshals. If his adversary makes a point in the sanguinary game of war, Wellington makes no secret of it. His chivalrous spirit in this respect was beyond all praise; and there was policy in it too. He did not allow his men to think little of a check by glossing it over as a success. He stimulated them to recover the ground by showing what they had lost of it; and the feeling then was that they must go forward and make it good.

When speaking of his own deeds, nothing can be more simple than the style of the narrator. On the 22nd of June, 1813, he writes to his brother, Lord Wellesley:—"I attacked the enemy, under King Joseph, at Vittoria, yesterday, and gained a complete victory, having taken from them 151 pieces of cannon, &c. &c. . . . They went off very fast—much more expeditiously than we could follow them. . . . They say they have lost 20,000 men. . . . It is a curious circumstance that the battle was fought, yesterday, on the ground called in the country the *English Hills*, on which the Black Prince fought a battle against the French, and gained a victory in favour of Don Pedro, called the *Cruel*. I don't recollect the date of this battle." This last confession shows what little chance the great soldier would have had in a competitive examination. He would have been sent back to school in place of obtaining a commission.

Our victory at Vittoria was followed by a great evil for ourselves. The army became disorganized and insubordinate, chiefly through the negligence and incompetency of the officers. These Lord Wellington censured on the spot, and forwarded complaints of them to the authorities at home. In reply, the Duke of York writes:—"I strongly urge you, my dear Lord, to make examples, if necessary, among the higher ranks of officers under your command, to whose indolence and want of attention the principal blame must be attributed; and you may depend upon receiving my cordial support in the dismissal of any officer, from the senior General to the lowest Ensign." The sense of duty, with stringent measures, speedily restored order; but lest this should be interrupted when the army crossed the French frontier, flushed with victory, their leader, in the course of a long admirable Order of the Day, bade the officers and soldiers of his army to "recollect that England and Spain were at war with France solely because the ruler of the French nation will not allow them to be at peace." And further, "that the worst of the evils suffered by the enemy in his profligate

invasion of Spain and Portugal have been occasioned by the irregularities of the soldiers, and their cruelties, authorized and encouraged by their chiefs, towards the unfortunate and peaceful inhabitants of the country."

The conduct of the French authorities was in other cases most hurtful to their own followers. They made prisoners-of-war of our medical men who fell into their hands. When St. Sebastian was taken, the French "Officers of Health" most humbly implored to be set free, putting forward as ground for such a boon that they had humanely treated the English prisoners taken before the last successful assault. Lord Wellington orders his secretary to reply to their petition thus:—"Tell them that I am very much gratified by their care of the British wounded; . . . and I hope they will find that the numerous French wounded in our hands are invariably well taken care of. . . . That I am much concerned that the conduct of the French Government must prevent me from considering them otherwise than as prisoners-of-war." At a later period, the Baron de Maucune earnestly entreated to be set at liberty on parole, and urged as his claim to such favour that his brother, General Maucune, had treated Lord Paget kindly, after the latter was taken prisoner. "Return the enclosure," writes Lord Wellington to his secretary, "and tell him that I am obliged to act towards him and other French officers in the manner the French Government act towards our officers; and that, notwithstanding many French officers have, to my knowledge, been allowed to go to France on their parole, not one has been permitted to return: and not one English officer has yet been allowed to go to England, or to return to the army on his parole. Tell him that I should be happy to show any civility to General Maucune's brother, but that it is impossible."

If this was something like justifiable retaliation, Lord Wellington, on the other hand, generously and unceasingly exerted himself to protect the French people from consequences to which they had been exposed by the cruelty of their own Government. He saw that if the innocent people were harassed by marauders, one cause was in the negligence of officers who did not think it their business to interfere, but who were reminded that the possession of rank in the service was attended by the necessity for the performance of duty, and for attention to the maintenance of good order and discipline. He determines to send "officers so grossly negligent of their duty" to England, as he is "determined not to command officers who will not obey his orders." Officers are threatened with being made to pay for the damage done by the men under their control. "Till lately," he writes,—8th March, 1814,—"I could not say too much in favour of their conduct;" . . . but now, "I have no doubt the inhabitants of this country, however at first well inclined towards us, will be as much our enemies as the Spaniards and Portuguese ever were to the French army." In all these cases, the Commander attributes the conduct of the troops entirely to the regimental officers, whose incapacity, apathy or unwillingness he not only lashes severely, but traces "to the promotion of officers in regiments by regular rotation, thus holding forth no reward to merit or exertion." They are all brave enough, he allows, in going into action and defeating the enemy; but victory disorganizes them, and "I have always found that we lose more men in a pursuit than in any general action." Straggling parties were continually surprised and cut off, and Lord Wellington again pro-

tested, in vain, for awhile, against a condition of things so discreditable.

Matters improved as the troops fought and advanced. Towards the end of March, 1814, the Earl of Dalhousie writes from Bordeaux to the Field-Marshal, that "the regularity and excellent conduct of the troops astonish the city and even myself. I assure your Lordship I don't mean to pay them compliments in saying so." At this time the Duc d'Angoulême, nephew of Louis the Eighteenth, was also in Bordeaux, where there was as yet but a "gloomy suspense," and "no energy nor activity" on the part of the Bourbonite citizens, so uncertain still was the future career of events, and so great the lack of money to keep the Bourbonite cause progressing. It was not yet quite certain that all was lost for Bonaparte, or, if all *were* lost, that the Bourbons would necessarily be his successors. Bernardotte is spoken of in a communication forwarded to the Field-Marshal as "entertaining the somewhat romantic hope of being able to appear as a mediator between his allies and the French people, and receiving from the latter the sceptre, in testimony of its gratitude." This was absurd enough, but there is a scarcely less absurd report noticed in a letter of the 5th of April, 1814, from Sir C. Stewart to Viscount Castlereagh. "I believe they have been endeavouring," he says, "to have a decision for a regency for Buonaparte's son. This has been most peremptorily refused, and, if there were no other reasons, there is indisputable proof, I am told, that this child is not the son of Maria Louisa, but that she was delivered of a dead child, and this infant was substituted from a girl of one or two that Buonaparte had at the moment at hand in case of accidents. I have heard this from such authority I can hardly doubt it." This story, and the English in which it is expressed, are worthy of the writer, whom the late Duke of Buckingham has pilloried in his Correspondence.

Perhaps the most important portion of this volume will be found in the few pages at the end, written by the Duke in 1838, comprising a criticism of M. Choumara's book, published the preceding year, and which book professed to settle certain disputes between Marshals Suchet and Soult, and to award the victory in the Battle of Toulouse, not to the English, but to their adversaries. With regard to the disputes between the Marshals, our own Field-Marshal describes such disputants as caring less for the public interest than for the objects of their own ambition and aggrandizement. With respect to Suchet, he quietly points out his mendacity and exaggerations when the latter had a purpose to serve, and he says of Choumara's book generally, that it is "well worthy of attention, as showing the evils with which these great military establishments and systems are pregnant, and which must destroy them."

After this pregnant text, upon which M. Fould is now preaching sermons to Louis-Napoleon, the Field-Marshal turns to the question, who won the Battle of Toulouse, Wellington or Soult? It is only necessary to remember that the object of the British General was to dislodge the enemy from Toulouse and its neighbourhood, and that there was no other mode of effecting this but by forcing his entrenched position. This position was accordingly forced after a gigantic struggle, but Soult remained in the town a day after the battle was fought, and, therefore, according to Choumara, gained the victory. Soult, however, retreated from the town before the enemy could capture him in, or drive him out of it. "Toulouse," says Lord Wellington, "was a

field of battle, of which the principal fortified position most important in the view of those who attacked, as well as of those who defended it, was taken by the allied army after a desperate combat. The consequence of the battle was that the allied army took possession of the passages of the Canal de Languedoc above the town. In his letter to the *Ministre de la Guerre*, of the 12th of April, Marshal Soult says that the Allied army occupied the heights of Baziege by which he was to retire. In his letter of the 11th, he had expressed to the same minister and to Marshal Suchet his apprehension that he should have to fight his way out of Toulouse,—as he certainly would if he had not marched when he did." Nothing can well be more simple. Soult was driven from the key of the position, and after breathing his vanquished men for a few hours in the city which he could not keep, he fled with them thence, and left positions, city, people, cannon and stores, in the hands of those whom French writers denominate, with characteristic generosity, the vanquished! It will not be amiss to add that strict moralists regard Soult as the murderer of every man who fell on either side in the Battle of Toulouse. When he fought that battle, he was aware that the reign of his master was broken, that the Bourbons had been proclaimed in and accepted by France, and that, under such circumstances, to continue the contest was mere wanton blood-shedding. But the vanity of Soult was stronger than his humanity or sense of right. He struck a last blow in hopes to revive the cause, or give respectability to the fall of the great "Military Establishment" which constituted France. He failed, but denied his failure; and yet he was so little of an Imperialist when the Empire went to ruin that there was no more fanatic Bourbonite than he, when the priests congregated beneath the white flag on the Tuileries, nor a more unreserved friend of Orleans when Louis-Philippe had succeeded in overthrowing the dynasty of his cousins.

Lovel the Widower. By W. M. Thackeray. (Smith, Elder & Co.)

THERE is a superstition amongst many people that photographs are likenesses, and that, however hideous the result may be, the photograph only brings to light the ugly possibilities that lie dormant in the individual. Again, there is a notion that caricaturists produce the strongest likenesses; it being essential to the success of caricatures that every one should "recognize them at a glance." In both cases candid friends mildly insinuate against the "vanity" which protests against accepting the award. It is always easy to understand a dashing exaggeration; it saves trouble both to the artist and the public, and spares the skill and patience necessary to produce or to discern the delicate shades of the *poco meno e poco più* needed to make a genuine portrait. What is true of portrait-painting holds good of the art of delineating character. It is easy to produce a caricature which, by its exaggeration of some salient peculiarity, is certain to be recognized—and to raise a chuckle of recognition from its trick of resemblance to some people we have seen and observed; but that does not constitute a knowledge of human nature. Mr. Thackeray's present work—the sad failure of a man of genuine powers—seems to us to be in Literature what a photograph or a caricature is in Art. 'Lovel the Widower' was given out to the public in graduated measure, and there was not enough at once to allow the reader to ascertain the full flavour of it. The coarse pungency kept criticism in abeyance. There was the skilful delineation and clever

drawing of superficial manners and customs in the English society of to-day—club men, university tutors, lodging-house landladies, broken down militia captains, odious mothers-in-law, and victimized sons to match; in short, all the characters which are written in the chronicles of the Snobs, only that there was less fun and more ill-nature. Readers, however, took their instalment of bitters with a shrug, and a mild question whether the bitter had a wholesome flavour. Now that the whole is administered in a single dose, we doubt whether the most cynical will not decline to gulp it down; it is not sparkling bitter ale, but a deleterious beverage, neither good nor pleasant.

The characters are slightly-drawn, sketchy exaggerations; they have no more claim to be considered life-like delineations than the masks in a Christmas pantomime, but they do not profess to be burlesques. They are set forth by Mr. Thackeray as average specimens of the real human beings going about the world, only that he declares he sets them forth as they really are, stripped of all their pretence and self-deception. He seems to consider that he disarms objection or remonstrance by adopting the first person in the narrative, and making the I, myself, I, who tells the story, considerably the most contemptible, disagreeable person in the lot. Nurses tell their charges that "beauty is but skin deep," but that skin is an essential provision of nature for the health and comfort as well as for the beauty of the human being; it is an elaborately contrived resource for facing and containing the wonderfully made bodies given us for our habitation. It is neither a glove nor a garment, but part of our living selves; and to destroy the tissue with sulphuric acid, or to strip it off *à la St. Bartholomew*, would not make human beings bear any more resemblance to truth and reality. At every line of this present story Mr. Thackeray brings out his little bottle of sulphuric acid: the result is hideous disfigurement, without any end gained or aimed at, beyond the coarse insolent laugh of fools, who feel that if all this be true to nature, they are as good as their betters;—or, rather, that everything is mean and bad, and that better is only a pretence. Not good teaching, this—nor true teaching, either. Everybody knows the deceitfulness of his own heart, whatever he may know of that of his neighbour. Each of us knows that he is weak, and can be wicked; but we every one of us revolt against being told and taught that there is nothing better than the worst part of ourselves—that the aspiration to be better than we are is only pretence and humbug. The joking and jesting recognition of baseness and meanness and selfish ends in generous impulses, takes off the edge of the shame and humiliation which the consciousness of those flaws ought to inspire. The instinct to hide them is not, as Mr. Thackeray broadly says, hypocrisy; it is a confession to ourselves that they ought not to exist.

Mr. Thackeray has the responsibility of being one of the chief writers of the light literature of the present day. All that he writes is sure to be read; all that he asserts as his own opinion is sure to be listened to, if it is not accepted. How does Mr. Thackeray use his power? In the present story—with which alone we have to do—there is not one single touch to kindle in the reader a spark of generosity or kindly feeling; not one word to awaken or to stimulate a noble thought. After closing the book, the reader will feel conscious of having suffered a moral deterioration, from the intense ingrained vulgarity of spirit which pervades and shapes the whole story.

Mr. Thackeray should do better work than this in his generation. If he shall always be content to be a satirist of men and manners, and no more, there will be for him no enduring fame.

The Alps; or, Sketches of Life and Nature in the Mountains. By H. Berlepsch. Translated by the Rev. Leslie Stephen. (Longman & Co.)

ALPINE adventure and description have already become a conspicuous part of our travelling literature. Within a few years we have had before us the 'Peaks, Passes and Glaciers,' by members of the Alpine Club collectively, and four several volumes, at least, by members of the club individually, while one or two of them have contributed their essays on special localities, to "Vacation Tourists." Ladies, of course, aspire to mountain honours, but anonymously, since they would "blush to find it fame." One fair mountaineer on a mule has favoured us with her 'Tour Round Monte Rosa,' and another (a lady as we infer) has trodden 'Alpine Byways.' Two agreeable sisters, not anonymous, have sketched as well as scribbled on the Alps, and bold Miss Bremer has made a lengthened sojourn in Switzerland, scribbling all the while in her usual readable manner. It is not well, however, for man or woman to be alone in Switzerland; and it is better that man and woman should be there together than man and man, and woman and woman. The most enjoyable mode of mountaineering is to go with one's wife, as the Rev. Mr. King did when preparing his *Italian Valleys of the Pennine Alps* (for we take the mysterious E—to be his wife); and if any lady should desire to prompt her husband or brother to adventure on such a tour next summer, she will find it to her advantage to bring the volume now before us into evening reading at her own fireside.

Although simple "H. Berlepsch" appears on the title-page, we believe it is Baron von Berlepsch who has penned this volume. It differs from such predecessors as we have indicated, in being a popular and methodical reduction of much of the existing knowledge respecting the more commonly-visited Alps. Individuality, therefore, is here merged in an abstract of the seeings and sayings and doings of many, and the author rarely mentions himself. Indeed, but for the evident gusto which he has for Alpine scenery, life and adventure, it might be fancied that he was merely a well-read and diligent compiler. Those readers, however, who have seen some of the principal scenes described, will at once detect numerous discriminating touches and tints in these verbal pictures, which show that although the Baron has profited much by books, he has also studied much from Nature. If he has been surpassed in glow of description by Von Tschudi, his partial predecessor in the same direction, he has not been surpassed, and perhaps not equalled, in the art of grouping Alpine objects and subjects, in bringing forward instructively a great number of scattered observations, and in presenting attractively to the general reader the scanty traces of human life, and the abundant phenomena of unrestrained nature in the great snow mountains and the rugged passes.

Of humanity in the High Alps the traces are comparatively few, yet when contrasted with our civilized life and luxury they are full of interest. Very few, for instance, in a thousand of the rapid tourists who ride or tread the beaten paths of travel, in August and September, know or remember that at this very time the hardy wild-hay cutter is higher up than they are, and bent upon the most hazardous of occupations. For the rest of the year he may

be either a builder, or a hired workman, or a weaver, a carver, a labourer, or a chamois-hunter. Now he is away at daybreak with scythe, alpenstock, crampons, a bag of provisions, and a cloth for the wild-hay when cut. Ascending heights is to well-fed foreigners an enjoyment of the highest order, to him it is a sombre and dangerous task. He goes not for scenery, appetite and romance; he selects not famed peaks and perilous yet picturesque passes, but winds up a rock-wall almost overhanging the green terrace below. It may be formed by elevated layers of slate, limestone or dolomite, placed edgeways. Storms and weatherings have loosened particular layers at different heights, and having broken them and rolled the débris down into the valley, narrow terrace-like ridges run along the blank, inaccessible front; and along these carefully creeps the chamois-hunter for prey, and anon the poor peasant for hay. Over these slippery, crumbling, hand-breadth tracks this man painfully paces. A sharp, vertical, mountainous wall is on his right, and to that he applies his broad opened hand. On his left there is nothing upwards but the opposite mountains and the blazing sky, and downwards, but the grey or blue mists that float hazily upon the tops of distant pines, or slightly soften the slaty wastes and the loosely-piled tumbled stone-blocks of ten thousand years. Stones falling from overhead may now suddenly finish the poor man's daring course, or a sudden snowfall at these heights of six or more thousand feet may overwhelm him, or in a few minutes cover up the narrow ledges and hide his future path. But suppose him successful, and that he reaches his scanty hay-crop of thin-stalked, short weeds and grasses of tender and almost Lilliputian growth; even then these must be mown—no easy work up yonder near the ridges of a vertical mass. The grass has then to be collected, packed and rolled up in a rough linen cloth or in nets, and tumbled down to a favourable spot. Sometimes it may happen that the mower has no choice, but must needs carry his burden of a hundredweight on his shoulders, while he descends the cliff ledges with double difficulty,—often scarcely able to put one foot boldly and easily before the other, and always with a chance of being overbalanced and hurled down with his load into swift destruction. And what is his reward if he escape and house his hay?—Three or four francs; the same sum that a thoughtless tourist below is at this same time expending for a bottle of bad wine!

As to the chamois-hunters, their feats and escapes have long been notorious enough,—and almost exhaustively treated by Von Tschudi in his 'Thierleben,'—so the Baron wisely hurries over this topic. Almost every adventurous English tourist has at one time or other had a chamois-hunter for his guide; and almost every confiding Englishman has partaken of so-called chamois at the Alpine hotels. "Where ignorance is bliss," &c. One word only—if goat's-flesh disagrees with you, do not touch the "chamois." The chamois-hunters, however, are the true sons of the mountains, and but for their knowledge of heights and passes many a now accomplished and boasted ascent must have been untrodden. Ignaz Troger, of Oberems, in the Valais, is one of those wonderful hunters, and has silently usurped, as his exclusive hunting-ground, several square miles. Unlike prophets, chamois-hunters have a reputation in their own country, and Troger in particular. "He is," says the Baron, "at the same time the rashest and most adventurous mountaineer; if the ascent of the Weisshorn should ever be possible, Troger would be the first on the top." The Weisshorn has been

ascended (as we informed our readers some weeks ago), and the first man on the top was not Troger, but an Englishman, Dr. Tyndall.

Other native and adventurous mountaineers are the timber fellers and floaters. Their work is dangerous, even though trees stand still and need not be followed like the fleet and light-footed chamois; for the larches and red fir, like genuine storm-trees, boldly stand upon steep cliffs, and often on slopes as steep as church-steeple. Then, in the far recesses of the mountain folds there are isolated cones, surrounded by jagged cliffs which bear on their shoulders flourishing forest canopies. Though apparently inaccessible, like a group of tree sentinels, their day comes at last, and their doom is sealed. Up to them climbs the feller, and they fall, not like ancient lightning-split stems, which have mouldered down from splintered ridges, but in their full and flourishing age, and under the hand of the lightning-like blow of a strong man's axe. Up there, too, must hard-faring woodmen climb,—up there must they live on maize-meal porridge and a little cheese, without a drop of spirituous liquor, for only equable and natural strength lifts that axe to glance clear and cold in the sunshine,—then to ring, and ring again, amidst the eternal silence of those lofty slopes, and to elicit groans from the shuddering trees. At length, when their last tough fibre is severed, the wild woodman must stand aside while some mountain forest-pillar plunges down—sometimes sweeping an unwary bystander away with its crushing branches. Next year the passing traveller who lifts his eyes to the high old-wooded cliffs sees nothing but cold grey rocks and despoiled parapets. And the fellers, do they flourish for ever? No, their turn comes also; if not cut off by accident, you may see them in their old age staggering about with frost-bitten feet or with maimed bodies. Their various exposures and perils make many chapters in their lives, and also form one in this book.

There are glimpses at "high life," in one sense, and low life in another. But in the Alps high life is always hard life, at least to natives and workmen. It is the exact opposite to our own, and therefore, perhaps, so interesting to us. But there is village life in the mountains, as well as lonely life. There are, as everybody has seen in passing along the valleys, little villages perched half-way up the great mountain slopes; and churches, with shining tin-steeple, it may be, and all the appendages of rustic communities. Everything, too, is self-provided up there. Meat, milk, cheese and butter come from rough stall and dairy, while hard black-bread comes from scanty hill-side harvests, and the coarse clothing is woven at home. Only money is absent or rare,—for what need of coin where without it there is every necessary that coin commonly buys? Still life and lofty isolation settle upon such out-of-the-world villages; and there is one in the recesses of the Tyrol where four brothers live together, who work in common at all the trades which must be carried on to supply the wants of life. At a height of 6,000 feet above the level of the sea, these helpful four play into each other's hands, and also each other's feet and mouths. They have and want no other neighbours, for they enjoy undisturbed liberty, equality and fraternity, in a self-providing quartett.

Chalet-life in the Alps is really far from romantic. It sounds well, but it smells bad. Nothing in the line of pastoral simplicity is capable of more romantic rendering than a journey up to the chalets on the heights, at the end of May. The "Senn" and his little company set out gaily, with nosegays of flowers, and gold

tinsel and wreaths of young leaves and box in the hat of one, and fluttering ribands in the cap of another. Cows stroked and sleeked till their coats actually glisten in the sunshine, follow the music of large and loud-sounding bells, and whole herds of obedient followers, succeeded by goats and lambs, wind in long procession, till the packhorse with cheese implements brings up the rear. But all this is the festal show, the delusive delight that introduces to a hard and uncleanly course of daily duty. True, those who follow it like it, but let no fastidious Englishman ever be tempted to try a night in a chalet. It may serve to help him in a long mountain ascent, but unless he be capable of enduring every kind of foe to the senses, and one foe in particular to the person—unless, in fact, he be pachydermatous and one of the Seven Sleepers, it is doubtful whether he will not wish himself a cow in the night, and declare himself to be a calf in the morning for attempting to herd with cows and cowkeepers.

Such is a glance at Alpine humanity; but as for "Nature in the Mountains," who that has been below and amidst them knows how to begin, when he must speedily end? If we select only the more prominent objects, such as the famous snow-mountains themselves, their name is Legion, and their charms innumerable. There are the massive chains, the soaring aiguilles, the solitary peaks, the mighty monoliths, like the Matterhorn, and the grand frontier-like ridges, such as the Rigi. They all live in memory, and when one sits down at the fireside to recall them, they come back before the mind's eye, not pale and cold as in the morning light, but invested with all the rainbow hues of fancy, as they themselves colour and glow and blush and crimson beneath the evening sunbeams. Take, again, those other prominent and pleasing objects, the waterfalls—what can be compressed in a few lines about the beautiful Staubbach, sending down its white, soft, thousand-fold spray, or flinging down its refreshing columns like a reversed fountain, and shooting down its reversed water-rockets into the rainbow-arched basin below? But it has been described, drawn and apostrophized at least a hundred times, and as everybody who visits the Alps sees it, let it drop down and shoot its rockets and plunge its fullness, and bedew the watered wall of rock for its whole 800 feet, without further note from us,—except to say that the Baron has pictured it in every light and under all circumstances but one, and that, doubtless, because he knew it not. But we have listened to its gentle pleadings, and heard its musical murmurs harmonize with the accompaniment of a skilfully-touched piano-forte! We have sat opposite, and attempted to count its water-headed rockets while the strains of Beethoven wonderfully enriched its plunging monotone. How this was contrived is our riddle—not to be lightly solved, lest the fair performer repent her graceful compliance with an Englishman's petition.

On glaciers we hesitate to touch at all at this moment,—and we must therefore slide down them, not even pausing at a crevasse, or mineralizing at a moraine. The same, too, of avalanches,—only wishing that we could ever see a monster in its descending madness. As to those dust avalanches which one commonly sees or hears from the Wengern Alp, coming by comparison so softly and slidingly down from the Jungfrau in the months of August or September, one cannot believe in their mightiness or dread their desolation; one would naturally long to behold a ground avalanche in spring rushing down with chaotic confusedness—"this complete dissolution, this universal,

instantaneously developed phenomenon of hurricane, earthquake, landslip and thunderstorm, uproar, flight, destruction, annihilation, accompanied by the crashing of the snow pressed together, the overwhelming roar of splintered trees, the hissing flight of rocks, and their sharp blows against the cliffs,—in short, an indefinable deafening tumult, whose echo, repeated a hundredfold from the corner of every valley, is collected into the roar." This, indeed, would be worth seeing, at a safe distance; and reading of such natural catastrophes, we can understand the alleged instinctive prescience of many beasts just before such a fall. Mountain daws come down from the heights, dogs grow perceptibly restless or howl loudly, and horses warningly shiver and shy on the doomed pathway. So at least it is reported, and there was an old packhorse many years employed over the Scaletta Pass who regularly prefigured by his restiveness and excitement the approach of avalanches. Once during winter he manifested his prescience by stopping stubbornly at a certain point in the pass over which he was dragging passengers in a sleigh. Cruelly and foolishly urged to advance, he first neighed loudly, then put out all his strength, and sought by desperate haste to escape the dreaded danger. In vain—a few seconds elapsed, when down came a sudden crashing overwhelming mass, and horse and travellers never emerged from it!

Of thunderstorms in high places we cannot do more than passingly speak; though no one who had ever been caught by one in a pass or near a peak would care ever to speak much about it. As compared with such meteoric phenomena in the low lands they are indescribably terrific. High up on a snow pass, on the very slippery ridge, and just in sight of the wooden cross that marks the summit of 8,000 feet and upwards (we are writing from our own recollections of a particular pass and storm this year), a solitary traveller is manfully mounting, alpenstock in hand. Warned in vain by the last human being he met with, at the last chalet four or five miles behind, he dares the pass alone, not difficult under ordinary circumstances. An hour or two earlier he might have gone over securely. But now the dark masses of cloud have flocked together and formed a threatening black canopy. In a moment down comes a rushing wind, against which no man can stand;—down comes a plunging rain, the drops of which hit the face like swan-shot, and the storm breaks forth with all its resistless force. A bundle of forked lightnings is loosened—and away and away, zigzag—flashing, blinding, leaping, shooting, filling the air with keen forked flame—terrifying the dazzled solitary, who in vain draws his cap over his eyes. And now the roll of the volleyed thunder—ah! this is thunder—crashing from cloud to cloud, seeming to rebound from mountain to mountain, and to find awful echoes in unseen caverns. How it claps its gigantic hands again and again in wild rage over the bewildered man who has dared to climb, alone and a stranger, up to the haunt of storms! To get back, half drowned and dazed, to the huge barrack-like inn, to remain there the whole stormy night as the only guest, to call to mind again and again, in the hours of darkness, those fearful flashes, those terrible reverberations, those sweeping winds and those sheeted rains—was all that could be done, and is all that shall be here said of Alpine thunderstorms! To describe a dozen is nothing to enduring one.

Of course, there is religion, and, of course, there are churches and chapels, in the mountains. Where such storms break forth, or such avalanches dash down, even the most benighted race

must have its places and times of worship. The English have their own little churches here and there in the most frequented spots. But, at all events, approach the mountain village church, towards the beginning and at the close of the morning's service. Sunday in the mountains is man's as well as Nature's holiday. To stand upon a lofty point, and hear the church-bells ring below, is to listen to most touching music. What though it be a monotone!—it reminds you of home and holiday with friends and family. Peace is all around, as well as poverty. See how yonder dark ravines, and those old, brown, timber houses dotting the green meadows, yield their slowly accumulating congregation! They all wind towards the tall church, bend before the huge wooden cross, enter the door; and after a while you hear the soft swellings of a pealing organ floating out to you, and attuning your spirit to the time and the scene. But mass has been said; the doors are again opened, and out come, in a kind of regular order, pairs of women and girls in district costume; some, matronly and aged, in thickly-folded gowns; some, youthful and conscious of youth, clad in bright lively colours and with picturesque caps, perhaps with silver chains or brooches. The matronly and maidenly pairs defile before you, and old eyes and young eyes are upon you as they pass, for you are the only stranger. Well for you that you cannot understand that subdued *patois*, or else you would not feel yourself complimented. And now come the men, feeble with age, with snows on their heads like those on the mountains, or young in years, laughing as they scan you. Follow the procession until it divides:—the women go straight home; the men, however, do not. They sidle off into an inn, there to listen and to chatter, and, lightly or heavily, to imbibe. Yet not always do they enter the inn, for sometimes there is a general meeting for Government proclamations and military orders. In the afternoon the younger men are—not at their Catechism, but—in the shooting-ground. Or, to close the scene, down yonder slope is descending a little cart with an apparent box; yet the lad who drives, and the peasants who follow, are mournful and silent. Their faces are downcast, and there are moistened eyes in that little orderly group. It is a mountaineer who lies in that box, and that box is his coffin! For many a day did he pass down this very way to church,—for many a year, from the time when he bounded along as a boy, to that in which he picked his steps cautiously as a senior. It was a long way to walk—it is now a long way to be carried—on a narrow little cart to which is harnessed his own horse or cow. Old friends come up and join the procession as it winds round the head of the valley to the churchyard. Into the grave he is lowered; rough faces, that whole winters did but harden, are now relaxed, and tears are dropped. Here is an end of the simple annals of one poor man. A little wooden cross marks the place where he who so long dwelt in the mountains now lies low in the valley. A female hand adorns it with an *immortelle*, and all is over.

The volume before us has suggested to us so many topics of interest that our pen has run faster than our feet would do in the snow-fields. We can honestly commend it to all who stay at home, or who have been in the Alps, and still mean to go again, or to those who simply mean to go. It is not in any way a guide; but a very agreeable, readable, well-constructed volume, illustrated with several spirited plates. The translator merits thanks for having introduced so acceptable a book to English readers. A few sentences might have been clearer; but we only desire that others

may peruse it with an interest equal to our own.

William Shakespeare's Sonnets in a German Version—[*William Shakespeare's Sonnette in Deutscher Nachbildung*, von Friedrich Bodenstedt]. (Berlin.)

SHAKESPEARE has been fortunate in Germany, both with critics and translators. It is true that a mass of folly has been accumulated round his name by some of his critics, but even this is counterbalanced by the amount of light that has been shed on his Plays by the more expert among the number, and no quantity of bad translations could be made a reproach to a country that has given us the version of Tieck and Schlegel. Prof. Bodenstedt pays a graceful compliment to his predecessors, though he does not sufficiently prize his own work, when he hopes that this translation may be judged worthy "to be set as a portrait-bust of Shakspeare in a niche of that magnificent monument which Schlegel has erected to the English poet, by the masterly translation of his Dramas." It is more than worthy. In finish of execution, in poetical and critical appreciation of the original, in sharpness of insight, and in justness of views, the portrait-bust can claim no subordinate place, no little niche in the monument, with which only the smallness of its scale prevents it from competing. In truth, Prof. Bodenstedt's difficulties have been greater, and are more strikingly overcome. Translation into rhymed verse is always a harder task than translation into blank verse; and with Shakspeare's Sonnets, unequalled in condensation, stamped with originality of form and pithiness of expression in the very highest degree, the difficulty might seem insuperable. To say that Prof. Bodenstedt has mastered all the turns of thought and intricacies of phrase, that he has rendered worthily those many noble lines which stand out like massive gems, and are familiar by constant quotation, is to give him very high praise, but no more than is justly due.

Though we are unfortunately debarred from proving our assertion by giving samples and entering into details, we are not so restricted from considering the critical views Prof. Bodenstedt has enounced. He discusses the various questions connected with the Sonnets in a postscript, and reviews the solutions offered with a kind forbearance of any addition to the number. We doubt if our gratitude is not as fully earned by this forbearance as by the translation. Whatever may be the probabilities in favour of any chosen hero, it is impossible at this time of day to accept them as proofs. Whether we believe with Farmer that Mr. W. H. means William Harte, who was not born till after most of the Sonnets were written,—or with Tyrwhitt, that it means W. Hughes, who has never been proved to exist,—or with Boaden, William Herbert Earl of Pembroke,—or with others, Henry Wriothesley Earl of Southampton,—or with Chalmers, Queen Elizabeth,—or with Herr-Barnstorff, Mr. William Himself,—our conjectures are equally liable to be overthrown, and equally valueless if established. And we should be very sceptical about the taste of the critic who should only see in Shakspeare's Sonnets a ground for disputing the owner of two initial letters. Prof. Bodenstedt has done far more to ensure the due appreciation of the Sonnets by adopting a new order of sequence, and by analyzing the poet's character as shown in his personal effusions.

We will first examine the new order in which Prof. Bodenstedt has disposed the

Sonnets, regretting only that he has not more fully stated the principle of his classification. He divides them into four parts, placing in the first those Sonnets which seem to date from the earliest period of Shakspeare's life, and then grouping the rest by their contents, so as to form a connected story. Thus in the first detachment Shakspeare is in love, in the second his love is false to him with his friend, in the third he is exhorting his friend to marry, in the fourth he glorifies his friend and boasts that his poems are proof against time. It will be seen that the translator has entirely inverted the general order, and, on comparing the present succession with that hitherto adopted, that very few of the Sonnets stand to each other in the same relation. At the beginning of the third division the Sonnets which are placed first of all, in the English editions, follow each other exactly up to the nineteenth; with this exception, there is no coincidence. Prof. Bodenstedt has here abandoned tradition as boldly as M. Fechter; but we believe the conservatives will admit the judiciousness of his endeavour, even if they ask for some alteration in the details.

We come now to the light thrown on Shakspeare's character by his Sonnets, a point which has already been ably commented upon by Hallam. But Prof. Bodenstedt judges more favourably the indications of humanity conveyed in their confessions of weakness, and rejoices that the poet, who seems so unapproachably high in his Plays, comes nearer to us in his Sonnets, in the changes from sadness to joy, in the sufferings, weaknesses and errors that belong to mortals. "Our reverence for him is not lessened, it rather increases, as well as our love for him, when we see what dark and steep paths led him aloft to the pure summits of Art. Is it not affecting when we hear this powerful man, who gave immortal life to everything he touched, complaining of the infirmities of mortality?" Hallam regrets, in the name of Shakspeare's admirers, that such evidences of the great poet's frailty should appear, that such weakness of love can be laid to his charge; and Hallam's complaint reads strangely when we remember that a similar monument of love was destined to be erected to his son. Prof. Bodenstedt takes a ground with which Shakspeare's admirers will be more satisfied, and in demolishing Herr Barnstorff's idle theory he defends the poet from the charges of undue weakness, of vagrant love, of extravagant friendship. He quotes Lessing's defence of Horace, and asks what hinders moral carpers from seeing an ideal mistress in the lady of the Sonnets, a study for Cleopatra. He agrees with most English critics, that the "Friend" of the Sonnets is the Earl of Southampton, referring to expressions in the Sonnets which are paralleled by expressions in the dedication of 'Lucrece.' He dwells on the fact that in the time of Queen Elizabeth friendship was much more cultivated than it has been subsequently, and yet Schiller has glorified friendship in strains little less glowing than those of Shakspeare. He produces passages from 'Twelfth Night' and 'Romeo and Juliet,' which are almost identical in tone with those which have excited Herr Barnstorff's virtuous indignation. "Let us imagine Shakspeare," he says, "coming from a small town, from needy circumstances, to be a player in London, suddenly winning by his poetic talent the friendship of the handsomest, most brilliant Earl in England, who, disregarding all vulgar prejudices, honours the great Genius even under that most despised covering, and offers him a warm, intelligent heart. Is it so difficult to understand that such a friendship, increasing every year, making him in-

wardly happy, and also procuring him external advantages which we will not further dwell upon, should transport the young poet to the most glowing enthusiasm and veneration for the man who stood so high above him in the estimation of the world?" We only regret that Prof. Bodenstedt has devoted so much of his space to refuting Herr Barnstorff, and that he has been led by the necessity of meeting so many charges into an occasional repetition.

The History of Modern Europe, from the Fall of Constantinople in 1453, to the War in the Crimea in 1857. By Thomas Henry Dyer. 4 vols. Vols. I. and II. (Murray.)

A compilation which should unite within its pages the results of the historical labours of the present generation and give a compendious account of European politics and civilization for the last four centuries, would doubtless supply a want which has been felt by the student of European history. The critical investigation of history has in the present age been carried to a perfection previously unknown, and of which, indeed, preceding ages were not capable. The mass of recondite materials which has within the few past years been made accessible has been immense, and these materials have been sifted, examined and collected with a patience and ingenuity which taken in their entirety is unparalleled in any age of the world. For in this, as in most of the other achievements of the age, it is the collective and not the individual results which affect us with admiration. If we have no Muratori, Montfaucon, or Ducange, rising majestically above his fellows, there has been a crowd of writers, all animated with the same love of truth, co-operating without design in the same good work, and devoting the best years of their lives to slow and patient labour, with the unwearied hope of raising some portion of the veil of obscurity which divides the Present from the Past. They have ransacked the unexplored depths of libraries, sifted piles of confused, antiquated and illegible manuscript, read through bales of unpublished correspondence, examined in detail despatches, state documents and records, now first become accessible, and condemned themselves to intellectual drudgery of the most repulsive nature, often simply for the purpose of establishing a fact or verifying the conception of a character. The results, however, of this labour are scattered about in too large a number of volumes to be immediately accessible to the general reader; and the historical student, who takes in order the works of Ranke, Von Hammer, Zinkeisen, Sismondi, Michelet, Martin, Mignet, Hallam, Prescott, and others, acquires his knowledge in such a fragmentary manner that, unless he is gifted with an unusual retentiveness of memory and grasp of historic conception, he is unable, while reading the narrative of each separate portion, to attain to a clear view of the progress of our homogeneous civilization carried on by the separate members of the European family of nations. For, as Mr. Dyer observes, the history of modern Europe, complicated and extensive as it is, is still to be viewed as a whole:—

"That it is capable of a certain degree of unity may appear when we reflect that the greater part of the European populations are descended from a barbarian ancestry possessing very similar laws and customs; that all have derived a common civilisation from Rome; that a large portion of them trace their language and their laws to the same source; that Latin was long the common idiom of the learned throughout Europe; and especially, that all the European nations, under the title of Christendom, are united together by a common

religion. Viewed in this light, the great Roman Empire may still be said to subsist in Europe in effect if not in form; and to testify its presence, not, indeed, by the trammels of political obedience, but by the nearly uniform standard it imposes in dress, manners, literature and art. The religious unity of Europe which prevailed during the middle ages, as shown by the Crusades, the General Councils, and more permanently by the authority exercised by the Pope as the common father of Christendom, was severed by the Reformation; but already what has been called the European system was arising to supply another bond of union. During the dark ages the aggressions committed by one state upon another were viewed with indifference by the rest; and thus, for instance, the conquests of the English in France were utterly disregarded in Europe. But when by the destruction of feudalism, the rise of the middle class, the consolidation of the great monarchies, and the institution of standing armies, the various European States were enabled to enter into long and distant wars with one another, the aggressive ambition of one became the common concern of all; leagues and alliances were made to check and repress the domination of grasping monarchs, and to preserve the balance of power; and Europe began to form one large republic of nations, acknowledging the same system of public law, and becoming in their transactions amenable to the voice of international opinion. The history of Europe, in fact, presents as much unity as that of Greece in early times. Composed of a cluster of independent states, of which one, now Sparta, now Athens, now Thebes, was always aspiring to the hegemony, the only rallying cry of Greece was against the *Barbarian*, as that of Europe once was against the *Infidel*, whilst her sole bond of union was also a religious one, manifested in the Amphictyonic Council and the national games at Olympia and other places, which bear some analogy to the General Councils and the festivals and jubilees of the Roman Church. It is, then, the change from a unity cemented by religion to a political unity that chiefly distinguishes modern Europe, regarded universally, from the Europe of the middle ages. The commencement of this change dates from the French wars in Italy towards the close of the fifteenth century; but as the capture of Constantinople by the Turks and the destruction of the last vestiges of the Greek Empire, have commonly been regarded as the true epoch of modern history, it has been adopted in the present work. The real importance of that event, however, and what renders it truly an epoch, lies not so much in the fall of the Greek Empire, which had long been effete, and must at no distant period have either perished of natural decay or have been swallowed up by some of its more powerful Christian neighbours, as in the final and complete establishment in Europe of the Ottoman power. The bond of modern Europe being its policy, its history necessarily becomes a political history. Europe, indeed, as already remarked, has also a common civilisation, and in some degree also a common literature and art; but marked in each nation by peculiarities which render an account of those subjects proper rather to the histories of its particular states than to one comprising its general affairs. The history of European literature, moreover, from the fifteenth to the seventeenth century, has been already written by Mr. Hallam, nor could it be treated in the present work, without swelling it to an inconvenient bulk, at sufficient length to be either instructive or entertaining. When we arrive at the eighteenth century, it will, however, be necessary to take a general survey of the literature of the age, as one of the causes which produced the French Revolution."

Although we take exception in some respects to the above remarks, to Mr. Dyer's notion of the method by which the task is to be accomplished, to the limitations he puts upon himself as well as the execution of his work,—yet Dr. Russell's 'Modern Europe' has now become so antiquated a production, so far behind the historical information of the time, that any serious effort to supply its place must be viewed with indulgence, as a guide to

the student of modern history. Dr. Russell's work is bad in style, narrow in view. Its relation of the events of Continental nations is meagre and unsatisfactory in the extreme, and its historic blunders are numerous and glaring; but still, there was a wholeness of design and a clearness of statement which rendered the book recommendable for a commencing student, and has a certain directness of exposition which Mr. Dyer wants. And although Dr. Russell's matter is not so valuable as that which is to be found in these volumes, we doubt whether his facts would not fix themselves more in the memory—a point of immense importance in a commencing book. There is an absence of philosophic method in Mr. Dyer's compilation which must make it a confusing book for a beginner; and the great events of each period are not brought into sufficient relief to give them prominence and to stamp them on the memory. There are no marginal headings, which, in an elementary book of this nature, is a great omission. And Mr. Dyer has fallen into the usual fault of compilers of history:—the accumulation of small facts. He has not made his historic narrative turn round central principles, causes and characters, so as to give events affiliation and connexion. In the Introduction we looked for some account of the changed condition of the Feudal system, and of the mode of levying armaments. Considering that Louis the Eleventh did so much towards breaking up the great feudal system of France, it was necessary that the reader should have clear notions of the then state of the feudal system in order to form some judgment of the reason and nature of Louis the Eleventh's policy. The account of the destruction of the feudal system in Book II. Chap. 1. is meagre in the extreme. Mr. Dyer does not distinguish between chivalry and feudalism, and in his estimate of the spirit of chivalry shows a want of acquaintance with the subject. His depreciation of Mr. Hallam is oddly expressed:—"If the spirit of chivalry, and what has been called knight-errantry, on which Mr. Hallam has passed so glowing a panegyric, be not mere chimeras and creations of the brain."—The state of military science and tactics at the period at which Mr. Dyer commences his history is also a point on which we had a right to expect information, as well as on the relative importance of the different classes of society and on account of the general decrease of slavery throughout Europe.

The dissemination of Greek learning at the fall of Constantinople is also a point surely not to be omitted in four large volumes of the 'History of Modern Europe.' The neglect altogether of the influence of literature on the course of civilization is a grave error of judgment; and generally Mr. Dyer shows a want of appreciation of the value of ideas and principles; and this it is which leads him to be too diffuse in the chronicling of wars, revolutions and such external facts and circumstances, which, after all, are but one form of expression of the passions and intelligence of humanity. Nor, considering that the author's design is to make his history a political history, can we give him great praise for his political treatment of his subject. The policy of the various states in their political action is not clearly set forth, nor is the personality of the chief actors of each drama brought out with sufficient distinctness; and frequently the most important details are omitted about them, as, especially, the age at which they died, while other less important information is put in. We are not told, for example, at what age died John Hunyad, the heroic defender of Christendom

against the Turks. Our information about Scanderbeg, who so long filled all Europe with the renown of his exploits, is of the scantiest. The character of Lorenzo de' Medici is very insufficiently drawn, and for such a glimpse as we have of it, the reader is directly referred to Roscoe, whose authority in this matter is exploded.

The account of Savonarola, whose memory is still fresh in the minds of the Florentine people, is also poor and drawn from second-rate authorities, and the recent work of Villari on the subject not alluded to. Mr. Dyer does not even allude to the very dramatic deathbed interview of Lorenzo and Savonarola, so significant of the time and of the country. Italian affairs generally, and the relations of the Papacy with Europe, and its pernicious results for Italy, are, also, not represented so as to convey all the interest and instruction the limits of the narrative admit of.

The history of France and Belgium is, however, much better treated. The contest of Louis the Eleventh and Charles the Terrible is told with some spirit, if with little dramatic power. When we come to the League of Cambrai, we naturally look for the observation that it was Pope Julius the Second who, by his league with the Spaniards and the French, introduced those barbarians into the Peninsula whom he subsequently declared he would drive out of Italy; and we were not prepared for the statement which is made, vol. 1. p. 241, that one of the grand objects of Julius the Second, on his accession to the papacy, was his expulsion of foreigners from the soil of Italy, and that the policy was pursued in a "truly patriotic spirit." Nor is the infamy of Clement, in being a party to the treaty of Barcelona, sufficiently made clear. The subjugation of the Florentines, with the forced restoration of the house of Medici, is one of the most important events in the whole history of Italy, and its effect should have been more clearly stated. For the history of the Reformation, the rise of the Dutch Republic, the story of the French Civil Wars and the Thirty Years War in Germany, the author had at command abundant materials, greatly enriched by recent additions of the greatest value; but we cannot say these subjects meet with the treatment which is adapted to bring out the most imposing features of that great movement. The narrative of the progress of the Reformation is so broken up, and its interest made so subordinate to other events of the age, that we fail to catch any of the impassioned spirit of those times, and the great characters of Luther, Calvin, and Zwinglius are not drawn at all with a free and bold hand. The great character of Richelieu meets with very moderate appreciation from Mr. Dyer, and the immense influence of his policy in raising France in the scale of nations is not duly set forth in these pages; nor of so grave a personage, are we prepared to find a sentence commence with "Richelieu evidently chuckles in relating these tricks,"—which is below the level of even Mr. Dyer's style.

In looking over volumes embracing so large a tract of history, we have been obliged to choose our points of exception to Mr. Dyer's book somewhat widely apart. But, notwithstanding these and similar strictures on the method and execution of the work, we are glad to give it the praise of being likely to be a useful compendium. Mr. Dyer has, with few exceptions, consulted the best and latest authorities on each portion of the history of which he treats. The historical importance of each series of events is fairly considered, and meets with a tolerable proportion of narra-

tive. It is unfair to judge such a book by too high a standard; but there is an amount of information here contained which could only be acquired by the perusal of very many volumes: the style, though not elevated or elegant, is direct and simple;—and if the two succeeding volumes are equal to the first two, the 'History of Modern Europe' in so convenient a form will be an acceptable addition to many libraries.

The Massacres in Syria. By J. Lewis Farley. (Bradbury & Evans.)

Mr. J. Lewis Farley has done noble service to the persecuted Maronites of the Lebanon; and all who are interested in the fortunes of the Christians in Syria should read his temperate volume, which, in a series of letters, sketches the rise and progress of the Druses and Maronites, and describes with stern fidelity the massacres recently perpetrated by the former on their wretched victims. Of those outrages, as well as the wholesale punishment awarded to their chief promoters in the August of last year, we have already begun to speak as affairs of the past. Mr. Farley, however, directs attention to the future, and urges on the Porte and its Christian Allies the duty of preventing, as well as punishing, guilt. "The final settlement of the Syrian question," says the author, "is yet to be arranged by the European Commission; and the measures which must be taken to prevent a recurrence of such atrocities as have lately startled Christendom will require mature deliberation, and will certainly be not less important in their results than the mere execution of a temporary vengeance." Mr. Farley's plan for effecting the permanent tranquillity of the Christian population of Mount Lebanon is the expulsion, on terms consistent with humanity, of the Druses from the regions which they now occupy only to harass the followers of the Cross. The population of Mount Lebanon numbers, in all, 211,000, made up of the following constituents:—Maronites, 112,000; Greeks (Orthodox and Catholic), 58,000; Druses, 28,000; Metualis, 7,500; Mussulmans, 5,500. Of the 28,000 Druses only 4,000 are in the Christian Kaimacam, the remainder being under their own rule; whilst the 80,000 Maronites no less than 32,000 dwell under the oppressive dominion of the Druses. "The Druses, it will be seen," observes the author, "number only 28,000, exclusive of their brethren in the Anti-Lebanon and the Haurân,—and the most prudent course, therefore, to adopt would be to separate them altogether from the Christians; for peace and security can never be perfectly insured in Mount Lebanon as long as these two races, so dissimilar in religion and character, are compelled to remain together. Let the lands of the Druses be fairly valued, and the amount equitably assessed upon the Maronites. Let the Druses of Lebanon retire altogether to the Haurân, where, with the compensation they shall have received, they can readily establish themselves. Then the Maronites, ruled over, as formerly, by a Christian governor, will become free and happy, and the Lebanon will once more give signs of that activity and industry for which its inhabitants are remarkable. If, however, the policy of any of the great Powers renders this project impracticable, measures should, at least, be taken to prevent the recurrence of those fearful atrocities which have for the past fifteen years desolated the Lebanon, and the Christians of Syria should be placed in such a position as would enable them no longer to fear the attacks of their enemies." Mr. Farley's strongest chapter is his

tenth, in which he defends the Maronites against charges of having first incensed the Druses by systematic aggression, and then at the day of retribution manifested an impious thirst for vengeance. Mr. Farley's exertions for the Christians of Lebanon recently met with grateful acknowledgment by the Bishop of Beyrout, in a letter published in our columns. Topics of greater interest at the present crisis engross the attention of politicians; but "the Massacres in Syria" may not be forgotten.

OUR LIBRARY TABLE.

Metrical Lay Sermons. (SNOW.)—We respect the purity of intention manifested by the writer of these verses. They will be welcome to many persons who still think that poetry is "about" a subject, and do not demand that it shall pierce to the heart of the matter. But their only success must be sought in the so-called religious world, where there is such a great dearth of real poetry, and doctrinal chaff is ground for food instead of the golden grain. To us it is dreary work, this spinning out in lofty language the subjects of Sacred Writ, that have been done once and for ever with such sublime simplicity. It is most strange that any one can come fresh from the pathos of Job, the common human language of David, the homely English of St. John the Evangelist, and straightway mount upon two stilts of rhyme, and think to get nearer the heart of the people by preaching on scriptural subjects in the longest possible words, and in verse that does its best to re-echo the emptiness of Robert Montgomery's. It has been well said that knowledge must be like music and nursery-songs before the Clodhoppers can dance to it. Especially should this be so with religious writings. One man above all others had the secret of writing for the people in words the simplest and homeliest, and see his success: his name was John Bunyan.

Glow-worm Lamps. By W. Brailsford. (Enfield, Meyers.)—Mr. Brailsford is a writer of very pleasant verses, full of sweetness and quiet thoughtfulness. We are afraid they lack the power to move any considerable number of persons; but they show the true poet's feeling and artist's touch in their own modest way. This book contains a hundred sonnets, and not one that is not readable. This description of twilight musing is a fair example:—

Rich purple mists o'erspread the dreamy dells,
And crofts and woods beneath the drooping sun,
Are covered with a haze; the day is done,
And each fond heart with true contentment swells;
Up from the valley depths a sound of bells
Floats over wild and mere. The glow-worms shun
The mossy brakes, and true as love's old spells,
On thyme-wove banks their constant courses run.
Oh! blessed peace! oh! calm and holy time,
Give me your benison, and let me be
Partaker of your gentle sanctity:
So may my thoughts arise to realms sublime,
While one dear spirit in some heavenly clime,
Still holds my heart in sweet supremacy.

Looking at the author's "Portrait Gallery," we see that he is no mere weak and whining echoer of the sentimental commonplaces of foolish historians. We take two etchings in proof that he has looked, thought, and apprehended for himself with a right judgment:—

QUEEN ELIZABETH.

Scan closely all the features as they seem
To move from out the canvas, note the eye,
With all its latent will and energy,
A subject truly for a poet's theme;
No feeble woman this—no idle dream,
Drawn in a fitful freak or ecstasy;
This the presentment of great majesty.
A face to be remembered as a gleam
Of old heroic ages, when the hand,
Though all a woman's, could right nobly guide
A great grand people in a mighty band,
And with true sense of justice, yet abide
The dictates of the law with humbled pride,
Losing all selfish love at truth's demand.

LORD BACON.

If men were suffered to behold the dead
For some brief moments, and could hear them speak,
Methinks one great true heart mine own would seek,
And in the mazes of his thoughts would tread,
A patient learner; then, above us spread
An atmosphere of light around the peak
Of some vast Alp, should a bright glory shed
That I might feel myself not faint, or weak,

Or nerveless near him. Oh! master mind!
Thy England's noble son. For ever great,
Thy braver sense could smile at time and fate;
Far-seeing all the wants of human kind
Thou dost despise man's scorn and selfish hate,
Deaf to poor praises, to stern glances blind.

The Pleasures of Virtue. By O. Ceva. (Tresidder.)—A poem to make the ghosts of Goldsmith, Rogers, Bloomfield, Akenside and other kindred spirits rejoice in their Elysium. For two causes:—first, that they secured their places when they did, and cannot be summoned to answer the obstinate questionings of a more critical time; and second, that in spite of sterner verdicts, spasmodic successes, and the general vicissitude of things, there are still worshippers at their old shrine, who get none of the praise which was awarded to them, and all the neglect which they were early and lucky enough to escape.

God and Man. (Houlston & Wright.)—The author of this poem does not think the Book of Job complete. Probably the conclusion of that sublime work was lost! He was so struck with the want of it, that he has proceeded to supply the missing chapters. This is the beginning:—

Day dawned—the East burst roseate on the Night,
And startled all her secrets. From his lair
Life rose with hasty toilet, half awake;
And blushing stood 'neath the new-lighted heaven,
Bewildered 'mid the radiance of the moon.

—But the reader will be braver and more enterprising than we are if the end is ever reached.

Fables and Poems. By T. (Saunders & Otley.)—We suspect that the author of the chief piece in this collection was the writer of a notorious letter which appeared in the *Times* signed "Beaujolais." If not the same person, it must be a friend of his, or at least a friend of his cause, which was the disparagement of marriage and commendation of the other thing. Lady Brown, here trotted out, is one of the "pretty horsebreakers," and she lectures the lords of creation with very bad language, in execrably bad rhymes. The last lines in the book are addressed to its publishers.

I cannot say, my dearest airs,
The hopes you give me lively are:
"A hundred poems pass your mint,
And one don't pay expense of print."
These are, in truth, but baddish times,
For jinglers of gentle rhymes;
The world don't know its interest,
And what for it 'tis clear is best,
Else it would quickly run to buy
Whatever I wrote of poetry.
I may trust well to you I know,
To feel for my undoubted woe;
And you agree with me, I'm sure,
In wishing that there was a cure;
But still the fact remains the same,
My songs are nought without a "name."
You will not bring them out? "Oh, no!
Unless I pay expense." Just so!
You say "The risk is very great,
Poems have had no sale of late!
A hundred poets twang the lyre,
And ninety are consigned to fire."
But, airs—you add with decent smirk,
"If I will bravely set to work,
And get a name like Tennyson,
You'll take my poems every one.
Whatever I scrawl you'll print with pleasure,
And call me your poetic treasure;
You'll give me the best price you can,
And treat me like a gentleman."
Bravo, my publishers! I say
You shine just like the light of day;
Like Tennyson I'll get a name,
And then you shall enjoy my fame.

Poems. By John N. Bissell. (Relfe Brothers.)—A very small book of very brief poems. The following reminds us of the celebrated chapter of history on 'Snakes in Iceland':—

ODE TO SOLITUDE.

Oh, Solitude, where are thy charms?
I've loitered on hill,
I've wandered thro' the wood
And by the river's side,
But ne'er, oh Solitude, have found thy charms.

Household Proverbs; or, Tracts for the People. By the Author of 'Sunlight through the Mist.' Vol. II. (Shaw & Co.)—We are glad to welcome a second volume of 'Household Proverbs.' They are worthy of the first series, and calculated to do much good among the working classes. In this series there are several excellent tracts for women. 'Fine Feathers make Fine Birds,' 'Marry in Haste and Repent at Leisure,' 'She that pawns Once, buys Twice,' are most

useful pieces of advice to all working men's wives, and, we fear, very much needed by many of them. One of the great merits of these tracts is the total absence of all party-spirit in the religious truth inculcated therein. Beyond the one golden rule of fearing God and loving our neighbours as ourselves, there is nothing which can interfere with the prejudices of any sect or denomination. The most bigoted Romanist, or the most strait-laced Puritan, might equally derive benefit from their perusal, without danger of meeting with any doctrine likely to alarm him. Evangelical and Puseyite clergymen can neither of them find anything to object to in these papers, and many a Socialist or Atheist among the mechanics, who would sneer at the proffer of a religious tract, might willingly accept a 'Household Proverb,' and so the way would be paved for better things at some other opportunity. There is nothing like getting in the small end of the wedge; and we imagine that much more might be done in that way, if zealous tract-distributors would begin by proving that 'Cleanliness is next to Godliness,' or that 'Well begun is half done,' before they thrust into scoffing hands the intimation that their owners must "turn or burn."

Gentle Blood; or, the Secret Marriage: a Novel. By J. R. O'Flanagan. (Dublin, M'Glashan & Gill.)—The author of this work is, apparently, seized all of a sudden with a violent desire to write a novel. He tries, in vain, to make a plot, and to "draw upon his imagination" for materials out of which to concoct his characters. He has been kindly warned, that he "lacked the vision and faculty divine" necessary to a writer of fiction. He does not even "pretend to originality"; but still, he has made up his mind to do something in the way of authorship, and these minor difficulties may, he believes, be overcome. After racking his brain for an idea, without any satisfactory result, a thought strikes him: he will try to get a subject out of the newspapers! There is always something going on in the newspapers—a murder, or a trial, or a robbery, which might, perhaps, be turned to good account—who knows? Ah, he has it at last! that "recent trial in the Court of Common Pleas disclosed so many striking scenes and stirring events," Mr. O'Flanagan flatters himself that "even his unpractised pen can hardly make them uninteresting." No sooner said than done. What can be easier? There are the plot, the characters, the conversations, all ready for use. Everybody has studied the subject, and talked it well over, and bought up thousands of little shilling books about it, and the fair victim herself has published her own views of the matter; though, to be sure, the story is becoming a little hackneyed by this time; but never mind that! "We will try it once more," says Mr. O'Flanagan, and it shall be dedicated to "My brethren of THE BAR OF IRELAND," with a few pleasing compliments to the Judge and Jury, and surely that will make it "go down" with the public, if anything will. So, in the form of a narrative, Mr. O'Flanagan begins boldly with the meeting of Major Yelverton and Miss Longworth on the steamboat, at Boulogne. Although he does not pretend to disguise the fact, that his tale is perfectly true, and that his characters are real living people, still Mr. O'Flanagan thinks it necessary to make some slight attempt at giving colour and ornament to the original history, as related in all the papers of the day. He therefore goes through the ceremony (which, under the circumstances, is really giving himself much useless trouble) of transposing the names of the principal actors and actresses in this domestic melo-drama, in such a manner as to prevent any mistake as to their real identity. This is a delicate and arduous task, but has been managed with immense tact and ingenuity, considering all things. Thus Major Yelverton figures as "the Honourable Rodolphus Silvertown, Captain of Engineers." Miss Theresa Longworth is called "Sybilla Longsword." General Van Straubensee is turned into "General Von Stenz"; and the lawyers for the plaintiff are respectively designated as "Mr. Serjeant Solomon," "The Right Hon. Mr. Rightside, Q.C.," "Mr. Harrison Endville"; while those for the defendant may easily be recognized in "Adam Truesir,"

"Serjeant Strongbow," "Dr. Paul" and "Mr. Kellett." Under these assumed names the author takes the opportunity of giving a short sketch of each of the gentlemen in question, with which we hope they feel duly flattered. For the rest of the book, we have long descriptions (also drawn from the newspapers, it would seem) of the Crimean campaign. But the finale is really an invention of the author's, we presume; for it certainly has some pretensions to originality. Just as Captain Silvertown is on the point of being married to somebody else, the ceremony is stopped, and Sybilla's uncle, Count Louis de Franchi, announces to the astonished wedding-guests that the bridegroom is already the husband of one wife. The company feel rather "awkward," and return home as fast as they can. The trial ensues, and as soon as it is ended, in Sybilla's favour, Rodolphus rushes to her lodgings, and is received with open arms. It is discovered that a misunderstanding has been caused by a certain Count Rascalli, who confesses all, when lying on his death-bed at an hospital in Dublin. Sybilla has a fortune left to her; Rodolphus becomes Earl of Annandale, and makes a speech to his tenantry, in which he states that good conduct "is sure to be ever regarded as the best indication of GENTLE BLOOD,"—a very fine sentiment, but not one very likely to be echoed by the real Rodolphus Silvertown. It is difficult to see wherein the merit of this method of book-making lies. No ability is required; no imagination; no common sense; no command of language. There seems to be very little wit and no great art wanting, in order to transpose a few names, and tack on a satisfactory end to a most unsatisfactory story. If, however, there should remain in the United Kingdom any person or persons who have not heard enough (and a great deal more than enough) of the "Yelvertown marriage case," by all means let them read the version of it entitled 'Gentle Blood.'

The Science of Exchanges. By N. A. Nicholson. (Effingham Wilson).—The Archbishop of Dublin has recommended Political Economists to discard the established name for their science, and to substitute that of "Catalactics, or the Science of Exchanges." Whether Mr. Nicholson has adopted this hint does not appear; but this is certainly not the kind of work for which the learned Archbishop took the trouble of making his suggestion. Mr. Nicholson's idea of developing a "science" is to construct a catechism in which his own notions and opinions form the answers to the questions, and are delivered as if they were strict definitions or demonstrable truths. Question 273, for instance, is, "What is the golden rule of commerce?" Now, this is clearly a question which fifty men may answer, according to their humours, in fifty ways. A sharp retail trader might probably say, "Cultivate small profits with a large sale"; or a merchant, "Let your word be as good as your bond." But Mr. Nicholson will only allow one rule to be really "golden," which is, to "buy in the cheapest and sell in the dearest markets." This is, no doubt, a very important maxim; though why it is important, the catechiser, being a Pope in his own book, leaves the student to guess. Mr. Nicholson disclaims all novelty, and informs us that his object is "to put forward rudimentary truths in the clearest way" that he is able; but his rudimentary truths are only his own vague notions, or at best mere misconceptions of the principles taught by the Political Economists. "Profit" he defines as "any gain or advantage, from whatever source it is derived"—a definition which would confound profits with such widely different things as rent and wages. Rent, again, he considers to be the "price paid for the use of land, houses, &c.," whereas, as every smatterer in this subject knows, "house-rent" is merely a popular expression, and one which could not be used in Political Economy without confusion. When we add, that Mr. Nicholson considers "the source of wealth" to be "trade" (that is, exchange); that the rate of interest "ought to depend" upon "the proportion between the quantity of money" in a country and the demand for its employment; and that "retrenchment" by diminishing consumption for the sake of enjoyment "injures trade," no one who has given attention to these subjects will have any difficulty

in estimating his qualifications for philosophizing on the science of exchanges.

Mr. M. C. Cooke, having found that a cheap manual is wanted "to place in the hands of students in the Botanical Classes established for operatives in connection with the Department of Science and Art," has prepared *A Manual of Structural Botany* (Hardwicke), which, being sold for a shilling, is within the means of everybody. Of course the matter has been compiled from other books, so that original views are not to be expected; all that the public can demand is good arrangement and accuracy. The former is provided by the author, and such inaccuracies as have caught our eye are not very important.

Of publications of a religious nature we have to announce—the Rev. F. H. Scrivener's *Plain Introduction to the Criticism of the New Testament, for the Use of Biblical Students* (Cambridge, Deighton, Bell & Co.).—*St. Paul's Epistle to the Romans: newly Translated and Explained from a Missionary Point of View*, by the Right Rev. Dr. Colenso (Macmillan).—*An Exposition of The Lord's Prayer, Devotional, Doctrinal and Practical*, by the Rev. W. H. Karlake (J. H. & J. Parker).—*The Letter and the Spirit: Six Sermons on the Inspiration of the Scripture*, by the Rev. P. Chretien (Macmillan).—*The Higher Christian Doctrine; or, God the Father, through Christ the Son, by the Spirit, the Life and Righteousness of His People*, by M. A. Cantabrigie (Whittaker).—*The Ministration of Angels: a Sermon Preached in St. George's Chapel, Windsor* (Parker).—*Short Notes on St. John's Gospel*, by the R. H. Downing (Parker).—*The Athanasian Creed*, by L. D. (Whitfield).—Part II. of *the Book of Common Prayer: its History and Principles*, by the Rev. C. H. Bromby (Black).—No. IX. of "Tracts for Priests and People," containing *Dissent and the Creeds* (Macmillan).—*The Importance of Intellectual Culture for the Work of the Christian Minister*, by the Rev. J. G. Rogers (Jackson, Walford & Hodder).—*Teach Us to Pray: being Experimental, Doctrinal and Practical Observations on the Lord's Prayer*, by the Rev. J. Cumming (Shaw).—*Church of England! Reformation or Ruin?* by J. Hampden (Tresidder).—*The Sabbath Made for Man: a Sermon*, by the Rev. T. A. Holland (Wertheim).—*and Flowers of the Churchyard* (Moxley).

LIST OF NEW BOOKS.

Adams's Cherry-Stones; or, Force of Conscience, 6 ed. 8vo. 2/6 cl.
Angus's Hand-Book of the English Tongue, 12mo. 5/6 cl.
Art-Journal, The, Vol. 1861, 4to. 31/6 cl.
Aykbour's Practice of High Court of Chancery, 7 ed. 8vo. 21/6 cl.
Ayton's Reformers, 3 vols. 8vo. 31/6 cl.
Baker's Circle of Knowledge, Grad. 4, a Selen. Class-Bk. 8vo. 4/6

Winslow's Work of the Holy Spirit, new ed. 8vo. 5/6 cl.

THE OCTOROON.

ANOTHER literary voice, no less than that of the Author of 'Whitefriars,' puts in a claim to the merit, be it much or little, of the story which Mr. Boucicault has dramatized as 'The Octoroon.' This new voice claims a prior title to that of Capt. Mayne Reid; in fact, puts Capt. Reid into the same unpleasant position of defence as that in which Mr. Boucicault stood, and stands. How the Author of 'Whitefriars' can be answered, if at all, is pointed out in the following note. Altogether, the authorship of 'The Octoroon' is growing into a curiosity of literature. The case stands thus:—

Mr. Boucicault produces at the Adelphi 'The Octoroon,' a melo-drama which he offers as a transcript of life in Louisiana—from his original observations.

Capt. Mayne Reid urges (or it is urged on his behalf) that 'The Octoroon' is a play adapted lately from his story of 'The Quadroon'—a transcript from life in Louisiana—from his original observations.

The Author of 'Whitefriars' now comes forward with an assertion, backed by dates and other details, that 'The Octoroon'—and, therefore, presumably, 'The Quadroon' also—is a close version of his tale of 'Masks and Faces.'

The most curious fact in the affair is, that while Mr. Boucicault and Capt. Mayne Reid assert that 'The Octoroon' and 'The Quadroon' are each based on the author's knowledge of life in Louisiana, as seen by themselves, the author of 'Masks and Faces,' the common original, as it is now averred, does not pretend to have ever been in Louisiana at all!

Here follows the new claim, with a statement of the ground on which it is made.—

"December 4, 1861.

"It has not been my good fortune (probably) ever to peruse the tale of 'The Quadroon,' for which Capt. Mayne Reid, it appears, claims the honours of the original invention and characterization of the Adelphi melo-drama of 'The Octoroon.' But if this story greatly resembles that of the piece mentioned, a new question of authorship arises, which I beg to submit to you, and which, it appears to me, can only be settled by a reference to dates.

"In the year 1855 there appeared in the columns of the *London Journal* one of those long, exciting romances in which your very popular contemporary's public chiefly delights, entitled 'Masks and Faces.' It extended over a period possibly of eight months in publication, and included a great variety of adventures by sea and land. The principal of these consisted of the achievements of the captain of an English ship in rescuing a lady of mixed blood, placed in exactly the circumstances and surrounded by exactly the same kind of persons and events as form the staple of 'The Octoroon.' That is to say, the Oriana of 'Masks and Faces,' like the Zoë of 'The Octoroon,' is almost a perfect white, her mother being a quadroon; has been educated in every refinement and luxury, and is a dazzling beauty. She is descended, on the father's side, from one of the original French planters of Louisiana, a certain Count Avery, and this father has died, and left his

affairs in great disorder, chiefly through the under-hand dealings of a villanous Yankee overseer on his estate, called in 'Masks and Faces' Jonathan Leppard, in 'The Octoroon' Macdowsky. These two Antipholi of Louisiana are enamoured, in exactly the same villanously impassioned and resolute manner, of the unhappy Oriana, *alias* Zoë, whom exactly the same slight flaw in their father's act of manumission leaves exposed to the hard fate of being sold, with the rest of the "property," to pay the late possessor's debts. This duplicate overseer, Jonathan Leppard or Macdowsky, hopes to secure possession of the charms of the beautiful Creole lady (as the writer of 'Masks and Faces' styles her, very probably in compliance with the popular English ascription of that term to all persons of mixed European and dark blood) by outbidding competition at a public sale, *precisely* in the same style one as the other. The scene of the sale of the slave lady is almost literally the same in the novel of 'Masks and Faces' as in the grand "sensation scene" of 'The Octoroon.' An American sea-captain figures in the novel, whose characteristics exactly correspond with those of the captain of the Mississippi steamer in the melo-drama. In fact, the romance differs only in some few minor points of detail from the drama, excepting in the catastrophe, which would appear more judiciously arranged in the novel than in the play, or, at least, more to English taste, for in the former the British captain saves his Oriana, carrying her off in triumph under all the guns of New Orleans, and in defiance of a ship of war bearing the stars and stripes, and an assault of a rowdy mob of New Orleans to prevent the departure.

"Now, these stories of the tale of 'Masks and Faces,' and of the drama of 'The Octoroon,' thus detailed, are so completely identical—still more in the characters of the novel—with the *dramatis personæ* that it is impossible to doubt but that one is the direct product of the other, inasmuch as they are almost as precisely repetitions as the figures of a crowd in a ball-room reflected in a mirror. Does Capt. Mayne Reid, then, state that the story of his 'Quadroon' is similarly identical, or even bears any strong degree of similar resemblance to that of 'The Octoroon,' whose inspiration he claims? If so, the decision becomes, as previously hinted, a question of dates. 'Masks and Faces' appeared in the *London Journal* in 1855. It was publicly announced to be by a distinguished writer of popular fiction, known as the Author of 'Whitefriars.' It excited much attention at the time, and in a publication so generally diffused, and paraded with significant illustrations in news-venders' windows, could hardly have escaped coming to the notice of Capt. Mayne Reid. If his production was anterior to this, does he mean then to say that he allowed an open, indiscriminate plagiarist of the kind to go on without a word of remonstrance, in a work of a similar form to his own, when he claims authorship so eagerly in a species of transmutation in which the greatest masters of the drama (and why not the writer of a melo-drama?) have in all ages indulged?

"In justice to all parties, let Capt. Mayne Reid therefore state *precisely* what it is he claims in the origination of the story and characters of 'The Octoroon,' and give the date of his publication; so that the literary public may decide if he is not himself as guilty as any one else of the offence he denounces. Nor will it be the first time, in that case, that those huge popular tales have proved the convenient quarries of the library novelist.

"As respects the claims of Mr. Boucicault to originality, he also should favour us with dates. It is stated that his play has been long performed in the United States previous to its introduction in London. Can he show that it was performed before 1855, when the story of 'Masks and Faces' was reprinted, week by week, in the *New York Tribune*?—although, as the present writer happens to know, it was found so little pleasing to the inordinate self-esteem of Yankee and Southern slaveholder alike, that it excited violent animadversion throughout the 'States,' until finally the proprietors of the American journal broke off the republication.

SCUM CUIQUE."

SITE OF HARAN.

Brandon Towers, Belfast, Nov. 29, 1861.

I OBSERVE, in the last number of the *Athenæum*, a letter from Mr. Charles Beke, in which he attempts to identify the village of *Harrân-el-Awamid* with the *Haran* mentioned in the book of Genesis. I have no doubt this letter will surprise all Biblical geographers as much as it has surprised me.

I first visited the village of *Harrân-el-Awamid* ("Harrân of the Columns"), which is situated in the eastern part of the plain of Damascus, in the year 1852; and I confess I was then as unconscious as I am still doubtful of having made any important discovery, so far, at least, as the *Haran* of Abraham is concerned. But as Mr. Beke seems fully convinced of the truth of his opinion, as his argument manifests considerable ingenuity, and as he professes thereby to remove seeming inaccuracies and inconsistencies in Scripture, I shall state in a few sentences my reasons for not identifying *Haran* and *Harrân-el-Awamid*.

1. *Haran* is said, in Gen. xxiv. 10, to be in *Aram-Naharaim*, "Aram of the two rivers." The epithet *Naharaim* is here attached to *Aram* to distinguish the province referred to from the country of *Aram*, which included Syria as well as Mesopotamia (compare Num. xxiii. 7; 2 Sam. x. 6); and also from *Aram-Dameek* (the *Syria Damascus* of Pliny), which was the special appellation of the territory of Damascus (2 Sam. viii. 6; Isai. vii. 8).

2. The position of *Haran*, as given in the Bible, would not agree at all with that of *Harrân-el-Awamid*. We read in Gen. xxix. 1:—"Then Jacob went on his journey, and came into the land of the people of the east." How could this be applied to a district adjoining Damascus? When returning again to Canaan it is said (Gen. xxxi. 21) that "he passed over the river," which evidently means the Euphrates. So the incidental allusions in Gen. xxiv. 4—8 show that *Haran* was far distant from Canaan; whereas Damascus is upon its border.

3. It appears that the people of *Haran* depended upon "wells" for a supply of water for themselves and their flocks (Gen. xxiv. 11, xxix. 2 *seq.*). Now, this is applicable to *Haran* in Mesopotamia, but would not be true of *Harrân*, or any place in the plain of Damascus, where there is abundance of water in the rivers and lakes.

4. In the Septuagint *Aram-Naharaim* is rendered "*Mesopotamia*,"—a name which appears to have been as definite at that time as it is now, and which is just a translation of *Naharaim*.

5. Josephus describes *Haran* as being in Mesopotamia, and he speaks emphatically of its great distance from Canaan. Alluding to the journey of Abraham's servant, he says—"The servant got thither not under a considerable time; for it requires much time to pass through Mesopotamia, in which it is tedious travelling, both in winter for the depth of the clay, and in summer for want of water." (Ant. i. xvi. 1.)

6. Jerome, in Eusebius's 'Onomasticon' (s. v. *Charra*), thus writes:—"Charra civitas Mesopotamiæ trans Edessam, quæ usque hodie *Charra* dicitur, ubi Romanus cæsus est exercitus, et Crassus dux captus." The position of this city is also described by Pliny (H. N. v. 24), Strabo (xvi.), and Ptolemy (v. 18), who places it in Central Mesopotamia, and who also defines, with great precision, the bounds of that province.

I think, upon considering the foregoing simple statement of facts, Mr. Beke will admit that to locate *Haran* in Mesopotamia cannot be designated an "erroneous traditional interpretation of Scripture." The Scripture narrative indicates very clearly the position of *Haran*; and the very high ancient authorities—the authors of the Septuagint version, Josephus, Eusebius and Jerome—are unanimous in placing it in Mesopotamia. To interpret *Aram-Naharaim* as "*Aram* between the two rivers of *Damascus*," and to interpret "the river" which Jacob crossed, on his return to Canaan, as the "*Pharpar*," is against all authority and all probability.

The "seeming inaccuracies and inconsistencies

of Scripture," to which Mr. Beke refers, are easily solved.

First, as to Abraham's servant being called "*Eliezer of Damascus*," and yet said in the succeeding verse to be "one born in my house," there is no difficulty. (Gen. xviii. 2, 3.) Every one can fully understand this who is familiar with the languages and idioms of the East. I hold that both expressions are correctly rendered in the Authorized Version. *Ben-bethi* is, literally, "son of my house"; but its real signification is, "one born in my house," and not, as some imagine, a mere "member of the household." Both the expressions are well-known Oriental idioms; and both are true as applied to *Eliezer*. When he is called "*Eliezer of Damascus*," it does not follow that he was born there, nor even that he had ever been in the city. I knew well in Damascus two men, one called *Ibrahim-el-Haleby*, "*Abraham of Aleppo*," and the other *Elias-el-Akkary*, "*Elias of Akka*," neither of whom had ever been in the town whose name he bore. Their ancestors had come from those towns; and that is all such expressions usually signify in the East. So it was with Abraham's servant.

Secondly, as to the passage in Acts, vii. 2-4, it seems to me to require a considerable amount of ingenuity to frame a difficulty from it. "The God of glory appeared to our father Abraham when he was in Mesopotamia, before he dwelt in Charran." It is not here said, or even implied, that *Charran* was not in Mesopotamia. And as if to prevent any one from inferring that he thought so, Stephen says, in verse 4, "Then came he out of the land of the Chaldeans, and dwelt in Charran." Had he thought that *Charran* was not in Mesopotamia, he would have said, "Then came he out of Mesopotamia, and dwelt in Charran."

Mr. Beke makes two serious blunders in his zeal to advance his own argument. First, he says, referring to a statement of mine in 'Smith's Dictionary of the Bible,' that Jacob "never came within 300 miles of the Euphrates." Now, it so happens that the Plain of Damascus, where Mr. Beke locates *Haran*, is only about 170 miles from that river! Secondly, he says the flight of Jacob occupied only seven days from *Haran* to Gilead. The Bible tells us it occupied ten (Gen. xxxi. 22, 23).

The whole distance from the town of *Haran* in Mesopotamia to Mount Gilead is about 300 miles. It would seem that Jacob, when meditating his flight, moved his flocks down to the banks of the Euphrates, sent for his family to join him there, and then, crossing the river, struck across the country direct toward Gilead. The distance he travelled in ten days was thus about 250 miles. It is no unusual thing for Arab tribes, under similar circumstances, to make as quick marches at the present day. Laban, on his swift dromedaries, could easily accomplish the same distance in seven days.

J. L. PORTER.

MR. THORNBURY'S 'LIFE OF TURNER.'

Hutton, Brentwood, Dec. 2, 1861.

"Turner hated plagiarism," says Mr. Thornbury in his recently published life of our great landscape painter (vol. ii. p. 256); and he endeavours to show, in no very graceful terms, in his preface, that plagiarism in literature is as repugnant to his feelings as a man of letters, as plagiarism in art was to the artist. "Mr. Timbs," remarks the biographer, "with little of that courtesy which should distinguish literary men, playing his scissors with his usual industry, has lately cut out a dozen or two of trite or erroneous Turner stories and published them in a catchpenny form—for which, as partly fulfilling Job's wish—I thank him."

I may very fairly exclaim with Gratiano, "I thank thee, Jew, for teaching me that word"; for Mr. Thornbury has plied his scissors on a short memoir of Turner of mine with a prodigality that seems almost incredible. Mr. Timbs, the prolific compiler, publishes his Turner stories as a compilation. Mr. Thornbury prints all the best of my Turner stories, scattered over many pages, as his own. In the last edition of Turner's 'Rivers of France,' published in 1853, by Mr. Bohn, there

is a memoir of the artist by Mr. Alaric Watts, in which is included six pages of extracts from my memoir, with honourable mention of me as the author. I need only refer to Mr. Watts's extracts, because it is from these that Mr. Thornbury has helped himself. Out of the six pages (p. xlii. to xlviii.) containing them, he has appropriated three; the contents appear in vol. i. pp. 67 and 198-199, and in vol. ii. pp. 130-131, 141, 161, 217-218 and 318. The first extract Mr. Thornbury takes the trouble to re-write:—

Reeve, 1861.

"He would walk through portions of England, twenty to twenty-five miles a day, with his little modicum of baggage at the end of a stick, sketching rapidly on his way all striking pieces of composition, and marking effects with a power that daguerrotypy them in his mind. There were few moving phenomena in clouds or shadows which he did not fix indelibly in his memory."

Thornbury, 1861.

"He walked twenty to twenty-five miles a day, with his baggage tied up in a handkerchief, and swinging on the end of a stick. He sketched quickly all the good pieces of composition he met. He made quick pencil notes in his pocket-book, and photographed into his mind legions of transitory effects by aid of a stupendous, relative, and minute memory."

Mr. Thornbury, thinking probably that my style was now sufficiently elegant for his purpose, lays down the pen for the scissors. His next extract, commencing "An intimate friend, while travelling in the Jura," vol. i. p. 198-199, is printed *verbatim*. The next cutting is manipulated with the skill of an accomplished penny-a-liner. It occupies an entire page of Mr. Thornbury's work, vol. ii. pp. 130-131, commencing "One element in Turner's success was his indifference to praise," and ending "He felt keenly the ignorant criticisms and ridicule with which his own pictures were sometimes treated." The ingenuity exercised to give originality to this paragraph, consists in half a dozen lines in one part of it being printed between turned commas, and attributed to Mr. Peter Cunningham! The fourth extract, p. 141, commencing "He never would tell his birth-day," is printed *verbatim*. Of the next interpolated paragraph, p. 161, commencing, "He wrote few letters," I have less to complain of. Mr. Thornbury does not print this similar to the rest as his own, but, like a vast number of other collectanea in his book, between turned commas, without acknowledgment or reference. The next extract occupies an entire page, p. 217-218, and is printed, also, *verbatim*; it commences, "Turner was always on the alert for any remarkable effects," and ends "in which the great artist's attention had been caught by the hissing and puffing and glowing fire of the locomotive." The seventh and last clause in my indictment against Mr. Thornbury is a short one; and as it is altered I must ask permission to give it entire:—

Reeve, 1861.

"There is yet another portrait to record: Mr. Charles Turner, A.R.A., the mezzotint engraver of his Liber Studiorum, and his oldest and most constant friend, was so desirous of securing a likeness of him, that he offered to pay Sir Thomas Lawrence, or any other artist that Turner should name, if he would only consent to sit, but he was not to be prevailed upon. Mr. C. Turner was, however, determined to have a likeness of him at all hazards, and availed himself from time to time of every opportunity of collecting memoranda for his purpose. He at length obtained a most characteristic portrait in oil, small, half-size, in the act of sketching. The singularity of his dress and figure have been scrupulously attended to, and it has been pronounced an admirable and faithful likeness. It will be gratifying to Turner's friends to know that Mr. C. Turner intends to engrave the portrait."

Thornbury, 1861.

"There is yet another portrait to record. Mr. Charles Turner, A.R.A., the mezzotint engraver of his Liber Studiorum, and his oldest and most constant friend, was so desirous of securing a likeness of him at all hazards, that he availed himself from time to time of every opportunity of collecting memoranda for the purpose. He at length obtained a most characteristic portrait in oil, small, half-size, in the act of sketching. The singularity of his dress and figure have been scrupulously attended to, and it has been pronounced an admirable and faithful likeness. I believe that Mr. C. Turner engraved this portrait."

If anything were needed to show the worthlessness of Mr. Thornbury's 'Life of Turner,' it is the unnecessary appropriation of this passage. One would think that a chapter devoted especially to "The Turner Portraits," about which so much

curiosity prevails, would be at least marked by some research. But Mr. Thornbury cuts out my paragraph in all its detail, as related to me by Charles Turner himself, bad grammar—a common failing with Mr. Thornbury (here printed in *Italic*)—included; and having run his pen through the rash assertion of the engraver that he had offered to give a commission to Sir Thomas Lawrence, winds up simply with the remark, "I believe that Mr. C. Turner engraved this portrait." Mr. Thornbury, perceiving in my statement of ten years ago that Mr. C. Turner intended to engrave it, assumes that he did engrave it. By happy accident, in no way, however, due to Mr. Thornbury's research, he has hit the mark; for on the death of Charles Turner about three years ago, the secret came to light, at the sale of his effects, as every *dilettanti* knows, of his having engraved this portrait, as long back, apparently, as twenty years before. What criticism, then, can be too strong to denounce Mr. Thornbury's random assertion "I believe Mr. Charles Turner engraved this portrait"? A print from this plate, which it is suspected the sly engraver destroyed, may be seen at Mr. Graves', the eminent publisher of Pall Mall.

My memoir of Turner, it may be added, was drawn up from *visd voce* information imparted to me by some of the great artist's most intimate friends within three days of his decease.—Mr. Charles Turner, one of his executors, and Mr. Leslie, both of whom have since followed him to the grave; Mr. Windus and others.

Speaking of dear old John Britton, the well-known author of many beautiful works of vast and original research on the Cathedrals of England—a man whose memory is cherished by every true-hearted antiquary with homage and respect,—Mr. Thornbury says (vol. ii. p. 151),—"There is a story told of Turner's love of concealment, which connects him with Britton, the publisher of so many architectural works; a plausible and, I fear, a very mean man; one of those bland, selfish squeezers of other men's brains that still occasionally disgrace literature." To whom should this scandalous observation be addressed? I trust that some new biographer of Turner will arise to board this piratical craft, and rescue the valuable freight which the painter's bosom friends have committed to its keeping. It must be painful, indeed, to these gentlemen, to Mr. Trimmer and to Mr. Ruskin especially, to find their precious reminiscences mixed up with such an unlettered commentary. How light the manner, how flippant the treatment, how utterly unworthy of a great subject!

LOVELL REEVE.

SWEDISH EXPEDITION TO SPITZBERGEN.

Christiania, Nov. 18, 1861.

THE brief notice you gave, a short time back, of the Swedish Scientific Expedition to Spitzbergen, has induced me to send you some additional particulars, which will, I think, prove interesting to your readers. It will necessarily take a considerable time before the numerous and valuable specimens—zoological, geological, botanical, &c.—collected by the Expedition can be thoroughly examined in all their divisions and branches; yet, some patent facts, which rather tend to modify previous theories and inferences, may be communicated to English readers. This is done on the authority of Mr. Torell, who is at present in this city.

And, first, it has been ascertained beyond a doubt that the Gulf Stream impinges on the Spitzbergen coast. Not only was the seed of the *Mimosa scandens* discovered there, but also quantities of glass bottles, which the inhabitants of the Lofoden Islands and of Finmarken use in their cod-fisheries, as floats for their nets. It may, therefore, be inferred that this branch is a continuation of that which touches the Norwegian coast. The drift timber, however, which is found in large quantities along the coast, is carried thither by a stream from the East—namely, the Siberian—as a quantity of birch-bark, rolled together in a peculiar form, and evidently manufactured by man, was found amongst it, and it is known that the tribes along the Siberian coast use this birch-bark for net-floats. The

pumice-stone, which was found in large quantities on the coast, in all probability comes from Iceland, the southern coast of which is marked by a branch of the Gulf Stream. The Gulf Stream, however, was found to exert no influence on the marine animal life, which is entirely of a glacial nature; but that it does have great influence on the temperature and climate, there can be no question.

Formerly, it was supposed that the limit of eternal snow reached down nearly to the surface of the sea in the northern part of Spitzbergen; but from observations made on a range of rounded and uniform mountains (devoid of projecting points, &c.), it was ascertained that this limit is at least 1,000 Swedish feet above the level of the sea, so that there can be no glacier formation at a lower altitude.

Another experiment of much interest was also made with reference to the temperature of the sea at great depths. It had been the opinion that at great depths in the Arctic Ocean the temperature was at least +2° Cent.; but by using the apparatus termed the M'Clintock apparatus, a compact mass of bottom clay was brought up from a depth of 2,800 yards; and a thermometer being thrust in to a depth of 2 inches from the surface of the lump showed 0°6' C., while in the centre it showed 0°3' C.; the temperature of the water on the surface being 4° C.: and though the decreasing temperature of the clay might have been affected by the increasing temperature of the water, as it was being hauled up from the bottom (a business of two and a half hours), still it can have had no possible influence on the centre. At all events, therefore, the temperature at the bottom was by this experiment proved to be not less than 0°3' C. Notwithstanding this low degree of warmth, there were found several marine animals of different types and classes—amongst others a moderately large Polyparium, probably belonging to the Hydroid class; a bivalved mussel, some Tunicata attached to the Polyparium, Annelides, and one Crustacean of bright colours.

The Flora in Spitzbergen is poor; but still the Expedition has collected about sixty species of Phanerogamous plants. A white bear that was shot was on being opened found to have its stomach full of plants, thus proving that these animals can be herbivorous.

An interesting observation that was made led Mr. Torell and his colleagues to infer that the tusks of the walrus, among other uses, are employed to dig up food from the bottom; for in the stomach of one of the specimens was found a quantity of the *Myn truncata*, a species of sand-mussel, which lies buried at least one foot below the surface of the mud, and which the walrus, therefore, could only reach by using its tusks like a (dung) fork, with which to turn up the mud from the bottom.

Of land birds, a few only were found—the Falco, Gerfalco, Stryx nyctea, Ptarmigan, and Snow-bunting. As far as can be recollected, there were no strand birds, except the *Tringa maritima*. Eider-ducks were found, both kinds of Auk, and Gulls in plenty. The sea around Spitzbergen is very poor in fish; but marine animals of a low type were numerous; and among these will probably be found much that is new. Of geological specimens an interesting and valuable collection has been made. The palæontological formations seem to belong to the Permian and Jura. Numerous fossils were collected, amongst which were Ammonites, and impressions of leaves of Dicotyledonous genera, bearing a strong resemblance to palm-leaves.

On the whole, the Expedition has been very successful: old charts have been corrected, new harbours, &c. discovered, and parts that were before supposed to be water are now found to be land. When the scientific gentlemen who are engaged in examining the collections shall have completed their labours, a very interesting and valuable addition to our knowledge of those far northern latitudes may be expected.

M. R. B.

POPE CLEMENT V. AND THE 'INFERNO' OF DANTE.

Di ver ponente un pastor senza legge.—*Inf.* xix. 83.

Newington Butts, Surrey.

Pope Clement V. was a very unfortunate man; he was unfortunate in his life, he was unfortunate

in his death, and he was unfortunate ever after. But the sentence which Dante passed upon his soul saved him from eternal oblivion; and the anticipated arrival of his Holiness in Hell has come to possess some historical importance, as tending more than any other circumstance to fix the time at which the poet terminated the first cantica of his immortal *Divina Commedia*.

Clement V. was born at Uzeste, near Bazas, in Gascogne, about 1264 (*'Nouvelle Biographie Générale,'* Tom. X.). In 1295 Boniface VIII. made him Bishop of Comminges, and, in 1299, Archbishop of Bordeaux. On June 5, 1305, he was elected Pope, at Perugia, and, on the 11th of November of the same year, was crowned at Lyon, in the church of St. Just. With this elevation his misfortunes began. On returning from the ceremony, as the *cortège* was passing the descent of Gourguillon, an old wall, covered with spectators, came down with a crash. The Pope was knocked off his palfrey, the triple crown, first assumed, it is believed, by him, rolled in the dust, and the precious ruby on the top of it was lost. The Pope's brother, Gaillard de Got, was killed at his side; the mangled body of John, Duke of Bretagne was drawn almost lifeless from the ruins, and many unfortunate persons perished miserably.

Clement had been made Pope through the intrigues of Philip le Bel, King of France; and one of the conditions, stipulated for by the monarch, was that Clement should render infamous the name of his early benefactor. The Pope, who was a very artful man, contrived to evade this. After his coronation, he went to reside at Bordeaux; but the vindictive persecution of the memory of Boniface by his royal patron so frightened him, that, in 1308, he resolved to remove to Avignon, which was beyond the limits of Philip's dominions.

Another motive for selecting Avignon as his residence was its vicinity to the Comtat Venaissin, which was subject to the Holy See. On the octave of the Epiphany, January 13th, of the following year, the Pope took up his quarters there at the convent of the preaching friars. The presence of the Papal court at Avignon brought many illustrious strangers to that city, much to the satisfaction of the inhabitants. A few days after Clement's arrival, the ambassadors of the newly-elected Emperor, Henry VII., who had been chosen chiefly through the Pope's influence, waited upon him, to make submission, in the name of their master. They were very graciously received; and his Holiness, who willingly confirmed the election, promised to crown the Emperor with his own hands. But Clement wanted the courage, or consistency, to carry out what he had commenced, and alternately betrayed all parties.

Among other things which the King of France desired of the Pope was the suppression of the order of the Templars. This, with the condemnation of the Beguards and the Dulcins, Clement ordered at the Council of Vienne, which was held in October, 1310; but, as an offset against it, the memory of Boniface was cleared from the accusation of heresy, and he was numbered with the true successors of St. Peter. Thus, while the Pope contented the cupidity of the King in one matter, he provoked the royal indignation in another.

After four years spent at Avignon, Clement thought it would be better for him to establish himself at Carpentras, the chief city of the Comtat Venaissin. Before his departure, he celebrated with great pomp the canonization of Celestin V. (Pier da Morrone), May 5, 1313. This circumstance and the death of Clement, in the following year, have an important relation to the time at which the *Inferno* was finished.

In selecting the pleasant and patrician-like little city of Carpentras for his abode, Pope Clement V. showed much taste for the picturesque, as well as a wise consideration for his general health. Carpentras is situated on an elevated and commanding position, in the midst of a fertile and very beautiful country, surrounded with villas and farms and pretty villages. The general features of the scenery are suggestive of Perugia; and, though the two cities will not bear comparison, yet the country about them may. Possibly, Clement

perceived some resemblance; and the association may partly have determined his choice. It is true there is no Apennine range to bound the prospect on either hand, but the lofty Mont Ventoux rises up with majestic mien, a monarch among French mountains, and materially contributes to compensate the loss. The city itself is not without attractions. Many are the memorials of Roman rule still remaining to reward the researches of the curious, mingled with mediæval monuments of much interest, both military and ecclesiastical. There is a palace with a princely promenade, a cathedral, a theatre, and a public library containing many precious manuscript records, and among them one which relates to the subject of this sketch. There was once a codice of the *Divina Commedia* here, but that has disappeared in a most mysterious manner. Carpentras, in the Middle Ages, was a strongly fortified city; but the citizens no longer crouch within the crenellated walls; they have burst through these embattled barriers, and spread their homes in liberty beyond.

The Pope remained at Carpentras nearly a year, when, early in April, 1314, he fell ill. Being recommended to try his native air, he set out for Bordeaux, but, his malady increasing by the way, he was obliged to stop at Roque Maure, on the confines of the Comtat, where he died, April 20, 1314, aged fifty years. His complaint is affirmed to have been an ulcerous affection of the lower part of his body, by some biographers called "lupus."

No sooner was Clement dead than the treasures he had accumulated were pillaged; and his mortal remains became the subject of a long and vexatious lawsuit. With the consent of the cardinals, at the request of the bishop and chapter, his body had been transported to Carpentras, to be buried in the vaults of the cathedral, but the canons of the collegiate church of Uzeste, founded by him, claimed it as their property, in virtue of a promise the Pope had once made them to be interred there. The cause took two years to decide, and was gained by the Pope's compatriots. But before the corpse could be deposited underground, the catafalque over it caught fire, and, setting light to the coffin, the body of the Pope was consumed from the feet to the waist. Nor did the residue left for burial, when laid in its last resting-place, remain long undisturbed. In 1577 reforming Calvinists burst open the Pope's sepulchre and dispersed his bones. Thus did the hand of Heaven pursue Clement V. even to the grave, and the Imperial cause, which he had so basely betrayed, was avenged by a retributive Nemesis.

These were the misfortunes which befell the Pope's body:—those which happened to his soul have next to be noticed.

Dante is informed by the shade of Pope Nicolo III., that his successor in Hell, Boniface VIII., will not there remain "*sottosopra*," so long as he had done, before Clement V. will come and take his place. Nicolo III. died in August, 1280, the period of the vision is April, 1300; Boniface died October 11, 1303. The former, therefore, had been in the position described rather less than twenty years, and Dante announces as a positive fact, that the death of Clement V. will take place within a corresponding space of time, that is, before October, 1323. And now comes the question—Would the poet have ventured on this prediction unless Clement had been already dead? The most reasonable among the readers of the *Divina Commedia*, who have no favourite notions to save by maintaining the contrary, affirm that Dante would not, and consequently that the *Inferno* was not finished as we have it now till after Clement's death in April, 1314. Others pretend that the poet might safely have ventured on this prediction, and did so. The question involves some matters of importance in reference to the more recondite meaning of certain passages in this cantica. Those who maintain that the *Inferno* was finished by 1309, among whom is Signor Fratticelli, bring forward three arguments to support their opinion, and to justify the poet in risking an assertion, which nothing could justify but the fact itself. These arguments are founded on three propositions:

the advanced age of Clement—his chronic disease—and the dictum that no Pope would ever hold the keys so long as the Apostle Peter had done, "*non videbis annos Petri*" being a received Papal axiom. This latter notion, a mere clerical superstition, may be dismissed as unworthy of consideration. Even admitting the assertion, itself requiring proof, that Peter came to Rome before Paul, and ruled the Church in that city for nearly twenty-four years, Pope Pius VI. ruled it for nearly twenty-five. If the words be taken in reference to the age of the Apostle Peter when he died, between seventy and eighty, not a few Popes have lived quite as long. Great weight of argument has been laid on the supposed advanced age of Clement, the "*grave età*" as it has been called; but this would seem to be an error, since he was little more than forty when elected, and in 1309 only forty-five. Dante, therefore, could not have drawn any certain conclusion from the Pope's age that he would not live fifteen years longer. Did he venture on that assertion from the known state of the Pope's health? This is the only question of real importance. That Clement was in delicate health, and much given to the consulting of physicians and the taking of medicine, were circumstances well known to those who were about his person, and probably had spread beyond the precincts of the court; they are frequently alluded to in his correspondence with the King of France. But that Dante was so perfectly well acquainted with these things, had so accurate a personal knowledge of the Pope's malady, and was so skilful a physician, so learned a pathologist, so consummate a master of diagnosis, as to predict his death with the infallibility of fate, five years before it happened, is rather exceeding the limits of probability. That Dante was a very learned physiologist, and personally acquainted with the phenomena of disease and the practice of the healing art, we learn from the *Divina Commedia*; but that he ever attended Pope Clement V., or was at any time called in to consultation on his case, we have no reason whatever to suppose, but quite the contrary. The Pope was then in the prime of life, exceeding the age of Dante himself by only one year,—and even supposing him to have been a confirmed invalid, this circumstance was much in his favour. But was the Pope a confirmed invalid either in 1307 or in 1309, and did the character of his disease, whatever it may have been, threaten at either time a speedy dissolution? We must now turn to authorities. Lucens, in his '*Historia Ecclesiastica*' (*Scrip. Rer. Ital.* Tom. xi.), states, that in 1307, the Papal court having gone to Poitiers to accommodate a certain difference between the Kings of France and England, Clement was taken so unwell that the business had to stand over for nearly a year; and Baluzius, in his '*Historia Paparum Avenionensium ab Anno 1305 ad 1394*' (Paris, 1693), gives several letters which passed between the King and the Pope just before this period in reference to their place of meeting, which show that Clement was very careful of his health, and made the necessity of his taking medicine a plea for postponing his engagement to meet the King, thus turning his bodily infirmity to a political advantage. Whatever this infirmity may have been it was not a very serious matter, but rather so slight as not to be thought worth mentioning by another ecclesiastical historian, Bernardo Guidon, who had an especial talent for noticing disease, and in his *Life of Clement* (*Scrip. Rer. Ital.* Tom. iii.) says nothing about it. What he does say of the Pope, that he was in no way affected by the severe epidemic of 1311, might be taken to signify that he was then in tolerably good health. In fact, after 1307 His Holiness would seem to have had no other complaint worthy of being chronicled, until 1313, when, for the benefit of his health, he was induced to remove to Carpentras. Nor was he taken seriously ill till the following year. These facts show how untenable is the assumption of those who affirm that Dante might most safely and certainly have declared, five years at least before the Pope's death, that Clement V. would not live to be sixty years old, and who consequently conclude that the *Inferno* was finished and in the hands of Dante's friends as early as 1309. With the destruction of

this frail hypothesis falls to the ground the story of the letter ascribed to the Frate Ilario. There are other indications in the *Inferno* that it was not finished, as we have it now, until several years after 1309; but the evidence deduced from the death of Pope Clement V. is the most satisfactory and conclusive.

H. C. BARLOW, M.D.

OUR WEEKLY GOSSIP.

THE Archbishop of Canterbury, the Lord Chancellor, the Speaker of the House of Commons, with a long list of official, elected and family Trustees, attended a meeting, on Tuesday, at the British Museum. So large a gathering has not been held for years. The object was to decide on the great scheme of separating the contents of the Museum into their natural groups,—a scheme long advocated by Mr. Panizzi in behalf of literature, and by Prof. Owen in the interests of science. This plan was adopted in principle by the Trustees a year ago, though only by a majority of one voice. Since then the Government has made the work its own; and the meeting of Tuesday was convened to take the final opinion of the whole body of Trustees. The vote of last year was confirmed, we understand, by a large majority. This act decides the preliminary stage of the business; and permits the Government to meet the House of Commons, without fear of misrepresentation or opposition from the Museum itself. The details of the change are, of course, not settled; nor can they be until Parliament meets.

The Dean of Windsor, as we hear, has privately invited some distinguished archaeologists to visit Windsor Castle, and subject its lions to a more exact and minute examination than has yet been made. Mr. Parker, we believe, has been looking into the structure; Mr. Winter Jones into the books; Mr. Albert Way at the figures in the magnificent west window; Mr. George Scharf at the great collection of historical portraits; Mr. Glover at the armorial bearings of the Knights of the Garter; and Mr. Woodward into everything. What may come of these inquiries, it is impossible for us, as yet, to say. In the spring, when London will be full of guests from all nations, the Dean may possibly give a breakfast or a luncheon, improved by half-a-dozen learned papers on the subject. Windsor Castle is a structure interesting to all Englishmen, and, indeed, to all who speak or read the English tongue. We do not suppose that Her Majesty's house is being thus scrutinized without authority from its occupants.

M. Chacornac having requested Mr. Hind to name the fifty-ninth asteroid (hitherto distinguished only by its number), he proposes to call it *Olympia*, one of a list of names selected by Sir John Herschel.

We are glad to be able to contradict the rumour that Mr. Charles Andersson, the South African Explorer, and author of 'Lake Ngami' and 'The Okavango River,' had suddenly died. Letters from him, dated Cape Town, October 7, have just been received, according to which he was about to start for the interior.

On Thursday next, the Society of Antiquaries will begin a new series of special Exhibitions, after the manner of those which last year gave so much pleasure to the Fellows and their friends. The evening will be devoted to Early and Curious Books, from the introduction of printing down to the seventeenth century, on which Mr. Tite will read a paper. Many choice examples will be contributed by Mr. Tite, including some beautiful works from the Paris press, block-books, books of devotion, Caxton's works, a series of Shakspeare quartos, a Coverdale Bible, and many other rarities. The Council of the Society will be glad to receive additional contributions of rare books for the evening.

In these days of inflammable ladies, we shall, perhaps, render good service by giving publicity to the discovery recently made by a French chemist, that muslin, lace and all descriptions of light stuffs may be rendered fireproof by steeping them in starch mixed with half its weight of carbonate of lime, or, as it is commonly called, Spanish chalk.

A reader, who complains that many good books are published without indexes, or even copious tables of contents, and who proposes to avoid purchasing any serious work unless it shall be provided with the means of easy reference, asks if some joint action on the part of readers and buyers could not be taken in the matter? We fear not.

The London Stereoscopic Company have issued, among their later enterprises, a series of instantaneous views of Paris—of buildings, boulevards, street-views and the like—taken, we infer, by French artists. They are extremely sharp, vivid, brilliant, full of life and motion; the very image of the actual places and events transferred and fixed for ever. We have recently been looking over a good many French and Italian photographs; and we must warn our English friends, that in the coming contests at South Kensington they must look for stern trials of strength. The French artists have the advantage over us in marine and street subjects, the Roman and Venetian artists in landscape and structure. Our figure photography is, perhaps, superior to the French or the Italian.

We have received the following communication:

"West Strand, Dec. 5, 1861.

"The attention of Her Majesty's Commissioners has been drawn to statements, which have lately appeared in several public journals, implying that a pamphlet, entitled 'Some Account of the Building designed by Capt. Fowke for the International Exhibition' (Chapman & Hall), emanates officially from Her Majesty's Commissioners. I am directed to request that you will take an early opportunity of stating that the pamphlet in question having been published without the knowledge or sanction of Her Majesty's Commissioners, is in no sense to be regarded as official, and that the Commissioners will not issue any account of the Building, or of their proceedings, which does not bear on the face of it direct evidence of its being published by their authority.—I am, &c.,

"F. R. SANDFORD, Secretary."

Christmas books, in gorgeous covers, begin to fall thickly upon our tables. Messrs. Low & Co. publish 'Shakspeare's Songs and Sonnets,' illustrated by John Gilbert. The examples are selected, for they are limited to fifteen in number, with judgment. The illustrations consist of woodcuts and chromo-lithographs; the first are in Mr. Gilbert's best style, apt, pretty and spirited. Considering the position assumed by the book, we know of none better applied to the themes. The chromo-lithographs are not of unmixed merit; the designs of some are far superior to the colouring which has been employed upon them. The artist's besetting sin of over-florid colour is discoverable in many which are hot and almost tawdry with reds, burning browns and rank greens. How much these need the introduction of cool and chaste tints may be seen in a design of a hawking party, appropriate to the Sonnet "Some glory in their birth"; still more so in a graceful and telling sketch to "Sigh no more, Ladies." The best of all, and strongest example of the better taste, is a beautiful picture preceding "Come away, come away, Death," where the "fair, cruel maid," with a vain, gay smile upon her lips, and love-deriding eye, sweeps in graceful stateliness past the kneeling lover who sings the famous song. His action is not less expressive than the lady's is elegant and characteristic. This drawing is so beautiful that it redeems at once the shortcomings of the above named. Mr. Gilbert shows what a master of charming colour he is in such designs. The next work, illustrating "Who is Sylvia?" has almost as many beauties. Our objections to the first must be understood to be comparative, and applicable to the colour alone. Notwithstanding these, the publication is one of the best examples of its class. The chromo-lithographic reproductions are by Mr. Vincent Brooks, and do him honour.

Mr. A. W. Bennett publishes 'The Ruined Castles and Abbeys of Great Britain,' by W. and M. Howitt, with photographic illustrations by several eminent operators. This book contains a memoir of the subjects, which include Bolton, Glastonbury, Iona, Holyrood, Lanthony, Tintern,

Fountains, Melrose and Rivaulx Abbeys, with the Castles of Chepstow, Raglan, Conway, Goodrich, Roslin and Carisbrooke, and Elgin Cathedral. It will be seen from the selection that the picturesque element alone is aimed at in this book: to this end, we are bound to say, the result is a successful one. There is just enough of an archaeological character in the papers to give that mould of sentimental antiquity which is so highly appreciated in drawing-rooms. It is so delightful, without study, to believe oneself accomplished, or, when repeating the uncouth phrases of antiquity, to fancy we understand their force! To assay the gold of time, without soiling our fingers, is an ecstatic process. Accordingly, here are all sorts of outlandish phrases, to which the fancy can attach indistinct meanings, vast, of course, in the mistiness surrounding them. A snack of mediæval Latin gives the rime of age—"the hoar-frost of antiquity," as Sir Thomas Browne has it—to a tinted and hot-pressed page, whereon a good deal of simple gossip is retailed. As to the taste with which this has been done, we leave the reader to please himself, with the statement of the authors, that "the visitor will be agreeably surprised to find the nave" (of Bolton Abbey) "converted into a parish church." It is with great regret we find the text of this book to be a mere compilation from commonplace authorities, repeating scores of exploded notions and fables regarding the dead men of old. Historians, biographers and genealogists have laboured in vain to correct the ignorance, the blunders, and the malicious falsehoods perpetrated by blockheads, clowns and satirists,—which, as far as the authors are concerned, will now obtain a new currency. To those who do not care about truth, and are heedless of history, the book may be entertaining in a mild way.

The Earl of Caithness, Capt. Kater, and Dr. Hugh Diamond, have been appointed by the Royal Commissioners for the International Exhibition as a committee on Photography and Photographic Apparatus. Mr. P. Le Neve Foster acts as secretary.

Those interested in the recent great discovery in physical science by Kirchhoff and Bunsen will find a searching analysis of the two new metals, *Cærium* and *Rubidium* in the recent number of Poggendorf's *Annalen*.

Although the Emperor of Russia does not seem disposed to favour the spread of education in his vast dominions, he follows the example set him by his predecessors in favouring astronomical science. His Majesty has just placed 125,000 francs in the hands of M. Otto Struve, the distinguished Russian astronomer, to enable him to erect an observatory on Mount Ararat. This observatory and one about to be erected on a mountain near Poonah, to be placed under the superintendence of Capt. Jacobs, may be regarded as results of Prof. Piazzi Smyth's successful astronomical researches on Tenerife. We believe that Prof. Smyth's forthcoming work on Russia contains an account of his visit to M. Otto Struve at the Pulkowa Observatory.

The noted "original French wizard," M. Robin, has re-appeared amongst us, and holds his *Soirées Fantastiques* at the Egyptian Hall. Ten years since he created a considerable sensation; but, in the interval, we have made the acquaintance of too many magicians to be easily surprised. Not that M. Robin repeats his old wonders, but that he is one of those who depend upon machinery, and we have been recently taught to admire the sleight-of-hand that is apparently independent of all mechanical apparatus. In these days, there is none that is really so; and M. Robin is only more honest, or more ostentatious, than his competitors. In fact, M. Robin appears to have been desirous of parting with the advantage of delusion altogether, and endeavours to give a scientific character to his *stance*, by explaining to his audience the laws of electricity, to which he was indebted for many of his effects. For this purpose, he brought forward Ruhmkorff's monster coil, on which are rolled 22,000 yards of copper, and which emits an electric spark seventeen inches long,—with the explanation of a plan by which all the street-lamps in London could be lighted simul-

taneously. As the audience, however, did not respond to this part of his lecture in the manner that he had expected, it has been, since the first night, discontinued.

In Mr. Elhanan Bicknell the arts have lost a sagacious friend. Mr. Bicknell not only readily acknowledged, but munificently sustained, and also aided in calling into existence, many of the more important efforts of the British School, as well in water-colours as in oil. With the decease of this gentleman terminates the career of the last of the four principal collectors of modern Art, at a time when it was a spectacle to behold the hand extended to any but an established and long-cherished favourite. The names of Vernon, Wells, Sheepshanks and Bicknell stand prominently forth as those of men uninspired by desire of profit, unimpelled by motive of investment—men who collected works of the painter's skill because of the pleasure and the instruction they derived from their contemplation, and of their love for the art exhibited in the works,—who sought companionship with their authors because of the interest that extended beyond the surface of the picture. Mr. Bicknell died on the 27th of November, deeply lamented by a large circle of the artists of his country.

James Nichols, "author and printer," whose death was advertised in our last number, was one of the rare race of learned printers, and a man of unbounded general information. In controversial literature, his great work was his 'Arminianism and Calvinism compared.' Among the many works which he edited, there are two, at least, which cannot be surpassed for judgment, zeal, care and scholarship on the part of the editor; namely, 'The Poetical Works of Thomson' and 'The Complete Works of Dr. Young.'

Prof. Leitch has announced a new theory on the Queen Bee, a puzzle which has exercised the wits of naturalists and philosophers for many ages. How is a Queen Bee produced from an egg, which, under ordinary circumstances, would produce a sterile worker? It is commonly supposed that this change is effected by the supply of a peculiar food (a "royal jelly," it has been termed) to the larvæ. Prof. Leitch considers that the change is effected by an increase of the temperature of the cell containing the larvæ intended for the production of a queen bee, and that the object of the isolated position of the royal cell, is to admit of it being surrounded by a cluster of bees, who, by their rapidly increased respiration, produce the warmth necessary to accomplish the growth of the queen. It may prove to be so. Who will undertake critical observations with a view to test this theory?

"In your last issue," writes a Correspondent, "you speak of the discontinuance of public executions in Bavaria. It may interest your readers to know that for some years back there have been no public executions in the colony of Victoria, in Australia. Criminals have been quietly hung in the court-yard of the jails in presence of the proper functionaries. I believe the adoption of this system was owing to its advocacy by Mr. C. Dickens."

An exploration among the archives of Lucca is said to have been rewarded by the discovery of two treasures of widely different value—namely, a manuscript by Galileo and a play by Metastasio. We hope this may be true; but announcements similar to these are so frequent in foreign journals, when the editors are in the condition of a London colleague, who was compelled to "burn a child in Cornwall," that hope in this case is stronger than expectation.

In a little Silesian town near Breslau, among old papers which had been stowed away for many years, letters and rescripts of Frederic the Great have been discovered. They are two hundred and seventy in number, and are addressed to the Generals Von Borek and Von Schultze, who at that time commanded Silesian regiments. The letters have come indirectly from the descendants of the two Generals into the hands of the present possessor; they are dated from the years 1740 to 1755, and seem to have been all dictated by the King, whose own signature they all bear. The contents are of various nature, and throw interest-

ing lights on the character of the time and contemporaries.

Berlin has lost, this week, two of its celebrities. The papers announce the death of Prof. Wilhelm Hensel, painter to the Court, and brother-in-law to the late Felix Mendelssohn-Bartholdy, as well as that of Dr. Theodor Mundt, the well-known poet, novel-writer and critic, formerly one of the most conspicuous members of the so-called "Junge Deutschland."

Mr. Anton Hartinger, of Vienna, the first who applied printing in colours to the illustrations of works on Natural History, as shown in the *Paradiseus Vindobonensis*, and who has also carried printing in oil colours on paper to a high degree of perfection, has at last succeeded in printing oil-paint on canvas, after nearly giving it up in despair. The principal difficulty to be conquered was the laying of the ground-colour on which the other tints could be printed. By a fortunate accident, this difficulty has been surmounted. The inventor has already taken out a patent for the Austrian dominions. We have lately seen specimens of this mode of printing, some three feet long.

FRENCH GALLERY, 120, Pall Mall.—The NINTH ANNUAL WINTER EXHIBITION OF CABINET PICTURES by living British Artists, is NOW OPEN daily, from Half-past Nine to Five.—Admission, One Shilling.

HOLMAN HUNT'S Great Masterpiece of Sacred Art "BEHOLD! I STAND AT THE DOOR AND KNOCK," specially valuable as the highest most complete expression of the genius of this eminent English Painter, is NOW ON VIEW at the GERMAN GALLERY, 108, New Bond Street, prior to its being returned to its private possessor, and final exclusion from public exhibition altogether.—Admission Sixpence, from Ten to Five. A perfect light insured at all times.

SCIENCE

The Romance of Natural History. By Philip Henry Gosse. Second Series. (Nisbet & Co.)

THERE is no good reason why this should be entitled 'The Romance of Natural History.' The only recent volume to which such a title can be appropriately given is that by M. Du Chaillu. The gorilla of that gentleman is, indeed, a very popular romance, awakening lively interest from Africa to Albemarle Street, and from the British Museum to Mr. Spurgeon's Tabernacle. This is the really novel and entertaining Romance of Natural History, by the side of which Mr. Gosse's miscellany is as a church rat to a Barbary ape. The Miscellany of Natural History would have been a more appropriate title,—for what romance can be found in the absurdities of mermaidism or in the "self-immured," to wit, "Mr. Bartlett's toad, Mr. Bree's toad, Mr. Smith's toad, Mr. Clark's toad," and the toads of other respectable gentlemen? Romance about toads—whether toads in the hole or out of it—no one has ever yet discovered except Mr. Gosse. So again, what romance in Peruvian vipers, black snakes, rattlesnakes, cobras and lizards? What possible romance can be thrown around snakes swallowing mice, and frogs, and hedge-sparrows, and robins, and eels, and other fascinated dainties? There may, perhaps, be some romance in the sea-serpent—indeed, that is nothing but romance—but then it "dragged its slow length along" in the First Series, and only appears here in a small bit of its tail, by way of an appendix.

As we explained the process of manufacturing such a volume as the present in our notice of the First Series, we will only now observe on this point, that the present volume is produced in the same manner, but is somewhat inferior in style and character to its predecessor. We have, however, to make the best of this book as it is, and to find what interest we can in it for those numerous readers—old and young—who prefer the easy and inactive perusal of a number of dovetailed extracts and re-dressed copyings to the study of

a really-informing and well-arranged book on Natural History. Such readers have at least the advantage of a respectable caterer in the entertainment now set before them; and as the *fricassées* are light and easy of digestion, no one of them perhaps will complain that they have not had a more solid meal, for is it not announced as a romance?

In the first chapter, entitled "The Extinct," the most is made of such animals as are actually extinct or are rapidly becoming so,—and no compiler with ordinary knowledge of books could fail to find enough, as Mr. Gosse has found, for nine-five pages, under this heading. Of course, in regarding extinct animals, we see in a moment passing before us any number of the fossil Fauna of any geological epoch we please. We can conjure up large beasts or small, and beasts early or late in point of time, and we can discourse about them in dozens of pages, or arrange our extracts and add a word or two of connexion here and there. Any one era will suffice for a hundred pages. If we take a recent period, we have only to pronounce the words, and up come the Dinotheres of Germany and the Sirathere of India; immense tortoises, almost, but not quite, trodden upon by the heavy rhinoceros and the huge mastodon; gigantic sloths, Irish elks, and pachyderms from Siberia. After them stalk along the huge birds of New Zealand. Here walk in majestically the Dinornis, the Notornis and the mighty Moa; the latter said to have been once seen in nocturnal loneliness by a party of Englishmen and natives, who were so frightened as to frighten and not shoot the bird. Then we might return to Britain and find the great Auk becoming or actually extinct. A careful search after the specimens preserved leads to the conclusion, that of this bird English collections contain fourteen specimens and twenty-three eggs, while those of continental Europe include eleven birds and twenty eggs, and of the United States, one bird and two eggs. Thus there are twenty-six stuffed great Auks and forty-five of their eggs now known. So precious are these that even an egg is worth, we believe, a number of guineas; and good birds will rise in value until their price may really become something romantic. Already we see that a specimen in the British Museum is doubly cased in glass, so important is its preservation considered.

Upon "The Extinct" follows "The Marvellous," in which Mr. Gosse elegantly observes: "Still less can I consent to set aside every phenomenon which I cannot explain with the common recourse—'Pooh! Pooh! there must be some mistake!' Rather would I say, 'There must be some ignorance in me: near as I have reached to the summit of the ladder of knowledge, there must be one or two rungs to be mounted before I can proclaim my mastery of all, absolutely all, the occult causes of things.'" Many a man who places himself one or two rungs from the top of the ladder is placed by others one or two rungs from the bottom. But to "The Marvellous"—which consists of red snow, blood-water, snail showers, toad showers, fish showers, travelling fishes and climbing fishes. On the latter Sir J. E. Tennent's 'Ceylon' is quoted, and in an illustration (quite original, we fancy) a little fish is represented getting up a tree, or round it, in a truly marvellous manner, and in a fashion better befitting an adventurous climber of the Alps. As to mermen and mermaids they are beneath grave notice, although the stories about them make up a chapter. "The Self-Immured" comprises the toads which have been found, according to various reports, imbedded in stone, and have leaped out when the stone was split open. But it cannot be supposed that either "Mr. Smith's

toad" or "Mr. Clark's toad," or, indeed, any toad belonging to Jones, Brown or Robinson, immured himself, or got into his own grave and designedly lay there until it hardened in the course of centuries. Buckland forcibly imprisoned his experimental toads in stone cells,—and it might as well be said of them as of others that they were self-immured. In truth, the title of the chapter is ridiculous, unless we attribute to the toad a most monk-like devotion. With reference to the assumed fact, that toads and frogs have torpidly lived in the heart of stone and of solid trees during all the long centuries in which the process of induration in the one case and growth in the other have been going on, Mr. Gosse can throw no new light on the question, and only arranges the old toads and the old tales according to his fancy. His conclusion is on the side of the long incarceration of the animals. "If we admit the reported cases to be—only a few of them—true, we cannot evade the conclusion, that the longevity of these imprisoned toads must be immense, incalculable. For a toad that emerges when a block of stone is split up from a matrix that fits (say somewhat roughly, if you please) its form and size, must have been there ever since the stone was in a soft state, how long soever that may have been." To this it must be objected that it is difficult to admit "only a few" of the reported cases,—that Buckland's experiments proved only, at the best, that most of the toads inclosed in limestone survived upwards of thirteen months; and that to suppose a toad, if really found immured in a piece of limestone or sandstone, got in there, and has lived there since the time when the stone was soft, is to suppose an incredible longevity even in the shortest conceivable computation of geological time. To speak of a toad 20,000 years old would be absurd; to imagine it possible, no less absurd. Even Mr. Gosse's short-time geology would hardly help him here, for the shortest possible periods must have been vastly too long for the liveliest patriarch of pre-Adamic toads.

It was desirable that we should have a chapter on "Beauty," after having been detained so long and so inconclusively with creatures "ugly and venomous," and accordingly a long and not unpleasing compilation follows—a sort of kaleidoscope of Natural History, made up of bits of birds, and beetles, and trees, and ferns, and mosses, and flowers. "It is rather an unhappy sequence to so much of beauty that we are immediately afterwards plagued with "fleas on fleas *ad infinitum*" and "intestinal worms." If there is the shadow of romance about any of these, it does not appear; nor is it possible to conceive a more inappropriate title than that of this book to fleas, and tape-worms, and ichneumon-flies, and grubs of the oil-beetle and countless parasites. Why not simply style such a volume "Readings in Natural History"? and then every curious creature would find an appropriate place according to the compiler's fancy, and no purchaser of the book would be deceived and disappointed.

Some pretty illustrations are interspersed in these pages; but they are not all equal to those in the first series, and one or two are particularly inferior. In one of these, styled "Toad in a Hole," the discovery of a toad in a stone-quarry is represented, and its escape amidst the wonder of the workmen. This plate is, unfortunately, inappropriate; for the accompanying pages narrate a clear case of the exposure of the mendacity of a company of professed toad-finding quarrymen.

It is not agreeable to see Mr. Gosse dwindling down to a feeble compiler of miscellanies from sources open to all readers. But when

an author has issued one or two dozen publications, great and small, upon Natural History, in somewhat rapid succession, he must of necessity end in the way Mr. Gosse is ending, unless he be a man of original research or wide observation and extensive travel.

SOCIETIES.

ROYAL.—Nov. 30.—*Anniversary Meeting*.—Sir B. C. Brodie, Bart., President, in the chair.—The annual address was delivered, and the following were elected as Council and Officers for the year ensuing:—*President*, Maj.-Gen. C. Sabine; *Treasurer*, W. A. Miller, M.D.; *Secretaries*, W. Sharpey, M.D., G. G. Stokes, Esq.; *Foreign Secretary*, W. H. Miller, Esq.; *Other Members of the Council*, J. C. Adams, Esq., Sir W. G. Armstrong, B. G. Babington, M.D., Sir B. C. Brodie, G. B. Buckton, Esq., W. B. Carpenter, M.D., Sir P. de Malpas G. Egerton, W. Fairbairn, Capt. D. Galton, W. R. Grove, Esq., W. Hopkins, Esq., J. Lubbock, Esq., J. Paget, Esq., J. Prestwich, Esq., W. Spottiswoode, Esq. and J. Tyndall, Esq.

Dec. 5.—Gen. Sabine, R.A., President, in the chair.—The following papers were read:—"On Crystallization and Liquefaction, as influenced by Stresses tending to change of Form in the Crystals," by Mr. J. Thompson; "Determination of the Magnetic Declination, Dip and Force at the Fiji Islands in 1860 and 1861," by Col. W. J. Smythe; "On the Calculus of Functions," by Mr. W. H. L. Russell; "On Tschirnhausen's Transformation," by Mr. A. Cayley.

ANTIQUARIES.—Nov. 28.—Octavius Morgan, Esq., V.P., in the chair.—Dr. William Smith was elected a Fellow of the Society.—Beriah Botfield, M.P., exhibited a medal of Charles the Second, bearing the design of a Royal Oak, from the stump of which rose a head of the King (to the right), and on each of the three branches were suspended a crown. The medal was found in pulling down a house at Norton. Mr. Botfield also exhibited a Photograph from an inscription recently found at Wroxeter.—R. T. Pritchett exhibited a steel Look of great beauty and ingenuity, bearing the name of "J. Lucotte,"—also a 'Book of Offices,' dated 1610, with the autograph of Henry Savile, Provost of Eton. The binding seemed to indicate that the MS. had yet earlier been royal property. The peculiar interest of this MS. (the like of which has in other respects been published by the Society of Antiquaries in 'The Book of Ordinances,' 4to., while two MSS. of the same nature, and nearly the same date, are in the Society's library,) lies in the fact that, along with the fees, the names of the holders of offices are in many cases annexed; so that we are supplied with a kind of Court Guide of the period. Among names of note appear those of Francis Bacon and Matthew Hale.—Mr. G. S. Steinmann exhibited an Inventory of Chevening and Hurstmonceaux, A.D. 1616, and two General Pardons granted, 15th of January, 1559, to John Lennard, and 23rd of December, 1603, to Sampson Lennard, respectively.—Mr. H. B. Lennard exhibited an Exemplification of a Common Recovery, with a Seal for writs of the Court of Common Pleas attached. Date 12 Henr. viij. Easter Term.—All the above exhibitions were accompanied by illustrative remarks from the Secretary, who read further portions of the Official Report of the Spanish Government on Crowns recently found near Guarrazar.

BRITISH ARCHÆOLOGICAL ASSOCIATION.—Nov. 27.—T. J. Pettigrew, V.P., in the chair.—Nineteen new Associates were announced: F. Cornwell, Esq., Capt. W. P. Carew, Capt. Dumergue, E. Clarke, Esq., G. N. Collyns, Esq., Rev. S. F. Creswell, Dr. C. W. Pridham, J. V. Gibbs, Esq., E. P. Brock, Esq., W. F. Pettigrew, jun., Esq., C. H. Turner, Esq., J. Gendall, Esq., Miss Vallance, T. Blashill, Esq., W. Cann, Esq., P. O. Hutchinson, Esq., S. J. Northmore, Esq., Rev. G. K. Morrell, D.C.L., and W. R. Scott, Ph.D.—Mr. H. Syer Cuming exhibited the Tapestry panel of a Casket of Flemish work.—Miss Gibbs exhibited a Danish silver coin of Frederick the Third, found at West

Hill, Wandsworth.—Mr. Blashill exhibited the drawing of a sepulchral slab from Mansell Gamage Church, Herefordshire, having a rich floreated cross, circa 1280.—Mr. Blashill also exhibited a portion of Roman Pavement found opposite Bow Church, Cheapside, formed of square red and white tesserae, but having no pattern.—Mr. Cecil Brent produced some Roman Paternæ, obtained from Whitstable: one dish was perfect.—Mr. Thomas Wright gave an account of discoveries made at Ludlow, in Shropshire, in laying out the ground for a new Cattle Market.—Mr. Wright also made a report on the result of the excavations on the site of the ancient Cemetery of the Roman City of Uriconium at Wroxeter. The remainder of the evening was occupied by the reading of a paper 'On Netley Abbey.'

ENTOMOLOGICAL.—Nov. 4.—J. W. Douglas, Esq., President, in the chair.—Mr. Reading exhibited some examples of *Leucania putrescent*, from Torquay, and other Lepidoptera from South Devon.—Mr. Stevens exhibited some fine examples of *Damaster blaptoides*, and other rare and remarkable Coleoptera, collected in Japan by Mr. Fortune.—Mr. Miller exhibited some living larvae of a species of *Incurvaria*, in their cases, formed of portions of dead leaves, lately found at West Wickham Wood.—Mr. A. White exhibited a *Lycena* from New Zealand, a fine new Bombyx, brought from Northern India by Sir John Hearsey, and a small but interesting collection of insects, chiefly Coleoptera, obtained during the voyage of H.M.S. Herald in the South Seas, by Mr. Ragner, Surgeon R.N.—Mr. White also called attention to the injury sustained by ginger-root, brought to this country from the East Indies, by the larva of a small beetle, apparently the *Lasioderma testaceum* of Stephens. The depreciation in value of the ginger imported from Cochin and Calicut is estimated at upwards of 3,000l. annually. Mr. White observed, that this insect was first noticed in this country in 1835, and since that time it has become a common species in houses, not only in this country, but on the Continent.—Mr. Waterhouse exhibited three remarkable species of Curculionidæ, from Australia, in which the claw joints of the tarsi are totally wanting. He regarded them as forming a new genus, allied to Strongylorhinus; and read descriptions of the species, proposing for their reception the genus *Atelicus*.—Mr. Desoignes read descriptions of two new species of Schneumonidæ, belonging to the genus *Ephiatæ*.

ETHNOLOGICAL.—Dec. 3.—J. Crawford, Esq., President, in the chair.—Messrs. J. Baker, G. F. Copeland, F. Mouat, M.D., and B. C. Smart were elected Fellows; M. Holmberg, Dr. Phebus, Dr. Lucas, Dr. Leuckhardt and M. Quatrefages were elected Honorary Fellows.—The Bishop of Labuan (the Rev. Dr. McDougall) delivered an oration 'On the Province of Sarawak, in Borneo, and its Inhabitants, the Dyaks.'

INSTITUTION OF CIVIL ENGINEERS.—Dec. 3.—G. P. Bidder, Esq., President, in the chair.—At the monthly ballot, the following candidates were elected:—Messrs. J. Grant, R. Jeffrey, H. L. Smith, and A. Whitehead, as Members; Messrs. J. L. Anley, G. P. Bidder, jun., C. Billson, S. Duer, G. Hardinge, J. W. Haynes, J. B. Paddon, C. Slagg, F. G. Slessor, G. K. Stothert and Capt. H. Hyde, B. E., as Associates.—The paper read was 'On the Discharge from Under-drainage, and its Effect on the Arterial Channels and Outfalls of the Country,' by Mr. J. Bailey Denton.

ROYAL INSTITUTION.—Dec. 2.—W. Pole, Esq., Treas. and V.P., in the chair.—J. Bass, Esq., Rev. G. B. Macilwain, and Dr. Ricardo, Esq., were elected Members.

SOCIETY OF ARTS.—Nov. 20.—Sir T. Phillips occupied the chair, and delivered his inaugural address.

Nov. 27.—J. Dillon, Esq., V.P., in the chair.—The paper read was, 'On the Foreign Department of the International Exhibition of 1862,' by P. L. Simmonds.

Dec. 4.—Mr. H. T. Hope in the chair.—The

paper read was, 'On the Building for the International Exhibition of 1862,' by Capt. W. C. Phillpotts.

INSTITUTE OF ACTUARIES.—Nov. 25.—C. Jellicoe, Esq., President, in the chair.—Messrs. R. B. Markby and T. J. Searle were elected Associates.—Mr. Spens read a paper 'On the Mortality Experience of the Scottish Amicable Life Assurance Society,' illustrated by proof copies, which he presented to the Institute, and other tables. It appeared that the mortality of the Society referred to, tested by the General English Life Table, showed among males, non-hazardous, 81·3 per cent. of the expected deaths; among females, non-hazardous, 82·6 per cent.; among West India risks, 154·3 per cent.; and other hazardous risks, 145·4 per cent.

MEETINGS FOR THE ENSUING WEEK.

MOR. Royal Academy, 8.—'Anatomy,' Mr. Partridge.
—Geographical, 8½.—'Latest Explorations, Africa.'
TRIN. Syro-Egyptian, 7½.
—Engineers, 8.—'Discharge from Under-drainage,' Mr. Denton.
—Zoological, 9.—'European Oology,' Mr. Newton; 'Mollusks of Bermuda,' Rev. H. B. Tristram; 'New Species of Serranus, Australia,' Dr. Günther.
WED. Graphic, 8.
—Society of Literature, 4.
—Society of Arts, 8.—'Railway Management, from Traveler's Point of View,' Mr. T. Baker.
—Archæological Association, 8½.—'Domestic Life, temp. Edward I.,' Mr. Hartshorne; 'Ogham Inscriptions,' Mr. Hettigrew.
THUR. Microscopical, 8.
—Philosophical, 8.
—Royal, 8½.—'Calculating Ratio of Circumference of Circle to Diameter,' Mr. Clarkson; 'Vibrations and Sounds by Electrolysis,' Mr. Gore; 'Perchloric Acid and its Hydrates,' Mr. Roscoe.
—Antiquaries, 8½.—'Early-printed Books.'
FRI. Astronomical, 8.
SAT. Asiatic, 3.

PINE ARTS

The Principles and Practice of Photography. By C. Jabez Hughes. (Lenaire.)

It is satisfactory to get hold of a sensible manual for beginners in photography. Considering the Collodion process to be the most perfect and comprehensive, as well as the most simple of all those in vogue, the author confines himself to directing the student's attention to it in the first place, and accordingly furnishes a list of the necessities for its practice, thereby avoiding the error of writers who seem bent upon making up, as it were, for the trifling cost of their own advice by the recommendation of a huge and costly variety of things, which they report to be indispensable to carrying on with any hope of success the process they treat of. Directions for preparing the dark-room, and "how to begin work," succeed this section. How to take glass positives, with formulae for preparing the solutions for developing and fixing, and minute directions as to how to clean the plates, follow. The little section upon pouring out the collodion, that stern test of the steadiness and nerve of the young operator, is terse and well written. How to take negatives follows this, with instructions, not only as to the manipulation and setting to work, but upon the nature and qualities of the materials employed. This is succeeded by directions for varnishing the negatives when obtained. A concise section upon a process for taking negatives by an easier and more expeditious method than that before described follows this; the student will find no novelty in the system thus explained, but the tyro may read and even practise it with advantage. How to print on plain or albumenized paper, and "How to sensitize the paper" are contained in the directions which come after, and are the necessary complements to the foregoing sections.

Part II. treats of the Dry Collodion processes; firstly, of the Collodio-Albumen process, then, of the Iodized-Albumen process, the Fothergillian and Tannin systems. Copying and enlarging next receive attention, followed

by directions for the use of the solar camera, invented by Mr. Woodward, in the production of life-size pictures, those portentous affairs which so amaze the uninitiated. A discourse on diaphragms, or "stops" in lenses, succeeds, in which, with great justice, it is said that the happy blending of softness and sharpness which characterizes the works of the best artists can only be secured by the liberal use of diaphragms and the exercise of good taste.

FINE-ART GOSSIP.—Mr. Guinness, of Dublin, is proceeding in the restoration of St. Patrick's Cathedral. Caen stone, or Bath stone, having failed in previous external restorations, is used only in the interior works. The whole of the south arcade, triforium and clerestory of the nave have been taken down and rebuilt; the south wall of the aisle has been similarly dealt with; the south transept front is being almost entirely rebuilt; a new south porch has been built, and flying buttresses have been added in several places—namely, three on the south side of the choir, and two on the north side of the nave. The fine and characteristic steeple at the north-west angle has not yet been, and, we trust, will not be touched. We regret not to be able to say anything in favour of the new work,—the buttresses, flying buttresses, and general details being very poor. We are, however, gratified at the evident care which has been taken to re-produce and copy the old detail, wherever it exists. The south side of the nave has been very creditably rebuilt; and, unless it is spoilt by carving and finishing, will make a very fair work. We presume the church is to be groined; if so, look with considerable anxiety to the result, as few architects at the present day understand how to execute vaulting. They have learnt certain false rules as to its construction given in text-books, and do not, apparently, take the trouble to study old groining for themselves. The wall-ribs of the vaulting at St. Patrick's are very peculiar, being trefoiled in outline. How to fit the groining to them is a difficulty; but Mr. Guinness will find precisely the same features in the groining of the Lady Chapel at Chester; and we strongly advise him to repeat at St. Patrick's the vaulting which he will find there, or, at any rate, as much of it as is applicable to this point. An example of the difficulty of copying is afforded in the parapets lately put on the aisles at St. Patrick's. They are ineffective, owing to the flat pitch of their coping, yet on the steeple there is an admirable example of the Irish parapets, which should have been taken as a model.

Oxford Convocation will have to decide, on the 10th inst., upon a proposal to enable the Curators of the University Galleries to expend a sum not exceeding 100*l.* for the purpose of furnishing a room in the building, to be used as a Drawing School. We trust the adoption of this proposal may be the first step towards affording the means of obtaining a sound knowledge of Art by the members of the University.

The obituary of this week records the death of Mr. Alexander Gilchrist, known as the author of a Life of Etty, written in a very different spirit from that which has produced the recent artistic biographies of Hogarth and Turner. Mr. Gilchrist was known as an Art-critic of great experience. It was but the other day we announced the early publication by him of a Life of William Blake, the painter of mysteries, to be illustrated by numerous engravings and fac-similes from his extraordinary designs. He died on the 30th ult., aged 35.

The Academy of the Beaux-Arts of Paris proceeded, on Saturday last, to elect a member in the place of the deceased M. Abel de Pujol, in the section of Painting. M. Meissonnier was elected, the other candidates being M. M. Hesse, Larivière, Yvon, Cabanal and Gudin, the first-named of these being considerably in advance, in number of votes, of the other unsuccessful candidates.

"Herr Reichardt," says our Munich correspondent, "has lately acquired an unfinished half-length of the Saviour, by Albert Dürer, of whose authenticity there seems very little doubt. It was

discovered in the house of the Hallers, in Nuremberg, coarsely painted over and thrown on the floor, was then cleaned by a picture-dealer in Bamberg, and sold by him to the present owner. The work itself is the chief evidence to its genuineness, as I trust my description of it may show; but, in addition to this testimony, it has an inscription on the back of the wood panel on which it is painted: 'This picture of Albert Dürer had Imhof from Pirkheimer, and I from Imhof. Haller von Hallenstein.' The name of Pirkheimer is fully familiar to the students of Albert Dürer, for his house exists still in Nuremberg, and his name occurs most frequently in the painter's correspondence. This inscription, however, and the evidence of the old frame, and old wooden panel identical with that on which Dürer's own portrait, in the Pinacothek, is painted, are only small additions to the effect of the picture, which has already been pronounced genuine by eminent judges, and can hardly be seen without impressing the mind with a sense of its authenticity."

MUSIC AND THE DRAMA

SACRED HARMONIC SOCIETY. Exeter Hall.—Conductor, Mr. COSTA.—FRIDAY NEXT, December 13, Handel's 'MESSIAH.' Tickets, 3*s.*, 5*s.*, and Stalls, 10*s.* each, at the Society's Office, 6, in Exeter Hall.

ROYAL ENGLISH OPERA, COVENT GARDEN.—Under the Management of Miss LOUISA PYNE and Mr. W. HARRISON.—Triumphant Success of Balfie's New Grand Opera.—On MONDAY EVENING NEXT, and Every Evening during the Week, the entirely New and Original Grand Romantic Opera, in Three Acts, by M. V. Balfie, the Libretto by J. V. Bridgman, entitled, 'THE PURITAN'S DAUGHTER.'—Miss Louisa Pyne, Miss Susan Pyne; Messrs. Santley, Henri Corri, George Honey, A. St. Albans, Patey, C. Lyall, Walworth, T. Distin, E. Dussick and W. Harrison.—Conductor, Mr. Alfred Mellon.—The Overture will commence at Seven o'clock. To conclude with THE TOY MAKER. Stalls, 7*s.*; Private Boxes from 10*s.* 6*d.* to 4*s.*; Dress Circles, 5*s.*; Upper Boxes, 4*s.*; Amphitheatre Stalls, 3*s.*; Pit, 2*s.* 6*d.*; Amphitheatre, 1*s.*—Box-office open daily from Ten till Five. No charge for Booking.

ST. JAMES'S HALL.—The SISTERS MARCHISIO.—Jan. 2, 1862.—Mr. LAND begs to announce a GRAND ORCHESTRAL CONCERT, on THURSDAY EVENING, Jan. 2, when the celebrated Vocalists, Mdlle. Carlotta Marchisio (Soprano) and Mdlle. Barbara Marchisio (Contralto), from the Grand Opera, Paris, and the principal Continental Theatres, will have the honour of making their first appearance in this country. Further particulars will be duly announced, to be obtained at Messrs. Cramer, Beale & Wood's, 301, Regent Street; at Messrs. Chapell's, 50, New Bond Street; and at Mr. Mitchell's, 33, Old Bond Street.

GLEES, MADRIGALS AND OLD BALLADS.—LAST WEEK.—Egyptian Hall (Dudley Gallery).—The successful Entertainments of the LONDON GLEE and MADRIGAL UNION.—Miss J. Wells, Miss Eyles, Mr. Baxter, Mr. W. Cummings, Mr. Lawler, and Mr. Land (Director)—will terminate this week.—EVENING (except Saturday) at Half-past Eight; and on Wednesday, Friday and Saturday Afternoons at Half-past Three.—Reserved and Numbered Seats, 3*s.*; Unreserved Seats 2*s.*; a few Fautouils, 5*s.*, may be secured at Mr. Mitchell's Royal Library, 33, Old Bond Street.

SACRED HARMONIC SOCIETY.—The thirtieth season of the concerts of the Sacred Harmonic Society—now avowedly the leading assemblage of its order in Europe—began spiritedly, yesterday week, with Mendelssohn's 'Athalie' music and Handel's 'Dettingen Te Deum.'—The two, in conjunction, make an excellent sacred-concert bill; though the former work cannot but be heard with sensations of regret. More interesting, both in point of musical development and variety, than either the 'Antigone' or the 'Œdipus' music (the latter two being written for only male voices), it shares their inadaptability for general purposes. Once in a century there may be a King or a Queen (as a sovereign in a fairy tale) who will command the Greek or the French drama to be presented on the stage with all the vigorous acting and poetical declamation which they require, with the musical pomp necessary to the right working-out of the composer's labours in their behalf;—but this is poor recompense for the time, pains and poetry which they have cost their decorators,—small amends to the world for the loss of services which might have been so much more efficiently bestowed.—On the drawback of concert, as distinguished from stage performances, it would be impossible to insist too strongly. In the English version of 'Athalie' the pompous connecting heroics are, of their kind, not bad; but they, in their turn, require gloss, commentary and explanation,—and even if delivered by the best of elocutionists, they displace the music as much as they suggest its purpose. Yesterday week's performance was, in its main points, very good. The chorus was fine and firm, rich and tuneful in its body of sound,—the orchestra has

improved. The *trio* in the stately war-march was so admirably rendered—thanks to the excellence of the trombone accompaniment—as to demand specification. The *solo* singers were Miss L. Pyne, who is always sure,—Miss Serle, a niece to Madame Novello, and, it may be added, a niece of good promise,—and Madame Laura Baxter. The last lady must learn to move in her author's paces, not her own more dilatory ones, if she wishes to sing music in which the singer is so strictly bound by the orchestral forms as this. Mr. George Vandenhoff read the verses somewhat too theatrically; but his task was the hardest one of the evening.—The Dettingen 'Te Deum' went splendidly, with Mr. Winn (who seems deservedly rising in occupation) as *bass solo*.

HERR PAUER'S PIANOFORTE PERFORMANCES.—The interest of these is well sustained. The first quarter of the fifth performance was devoted to French composers—Chambonnières, Couperin his pupil, and Rameau. The specimens by the two last-named writers were delightful, distinct in melody, pleasantly quaint in harmony, with those national touches of phrase and form which have never been laid aside from the days of 'Hippolyte et Aricie' to those of the 'Val d'Andorre.' In particular, a *Gigue*, *Musette* and *Tambourin* were charming. The second "Period" included an excellent Sonata by Paradis, another by English Bach, the youngest of the illustrious family, and two movements by Wanhall. In the third period we shall confine ourselves to noticing the fine duett Sonata in E flat by Prof. Moscheles, in order to take the opportunity of mentioning a most promising young lady, Signora Rubini, who assisted Herr Pauer, and who appears to possess some of the best requisites of a great player—charm of touch, elasticity of finger, and feeling without extravagance.

ROYAL ENGLISH OPERA.—It would be idle to expect that, after so many years of practice and popularity, Mr. Balfe will now re-make himself;—therefore it would be lost time to point out again what there is wanting to his style, which separates him from those complete masters of their craft,—the Rossinis, Meyerbeers, Aubers, of modern Opera,—whose choicest works not only attract during the period in which they are born, but also return, after the lapse of years, with new individuality, if not freshness, given to them by contrast.—One thing, however, may be insisted on, for the sake of those who are to come, by Nature as liberally endowed with genius as the Irish boy whose setting of poor Haynes Bayly's 'Lover's Mistake' was his start in popularity,—and in reference and deference to that improvement of taste which is so remarkable in England—Mr. Balfe has too easily allowed himself to be controlled in places where he should have held his ground. Everyone has laughed at the anecdote of Astley, who informed the orchestral player counting his bars, that he was not there to rest.—Everyone has held up classical eyes and hands at the paltry managerial taste which, some thirty years ago, insisted on the removal of all serious constructed music from every new opera in English, and allowed the translated masterpieces of the German and Italian age to be patched and weakened by interpolations. But abuses as great remain untouched; the folly of which will, so long as it is endured, preclude the establishment of a real English school of opera in conformity with the requirements of the time.—The notion that every tale, whether it be serious or comic, pastoral or fantastic, Chaldean or belonging to Cornwall, must contain a certain number of ballads;—and the resolution to poke these in somehow, no matter what be the passion, no matter how heavy the crowd on the stage,—is entirely destructive of unity, character, or colour in opera, save it be a ballad opera. No treason is intended against that form of entertainment, which is susceptible of a charm and an artistic colour of its own, let the words be only poetical and reasonable, such as Gay, and Carey, and Bickerstaffe, and Sheridan, and Dibdin wrote, and if the melodies have the freshness of those by Arne, Shield, Storace and Bishop. No objection is hinted against the introduction of

"couplets" (to use the French term), in what may be called the level spaces of grave stories, when it is done with taste and discretion.—But the apparition of a harp brought by a clodhopper into a corn-field, and with it a milking-stool, in order that the *Rosetta* of 'Love in a Village' may sit down and sing 'Oh, no, we never mention her' (which we have seen),—is not more utterly at variance with every principle of drama, of music, of hope that our singers shall conceive their duties in a dramatic spirit,—than that fatal compliance with "the shops," and that fatal appetite for *encores*, which has forced 'My mother's smile,' and 'My father's home,' and 'My sister's tear,' and 'My brother's heart' (not to speak of the ballads of the "dear cottage" and "the sweet church bell," so prized by the *Mrs. Fugglestons* and *Mrs. Micawbers*), into positions so monstrous, that the experienced opera-goer naturally begins to wince and be afraid whenever a sentiment is expressed, or a season of the year mentioned.—In 'The Puritan's Daughter,' an agony duett, which is to bring on the situation closing the first act, is brought to a full stop just ere its crisis, that Mr. Santley may express his feelings and exhibit his beautiful baritone notes on the subject of sad memories.—In the third act, a character of genteel comedy fairly placed by the dramatist, and exceedingly well acted (as we shall have to say) is turned upside down, in order that Mr. Harrison, who went to bed drunk, as *Lord Rochester*, when he wakes sober may have something very sentimental, if not very new, to deliver concerning the blessings of sleep.—In the final scene, when death, conspiracy, terror, madness, are all in the fray,—in place of the few frantic appeals of which the situation admitted, there must be a sweet tune about "a daughter's heart" for the heroine. The melody is meritorious, we admit, for the pianofortes of *Miss Pinkerton's* establishment, but as much misplaced, as would be a 'Pas de Mélancolie' with a muffled tambourine, executed by the pantomimist or the first *danseuse* of the theatre.

So clearly at variance with all common sense, so vicious, and destructive of progress, are these cut-and-dry requisitions (no matter from whom they originate), that we have small scruple in re-stating the absurdity,—and the less because in Mr. Bridgman's share of this new drama for music there is much to praise, much of promise for the future. The story is welcome, because an English one,—of the Cavalier and Puritan strife, which yielded a 'Peveril' and a 'Woodstock.' It includes the contrast (always a musical desideratum) of the gay, frivolous, profligate courtier with the rigid, conscientious *Ironsides*,—and the intermediate element of intrigue and hypocrisy on both sides.—The heroine, *Mary Wolf* (Miss Pyne), is a Puritan's daughter (but how came a Puritan's daughter by her satins and her pearls?).—The lover, *Clifford* (Mr. Santley, a welcome variety is a baritone lover), is a Cavalier.—By accidentally becoming cognizant of a Puritan movement, Mary is placed in the gripe of a wicked hypocrite, one *Seymour* (Mr. St. Albyn), who claims her hand, and binds her by an oath of secrecy as the price of her lover's security.—As if all this was not bad enough, *Charles the Second* (Mr. Patey) and *Rochester* (Mr. Harrison), when disguised, out a-roving and in need of shelter from a storm, get enmeshed in this net of conspiracy and distress.—The King, of course, makes love to the beauty on the strength of a wager with his rakish familiar. In the ardour of the encounter betwixt his pursuit and her indignation, the secrets of the two come out. The Monarch undertakes to see Mary righted, and the Puritan's daughter connives at the escape of the Cavalier King from his self-commissioned judges and executioners by the agency of the now disabused Clifford, who loyally takes his sovereign's place. The reader will see in this a strong but thoroughly warrantable reminiscence of the duelscene in the park of 'Woodstock.' The Third Act is devoted to the solution of the difficulty—how, we need not detail. Enough to add that, among the other principal characters, is a cowardly serving-man, *Ralph* (Mr. Honey), who is, by "right divine," enamoured of a serving-maid, *Jessie* (Miss Susan Pyne).

There is, we repeat, in the above story excellent

material for an opera-book. Mr. Bridgman has, however, not sufficiently studied variety in its arrangement. Both the first and the second acts end with what may be called situations of suppressed emotion—in which anything like the effect of a great musical *finale* is impossible. Act the Third, of course, must close with the inevitable *canary-bird* felicity of the *prima donna*, who, but two or three minutes before, had been trembling on the verge of madness and the grave.—Then, his scenes are too lengthy everywhere. The comical man, who "means well," becomes mournfully tiresome;—the second encounter of misunderstanding between the jealous lover and his misunderstood lady would bear concentration;—and *Lord Rochester's* tipsy sayings and doings become perilous, not because of their coarseness, so much as because of their quantity. All these, however, may be faults arising from inexperience. On the other hand, the book has many effective situations, and, what is rarer, the verse given to the musician to set is lyrically "well cut" for music,—generally neat, without formality,—the words, for the most part, familiar, without undue vulgarity, and sentimental (if not poetical), without involution or vagueness. Mr. Bridgman may become a valuable assistant—let us rather say, a creative suggester,—to future composers of English opera,—and, as such, is an object of interest to all its well-wishers.

Of Mr. Balfe's share in 'The Puritan's Daughter,' there is no need to speak in detail.—The concerted music is the most to our liking,—that given to the Puritans being often spirited and effective, and the business of the scenes is often led on and linked together by the animated use of some orchestral phrase, with a skill which belongs to the good school of writing. The ballads are clever, and some of them will become popular, it may be expected.—There is life in the comic music,—and if the "hiccup" in the drunken song is found too literal, the composer would have a right to appeal for precedent to the cough in 'La Traviata,' and the snuff-music in M. Halévy's 'Nabab.'—As in his later operas, Mr. Balfe has shown increased solicitude and finish in the treatment of his orchestra. The overture, however, barring its brief introduction in triple time, is not good—the subjects are not fresh, and the modulations are somewhat of the crudest.

'The Puritan's Daughter' was generally well performed; every one on the stage being steady in her and his part.—Miss L. Pyne acted with real feeling, and sang with all her known skill and finish; but she must watch her voice. The tax on any singer's powers of singing night after night in a vast theatre must, sooner or later, be paid for. Mr. Santley sang excellently; but he, too, must be warned not to be tempted by the delight excited by his high notes. They cannot be used as increasingly by a baritone, as it appears his wish to use them, without enfeebling the lower portion of the register.—Mr. Harrison, whose *forte* is comedy as an actor, was lively and libertine as *Rochester*. Mr. Patey, as "Old Rowley," was satisfactory. The same epithet may be extended to the rest of the cast.—Mr. Honey, however, would do well to check his habit of harping on one favourite word or phrase, which, in place of enhancing the drollery of his scenes, goes far sometimes to make them hazardous.

The opera is well dressed and well put upon the stage. Why was the effect of the moonlit ruin, in the first act, destroyed by the intense rosy suffusion on the gables and an upper layer of the foliage? The scene in the third act—an interior—is particularly good, without that patchiness at "the wings" and aloft, which is somehow seldom, if ever, to be seen in any French theatre;—but which, in England, as a rule, damages too many of the effects of our artists, far as they surpass our neighbours in felicity of touch and of colour.

The work was received with every sign of enthusiastic approval. Composers, singers, publishers, managers, could not desire an audience more eager to *encore*, more willing to enjoy, more patient with what is tedious. But thus also were received 'Bianca' and 'Ruy Blas,'—and this the managers of the Royal English Opera would do well to recollect, in conjunction with another fact, derived by

experience of the Paris theatres. It is impossible to feed a repertory of grand opera rapidly. There have not been eight remunerating new successes during the past twenty years at the Grand Opéra, —a theatre supported by the State, which has only to pick and choose among the authors and the composers of Europe! Thus, we must insist, no ordinary discretion in choice and effort is required in a country like ours, which, as regards its musical stage, is, to make the best of matters, but in a state of transition.—The gambols and triumphs of Mr. Bunn ended, for him, not brilliantly,—while they threw back the steady and progressive course of English opera for something like twice the number of years that his mismanagement held out.

DRURY LANE.—A burlesque on 'The Colleen Bawn,' by Mr. Henry J. Byron, under the title of 'Miss Eily O'Connor,' now supplies the place of Mr. Brooke, and appears to be more attractive. The work is in the author's best style, and abounds in pun and parody, and in musical adaptations productive of absurd effects. His mental associations are extraordinary, and in wedding popular airs with theatrical incidents or situations strikingly peculiar. Think of drowning the Colleen Bawn to the tune of 'Sally, come up,' and rescuing her to that of 'The Perfect Cure.' Other street airs, such as that of 'The Prairie Flower,' 'Uncle Sam,' 'Aunt Sally,' and 'I'm a Young Man from the Country,' all found their curiously selected places, and were introduced with startling effect. We can fancy Mr. Byron studying the principles of arbitrary association, and reducing them to a law of opposition or contrariety, with the practical purpose of combining the anomalous with the most effect in dramatic travesty. He appears to have made a philosophical discovery, and applied it to the manufacture of "sensational" burlesque, as if the kind of thing were not sensational enough already. He seems to indicate this by the double epithet which he uses on the playbills to describe his production. It is, forsooth, a "burlesque-extravaganza;" not either simply, whatever may be the nice distinction between them. With their bread thus buttered on both sides, the audience, of course, have reason to be satisfied; and to do them justice, show their gratitude for the author's liberality in no measured applause, and are as boundless in their mirth as he is in his humour. The performers revelled in the opportunity of making themselves superbly ridiculous; and Mr. Atkins, as the heroine, sang and danced like a Bacchante specially inspired for the occasion. Miss Louisa Keeley as *Myles-na-Coppaleen*, Mrs. Selby as *Mrs. Cregan*, and Mr. Roxby as *Danny Mann*, were most efficient caricaturists. Mrs. Selby, in tempting the latter in the language of King John to Hubert, performed a feat in elocution worthy of her reputation. The scenery, which is painted by Mr. Beverley, is all good; and the Water-Cave scene set with elaborate care. Miss Keeley is, however, provided with a *trapèze* instead of a rope, and crosses the cavern like Leotard. The music is arranged by Mr. Tully, and consists of cheerful popular melodies. The whole was exceedingly well arranged, and the performance must be pronounced a decided success.

STRAND.—Here also we have a new burlesque, and again from the pen of Mr. Byron, evidently a more hasty production than that for Drury Lane, but not less effective, and to our mind better, because briefer. 'The Rival Othellos' is the title of the piece, and the single object to give Mr. J. Clarke and Mr. J. Rogers an opportunity of caricaturing Mr. Brooke and Mr. Fechter. The piece opens with a provincial manager in distress. Mr. *Fogville* (Mr. H. J. Turner), of the Theatre Royal Little Grumley, writes to Mr. Brooke to accept a starring engagement, and receiving no answer concludes his consent from his silence, and placards the town accordingly. The manageress does the same thing in regard to Mr. Fechter. A strolling actor, and a travelling entertainer, accustomed to trade on the names of others, arrive just as the house opens, and are both engaged to perform Othello. The rivals meet in the Green-room, and a characteristic contest occurs, in which the style

of each of the eminent actors they represent is burlesqued.—Mr. Clarke as Brooke bearing off, as we think, the palm from his more exact resemblance to the manner of his original. The faults of the stilted style are brought out into prominent relief, and the transitions of voice produced with exaggerated effect. Mr. Rogers's caricature is fantastical, and bears but a remote likeness to the tragedian of the Princess's; but it has a special humour of its own, and gains its point. The whole excited hearty and continuous laughter, and is likely to prove attractive for some time.

ASTLEY'S.—On Monday, Mr. Boucicault's drama of 'The Colleen Bawn' was introduced to the stage of this theatre, which has been closed for a considerable period, but is now re-opened for the winter season. The stage is under the direction of Mr. Searle, who enacts the part of *Danny Mann*, and brings out many traits of the character in a novel and telling way. Miss Marion Lacy, as *Eily O'Connor*, presents a pleasing interpretation of the interesting heroine; and the other parts are very respectably cast. The play is well mounted, with appropriate scenery. In the attempt now making at this theatre to perform the regular drama in the regular way, we wish the management success.

HAYMARKET.—Mr. Sothorn, desirous of improving upon his success in his remarkable portrait of *Lord Dundreary*, has undertaken a new part in a small piece, adapted by himself from the French, under the title of 'Aunt's Advice.' The subject of the drama is well-known by a little comedieta, which was popular a season or two ago, under the title of 'A Novel Expedient,' or 'Livre I., Chapter III.' The character undertaken by him is that of the judicious friend, who turns the tables so adroitly both on the lady and her husband, and which he performs with the gentlemanly ease of which his *Lord Dundreary* showed him so capable. We shall be pleased to see him in other characters, where his great abilities may be more easily measured with those of the general actor.

MUSICAL AND DRAMATIC GOSSIP.—The *Era* states that "it is asserted from good authority that Her Majesty's Theatre will positively open next season. The new manager is M. Bagier, of the Theatre Oriental, Madrid, and an immensely rich *agent de change*. His first novelty will be to bring out his *protégée*, Mdlle. Sarolta, who appeared for a few nights at Drury Lane Theatre in 1859, under Mr. E. T. Smith's management."—From the *Gazette Musicale* we learn that M. Obin (as we were told some weeks ago in Paris) has been engaged by Mr. Gye to appear at the Royal Italian Opera in 'Robert le Diable.' But the French journal is, as too often happens, mistaken about English matters, when it speaks of the revival being the first performance of M. Meyerbeer's work in Italian here—'Robert' having been twice cast in that language at Covent Garden Theatre, both times without making any great impression.

There has been organ-playing this week of no common quality,—Mr. Best having been retained to make a new organ speak, built by Mr. Walker, for a church in Dublin. Of performances like these it is not possible to offer any regular report. Once again it may be pointed out, how much it is to be regretted that in this London of ours—so rich in many things, so poor in more—there can be maintained no instrument of the first class in a locality more suitable than a factory, and more accessible than a church, which might, on certain days of the week, be exhibited by the best players as a settled attraction of London. This, it may be recollected, the "Apollonicon" was for many years. The "Panopticon" experiment failed, in these better musical days of ours, because it had not a fair trial.—It is superfluous almost to add, that the organs in Exeter Hall and St. James's Hall do not, in the least, fulfil the required conditions.

At Monday's *Popular Concert* the principal piece of the evening was Beethoven's Septett.

The sixteen hundred voices forming the London contingent of the Handel Festival Choir began their rehearsals last evening, at Exeter Hall, with the choruses of 'Acis and Galatea.'—Mr. Martin's 'Messiah' for the "red coats" will be produced shortly.

The following is from the *Morning Post* of Wednesday last:—"Sir Frederic A. G. Ouseley, Bart., Professor of Music in the sister University of Oxford, gave a lecture, in the Hall of Clare College, to-day, 'On Madrigal Music,' the illustrations being given by members of the Fitzwilliam Musical Society, which comprises the *élite* of the amateur talent both of the University and town. The lecture, which had been previously delivered at the Sheldonian Theatre, in Oxford, before the University there, showed the most intimate acquaintance with, and proficiency in, that branch of art to which it referred. The lecture was under the auspices of the Cambridge Church Music Society; and the only regret expressed was, that there had not been a previous performance of a similar character, as Cambridge boasts a musical Professor of her own."

—We have received of late many communications and representations on this subject; and by the above invitation to the Professor belonging to one University to lecture at another, it would seem as if the spirit of the time, which is one of active interest in Music, will not much longer acquiesce in the abstinence of a functionary from one of his leading duties. When the appointment was made, it may be recollected that we doubted the power, not the will, of Dr. Bennett to fulfil its duties satisfactorily.—There can be no right for any one to blame—however great be our regret—the persevering manner in which he has postponed intercourse with the public, as a composer and an executive artist, to private tuition.—In the case of an accepted Professorship, the duties of which are slackly performed or unfulfilled, matters stand on a different footing.—The days of sinecures are gone by.

At the second subscription concert in Munich, we perceive, by the *Deutsche Musik-Zeitung*, that an orchestral composition, by Herr Franz Lachner, has been performed, in the old-fashioned form of a "Suite,"—*alias* a series of characteristic movements,—less developed than in a Symphony, though the earlier, doubtless, contained the germ of the later form of composition. The work is described as highly interesting. Here, then is another chance for our Philharmonic Society,—did not its directors share the humour of the Irish lady, whom a Correspondent met with in a foreign capital, and who declared that she was "above seeing any of their sights!" Some player ought to bring next year before us Herr Hiller's new *Pianoforte Concerto*, which common report declares to be an effective and interesting work.

There has been a brisk controversy in certain foreign papers respecting M. Meyerbeer's age, which proves to have been exaggerated, owing to his having appeared in public when very young. He is now stated, on good authority, to be sixty-seven.

A new concert-hall has been opened at Frankfurt, by a performance of 'The Creation.'

Madame Miolan-Carvalho is singing at Brussels.

The *Gazette Musicale* states that a new opera by *Maestro Cagnoni*, 'La Valle d'Andorra' (on the same subject, it may be presumed, as M. Halévy's opera), has succeeded at Genoa.

Among the solemn things written concerning the monarch of antique tragic opera, it has too much passed out of memory that Gluck was renowned, ere he arrived at his great fame (long and weary was the road!), for his comic music. It was merely the accident of the burning of the Opera-house which prevented Gluck from coming to Paris as the guest and collaborator of Garrick's sprightly correspondent Favart, who took a lively interest in his success, and promoted the publication of the score of 'Orfeo' at Paris.—During five years (it is instructive to recollect) only fifteen copies of the publication were sold!—and this not owing to neglect on the part of the French composers, by two of whom especially—Philidor (who, it may be remembered, was accused of pirating

from the music) and Mondouville, the author of 'Titan et Aurore'—Gluck's music was warmly admired and recommended. Those who lament the "good old times" of patronage for rising genius (themselves, possibly, not exactly Glucks in embryo),—can hardly be well read in musical history.

As might have been foreseen, the revival of 'Anna Bolena' at the Italian Opera in Paris has proved a failure.—The music is not Donizetti's best; and the dream of self-delusion in which Madame Alboni must have lost herself ere she consented to personate the Queen-heroine, is, indeed, one hard to read.—There is a talk of reviving there Signor Pacini's 'Saffo,' for the introduction of the Viennese tenor, who will sing as Signor Bruni.

Judging by accounts from Paris, the Popular Concerts, directed by M. Padeloup, appear to be a real "hit." At the fifth, the vast audience would hear the *andante* from Mendelssohn's Italian symphony a second time, and, on the conductor refusing to comply, insisted on its repetition after the *Sallarella* was over.

M. Janin makes handsome mention of a new comedy, 'Nos Intimes,' in four acts, by M. Victorien Sardou, which has just been produced at the Théâtre Vaudeville, with Mlle. Fargueil as its heroine.

MISCELLANEA

The Scotch Church and Fanners.—In Mr. Smiles's 'Lives of the Engineers' there is cast upon the Scotch Church an aspersion which requires correction. It is represented, in a paragraph quoted from that work in the *Athenæum*, that winnowing-machines, when first introduced, were superstitiously censured by the clergy, one of whom, it is added, "even refused the Holy Communion to those of his parishioners who thus irreverently raised 'Devil's wind.'" The whole language of the writer, and especially the use of the term "parishioners," clearly direct the charge against the National Church. It ought, then, to be known, that this grovelling superstition was displayed exclusively by the Seceders—then a very small body. This point is settled in Chambers's 'Domestic History of Scotland,' vol. iii. p. 304, where, amongst other matter, it is said: "The author has been informed that an uncle of the late national poet, Robert Gilfillan, was excluded from a Fife congregation of this kind (*i.e.*, Seceder) because of his persisting to use fanners." K.

Rattle Snakes.—Our scientific readers, who have visited the Smithsonian Institution, at Washington, may remember seeing, in one of the rooms of that Institution, certain boxes from which, occasionally, peculiar rattling sounds proceeded. We, at least, have a vivid remembrance of seeing the said boxes when we were at Washington a few years ago; for they contained rattlesnakes in all stages of liveliness, which no amount of confinement could tame, and which, when in the smallest degree irritated, agitated their rattles as vigorously as if they had been intruded upon in their native haunts, on Rattlesnake Island, in Lake George. We also remember being told by the gentleman who kindly acted as our cicerone on that occasion that among the most active rattlesnakes were those which had been kept without food for many months, or rather did not feed, for rattlesnakes rarely eat in captivity. We are now informed that these rattlesnakes figure in the new volume of the 'Smithsonian Contributions to Knowledge.' This is a reptilian monograph, from the pen of Dr. S. Mitchell, of Philadelphia; and those who are interested in rattlesnakes will find some curious particulars of these venomous reptiles in Dr. Mitchell's work. He kept as many as three dozen together in a box at one time, and tried various experiments having reference to their poisonous secretion and its toxicological action upon animals.

NEW WORKS AND NEW EDITIONS

PUBLISHED BY

GRIFFIN, BOHN AND COMPANY, STATIONERS' HALL COURT.

Now ready, square 8vo. printed on toned paper, price 12s. 6d. cloth extra gilt; or 21s. morocco,

MANY THOUGHTS OF MANY MINDS;

Being a TREASURY of REFERENCE, consisting of SELECTIONS from the WRITINGS of the most CELEBRATED AUTHORS.

By HENRY SOUTHGATE.

Third Edition, thoroughly revised.

Great as has been of late years the number of what may be termed "Furniture," or "Illustrated" Gift-Books, there have been very few publications of intrinsic literary value suitable for presentation. This New and carefully-revised Edition of Mr. Southgate's well-known work, printed in the best style on toned paper, and elegantly bound, is certain, therefore, to recommend itself to a numerous class of purchasers.

Now ready, One large Volume, 8vo. price 8s. 6d. cloth,

THE ECCLESIASTICAL CYCLOPEDIA:

A DICTIONARY of CHRISTIAN and JEWISH SECTS, DENOMINATIONS and HERESIES; HISTORY of DOGMAS, RITES, SACRAMENTS, CEREMONIES, &c.—LITURGIES, CREEDS, CONFESSIONS, MONASTIC AND RELIGIOUS ORDERS, &c.

By the Rev. JOHN EADIE, D.D. LL.D.

Professor of Biblical Literature in the United Presbyterian Church.

Assisted by numerous Contributors.

On December 12, One large Volume, crown 8vo. price 12s. 6d.

A MANUAL OF CIVIL ENGINEERING.

By W. JOHN MACQUORN-RANKINE, LL.D. F.R.S. C.E. &c.

Regius Professor of Civil Engineering and Mechanics in the University of Glasgow.

With numerous Illustrations.

"Professor Rankine, whose high mathematical attainments, and power of applying them to practical objects, place him at the head of our scientific engineers."—SIR DAVID BREWSTER in the *North British Review*.

On December 12, in One large Volume, 8vo. price 7s. 6d. cloth,

LONDON LABOUR AND THE LONDON POOR.

THE EXTRA VOLUME,

THOSE THAT WILL NOT WORK.

COMPRISING,

THE NON-WORKERS. By HENRY MATHEW.
PROSTITUTES. By BRACEBRIDGE HEMMING.THIEVES and SWINDLERS. By JAMES BINNET.
BEGGARS. By ANDREW HALLIDAY.

With an Introductory Essay on the Agencies at present in operation in the Metropolis for the Suppression of Crime and Vice, by the Rev. WILLIAM TUCKNISS, B.A., Chaplain to the Society for the Rescue of Young Women and Children.

With Illustrations of Scenes and Localities.

"This volume forms the 'extra' or concluding volume of this extraordinary work. Its contents are entirely original, either supplied by the Police Authorities or gathered from the unfortunate parties themselves; and in addition to numerous deeply-interesting autobiographies, the work contains reliable statistical and social information, showing, not only the actual state of the dangerous and vicious classes of the metropolis, but what is doing for their reformation and elevation."

Now ready, in Two large Volumes, 8vo. price 24s.

**A COMPENDIOUS HISTORY OF THE
ENGLISH LANGUAGE AND LITERATURE
FROM THE NORMAN CONQUEST.**

With NUMEROUS EXAMPLES.

By GEORGE L. CRAIK, LL.D.

Professor of History and English Literature, Queen's College, Belfast.

Now ready, fcap. 8vo. price 5s. cloth, gilt edges,

CORTES AND PIZARRO:

The STORIES of the CONQUESTS of MEXICO and PERU, with the EARLY DISCOVERIES and ADVENTURES of the SPANIARDS in the NEW WORLD, re-told for Youth.

By WILLIAM DALTON,

Author of 'Jack Adams,' 'The Wolf-Boy in China,' &c.

With Illustrations by John Gilbert.

In the whole scope of history, there are no events so plucky and extraordinary, and therefore so interesting to young people, as the story of the settlement and conquest of America by the Spaniards.

Now ready, fcap. 8vo. price 3s. 6d. cloth, gilt edges,

**THE LIVES AND EXTRAORDINARY ADVENTURES OF
THE SEVEN CHAMPIONS OF CHRISTENDOM.**

By RICHARD JOHNSON.

With Illustrations by Edward Corbould.

This is a New and carefully-revised Edition of an old favourite. Written anterior to the time of Spenser and Shakspeare, it contains records (at that time generally believed of chivalry, magic and necromancy, much more wonderful than the namby-pamby "Table-turning," "Mesmerism," and other creeds of the present day. It is, indeed, a stirring and absorbing book for young people, and second only to the Arabian Nights in imagination, fancy and interest.

THE AUTHORS OF ENGLAND:

A SERIES OF PORTRAITS OF EMINENT LITERARY CHARACTERS,

With Memoirs by HENRY F. CHORLEY.

Second Edition revised, royal 8vo. price 10s. 6d. elegantly bound.

**THE RANK AND TALENT OF THE
TIME:**

A DICTIONARY of CONTEMPORARY BIOGRAPHY, Containing One Thousand Memoirs.

New Edition, post 8vo. price 6s. in cloth antique, bevelled.

THE CLASSIFIED BIBLE:

A COMPLETE ANALYSIS OF THE HOLY SCRIPTURES.

By JOHN EADIE, D.D. LL.D.

New Edition, post 8vo. price 8s. 6d. in elegant binding.

**THE TREASURY OF POPULAR
SCIENCE:**

A CYCLOPEDIA OF THE NATURAL AND PHYSICAL SCIENCES.

With numerous Illustrations.

By Professor SCHOEDLER and Dr. MEDLOCK.

Post 8vo. price 7s. 6d. antique cloth, bevelled.

THE STRATFORD SHAKSPEARE.

Edited by CHARLES KNIGHT.

New and Improved Edition, in 6 vols. fcap. 8vo. price 21s. cloth gilt.

YOUNG BENJAMIN FRANKLIN;

OR, THE RIGHT ROAD THROUGH LIFE.

By HENRY MATHEW.

With Illustrations by JOHN GILBERT.

Second Edition, fcap. 8vo. price 5s. cloth, gilt edges.

THE FAVOURITE STORY-BOOK.

A SERIES OF TALES FOR YOUNG PEOPLE.

ANDERSEN.
MARY HOWITT,
MISS MULOCH,GRIMM.
AUEBACH,
MRS. MYRTLE,

And other Popular Writers.

With Illustrations by ANSOLOV, WARREN, &c.

Square 8vo. 5s. cloth, gilt edges.

**THE SURPRISING ADVENTURES OF
ROBINSON CRUSOE.**

By DANIEL DEFOE.

With New and Original Illustrations by ZWICKER.

New Edition, 8vo. price 5s. in cloth and gold.

Prices, either Plain or Ruled, from 3s. upwards.
London: Dunn & Duncan, 9, Fleet-street, and to be obtained through all Booksellers.

POEMS. By the Rev. G. E. MAUNSELL. 8vo. pp. 301. 5s. cloth.
Morning Post.—"Genuine poetry. This volume affords a very favourable specimen of his taste and poetic ability."
Morning Advertiser.—"Many a beautiful thought, and in two lines perhaps, many a truthful sermon. The author is in the highest and noblest, because the truest sense, a poet."
Bell's Messenger.—"Direct poetic inspiration."
John Bull.—"Carefully and musically modulated, with a soul for the beautiful at all times."
Smith, Elder & Co. 63, Cornhill.

J. H. MARKLAND, D.C.L., on the OFFERTORY.—CHURCH OF THE PEOPLE, December.—Kent & Co. Price 3d.

This day, post 8vo. cloth, 5s. 6d.

ENGLISH LITERATURE.

In 12mo. cloth, Second Edition, pp. 564, price 4s. 6d.

CLASS-BOOK OF ENGLISH PROSE, Comprehending Specimens of the most Distinguished Prose Writers, from Chaucer to the present time. With Biographical Notices, Explanatory Notes, and Introductory Sketches of the History of English Literature.

By the Rev. ROBERT DEMAUS, M.A.

"A very excellent class-book."—*Westminster Review*. "A volume which the mere general reader may peruse with pleasure, and which the student of English Composition may consult with advantage."—*Notes and Queries*. "We have met with no book better arranged, or furnished with a more judicious selection of extracts, than Mr. Demaus's Class-Book."—*Guardian*.

By the same Author, in 12mo. cloth, price 2s.

INTRODUCTION TO THE HISTORY OF ENGLISH LITERATURE.

"We have been much pleased with an 'Introduction to the History of English Literature,' by Robert Demaus, M.A., which, though a comparatively small Manual, is of sufficient extent to give a very good notion of our literature from the earliest times to the present. The leading writers and works are ably described, and even of those more concisely treated enough is said to indicate their true character. It is not often that so much condensed information is conveyed in so lively and agreeable a manner."—*Athenæum*.

"One of the most convenient manuals, introductory to a fuller study of the history and progress of English literature, that we have ever seen."—*English Churchman*.

Edinburgh: Adam & Charles Black. London: Longman & Co. and all Booksellers.

COMPLETION

OF

THE ENGLISH CYCLOPÆDIA.

Conducted by CHARLES KNIGHT.

The ENGLISH CYCLOPÆDIA is published in FOUR DIVISIONS, each Division being complete in itself.

THE CYCLOPÆDIA OF GEOGRAPHY.

THE CYCLOPÆDIA OF BIOGRAPHY.

THE CYCLOPÆDIA OF NATURAL HISTORY.

THE CYCLOPÆDIA OF ARTS AND SCIENCES.

Each Division of the English Cyclopædia is, and is sold as, a separate Work.

GEOGRAPHY	4 Vols. £2 2 0	or 2 Vols. half morocco	£2 10 0
BIOGRAPHY	6 Vols. 3 0 0	3 Vols. „	3 12 0
NATURAL HISTORY ...	4 Vols. 2 2 0	2 Vols. „	2 10 0
ARTS AND SCIENCES ...	8 Vols. 4 16 0	4 Vols. „	5 12 0

* * For full details, see Prospectus, which may be had from the Publishers, or through any Bookseller.

FROM THE EXAMINER, Oct. 19.

"Mr. Knight completed a few weeks ago the two-and-twenty volumes of that excellent English Cyclopædia, into which the 'Penny Cyclopædia' has now been re-cast. The revised issue was planned in Four Divisions. Each is a complete work, having distinct claims on a large special class of readers, while the four together now constitute a general Cyclopædia singularly accurate and full, of which the two-and-twenty volumes—eight given to Arts and Sciences, six to Biography, four to Geography, and four to Natural History—cost only twelve pounds. Now that its reprints may be on untaxed paper, this admirable work and others that preceded or are concurrent with it will, we trust, bring their late worldly reward to one who, having been for forty years a most unwearied labourer for the instruction of the public, toils yet with the determined vigour of youth when his years are threescore-and-ten."

BRADBURY & EVANS, 11, Bouverie-street, Fleet-street, E.C.

This day is published,

THE ODYSSEY OF HOMER.

GIFT BOOK, NEW.

SONGS and TUNES for EDUCATION.
 Edited by JOHN CURWEN. The Harmonies by JAMES
 TURLE, Esq., Organist of Westminster Abbey. The Piano-
 forte Edition in handsome cloth binding, with gilt title, price
 Half-a-Crown.

This Work is the fruit of the Editor's residence in Germany. He collected books of music for young people in every town he visited. With the aid of Mr. James S. Stallybrass, the whole of this collection was analyzed, and the choicest translated or adapted for English use. The Editor, however, never preferred a German piece when an English one would do as well. He aims to educate the feelings and sympathies of childhood by the habit of singing good songs. This he considers the proper office of music in schools. He takes care that the three school ages (childhood, boy-and-girlhood and youth) are suited with songs on the following subjects:—Country Scenes, the Seasons, Fancy and Humour, Kindness to Animals, Home Sympathies, Patriotism, Industry, Integrity, Religion, &c. There are two hundred and sixty-seven songs. This Work will doubtless supersede the Editor's widely-known 'School Music' and 'School Songs.'

An Edition in the Tonic-Sol-fa Notation, containing the Treble Voice "parts" only, price, in paper, 1s.; in cloth, 1s. 4d. The 'Education Songs,' containing the words only, price 6d.
 Ward & Co. 27, Paternoster-row.

Just published, Second Edition, enlarged, price 10s.

 class to the curable."—*Lancet*.
 London: T. Richards, 37, Great Queen-street.

Messrs. CUNDALL, DOWNES & CO. have just published,
 Under the Authority of the Department of Science and Art,

TURNER'S LIBER STUDIUM. A Set
 of PHOTOGRAPHS taken by Mr. THURSTON THOMP-
 SON, from the THIRTY ORIGINAL DRAWINGS by TUR-
 NER, now in the South Kensington Museum.

The greatest care has been taken to produce the best possible
 Negatives, from which the Photographs are printed in Tints
 similar to the Originals. To Artists this set of Photographs will
 be even more valuable than the well-known Engravings. In order
 to render the work available to students, the Publishers are pre-
 pared to supply the Set of Thirty, half bound, for 3l. 13s. 6d.; or
 mounted on cardboard, in a portfolio, 4l. 4s.

Also, just ready,

**WAIFS and STRAYS from the SCRAP-
 BOOK of E. V. B.:** being TWELVE PHOTOGRAPHS, from
 Original Drawings. Half bound in morocco, 25s.

A Harmony of the 'Historia Britonum,' the Writings of Gildas the "Brut," and the Saxon Chronicle, with reference to the Events of the Fifth and Sixth Centuries.

By DANIEL H. HAIGH.

Also, by the same Author, 8vo. 8s. 6d.

The ANGLO-SAXON SAGAS: an Examination of their Value
 as Aids to History. A Sequel to the 'History of the Conquest of the Saxons.'

London: J. RUSSELL SMITH, 36, Soho-square.

MUDIE'S SELECT LIBRARY.

More than Half a Million of Volumes have been added to this Library since January, 1858. This supply includes a large number of copies of every recent work of acknowledged merit in HISTORY, BIOGRAPHY, RELIGION, PHILOSOPHY, TRAVEL and ADVENTURE, and the HIGHER CLASS of FICTION.

Revised Lists of Works recently added, and of Surplus Copies withdrawn for Sale, will be forwarded, postage free, on application.

CHARLES EDWARD MUDIE,

New Oxford-street, London; Cross-street, Manchester; and New-street, Birmingham.

EQUITABLE ASSURANCE OFFICE,

NEW BRIDGE-STREET, BLACKFRIARS.

ESTABLISHED 1762.

DIRECTORS.

THE RIGHT HON. LORD TREDEGAR, President.

William Dares Adams, Esq.
 Philip Hardwick, Esq.
 William Samuel Jones, Esq.
 John Aldin Moore, Esq.
 William Frederick Pollock, Esq.

Charles Pott, Esq.
 Rev. John Russell, D.D.
 James Spicer, Esq.
 John Charles Templer, Esq.
 Right Hon. Lord Tredegar.

John Charles Burgoyne, Esq.
 Lord George Henry Cavendish, M.P.
 Frederick Cowper, Esq.
 Richard Gosling, Esq.
 Peter Martineau, Esq.

THE EQUITABLE is an entirely MUTUAL Office. The reserve, at the last "rest," in December, 1859, exceeded three-fourths of a million sterling, a sum MORE THAN DOUBLE the corresponding fund of any similar Institution.

The Bonuses paid on Claims in the Ten Years ending on the 31st December, 1859, exceeded **Three Millions and a Half**, being more than 100 per Cent. on the amount of all those Claims.

The amount added at the close of that decade to the Policies existing on the 1st January, 1860, was **£1,977,000**, and made, with former additions then outstanding, a total of **£4,070,000**, on Assurances originally taken out for **£6,252,000** only.

These additions have increased the Claims allowed and paid under those policies since the 1st January, 1860, to the extent of 150 per Cent.

The Capital at this time consists of

£2,730,000—Stock in the Public Funds.

£3,006,297—Cash lent on Mortgages of Freehold Estates.

£300,000—Cash advanced on Railway Debentures.

£83,590—Cash advanced on security of the Policies of Members of the Society.

Producing annually, **£221,482**.

The total Income exceeds **£400,000** per Annum.

POLICIES effected in the current year (1861) will participate in the distribution of Profits made in December, 1859, so soon as Six Annual Premiums shall have become due and been paid thereon; and, in the Division of 1869, will be entitled to additions in respect of every Premium paid upon them from the year 1862 to 1869, each inclusive.

On the surrender of Policies, the full value is paid, without any deduction; and the Directors will advance nine-tenths of that value as a temporary accommodation, on the deposit of a Policy.

No extra Premium is charged for service in any Volunteer Corps within the United Kingdom, during peace or war. A Weekly Court of Directors is held every Wednesday, from 11 to 1 o'clock, to receive Proposals for New Assurances; and a Short Account of the Society may be had on application personally, or by post, from the Office, where attendance is given daily, from TEN to FOUR o'clock.

ARTHUR MORGAN, Actuary.

THE TEA TRADE.

[ANNUAL CIRCULAR.]

ROYAL BANK BUILDINGS,

Liverpool, December 2nd, 1861.

The Fine Black Teas, purchased at the new Port of HANKOW, alluded to in our Circular of September, have now arrived, and the qualities will be found (as we reported) **truly fine**,—and prices, moderate—**4s. and 4s. 4d.**—Very good Mediums much lower—**3/—3/4—3/8.**—Those Families who can make it convenient to comply with our Terms of doing business—viz. Payment—in about **twenty days** after the **receipt and approval** of Tea—will find combined advantages, as regards Quality and Price.

English Families and others residing abroad will find in our extended arrangements continued care in the execution of Foreign Orders, (under Bond—duty free). The distinctive feature of our system of business—during the past twenty-one years—has brought to us a large amount of Foreign Trade.

BANKERS.

For the special convenience of Families, we have an account open with "The City Bank," London,—“Bank of Ireland,” Dublin,—“National Bank of Scotland,” Edinburgh and Glasgow,—the “Gloucestershire Banking Co.” Cheltenham,—the “Br. Bank of England,” in Liverpool, and “Royal Bank of Liverpool.”—Amounts paid into any of above Banks, on our account, advising us of the same, will be duly passed to credit. Remittances can also be made direct to us by Bankers' Cheques, Post-office Orders, &c.

Your obliged and faithful Servants,

ROBT. ROBERTS & COMPY.

Tea and Coffee Salesmen,

Entrance up the Steps—Leading to the Royal Bank,

LIVERPOOL.

MR. HARVEY ON DEAFNESS.

Third Edition, just published, price 3s. 6d.; free, 2s. 6d.

THE EAR IN HEALTH and DISEASE, and on the Prevention of Deafness. By WM. HARVEY, F.R.C.S., Surgeon to the Royal Dispensary for Diseases of the Ear, Soho-square.

Just published, Third Edition, price 1s.; by post, 1s. 2d.

On DEAFNESS and NOISES in the EAR, resulting from Rheumatism, Gout, and Neuralgic Headache. London: Henry Renshaw, 356, Strand.

PILLISCHER, OPTICIAN, 88, New Bond-street, W., Manufacturer of Achromatic Microscopes, Telescopes, Stereoscopes, Opera, Race and Field Glasses, Barometers, Thermometers, and every other kind of Optical and Mathematical Instruments of the most approved construction, and at moderate prices.—N.B. Pillischer's celebrated Microscope and Reading Lamp, as used by Her Majesty and the Nobility, to be had only of M. PILLISCHER, 88, New Bond-street, London, W.

J. H. DALLMEYER (Son-in-Law and Pupil of the late ANDREW ROSS)

Respectfully begs to inform the Scientific Public that he exclusively manufactures the ASTRONOMICAL TELESCOPE according to A. R.'s processes, who has also bequeathed to him the whole of that faculty.

For particulars of J. H. D.'s recent IMPROVEMENTS in MICROSCOPIC OBJECT-GLASSES, PHOTOGRAPHIC LENSES, &c. see Catalogue, which may be had on application at 19, BLOOMSBURY-STREET, Oxford-street, W.C.

SMITH, BECK & BECK,

6, COLEMAN-STREET, London, E.C., AND

LISTER WORKS, HOLLOWAY.

WENHAM'S

BINOCULAR MICROSCOPE.

Having increased our facilities for the manufacture of the Prisms, as well as the other parts of this important improvement in the Microscope, we are now enabled to make the addition to any Microscope, when it is really practicable, at the cost of 7l. 10s. In the case of new Instruments, the extra price will be only 6l.

SMITH, BECK & BECK.

September, 1861.

CATALOGUES, giving full particulars respecting Microscopes, Stereoscopes, &c., may be had on application, or sent post free.

EMPOWERED BY ACT OF PARLIAMENT, 3 WILL. 4.

THE ECONOMIC LIFE ASSURANCE SOCIETY.

6, NEW BRIDGE-STREET, BLACKFRIARS, LONDON. Established 1833.

Directors.

ROBERT BIDDULPH, Esq., Chairman.
WILLIAM ROUTH, Esq., Deputy-Chairman.

Alfred Kingsford Barber, Esq.	Sir Alexander Duff Gordon, Bt.
Henry Barrett, Esq.	Rear Admiral Robert Gordon.
The Right Hon. E. Pleydell	Charles Morris, Esq.
Bouverie, M.P.	George Kettilby Richards, Esq.
Edward Charrington, Esq.	Augustus Keppel Stephenson, Esq.
Passcoe Charles Glyn, Esq.	

Actuary—James John Downes, Esq. F.R.A.S.
Secretary—Alexander Macdonald, Esq.

The Society offers the following advantages:—

The Lowest Rates of Premium on the Mutual System.

The whole of the Profits divided every Fifth Year.

Reversionary Bonuses have been added to Policies to the extent of 1,365,000l.

The last Bonus, declared in 1859, which averaged 65. per cent. on the Premiums paid, amounted to 475,000l.

8,471 Policies are now in force, yielding an annual income of 189,000l. assuring the sum of 6,697,575l. which, with 610,527 Bonus additions, makes a total liability of 7,308,102l.

The Invested Capital is 1,911,000l. producing upwards of 74,000l. —thus making the present Annual Income of the Society 263,000l.

Service in the Militia, Yeomanry or Volunteer Corps will not affect the validity of Policies.

Prospectuses and further particulars may be obtained on application to ALEXANDER MACDONALD, Secretary.

ACCIDENTS OF ALL KINDS,
AND FROM ANY CAUSE,
may be provided against by an Annual Payment of 2s. to the
RAILWAY PASSENGERS' ASSURANCE COMPANY,
which amounts to 1,000s. by Accident, or 5s. weekly for injury.
NO EXTRA PREMIUM FOR VOLUNTEERS.
ONE PERSON in every TWELVE insured is injured yearly
or more.

75,000s. has been already PAID as COMPENSATION.
For further information apply to the Provincial Agents, the
Railway Stations, or at the Head Office, 61, Cornhill (late 3, Old
Broad-street).

ANNUAL INCOME, 40,000s.
CAPITAL, ONE MILLION.
WILLIAM J. VIAN, Secretary.
61, Cornhill, E.C., January, 1861.

LONDON LIFE ASSOCIATION,
11, KING WILLIAM STREET, E.C.

Instituted 1800.
President—CHARLES FRANKS, Esq.
Vice-President—JOHN BENJAMIN HEATH, Esq.

Trustees.
Francis Henry Mitchell, Esq. Robert Hanbury, Esq.
Alfred Head, Esq. Bonamy Dobree, Esq.

The London Life Association was established more than fifty
years ago, on the principle of Mutual Assurance, the whole of the
benefit being shared by the Members assured. The surplus is
distributed each year, and appropriated solely to a reduction of
the premiums after seven yearly payments have been made.

If the present rate of reduction be maintained, persons now
effecting Assurances will be entitled, after seven years, to a
reduction of 75 per cent, whereby each lot of annual premium
will be reduced to 2s. 12s.

This Society has paid in claims more than £4,150,000
And has policies now in force amounting to 6,450,000
Its accumulated fund exceeds £2,750,000
And its gross income is upwards of 340,000
Assurances may be effected up to 10,000s. on the same life.

The Society has no agents and allows no commission, never-
theless the new assurance effected in the last financial year
amounted to 237,240s., and the new annual premiums to 10,567s.
EDWARD DOCKER, Secretary.

THE SAFEST LIFE POLICY
An Insurance can possess is obviously that which insures
Government Stock.

THE MOST USEFUL LIFE POLICY
is that which can always be used, like a Bank of England Note,
for financial purposes, and exchanged for cash ON DEMAND, at
the option of the holder, while he lives.

WHERE OBTAINABLE.

The only Policies providing these advantages are those issued by
the CONSOLS INSURANCE ASSOCIATION, 439, Strand,
London.

CONSTITUTION OF THE ASSOCIATION.

This Association is incorporated pursuant to Act of Parliament.
It possesses nearly SIX HUNDRED WEALTHY SHARE-
HOLDERS, who have subscribed a large Capital to guarantee its
engagements. This fact, combined with the distinctive advan-
tages the Institution confers on Insurers and Shareholders,
renders it an unusually eligible channel either for effecting Life
Insurances or Investments.

Full particulars may be obtained of

THOMAS H. BAYLIS, Managing Director.

Applications for public or private Agencies requested.

SUN LIFE ASSURANCE SOCIETY,
THREADNEEDLE-STREET, LONDON.

The Profits of this Society will be divided in future Quinquen-
nally; and Policies will participate at each division, after three
Annual Payments of Premium have been made.

Policies effected now will participate in four-fifths, or 80 per
cent, of the Profits, according to the conditions contained in the
Society's Prospectus.

The Premiums required by this Society for insuring young
lives are lower than in many other old-established Offices, and
Insurers are fully protected from all risk by an ample guarantee
fund, in addition to the accumulated funds derived from the
investments of Premiums.

No charge for services in the Militia or in any Yeomanry or
Volunteer Corps in the United Kingdom.

Policy Stamps paid by the Office.
Prospectuses may be obtained at the Office in Threadneedle-
street, London, or of any of the Agents of the Society.

CHARLES HENRY LIDDERDALE, Actuary.

THE SCOTTISH WIDOWS' FUND LIFE
ASSURANCE SOCIETY,

Head Office: 9, St. Andrew-square, Edinburgh,

18 NOW,

IN ANNUAL REVENUE AND EXTENT OF BUSINESS,
THE LARGEST MUTUAL LIFE OFFICE IN
THE WORLD.

I. BONUS SYSTEM.

The last Bonus for the Seven Years ending December, 1859,
yielded additions on the sum assured of from 12s. 6d. on the
most recent Policies, up to 3s. 6d. per Cent. per Annum on the
oldest Policies, which was equal, on an average, to from 50s. per
Cent. to 107s. per Cent. of the Seven Premiums paid, and was one
of the largest Bonuses ever declared by any Insurance Company.

II. CASH VALUE OF POLICIES PAYABLE ON
DEMAND.

Cash value is allowed at any time from the issue of a Policy on
a strictly equitable scale, by which neither retiring nor remaining
members are benefited at the expense of the other.

III. FUNDS AND REVENUE.

Invested Funds, 3,700,000s.; Annual Revenue, 430,000s.

HUGH M'KEAN, Central Agent.
London, 4, Royal Exchange-buildings,
Cornhill, November, 1861.

London Agents.

Major B. S. Rider, 49, Pall Mall.
Benton Sealey, Bookseller, Islington Green.
Robertson & White, Accountants, 4, Princes-street, City.

SPECIAL NOTICE.

Proposals lodged at the Head Office, or with any of the Agents,
before 31st of December, will secure participation in the above
advantages, and also one Bonus more than proposals of later date.

THE LIVERPOOL AND LONDON FIRE
AND LIFE INSURANCE COMPANY.

The Annual Fire Premiums £315,000
Mercantile Risks in London and elsewhere, at Home and
Abroad, freely insured by Floating Policies and otherwise.
20 and 21, Poultry.

INSTITUTED 1834.

SCOTTISH UNION FIRE AND LIFE
INSURANCE COMPANY.

London Offices, 37, Cornhill; Edinburgh, and Dublin.
The books closed for the quinquennial division of profits on the
31st July last.

The bonus will be declared at the Annual General Meeting of
the Company, on the 4th December next.
Persons effecting life insurances now, and before the end of July
next, will be entitled to five full years' profits at the division in
1868.

Mercantile and other Fire Insurances on the most liberal terms
and conditions.

LONDON BOARD.

President—The Right Hon. the EARL OF MANSFIELD.

DIRECTORS.

P. Anstruther, Esq. H. M. Kemshend, Esq.
Charles Balfour, Esq. John Kingdon, Esq.
Robert Collum, Esq. M.D. J. R. Robertson, Esq.
J. E. Goodhart, Esq. Hugh F. Sandeman, Esq.
George Ramsay, Esq., Manager.

Secretary—F. G. Smith, Esq. | Surgeon—E. W. Duffin, M.D.
Solicitors—Messrs. Oliphant, Leslie & Peachay.

Forms of Proposals, and Prospectuses, may be had at the Offices,
37, Cornhill, London; and of the Agents throughout the Kingdom.

FREDK. G. SMITH, Secretary to the London Board.
No. 37, Cornhill, London.

NORTH BRITISH INSURANCE
COMPANY.

Head Office—44, Princes-street, Edinburgh.

London Office—4, New Bank-buildings, Lothbury.

LIFE DEPARTMENT.

Policies opened before 31st December will be entitled at next
Distribution of Profits, in 1865, to rank for five years' bonus.

PROGRESS OF BUSINESS.

	Policies.	Sum Assured.
For five years, from 1853 to 1857 inclusive,	307	£276,948
The annual average was	455	377,425
In 1858, the Policies issued	605	449,913
1859	605	449,913
1860	741	476,640

This increase in the business of the Company will, it is
expected, beneficially affect the Bonus to be declared at next
Division of Profits.

New and liberal conditions of Assurance have recently been
adopted, particulars of which, together with Prospectuses and
all necessary information, may be had as above, or will be
forwarded.

ROBERT STRACHAN, Secretary.
4, New Bank-buildings, October, 1861.

UNIVERSAL LIFE ASSURANCE
SOCIETY,

No. 1, KING WILLIAM STREET, LONDON, E.C.

Established in the Year 1834.

Committees in Calcutta, Madras and Bombay.

Agents throughout India.

The last Annual Reduction of Premium amounted to 45 per
cent., so that a person being assured for 1,000s. at the age of 30 is
now paying 13s. 2d. 7d. instead of 24s. 8d. 4d.

INVESTED CAPITAL UPWARDS OF 780,000s.

M. E. IMPEY, Secretary.

ALEXANDER ROBB,
FAMILY AND EXPORT BISCUIT BAKER AND
CONFECTIONER,

Begs to acknowledge with grateful thanks the long-continued
patronage of his Friends and the Public, and to call their atten-
tion to his

SHOW OF CHRISTMAS AND TWELFTH-DAY CAKES,
now preparing, and which this Season will be of the most choice
and elegant description, many New and Tasty Decorations
being selected and introduced.

CHRISTMAS CAKES, ORNAMENTED, 1s. 6d. per lb.
TWELFTH-DAY CAKES,
First quality, highly decorated, 2s. per lb. Second ditto, 1s. 6d.
per lb. Third ditto, for Juveniles, 1s. per lb.

A large Assortment of SAVOY, ALMOND, and other CAKES
(in Moulds), 1s. 8d. per lb.

POUND CAKES, 1s. 4d. per lb.
RATAFIAS, and MACARONS, 1s. 6d. per lb.

SCOTCH SHORTBREAD, 1s. 3d. per lb.
ASSORTED CASES OF BISCUITS, for PRESENTS, 2s. 6d.
and upwards.

PASTRY of every description, CREAMS, ICES, JELLIES, &c.
A large STOCK OF WEDDING CAKES always on hand.

Manufactory, 79, ST. MARTIN'S-LANE, CHANCERY CROSS.
Delivery by Cart to all parts of Town daily.

BISCUITS FOR EXPORTATION.

ALEXANDER ROBB
Begs to inform Export Houses, Families going Abroad, and
others, that he has always on hand a large Stock of

WINE, DESSERT, and other BISCUITS,
made by machinery expressly for exportation; also his
GINGER NUTS and GINGER BISCUITS,

much approved of in warm climates; all in cases of 2s. and
upwards.—Only goods of the first quality made.

Manufactory, 79, ST. MARTIN'S-LANE, LONDON.

STOVES FOR ENTRANCE HALLS, SCHOOL
ROOMS, CHURCHES, &c. all made with fire-brick
linings, and entirely free from the objections found to so many,
which, from their liability to become overheated, are dangerous,
and render the atmosphere offensive. These Stoves burn little
fuel, may be had with or without open fire, and to burn through-
out the cold season, if required, without going out. Illustrated
Prospectuses forwarded.

FREDERICK EDWARDS & SON,
General Stove and Kitchen Range Manufacturers, 49, GREAT

Jermyn-street, S.W.

HARVEY'S SAUCE—CAUTION.—The
admirers of this celebrated Sauce are particularly re-
quested to observe that each bottle bears the well-known label,
signed "Elizabeth Lazenby." This label is protected by perpetual
injunction in Chancery of the 9th July, 1858, and without it none
can be genuine.

E. LAZENBY & SON, of 6, Edwards-street, Portman-square,
London, are sole Proprietors of the receipt for Harvey's Sauce, are
compelled to give this caution, from the fact that their labels are
closely imitated with a view to deceive purchasers.

Sold by all respectable Grocers, Druggists and Oilmen.

E. LAZENBY & SON beg to offer to notice
their selections of NEW FOREIGN PRESERVED
FRUITS for Dessert—Appricots, Greenapples, Pears, Strawberries,

RUPTURES—BY ROYAL LETTERS PATENT.
WHITE'S MOC-MAIN LEVER TRUSS is
allowed by upwards of 300 Medical Gentlemen to be the
most effective invention in the curative treatment of HERNIA.
The use of a steel spring, so often hurting, in its effects, is here
avoided; a soft bandage being worn round the body, while the
requisite resisting power is supplied by the MOC-MAIN PAD and
PATENT LEVER, fitting with so much ease and closeness that
it cannot be detected, and may be worn during sleep. A descrip-
tive Circular may be had, and the Truss which cannot fail to be
forwarded by post, on the circumference of the body, two inches
below the hips, being sent to the Manufacturer.

Price of a Single Truss, 16s. 2s. 6d. and 31s. 6d.; postage, 1s.
Double Truss, 31s. 6d. and 52s. 6d.; postage, 1s. 6d.

P. O. C. made payable to JOHN WHITE, Post-Office, Piccadilly.

ELASTIC STOCKINGS, KNEE-CAPS, &c.
for VARICOSE VEINS, and all cases of WEAKNESS
and SWELLING of the LEGS, SPRAINS, &c. They are porous,
light in texture, and inexpensive, and are drawn on like an ordi-
nary stocking. Price 6s. 6d., 7s. 6d., 10s. and 16s. each; postage 6d.

JOHN WHITE, Manufacturer, 238, PICCADILLY, London.

TAYLOR BROTHERS' GENUINE MUSTARD.—Dr. HASSALL, in his Report on Taylor Brothers' Genuine Mustard, says, "I find this Mustard perfectly genuine, and of superior quality, possessing a delicate flavour and much pungency." Sold by all Grocers and Oilmen.

DR. DE JONGH'S (Knight of the Order of Leopold of Belgium) **LIGHT-BROWN COD LIVER OIL**, Prescribed by the most Eminent Medical Men throughout the world, as the safest, speediest and most effectual

remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS, Is incomparably superior to every other variety.

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL is sold only in IMPERIAL Half-Pints, 2s. 6d.; Pints, 4s. 6d.; Quarts, 8s.; capuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart. M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr. de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disease, and a therapeutic agent of great value."

Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

Dr. LAWRENCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr. de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr. BARLOW, Senior Physician to Guy's Hospital.—"I have frequently recommended persons consulting me to make use of Dr. de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."

SOLE CORRESPONDENTS:
ANSAR, HARFORD & CO. 77, Strand, London, W.C.

CAUTION.—Beware of proposed Substitutions.

GRANGER'S PATENT COLLARS, 6d., 9d. and 1s. per dozen. Everlasting Collars, require no washing, 6d. each. Paper Lace Collars, 1d. and 2d. each. Trade supplied, at 308, High Holborn, W.C. Agents wanted.

MR. HOWARD, SURGEON-DENTIST, 52, FLEET-STREET, has introduced an ENTIRELY NEW DESCRIPTION OF ARTIFICIAL TEETH, fixed without springs, wires or ligatures. They so perfectly resemble the natural teeth as not to be distinguished from the originals by the closest observer; they will never change colour or decay, and will be found superior to any teeth ever before used. This method does not require the extraction of roots, or any painful operation, and will support and preserve teeth that are loose, and is guaranteed to restore articulation and mastication. Decayed teeth rendered sound and useful in mastication.—At home from Ten till Five.

THE FAIRY BOUQUET.—Dedicated (by Special Permission) to the QUEEN OF THE FAIRIES. It is made from Wild Flowers, culled by Fairy hands from the bank whereon the wild thyme grows. The authenticity of the receipt is vouched for with the same degree of certainty as is the existence of Titania herself. In bottles, 2s., 3s. 6d. and 5s. each.

METCALFE, BINGLEY & CO'S NEW PATTERN TOOTH BRUSHES, Penetrating Hair Brushes, Genuine Smyrna Sponges, and every description of Brush, Comb, and Perfumery. Metcalfe's celebrated Alkaline Tooth Powder, 2s. per box.—130s. and 131, Oxford-street.

COCKLE'S ANTIBILIOUS and FAMILY ALKALINE PILLS.—These pills are composed of the mildest vegetable aperients, with the pure extract of the flowers of the Camomile, and combining aromatic and tonic properties, will be found the best remedy for indigestion, bilious attacks, sick headache, acidity or heartburn, flatulency, spasms, &c.—Prepared only by **JAMES COCKLE**, 18, New Ormond-street, and to be had of all Medicine Vendors, in boxes, at 1s. 14d., 2s. 9d., 4s. 6d. and 11s.

NO MORE PILLS NOR ANY OTHER MEDICINE.—"We find DR. BARRY'S HEALTH RESTORING REVALENTA ARABICA FOOD the safest remedy for habitual constipation, indigestion (dyspepsia), palpitation, coughs, colds, asthma, bronchitis, consumption, diarrhoea, nervousness, biliousness, torpidity of the liver, &c."—Andrew Ure, M.D., F.R.S., Dr. Harvey, Dr. Shorland, Dr. Campbell, Dr. Wurser. Packed in tins, 11b., 2s. 6d.; 5lb., 4s. 6d.; 1lb., 11s.; 13lb., 22s.; 21lb., free of carriage, 40s.—Barry Du Barry & Co., 77, Regent-street, London; Portman & Mason; also at 60, Gracechurch-street; 4, Chancery; 63 and 150, Oxford-street; 229, 330, 430 and 451, Strand; and all Grocers.

INFANT DENTITION.
MRS. JOHNSON'S AMERICAN SOOTHING SYRUP.—This efficacious Remedy has been in general use for upwards of Thirty Years, and has preserved numerous Children when suffering from Convulsions arising from painful Dentition. As soon as the Syrup is rubbed on the Gums, the Child will be relieved, the Gums cooled and the inflammation reduced. It is as innocent as effluvia, tending to produce the Teeth with ease and without pain, that no Child will refuse to let its Gums be rubbed with it. Parents should be very careful to ask for **JOHNSON'S AMERICAN SOOTHING SYRUP**, and to notice that the Names of **BARCLAY & SONS**, 95, Farringdon-street, London (to whom Mrs. Johnson has sold the Recipe), are on the Stamp affixed to each Bottle. Price 3s. 6d. per Bottle.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession and universally accepted by the Public as the Best Remedy for acidity of the stomach, heartburn, headache, gout and indigestion, and as a mild aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescent Draught, in which its aperient qualities are much increased. During Hot Seasons and in Hot Climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by **DINNEFORD & CO. 173, New Bond-street, London**; and sold by all respectable Chemists throughout the Empire.

TAIT'S ORIENTAL BALM.—The most efficacious means yet discovered for Strengthening, Preserving, Restoring, and Beautifying the Hair. Prepared from a receipt by the late John Oldridge, inventor of the celebrated Balm of Gilead, under the experienced superintendence of his daughter and son-in-law, Mr. and Mrs. Tait.—To be had of all Perfumers, in bottles, at 1s., 2s. 6d., 5s. and 10s. 6d., and at the Manufactory of John Tait, 6, Cosmo-place, Southampton-row, Russell-square, W.C.

CAPTAIN WHITE'S CURRY or MULLIGATAWNY PASTE, Curry Powder, Curry Sauce, and Oriental Pickle, may be obtained from all Sauce Vendors, and wholesale of **CROSSE & BLACKWELL**, Purveyors to the Queen, 30, Soho-square, London.

NO CHRISTMAS GIFT is more VALUABLE than **OLDRIDGE'S BALM OF COLUMBIA**, which has been established upwards of thirty years. It is the best and only certain REMEDY ever discovered for PRESERVING, RESTORING, BEAUTIFYING, and RESTORING the HAIR, Whiskers or Moustaches, and preventing them turning grey. Sold in bottles, 2s. 6d., 5s. and 11s., by C. & A. OLDRIDGE, and all Chemists and Perfumers. For Children's and Ladies' hair it is most efficacious and unrivalled.

CAUTION.—COUGHS.—The only safe, immediate, and effectual remedy for **DR. LOOCK'S PULMONIC WAFERS**, is counteracted by diaphoretic Persone. Observe none but the genuine have the words "Dr. Loock's Wafers" in the Government stamp.
Price 1s. 14d. and 2s. 9d. per box. Sold by all respectable Chemists.

PERSONS who are SUFFERING from HEADACHE or INDIGESTION, whether arising from constitutional inaction, biliary disarrangement, or over-indulgence at the table, are particularly recommended to try **PARR'S LIFE PILLS**. They have never been known to fail in affording immediate relief. Parr's Pills are highly efficacious in bilious ailments, scorbutic complaints, affections of the nervous system, looseness of spirits, palpitation of the heart, rheumatic pains in the head and limbs, oppression of the chest, indigestion, redundancy of bile, dizziness of the eyes, violent pains across the forehead, impaired memory, sick headache, restlessness and bad dreams, stuporid dosing, flatulency, costiveness, &c. In boxes, price 1s. 14d., 2s. 9d., and in family packets, 11s. each. Sold by all Chemists and Medicine Vendors.

THE ATHENÆUM

Journal of English and Foreign Literature, Science, and the Fine Arts.

No. 1781.

LONDON, SATURDAY, DECEMBER 14, 1861.

PRICE
THREEPENCE
Stamped Edition, 4d.

NOTICE.

The price of THE ATHENÆUM is now THREEPENCE.

Thirty years ago, when THE ATHENÆUM came into the hands of its present Proprietors, its price was Eightpence, and its contents, with advertisements, forty-eight columns. Convinced that the circulation of Literary Journals was restricted by high price, and that every advantage offered to the public would bring increase of circulation and authority, the Proprietors reduced the price one-half—to Fourpence. The experiment succeeded, and cheap Literary Journals became the rule.

The Proprietors have always held to the principle then proved. They have given to the public the benefit of every change in the law, increasing the size of the paper without increase of price, until the average has become double its former size—above ninety-six columns.

The Proprietors, taking advantage of the abolition of the Paper Duty, therefore resolved that the price of THE ATHENÆUM should be reduced to THREEPENCE.

ATHENÆUM OFFICE.

NOTICE.—It is requested that Advertisements intended for insertion in the current week's publication be sent to this Office not later than Wednesday.

ROYAL ACADEMY OF ARTS.—

On TUESDAY, the 10th inst., being the NINETEENTH ANNIVERSARY of the FOUNDATION of the ROYAL ACADEMY OF ARTS,—

At a General Assembly of Academicians, the following GOLD MEDALS were awarded—

To Andrew Brown Donaldson for the best Historical Painting. To George Slater for the best Historical Group in Sculpture. To Thomas Henry Watson for the best Architectural Design.

SILVER MEDALS were likewise awarded—

To Norman Edward Taylor for the best Drawing from the Life. To Thomas Gray for the next best Drawing from the Life. To William Blake Richmond for the next best Drawing from the Life.

To Henry Bursill for the best Model from the Life. To Joseph H. Wynn for the next best Model from the Life. To John Stewart Calcott for the best Painting from the Living Draped Model.

To George Smith for the best Drawing from the Antique. To Thomas Henry Thomas for the next best Drawing from the Antique.

To Walter Tomlinson for the next best Drawing from the Antique. To David Davis for the best Model from the Antique. To George Augustus Scappa for the best Perspective Drawing in Outline.

To Alfred Ridge for a Specimen of Sciagraphy. JOHN PRESCOTT KNIGHT, R.A., Secretary.

MR. CLAUDET begs to announce that he has returned from the Continent, and that he now ATTENDS AT HIS STUDIO daily as usual.—PHOTOGRAPHIC GALLERY, 107, Regent-street, near Vico-street.

THE GOVERNESSES' INSTITUTION, 34, BOHO-SQUARE.—MISS WACHORN, who has resided many years abroad, respectfully invites for attention of the Nobility, Gentry, and Principals of Schools, to her REGISTER of English and Foreign GOVERNESSES, TEACHERS, COMPANIONS, TUTORS, and PROFESSORS. School Property transferred, and Pupils introduced in England, France, and Germany. No charge to Principals.

MILITARY EXAMINATIONS.—COMPETITORS for Sandhurst, Woolwich, or the Staff College, and Candidates for Direct Commissions or Staff Appointments, are PREPARED in all the Branches (compulsory and optional) of their Programmes, at the Practical Military College, Sunbury, S.W.—Apply for Prospectuses, &c. to Captain LEWIS.

THE REV. PHILIP SMITH, B.A., RECEIVES a limited number of PUPILS for instruction in all the branches of a Liberal Education, and Preparation for the Universities and the Civil and Military Services. St. James's Lodge, Croydon Common, S.

HYDE PARK COLLEGE (now HYDE PARK INSTITUTE) is REOPENED at 115, Gloucester-terrace, Hyde Park.—The Half-Term for the Senior Classes commenced on the 6th of December.—Prospectuses to be had on application.

EDUCATION in GERMANY, BONN.—MR. TH. STROMBERG, authorized Translator of LORD MACAULAY'S HISTORY, &c. of the POEMS of CATULLUS, &c. RECEIVES TWO PUPILS. Highest references to English Noblemen and Gentlemen whose sons he has prepared for the Navy, Universities, &c. Apply for particulars to Dr. A. HEIMANN, Professor at the London University, 5, Gordon-square, London.

QUEENWOOD COLLEGE, four miles from Dunbridge Station, South-Western Railway, Hampshire.—The Course of Instruction embraces Mathematics, Natural Philosophy, Theoretic and Practical Chemistry, English, Classics, Foreign Languages, Practical Surveying, Levelling, &c. Mechanical and Free-hand Drawing and Music. The Principal is assisted by ten Resident Masters. The position of the Establishment is healthful, and the advantages various and unusual. Attention is invited to the Prospectus, which may be had on application.

THE CAMDEN SOCIETY.—The attention of those who possess imperfect sets of Works published by the Camden Society is directed to the following terms on which such sets may be completed:—

To Members of the Society, i.e. Subscribers for the current year, applying whilst the Works of former years remain in stock, they will be supplied:

The Books for each year except the first (which are out of print) and the last, at Ten Shillings.

The Books for 1859-60 and 1860-61 (together) for Thirty Shillings.

The Subscription of One Pound is due in advance on the 1st of May in every year. No Books are delivered until the Subscription for the Year has been paid.

Copies of the Prospectus, containing a List of the Society's Publications, or the Report, may be had on application to Messrs. Nichols & Sons, 25, Parliament-street, Westminster.

CRYSTAL PALACE.—EXHIBITION SPACE.—The Forthcoming Season being one of great interest to intending Exhibitors of all classes, the Directors of the CRYSTAL PALACE, SYDENHAM, are prepared to receive Applications for the EXHIBITION of Special and Important ARTICLES of Manufacture, under arrangements to be agreed upon.

CRYSTAL PALACE.—EXHIBITION SPACE.—THE COURT of INVENTIONS, and the Industrial Courts have recently been enlarged and re-arranged, and they offer great advantages to Inventors and Manufacturers during the International Exhibition of 1862.

CRYSTAL PALACE.—EXHIBITION SPACE.—THE CARRIAGE DEPARTMENT at the Crystal Palace has been extended, and will be found very advantageous to Exhibitors for the Sale of Carriages, as well as affording the greatest publicity. Ample accommodation can also be provided for the Exhibition of Machinery, for which steam-power will be supplied.

CRYSTAL PALACE.—BLONDIN.—The SEVENTH of a short Series of TIGHT-ROPE PERFORMANCES by this most talented Gymnast will begin on MONDAY at a Quarter of Three o'clock, and will be continued Daily during the Week, with a Change of Performances each Day. A Platform has been specially erected in front of the Handel Orchestra, upon which these Extraordinary Feats are Exhibited.

This Entertainment, although entirely different to M. Blondin's High-Rope Performances, which caused so great a sensation during the Summer months, is none the less astounding, and has been described by the entire Metropolitan Press as "THE CLEVEREST and MOST AGREEABLE PERFORMANCE EVER SEEN."

Admission, One Shilling; Children and Schools, Half-price.—Saturday, Half-a-Crown.

CRYSTAL PALACE.—ANNUAL BAZAAR and GREAT CHRISTMAS FAIR.—NOW OPEN with a most extensive and varied assortment of USEFUL and FANCY ARTICLES suitable for CHRISTMAS PRESENTS.

CRYSTAL PALACE.—CHRISTMAS FESTIVITIES.—Great Preparations are being made for the GRAND CRYSTAL PALACE CHRISTMAS ENTERTAINMENT, for which an immense Stage, with appropriate Scenery, Fittings, and Mechanical Effects, is in course of construction. Full particulars will be duly announced.

POLYTECHNIC INSTITUTION.—Professor J. H. PEPPER, F.C.S. A Inst. C.E. can accept a limited number only of ENGAGEMENTS to LECTURE at Institutions, Colleges and Schools; and his CHEMICAL LABORATORY for Analysis, Private Pupils, Instruction in the Scientific Portion of the Civil Service and Military Examinations, and for Morning and Evening Classes, is at the Polytechnic, 309, Strand, E.C. N.B. The Laboratory is carefully fitted with every necessary Apparatus.

HARROW or RUGBY.—A Married M.A., of Trinity College, Cambridge, Senior Optime and First Classman in the Classical Tripos, Head Exhibitor of his year at Rugby, who prepares Boys for the Public Schools, except Eton, has VACANCIES for next Half-year. His house, recently enlarged for the purpose, is situated in a beautiful and healthy part of the country. Terms, 80 Guineas a year, with no extra.—Address M. L., 71, High-street, Birmingham.

BRUNSWICK SCHOOL, LEAMINGTON. OXFORD MIDDLE-CLASS EXAMINATIONS. The only First-Class Certificate awarded for the last two years at Birmingham, the Examining Centre for the Midland Counties, has just been gained by a Pupil of Brunswick School, Leamington. Three other Boys from this School passed their Examination. Prospectuses on application. J. H. HAWLEY, Principal.

EDUCATION.—BRIGHTON, 21, Montpelier crescent.—Miss ELEANOR MORGAN RECEIVES TWELVE YOUNG LADIES under 14 years of age. Terms, from 40 to 80 guineas. References kindly permitted to the Parents of Pupils; also to the Rev. J. Vaughan, Brighton; Rev. H. Brass, Brighton; and R. D. Craig, Esq., Q.C., 30, Old-square, Lincoln's Inn, London.—Prospectuses forwarded on application.

THE REV. F. GILBERT WHITE, M.A. OXON., wishes to receive into his Family FOUR more BOYS, between 9 and 14, to be prepared for the Public Schools. Full number, six. Terms, 80 Guineas.—Address, Tarrant Hinton Rectory, Bradford.

LADIES' CLASSES.—MR. N. TRAVERS, B.A. OXON., and late Professor of Modern History in the Ladies' College, Bedford-square, receives CLASSES for the study of ENGLISH, ELOCUTION, LATIN and HISTORY.—4, Fitzroy-square, W.

TO ADMIRERS of the FINE ARTS.—MR. AMOS now OFFERS for SALE, with the Copyright, Eugene Verboeckhoven's Masterpiece, "CATTLE LEAVING the FARM-YARD," pronounced the grandest composition of the Flemish School. Price and Opinions of the Press forwarded, on applying to Mr. AMOS, 25, Snaregate-street, Dover.

WANTED, by an English Gentleman, aged 50, PARTIAL ENGAGEMENT, as English, Italian or French Correspondent, Confidential Secretary, Interpreter, Reader, Translator, Teacher, Clerk, or otherwise. First-rate City and West-End references. Security, &c.—Address, p. p., to Mr. CURT, 33, Great Portland-street, Regent-street.

TO PUBLISHERS.—A GENTLEMAN of capital is desirous of embarking in the PUBLISHING BUSINESS, either as Partner or by Purchase.—Address, in the first instance, to X.Y.Z., care of Mr. Lindley, 19, Catherine-street, Strand, W.C.

THE PRESS.—Wanted a Situation as NEWSPAPER REPORTER. The Advertiser is also competent to Contribute Occasional Articles, and he would consider the prospects of the appointment, rather than the remuneration.—Address H.S., Daily Post Office, Birmingham.

TO BOOKSELLERS and STATIONERS.—WANTED an EXPERIENCED ASSISTANT of good address, to take the Management of the Stationery Department, in a first-class Business. Also an ASSISTANT for the Educational Department.—Address "Box, P. 45," Post-Office, Liverpool.

TO THE LITERARY PROFESSION.—The HALF-SHARE of a POPULAR PERIODICAL for SALE. None need apply who cannot undertake the Literary Department.—Apply, by letter only, to G. E. G., 337, Strand, London.

TO BOOKSELLERS, STATIONERS and PRINTERS.—A BUSINESS in the COUNTRY for DISPOSAL. It has been established a very long time. The Profits are about 800l. a-year, and are on the increase. The Stock, Printing Plant and Pictures at a Valuation. Small Premium expected, 1,000l. to 1,250l. required.—Address, for particulars, to T. J. B., 35, Ludgate-street, London.

NEWSPAPER PROPERTY.—The Proprietor of a Provincial Liberal Newspaper is desirous to treat for the DISPOSAL of the PROPERTY. The Journal, which is published weekly, is the organ of a large constituency in a populous County, and, by the employment of a moderate capital, with personal energy, it might easily be extended both as regards its advertising connexion and its circulation. The constant occupation in other business is the reason for wishing to part with the Newspaper. The Proprietor would be willing to share in the commercial responsibility of the Paper with a gentleman who could command a small capital, and who would be qualified to undertake its management.—Direct P. F. Y., District Post-Office, Bethnal-green, London, N.E.

TO NATURALISTS.—For PARTICULARS of the Collections of Fossils and British Recent Shells which are now in preparation. Naturalists are referred to an ADVERTISEMENT in the Athenæum of last week, page 746, col. 2, British Natural History Society, York, Dec. 12th, 1861.

GALLERY PICTURES, by PYNACKER, to be SOLD by PRIVATE CONTRACT. Three very fine Landscapes with Figures by Adam Pynacker, in perfect preservation, the work of a Nobleman. Size of each about 14 feet by 19 feet.—May be seen at Messrs. CHRISTIE, MARSON & Woods, 6, King-street, St. James's-square, S.W.

POLARISCOPE WANTED.—Any one who may wish to DISPOSE of a POLARISCOPE, adapted for the Analysis of Sugar, may find a purchaser by sending description and price to Messrs. WILLIAMS & GIBSON, Greenock.

TRAVELLING COMPANION.—A Young Gentleman, Aged 22, SEEKS an ENGAGEMENT with some Nobleman or Gentleman as above. No objection to go to India, America, &c.—Address S. J. B., care of Mr. W. P. Payne, Eagle House, West Brompton, S.W.

MILL HILL SCHOOL, NEAR HENDON, N.W., WILL RE-OPEN, WEDNESDAY, January 20th, 1862. Applications for Admission or Prospectuses to the Rev. Dr. HUMMELL, Head-Master, or the Rev. THOMAS REES, at the School.

PAU.—A LADY, resident at Pau, having larger Apartments than she requires, is desirous of receiving ONE or TWO LADIES to BOARD for the season longer.—Address G., Salter's Library, Upper Baker-street, N.W.

FRENCH, Italian, German.—Dr. ALTSCHUL, Author of 'First German Reading-Book' (dedicated to Her Grace the Duchess of Sutherland), &c., M. Philolog. Soc., Prof. Elocution.—TWO LANGUAGES TAUGHT in the same Lesson, or alternately, on the same Terms as One, at the pupils' or at his house. Each language spoken in his PRIVATE Lessons, and select CLASSES for Ladies and Gentlemen. Preparation for all ordinary pursuits of life, the Universities, Army and Civil Service Examinations.—9, OLD BOND-STREET, PICCADILLY.

A LADY, residing in the Neighbourhood of London, is desirous of Receiving One or Two PUPILS for Private Tuition as Companion to the Daughter of a Lady of Rank. Terms, 100 guineas. The highest references are given, and will be required.—Address L.L., 161, Regent-street.

MR. PARKINSON'S NEW TRIP to SCARBOROUGH, with a Dissertation on the SPA, its Beauties, its Customs and its HABITU S. Mr. Parkinson delivers his Discriptive Lecture in the Home Counties, from the second week in January until the first week in March, 1862.—For terms and disengaged dates, address JOSEPH C. PARKINSON, Esq., 1, Wimbledon-terrace, Wimbledon, S.W.

THE QUEEN'S CONCERT-ROOMS, Hanover-square.—The Proprietor of these, MR. COCKS, begs to inform those Ladies and Gentlemen who propose giving Concerts, Balls, Soirées, Matinees, Lectures, or other Entertainments, as also the Directors of Religious and other Societies,—that these celebrated ROOMS will be READY for USE the FIRST WEEK in JANUARY 1862. The rooms have been highly decorated, and are furnished with lavatories and every modern appliance for the promotion of comfort.—For particulars, apply to Messrs. ROBERT COCKS & Co., New Burlington-street (Publishers to Her Most Gracious Majesty the Queen), and No. 4, Hanover-square.

0

CHOICE, RARE AND VALUABLE BOOKS.

MESSRS. UPHAM & BEET have just issued a NEW CATALOGUE, including RARE BLACK LETTER and EARLY-PRINTED BOOKS. Dr. Dibdin's Works—Bewick's Birds and Quadrupeds, first editions—Facsimile—Homer, printed on vellum—Topography and Country History—many on large paper, and a beautiful assemblage of Books in all Classes of Literature. The whole in the finest condition. Sent by Post on receipt of a Stamp addressed UPHAM & BEET, 45, NEW BOND-STREET, LONDON, W. UPHAM & BEET** PURCHASE LIBRARIES and small COLLECTIONS OF BOOKS, and give high prices; they also remove them from any part of the Country without any expense to the Vendor, by these means the publicity and high charges of Sales by Auction are entirely avoided. Address UPHAM & BEET, 45, NEW BOND-STREET, LONDON, W. Established nearly a Century.

ORIENTAL GENERAL CARRIERS.

THE ORIENTAL INLAND STEAM COMPANY (Limited), under subsidy from the Indian Government. Capital, 500,000.

This Company acts as general carriers both by land and water, and as general forwarding Agents throughout the East. They receive goods in England for transmission to different points of India, whether on the Coast or in the Interior; they convey goods by railway, by steamboat, or other available means, from one part of India to another; and they receive goods at the different stations in India for transmission to England. They forward both by the Cape and Overland Routes, as shippers may desire; and parcels or merchandise entrusted to them, whether in India or in England, will be conveyed to their destinations at the lowest possible charge, without further trouble to the shipper or consignee, without the present risks of detention, and without requiring the intervention of any agency.

For tariff of rates, and all other necessary information, apply at the Company's Offices, 9, Billiter-street, London, or 3, Queen's-terrace, Southampton, or to the Company's Agents at the different Stations in the East. A number of these Agencies have been already established, and the others are being formed as rapidly as possible.

The following are some of the existing or proposed Stations:—

Agra	Perozepore	Moulton
Ahmednuggur	Fateyghur	Nemuch
Allypore	Fyzabad	Naynee Tall
Alibabad	Chaspoore	Patna
Assam	Gwalior	Peshawar

Mr. Murray's meritorious Series.—TIMES.

Now Ready, at all the Booksellers', in Post 8vo. Volumes, neatly bound in Cloth,

MR. MURRAY'S

HOME AND COLONIAL LIBRARY,

A RE-ISSUE AT A REDUCED PRICE.

THE object of this Library when first published was to furnish the highest Literature of the day, at a very low price. The great success which has attended its publication shows how well suited it was to the wants of the reading public at that period. Since then a fresh class of readers has arisen, and the establishment of LITERARY INSTITUTIONS, SCHOOL and VILLAGE CLUBS, BOOK-HAWKING SOCIETIES, PAROCHIAL and LENDING LIBRARIES, has become so general, that it appears to the Publisher a good opportunity to disseminate these Volumes, at a rate which shall place them within reach of a still less wealthy class. By removing the impediment of price, he hopes to throw open these attractive and useful works to the Million; so that having hitherto been the delight of the Parlour and Drawing-room, they may now do equally good service in the FACTORY and WORKSHOP—in the COTTAGE of the PEASANT and LOG-HUT of the COLONIST—in the SOLDIER'S BARRACK and the SAILOR'S CABIN.

The works composing the "Colonial and Home Library" have been selected for their acknowledged merit and the ability of their authors, and are exclusively such as are calculated to please all classes and circles of readers. The character of the work is well known and esteemed, so that the Publisher has great confidence in calling the attention of the CLERGY, of SECRETARIES of VILLAGE READING-CLUBS, of MASTERS of FACTORIES and SCHOOLS, to this great reduction of price, and inviting their attention to the Lists which follow, in which for greater convenience the various Works have been arranged under two distinct heads.

CLASS A.

Biography, History and Historic Tales.

- I. HISTORY of the SIEGE of GIBRALTAR. By JOHN DRINKWATER. 2s.
- II. The AMBER WITCH.—The MOST INTERESTING TRIAL FOR WITCHCRAFT EVER KNOWN. From the German. 2s.

. Each Work is complete in itself, and may be obtained separately.

JOHN MURRAY, ALBEMARLE-STREET.

CHRISTMAS, NEW YEAR'S & BIRTHDAY GIFTS,

Published by LOCKWOOD & CO.

THE BOY'S OWN BOOK: a Complete Encyclopædia of all the Diversions, Athletic, Scientific and Recreative, of Boyhood and Youth. With many Hundred Woodcuts and Ten Vignette Titles, beautifully printed in Gold. New Edition, greatly enlarged and improved, price 8s. 6d. handsomely bound in cloth.

. This is the original and genuine 'Boy's Own Book,' formerly published by Mr. Bogue, and recently by Messrs. Kent & Co. Care should be taken, in ordering, to give the exact title, or the name of either the former or present Publishers.

THE LITTLE BOY'S OWN BOOK of SPORTS and PASTIMES. With numerous Engravings. (Abridged from the above.) 16mo. 3s. 6d. cloth.

"MANY HAPPY RETURNS of the DAY!" A Birthday Book. By CHARLES and MARY COWDEN CLARKE, Authors of 'The Concordance to Shakespeare,' &c. Beautifully Illustrated by the Brothers Dalziel. Small post 8vo. price 6s. cloth elegant, gilt edges.

"An unobjectionable child's book is the rarest of all books. 'Many Happy Returns of the Day' is not only this, but may rely, without shrinking, upon its positive excellencies for a long and deserved popularity."—*Westminster Review*.

"It will be as acceptable to the young as 'Sandford and Merton' was wont to be half a century since. The authors will henceforth share the affections of the young with Hans Andersen, Peter Parley, and the Brothers Grimm."—*Plymouth Journal*.

TRUTHS ILLUSTRATED by GREAT AUTHORS. A Dictionary of nearly Four Thousand Aids to Reflection. Quotations of Maxims, Metaphors, Counsels, Cautions, Proverbs, Aphorisms, &c. &c. In Prose and Verse. Compiled from the Great Writers of all Ages and Countries. Tenth Edition. Fcap. 8vo. cloth, gilt edges, 568 pp., 6s.

"The quotations are perfect gems; their selection evinces sound judgment and excellent taste."—*Dispatch*.

"We accept the treasure with profound gratitude—it should find its way to every home."—*Era*.

"We know of no better book of its kind."—*Examiner*.

THE PHILOSOPHY of WILLIAM SHAKESPEARE: delineating, in Seven Hundred and Fifty Passages selected from his Plays, the Multiform Phases of the Human Mind. By the Editors of 'Truths Illustrated by Great Authors.' Second Edition. Fcap. 8vo. cloth, gilt edges, nearly 700 pages, with beautiful Vignette Title, price 6s.

. A glance at this volume will at once show its superiority to Dodd's 'Beauties,' or any other volume of Shakespearian selections.

SONGS of the SOUL during its PILGRIMAGE HEAVENWARD: being a New Collection of Poetry, illustrative of the Power of the Christian Faith; selected from the Works of the most eminent British, Foreign and American Writers, Ancient and Modern, Original and Translated. By the Editors of 'Truths Illustrated by Great Authors,' &c. Second Edition. Fcap. 8vo. cloth, gilt edges, 638 pages, with beautiful Frontispiece and Title, price 6s.

This elegant volume will be appreciated by the admirers of 'The Christian Year.'

THE BEAUTY of HOLINESS; or, the Practical Christian's Daily Companion: being a Collection of upwards of Two thousand Reflective and Spiritual Passages, remarkable for their Sublimity, Beauty and Practicability; selected from the Sacred Writings, and arranged in Eighty-two Sections, each comprising a different theme for meditation. By the Editors of 'Truths Illustrated by Great Authors.' Third Edition. Fcap. 8vo. cloth, gilt edges, 536 pp., 6s. (large type, suitable for aged eyes).

TIMBS'S "THINGS NOT GENERALLY KNOWN" SERIES. By JOHN TIMBS, F.S.A. In Six Volumes, fcap. cloth, price 15s., viz.:—General Information (Things not Generally Known), 2 vols.; Curiosities of Science, 2 vols.; Curiosities of History, 1 vol.; Popular Errors Explained, 1 vol.

. Each Volume is sold separately, price 2s. 6d.

"Any one who reads and remembers Mr. Timbs's encyclopædic varieties should ever after be a good tea-table talker, an excellent companion for children, a 'well-read person,' and a proficient lecturer."—*Athenæum*.

TIMBS'S SCHOOL-DAYS of EMINENT MEN. Containing School and College Lives of the Most Celebrated British Authors, Poets and Philosophers; Inventors and Discoverers; Divines, Heroes, Statesmen and Legislators. By JOHN TIMBS, F.S.A. With a Frontispiece by JOHN GILBERT, and 13 Views of Public Schools, &c., in a close-printed volume, price 3s. 6d. cloth.

. This book is extensively used, and specially adapted, for a Prize Book at Schools.

"A book to interest all boys, more especially those of Westminster, Eton, Harrow, Rugby and Winchester."—*Notes and Queries*.

TIMBS'S STORIES of INVENTORS and DISCOVERERS in SCIENCE and the USEFUL ARTS. By JOHN TIMBS, F.S.A. Numerous Illustrations. Fcap. 5s. cloth.

"These stories by Mr. Timbs are as marvellous as the 'Arabian Nights' Entertainments, and are wrought into a volume of great interest and worth."—*Athenæum*.

TIMBS'S PAINTING POPULARLY EXPLAINED. With HISTORICAL SKETCHES of the PROGRESS of the ART. A Manual for Art-Students and Visitors to the Exhibitions. By THOMAS JOHN GULLICK, Painter, and JOHN TIMBS, F.S.A. With a Frontispiece and Vignette. Small 8vo. pp. 336, 6s. cloth.

. This Work has been adopted as a Text-book in the Schools of Art at South Kensington, in connexion with the Science and Art Department of the Committee of Council on Education.

"This is a book which all lovers of Art will rejoice in, as containing, in small compass, the very information which Exhibitions and Art-Unions must have made so many thousands sensible of their want of."—*National Magazine*.

SIDNEY GREY: a Tale of School Life. By the Author of 'Mia and Charlie.' Second Edition, with Six Illustrations. Fcap. 4s. 6d. cloth.

EVENTS to be REMEMBERED in the HISTORY of ENGLAND. Forming a Series of Interesting Narratives, extracted from the Pages of Contemporary Chronicles or Modern Historians, of the most Remarkable Occurrences in each Reign; with Reviews of the Manners, Domestic Habits, Amusements, Customs, &c. &c. of the People, Chronological Table, &c. By CHARLES SELBY. Twenty-fifth Edition. 12mo. fine paper, with Nine beautiful Illustrations by Anelay, price 3s. 6d. cloth elegant, gilt edges.

VICTORIAN ENIGMAS; or, Windsor Fireside Researches: being a Series of Acrostics enigmatically propounded on Historical, Biographical, Geographical and Miscellaneous Subjects; intended in a novel manner to combine Amusement with Exercise in the Attainment of Knowledge. By CHARLOTTE ELIZA CAPEL. Royal 16mo. elegantly printed, price 2s. 6d. cloth.

. The idea for this entirely original style of Enigmas is taken from one said to have been written by Her Majesty for the Royal Children, which, with the Solution, is given.

London: LOCKWOOD & Co. 7, Stationers' Hall-court, Ludgate-hill.

VALUABLE WORKS IN ENGINEERING, ARCHITECTURE, AGRICULTURE, &c.

THE YEAR-BOOK of FACTS in SCIENCE and ART. Exhibiting the most important Improvements and Discoveries of the past Year in Mechanics and the Useful Arts, Natural Philosophy, Electricity, Chemistry, Zoology and Botany, Geology and Mineralogy, Meteorology and Astronomy. By JOHN TIMBS, F.S.A. Fcap. 5s. cloth, with fine engraved Frontispiece and Vignette. (Published Annually.)

. This Work records the Proceedings of the principal Scientific Societies, and is indispensable for such as wish to possess a faithful picture of the latest novelties of Science and the Arts.

ALBAN.—THE HIGH-PRESSURE STEAM-ENGINE. By Dr. ERNST ALBAN, Practical Machine Maker, Pilsen, Bohemia. Translated from the German, by WILLIAM POLE, C.E. F.R.A.S. Assoc. Inst. C.E. 8vo. with 28 fine Plates, 10s. 6d. cloth.

Oxford, and 377, Strand, London: J. H. & JAS. PARKER.

LATELY PUBLISHED.

AN INTRODUCTION to the STUDY of GOTHIC ARCHITECTURE. By JOHN HENRY PARKER, F.S.A. Second Edition, Revised and Enlarged, with 170 Illustrations, and a Glossarial Index. Fcap. 8vo. cloth lettered, price 6s.

"The attention which of late years has been given to Gothic Architecture, especially by men who are not professional architects, renders necessary some sure and safe guide to the study of the art. Such a book is that by Mr. Parker, a second edition of which has just made its appearance. The new matter and illustrations, incorporated with the old, combine to make it the most comprehensive and practically useful treatise upon the subject which can be placed in the hands of any one desirous of being taught the principles of Gothic structure. It was written, as the author says, not so much 'for architects as for their employers, the gentry and clergy of England.'"—*Art-Journal*.

In 4 vols. 8vo. with 400 Engravings, and a General Index, price 31. 12s.

SOME ACCOUNT of DOMESTIC ARCHITECTURE in ENGLAND, with numerous Illustrations of Existing Remains from Original Drawings. From WILLIAM L. to Henry VIII. By the late T. HUDSON TURNER, and J. H. PARKER, F.S.A.

"People do not realize the fact that Gothic ever was a prevalent civil style. Mr. Parker's beautiful volumes on English Domestic Architecture show in most opportunely to drive away this error. His book opens to us a vast store of exquisite remains of mediæval civil architecture still existing in our own country, and gives some glimpses of the far richer stores which exist in other lands. The popular ignorance of this subject is truly amazing. Our land is still studded with beautiful fragments of mediæval domestic art; only the difficulty is to make people believe that they are domestic."—*National Review*, January, 1860.

"It is a work of thorough research and first-rate authority on a deeply interesting and important subject."
Saturday Review, Nov. 25, 1860.

OUR ENGLISH HOME: its Early History and Progress. With Notes on the Introduction of Domestic Inventions. Second Edition. Crown 8vo. price 5s.

"It contains the annals of our English civilization, and all about our progress in social and domestic matters, how we came to be the family and people which we are. All this forms a book as interesting as a novel, and our domestic history is written not only with great research, but also with much spirit and liveliness."
Christian Remembrancer.

In 8vo. price 21s. cloth,

ESSAY on the MILITARY ARCHITECTURE of the MIDDLE AGES. Translated from the French of M. Violette-le-Duc, by M. MACDERMOTT, Esq., Architect. With the 151 Original French Engravings.

"We commend the research, philosophical spirit and erudition of the author, who unites these qualities with a rare power of lively and succinct description, which renders the book as delightful as it is profitable to read."—*Athenæum*, March 9, 1861.

HISTORY OF ENGLAND.

3 vols. fcap. 8vo. with Illustrations, cloth, 11s.

Recommended by the Examiners in the School of Modern History at Oxford.

The ANNALS of ENGLAND: an Epitome of English History, from Contemporary Writers, the Rolls of Parliament, and other Public Records.

Vol. I. From the Roman Era to the End of the Plantagenets.
Vol. II. From the Accession of the House of Lancaster to Charles I.
Vol. III. From the Commonwealth to the Death of Queen Anne.

Just published, post 8vo. cloth lettered, price 5s.

IRISH HISTORY and IRISH CHARACTER. By GOLDWIN SMITH.

"A very exhaustive and masterly dissertation on the influences which have shaped the destiny of Ireland... He has succeeded in a remarkable degree in making a political anatomy of Ireland, which throws out gives proof of judgment and skill, and deserves the notice of the thinker and the statesman... We do not hesitate to characterize this essay as a fine specimen of philosophical inquiry, of generous thought and keen observation, and as one of the best examples we know of a pure style of political writing."
Times, Nov. 7, 1861.

"It is, in fact, a masterpiece of historical analysis, of profound and accurate thought, and of ingenious observation, conveyed in language of singular purity and precision. We shall not attempt to review this most remarkable volume, for it is in itself the critical essence of Irish history, and not a word can be subtracted from it without injuring the marvellous effect of the composition. After all that has been said of Ireland, this essay has the freshness of truth, and we do not think we overrate its excellence in placing it among the best specimens of political writing in the language."
Edinburgh Review, Oct. 1861.

Just published, 8vo. cloth, price 5s.

LECTURES on MODERN HISTORY, delivered in Oxford, 1859-61. I. On the Study of History; II. On some Supposed Consequences of the Doctrine of Historical Progress; IV. On the Foundation of the American Colonies; with an Inaugural Lecture. By GOLDWIN SMITH, M.A., Regius Professor of Modern History in the University of Oxford.

Oxford and London: J. H. & JAS. PARKER.

EVANS'S ENGLISH HARMONIUMS for Cottages, Schools, Drawing-Rooms, Churches, Literary and other Public Institutions, are made in every possible variety at Prices from 6 to 140 Guineas. The Manufacturers have to announce the complete success of a New Patent Self-Acting Blowing Machine, the only self-acting blower that has ever succeeded, which may be seen in operation at Holles-street daily.

The most distinguished living Musicians, including Balfe, Sterndale Bennett, Cipriani Potter, Beet, Henry Smart, &c., have testified to the extended and illustrated merits of Evans's Harmoniums. See Testimonials attached to Illustrated Catalogues of Harmoniums, to be had gratis of the Manufacturers, Boosey & Ching, 24, Holles-street, London, W.

EVANS'S ENGLISH MODEL HARMONIUM, with Two Rows of Keys, price 66 Guineas in Oak Case, or 70 Guineas in Rosewood Case, combines every modern improvement. The most beautiful and varied orchestral effects can be produced upon this Instrument, which possesses every gradation of tone from the greatest power to the most delicate Pianissimo. The English Model Harmonium is managed with that facility which characterizes all Evans's Harmoniums, and is equally effective both in the Drawing-room and Church.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

EVANS'S PEDAL HARMONIUMS, with Independent Pedal Reeds, can be had either with a Single or Double Row of Keys, at Prices from 51l. to 130 Guineas. Also, with the New Patent Self-Acting Blowing Machine.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

William Cowper and Mary Unwin.
Marie-Antoinette and the Princesses de Lamballe.
Joseph Addison and Richard Steele.
Magdalen Herbert and Dr. Donne.
Sir Kenneth Digby and Sir Anthony Van Dyck.
Sir Philip Sidney and Sir Fulke Greville.
Samuel Taylor Coleridge and Charles Lamb.
Fénelon and Madame Guyon.
Mrs. Elizabeth Carter and Miss Talbot.
Henry St. John, Lord Bolingbroke, and Alexander Pope.
David Garrick and Mrs. Clive.
Edward Hyde, Earl of Clarendon, and Lucius Cary, Viscount Falkland.
Frances, Countess of Hertford, and Henrietta Louisa, Countess of Pomfret.

"Among the various forms of historical literature, the plan of this work is certainly novel, and it has, no doubt, many advantages. It contains subjects of considerable interest; and the care and talent brought to bear upon the elucidation of facts connected with the lives cannot be spoken of in too high terms of praise."—Observer.

London: James Hogg & Sons.

Dedicated, by permission, to H.R.H. the Prince Consort.
**BELGIAN EPISODES: Historical, Legen-
dary and Contemporary.** By H. G. MOKE, Member of the
Royal Academy of Belgium, Professor at the University and
Athénée Royal of Ghent, Officer of the Order of Leopold; and
ALICE WILMERE, Author of 'Life of Champlain,' Translator of
'Champlain's Voyage to the West Indies and Mexico.' 1 vol.
10s. 6d.

Contents.
The Legend of Godfrey of the Cradle.
Edward the Third in Flanders.
The Youth and Last Days of Van Dyck.
General Van Den Putte: An Episode of the Siege of Brussels.
The Registrar of Boeschem.
The Tribulations of a Louvain Student.
The Jew of Brussels.
The Advocate of Malines.

"M. Moke is a distinguished scholar and Professor of the University of Ghent; and Alice Wilmere has already earned a reputation as the translator of 'Champlain's Voyage,' published by the Hakluyt Society. The joint authorship will therefore give the volume a prestige which its execution will amply sustain. Its contents are based in part upon history, and made up from personal knowledge and investigations, but greater care has been taken to give the whole a truthful and consistent colouring. Of the tales themselves we can only say that they are masterly performances, abounding in accurate delineation of character, and in situations full of interest. They will be read by thousands to whom longer works would prove tedious, and all who read them will feel grateful for the rational pleasure they are richly calculated to afford."—Daily News.

London: James Hogg & Sons.

Grace and Philip Wharton's Works.
Second and Cheap Editions, carefully revised.
In One Volume each, price 9s. with numerous Illustrations,
THE QUEENS of SOCIETY. By GRACE

Illustrations of Social Predicaments, Remarks on the History
and Changes of Fashion, and the Differences of English and Con-
tinental Etiquette. With a Frontispiece. Cloth, rich gilt bind-
ing, 3s. 6d.

London: James Hogg & Sons.

In full music size, elegantly Bound in cloth, price, 21s.
**THE PIANO PRIMER; illustrating the Art
of Pianoforte playing, in a Series of Twenty Conversations
between Teacher and Pupil, and One Hundred Exercises and
Recreations. Intended both for Elementary Instruction and to
aid Governesses and Parents, in utilising to the utmost the
Professor's efforts.** By EDMUND S. DIXON, M.A. The con-
tents include specimens of Devotional, Dramatic, Ball-room, and
Popular Music, besides Studies whose principal aim is to form the
Hand, give a Brilliant Touch, and extend the Technical Know-
ledge of the Art.

London: James Hogg & Sons.

CONSIDERED AS INDEPENDENT
POLITICAL COMMUNITIES.**

By TRAVERS TWISS, D.C.L.,
Regius Professor of Civil Law in the University of Oxford, and
One of Her Majesty's Counsel.

PART I. *On the Right and Duties of Nations in Time of Peace.*

"It is lucid and orderly in the arrangement of its facts, and appears to omit nothing that can throw light upon the practice of nations." *Law Magazine*, Nov.

Oxford: At the UNIVERSITY PRESS.

London: LONGMAN, GREEN, LONGMAN, and ROBERTS.

LIST OF
NEW WORKS.

I.
THE CITY of the SAINTS; and ACROSS the ROCKY MOUNTAINS to CALIFORNIA. By RICHARD E. BURTON, Captain H.M. Indian Army, H.B.M. Consul in West Africa; Author of a 'Pilgrimage to Medina and Mecca,' &c. With 3 Maps on Steel and 18 Illustrations on Wood. 8vo. 18s.

II.
NARRATIVE of the CHINA WAR of 1860; To which is added, the Account of a Short Residence with the Tai-Ping Rebels at Nankin; and a short Voyage from thence to Hankow. By Lieutenant-Colonel G. J. WOLSELEY, 90th Light Infantry, Deputy Assistant Quarter-Master General to the Expeditionary Force. With a Portrait of Lieutenant-General Sir J. Hope Grant, G.C.B. 8vo. 10s. 6d.

III.
SKETCHES of the NATURAL HISTORY of CEYLON: With Narratives and Anecdotes illustrative of the Habits and Instincts of the Mammalia, Birds, Reptiles, Fishes, Insects, &c., including a Monograph of the Elephant, and a Description of the Modes of Capturing and Training it. By Sir J. EMERSON TENNENT, K.C.S. LL.D. &c. With 82 Illustrations on Wood. Post 8vo. 12s. 6d.

IV.
JOHN ROGERS, the Compiler of the First Authorized English Bible; the Pioneer of the English Reformation; and its First Martyr. Embracing a Genealogical Account of his Family, Biographical Sketches of some of his principal Descendants, his own Writings, &c. By JOSEPH LEMUEL CHESTER. With a Portrait and 5 other Illustrations. 8vo. 14s.

V.
THE ALPS; or, Sketches of Life and Nature in the Mountains. By Baron H. Van BERLEPSCH. Translated by the Rev. LESLIE STEPHEN, M.A., Fellow and Tutor of Trinity Hall, Cambridge. With 17 tinted Illustrations, from the Original Designs of Emil Rittmeyer. 8vo. 15s.

VI.
AUTOBIOGRAPHY, LETTERS, and LITERARY REMAINS of Mrs. PIOZZI (THRALE). Edited, with Notes and an Introductory Account of her Life and Writings, by A. HAYWARD, &c. Second Edition, thoroughly revised, with copious Additions; Portrait and Plate. 2 vols. post 8vo. 21s.

VII.
THE ROMANCE of a DULL LIFE. By the Author of 'Morning Clouds' and the 'Afternoon of Life.' Post 8vo. 9s. 6d.

"This is a novel standing after the manner of the latter somewhere between those of authors. Apart from this, Miss Austen and those of Miss Brontë: it has affinities with each of the schools which they represent. The treatment of the central figure is a good deal found in 'Jane Eyre.'" *Saturday Review*.

VIII.
THE ODYSSEY of HOMER, in English Hexameters. By HENRY ALFORD, Dean of Canterbury. Part I. Books I. to XII. Square crown 8vo. 2s. 6d.

IX.
THE ILIAD of HOMER, translated into English Hexameters. By J. HENRY DART, M.A., of Exeter College, Oxford; Author of 'The Exile of St. Helena, Newdigate, 1838.' Square crown 8vo. [In the press.]

X.
THE TALE of the GREAT PERSIAN WAR, from the Histories of Herodotus. By the Rev. GEORGE W. COX, M.A., late Scholar of Trinity Coll., Oxford; Author of 'Tales from Greek Mythology.' With 12 Woodcut Illustrations. Fcap. 8vo. 7s. 6d.

XI.
CATS and FARLIE'S MORAL EM-BLEMS, with Aphorisms, Adages, and Proverbs of all Nations. Illustrated with Sixty large circular Pictures, Sixty Tail-Pieces, and a Frontispiece, composed from Designs found in Cats and Farlie's works by JOHN LEIGHTON, F.S.A., engraved on Wood under his superintendence. The Text translated and edited with Additions by RICHARD PIGOT. Second Edition. In One Volume, Imperial 8vo. price 31s. 6d. in Grolier cloth covers, designed by the Artist; or price 52s. 6d. bound in morocco by Hayday.

London: LONGMAN, GREEN, LONGMAN, and ROBERTS.

MR. BENTLEY'S LIST OF CHRISTMAS PRESENTS.

THE INGOLDSBY LEGENDS; or, Mirth and Marvels. Forty-second Thousand. With all the Illustrations of George Cruikshank and John Leech. 2 vols. 8vo. 18s.

"Abundant in humour, observation, fancy; in extensive knowledge of books and men; in palpable hits of character, exquisite, grave irony, and the most whimsical indulgence of point and epigram: we doubt if even Butler bends the Author of these Legends in the easy drollery of verse. We cannot open a page of the book that is not sparkling with its wit and humour, that is not ringing with its strokes of pleasantry and satire; and by a little gentle thought, a modicum of small reflection, how easy to discover beneath the careless, laughing surface of the Legends the sensible, manly purpose."—*Examiner*.

INGOLDSBY LEGENDS. Popular Edition. Crown 8vo. 6s.

THE AUTOBIOGRAPHY of THOMAS COCHRANE, LORD DUNDONALD. Crown 8vo. Portrait. 5s.

LIBRARY EDITION of LORD DUNDONALD'S AUTOBIOGRAPHY. 2 vols. 8vo. 12s.

SIR EDWARD CREASY'S FIFTEEN DECISIVE BATTLES of the WORLD, from MARATHON to WATERLOO. 8vo. Twelfth Edition, 10s. 6d.

BUCKLAND'S CURIOSITIES of NATURAL HISTORY.

Each Series price 6s.

FIRST SERIES.	SECOND SERIES.
Rats.	Wild Cats.
Fishes.	Eagles.
Monkeys.	Hedgehogs.
Serpents.	Worms.
Frogs.	Dogs.

ANECDOTES of ANIMALS. With Eight spirited Illustrations by Wolff. Small 8vo. 5s.

MARY RUSSELL MITFORD'S SELECTIONS from her FAVOURITE PROSE WRITERS and POETS; together with her LITERARY LIFE. Crown 8vo. Portrait. 5s.

JOHN TIMBS'S ANECDOTES, LIVES.

Each Series, price 6s., can be had separately.

FIRST SERIES.	SECOND SERIES.
Burke.	Sir Joshua Reynolds.
Lord Chatham.	Sir Thomas Lawrence.
	Hogarth.
	Gainsborough.
	Fuseli, &c.

MRS. ELLIS'S MOTHERS of GREAT MEN. Crown 8vo. 5s.

THE BENTLEY BALLADS. An entirely New Edition, containing the Gems of Father Prout, Dr. Maginn, Lover, Longfellow, Albert Smith, Maxwell, The Old Sailor, &c. &c. 5s.

MIGNET'S LIFE of MARY, QUEEN OF SCOTS. Crown 8vo. 2 Portraits. 5s.

GUIZOT'S LIFE of OLIVER CROMWELL. Crown 8vo. 6s.

MISS KAVANAGH'S MADELINE: a Tale of Auvergne. Bound as a Present Book. 4s.

THE REV. C. B. TAYLER'S NOT OF THE WORLD. Bound as a Present Book. 5s.

LAMARTINE'S CELEBRATED CHARACTERS. Crown 8vo. 5s.

Contents.

Nelson.	Oliver Cromwell.
Bossuet.	William Tell.
Milton.	Christopher Columbus.

RICHARD BENTLEY, New Burlington-street,
Publisher in Ordinary to Her Majesty.

HURST & BLACKETT'S NEW WORKS.

13, Great Marlborough-street.

TRAVELS in the HOLY LAND. By FREDRIKA BREMER. Translated by MARY HOWITT. 2 vols. 21s.

FRENCH WOMEN of LETTERS. By JULIA KAVANAGH, Author of 'NATHALIE,' 'ADELE,' &c. 2 vols. 21s.

"Miss Kavanagh has shown taste and feeling in this agreeable book."—*Athenæum*.
"These biographical sketches bring before the mind, in a lively and truthful style, the manners of a period which has passed away, and enable us to form an estimate of the intellectual condition of the age for which Miss Kavanagh's heroes provided literary entertainment. The author gives analyses of the principal works of the ladies whose lives she sketches, and this is no mean part of the value of her book. We need hardly add, that the writing is beautifully correct and expressive. In this work Miss Kavanagh has found a subject worthy of her recognised talents."—*Daily News*.

THE LIFE of J. M. W. TURNER, R.A. From Original Letters and Papers furnished by his Friends and Fellow Academicians. By WALTER THORNBURY. 2 vols. 8vo. with Portraits, &c. 30s.

"Mr. Thornbury may be congratulated on the completion of an arduous task, the difficulties of which, however, have been alleviated by the ready co-operation he has met with on all hands from the friends of the deceased artist, who have only been too glad to place their stores at his disposal. Impressed with the importance of the subject, the author has treated it with reverence and earnestness. Mr. Thornbury has honestly endeavoured to paint Turner truly, regarding him neither with the eyes of an enthusiast nor with those of a cynic. Mr. Thornbury's work must not only be considered as the very best he has written, but as a valuable addition to our artistic biography. To the professional student it will be especially interesting."—*Spectator*.

The LIFE of Admiral Sir CHARLES NAPIER, K.C.B.; with HIS CORRESPONDENCE. From his Private Papers. By Major-General ELERS NAPIER. 2 vols. 8vo. with Portrait and Charts. 30s.

"Sir Charles Napier will undoubtedly rank among the first of our sea worthies. This work brings all the incidents of the Admiral's life together, so as to create a story of great interest, with much that is amusing for the general, and more that is instructive to the professional, reader."—*Athenæum*.

LODGE'S PEERAGE and BARONET-AGE for 1862. Under the special Patronage of HER MAJESTY and H.R.H. THE PRINCE OF CONWY, and corrected throughout by the Nobility. Thirty-first Edition, 1 vol. with the Arms beautifully engraved, handsomely bound, gilt edges. 51s. 6d. [Next week.]

THE OKAVANGO RIVER. A Narrative of Travel, Exploration and Adventure. By CHARLES JOHN ANDERSSON, Author of 'LAKE NGAMI,' &c. with Portrait of the Author and numerous Illustrations. 21s.
"Mr. Andersson's book, from the number of well-told adventures, its rich fund of information, and spirited illustrations, will command a wide circle of readers."—*Athenæum*.

TRAVELS in the REGIONS of the AMOOR, and the Russian Acquisitions on the Confines of India and China. By T. V. ATKINSON, F.R.G.S., F.G.S., Author of 'Oriental and Western Siberia.' Dedicated, by permission, to Her Majesty. Second Edition. With Map and 88 Illustrations, 2s. 2s. bound.

MEMOIRS of QUEEN HORTENSE, MOTHER of NAPOLEON III. Edited by LASCELLES WRAXALL. 2 vols. with Portrait, 21s. [Next week.]

THE NEW NOVELS.

The LAST of the MORTIMERS. By the Author of 'MARGARET MAITLAND,' 'THE HOUSE on the MOOR,' &c. ADAM GRAEME, &c. 3 vols.

"The Last of the Mortimers has given us much pleasure. It is not only good in itself, but is quite as clever in its way as 'Mrs. Margaret Maitland,' and has something stronger in the fibre of its romance. The story is really so interesting, that it would be injurious to tell it, as all novel readers must read it for themselves. It is the most powerful and most interesting novel by this author; and the world will thank her for more tales as good and as amusing."—*Globe*.

"The reader of these volumes will find enough to rivet his attention and to awaken his liveliest sympathy. His feelings will be deeply stirred by the natural pathos and tenderness of the narrative, the interest of which grows more and more intense as it nears its dénouement. We have nowhere met with language more natural and touching than that employed in these volumes to express the various feelings of the narrators."—*Daily News*.

WHITE and BLACK: a Story of the SOUTHERN STATES. 3 vols.

"Uncle Tom's Cabin" excited a profound sensation by its thrilling descriptions of effects of American slavery upon the black race before us is likely to attract much attention by the vivid pictures it draws of the sufferings of the system upon the slaveholders themselves. The tale is founded on facts which are frequently verified by extracts from authoritative documents. It is well that the book comes out at the present crisis. If one-half which it contains be true for only the hundredth part, the malediction of Heaven must rest on the system it illustrates."—*Daily News*.

SIR RICHARD HAMILTON.
"This story deserves a hearty welcome, for it is that pleasant rarity, a novel which evinces talent and taste."—*Post*.

THE CASTLEFORD CASE. By FRANCES BROWNE, Author of 'MY SHARE OF THE WORLD,' Dedicated to the MARQUESS OF LANSDOWNE. 3 vols. 3 vols. [Just ready.]

New Complete, in 21 vols. 4to. and Index,
THE EIGHTH EDITION

OF THE

ENCYCLOPÆDIA BRITANNICA:

A DICTIONARY OF ARTS, SCIENCES
AND GENERAL LITERATURE.

ILLUSTRATED BY UPWARDS OF

5,000 Engravings on Wood and Steel.

The Work may be had in the following Styles of Binding:—

In full cloth Price £25 12 0
In half russias, marbled edges ... 32 2 6

BLACK'S ATLASES.

I.

Black's General Atlas of the World.

A Series of Fifty-six Maps of the Principal Countries of the World, accompanied by an Index of 65,000 Names. Imperial Folio, half morocco, gilt edges, 60s.

"One of the most complete of modern publications in this department."—*Times*.

"An exceedingly valuable Atlas."—*Economist*.

II.

Black's School Atlas of Modern Geography,

Including Physical, Ancient, and Scripture Geography. A Series of Forty Maps. By W. HUGHES, F.R.G.S., and J. BARTHOLOMEW, F.R.G.S. With a Complete Index of Names, exhibiting the Latitude and Longitude of each Place, and a Reference to the Map. Royal 4to. or 8vo. 10s. 6d.

"In comprehensiveness, accuracy, finished execution, judicious adaptation to educational purposes, and moderation of price, this Atlas stands quite alone."—*Athenæum*.

"The best Atlas of Modern Geography that has yet fallen in our way. It is at once a duty and a pleasure to recommend it."—*English Journal of Education*.

III.

Black's Atlas for Beginners.

New Edition. A Series of Twenty-seven Coloured Maps of the Principal Countries in the World. In oblong 12mo. 2s. 6d.

"Deserves a wide circulation. Compared with other Atlases of the same size and price which we have seen, this has decidedly the advantage."—*Athenæum*.

IV.

Black's Atlas of North America.

A Series of 20 Maps by JOHN BARTHOLOMEW, F.R.G.S. Accompanied by Introductory Descriptions and Statistics, and a Complete Index. In Folio, cloth, price 16s., elegantly coloured (Postage, 1s. 4d.).

CONTENTS: 1. North America—2. British America—3 and 4. Canada (2 sheets)—5. New York, Massachusetts, &c.—6. Maine—7. Pennsylvania, &c.—8. Ohio, &c.—9. Michigan, &c.—10. Virginia—11. North and South Carolina—12. Kentucky, &c.—13. Missouri, &c.—14. Georgia, &c.—15. Alabama, &c.—16. Mississippi, &c.—17. Texas, &c.—18. The Western States, California, &c.—19. Central America and West Indies—20. Map showing the Communication between Europe, North America, and the Pacific. And an Extra Map of the United States, showing the Free and Slave States, and Unorganized Territories.

"Complete as an Englishman can need."—*Examiner*.

"The best Atlas of North America extant."—*North American Review*.

LONDON, SATURDAY, DECEMBER 14, 1861.

LITERATURE

Lives of Lord Castlereagh and Sir Charles Stewart, the Second and Third Marquesses of Londonderry: with Annals of Contemporary Events in which They bore a Part. From the Original Papers of the Family. By Sir Archibald Alison, Bart. 3 vols. (Blackwood & Sons.)

WE have seen many deceptive title-pages, but have never met with one so likely to mislead the reader as that which Sir Archibald entitles 'Lives of Lord Castlereagh and Sir Charles Stewart.' A huge book, of two thousand pages, contains a history, such as it is, of the British dominions, of Europe, of the world; and the historical details are so dealt with as to give to the two brothers the appearance of having ruled events, and of having been, above all their contemporaries, the great and beneficent spirits of the momentous period during which they acted. As to "the original papers of the family," which are said to be the source whence the statements are derived, the greater part of such papers have been printed before, and the only really amusing or valuable portion of them is quoted in the notes. Mr. Disraeli describes the other big book of Sir Archibald Alison as written to prove that Providence fights on the side of the Tories. These 'Lives of the Londonderrys' seem to have been compiled to show that Providence is but an agent of the Stewarts. Then the style of the narrative is as little to be commended as the subject. Sir Archibald is still Mr. Wordy. Nor is "wordiness" his only or his greatest literary sin. From the opening to the close, whenever either hero can be dragged in, he is pelted with continual laudation. The commencement is after the Dryasdust manner of Debreit; the conclusion, detailing the objects heaped about the tomb of the third Marquess, is in the most approved fashion of a country showman. The solemn dignity of the beginning is balanced by the pompous caricature of the end; and when this is reached, the reader thankfully gets rid of the wearisome and stupendous exhibition.

That such a book should be marked by blunders and contradictions is to be expected. At the third page the author tells us that "in the month of June 1791, George, first Earl of Waldegrave, one of the scholars at Eton, was drowned in the Thames," and that Charles Stewart perilled his life to save that of his little friend. Now, the first Earl of Waldegrave died an old man, in 1741. The poor lad drowned near Eton was the fifth earl, and he lost his life on the 29th of June, 1794. If that calamity had even occurred, as the author represents, in "June 1791," we do not see how young Stewart could have been there, since we are informed, at page 4, that "he entered the army on 3d April 1791 as ensign in the 108th regiment." In 1794 he was a captain in the same regiment. How these dates and circumstances are to be reconciled we leave to Sir Archibald to determine.

Again, at page 8, the elder brother, Lord Castlereagh, is described as rescuing a boy named Sturrock from drowning in Strangford Lough. "Castlereagh was a very indifferent swimmer, and such was his fortitude and presence of mind that he contrived to keep both himself and the boy" (who could not swim at all) "above water for more than an hour." Sir Archibald (who, in the third volume, increases the time to two hours) refers to a picture and an inscription in the "Temple of the Winds," on Strangford Lough, for corroboration of the

above and other details into which he enters. He is, however, entirely unsupported by the testimony which he cites. The inscription makes no mention whatever of Lord Castlereagh having saved his friend, in the way depicted by the author. It more simply states that they, "sailing on the lake and being overtaken in a thunderstorm, nearly three miles from the shore, floated on the water more than an hour, till they were taken up," &c. They seem to have clung to the boat as long as they were able, and the inscription contains a thanksgiving for the rescue of both. This circumstance is an excellent illustration of the manner in which the author adapts facts to agree with his theory. He converts simple occurrences into deeds of superlative heroism.

This too eager spirit marks and mars the volumes throughout. We are gravely told, that "the new and resolute mode of warfare," by which Napoleon and his Marshals were foiled, was "originally conceived by Lord Castlereagh and Sir Charles Stewart, and afterwards executed by Wellington"! With perversions like the above are intermingled the most absurd contradictions. At page 274, Vol. I., we find that "A very strange offer, as is well known, was made in a circuitous way, and with great caution, by some of the chief officers of Marshal Soult's army, which had penetrated from Corunna to Oporto, to seize their General, throw off their allegiance to the Emperor, make peace with England, and dethrone Napoleon... Soult, wholly ignorant of this conspiracy, was at the same time dreaming of procuring the crown of Portugal for himself, and becoming, like Murat, the monarch of a kingdom dependent upon France!" At page 333, the inactivity of Soult at Oporto is accounted for by his design of "making himself independent, and setting up for himself in the north of Portugal. His design was to carve out for himself a sovereignty separate from either Spain or Portugal." In the treachery implied we can readily believe. The French commanders of Spandau and other fortresses, in 1813, offered to capitulate, for money; but Sir Charles Stewart, whom Prussia expected to furnish the price of infamy from England, declared that the way to triumph was "by force of arms, and not by treachery or gold."

In his anxiety to record the honours conferred on his heroes, Sir Archibald renders them ridiculous. Thus, in 1812, Sir Charles lost his first wife, but "it was some consolation in this bereavement that he shortly after received the honour of a Knight Grand Cross of the Bath from his Sovereign." Sir Archibald evidently thinks it well that the poor lady should have died, for "that melancholy event made a material difference on [sic] his position, and in the end opened the way to a great and auspicious change in his fortunes." By this pretty euphuism, Sir Archibald indicates the advantages brought to the feet of Sir Charles by the death of his first wife (Katherine, daughter of Earl Darnley, and mother of the present Marquis of Londonderry); that circumstance enabled him to marry the only child of Sir Henry Vane Tempest, (mother of the present Earl Vane), who brought in her lap as pretty a dower as bride could bring, namely, the Durham estates of the old Nevilles, Earls of Westmoreland, which were confiscated early in the seventeenth century, and purchased by the Vanes, at that time a Kentish family.

The author is greatest when dealing with Lord Castlereagh. At page 50, for instance, of the third volume, we find the words: "It was Revolution, not Reform, which he combated";

and at page 191 the words: "He resisted reform as long as he lived; but the nation conquered it after his death; but experience has already taught the people its results, and it has refused to advance farther in the same career." We say nothing here about the truth of these assertions. It is of slight importance now to the world whether Lord Castlereagh resisted Reform or only resisted Revolution. Our concern is with Sir Archibald's logic and style. Many good people infer that because he has published big books he must be a great writer, and that because his books are called histories he must be an historian. We ask the careless holder of such an opinion to look at this sentence. It is not more foolish in expression, more feeble in construction, than thousands of other sentences; but having quoted it for another purpose, we may also study it as a specimen of style. Can anybody tell us what it means? "He resisted reform as long as he lived, but the nation conquered it after his death." Then the nation consummated his resistance by a final conquest! Though Sir Archibald says this, he means the precise contrary. No: the nation established reform. "But experience has already taught the people its results." Does *experience* teach *results*? "It has refused to advance." What has refused to advance? Reform or the People? If you say the first, as appears indeed to be Sir Archibald's meaning, will anybody tell us how Reform can have refused to advance? When did it speak out like Balaam's ass? And why should it have refused? And in what career has it refused to advance? Having been "resisted" and "conquered," how can it have had the choice of advancing, or retreating, or of standing still? Since the days of William Laud no writer of any name has made such singular use of the English tongue.

Lord Castlereagh was superior to his younger brother, though we cannot go the length reached by their biographer, when he states of the former that he seemed, on some occasions, to be "inspired by the gift of prophecy," which, of course, Sir Archibald illustrates by circumstances which show how very small the gift was. The family of which they were members, a Scotch family located in Ireland, was poor, but the times were profitable in opportunities for the ambitious and skilful. Castlereagh was a statesman before he entered the Irish Parliament, where undoubtedly he distinguished himself. He alone, when in office, may be said to have carried the Union, by his courage, audacity, dignity, self-possession and conviction of the justness of a cause which, after all, he could render triumphant only by lavish expenditure of money and titles, in return for votes. The old Irish parliaments existed and were suppressed by corruption; but that by which they were extinguished was as nothing compared with that by which they lived and the people perished. Facts prove the value of the measure, and its favourable effects on the prosperity of the country; but it lowered the standing of men who lost influence and wealth by it, and whose descendants seek for its repeal that they may prosper, whatever becomes of the Empire.

In the suppression of the rebellion, as in the establishment of the Union, that end which was least coveted by the so-called patriots was brought about in great measure by the double-dealing of men professedly on the popular side. In the accomplishment of both ends Lord Castlereagh acted a conspicuous part, and when he became a member of the "Imperial Parliament" in England, he was welcomed there as a man who was qualified and destined to rise

to the highest offices in the State. He did not altogether rule the helm, but his hand was on it, with the hands of others, when the ship was beset by such a series of storms as never yet had shaken the nations. The hurricane raged within as well as without, but Lord Castlereagh strove as energetically, and yet coolly, against democracy at home as against enemies abroad. Amidst the worst of the tempest he bore a beaming face. "Prosperity Robinson" himself never exceeded him in the flattering views in which he described the condition of the country, and that "country hardly knew whether to laugh or to cry at the audacity of the Minister who, in the terrible and trying year 1806, declared with a jaunty air—the nation was in so flourishing and satisfactory a state that the Ministers actually were reclining "on a bed of roses!" Thirteen years later, he and Lord Sidmouth were so impressed by a contrary feeling, that they carried the famous Six Acts, whereby the right of traversing in cases of misdemeanor was abolished; a second conviction for libel was punished by transportation; the right of public meeting for the discussion of affairs of Church and State was so impeded as to be rendered unavailable; military training of the people was made impossible, save under the sanction of magistrates; political pamphlets were stamped like newspapers; and domiciliary visits by night, to search for arms, authorized. Lord Castlereagh never recovered the popularity which he had once enjoyed, but had now lost by the passing of these measures, which were not all alike objectionable; and his mind, yielding under the pressure of business, and otherwise grievously agitated, at length gave way, and suicide closed all. At his funeral in Westminster Abbey (1822), Sir Archibald tells us "the feelings of grief were universal and heartfelt," but that "some miscreants mixed with the multitude at the door raised a savage shout, which was *re-echoed through the lofty aisles of the venerable pile.*" We had not thought till now that "heartfelt grief" was thus illustrated.

Sir Charles Stewart (late Marquess of Londonderry) was perhaps as good a soldier as his brother was a statesman, without either of them being so peerless as Sir Archibald makes him. Throughout the long war Sir Charles behaved gallantly, was promoted rapidly, and rewarded munificently. He was a brave and judicious officer, but had not the head for great commands which his biographer would fain fix on his shoulders. As a diplomatist he made no figure. He was inferior to his brother at the Congress of Vienna, where that brother passed for the most distinguished in appearance, for the reason that he was the only member present who wore neither stars nor gold-laced dresses. The Whigs managed to overthrow the nomination of the younger brother to the embassy at St. Petersburg; but he solaced himself by travel, flashed, with his second wife, through several courts, which were dazzled and amused by the appearance of such visitors, addressed himself to literature, to the no small delight of those good men, the critics; aspired to rule the country as Prime Minister,—a fact which we learn from the droll revelations in the Buckingham-Chandos Correspondence—and finally settled down an excellent country gentleman, with an acute perspicacity as to what would greatly profit the county of Durham, and increase his balance at his bankers'; leaving at his death a fortune and example to his sons, the former of which, it is to be hoped, they will enjoy, and the latter of which they will not do ill to follow.

In some respects, the brothers were not

unlike. If the younger tripped in his literary compositions, so did the elder, now and then, in his speeches. Cobbett selected examples from the latter to illustrate, in his 'Grammar,' how the rules of syntax might be violated; and we have all heard of the Castlereagh figures of speech,—of a man "turning his back upon himself" "the ignorant impatience of taxation," and some others which have been preserved, like flies in amber, by the poet Moore. Some of his figures of speech were solecisms, offences against good taste, offences of which the younger brother was not guiltless in his acts; as for instance, when he invited the French Ambassador to dinner, and received him in a gallery decorated by battered French cuirasses collected from Waterloo!

Turning to the text of the book, we must first remark, that it is difficult to give an abstract of a work which, professing to be individual biography, is really a history of the world for the time being. In our extracts, we shall keep the former profession in view, and present one or other of the brothers to our readers, rather than passages from the history of Europe and its heroes. We have spoken of the bribes taken by Irish members to sell or save their country, according to circumstances. A single vote was bought for 5,000*l.*, others by promises of peerages, made by the Lord Lieutenant Cornwallis, and the Secretary Castlereagh:—

"Aware that the measure could never be forced through with the existing Irish Parliament but by influence, and that often of the grossest kind, Lord Castlereagh as well as the Lord Lieutenant had all along warned the English Government that this was the only way in which the desired object could be effected, and they had received repeated pledges to support whatever measures might be deemed necessary, or promises to insure success. In a private verbal conference with Mr. Pitt, Lord Cornwallis had mentioned sixteen peerages or advancements in the peerage, as required to insure the support of the requisite number of influential landholders; and no objection had been stated, nor indeed could any such have been advanced, as fourteen peerages had been conferred on a less important occasion in 1796. No sooner was the bill passed, therefore, than Lord Cornwallis sent to the Duke of Portland a letter, enclosing a list of the peerages, sixteen in number, which he had promised to the supporters of the measure, being all persons of fortune adequate to support this dignity, and whose services entitled them to expect it. But either Mr. Pitt had not communicated to the Duke of Portland what had passed on the subject, or insurmountable difficulties had been experienced in the highest quarter when the list came to be examined, for his Grace returned a cold answer, making difficulties at every step, and declining to recommend one half of the names submitted to his Majesty for approval. The conduct both of Lord Cornwallis and Lord Castlereagh upon this was dignified and decided. They both wrote immediately to the Duke of Portland, saying in respectful but firm language, that if Government was unable to make good the promises they had made on their behalf to their supporters, they could no longer retain office under them. The private letters of both at this crisis breathe a warm and very natural feeling of indignation at such a return being made for the services they had rendered to their country. This spirited conduct had the desired effect."

On going out of office in 1809, the author gives this *résumé* of Lord Castlereagh's achievements at the War Office:—

"He entered upon the direction of the War Office in April 1807, on the verge of the battle of Friedland and Treaty of Tilsit, when the victories of Napoleon had enabled him to array the whole forces of the Continent, with the exception of Sweden, against us, and when our alliance even with Russia, the last and most faithful of our supporters, had been broken by the unhappy

refusal of the Whig Government to render her any, even the most trifling, assistance, during the critical months, when the scales of fortune hung even, which immediately succeeded the battle of Eylau. When removed from office in September 1809, he had succeeded, by his unaided efforts, not only in securing the independence of his country and arresting the torrent of Napoleon's victories, but he had set in motion that chain of events which in their final results produced his decline and fall. He had, by land forces skilfully directed, and by taking proper advantage of the means of descent on decisive points which the command of the sea afforded, wrested from the enemy, during this short period, a hundred sail of the line, and forty frigates, of which a third had been brought as prizes, or to be detained in security, to the British shores. He had deprived the French Emperor of both the wings of the vast naval armament which he was preparing for our destruction, and which it was the principal object of his life to render irresistible. He had planned and fitted out the greatest expedition of land and sea forces which the world had ever seen, and which, if it had been directed in the field with the same skill and vigour with which it had been planned in the Cabinet, would have cut Napoleon's naval centre through the middle, destroyed one-half of his remaining maritime resources, and for ever determined the war in our favour, by reducing to a mere fraction the fleets of the enemy. He had resuscitated the contest on the Continent, brought the British legions to contend on terms of equality with the French on their own element, and fanned a flame in the Peninsula destined never to be extinguished till the Imperial eagles were chased with disgrace beyond the Pyrenees. He had fitted out an army, and appointed a commander, whose exploits had already recalled the days of Crecy and Agincourt. He had established a military system for the defence of the country, based on the local, and gradually ascending through the regular, militia to the line, which amply provided for the national defence, and furnished an inexhaustible stream of recruits to supply the waste of life in the Peninsular campaigns, and left a disposable force of 60,000 to second the efforts of their immortal general. The military system of Prussia and Austria is in great measure founded on this model. By the example which he set in Spain, he had revived the spirit of resistance in Germany, and brought Napoleon to the brink of ruin on the field of Aspern. He had adopted a plan for the defence of Portugal, which, conceived and executed by Wellington, proved the salvation of that country, and in its ultimate results led to the deliverance of Europe. Never was a Minister who, in so short a time, had conferred such benefits on his country, or so quickly raised it from a state of imminent danger to one of comparative security and imperishable glory. What was the return which his countrymen made to him for these inestimable services? Was it that he was crowned with laurel, and honoured with a civic ovation for having saved the State? It was that he was overwhelmed with obloquy, and by a unanimous vote of the Cabinet declared unfit to retain the office of War Minister!"

In 1811 his share in the Orders in Council, after Napoleon had blockaded the world against us, is thus spoken of:—

"It was very natural that the British Government, seeing such extreme measures adopted by the enemy, and the industry of its people so much injured by their effects, should have thought of retaliating in kind, and causing the subjects of the French Emperor to feel in their own persons the evils that the novel and outrageous method of war which he had adopted was causing them to experience. By so doing they might hope either to oblige him to return to the usual system of hostility between belligerent nations; or, if he persevered in it, to excite so widespread and intense a feeling of indignation against his government as might eventually lead to his overthrow. It was with this view that the British Orders in Council were issued, which in effect declared every vessel, with its cargo, good prize on the high seas, bound for any harbour under the French power, which had

not touched at a British harbour. Thus Napoleon confiscated the vessels and their cargo if they had come from England, and the British Government confiscated them if they had not. It was difficult to see how neutral vessels or cargoes could avoid confiscation at the hand of one or other of these powers, or how any trade from foreign parts could by possibility be carried on. In fact, it would have been totally extirpated had not the *licensing system* been introduced, which, in consideration of large sums paid to the belligerent powers, granted licences from both to particular parties, securing them from capture or detention. As Lord Castlereagh was Minister at War, not for Foreign Affairs, at the time when this ruthless system of hostility was introduced, he was not peculiarly responsible for it; but its energetic character entirely coincided with his disposition; and although the Orders in Council were the work of the whole Cabinet, he was too manly not to take his full share of the responsibility connected with their adoption."

It is not to be denied that the foresight and vigour of Lord Castlereagh were exceedingly injurious to Napoleon both by sea and land; but we cannot agree with Sir Archibald that his Lordship was invariably right in all he did, and his opponents as invariably wrong, or that the deliverance of Europe was owing to him and his brother Charles.

Sir Archibald's enthusiasm fairly runs away with him; and remembering his hero's patronage of the Bourbons, and his general foreign policy, he is not afraid to assert that "in the formation of a defensive league by the other Powers [against France], and a return to Lord Castlereagh's policy, that the only lasting security for the peace or independence of Europe is to be found." He loves to make assertions like these so repeatedly that the reader wearies of them. The generalship of Wellington he as often and as tiresomely declares would have been of no value at all but for the courage and policy of Castlereagh. That the latter ever erred, even in his most despotic measures, the excited panegyrist will not for a moment allow. "On all the leading points," he says, "on which Lord Castlereagh was at issue with his times, subsequent events have proved that he was right and they were wrong." What events?—how have they established the proof in question? If the nation had only listened to him in 1816, Sir Archibald further remarks, and had consented to be patient under a continued war taxation, when peace was firmly established and nowhere menaced, if our fathers had only followed his counsel, "the whole National Debt might have been discharged by 1845, and the entire naval and military armaments of the State have been paid for ever out of what now annually goes for the interest of that burden." Eight hundred millions paid off in less than thirty years, and the expenditure of the country kept at the same time in satisfactory order! No, not even M. Fould himself could have cooked a National Account into such a condition of pleasantness as this! We are glad to turn from such silly generalization to obtain a glance of the man at home:—

"A faithful and affectionate husband, he bore with unvarying temper several little caprices of Lady Castlereagh, who was an uncommonly handsome woman, much followed, at the very head of fashion, and perhaps a little spoiled by the admiration she met with. He had not a trace of jealousy in his composition, and surprised the Parisians not a little, when at Paris in 1815, by walking out arm in arm with her in the morning, without either carriage or attendants. On one occasion his indulgence to her whims had nearly cost him his life. Lady Castlereagh had a passion for large mastiffs, and two or three of these formidable inmates were generally in the house. Two of them having

engaged in a furious combat, Lord Castlereagh rushed between them, seized one by each collar, and by a great exertion of strength tore them asunder; but, in doing so, his hands and arms were severely bitten, and he suffered long great pain from these wounds. In his latter years he suffered much from hereditary gout, notwithstanding his abstemious habits; but the pain he underwent, often so productive of ill-humour even in the best tempers, never occasioned irritability in him. In his will he left a legacy to every one of his domestics, down to the lowest helper in the stables; a last act in perfect harmony with the uniform sweetness and benevolence of his disposition. His conduct to all public persons with whom he was connected was marked by the same unselfish feelings and kind forethought. He acted himself on the principle—which he uniformly inculcated on others—that the head of any office was bound to sustain and protect all those under him, when their conduct was not obviously indefensible, and undertake all responsibility where there was any doubt upon the matter. So far did he carry this, that during the latter years of the war, when the currency was depreciated below gold by its excessive issue, he repeatedly remonstrated with the Treasury upon the hardship thereby sustained by our consuls, and other representatives abroad, who were paid in English notes at par. He was constantly met by the objection, however, that no relief could be given, because that would be an admission of the depreciation of the Bank of England notes. In consequence, he desisted, but made up the difference to the severest sufferers from his own resources, which were far from considerable, and as much affected as theirs by the change. His hereditary fortune was by no means large, the estates of the family, though extensive, being burdened with debt; and it required more than his official salary to meet the heavy expenses to which, as Foreign Secretary, he was necessarily put. Unlike many other great statesmen, however, he was not unmindful of his private affairs. He had no personal expenses, except the considerable sums he devoted to charity; his household was well regulated; and his establishment, though very handsome, was not beyond what his income could bear. He had a strong feeling of pride, however, in upholding the dignity of his office in the eyes of foreign diplomats, and his entertainments to them were on a scale of uncommon magnificence, to which the splendid Dresden and Sevres china, presented to him by foreign sovereigns, according to established usage, on the conclusion of the treaties of Paris and Vienna, not a little contributed."

We have said little of the younger brother, the late Marquess of Londonderry, of whom Sir Archibald has, however, much to say. The sum of all the gross eulogy will be found in the following passage, in which, for the first time, we learn that Sir Charles "conquered the French Cuirassiers in single combat"! Caius Marius, who fluttered the Volscians in Corioli, was a fool to him:—

"Sir Charles Stewart's talents as a general were of a very high order. To the daring intrepidity which rendered him a fit leader of a headlong charge, and enabled him to conquer the French Cuirassiers in single combat, he united the still rarer qualities of coolness in direction and vigour in execution on the field of battle. No man saw more clearly where the decisive point in a combat lay, or applied his mind with more vigour to strike at it with his utmost strength; of this, his powerful agency with Bernadotte at Leipsic, already mentioned, his steady participation in the Russian resistance to superior forces at the vital point of Culm, his vigorous attack on the squares at Fère Champenoise, under Lord Cathcart's orders, and sudden and successful charge on the Esla, afford memorable examples. The glorious termination of the war, not a little through his own and his brother's active agency, alone prevented him from rising to the highest commands, and perhaps leaving a name as distinguished in Oriental as it had already become in European fame. The gradual change in the direction of Sir Charles Stewart's talents after he became Marquess of Londonderry,

was not a little owing to the brilliant and fortunate marriage which he had made. His alliance with the beautiful and accomplished daughter and heiress of Sir Harry Vane Tempest, a family of historic fame, and his succession to the title and estates of the Londonderry family in Ireland, opened to him a new career both of honour and usefulness, on which he speedily entered with all the characteristic ardour and energy of his disposition. He in consequence became involved both in Ireland and England in vast and gigantic undertakings, almost transcending the limits of individual enterprise, and requiring an incessant expenditure of capital, time and patience. In the hands of a man of less vigour, determination and mental resources, they would probably have failed; but, aided as he was in carrying them on by the kindred spirit, patriotic ardour and vast resources of the Marchioness, they have all turned out at last eminently prosperous, proved of the highest benefit to his estates and the adjacent country, and left to his family a princely fortune, and noble mansions alike in town and country; as if to demonstrate by a living example that the days when a knight by his good sword carved his way to a kingdom, and won a princess, have not passed away with the manners of chivalry."

Writing like the above, in order to help a good second-rate man to seat himself upon the shoulders of fame, is like the aid which Jupiter tendered to the Hunchback to get him into the saddle,—aid overmuch, which flung the Would-be rider into the mud on the other side. The late Lord Londonderry has been unlucky in finding panegyrist like Sir Archibald. At the inauguration of his statue at Durham recently, Mr. Disraeli insisted on his Lordship's wisdom because of his Lordship's success, as if the incendiary who succeeded in destroying the Temple of Diana was consequently and necessarily a sage and a hero. As for Sir Archibald's "standpoint," that if England would enjoy prosperity and security she must forthwith return to the policy of Lord Castlereagh, we can only suppose that the biographer is ignorant concerning that policy in its fullness. In terrible times it was not ineffective; but times and men have changed, and Sir Archibald Alison might as well declare, because Boards of Health are occasionally troublesome, that it is desirable to bring back the plague, and restore the old medical-police measures which were adopted as a remedy.

Song-Birds, and How to Keep Them. By E. A. Maling. (Smith, Elder & Co.)

It is pleasant, if from nothing but contrast, when the December winds are whistling in the chimneys and the hail is pattering on the window-panes, to take up a little book on Song-birds. 'In-door Plants' belonged to the constantly-increasing library of books published to enable ladies to be their own flower-growers; and this publication is one of the numerous manuals issued to tell them how to keep their Song-birds. The works composing what may be called the Invalid Lady's Library now consist of a goodly number of volumes, treating of subjects of varied interest; and they have several peculiarities. The home is the most important by far of all schools and colleges; and flower-growing, and fish and bird keeping in-doors, may be made the best of all possible ways of beginning the studies of botany and zoology. Viewed as recreations for invalids, they minister to minds diseased by planting subjects of healthy interest in ground often but too full of rooted sorrow. Plants, fish and birds have been cultivated from the most ancient times; and they are now cultivated in a larger and more scientific way than ever they were in the houses of our forefathers. In-door flower-growing, instead

of being confined to growing a few geraniums or fuschias on a window-sill or relays of flowering plants supplied for display by a gardener, is now pursued in many homes as a means of observing the phases of plant life, the transformations of the leaf, and the circle from the seed to the seed. Golden carp are still, indeed, exhibited in glass globes, although this Chinese fish is now naturalized in our ponds; but the fresh and salt water tanks, or aquaria, are fast superseding them, bringing the life of our rivers and shores into the rooms and chambers of our crowded towns. And, what the conservatory and aquarium are doing for botany and zoology, the aviary is doing for ornithology, making the sciences familiar, household and homely things.

The canary has been, at least, three centuries in Europe without being naturalized, or what is now called acclimatized. When canaries escape from cages they are hunted by flocks of sparrows, who would peck them to death if they did not seek a refuge in houses. Sparrows, cats and bird-catchers, and not the climate, prevent their being bred in the woods and copses of Italy and the south of England. It is a singular fact, that this native of the Canary Islands should now be bred in Germany for wholesale exportation to all the world. The best book on chamber birds is written by a German (of course, we mean Bechstein), and the cake most esteemed as food for such birds is called German Paste.

Something of the bird life of the country and the coast, and of cold and hot climes, can be brought into our homes at very little expense. The flower-stand and the aviary, the fern-case and the cage, can gladden with beauty and music the eyes and ears of the prisoners of sick rooms. And, perhaps, the pleasure they afford is rather more suggestive than actual. Like all other musical vibrations, the songs of birds please most by stimulating the imagination. The notes of a cage bird charm by recalling to the mind the ornithological concerts which we have heard in the country, and which had the blue dome for their music-hall. They bring back the summer nights in which we heard the thrills and ecstasies of song issuing from the delicate larynx of the nightingale. They recall the mornings in the country, on which, when lying awake during the coolest hour of the twenty-four, soon after two o'clock, we have heard the cock crow, and the starlings and cuckoos commence their chatterings, intended, if sounds have any significance, to arouse all the sleepers in all the nests of the copse. The blackbird himself chatters and chirps, while flitting from bush to bush, for a quarter of an hour after waking, as if knocking up his neighbours, so that the first songster of the morning is the lark, who

At the first faint gleaming in the dappled east—rises with beating wings up into the blue, and when he has thrilled his mate into sympathy with his raptures, descends upon his nest like a dart which is shot straight down. After the first song of the lark, the rooks are heard cawing. A score of minutes later the thrushes begin singing, and then the swallows must needs be twittering, and, as if to drown their noise, the thrushes and blackbirds vie with each other in charming melodies. The cooing of ring and turtle doves can be discerned about four o'clock, when the cuckoo is calling, the sparrows chirping, and the skilful ear distinguishes the different songs of the spotted fly-catcher, the yellowhammer, the chaffinch, the lesser whitethroat and the wren. Crows, cawings and chirpings being unworthy of the name of song, the lark, thrush and blackbird are really the three chief songsters of a June or July morning in the woodland parts of green Eng-

land. At four o'clock every copse rings with rounds and madrigals, in which the very discords are resolved, and the differences of pitch and time of tunes and voices produce the most delightful although incomprehensible harmonies. As late as eight o'clock in the morning, the nightingales with other warblers (foreigners surpassing all the natives) may be heard in the copses of Sussex during the ten weeks of the song season.

The first use of books on Song-birds, however elementary they may be, is to stay the mischievous practice of destroying them which is prevalent among the unintelligent farmers of Europe. The farmers for many years past have been paying rewards for the slaughter of their friends; for birds are far more useful in keeping down the plague of insects in the spring than they are noxious by eating grains and pecking fruits in the autumn. The French, who kill birds by shooting them even more recklessly than the English, in vain issue ordinances of police annually commanding the destruction of insects; and consequently, it has been truly said their revolutions commence with the insects who cause the dearths, and are continued by the boys who make the insurrections. Nor have the naturalists been wiser than the French and British farmers. The discovery of the secrets of bird-life being the object of the ornithologist, his process hitherto has been to begin by starting off the moment he hears of a rare bird with his gun in his hand to shoot it. Germans, Gauls and Britons, farmers and naturalists, are in this way at the present moment busy all round the globe extirpating beauty and music from the earth and waters. It is painful to read the self-complacent narratives of shooting naturalists who infest the rocks and forests, destroying many living and charming creatures for their skeletons and skins. We submit that, by discovering the nests, by protecting the broods, by learning from the old birds how to rear the young, the interests of science would be far better served than by the barbarous methods in vogue. Never will any man come to know birds except by studying living ones; and, moreover, it is not just that, to fill museums with stuffed skins shamming life, coming generations should be robbed of the pleasures which birds impart to scenery. For instance, the kingfisher or halcyon. Shakspeare and Marlowe use the halcyons as symbols of the people who turn with the wind of fortune,—of rogues who

—turn their halcyon beaks
With every gale and vary of their masters;

stuffed kingfishers having formerly been hung up to cottage ceilings to show how the wind blew. And there are no more beautiful visions to be seen in the midland counties of England than a glimpse of the flashing colours of a halcyon above a clear pool. But few, even of outdoor ornithologists, have seen this vision of beauty; and ordinary observers never see it at all, the exterminating system having made their country by the amount of the beauty of kingfishers less beautiful to them than it was to their forefathers. The aviary, in a word, is the best source of supply for the museum.

But great pleasures may be derived from birds without any stuffing, and without much or very little caging or confining of them. Bishop Stanley tells a story of a nightingale, which, after being reared from the nest and kept in a cage a couple of winters, was allowed to fly about freely in the shrubberies and pleasure-grounds during the song season. This nightingale would always return to be fed out of the hand when called by a known voice. When the migration time came it seemed uneasy for a day or two, but its cage being hung up out of

doors, it would enter it during the cool autumnal evenings, and being carried in-doors, would pass the winter singing sweetly from Christmas until April. Much, we do not as yet know how much, in the habits of birds of what is ascribed to instinct is the result of teaching. Old song-birds teach their tunes to their young by giving them music lessons which are not paid for by the hour. Hawks drill their offspring in hawk-ing. Travellers in virgin forests are astonished at the confidence of birds which have never witnessed the effects of the rifle. A hen house-sparrow, whose broken leg was kindly set by a lady, brought another sparrow to undergo the same operation, and spent the winter nights for years in the apartment in which she received the kind treatment, flying out every morning and returning every evening, except during the breeding season. Rooks, which fly away with cries of alarm if they see a man with a gun approaching them in the fields, are not frightened when they see a man with a gun in a town.

A garden may become an uninclosed aviary; and the aviary is less objectionable than the cage. Birds which have known nothing but kindness are not prone to fear, and they are prone to affection. They fly joyfully to their benefactors. The leisure, the instantaneous sagacity, the ready sympathy, the loving eyes and soft voices of women, peculiarly fit them for the work of bird-taming. And there is nothing mysterious in the art of teaching them tunes. When the ear and larynx are well developed, the instinct or impulse to imitate sounds follows as a matter of course; and it is with feathered as with other singers—many lessons, undivided attention, and much patience and perseverance, are necessary to perfection in a single tune. The teacher who would catch his pupil in the best mood for his lesson, ought to choose the hour appropriate to each species. "There is more to be done," says a successful bird-trainer, "with the lark between two and three o'clock in the morning than during months in the daytime." Hence the importance of noting the hours during which the wild songsters sing of themselves. The song season begins the love season in the woods and sky, and the songster is a lover wooing and winning his bride by his melodies; but the bird-trainers connect their lessons with the business of nutrition, saying, "The whole art of bringing up a bird to sing well depends entirely upon visiting him early, and furnishing him the last thing before you leave him with what he is to eat for the day."

Attaching great importance to the art of bird-keeping, both for adding to our acquaintance with species now unknown, and for increasing our knowledge of species already known, we would not lose an opportunity of insisting upon its importance. But the little book before us is not a valuable contribution to the art. As a compilation, it contains little or nothing which may not be found in better and cheaper compilations. Whatever is worth doing at all is worth doing well; and every lady who keeps a canary in a cage ought to read the books of Bechstein and Kidd—for they have not yet been superseded—to learn how to keep her canary well. As for the author of 'In-door Plants,' she put into her first book some advice which appeared to be derived from her personal experience, but in her 'Song-Birds' she does not even profess to be either a scientific ornithologist or an experienced bird-trainer. All she says is, that she is unwell, has leisure in her sick room, and loves to have birds among her plants; and if these be good reasons for writing a book, they are not equally valid for reading it. There is, moreover, in the book a publicity given to the

addresses of particular tradesmen, whose wares are praised, which would have obtained the attention of a revenue officer if the duty had still continued to be charged upon advertisements.

Life and Adventure in the South Pacific. By a Roving Printer. (New York, Harper Brothers.)

THE chase and capture of the largest of existing animals, though it calls for the highest mental and physical qualities, will never become a fashionable recreation. We shall never want recruits, drawn from the best families, to take the field against the elephant, the lion and the tiger, or to revenge the ravages of wolves and bears, but we shall probably never live to hear of the members of the Yacht Club having a run after these monsters of the deep. The ground on which whales cruise will remain, as heretofore, a well-guarded preserve, in which none save the hardiest and most daring of sea-faring men will venture. If the whale could be slain and made useful in the same simple manner as most other animals, the most adventurous of all sports would no longer be restricted to a single class; but the act of cutting up the animal and extracting the oil is a task which even those who are most highly interested in the result consider a disagreeable one—the dark side of a whaler's life. Yet, for a man of an adventurous turn of mind, it is impossible to read a whaling voyage without entering into the spirit of the chase. We are no longer in the field, the jungle or the forest, man's natural element, where, in case of accident, assistance of some kind or other may generally be procured, but often thousands of miles from any habitable land, or, perchance, amongst those innumerable islands of the South Pacific whose inhabitants are supplicating their gods for wrecks, and bodies for cannibal feasts. Towards the Poles new elements of danger are encountered. Huge icebergs are drifting towards warmer latitudes, and become formidable obstacles when the vessels, tossed about by violent gales, are endeavouring to keep their course, whilst the short summer and the sudden setting-in of winter are a never-failing source of anxiety for those who, in eager pursuit after booty, have ventured within that magic circle which in charts is still left a blank, and the real nature of which is a matter of speculation to our geographers. Men who have boldly embraced such a life must have many hair-breadth escapes, and meet with many strange adventures. It could scarcely be otherwise. All the elements are given; the plot is laid, the train fired. We have ample records of such a life, from our own times down to those days when voyages were told in that quaint old style which never fails to raise a smile on the face of the modern reader. But amongst them is much of a fictitious nature. Where so few means exist for checking the travellers' tales, we have been obliged to listen to a great deal which we have no wish to believe, and yet cannot contradict. A plain unvarnished account of a whaling voyage is still acceptable; and the present unpretending volume, written, it would seem, by two sailors who spent five years in these fisheries, will therefore be read with interest. It is just the sort of book that would meet with ready purchasers in seaport towns, and may be regarded as the type of a class almost exclusively sold in places visited by traders in the Pacific, and supplied almost entirely from American sources. For that reason, we rejoice to find the book so full of sound sense, so bold in exposing the deception and frauds practised on poor sailors, so

replete with good feeling; and we fully pardon the often more than homely language, the small wit, the execrable puns, and, above all, the rude woodcuts—wild exaggerations which have done duty before, and most of which we well remember in connexion with the stories about the great sea-serpent, that monster on whose existence many an honest sailor is willing to risk his reputation.

From the commencement of the voyage to its close, men are stationed at each masthead on the look-out for whales. But many hours, days, weeks, aye months, often pass without the monotony of the scene being broken by the appearance of the objects so eagerly sought for. All hands,—for all have a pecuniary interest in the success of the voyage,—begin to be dispirited, talk of ill-luck, and seriously discuss the probability of a Jonah on board, when suddenly the shout "There she blows" is heard from the masthead:—

"It is impossible to describe the excitement that now prevails. All are anxious to obtain a glimpse, many for the first time, of the monster. The lethargy produced by the hitherto monotonous voyage is now shaken off, and one and all partake of the excitement. All is bustle and animation; some are at masthead, some are in the rigging, and others flying around, getting the boats in perfect order, and ready to be lowered at a moment's notice. If the whale is to the leeward of the ship, she is kept in that direction; if to windward, the boats are sent in chase, which often proves to be an arduous task. In this instance the whale was to the leeward. When we were within proper distance, the captain coming down, called out, 'Haul aback the main-ropes; lower away the boats,' and the respective crews follow them down. In a moment more they are pulling for the whale. From hour to hour, and often from sunrise to sunset, do these hardy men toil at the oar, enduring suffering and fatigue, almost unnoticed under the eager excitement of the chase to be the head boat, or the 'first boat fast'; and this under a scorching tropical sun. The waist boat draws near the whale, and all is excitement; the officer crying out, 'Pull, men, *do* pull; now, my hearties, give way; oh! men, *do* pull; I'll give you any thing I've got, only put me alongside that whale; there he blows; only three seas off,' &c. The boat is close to him; it draws nearer and nearer; the officer orders the boat-steerer to 'stand up'; he rises in his place and lifts the fatal weapon; and, when the boat is close enough, the order is given, 'Give it to him; give it to him, I tell you.' The boat-steerer darts and misses him, and the whale is 'gallied' or frightened, and takes French leave. Thus ended our first chase after a whale, as did many more during the voyage, and after having pulled nearly all day, they returned to the ship, all hands disappointed, but the captain cheering us with 'better luck next time.'

A keen eye readily detects the difference between the spouting of a Right Whale and a Sperm Whale, that of the one taking an angle of about 45 degrees, whilst that of the other assumes a perpendicular direction. Hence, the first announcement of "Sperm Whales" will mostly prove correct, and put all on board in commotion:—

"'Lower away the boats!' shouts the captain, as he descends to the deck. They are instantly lowered, followed by the crews, and now comes the tug of war. Each boat sets her sail, and the men pull in good earnest. While they are skimming the waves the whale is still spouting, and all are anxious to reach him before his 'spoutings are out.' It frequently happens, when in pursuit, that, just at the moment the boat-steerer 'stands up' to strike the whale, he suddenly descends; but experienced whalers can generally tell the direction they take while down by the position of the 'flukes' when going down. The boats are then pulled in the direction the whale is supposed to have taken. They also judge of the distance the whale will go under water by the velocity of the animal when last seen. After the boats have pulled what is judged

to be the proper distance, they 'heave up,' or cease pulling. A large whale, when not 'gallied,' or frightened, generally spouts from sixty to seventy times before going down, and remains down from fifty to seventy minutes. The boats have now got close on. Those left on board the ship are watching with breathless anxiety, occasionally exclaiming, 'Oh pull, boys! *do* pull!' Meantime the men in the boats are bending back to it, but the bow boat has the advantage; she is the head boat. Mr. K. is jumping up and down in the stern, crying, 'Once more, my hearties; give it to her! a few more strokes, and we have him; pull, my children; why don't you break your backbones, you rascals! so there you are now; that's the stroke for a thousand pounds; start her, but keep cool; cucumbers is the word; easy, easy; only start her! Why don't you snap your oars, you rascals! bite something, you dogs! easy now, but pull; oh, you're all asleep; stop snoring, and pull; pull, will ye? pull, can't ye? pull, won't ye? pull, and start your eyes out! that's it; now you start her.' Thus, one moment coaxing and the next scolding; but no one heeds him, as all are bent on taking the whale. 'Stand up!' shouted he; and the boat-steerer rose to his feet, grasped his iron, and, as the boat neared the monster, 'Give it to him!' is the next cry, and 'chuck to the socket' went the first iron, followed as quick as thought by the second. ONE DEAFENING CREEE, and the cry resounded over the waters, 'We are fast! we are fast!' The sea, which but a moment before lay still and quiet, with scarcely a ripple to break its even surface, is now lashed into foam by the writhings of the whale. 'Stern all!' shouts the officer. The boat is immediately backed, and removed from present danger; the officer takes the head of the boat, and the boat-steerer takes the steering oar to manage the boat; the whale is sounding, and the line is running through the 'chocks,' or groove in the head of the boat, with the rapidity of lightning, and as it passes round the loggerhead it ignites from the heat produced by friction, but the tub-oarsman is continually dashing water upon it in the line-tub. The whale sounds deep, and the line is almost out; a signal is made to the other boats, which are coming down. They come near enough, and bend on their lines; but presently it ceases running out and slackens; the whale is coming to the surface again. All hands now commence to 'haul in line' as fast as he rises, and the boat-steerer coils it away, as fast as hauled in, in the stern sheets. He soon breaks water, and the boat is gradually hauled up to him. Another boat now fastens, and he again attempts to sound; but, being weakened by loss of blood, he is soon at the surface again. The boats now draw alongside, and the officer of the first boat fast prepares his lance. He darts it for his vitals (just behind his fin), and the first one proves fatal, for in a moment more he shows the 'red flag'; the blood flows freely from the spout-hole in a thick, dark stream; the sea is stained for some distance, and the men in the boats are covered with the bloody spray, but glory in it. The monster now attempts to sound, but is obliged to keep to the surface, and he soon goes in what is technically termed by whalers his 'flurry,' but what landmen would call his dying agonies—and terrible they are. The sea is beaten into a perfect foam by his writhings and contortions; and, after a short time, as if with accelerated strength, he starts off with lightning speed, describing in his course circles, each growing smaller than the preceding one, and his speed slackening, until he finally gives one monster throes and dies, rolling fin out, with his head to the sun. The battle is now ended, and the 'huge leviathan lies a victim to the superior power and mind of man.' Now that life is extinct, a hole is cut in his head, the line made fast, and all the boats 'hook on' and tow him to the ship, where he is made fast by means of a fluke-chain being passed around his tail, which chain is brought to the forward part of the ship, and passed through a 'hawse-hole,' and made fast to the 'bowsprit bits,' bringing the whale with his head pointing aft, and in a proper position to commence the operation of 'cutting in.'

We will not follow our author through the various processes of cutting in, peeling the

whale, as one would an apple, by turning the body round and round till all the "blanket pieces" have been hoisted in. Nor can we be expected to peep into the blubber-room, or show ourselves on deck whilst the "trying out" process commences, and for which the whale has to supply the fuel for boiling its own body,—almost as poetical, but not quite so elegant, as the sepia furnishing materials for the painting of its own image. But we readily accompany them in their cruise amongst the innumerable islands scattered over the broad Pacific as the stars are over the firmament.

Our authors were attached to a vessel belonging to New Bedford, Mass., the principal whaling port of the United States. Sailing round Cape Horn and touching on the coast of Chili and Peru, they made for the Marquesas Islands; where a chief boarded them, with recommendations from captains; amongst them one recommending every white man to "beware of the fellow, he is dishonest and a villain: do not allow him to persuade you to go ashore with him." Consequently, no one landed, and the voyage was continued by way of Tahiti to the Rorotonga or Hervey group. Here our authors, like everybody else who has visited these islands, were shocked by the petty tyrannies exercised. "If a native fails to attend church on Sundays, he is fined one dollar; if he smokes, the same penalty is enforced." "Such things as these," continue our authors, tend more to cause feelings of hatred against the missionary and his work than of love." "Quite a number of natives came on board, wishing to go to sea with us." In fact, they are leaving in shoals; and turn where you will in the South Seas you find Rorotonga men, who all tell the same story, that they cannot bear the petty vexations to which they are constantly subject. Indeed, all we have heard and read tends to bear out the assertion of the book, that "we are glad to be able to say that this missionary station is an exception; that at no other one that we visited during our wanderings were the natives so tyrannized over as they were here." There is a fine for many things which we in England might look upon as perfectly harmless, and which would not be punished by the laws of our own country. We are therefore the more sorry to find our own countrymen making themselves the instruments of a petty persecution modelled on the narrowest puritanical principles, instead of relying simply upon the effects of their sacred teachings. We are convinced such a system must sooner or later break down, as it has already done in the Sandwich Islands and partly in Tonga. People who are fond of smoking will smoke, whatever the penalty; and a young man bent upon giving a pretty girl a kiss will carry out his wish, let it cost ever so many dollars. No system of *espionnage* such as now established in Rorotonga can ever make the people anything save a set of hypocrites, who will skilfully circumvent those who are not inclined to allow sufficient scope for the play of human nature.

From Rorotonga their course was bent northward, and the King Mill Group, the Ladrone Islands and the Caroline Archipelago were visited for wood, water and provisions. Our authors have many scenes of violence to relate. Now it is the treachery of the natives, now the aggression of the foreigners, that provide the tragic element of the story. Many of the South Pacific Islands, including the New Hebrides, some parts of the Fijis, New Caledonia, and several groups visited by our authors, are still addicted to cannibalism, which, as might be expected, assumes its most violent form in the smallest islands, where provisions are scarce, and the

arrival of any new-comer is felt as a general calamity. Many of these islands are still marked in our charts as dangerous; and woe to those poor fellows who suffer shipwreck in such a neighbourhood! In many—or rather most—of the larger islands a few white men have taken up their abode, who in some instances may be respectable shipwrecked sailors, but in the generality of cases are runaway convicts from the Australian colonies, or other outcasts of society. Our Government vessel have from time to time rendered good service by ridding the islands of this pest, and restoring them to those spots where they had been previously sent for their country's good. Our authors had frequently occasion to see the mischief caused by the "beach-combers," as these outcasts are called.

An unpleasant affair happened to our authors' vessel at Strong's Island, which, from its fine, snug harbour, and some extensive stone buildings, is supposed to have been in former times the seat of Malay or other pirates. The natives of the island received our visitors with kindness and hospitality, and the King endeavoured to make them comfortable; but his son, Canker, seems to have been a great villain, who administered some acute poison to one of the crew; and at a subsequent visit, when this murder was brought home to him, he attempted to despatch the whole ship's company, by sending them a present of "greens," the poisonous nature of which was accidentally discovered by a portion of them being served up to the King—placing the old man in the painful position of Brutus when struggling between parental love and public duty. Notwithstanding all these drawbacks, our sailors left Strong's Island with a heavy heart, and a blessing to its good-natured inhabitants.

Amongst these and similar scenes, and an eager chase after sperm-whales in the Japanese seas, occasionally enlivened by heavy gales, or friendly chats with vessels bent on a similar errand, the time passed away, until at last—

"The captain had informed us that, 'just as soon as we got one hundred and fifty barrels more, we could sing "Homeward Bound." No one was dull now at masthead; all eyes were open; and the mastheads were double manned with volunteers every day. Not long was it to be before our wishes were gratified. On the morning of Friday, September 2, at about 8 o'clock, the old cry—never before so welcome, 'T-h-e-r-e s-h-e b-l-o-w-s!' broke forth. The excitement that ensued beggars description. The day was beautiful; the whales were to leeward; and a nice breeze was sending us slowly through the water. Every circumstance was in our favour. The men knew the conditions of our being able to soon point our ship's head homeward. We were now nearly four years from home. Many of us had heard no word—not even a word—from the dear friends we left behind. Every man looked 'whale' as he stepped into the boat, and our young fourth mate—a boy in years, but a man in soul—said to his crew as he left the ship, 'Boys, you need not expect to put foot upon the Emily's decks again till we have drawn the claret from one of those fellows.' And they did not. In less than two hours after lowering, two more of the leviathans of the deep had ceased to live. They were brought alongside and secured. The captain now called all hands aft, and complimented them upon the day's success, proposed three cheers, which were given, and which made the old ship ring again: 'And now,' said he, 'let us have their jackets in on deck as soon as possible.'"

The ship was now pointed towards the Sandwich Islands, the head-quarters of all the whalers in the Pacific; whence, after a short stay amongst that lovely group, and another call at Rorotonga, the voyage was brought to a successful conclusion.

There are a few curious instances given of

the great migration of whales—a subject engaging the attention of scientific men. Whales wounded by ships in the Pacific have again been found in the Atlantic, perhaps after years, and with the harpoon buried in their sides; whilst others, escaped from the Arctic seas, fell a prey in the Antarctic. A voyage of nearly the whole length of our globe could not avert their fate.

Engravings from Original Compositions, executed in Marble, at Rome, by John Gibson, R.A. Drawn by P. Gulielmi, and engraved, under the direction of Lewis Gruner, by Th. Langer, O. Ufer and Siedentopf. (Colnaghi.)

We have here the materials for obtaining an answer, so far as the works of one sculptor can afford them, to the question of how much it is worth while to follow the traditions of Art, rather than her spirit. Mr. Gibson's name and the charm of his execution bribe the many into applause. No one with a feeling for accepted beauty can look through this volume of sanctioned and careful engravings from his choicest productions, and not be struck with the wealth of conventional grace and workmanship they evince. Canova himself had hardly a more thorough collection of gods and goddesses, nymphs, Narcissuses, shepherds awake and sleeping, Cupids, Amazons, Horæ, &c.; nor did Canova strive more earnestly to revive the bodies of Greek and Roman Art than Mr. Gibson has done.

How is it, then, that we turn from the result of this long life's labour with a feeling of dissatisfaction? The problem is worthy of our study. It has been said, and said truly, that only the "fond, believing spirit" will give that faith which can produce a great effect upon the spectator's mind when contemplating a work of Art. The antique woods are empty of all gods to us; neither do we ever dream of seeing Narcissus with pale face, nor eager Echo bending to her shell. Our aspirations are of another and a more matter-of-fact, as well as a nobler and more soul-enthralling elevation. For a revived Greek or Roman statue, wrought in these days, to win our approving judgment, it must be in some perfect form of abstract grace, such as shall carry judgment away captive, nathless our reason, our education, and our feelings of present life. Given this abstract perfection, and doubtless we shall love a modern statue, *quasi* Greek or not, just as much as we love the Milo Venus or the down-looking Psyche. Amongst the range of modern sculptured Art we have found none such; not, we conceive, through the failure of the artist's technical power, but simply from the fact that he does not believe in the creatures he embodies in marble: his mental life is not in amongst them as that of the old Greeks was, and therefore how can he come out of them, and show them to us transmuted into stone? Does, let us ask, any thoughtful man, now-a-days, feel a thorough interest in Narcissus? Will it do any good to revive the belief in such? Shall we, to put the question simply, be able successfully to make-believe, even, that we believe in such pretty abstractions? Our conviction is, that the present and long-continued degradation of the sculptor's art is mainly due to the fact, that for ages its professors have gone on attempting to revive a thing that was divine two thousand years ago, but out of which all the life of faith has gone and fled; and so the effort to *seem* to believe and to revive the mute, soulless thing has re-acted, as all shams re-act, upon the sculptor and upon his art. Playing at belief, surely he will play at composing, modelling, carving, &c. Painting, the sister Art, has got

a life renewed to her, because she has given herself to that which is true and vital to us all—nature; of the world and man, and man's doings and hopes and fears; but with which of these is Narcissus, Cupid, Proserpine, associated? If such modern revivals of the Greek Art's time of faith were put before us as perfect, or even as *thorough* as the true Greek works were, then our admiration would certainly follow; but he will be indeed a bold admirer of modern antiques who quotes any of them as such.

It is very sad to look through a gallery of modern antiques and see how the ancient laurel has withered; nothing shows this more than the poverty of invention that seems ever attendant upon the attempt at revival. Take the book before us, for example, as it is offered for judgment, and let us think for a moment how very vague and dim the presentation of the idea of Justice must have been to the mind's eye of the designer, who could show her in no more novel fashion than with the sword and balance, a stalwart hair-banded figure, in Greekish drapery! Something more original than the sheathed sword should have marked a vivid presentment of Clemency. If we turn to Bacchus and see a steady, rather dull-looking youth, with a pine-cone and a cup in his hands, it amazes us how out of that burning Greek idea of vivid youth and bloom no more vital, ardent fancy was aroused in the designer's mind than this naked lad with the eternal stump, the sandals and the ivy-crown, "still as a statue." Was Paris, eager, fickle Paris, like the calm youth who gracefully poises the apple in his hand? could the three Goddesses not move him even to stoop forward with opened eyes? Did he coolly prop himself on one leg against the stump, so inert and characterless, that take the Phrygian cap from his head and you might call him by what name you please? Take the Pandora, and see how mute and lifeless she looks, with her set drapery poised about her hips, balanced on one leg, and the other set behind after the antique fashion. Surely there is nothing in this statue but the box to tell us this is the fair bringer of evil, Jove's evil-bearing gift. Surely he did not send her to chill men with her stillness, her dumb unmeaningness. There must have been some vitality of entrancing, weird, arch, gay wickedness about her to allure, or else she was pre-*se*gnal and awe-struck at the function she had to do. In neither character does Mr. Gibson present her.

History of the Greek Revolution. By George Finlay, LL.D. 2 vols. (Blackwood & Sons.)

AFTER such historians of the Greek Revolution as Tricoupi and Gordon, not to speak of Phrantzes and Speliades, it required some courage and a tolerable share of talent to enter the lists as a competitor in this chosen walk. Yet this Dr. Finlay has done; and the results are every way honourable to his abilities and to his feelings. The name of the author is a sufficient guarantee for accurate and important information. He has spent the better part of his life in the country and among the people; and no one is better entitled to be heard respecting the national character and national manners of Greece. Besides, much of his time has been occupied with Grecian affairs, and with important parts of history, bearing either directly or indirectly on the country. To go no further back, he served as a volunteer, both under the gallant and generous Capt. Hastings and under the best historian which the Greek Revolution has hitherto known, General Gordon, in 1827. He witnessed with his own

eyes much that he has recorded, and he has subjected to a sifting, which is rather the exception than the rule among historians, every source of information to which he has had occasion to appeal. The language of the country appears to have become more familiar to him than his own, and, like nearly all men eminent for their knowledge of human speech, he seems to have lost some of the uses of his mother-tongue. The story which he has to tell is as full of picturesqueness as if it had been specially created for the purpose of being luminously told. It flows on more remarkably than any romance, because we know and feel that the narrative is real and that the events described in it actually took place. There is wild passion, unheard-of daring, the most surprising adventure, in abundance, but there is very little of that calm, sober judiciousness in which this writer delights, and of which he gives us specimens when we are panting for a more adequate and engaging style. There is no doubt that Thucydides and Tacitus dealt very little in ornamentation; and those writers seem to have been the models which Dr. Finlay has set before him; but there is this immense difference between those ancient worthies and their modern imitator, that passion and judgment are the substratum of their style, whereas judgment alone seems to have guided the pen of Dr. Finlay. The consequence is, that we have here one of the most clear-headed, solid, sensible books in the language; but one is always provoked when the sketch naturally demands greater breadth of handling and more scope of treatment, to find the writer not rising with his subject, and witnessing the most tragical situations in human life comparatively unmoved. The author is as accurate in matters of detail as an antiquary; and his history is one of those books which a man might safely risk his accuracy of selection in quoting. The candour and honesty of the author are remarkable; and these qualities, we cannot help observing, must spring from great native excellence and worth of character. He cannot write well, and yet he has given us a much rarer thing than a well-written history,—one, namely, which to the last fibre of it bears the character of genuineness and truth. The book possesses besides a sort of dry humour at times which is agreeable, and of which we think he might have made more extensive use in lighting up his narrative than he has done. Perhaps he feared the "dignity of history" would not admit of it; and hence it usually flows over from the main channel of the story, and is to be gathered up from stray lodgements which it has effected for itself in notes and other out-of-the-way corners. Thus, Asimakis Zaimes, or Kyr Asimakis, as his countrymen called him, a remarkably reticent prime of Kalavryta, carried his silence so far as often to remain whole hours in society smoking his pipe and not uttering a single word. Dr. Finlay suggests a similarity between this venerable ecclesiastic and the Laird of Dumbiedykes, whom the Duke of Argyll had seen twice tipsy and only heard speak once.

Lord Byron, who turns up pretty frequently previous to the glorious fall of Missolonghi, and whom Dr. Finlay waxes quite eloquent and even poetical in describing, used to speak of an evening passed in the company of Andreas Londos, a young ecclesiastic of great ability, but very debauched, in a spirit which was not unworthy of the author of 'Don Juan.' After supper Londos, who had the face and figure of a gorilla, sprang upon a rickety table and sang lustily through his nose Rhiga's Hymn to Liberty. A Mussulman told a *cadi* who was

passing, "It is only the young primate Londos, who is drunk, and is singing hymns to the new panaghia of the Greeks, whom they call Eleftheria."

One great cause of the want of success of the Turkish rule in Greece was, the entire want of a judicial system of administration. When a Turk, in the execution of justice, chanced to cut the wrong man's head off, an accident that occurred much too frequently for the Greeks to like it, the Ottomans consoled themselves with the comforting reflection that it could not be helped. The Greeks, besides, had witnessed the effects of the French Revolution; they admired the Parisian clubs; and as talking is said to be a staple article in those institutions, the Greeks, who like to display their flexible vocables, got into a rage for clubs and societies. First, they established the Philomouse Society, a professedly literary gathering, but at which matters other than literary are said to have engaged the attention of the members. Another society, and a secret one, too, followed close upon the rear of the Philomousian. This was the *Philiké Hetairia*, which was begun in 1814 at Odessa, a professedly political one, and whose influence extended ere long over all Europe. Dr. Finlay, who is no friend to it, asserts, and perhaps with truth, that its original members were bankrupt merchants and intriguing adventurers. Be it what it might, it soon was rich, by the wealth of its individual members, and by the large number of rich contributions which flowed into it. It was said to be secretly in the pay and under the guidance of Russia, and the Czar, as much as the Greek, was the object of the solicitations of its original apostles. They went about as industriously, undermining the influence of the Mussulmans in Europe, as if they had been the emissaries of a new religion or a new species of moral truth. The schemes of the Hetairists were at first wild and visionary. Constantinople was to be burned, and the Sicilian vespers were to be wiped out by a general massacre of the Turks; the towns along the Danube and the shores of the Archipelago were to have no better fate. Ali Pasha got wind of this, and he gave notice of it to the Porte, who summarily executed one or two of the Hetairists, and inaugurated a new policy of cruelty and hardship towards the Greeks.

In 1820 the Hetairists saw and felt that they did not enjoy the confidence of the Greek people. The ablest, as well as the most honest men, in the country did not patronize them, disapproving, as they no doubt did, of the language and doctrines preached by their apostles. One man was required who should unite the interests both of the country and of this secret though powerful association, who would bring Greece through the storm which was obviously brewing, and which this very society had been instrumental in raising. That man was Count John Capodistrias. But he declined the honour. Then they offered this dignity to Prince Alexander Hyspantes, a man of inordinate vanity and boundless ambition, who had been brought up in courts and in camps, and who had had the misfortune to lose his right arm at Culm. As a Greek, he was patriotic, but he always dreamt of a throne. He could not read men's characters, and silly fellows encroached upon him; he had no personal reverence for truth, and worthless adulators were consequently preferred to honest men. Though loud in words, he was weak in action; and his falsehood and deception neither gained the confidence of his chiefs nor won the favour of the soldiery.

On the 6th of March, 1821, he crossed the Pruth with a mere handful of men, under the

firm belief that Wallachia and Moldavia would see it to be their duty to submit to him; and failing that, could he not rely on the Czar, at whose court he had spent so many gay years, who would not fail to bestow upon him a Danubian principality, or, perchance, even a throne in Greece! The Hetairists were up and ready for action, but Hyspantes was asleep. An energetic Ionian, named Karavia, struck the first blow in behalf of Greece, and it was a terrible one. He actually murdered the merchants, soldiers and sailors of Galatz, the principal port of Moldavia. The Turks were furious, and no wonder. The feeble Hyspantes idled away his time in the most foolish manner, until at length Alexander of Russia disowned the revolution and its principal instigator and dismissed him from the Russian service. The Battle of Dragshau was fought and lost, and the Commander of the Greeks who doubtless retired by his "sacred staircase," an entrance to his abode which his minions were alone permitted to approach, and was never more seen or heard of in Greece. He took refuge in Austria, where he was kept a prisoner of war till the year before his death, which occurred at Vienna in 1828. Dr. Finlay, who has obviously no love for him, brands him as "a contemptible leader and a worthless man."

The deeds of personal heroism and devotion displayed on numerous occasions by both laymen and ecclesiastics remove the scene about which we write to the old, glorious days of Grecian liberty and of Grecian valour. There was nothing more devoted among all the ancients than the conduct of Georgaki of Olympus, who allowed himself to be burnt up in the belfry of the Monastery of Seko rather than submit to the Mussulman.

The seat of the contest is now transferred to the Morea, where the war is to rage for many years to come, and where a foreign arm must assuage it, if it is to cease at all. Years back many of the higher clergy and influential men there had been initiated into the secrets of the Hetairists; and as this association is still in its prime, great things may yet be expected of it. Petrobey, a man of restless ambition, but a vigorous soldier, now got the command of the Grecian army, if a band of irregulars can be honoured with such a name. Surprising activity and slothful self-indulgence were the two poles around which his nature gravitated. He did not remain long inactive. His 2,000 Greeks laid siege to Kalamata, and took it. After giving the most solemn assurances to the Turks that the lives of their prisoners would be protected, these prisoners were dispersed among their captors, and in three months' time they had all been slain, or, to adopt the euphonious proverb of the country, "the moon had devoured them" all. The Greeks made a prodigious work over this victory. *Te Deum* was sung next morning by young and old with unheard-of fervour, patriotic tears were shed by rude warriors, and ruthless brigands sobbed like children. To a Greek in those days the Devil and the Turk were synonymous terms, except that the former was figured to the Greek imagination as possessing an inherent right to the gift of existence, which he denied altogether to the latter. The Mussulman population were attacked and exterminated in every part of the peninsula, and Dr. Finlay calculates that from 10,000 to 15,000 Turks perished in cold blood during these raids. Slavery, as Homer says, robs man of half his humanity; and now that the slaves were up, they were resolved to have the mastery at whatever cost. The sack of Kydonies by the Turks, the policy and conduct of Sultan Mahmud the Second, the taking of

Tripolitza and the establishment of Greece as an independent state, the presidency of Mavrocordatos, and the alternate successes of the Greeks and of the Turks, we have no time to enter upon.

We hasten to describe the great siege of Missolonghi. Reshid Pasha, the most vigorous of all the officers of the Porte, brought a horde of men and sat down before Missolonghi, in Western Greece, for the purposes of compelling the handful of Greeks in the citadel to succumb. But he little knew the spirit that burned in the breasts of its defenders. He attempted again and again to take the place, but his forces were always constrained to retire much the worse for the assault. At last Ibrahim, the Egyptian, wishing to prove his valour, came and pitched his camp before the town in the depth of the winter of 1826, resolved to demonstrate the superiority of Egyptian skill and of Egyptian batteries. No man in the world, it may be safely said, can beat a Greek in a hand-to-hand fight with sword and bayonet; and after Ibrahim had reduced the fortress of Missolonghi, he had still to conquer the stout hearts and brave hands within it. But starvation was more potent than arms; and the defendants of the citadel resolved to cut their way through the enemy's lines, or to perish in the attempt. A deserter betrayed them. Formed into bodies, they issued from the town by moonlight. A false alarm induced the foremost to waiver, when, raising a simultaneous shout, the second body rushed forward with musket and sabre on the Turkish cannon and the Arab bayonet. They silenced the enemies' batteries; they slaughtered the artillerymen at their guns; they broke the firm lines of infantry and cleared the trenches. Of the other body which returned to town, some escaped in boats, some by wading the lagoon, some blew themselves up, and many died of fatigue and exhaustion. The great loss of both Turks and Egyptians attest the desperate valour of the Greeks and the nobility of their defence; and the heroism of their resistance will go down to posterity as second only to that of Plataea, which had the good fortune to have Thucydides for an historian.

One of the greatest benefactors of Greece was Capt. Hamilton, of the Cambria. He was the first public advocate of the Greek cause among Englishmen; and, by his honest, upright conduct, he presented a remarkable contrast to the intriguing Grecian chiefs with whom he came in contact. Yet these very chiefs respected his character; and the rude soldiers admired his noble military bearing. Previous to his arrival in Greece, both the Ottoman and the Greek made as little of a row as a Spaniard does of an oath; but Capt. Hamilton tried to teach them honourable feelings respecting this matter, and actually saved the lives of a great number of the enemy, by chartering ships that took them on board at Nauplia. Hitherto, to massacre the prisoners and to swear that they would not be hurt were nearly synonymous with both Greek and Ottoman. The practice, besides, was not learnt, by a bitter experience, from the savagery of the Turks; the Greeks were the original offenders, as this History abundantly proves.

The affairs of Greece in 1827 assumed a new aspect with the arrival of Sir Richard Church and Lord Cochrane (Earl of Dundonald). The former had been called to command the Greek army, whom his high pay and gracious bearing had conciliated while serving in the Anglo-Greek battalion. But as a soldier and as a counsellor, his plans proved a signal failure. He was small in appearance, he was of slender capacity, he was pompous in his character, and his name is connected with no wise measure of

political reform. Lord Cochrane was as great a contrast to Church in the qualities of his mind as he was in those of his body. He was tall and commanding in appearance, prompt and decisive in counsel and in action,—whom too great honesty and bluntness withheld from becoming a naval hero, and too strong a contempt for conventional rules kept from ever being made one as a matter of course. This good old man, whose Autobiography we have hardly done reading, was a man well advanced in life some thirty years ago. He recommended the Greeks, with bitter irony, to read the first Philippic of Demosthenes in their national assemblies. Yet his popularity became suddenly unbounded: all parties agreed for a moment to think only of the nation's interest and to let their mean selfish wranglings go to the wall. Lord Cochrane was appointed arch-admiral and Sir Richard Church arch-general; and it is due to the influence of the former that all men in Greece, even for a day, agreed to sink their petty animosities and think and wish only for the good of their country. Capodistrias was chosen President of Greece: but neither his presidency nor the presence of the English could keep matters straight in the country. Hastings fought for the country, Cochrane fought for it, and Sir Richard Church fought for it, and was beaten soundly, at Philerm, but all would not do to heal the disorders of Greece. Nothing but a plan of European intervention could prevent the entire destruction of the populace or their unconditional submission to the Sultan. After the operation of various treaties and counter-treaties, it was at last agreed that Great Britain, France and Russia should enforce an armistice between the Greeks and the Turks, to which the Greeks agreed with alacrity, but the Turks rejected all intervention. The battle of Navarino was the result, in which, after much hard fighting, the day was won by the Allies. The united Ottoman and Egyptian fleets consisted of 82 sail-of-the-line and 2,000 guns, while the Allied force consisted only of 27 sail and 1,270 guns. In no long time Ibrahim was compelled to evacuate the Morea. The presidency of Count John Capodistrias, the period of anarchy which succeeded, the Bavarian despotism of King Otho, and the constitutional revolution followed.

The Last of the Mortimers: a Story in Two Voices. By the Author of 'Margaret Maitland.' 3 vols. (Hurst & Blackett.)

THIS is a charming book—simple, quaint and fresh. As in 'A Life for a Life,' the story is carried on by two different people—not by lovers, as in that case, but by two women—one, a quiet, inoffensive maiden lady of fortune, timid, nervous and unsophisticated; the other, a young officer's wife, a frank, lively, affectionate girl, devoted to "Harry" and the baby, and thinking herself only too highly favoured in being able to add to Lieut. Langham's happiness.

Very poor the young couple are after a runaway match, but very gay and happy in their little second-rate lodgings; the only "speck of dark" that appears "in this great heaven of blue" being the dread of the regiment going to the Crimea, where the war has just begun.

As a specimen of young Mrs. Langham's style, we quote the following scene. She has been coaxed into taking into her service an odd, uncouth, Scotch girl, rough and awkward, but devoted as a dog to her mistress and the baby.—

"'Mem,' said Lizzie, 'is a' the Bible true alike, the Auld Testament as weel as the New!'"—

'Surely,' said I in the most utter surprise.—'Then I know what I'll do,' cried the girl, 'I'll bring you a hammer and a nail, and you'll drive it into the doorpost through my ear.'—'What in the world do you mean, child,' cried I; 'are you laughing at me, Lizzie? or is the girl crazed?'—'Me laughing? If you would do it I would greet with joy; for the Bible says, them that have the nail driven through never gang out any mair for ever, but belong to the house. Mrs. Saltoun might na' be pleased if it was done in the parlour, but down at the outer door it would do nae harm. Eh! mem, will ye ask the Captain?' cried Lizzie, 'and then I'll never leave ye mair.' * * 'About an hour after, she made her appearance at the door. I never saw the creature look so bright; her eyes were shining, her colour high, her breath coming quick with agitation, excitement and a mingled thrill of joy and terror. In one hand, she carried Mrs. Saltoun's great hammer; in another, a rusty iron nail; and her resolution had removed at once her awkwardness and her reverential dread of Harry. She came up to him with a noiseless air of excitement, and touched him on the sleeve; she held out the hammer and the nail, without being able to speak a word. He, on his side, looked at her with the utmost amazement. Lizzie was too much excited to explain herself, or even to remark his astonished look; she had come to prove her allegiance, in the only way that occurred to her. I believe in my heart that she longed for the grotesque, extraordinary pang, which was to make her my bond-slave for ever; the spirit of a martyr was in the child's heart.'

The ladies at the hall, as described by the younger sister, were a couple of old maids, such as we all have met with many a time before in our lives; the elder sister, an old beauty, pinched, withered and crabbed—a fine lady in her way, and, having lost her voice, "declines talking." Miss Milly is a merry, cordial, cosy old lady, standing terribly in awe of "my sister Sarah," and, never having been a beauty, is very well contented with her present appearance.

Such is the view taken by the neighbourhood of the two Misses Mortimer of the Park; but under this smooth exterior lurks a horrible secret. Sarah's history is a mystery. For many years of her life she resided in Italy with her father; and what happened to her when away from home, nobody knows; but she is nervous and uncertain. She has a favourite maid, who evidently knows more than she dare say, and poor Miss Milly is worried out of her life with Sarah's strange tempers and odd habits. The old ladies are very much puzzled to find an heir to the property, and are rather oppressed by the family lawyer, who has a faint idea that, for want of any one else, the Misses Mortimer might as well adopt their god-daughter, his only child, Sara Creswell, a most fascinating little creature, but "very contrary," and a torment to everybody belonging to her. At this juncture, however, the neighbourhood begins to be haunted by young and handsome Italian gentlemen, with a very fat servant, who are seeking a lost Countess. Miss Milly meets them in the village, and becomes a little flattered by their polite manners and respectful courtesy. Little Sara Creswell gets very red, and bristles up, whenever the stranger is alluded to; and Miss Sarah Mortimer is crosser and more eccentric than ever, and declares all foreigners are impostors; so she won't have one of them admitted into the house, on any pretence whatever. The Italians appear again in Mrs. Langham's story; the regiment is stationed at Chester, and the young couple lodge under the same roof with Count Luigi and his fat valet, who flirts with Scotch Lizzie in the most amusing manner, while his master ingratiates himself with Miss Creswell.

With the help of some old books and pictures, and a few accidental coincidences, tran-

spires the fact that Milly Langham (née Mortimer) is the next heir to the old ladies at the Park, and she is joyfully acknowledged, and taken out of her poor lodgings and made a pet of, while Harry is away fighting in the Crimean War. The mystery of the Italian Count must be unravelled from the book itself, as it would be unkind to spoil the pleasure of its future readers by detailing the whole of the very ingenious plot.

If the book has a fault, it might be that Sarah Mortimer's character is a little too hard for truth. Her coldness and reserve throughout are exaggerated; but her obstinacy and cruelty at last are absolutely repulsive, and are overdone. It would be painful to believe that such a character could exist, by any possibility, in real life. The two Millys and little Sara are all delightful; and Harry and the Italian Count are a capital pair of heroes, though they are scarcely equal to the heroines.

The pleasant manner in which the book is written may be gathered from Miss Milly Mortimer's description of her village:—

"A nice little village was ours, though I can't really say whether you would have called it picturesque. A little bit of a thread of a stream ran along the lower edge of the common, and found its way somehow, all by itself, little thing as it was, down to the Dee. At that time of year the common was rather chilly to look at, the grass and the gorse-bushes being a good bit blackened by frost, which had set in pretty sharply. I remember noticing, as I passed, that Dame Marsden, whose cottage is the first you come to, on the left-hand side, just on the edge of the common, had her washing out, some of the things, after the line was full, being spread on the gorse, and that the shirts were lying there, with their stiff white arms stuck out like pokers, as hard with the frost as if they had been made of wood."

Take it altogether, 'The Last of the Mortimers' is a novel "*comme il y en a peu*" (the more's the pity); and it will go far to sustain the reputation of the Author of 'Margaret Maitland.'

A Nest of Gentlemen: Provincial Life in Russia
—[*Une Nichée de Gentilshommes: Mœurs de la Vie de Province en Russie*, par Ivan Tourguenief]. (Paris, Hetzel.)

This writer is already known in England as one who has done much for the modern literature of Russia; and the tale before us—his longest effort—will widen and deepen his reputation. It may be an inevitable consequence of its truth to nationality that it should be melancholy, even as Russian music is. Perhaps it may be long (to speak fancifully) before the inevitable proportions of night and day—of what is depressing and what is genial—will, in so large and so partially civilized a country, be modified by progress, culture and those artificial processes of remedy and assistance, which, by changing the face of Nature, become in the act almost a part of Nature.—M. Tourguenief's hero, Lavretsky, had, at all events, no chance of a happy life. Curbed, cramped, neglected in his boyhood, with only rude and eccentric kinsfolk to lean on, the world opened for him too late. When the passions of a man began to urge him he had still the inexperience of a child; and so, in his love-time, he stumbled into a fatal marriage with a mercenary cold-hearted coquette, who used him, grasped his substance, fooled him, deceived him; keeping throughout their two lives the terrible hold on him of an evil genius, resolute to drain the last drop of her victim's heart's blood; with admiring smiles on her lips, and penitent tears in her eyes.—We know of no character

in fiction better and more hateful than this hypocritical Varvara Pawlowna, with such artistic delicacy is it touched and coloured; but by this very perfection of painting moral disease, her presence in the book destroys every chance of freshness and good cheer. She flagrantly cheated the true-hearted man, who left her; but there was no deliverance for him. Come back she must, and did, at the very moment when the rumour of her death had justified him in explaining himself to one as pure as the other was corrupt. The wreck wrought by this Circe's return is desperate, and its miserable dreariness is deepened by the writer's utter abstinence from hysterical passion or distress on stilts. The broken man (a strong man), the victorious woman (a weak woman), *talk*—they do not think aloud. The man wearily throws up the cards; the woman elegantly smiles over the game she has won.

Such is the main argument of this sad tale. The good, devout, delicate heroine Lise, who, when her hopes are shattered to the winds, buries her grief in a convent, is as true to woman's nature as this terrible hypocrite: but she is the less fascinating of the two—being sure to go right,—whereas curiosity is kept alive as to the direction in which conquering evil will go wrong.

The accessory characters are excellent—but they are not agreeable. The hero, Lavretsky, belongs to a family party of women, who irritate him by their honesty, stupid or sentimental, almost as much as his wicked wife did, by her French gloves, her *patchouli*, her tears, and her serviceable child, conjured up from bed with ribbons in her hair.—His old aunt, stingy but true-hearted, who takes his marriage in dud-geon, and retires to the spinster thrift and economy of her own small domain, is as racy as one of Miss Ferriar's or Galt's *Miss Mirys*. The establishment of the melancholy man in her house after her death is capitally told; had the scene been less cheerless, we might have attempted a paraphrase of it: but it is too winterly to pass at a time when the world is gathering round the fireside. Then, there is another elderly female,—Marpha Timoféevna,—less acquiescent in being set aside: not less humorous, though—who has her small court of dependents and one admirer—and her importance—a thorough, true-hearted, crotchety woman, hating imposture, and with that sense of right and wrong which cuts, clean as a scimitar, through all that is ephemeral and untruthful. The old German musician, Lemm, whose genius has dwindled during his residence in an ungenial soil,—is a third crabbed creature, true to life, no doubt; but why should there be three crabbed creatures in one drama? A capital character is the smooth diplomatic accomplished official, Panchine, with his talents and his insinuating ways; the proper "pair" to Varvara Pawlowna—and whose dismissal, with her, to the enjoyments of un-poetical *in-justice* is as artistic as any combination in the novel. But that vague suffering, and such cold endurance as gathers round living bodies and souls who put on shrouds while living, should fall to the lot of the two high-minded persons for whom we are bidden to care is not to be endured without remonstrance. The tale, we repeat, is eminently saddening.

Logica, seu Philosophiæ Rationalis Elementa.
Curâ Rev. Gulielmi Jennings. (Dublin, Warren; London, Duffy.)

THE Rev. W. Jennings is Professor of Philosophy at Maynooth, an institution which owes the world a little good logic, to balance the

quantity of bad to which it has given rise. All politics is compromise, and its reasoning among the rest. The maxim is from Macaulay, who took note of that figure of syllogism which is valid, in spite of the premises contradicting one another, because the major secures a hundred votes from one side of the House, and the minor as many from the other. Some such syllogism has for its conclusion an annual grant to the college at Maynooth; but we have searched Mr. Jennings's book in vain for an account of it. Many of our readers only know this Roman College as a bone of contention, and will hear of an elementary work published by one of its professors for college use, with a curious kind of curiosity. Can anything be detected? they will ask. Not by open signs, we mean; the priests are too clever for that; but can a searching Protestant eye discover any proof of a leaning towards brass money, arbitrary power, and wooden shoes? We regret that we cannot give any assurance on this point, either way: the fact is, that we forgot our duty while we were reading, and only remembered it when we came to write.

The work is put together in clear and agreeable middle Latin, free of some of its trammels. It is not often that such an Anglicism as "Sir W. Hamilton" occurs in a Latin page. The quotations with which the notes are loaded are in their several languages, Greek, English, French, as the case may be, which is a much better plan than Latin translation for English readers. We are rather inclined even to disapprove of the text being in the old language: but this may have local reasons.

The texture of the work is more scholastic than modern writings usually are, more tending towards the older notions of logic, and less founded upon the Kantian definition. But in one particular there is much novelty. Dogmatism is almost laid aside: that is, on most of the vexed questions an account of the arguments of both sides is given, and the writer reserves his own conclusion. In his college teaching he adds, we must presume, his reasons for preferring one side or the other: but his book might be used by very different schools; we had almost said,—his two books in one. The plan is a very good one, if it be meant that the student is to exercise his own mind on the balanced arguments before he hears the final remarks of his teacher. We fancy, in several cases, that we can discover Mr. Jennings's private mind by his way of putting the arguments of others: but perhaps we are biased by our own notion of what an admirer of the old character of logic, teaching at Maynooth, is likely to think on the points. The writers from whom the arguments are drawn are copiously quoted; and from every school of psychology, without reference to theological caste. Occasionally, an opinion is intimated: and sometimes by what we may call the little boy's figure of insinuation—"Grandmamma, I wish one of us three was hanged; I don't mean pussy; and I don't mean myself." In the chapter on Universals, for example, the Platonist, the Nominalist, the Conceptualist, and the Peripatetic are briefly described with great clearness and precision: the first three opinions are slightly opposed, but the fourth is neither rejected nor adopted. There is, however, an account of the term *universale* which looks very strange: this word "*vi vocis, est unum versus alia, i. e., unum respiciens multa.*" Is it possible that, at Maynooth, the termination of the word *universale* is connected with *alia*? Perhaps the sentence is badly put together: but surely, if the three words had been only paraphrase, and not etymon, *multa* would have been used, were it only to avoid suspicion.

Mr. Jennings goes so much into modern discussion as to give his two sides of Hamilton's theory. And one of his arguments against it turns on the point which has lately received some notice in our columns. Mr. Jennings has shown that he apprehends Hamilton's meaning of the quantifying "*some*" to differ from that of logicians in general. Thus he represents the original describer of the system as laying down that "*nisi cognoscamus rosam comprehendere sub genere floris, et utrum sit toti generi æqualis, vel parti tantum, vel toto superiori, æquidem non licet *florem* de *rosa* prædicare.*" It is meant that *flower* cannot be predicated of *rose*, in Hamilton's system, by any except one who can tell whether or no flower can be predicated of other things. For Hamilton insists on it that any one who will speak in his system must say either that roses are all the flowers or that roses are some and not all of the flowers. If a new attribute should be found, belonging to roses and nothing else, so far as yet known, the ordinary logic would express our knowledge by "*all roses are —*," leaving it an open question whether or not anything else be —. But Hamilton leaves no mode of doing this except a disjunctive proposition. We do not approve of the objections which Mr. Jennings makes to Hamilton's system; that is, we think they are wrong objections preferred to right ones. But though objected to on what we conceive to be invalid grounds, the mere notice of the above fault is remarkable, so little has it attracted attention.

Hamilton's own defence of thus compelling his follower to decide between the two forms of affirmation is highly curious. Our ignorance compels us to use the ambiguity. When we find the new attribute above mentioned, we say "*all roses are —*" because it just expresses our knowledge, and leaves undecided in language an alternative which does not arise in the mind. We do not say which of the two because we do not know which of the two: a wise accommodation of language to thought. But Hamilton rejects the common language of logicians because it represents ignorance, without at the same time telling us how to abolish the ignorance also. The common ambiguity of "*some*" is, he says, "not a necessity either of thought or of things, but merely an accident of the former. Its peculiar indefinitude is a contribution from the contingency of our ignorance, and with our ignorance would disappear. . . ." All this is quite true. The inculcated meaning is not a necessity of thought: had it been so, Hamilton's departure from it would have been *uninventable*. It is not a necessity of things, for *some* and *all* do not live in the objects, but in the subject mind: Hamilton himself has made very good use of a quotation from Boethius—"*Omne quod est, eo quod est, singulare est.*" It would disappear with our ignorance: Hamilton would have it disappear first. It seems to us that he who would provide forms of enunciation to be ready for our omniscience when it comes, ought to give shoulder-holes to our coats to be ready for our wings when they grow. But the end of it would be this:—By the time our light came, words without knowledge would have darkened counsel until sight was lost: by the time our wings grew, rheumatism would prevent our using them. Want of actuals is a "contribution from the contingency" of our digestive organs, and with them would disappear: but we say with Dominie Sampson "I will not lack my food upon that argument."

There is a growing disposition to investigate the laws of thought; it has not come before it was wanted. In a generation or two it will be common knowledge that Aristotle did not

invent syllogisms any more than Harvey invented the circulation of the blood. The number of books of logic is greatly on the increase. Mr. Jennings's work may be recommended for clearly expressed thoughts and great variety of exemplification from the thoughts of others.

OUR LIBRARY TABLE.

Reminiscences of the Life, with some of the Letters, of Her Royal Highness Hélène-Louise, the late Duchess of Orleans. By Dr. Gotthilf Heinrich von Schubert. (Bath, Binns & Goodwin; London, Marlborough & Co.)—Though this book is amiably meant, and affectionately felt, and though the age of its writer (almost, he tells us, an octogenarian) and his high respectability give him privileges and claims hardly to be admitted in the case of younger men, the work is superfluous, as adding little to our knowledge of the gentle, yet firm, virtues of the Duchess Helen of Orleans. Dr. Schubert taught her when she was a little child; but the two never met for forty years—never again,—and though it is a trait in harmony with all the other known traits of her character that she never forgot her teacher, never ceased to interchange letters with him, nor to speak to him of her thoughts, the prolonged separation was attended, inevitably, in their communications by attenuation of topics generally interesting.—The letters to her mother-in-law, here published, (it may be assumed with the family sanction,) have been naturally selected with careful avoidance of everything personal, the graces and characteristics of her sons excepted. On those of the elder, great emphasis is laid, and thence it is impossible to avoid receiving the impression that more than a single purpose has prompted this publication—and that it is a book for the future as well as of the past. Further, the style of the venerable Professor, as of other German writers, when religious subjects are approached, has more of simile and sentiment than we find manly and devotional when discussing spiritual hopes and fears. Pretty parables are misplaced when the theme is a good and affectionate woman, who aspired consistently, conscientiously suffered grievous misfortunes, and bore them resignedly, without parade or exaggeration. In England, we are apt to suspect the real feeling of mourners who attitudinize by the sides of graves; but the Germans are in no respect more radically different from us than in matters of sentiment. What with us seems sickly and hollow, with them stands for expansion and earnestness.

Life Melodies. By Thomas Moore. (Moxon & Co.)—The title of these poems calls up thoughts of a sprightly singer of sparkling fancy and cunning melody. Possibly our disappointment on reading this book is increased by the association. But we find neither music nor beauty, power nor grace. From the Preface we gather that the writer is aware how poetry must give a true and faithful delineation of realities. We fancy that he is not aware how far away from all reality are his verses. He is, according to his Preface, a minister of the Gospel. We wish him success in that vocation. In written poetry he has neither. There still remains the poetry of kindly deeds and comforting words. In many ways a minister may live poetry where he cannot write it. There is more poetry in adding some drops of sweetness to the bitter cup of the poor and needy than can be put into a great deal of verse. There would be more poetry in gathering from one's own garden a bunch of flowers and taking them to some poor woman longing to smell them, with the death-damps on her—more poetry in giving a bit of lining for the bare coffin provided by the parish—than we shall ever find in a hundred such books as this. Will the writer think the matter over?

Poems. By the Rev. George Edmond Maunsell. (Smith, Elder & Co.)—We cannot better describe these than as very little poems for readers of a very little poetry. Such readers will not be lost in the depth, nor wearied with the length. They can also make their short journey in a quiet, business-like way, without much loitering to gather the wayside flowers. We give one example, livelier

than most, apparently because the spirit of *Præd* has been with the writer for "this occasion only."—

ADELE.
Last night in emptying out my desk
I found a lock of hair.
It had a scent of Rowland's oil,
And, oh! 'twas long and fair,
Adele!
So soft, so long, so fair.
I mind me yet how all began;
By chance or by design.
When first you drew your hand away,
Then laid it back in mine.
Adele!
Then laid it back in mine.
A thrill shot up from arm to heart,
Just sinking with despair;
I looked into a half-closed eye,
And learned a lesson there.
Adele!
And learned a lesson there.
We walked, we danced, we quarrelled, too,
Were reconciled, and then
We parted. I was false, and you
A flirt with other men.
Adele!
A flirt with other men.

The Tablet of Shadows: a Phantasy; and other Poems. By Francis Davis. (Hamilton, Adams & Co.)—The "Balfast Poet" has taken the wrong turning, and lost his way in attempting to write blank verse. He is nothing if not lyrical; but often his poetry is good when dancing along to a merry melody, keeping time with a castanet-like beating of the rhymes. 'The Tablet of Shadows' is all too dim and undefined for us to make it out. In vain do we repeat Ben Jonson's call,—

Break, Phantasy, from thy cave of cloud,
And spread thy purple wings;
All thy figures are allowed,
And various shapes of things.

Here the "figures" are not allowed to be seen distinctly, and the "shapes" are of the most questionable kind. But when we get among the lyrics, we find the true bard once more, with something of the flash of Irish fancy in his song, and the reckless rollicking of the Irish poet.

Christopher; and other Poems. By Walter B. Mant. (Bell & Daldy.)—Sydney Smith ridiculed the idea of a Bishop marrying. "How can he flirt! The most he can say is, 'I will see you in the vestry after service.'" The same difficulty seems to exist with regard to an Archdeacon's marriage or flirting with the Muse, to judge by the present volume of verse. The Archdeacon of Down has only been able to see her in the vestry after service; and the interview has not produced any remarkable results. The poems were not written with any intention of publication, and are printed at the suggestion of friends. Alas! how often do friends suggest things much more wise, and are never heeded, whereas, in this matter of publishing, their advice is always followed!

Footprints, by C. S. S., are not of the kind besung by Longfellow, yet they show a pleasing faculty for writing in rhyme. The piece of prose called 'Metaphysics' has a touch of Charles Lamb's humour in it.—The Author of *Richard Cœur de Lion* (Hall & Co.) has been taking a leaf out of Mr. Charles Reade's book, if his conceit be not innate. He flings his drama at the head of the public with these words, "Time has long made an inquiry for an original drama. Is this one?" We answer, very; and likely to remain original so far as translation is concerned.—*Botany Bay; and other Poems*, by J. Gordon (Hall & Co.), were written, one half in Scotland, and the other half in Australia. We can only say, that the first were not worth carrying across the Pacific, and the latter were not worth bringing back.

History of a Mouthful of Bread.—[*Histoire d'une Bouchée de Pain. Lettres à une Petite Fille sur la Vie de l'Homme et des Animaux*, par Jean Macé]. (Paris, Hetzel.)

Long were the learned words and urged with force,
Panderiform, pinastid, premorse
Latent and patent, papulous and plain;
"Oh," said the pupil, "it will turn my brain!"

We have been reminded of the above lines from Crabbe's inimitable 'Preceptor Husband,' by Prof. Macé's 'Letters to a Little Girl.'—Years ago, ere

the subject became fashionable, this journal repeatedly pressed the importance of some knowledge of the structure of the human frame, with a view to the observance of the laws of health, as a part of female education. But there is reason in every thing, and we doubt the profit which "little girls" will reap from letters on the "liver," "the play of the lungs," "the intestinal canal," the "chyle," or, what a *Mrs. Malaprop*, in our experience, described to her sympathizing medical man as the "abominable viscera."—They have other ideas, we admit, in France; where medical topics and symptoms of disease are discussed in society with an openness, to our taste, savouring of coarseness. But, should we be squeamish and super-delicate in thus considering the matter, there can be small dispute that there is a time when lectures on the "fearful and wonderful" mysteries of the human frame should begin—and that tendons, nerves, bowels, may wait their lecturer until "little girl"-hood is past.

The Mysterious Faubourg.—[*Le Faubourg Mystérieux*, par Léon Gozlan, tome I.] (Paris, Hetzel.)—This is half a collection of stories, purported to be gathered in a private "asylum" in Paris. The writer has bound himself to abstain from those terrible scenes or combinations which such receptacles of agony and undescribed pain must inclose within their walls, and to deal, merely, with hallucinations and such cases as may be studied without too much distress and horror being excited. In the first story of his first volume, 'The Patient of No. 16,' his word is kept. We cannot undertake to say that the tale is an impossible one, so far as concerns the form of the patient's malady, which is to demolish and tear up or chip to pieces (as though the demon of "whittling" had possessed her) all the furniture of the rooms which she inhabits. But it is hardly to be conceived that, during the period when her frenzy was on the Patient, in all its insanity, she should be presentable in society, by her father and brother, who from interested motives, and in the hope of building up their ruined fortunes by making a great match for her, withdrew her from time to time from her captivity, and paraded her at balls and public places. How their intentions were frustrated, and how the spirit of destruction was exorcised, by a young Adonis, in the shape of an American physician with a vast fortune, those who are curious to learn will find in this tale, and not ill told.

Apple Blossom Time.—[*Quand les Pommiers sont en fleur. Nouvelles et Fantaisies*, par M. Bathild Bouniol]. (Paris, Brunet.)—Our well-meaning author had at one time, he says, the idea of calling this collection of little moral tales 'The Leopard's Skin.'—On second thoughts, 'The Apple Blossom' suggested itself as a fitter symbolical title for his miscellany. "Train up a ghost," said *Mrs. Nickleby*,—which quotation, if not altogether correct, would at least have been as appropriate, more direct, and less affected, had it been used by way of title. M. Bouniol's stories and anecdotes are principally addressed to the young and those who have to deal with youth. Their intention is to inculcate what is self-denying, chaste, generous, merciful and submissive to authority.

CHILDREN'S BOOKS.

The Wonderful Adventures of Tufongbo and his Elfyn Company in their Journey with Little Content through the Enchanted Forest. By Holme Lee. With Illustrations. (Smith, Elder & Co.)—We may as well make our confession before we begin our criticism. We took up these 'Adventures of Tufongbo' with a great contempt for *parvenu* fairies and new settlers in fairyland, where we spent the days of our childhood; indeed, we were honoured with the intimate companionship of all the real old fairies and their god-children. We were brought up amongst the fairies of the *ancien régime*, and we were not disposed to transfer our allegiance. But we gradually became interested in the fortunes of the heroic Tufongbo, though he came of quite a modern family, and was nothing like such a fine gentleman as the beautiful Prince in 'The White Cat,' or Prince Riquet with the Tuft, or Prince Fortunatus; indeed, he was quite vulgarly able to take care of himself, and did not

need a fairy godmother at all. But his adventures interested us more and more as we went on; and though we are old enough to have known better, we confess that from the moment we began to read we never laid down the book until we came to the last page; and we like Tufongbo quite as well as any of the ancient old heroes of fairy tales, and we hope he never came to any harm, and we would be very glad to hear more about him, and we hope Holme Lee will make haste and tell us about his further history. Holme Lee may be satisfied with her day's work; for she has written a very charming book, full of fancy and good feeling; and most readers will feel regret when they come to the end of it: nevertheless, we have a little criticism to offer. In the first place, there are too many characters, and the incidents are confused. The story would have been better if it had been broken up into several stories. The journey through the Enchanted Forest of Stone is very good, though it gets too much into allegory; but after the adventurers get back to fairyland the story becomes confused and rather heavy. The trial of Tufongbo for high treason is not managed according to the precedents of fairy tales; it might be the report of a case in the Central Criminal Court. In the latter part there are too many allusions to incidents and personages of other stories; and readers like to feel that they have a complete story; it is not treating them well to allude to matters which do not enter into the story before them. It is like talking of family affairs before visitors, and making them feel they are strangers. There is no poetical justice executed upon Aunt Spite and Libelia; and we need not remark that in fairy tales we expect the strictest punishment for the wicked characters. It would be an improvement if Holme Lee would forget that she is writing in the nineteenth century, and make her fairies a little less like the reasonable and rational beings we meet with in the novels of Miss Young and Miss Sewel. Fairies and the dwellers in fairyland have always been a peculiar people; but their morals were of the very simplest, and their chroniclers had a simplicity and unconsciousness of intention, which is one great point in which the old fairy tales and old nursery rhymes surpass, in grace and attraction, all that have followed in their track. It will be observed that we have not said one word to give an idea of what the story is about. We should consider it a breach of confidence; and no persuasion shall induce us to tell what readers may learn for themselves.

Cavaliers and Roundheads; or, Stories of the Great Civil War. By John G. Edgar. With Illustrations by Amy Butts. (Bell & Daldy.)—With the nerve which has contributed to his popularity as an historic tale-writer for children, Mr. Edgar has here sketched several of the most conspicuous personages in the two great parties which divided town and country in the seventeenth century. Those who are acquainted with the author's previous works need not be told his sympathies are with the Cavaliers. As he informs us in his Preface, he has, however, endeavoured to narrate with "impartiality the events of the war which, after covering England with fighting men and costing so many lives, terminated in the peaceful return of the Stuarts." Upon the whole, his attempt to be impartial deserves commendation; but in the portraits given of leading popular champions there appears, to some extent, a lack of generous appreciation of honesty and courage. Of Prynne, Mr. Edgar says:—"This man, who was a barrister of Lincoln's Inn, with much learning and little sense, had conceived an idea that to indulge in stage-plays, a hunt, a Christmas dinner or a dance, was much more iniquitous than to harbour envy, hatred, malice and all uncharitableness." Certainly in this balderdash there appears no partiality for the author of the 'Histriomastix.' The judicial coldness, also, with which Mr. Edgar strives to be just to Cromwell, Blake and Hampden, contrasts forcibly with the fervour of his eulogy on James Stanley, Earl of Derby. "The tastes and habits of the heir of Derby," says Mr. Edgar, "do not seem to have been such as to make him partial to the atmosphere of a court or ambitious of royal favour. Nor, indeed, was it unnatural that a man of such nobility and pride

should have shrunk from contact and contention with the pretentious popinjays whose names were unknown in England's annals, whose titles had not been won on fields of fame, but purchased with ill-gotten gold, and beneath whose banners no brave retainers ever felt one patriotic emotion or struck a sure and determined blow. The idea of being the rival or mate of these coronetted bipeds could not have been very tempting to a man of Lord Strange's proud soul and cultivated mind." As an historian, Mr. Edgar lays no claim to originality or philosophic depth. His pen is the obedient servant of his affections; and its sketches, slight and superficial though they be, are showy and bright, and will please the young people to whom they are addressed.

Little Maggie and her Brother: a Sketch for Children. By Mrs. George Hooper. (Bell & Daldy.)—The interest and the power of Mrs. George Hooper's Christmas book for children are as much beyond the interest and power of ordinary school-room tales as the heiress of 'The House of Raby' is superior to the average fabricators of nursery literature. Maggie and Wynn, whose sayings and doings furnish the principal materials of the narrative, are two charming children, their adventures and views of life being of a kind peculiarly adapted to rouse the admiration and sympathy of juvenile readers. Little Maggie's indignation at being called a "Holbein baby," and her strong liking for "rompable boys," are most humorously described. The little lady has her own opinions on other subjects. She thinks "Pontius Pilate such a pretty, grand sounding name," that she first wishes to give it as a mark of peculiar favour to her new doll, and is subsequently desirous of conferring it on the Shetland pony given to Wynn by his papa. It was needless for the author to state in her Preface that personal observation and affection had guided and inspired her delineation of two very "simple, lively children."

Early Egyptian History for the Young, with Descriptions of the Tombs and Monuments. By the Author of 'Sidney Grey' and her Sister. (Macmillan & Co.)—To render Egyptian History attractive to children, would appear to most writers a task beyond possibility of accomplishment; but the two ladies, whose united labours have produced the present volume, are not only to be admired for the courage with which they entered on a difficult undertaking, but are also to be commended for the care, good taste and sound discrimination displayed in their Letters on Early Egyptian History, addressed to their nephews. The plan they have pursued is to entertain their juvenile readers with descriptions of Egyptian antiquities and scenery, weaving, after the fashion of popular lecturers, the romantic picturesque legends of history into their accounts of the wonders still to be seen on the banks of the Nile. Geography and Chronology are designated the eyes of History. Of the former the two sisters display adequate knowledge, but they prudently abstain from burdening their pages with uncertain and contested dates, the mere sight of which would cause children to shiver with apprehension, whilst to commit them to memory would be a profitless exertion on the part of a studious and intelligent child. "Egyptian History," says one of the ladies playfully to her nephews, "venerable mother of all Histories, as we must regard her, is, I grieve to say, extremely dim-sighted, not to say blind, of her chronological eye. Learned doctors are doing their best to cure it, and in due time, doubtless, she will see clearly. You and I cannot aspire to help them, and therefore I have made up my mind that, in the slight water-colour sketch of Egyptian History with which I am going to present you, I shall leave out the chronological eye altogether." Starting with such a plan, the authors have worked it out in a manner that merits praise. Artistic appreciation of the picturesque, lively humour, unusual aptitude for handling the childish intellect, a pleasant style, and sufficient learning, altogether free from pedantic parade, are amongst the good qualities of their volume, which we cordially recommend to the parents of inquiring and book-loving boys and girls.

M. L. Stievenard, the French Master in the City of London School, has published a useful

French reading-book, entitled *Lectures Françaises; or, Extracts in Prose from Modern French Authors, with copious Notes* (Longman). It is divided into three parts, increasing in difficulty with the advance of the learner, and all taken from none but modern writers. The notes are well adapted to the text, being more elementary in the earlier part, and written in French towards the end. Altogether, it forms an excellent introduction to the French literature of the present day.—We have failed to discover any special advantage in Mr. Robinson's *Pronouncing Reading-Book* (Longman), nor can we admit that, by the use of his pronunciation marks, the difficulties of learning to read will be diminished, and at the same time a correct pronunciation acquired. Surely, the addition of other signs besides the letters must increase, rather than diminish, the difficulty of the learner; and pronunciation can only be effectually learnt by hearing—not by any system of visible marks.—A *Latin Grammar*, by the Rev. L. Marcus (Lockwood), appears equally destitute of any distinctive excellence.—The British and Foreign Bible Society having printed a Hindustani version of the Psalms and New Testament in Roman character, Mr. C. Mather has compiled a *Glossary, Hindustani and English, to the New Testament and Psalms* (Longman), printed in the same character, and containing the literal and derived meanings of the words occurring in the version.—We have to chronicle the appearance of *A Manual of English Pronunciation and Spelling*, by R. Soule, Jun., A.M., and W. A. Wheeler, A.M. (Low & Co.), an American publication, containing an alphabetical list of English words, with marks and references to indicate the pronunciation of each syllable, and differing from an ordinary Pronouncing Dictionary in not giving the meanings of words. In a lengthened Introduction there is an elaborate anatomical description of the organs of speech, illustrated by woodcuts, and followed by an account of the various sounds in English, and the accentuation, spelling and syllabification of words. The authorities upon which the work is based are, the English authors, Walker and Smart, and Webster, Worcester and Goodrich among the Americans.—We think Mr. C. Baker has rendered his *Circle of Knowledge: a Scientific Class-Book* (Varty) less suitable than it might have been as a reading-book, by overloading it with miscellaneous matter, not always of the best quality. The idea of discussing the make of bonnets and ladies' under-garments—not excluding crinoline—in a work of this nature, is certainly a novelty, and, we think, a blunder. Both the paper and illustrations are inferior.—A contrast in these respects is supplied by *Philip's Atlas of Physical Geography, for the Use of Schools*, edited by W. Hughes, F.R.G.S. (Philip & Son), which contains twenty well-executed maps and drawings illustrative of the different branches of physical geography, with written descriptions of each. By a skilful employment of the space at his command, Mr. Hughes manages to make his maps convey a vast amount of information at one view.—*Materials for Translating from English into French; being a short Essay on Translation, followed by a Graded Selection, in Prose and Verse, from the best English Authors*, by L. Le Brun (Tribner), is a useful book, though not by any means equal in value to M. Gasc's 'Materials for French Prose Composition,' the notes being much fewer, and containing less instruction with reference to idiomatic usage. Messrs. Relfe have issued two cards—one, a *Table of Kings and Queens of England, from the Conquest*; and the other, *A Form of Latin Parsing*, by D. B. Brightwell.

LIST OF NEW BOOKS.

Adams's First of June; or, Schoolboy Rivalry, 2nd ed. 8vo. 2/6.
Aimard's Chief of the Auca, new ed. 8vo. 3/6.
Aimee; the Story of a Life, 8vo. 3/6.
Alice Goldburg, 8vo. 7/6.
Arnold's Lights of the Morning, Preface by Mace, Vol. 2, 12mo. 5/6.
Bacon's Science of Memory Simplified & Explained, 12mo. 1/6.
Baillie's Rivers in the Desert, new ed. 8vo. 6/6.
Baptist Youth's Magazine, 1861, 12mo. 3/6.
Beeton's Christmas Annual, 1862, royal 8vo. 1/6.
Blackburn's Birds drawn from Nature, folio, 10/6.
Bowman's Among the Tartar Tent, 8vo. 6/6.
Bowman's How to Make the Best of It, new ed. 8vo. 3/6.
Bowman's Young Exiles, new ed. 8vo. 3/6.
Boy's Own Magazine, Vol. 7, 8vo. 3/6.
Brady's Elements of Geometrical Drawing, Part 1, fol. 16/6.
Bradshaw's Invalid's Companion to the Continent, by Lee, 10/6.

Bremer's Travels in Holy Land, tr. by Howitt, 2 vols. post 8vo. 21/6.
British Baptist Reporter, 1861, 8vo. 4/6.
Britannic, 1861, 8vo. 3/6.
Buckle's History of Civilization in England, Vol. 1, 3rd ed. 8vo. 21/6.
Bucknill & Tuke's Manual of Psychological Medicine, 2nd ed. 8vo. 15/6.
Burney's Evelina, new ed. 12mo. 3/6.
Butler's Sermons preached in the Chapel of Harrow School, 7/6.
Calendar of State Papers, Reign of Mary II, by Turnbull, 15/6.
Chalmers's Astronomical Discourses, 12mo. 1/6.
Children's Magazine, 1861, 12mo. 2/6.
Children's Picture-Book of Useful Knowledge, 16mo. 5/6.
Chosen Poems and Lyrics, 8vo. 5/6.
Chosen People, The, 2nd ed. 12mo. 1/6.
Christian Commonwealth, The, 8vo. 3/6.
Christian Pioneer, 1861, 12mo. 1/6.
Christian Treasury, 1861, royal 8vo. 6/6.
Christmas Magazine, 1861, 12mo. 1/6.
Christmas Gathering (A), or, Leaves for the Little Ones, sq. 3/6.
Churchman's Penny Magazine, 1861, 12mo. 1/6.
Copley's Complete Cottage Cookery, 15th ed. 18mo. 1/6.
Couch's History of Fishes of British Islands, Vol. 1, r. 8vo. 17/6.
Cuthbert's Eastern Lands and Eastern People, 8vo. 6/6.
Curate of Cranston, &c. by C. Beebe, 8vo. 10/6.
Cutts's Villa of Claudius, 8vo. 1/6.
Daly's Handy-Book of the Lord Mayor's Court, 8vo. 5/6.
Dasent's Selection from the Norse Tales, 8vo. 7/6.
Dawson's Popular Illustrations of Events in Old Testament, 8/6.
Deed and Edit, 8vo. 5/6.
Dixon's Piano Primer, folio, 11/6.
Double Acrostics, 12mo. 2/6.
Dumas's Historical Lib. 'The Black Tulip,' 8vo. 2/6.
Eadie's Classified Bible, 8vo. 8/6.
Edwards's Formulae in Pure and Mixed Mathematics, 8vo. 3/6.
Eldon Manor for Girls, 8vo. 3/6.
Ellis's Tolls and Triumphs, 8vo. 3/6.
Examination of the Socio-Oxonian Philosophy, Part 1, 8vo. 5/6.
Fetherston H's Primal Symbols, 8vo. 6/6.
Fletcher's Rites in Rhyme, 12mo. 3/6.
Goldsmith's Doctrine and Practice of Equity, 9th ed. 8vo. 16/6.
Gospel Missionary Magazine, 1861, square, 1/6.
Green's Grammar of the Hebrew Language, 8vo. 14/6.
Greenwell's Origines Kalendariæ Hellenicæ, 4 vols. 4/4.
Gresham's Correspondence, Selections from, 2nd ed. 8vo. 7/6.
Griffin's Household Stories, new ed. 8vo. 7/6.
Guthrie's Tales, &c. of the Scottish Covenanters, 2nd ed. 8vo. 2/6.
Herbert's The Temple, 2mo. 3/6.
Higher Christian Doctrine, 8vo. 3/6.
Hoffmann's Rich and Poor, 12mo. 1/6.
Hunt's History of the World, by Rev. D. Thomas, Vol. 3, new series, 8/6.
Hunt's Yachting Magazine, 1861, 8vo. 14/6.
Little Book, A, 12mo. 1/6.
Little Child's Picture Magazine, 1861, 2mo. 1/6.
Livingstone's Missionary Travels in South Africa, 8vo. 6/6.
Lynn's Whist Stories, 8vo. 10/6.
Magazine for the Young, 1861, 12mo. 2/6.
Magnet Stories, Vol. 3, 8vo. 2/6.
Medhurst's Garden Fables, illust. by T. Hood, square 8vo. 7/6.
Messiah, The, 8vo. 18/6.
Milton's Paradise Lost, and Regained, 8mo. each 3/6.
Monks of Kilmore, and other Poems, 8th ed. 8vo. 7/6.
Montagu's Mirror in America, 8vo. 3/6.
Monthly Paper of Sunday Teaching, 1861, 8vo. 1/6.
Monthly Packet, Vol. 2, 12mo. 6/6.
Murphy's Musical and Tax Office Manual, 8vo. 16/6.
Murphy's Musical Student's Manual, Div. 1, 12mo. 3/6.
Naval and Military Lib. 'Maurice Tierney,' 8vo. 2/6.
Newman's The Soul, its Sorrows and its Aspirations, 7th ed. 2/6.
Odipus on the Sphinx of the 18th Century, 8vo. 10/6.
Parker's Fractional Calculator, 8vo. 6/6.
Penley's English School of Painting in Water-Colours, 4/4.
Penny Post, 1861, 8vo. 1/6.
Pepper's Boy's Play-Book of Science, new ed. post 8vo. 6/6.
Petachia (Rabbi), Travels of, tr. by Benisch, 2nd ed. post 8vo. 5/6.
Pleasant Church Scholars, 1861, 12mo. 1/4.
Popular Lecturer, edited by Pittam, 18mo. 2/6.
Post-Office Directory of Somersetshire, with Bristol, r. 8vo. 25/6.
Rays of Sunlight for Dark Days, 2nd ed. 8vo. 2/6.
Rocambole (Madame), with a History of Society in France, 9/6.
Roche's (Dr. A.) Charges and Sermons on Special Occasions, 10/6.
Richardson's Clinical Lectures, 1st ed. 12mo. 4/6.
Rogers's Domestic Life in Palestine, 8vo. 10/6.
Saintour, Fables Morales. Ouvrages Français et Anglais, 2/6.
Sargeant's Frederick and Kate; or, the Little Letter Writers, 1/6.
Sargeant's Short Stories in Short Words, 8vo. 1/6.
Scattered Seeds, 2nd ed. square, 8/6.
Scenes and Stories Little Known, Chiefly in North Wales, 1/6.
Servants' Magazine, 1861, 8vo. 1/4.
Shipley's Daily Meditations for the Seasons, Pt. 1, 12mo. 2/6.
Silas Marner, by George Eliot, 7th ed. 8vo. 6/6.
Smith's Edwin of Padra, 2nd ed. 8vo. 3/6.
Southgate's Many Thoughts of Many Minds, 3rd ed. 8vo. 12/6.
Sunday Teachers' Treasury, 1861, 8vo. 4/6.
Sunlight in the Clouds, 2nd ed. 12mo. 2/6.
Taylor's 'Right through God,' Labours of Geo. Müller, 1/6.
Teacher's Offering for 1861, 12mo. 1/6.

Walker's Divine Operation on the Redemption of Man, post 8vo. 4/6.
Walpole's Memoirs of the English Academies, 8vo. 7/6.
Young's Farmers' Calendar, 21st ed. re-written by Morton, 10/6.

MR. DU CHAILLU'S ADVENTURES.

8, Winchester Street, Dec. 12.

"Mr. Du Chaillu's book on the Gorilla was pronounced a fiction"—such were the words telegraphed from Liverpool yesterday in anticipation of the West African mail. By that mail I have received an important letter from my brother-in-law, Mr. Walker, of the Gaboon,—together with a certificate from Capt. Yates, of the Ocean Eagle, and a letter from the Rev. W. Walker (the gentleman to whom Mr. Du Chaillu so particularly alluded in his 'Explorations of Equatorial Africa'),—in which, as your readers will see, a direct negative is given, with the fullest details as to dates, to Mr. Du Chaillu's statements. In a private letter addressed to myself, dated a few hours later than the public letter addressed to you, he states that he had just obtained some information from Mongilomba, one of the hunters who accompanied Mr. Du Chaillu, from which it appears that two or three of the gorillas he brought home were really killed by Mr. Du Chaillu, but the greater number were killed by others and sold to him. As my brother-in-law adds, that his people

have caught a live gorilla, which he hopes to be able to bring home, I presume there cannot be so much difficulty in shooting or trapping them as has been represented.

Mongilomba, the hunter, already referred to, further informed Mr. Walker that Mr. Du Chaillu never went to Ashira, Ashongo, &c., but only to Bakélé, and was never farther than three days' journey from his house. The American trader, his neighbour, was also in weekly communication with Mr. Du Chaillu, so that he could not have penetrated 300 or 400 miles into the interior. Mr. Walker had been inconvenienced by the loss of his copy of Mr. Du Chaillu's book, lost by the upsetting of a canoe; he had to wait for another copy. This fact accounts for the delay in receiving his reply.

P. L. SIMMONDS.

Gaboon, Oct. 30, 1861.

The unexpected departure of a French war steamer for Sierra Leone, to meet the mail, gives me the opportunity to reply, although briefly, to the attack made upon me by the champions of Paul Du Chaillu. The attempt made to throw ridicule upon my letter, is no refutation of the charges which I had there brought. What does Mr. Du Chaillu say in reference to my allegation that he not only had no sketches when he was here, but told me he was unable to sketch? I desire a reply to that charge. What does Mr. Du Chaillu say in reference to my assertion that he was guilty of a falsehood in stating that he remained in weary expectation of a ship for four months? I quote his own words:—"At last, on the 1st of June I was so happy as to spy a sail. My heart beat anxiously lest she should pass. But to my great joy the little brig stood right inshore. By night I knew that my friends in Gaboon had sent to inquire for news of me. They had given me up for lost. The captain had orders to ascertain how I came to my death. I was glad to assure him that I was not dead yet." The opportune arrival of the *Ocean Eagle* yesterday, enables me to forward the following copy of a document signed by Capt. P. D. Yates of that vessel:—

"Gaboon, Oct. 30, 1861.

"I hereby certify that, about the end of April or beginning of May, 1859, I entered into an agreement with Mr. Paul B. Du Chaillu, then in Gaboon, to proceed to the mouth of the Fernan Vas with my vessel, to ship his ebony, &c., and that Mr. Du Chaillu preceded me by some few days to make his preparations. I further certify that I was not sent by the friends of Mr. Du Chaillu in Gaboon, nor had I any instructions to ascertain the manner of his death, neither did I ever hear a report of his death either at Camma or elsewhere.

(Signed) "P. D. YATES, Master, *Ocean Eagle*."

"Witnesses to the signature of Capt. Yates,

(Signed) "JOHN JORDAN, J. W. HAGG."

The original, kindly placed at my disposal, I retain until my arrival in England. In the mean time I am able to give the following extract from a note this instant received from the Rev. W. Walker; which fully bears out my former statement, and, in connexion with Capt. Yates's certificate, renders it indisputable.

"Dear Sir,—I find by Mr. Best's memorandum under date May 5, 1859—'Capt. Lawlin and Mr. Du Chaillu went to Camma. 11th May, O. Eagle went to Camma. June 5th, O. Eagle arrived from St. Thomas. June 11th, Capt. Lawlin arrived from Camma, &c. June 14th, Mr. Du Chaillu went to Corisco. June 16th, O. Eagle sailed for Corisco and New York.' I do not know whether Mr. Du Chaillu returned from Camma in the O. Eagle via St. Thomas, or came with Capt. Lawlin, otherwise I suppose the above memoranda indicate his movements precisely. He embarked at Corisco in the O. Eagle for New York. Very truly yours,

(Signed) WM. WALKER.

"R. B. Walker." I leave the public to make their comments on the foregoing.

My motive for writing to contradict the assertions and falsehoods of Mr. Du Chaillu was to put the public on its guard against a travelling pretender, and in acceptance of the challenge of Mr. Du Chaillu himself—who has not dared to

come boldly forward in person to contradict me. I certainly was unaware, at the time I wrote my letter of the 22nd of July, that my brother-in-law had previously published extracts from my former private letters; but as he had full authority to do as he liked with that letter—to publish it or suppress it, as he thought fit—the fact of his preferring to lay it before the public sufficiently proves that his motives were disinterested, and that he was ready, for the sake of scientific truth, to brave the attacks which the protectors of Mr. Du Chaillu would not fail to make after the publication of the letters of November, 1858, and May, 1859. The change of opinion on my part, between May, 1859, and July, 1861, is sufficiently explained by the preposterous growth of the pretensions of Mr. Du Chaillu. When in Gaboon, previous to his departure for New York, that person was modest and reserved in his statements, knowing that there were too many people able and likely to contradict him, had he then been the full-grown Munchausen he has since shown himself. Mr. Du Chaillu appealed confidently in the *Times* to the missionaries and traders in Gaboon and Corisco. I, as one of the latter, accepted his challenge, and he does not come forward to refute me. Will he publish his letters to the Rev. Messrs. Walker and Mackay, entreating their testimony to his veracity? Will he lay before the world the replies of those gentlemen to his impudent request, which in reality was neither more nor less than asking their evidence as missionaries—and, consequently, credible witnesses—to prove the truth of what they knew to be utterly false, as did Mr. Du Chaillu himself when he wrote his book, and when he had the audacity to appeal to the "missionaries and traders at Gaboon and Corisco"?

The Rev. Mr. Wilson is, doubtless, an excellent authority on many matters connected with this coast; but having left Gaboon some years previous to the date of Mr. Du Chaillu's supposed adventures, he can only know of them from hearsay, or from Mr. Du Chaillu himself.

My desire for notoriety is not so great as the papers kindly suppose, nor should I wish for an introduction to the public through the medium of P. Belloni's book, although, perhaps, my claim would be as great as that of some others mentioned; at any rate, Mr. Belloni or Du Chaillu would have been in what his adopted countrymen call a "fix" more than once but for me.

Why did not Mr. Du Chaillu avail himself of the presence in England of the missionary indicated by me in my former letter to prove his veracity?

The arrival of the book of Mr. Du Chaillu and the papers containing his and Dr. Gray's letters at the same time, is explained by the fact of there being a monthly line of steamers between Liverpool and the West Coast of Africa. In conclusion, although not wishing now to commence a fresh onslaught on Mr. Du Chaillu, may I ask him without indiscretion, how it happened that he never mentioned to his friends in Gaboon, &c. the slaughter of the elephant by innumerable fan spears, of which he gives an engraving at page 83?

R. B. WALKER.

THE MAYER MANUSCRIPTS.

Hurst Green, Sussex, Dec. 9, 1861.

I have just read in last week's number of the *Athenæum* your critique upon 'Fac-Similes of Certain Portions of the Gospel of St. Matthew, and of the Epistles of St. James and St. Jude, written on Papyrus in the First Century.' I feel sure that, as my name is brought forward in your review in connexion with these MSS. as their professed discoverer, you will allow me to clear myself, as I think it right at once to do, from any share in their publication, and from any attempt, therefore, which you believe there exists, to impose on the credulity of the "British public."

Some three or four years ago Mr. Mayer, among other antiquities, obtained some MSS. on papyrus from me, which I had brought myself from Thebes in Egypt. At the time they came into Mr. Mayer's hands they had not been fully unrolled. They were, at any rate, however, genuine MSS.; but all of them, I believe, in the Hieratic cha-

racter, and containing portions, most probably, of the ancient Egyptian Ritual. If Mr. Birch's memory serves him, I think he would confirm this, as they were inspected by him. I never heard more of these MSS. until about a year and a half ago I happened to be in Liverpool and saw Dr. Simonides, who showed me a small piece of papyrus, on which was written, in the uncial character, a few verses of the ninth chapter of St. Matthew's Gospel. I spoke to Mr. Mayer afterwards about it, and he told me that Dr. Simonides believed that among the same lot of MSS., which he said were those he had obtained from me, he had discovered other portions of the same Gospel. I confess that I was greatly surprised, and felt great doubts of these fragments having ever formed part of any of the MSS. which had been in my possession.

The next I heard of the subject (except from an occasional short reference to the assumed discoveries in local papers) was from a letter of a Correspondent of the *Guardian*, under date August 14th of this year, which spoke of the forthcoming publication of these "Fac-Similes." In this letter I was astounded by the information, that "there is reason to suppose that one of the papyri is the original copy of St. Matthew's Gospel, written by Nicholas of Antioch at the personal dictation of the Apostle!" I at once wrote to Mr. Mayer to ask for information, and to express my astonishment at the magnitude of Dr. Simonides' discoveries, and to say that I trusted he had been very careful to assure himself that these MSS. had really come out of his Collection. I naturally felt that both Mr. Mayer and myself might be exposed to unpleasant reflections in case any deception was being practised. Up to this date I have received no reply from Mr. Mayer, nor have I myself yet seen the publication of the "Fac-Similes." I make this simple statement to you, trusting to free myself from any responsibility connected with the publication. I leave it to others to settle the question of the genuineness of the MSS. All I can say is, that I cannot myself believe that they were ever in my possession. I examined my own MSS. sufficiently to feel convinced that they were in the Hieratic character. If you will allow this letter to appear in your next number, you will oblige, Yours, &c.,

HENRY STOBART.

P.S. I think you are in error in a statement that "it is an undoubted fact that no MSS. of any kind, if we except the Hieratic papyri, are known to ascend to the first or second century." I brought home with me from Egypt in 1855, I think, four wooden tablets covered with manuscript, written upon a kind of cement, which contained a series of astronomical observations, in the Demotic character, made in the reigns of Trajan and Hadrian. They are in Mr. Mayer's Museum, and have been translated by Dr. Brugsch of Berlin, and published both in English and French—the observations having been submitted both to Mr. Airy and to M. Biot, and their truth confirmed by them. An account of them can be seen in one of the papers read before the Astronomical Society in, I think, the year 1855, and their date is unquestionably that of the second century.

I would only add, also, with reference to another remark in your review, that "The Funeral Oration of Hyperides," which was also brought home by me from Egypt, was not selected by Sir F. Madden from among the MSS. now in Mr. Mayer's possession. It was offered to the British Museum along with some Coptic MSS. in the Greek character, all of which were purchased by the Museum, and I am sorry to say have never yet been published. It is right that I should mention this, as your remark might lead your readers to infer that the MSS., which Mr. Mayer obtained from me, had been rejected as spurious by the British Museum, which was in nowise the case.

* * Mr. Stobart's postscript requires from us a word of explanation. We do not for a moment doubt that Mr. Stobart brought the tablets of which he speaks from the East, and that they ascend, as he says, to an early period. Their value is above suspicion, and they ought assuredly to have been secured for the National Library. We meant to say

that no such MS. as the fac-similes of M. Simonides are known to exist. Of course Coptic Papyri exist; but about this class of document there is no discussion whatever. May we venture to offer a suggestion to Mr. Stobart? Why not go down to Liverpool and inspect the MSS. which he sold to Mr. Mayer? He would be able, probably, to recognize his own collections, and to state whether they are in exactly the same condition as when he brought them from the East.

INVENTIONS ABOUT TURNER.

Crossbrook, via Sheffield, Dec. 10, 1861.

MY attention has been called to certain passages in Thornbury's 'Life of Turner,' vol. ii. p. 238, in which the author has got up a specious description of my purchase of two pictures from the great artist; and, upon the pretended facts, he founds conclusions very derogatory to the character of Turner, and doubtfully complimentary to myself. If Mr. Thornbury had shown me the common courtesy of inquiring as to the facts before he had committed himself to print, he would have avoided the direct contradiction which I think it necessary thus publicly to give to his statements. He has amused himself with describing how, "when it came to settlement, Turner's parsimony rose to the surface"; how "he claimed 80 more guineas in consideration of his going expressly to Venice to paint the picture"; how "I thought this postscript of 80 guineas an afterthought—an extortion—a shuffle—a mean attempt at raising a price previously agreed upon"; how "the blue sky of Venice looked black and ugly, as I looked at it and saw 80 guineas written all over it in red ink"; how "I would not have the picture"; "down comes a growling letter from Turner, requesting the immediate return of the picture"; he will "not bate an ace"; how, "before the coffin-lid of the packing-case was closed," the attractions of the picture were so irresistible that "I could not part with it"; "back to the dusty lumber-room in the roof goes the packing-case, and off flies a cheque to scowling Turner, in Queen Anne Street, for 1,080 guineas, which Turner pockets with a malicious chuckle."

Now, all this frivolous detail is a complete fiction from beginning to end. There is not one word of truth in the whole story. Fortunately, I have Turner's letters and receipts before me to confirm this contradiction. 'Venice' was exhibited in May, 1834; and, before it had hung one week on the walls of the Academy, I paid him, without the slightest objection or hesitation, 350*l.*, the price which he had fixed for the picture; and 300*l.*, a larger sum than Turner had asked, was a year or more afterwards paid for that beautiful creation of 'Lightermen Heaving in Coals by Night, at South Shields,' which was exhibited at the Academy in 1835. Thus, even in the price, Mr. Thornbury is grossly mistaken. The sneer, too, as to my selling the picture for a commercial profit, is an unjustifiable assumption. Family circumstances arose at this time which, to my deep sorrow, made it my duty to sell these and three or four other beautiful works. It is, however, the wrong representation of the conduct and character of Turner which I am anxious to point out. No one could have behaved with less parsimony—I may almost say with greater generosity—than did Turner in his transactions with me; and I cannot help denouncing it as an insufferable impertinence in a book-maker to present as facts to the public a tissue of unfounded suppositions, and thus create a false impression as to the character of a most distinguished artist. HENRY MCCONNEL.

* * A Correspondent, who dates from "Rectory House, Fonthill-bishop, Wilts," and signs "Barton Bouchier," asks us to state that Mr. Thornbury is in Egypt, and has, therefore, not seen the accusations brought against him.

ASCENT OF THE WEISSHORN.

December 7, 1861.

WILL you allow me to say one word in reference to a sentence in this day's *Athenæum*, as it may help a brave man in his vocation. After accomplishing the last dead lift which placed my two companions

and myself on the highest rock of the Weisshorn, we paused a moment to take breath. The summit was within a few paces of us—a little pyramid of spotless snow, with a sharp ridge leading to the top of it. The man who had been in the rear of our little party during the day here stepped forward, and set his foot upon the ridge, with the apparent intention of going to the top. His progress was arrested by a rather emphatic exclamation of "Back!—not you." Johann Joseph Bennen—the best and bravest climber I have ever met—had been my leader throughout. Him I ordered to the front, and he it was who first planted a foot upon the summit of the Weisshorn.

JOHN TYNDALL.

THE OCTOROON.

"The Rancho, Gerrard's Cross, Bucks, Dec. 10, 1861.

THE author of 'The Quadroon' presents his compliments to the Editor of the *Athenæum*, and through him to "Suum Cuique," his clever Correspondent, who can prove one book to be "pirated" from another, without having read the first, or given more than a cursory perusal to the second. Under some such confession "Suum Cuique" complacently pronounces 'The Quadroon' to be a piracy from a "romance," which appeared in the *London Journal*, of 1855, under the title of 'Masks and Faces.'

Forced from his privacy by this grievous imputation—not the less grievous that it is utterly untrue, the author of 'The Quadroon' might have been tempted to say some severe things of "Suum Cuique." Among others, that such a conjectural insinuation is unworthy of a man of letters, especially one who is permitted to make his mark in the columns of the *Athenæum*. He contents himself, however, by stating a few facts with which "Suum Cuique" appears not to be acquainted, and which will probably modify the opinions of that ingenious gentleman. In a knowledge of the two works in question, the author of 'The Quadroon' has the advantage of "Suum Cuique," since he has read both—'The Quadroon' in 1852, and 'Masks and Faces' yesterday, for the first time in his life. Notwithstanding the vast amount of information, to say nothing of the gratification procured by a perusal of the latter work, he was no little surprised, that, throughout all the story of 'Masks and Faces,' published in the *London Journal* of 1855—the date so pertinaciously insisted upon by "Suum Cuique," he was unable to discover a single scene bearing the slightest resemblance to anything in 'The Quadroon,' not even a thought that could be charged with similitude. Nothing of slave or plantation life; nothing of Louisiana or America either; in short, to use "Suum Cuique's" own words, nothing of those "persons and events which form the staple" of 'The Quadroon.' It is true, that in a rather disjointed addition to 'Masks and Faces,' published in the *London Journal* of 1856, there are three or four chapters describing a slave-sale at New Orleans, in which a beautiful 'Creole lady, almost a perfect white' (as 'Suum' describes her), figures as one of the "lots," and is sold as such; but who, by a bold adventure that takes away one's breath to read, is immediately after rescued, and carried off in triumph from the midst of the crowd—purchaser included—by a brave English freebooter, who threatens to bombard New Orleans, and actually destroys all the *dramatis personæ* that are hostile to him, by a single shot from his long Tom! This splendid piece of gun practice, though it might be thought nothing now-a-days, was of such consequence then, that it at once put an end to the pursuit, at the same time terminating the incident from which "Suum Cuique" thinks, or insinuates, that 'The Quadroon' must have been taken!

It is necessary, therefore, to inform "Suum Cuique" that, during a residence in Louisiana of many years (commencing in 1839, and ending, with intervals of absence, in 1848), the author of 'The Quadroon' was an eye-witness of nearly a score of slave-auctions, at which beautiful Quadroon girls, not Creole ladies "almost perfect white," were sold in bankruptcy, and bought up, too, notoriously with the motives that actuated the "Gayarré" of his tale; and that upon such actual incidents was

the story of 'The Quadroon' founded. Most of the book was written in 1852; but, as truthfully stated in its Preface, in consequence of the appearance of 'Uncle Tom's Cabin' its publication was postponed until 1856. The writing of it was finished early in 1855, long before 'Masks and Faces' saw the light.

But it is not a question of dates, as "Suum Cuique"—himself so slippery upon this point—would make it appear. Jack-the-Giant-Killer antedates Jack Sheppard, not by years, but by centuries; yet who will affirm that the escapades of the bold burglar were borrowed from the adventures of the puissant little slayer of giants?

Between these two books there is almost as much similitude as between the "long exciting romance" of 'Masks and Faces' and 'The Quadroon,' or even 'The Octoroon.'

But with regard to 'The Quadroon' and the Adelphi drama, the case is quite different. There the resemblance is just that which must ever exist between a melo-drama and the romance from which it is taken; and when 'The Octoroon' was first produced in New York—January, 1860—its scenes and characters were at once identified by the newspaper critics of that city as being transcripts from 'The Quadroon.' Some of its scenes, as at present performed, are original,—at least, they are not from 'The Quadroon,'—but these introduced incidents are generally believed not to have improved the story; and one of them—the poisoning of the heroine—Mr. Boucicault has had the good taste to alter, restoring the beautiful Quadroon to the happier destiny to which the romance had consigned her. It might be equally in good taste if the clever dramatist were to come out before the public with a frank avowal of the source whence his drama has been drawn.

The Author of 'The Quadroon' would gladly have declined discussion on a subject which cannot much interest the readers of the *Athenæum* one way or the other. It is no great merit to have been the originator of 'The Quadroon,' 'The Octoroon' or 'Masks and Faces'; but the imputation upon his literary character has in this case forced him before the tribunal of the public; and he would still have remained silent if that public—or such of it as cared about the question—could have had an opportunity of perusing the "long exciting romance" of 'Masks and Faces.' This however, buried among the ample archives of the *London Journal*, is no longer accessible.

It is to be hoped that the prominence now given to it may produce a reprint—perhaps the principal motive of "Suum Cuique" in causing the matter to be mooted.

Nevertheless, it is not easy to understand how "Suum Cuique" or the "Author of 'Whitefriars'" can be benefited by the reprint of a story not written by either of them; since one of the strangest facts elicited by this investigation is, that 'Masks and Faces' is, after all, not the production of the Author of 'Whitefriars,' but of another gentleman—Mr. J. F. Smith—into whose hands "Suum Cuique" is now respectfully consigned."

JOHN O'DONOVAN.

CELTIc Literature has sustained a loss in the somewhat premature death of Dr. O'Donovan, which took place in Dublin, after a month's illness, at midnight, on Monday last. Born in a farmhouse near New Ross, in 1810, and distinguished from an early period for a passionate devotion to the vernacular tongue and literature of his country, O'Donovan proceeded to Dublin, at the age of fifteen, for the purpose of instructing in the Irish language Captain (now General) Sir Thomas Larcom, who subsequently intrusted to him much onerous duty in connexion with the Ordnance Survey of Ireland. Dr. O'Donovan was the author of the most comprehensive Grammar extant of the Irish Language, and edited several curious volumes for the Archaeological and Celtic Societies, which extended to many thousand pages; but the work which may be said to have given him a European reputation was his erudite translation of, and voluminous notes to, 'The Annals of Ireland by the Four Masters,' published in the year 1851, in seven volumes 4*to*. Without these national records—

minutely illustrative as they are of an integral portion of the Empire—the History of Great Britain could never be regarded as complete. As O'Donovan's predecessors in the scantily-cultivated field of Hiberno-Celtic literature had left compilations behind them calculated rather to mislead than to aid, it may well be supposed that the translation of the 'Annals' proved no easy task. Innumerable passages are clothed in a dialect so long obsolete, that the erudite Dr. O'Connor, who also essayed the task, was compelled to leave their depths unfathomed. O'Donovan, however, not only mastered this difficulty, but laboriously collated the assertions of the Four Masters, by reference to other manuscript authorities with which they themselves were confessedly unacquainted. The result is a work of interest and utility, not to the historian only, but to the genealogist, the topographer and the antiquary.

Dr. O'Donovan graduated as a Doctor of Laws at Trinity College, Dublin, and in Hilary Term, 1847, became a member of the Irish Bar, at which, however, he never practised. On the establishment of the Queen's College, in Belfast, Dr. O'Donovan was appointed Professor of Irish History and Archaeology; and his lectures from that chair were marked by eloquence, erudition and sound common sense. Aided by his learned colleague, Prof. O'Curry, Dr. O'Donovan had made considerable progress in a translation of the Brehon Laws, which consist of a code extremely minute in its provisions, and to which much, even of our existing jurisprudence, may be traced. The translation of this great work had created a deep interest, not in Ireland only, but amongst various learned bodies on the Continent. Celtic scholars are indebted to Mr. Disraeli for having, when Finance Minister, made a grant to defray the expenses of the undertaking.

Dr. O'Donovan had also been engaged, at the period of his death, in annotating and translating Cormac's 'Glossary'; and his recent labours to produce an accurate Irish Dictionary—the want of which has long been a reproach to the sister country—have been already noticed in these pages. What the Irish language is in itself is a question which has frequently been asked by learned pens and tongues. Vallancey had compared it with most of the languages of the world, and pronounced it to have affinity with them all; but his philological system has been exploded. J. C. Zeuss, however, a native of Bavaria, settled the question in 1853 by the publication, at Leipzig, of his great work, 'Grammatica Celtica.' But no one in Ireland knew the importance and character of the discovery until Dr. O'Donovan, about eighteen months ago, announced and expounded it. Besides the labours to which we have referred, he catalogued in our national libraries a large quantity of curious and valuable MSS. Dr. O'Donovan had been a member of the Royal Irish Academy, of several Archaeological Societies, and of various learned bodies on the Continent. He might be seen taking his daily exercise in all weathers—often struggling against storm and hail, yet intently pursuing his course. He never could be induced to avail himself of a vehicle, erroneously imagining that walking exercise, even in the most tempestuous weather, was necessary as a counterpoise to the sedentary pursuits which consumed so large a portion of his time. In unwisely indulging in one of these excursions, he caught his mortal illness.

OUR WEEKLY GOSSIP.

WE hear that the Lord Chancellor and the Master of the Rolls are inclined to have the important documents whose recovery to the uses of history—and especially in connexion with Lord Chancellor Bacon—we recently announced, set in order, abstracted and calendared,—at least, so far as Lord Bacon's decrees and decisions are concerned. We trust that our great legal authorities will go a step further. No better service could be done to historical inquiry. The light which these papers shed on the judicial acts of Bacon they also shed on the judicial acts of his successors. For personal history these Chancery

Records are more important than the regular State Papers; and it is greatly to be desired that some means will be found for rendering them accessible to the public.

Though the details of the great Museum Reform are not yet settled—an Act of Parliament, and therefore a vote of the House of Commons, being necessary—we may mention, that the Government plan is understood to comprise a complete separation of the Literature from the Science. Mr. Panizzi and the books will hold their ground. Prof. Owen and the natural history will troop away. Ample space is required for each grand division of the national property; more for the natural productions than the intellectual. Man is a finite creature; the works of his brain and of his hand are numbered; all the books, the monuments, the illustrations which exist in the world, could be counted, described and lodged in a comparatively brief time and space. The British Museum, with the enlargement of which it is capable, will hold our library and its accessions, for the next five hundred years. Not so the productions of nature. These defy enumeration. At every turn we come upon new species and new genera: we discover not new specimens but new worlds. At this day we are only at the beginning of our collections of natural history, and our plans must be laid down for the future rather than for the present. Hence we should at first purchase ample space—leave ourselves room for growth in future ages. The more provident plan is ever the wiser plan.

Mr. A. A. Paton, whose travels in Servia and the Danubian Principalities awoke an English interest in the East of Europe many years ago, is about to produce a revised and corrected edition of his works of travels. The edition will be published in London and in Leipzig about the same time.

A Catalogue of the valuable books and papers belonging to the Society of Antiquaries has been printed, and will soon be ready for distribution among the Fellows. The Catalogue will, for the first time, render those literary treasures available. It is not, we think, generally understood by scholars that this fine library is accessible, on proper application and cause shown, to students who may not belong to the Society.

It is not generally known, we believe, that an expurgated edition of Walter Scott has been published for the benefit of Roman Catholics; but the fact is recorded in the new edition of Feller's 'Biographie Universelle,' published at Lyons, with a continuation by the Abbé Simonin. "Though Walter Scott," we are told, in the notice of his name, "is not a romancer of the dangerous class, he gives, nevertheless, too lively a picture of the passions, and makes frequent attacks on Catholic institutions; this has led D'Exauvillez to undertake a new and abridged translation of his works, in which he has taken care to omit all that is condemnable. This translation is published under the auspices of the Society of Saint Nicholas, No. 39, Rue de Sévres, Paris, and is principally suited for young persons." It will be long, we presume, before there is any English "Family Walter Scott" to take its place by the side of the Family Shakespeare.

We are requested to state—and we do so with pleasure—that the beautiful stereoscopic views of Paris, just published, are the work of an English photographer, Mr. W. England, who took them during the past summer.

On Monday, Mr. Boucicault supplied a happy ending to his drama of 'The Octoroon.' This is a matter of more importance than may appear at first sight. There is no doubt that the public are in favour, in all cases, of felicitous conclusions to fictitious narratives, both on and off the stage;—but in this case there is a deeper principle concerned than such mere popular predilection. In America, where fortunate catastrophes are as much liked by audiences as in England, the death of the heroine met with no objection, but, on the contrary, was received with approbation. The reason was, that there the tragic consummation implied a moral which was nationally acceptable; while here the audience were indifferent to its local

application, and were, indeed, disposed to accept or reject the new drama on other grounds alone. A work of Art, as such, is dependent in all cases on these exclusively, and not on its moral purpose. Goethe has somewhere well said, that any play, poem or story, that concludes with a moral tag, and has evidently been written for its sake, is essentially a bad one. For himself, he avoided such direct inferences; and cited Shakespeare as his exemplar. In great plays, such as 'Othello,' 'Lear,' 'Macbeth' or 'Hamlet,' not only one but many morals are involved, and the spectator is left to receive their various influences as they may arise during the performance, and the general effect of all at the termination. 'The Octoroon,' therefore, was faulty in having any direct moral at all; and the only excuse for it could be, that such moral suited the people to whom it was originally addressed. But on the English stage, the moral, such as it was, proved useless. On other grounds the unhappy ending was also a mistake. The drama, being of the "sensational" sort, proceeded on the principle of exciting a sense of danger, with the tacit understanding that there was to be a deliverance from it. Audiences, to whom such pieces are addressed, have always such an expectation; and if it is not gratified, are invariably disappointed. And this natural expectation is a point of Art not to be disregarded with impunity in any drama. For these reasons, therefore, we hold the popular instinct to have been right in regard to this play; and Mr. Boucicault to have acted wisely in yielding to its demands. The fifth act now supplied by Mr. Boucicault is borrowed, it appears, from the Author of 'Whitefriars,'—and is one of exciting and well-sustained interest. This, indeed, begins with the conclusion of the previous act. Zoë, during the confusion consequent on the explosion of the steamboat, takes refuge in a canoe, but is followed by her ruffian purchaser, who is pursued by her friends. The pursuit is continued, under various interesting circumstances, throughout the fifth act. Jacob Maclosky, at last, seems to have the advantage of his pursuers, having taken refuge on a rocky ledge, whence he is able to fire at them with precision. But, by an act of self-devotion on the part of Salem Scudder, he is betrayed into exposing himself to the aim of George Peyton, whose shot takes fatal effect. The lover and the redeemed Octoroon thus meet in safety, and determine to solemnize their union in another land, where the laws permit their marriage. This result was received with unanimous applause by the house; and it is probable that the drama, like its predecessor, will now have considerable success. In many points it is the superior production.

Mr. and Mrs. German Reed's entertainment has this week been enriched by the addition of a new version of 'Colleen Bawn,' adapted to music from old Irish airs, by Mr. Frank Musgrave and Mr. John Parry. The story is related and played by Mr. Parry with a humour which is infinitely delicate and genuinely Irish. The entertainment is sure to be attractive.

Herren Haase & Co., of Berlin, have made a set of photographic studies—visiting-card size—of the principal persons who attended officially the late Coronation Fêtes in that city. They are well done as mere photographs, and the groupings of imperial and royal persons are of unusual interest.

The International Decimal Association ought to be called the Metrical Association, since its intentions are to introduce, if possible, the French *Metrical* system, and to oppose every other decimal system. They have forwarded a circular to all the Chambers of Commerce, announcing that the Wolverhampton chamber has declared for the metrical system, and that Mr. Cobden is to move for a Committee of the House of Commons. They recommend the following form of petition, which, at their request, we print:—

That the present state of Weights and Measures in the United Kingdom is most unsatisfactory, there being as many as Eleven Systems of Weights, either sanctioned by Act of Parliament, or in general use among different classes of persons, besides numerous Local Weights and Measures, differing in almost every market-town, the same denomination signifying different things in different places, and the

whole otherwise exhibiting the greatest discrepancies. That even the Weights and Measures authorized by law are found to be most inconvenient for the various purposes of trade and social intercourse, on account of their cumbersome division, the great waste of time they entail in calculations, the liability to error which they produce, and the want of homogeneity in all their parts. That the Metric System of Weights and Measures, being established on a scientific basis, and having been found exceedingly well adapted for all practical and scientific purposes, and admitted into many countries of Europe and America with unexceptional advantages, has the best recommendation for its adoption in the United Kingdom, and in the opinion of your Petitioners is likely to produce a decided boon to the whole community. That having regard to the increased intercourse with the Continent of Europe likely to ensue in consequence of the Treaty of Commerce recently concluded with France, from the reduction of postage, and from the abolition of passports, it is all-important that the Weights and Measures which are employed in international transactions should be assimilated as much as possible in all countries. That in the opinion of your Petitioners this is a most favourable time for commencing the change, the public mind in this country being now sufficiently prepared for it, and your Petitioners would therefore pray that a Committee of your Right Honourable House be appointed to inquire into the present state of Weights and Measures, and to suggest a plan for the introduction of the Metric System into the United Kingdom.

—For ourselves, we have strong objections to the Metrical system; but we do not object to the Committee, or to the discussion: these would, we believe, be useful as keeping up attention to the subject, and as tending to lead the country to sound views and a better system than either our own or the Metrical.

The Rev. W. H. Wylie writes on that subject of the Scotch Church and Fanners, which Mr. Smiles's book has brought under controversy:—

"The Manse, Ramsey, Hunts.
"Your Correspondent, 'K,' concludes that the 'grovelling superstition' which condemned the use of winning machines in Scotland was peculiar to the small denomination known as the Seceders. This sweeping conclusion is founded on the isolated fact, that an uncle of Robert Gilfillan, the poet, was expelled from the membership of a Seceding church in Fifeshire because of his persisting in the use of the offensive machine. I fear much that a more careful investigation would lead your Correspondent to a different result, and prove the substantial accuracy of the statement made by Mr. Smiles. The late Sheriff Aiton, in his 'Agricultural Survey of Ayrshire,'—a most reliable work by an acute and unprejudiced man,—gives an instance in which the clergyman of a parish in Ayrshire denounced barn-fanners from the pulpit. They had been newly brought into use, and the clergyman wound up his philippic by calling the innocent objects of his wrath the producers of 'dell's wind.' The parish minister of Kilbirnie, in the same county, went even further than pulpit denunciations; for he 'debarred' all persons from the sacramental table who winnowed their corn with fanners. A Kilbirnie poet, who was too enlightened to share the spirit of these high-handed and superstitious priests, refers to the circumstance in a local rhyme, a copy of which I have in my possession:—

But the priest o' the parish, sae godly and richt,
Gat word o' the war'k that was done i' the nicht,
An' cam' to our mallow, an' made muckle din,
'Bout the corn that was winnowed wi' ungodly win'.

It would be wrong, however, to charge the superstition upon the Church of Scotland; and this is not done by Mr. Smiles. Equally unjust would it be to blame the Secession Church as the author of the superstition; and this is done by 'K.' The truth seems to be this, that there were some ignorant and fanatical ministers in both communions, who were guilty of denouncing fanners as works of the devil.

W. H. WYLIE."

Professor Düntzer, of Cologne, whose publication of Herder's Correspondence we had an opportunity lately to mention, has added to his researches in the great epoch of German literature. His latest work is, 'Goethe and Karl August during the first Fifteen Years of their Friendship.' The different correspondences have served Prof. Düntzer as sources for his work; likewise some valuable manuscript material, especially letters of Karl August to Knebel, which had been entrusted to him for free use by Varnhagen von Ense. Thus Herr Düntzer was enabled to put Goethe's relations to his friend into the right light, at the same time allowing a clear view of his entire court and business life.

Goethe's connexion with Frau von Stein and Herder also receives additional light, which is the more to be acknowledged, as this period of the poet's life has never been satisfactorily treated, however much has been said on the subject. A continuation of the work is in prospect.

A second newspaper in 'Modern Greek' has been added to the list of the London journals. Its title is 'O 'Αγγελος τῶν Βυζαντινῶν Λαῶν,'— 'The Messenger of the Byzantine Nations, the Greeks, the Slavonians, the Dacians, the Caucasians and the Arabs.' The first number appeared on the 5th of December, and it is to be continued every Thursday. The principles that it professes are those of conservatism and progress, or those of the English constitution; which are the principles, it declares, of one party among the Greeks, while another pursues those of the old French Revolution. The contents are to comprise a view of the progress of science, literature and the arts, as well as politics and commerce,—but commerce is to receive so much attention, that the most prominent feature of the first number is, in fact, the shipping news, which cannot be rendered classical, even by being couched in the language of Homer and Demosthenes. The most interesting article on the arts is composed in a long criticism on the new Greek Church at Manchester, on which it appears very different opinions have been expressed: in approbation by the *Manchester Daily Examiner and Times*, and the *Presse de Londres*; in strong condemnation by the *Athenian Magazine*, the *Pandora*, and the Greek architect, Menandros Potesarros, who has been recently paying a visit to Manchester. The criticism of Potesarros is contained in a pamphlet he has recently published at Athens, on the new Church of St. Spiridion about to be erected on the hill of the Parthenon. It may be conceded, that there is some force in his remark, that it would have been appropriate for our Greek residents in Manchester to have employed a Greek architect for the erection of a Greek church, and it is quite possible that his remarks on the building they have erected may be well founded; but his sallies against the names of the builders do not show the temper of a judicious and impartial critic. "We have been compelled," he says, "in treating of a subject of Greek architecture, to mingle with the sonorous names of Ictinus, Callicrates, Isidorus, Callimachus, Anthenius, Theodulus, &c., the names of Clegg and Knowles. No, gentlemen directors of the Greek church at Manchester, if you were genuine Greeks, even supposing that we had no architect worthy of note, you would not have rejected the artistic principles of your nation to embrace the Clegg-and-Knowlesian architecture. Of two things one necessarily governs; if you succeed, the English take the glory; if you fail, they leave you the shame."—Some interesting discoveries in ancient Greek literature are promised for future numbers of the *Angelos*,—we hope, not from the stores of Simonides. The language, which is vocal, differs so slightly from the ancient Greek, not a word being admitted that does not either belong to the old language, or is formed from it, that it may be read almost without difficulty by those who can read Plato. The editor is Nicholas Theodore Koresios. The type is excellent, and the typographical execution does honour to the press of Spottiswoode.

FRENCH GALLERY, 120, Pall Mall.—The NINTH ANNUAL WINTER EXHIBITION OF CABINET PICTURES by living British Artists, is NOW OPEN daily, from Half-past Nine to Five.—Admission, One Shilling.

HOLMAN HUNT'S Great Masterpiece of Sacred Art "BEHOLD! I STAND AT THE DOOR AND KNOCK," especially valuable as the highest and most complete expression of the genius of this eminent English Painter, is NOW ON VIEW at the GERMAN GALLERY, 168, New Bond Street, prior to its being returned to its private possessor, and final exclusion from public exhibition altogether.—Admission Sixpence, from Ten to Five. A perfect light insured at all times.

SCIENCE

Metallurgy: the Art of Extracting Metals from their Ores, and Adapting Them to various Purposes of Manufacture. By John Percy, M.D. *Fuel, Fire-clays, Copper, Zinc, Brass, &c.* With Illustrations. (Murray.)

EVERYBODY is interested in the results of

Metallurgy, and scarcely anybody in its several processes. Its results are visible in the metallic furniture of our houses—from kitchens to attics, from stove, fender and fire-irons even to the little steel pen with which these lines are written. In fact, its final results in manufactured articles are with us everywhere, abroad as well as at home. By means of fuel we travel; by means of coined precious metals we trade; by means of copper we protect our ships' bottoms; by means of zinc we have roofing and shelter; by means of brass we have ornaments in the common cottage and in the consecrated church; and by means of iron we speed to and fro on sea and land, fight our battles, render our huge war-vessels invulnerable, fabricate cannon so formidable as to frighten the world, throw bridges across broad rivers, and erect a mighty framework for International Exhibitions. Such are, in brief, the results of Metallurgy.

But the processes are very different things. The most imaginative writer can throw no air of romance over them. A coke-oven, a blast-furnace and a smelting-house are objects which would defy even the Poet-Laureate to render poetical. It is quite enough if they are not pestiferous and unhealthy. In order to have copper coinage, we must needs have copper smelting-works; but unfortunate are the people who dwell under their shadow. A visitor to Swansea may behold dense clouds which were never under the control of "cloud-compelling Jove," and which the people of Swansea have in vain sought to remove by any compulsory process, legal or scientific. At no place in the world is so much copper smelted, and over no place in the world hangs there such a cloud of unbroken density—never raining down copper for the enrichment of the poor, but perpetually rolling along in white volumes, more or less opaque, and sometimes allowing its fleecy skirts to bear a ray or two of the evening sun, which, by an imaginary alchemy, passes from cloudy copper into cloudy gold. This is Swansea's banner, waving high and broad, and frequently seen with distinctness (by Dr. Percy and others) at a distance of twenty-seven miles in a direct line from Swansea, viz., at Lynton, on the south side of the Bristol Channel. In some directions of the wind, a certain coppery or sulphurous acid taste is enjoyed in every house in Swansea; and it is not to be expected that people so situated can have much other taste for metallurgy. If you wish to ascertain the bad effects of working in these establishments, you may or may not consult local statistics, for there are those who can adduce them on either side of the argument; but go on the next Sunday to a neighbouring chapel, where nearly the whole numerous congregation consists of the workmen and their families, and, after you have scanned the visages and the stature and the whole aspect of these industrial folks, you will be grateful that you do not breathe in a copper-cloud, and that you can behold the rising and the setting sun without looking through such a pernicious medium. London fogs are bad enough, but Swansea clouds are incomparably worse. No less than 65,900 cubic metres of sulphurous acid are every day projected into the atmosphere from the copper-works situated near Swansea. Not a blade of grass will grow on the neighbouring hills, which are particularly exposed to its influence. As to the precise cause of injury, it is probable that the sulphuric acid contained in the copper-smoke is more noxious than the sulphurous acid,—as every drop of rain, in falling through the smoke, becomes a solution of oil of vitriol, which, when it alights upon foliage, is rendered more corrosive by subsequent evaporation of a

portion of the water. The value of the sulphur annually dissipated in the atmosphere was estimated by Le Play at 200,000*l*.

Most simple readers would suppose that all Swansea folks who were able to do so would fly from such a Gomorrah. How little do they know of the local affections of the natives of the Principality! Walking one fine evening with a native of Swansea on an elevation in the suburbs of London, we pointed out to him the principal features of the prospect. Allowing that all was imposing and interesting in the highest degree, he nevertheless expressed his preference for Swansea—even with its coppery canopy and sulphurous taste! A physician, too, of Swansea can even detect elements of the picturesque in the scene, assuring us that “the furnace-chimneys of the copper-works, thousands by number, emit gracefully-gyrating, white, smoky and fleecy columns, which circlingly and wideningly ascend to the upper regions of the atmosphere, threat to be lost in the purity of the invisible air, or, marrying Art to Nature, to be mingled with the clouds.” Dr. Thomas Williams, who writes this, and who is privileged to be always present at the interesting matrimonial ceremony, finds charms in the copper-smoke never before discovered, and intimates that, in consequence of its direct action, “during twenty years agone has ceased to prevail over certain marshes near Swansea.” Did he not assign another cause elsewhere, one might suggest to agueish patients to go through a course of copper-smoke at Swansea!

Other curious things might be said about this smoke, and not the least curious is the legal distinction drawn between it and other smokes. An energetic inhabitant of Swansea having endeavoured to apply the existing law concerning the suppression of smoke to this particular case and place, the legal authorities, when consulted, considered this kind of smoke as exceptional, possibly because it is *white* and not *black*, like ordinary smoke. Of course, no Swanseaite could be induced to swear that white was black; and so there is no case with which to go into court: and as the Swanseaites have lived so long under a cloud, it is doubtful whether they would not feel uncomfortable without it. The loss of sulphur-sauce, too, might cause a loss of appetite; and the public taste might be further deteriorated by the cessation of the perpetual “marriage of Art to Nature,” while Dr. Williams in particular might lose his patience and his patients. So it is as well, on the whole, perhaps, that Swansea should still repose under its coppery cloud.

Ignorance of Metallurgy has often occasioned individual and sometimes national loss; the latter being exemplified in the singular and shameful fact, that, until a few years ago, in our dockyards, a large amount of copper was thrown away in the form of a copper-slag, which remained after effecting the re-melting of old copper in reverberatory furnaces. This valuable product was usually, if not always, consigned to the dust-heap! “Not only,” says the author, “was there rich copper-slag produced in the re-melting of the old metal, but also in the re-refining of new copper, which was formerly done. It is scarcely credible that the person intrusted with the direction of the furnaces should have been so grossly ignorant of the metallurgy of copper as to have permitted this waste; and yet such is the fact, which I should not venture to publish if I were not in possession of indisputable evidence of its truth. It is not possible to estimate the loss which the nation must have thus sustained through sheer ignorance. There are, probably, accumulations of copper-slugs in some of Her Majesty’s dock-

yards, or the vicinity, which present a more promising field for mining enterprise than many a *sett* in Cornwall or Devon. It may, unfortunately, be found, on inquiry, that these rich cupriferous deposits now lie at inaccessible depths, or have been washed away. At all events, the subject is worthy of consideration from mine-adventurers, who are not averse to a plausible speculation; and Chatham Dockyard might be chosen as the scene of the first exploration.” A hint, this, which mining-company makers might instantly profit by, and bring out some such attractive project as “The Dockyards Copper-Mining Company,” &c.

The history of Mining and Metallurgy is marked by other similar instances of ignorance, but by very few of so recent a date and so flagrant a character. One instance is noted in the fact that, some years ago, it was the practice at tin-plate works to throw away, as refuse, a black dust containing much more than half its weight of tin! Dr. Percy and a friend visited tin-plate works in South Wales, and procured specimens of this dust, in which was found 60 per cent. of tin, and which had been in former years thrown away into a neighbouring river.

The profits of commercial Metallurgy, and especially of copper-smelting, have been very generally supposed to be unusually large. At a meeting of the Society of Arts, they were declared to average 40 per cent. on the capital; and projects have been announced this year, under the sanction of respectable names, on the ground that 30 per cent. might be reasonably anticipated. Dr. Percy disabuses the public of such expectations; and it is well that his conclusions should be widely known. “Capital,” says he, “cannot be turned over in copper-smelting more than $2\frac{1}{2}$ times a-year when trade is good, and $2\frac{1}{4}$ times is a fair average. It is questionable whether any concern, on an average of ten years, makes 13 per cent. on capital, inclusive of interest at 5 per cent. per annum. In exemplification of the fluctuating state of the copper trade, I may introduce the following facts, which I have received on authority, namely:—During two years, about 1839, one of the largest and best-conducted firms in Swansea did not realize more than 5 per cent. per annum; and in 1860 another of the principal firms in Swansea actually lost money.” So, then, it seems that these tales of tempting copper-smelting profits do, after all, too often end in smoke.

There is, however, another side of the pecuniary question—whether by smelting or by smoke some of the practical metallurgists have not made considerable fortunes? The most remarkable success was that of the late Member of Parliament, Mr. Muntz, who devised a valuable alloy, applied to “sheathing the bottoms of ships and other such vessels,” and took out a patent for the same in 1832. “Muntz’s metal,” or yellow-metal sheathing, has entirely superseded copper sheathing in the merchant service, although the latter is still retained in the Navy. The patentee admitted that his patent had yielded him 68,000*l*. in the course of fourteen years; and at his decease his property was sworn under 600,000*l*!

All who are practically engaged in the processes treated of in this volume will find in it a very valuable digest of the existing knowledge of British and foreign metallurgists; and all such persons will feel thankful that many years ago the author relinquished medicine for metallurgy. Whether he is a gainer by the exchange of sciences, is a matter that concerns only himself; but we may infer, from the patient assiduity displayed in preparing this volume, that he would have found it quite as

practicable and profitable (if not far more so) to extract fees from patients at home as from pupils in the School of Mines. In one view, indeed, he has made no exchange of professions, for in both the prime personal object is the extraction of metals,—the only difference being, as a chemist would say, quantitative and not qualitative; and the quantitative question, as we have remarked, concerns only the operator. In point of skill, it may be a simpler matter to charge a patient than to “charge” a furnace; and yet, on the other hand, it is easier to give a new copper coating to a ship’s bottom than a new coating to a patient’s stomach.

SOCIETIES.

GEOGRAPHICAL.—Dec. 9.—Lord Ashburton, President, in the chair.—Lord Claude Hamilton, Capt. G. T. Hilliard, Sir C. Rawlinson, Rev. E. J. Shepherd, D. Henty, T. H. Hood, E. Lawrence, R. Low, W. Macpherson, H. Martin, D. Ricardo and C. D. Shepherd, Esqs. were elected Fellows.—The first paper read was—“Notes on Western Africa from the Gambia to Lagos,” by Col. L. Smyth O’Connor.—Communication from Consul Petherick to Dr. Shaw, dated Korosko, Aug. 9, 1861.—Letters from Dr. Livingstone, in which it appeared that, after having navigated the river Rovuma in the steamboat *Pioneer* for a considerable distance, they had been compelled to return on account of the rapid fall of the river. This failure was attributed to the fact that the boat did not arrive from England until the rainy season was far advanced. Besides this the boat drew not less than five feet water.

ASTRONOMICAL.—Nov. 8.—Dr. Lee, President, in the chair.—Col. T. Schaffner was elected a Fellow.—“Extract of a Letter from Prof. Hansen to the Astronomer Royal,” dated Gotha, 1861, Oct. 18.—“On a Result deduced by M. d’Abbadie from Observations of the Total Solar Eclipse of 1860, July 18,” by the Astronomer Royal.—“Total Solar Eclipse, 1861, Dec. 31,” by J. R. Hind, Esq.—“Observations of the Solar Spots,” by Rev. F. Howlett.—“Description of a Portion of the Lunar Surface seen at Dr. Lee’s Observatory at Hartwell, on the Morning of July 31, 1861,” by W. R. Birt, Esq.—“The Lunar Crater Plato.”—Mr. Birt communicated a series of observations of this well-known crater, embracing a period of eighteen months, viz., from January, 1860, to July, 1861.—“On an Instrument for comparing Colours, proposed to be designated a Homochromoscope,” by W. R. Birt, Esq.—“Results of the Meridional Observations of Small Planets; Occultations of Stars by the Moon; and Phenomena of Jupiter’s Satellites: observed at the Royal Observatory, Greenwich, during the Months of June to October, 1861,” communicated by the Astronomer Royal.—“Occultation observed at Highbury,” by T. W. Burr, Esq.—“Places of the Comet II, 1861, from Sextant-Observations of the Distances of the Comet from Fixed Stars, made by Commander A. L. Mansell, R.N., commanding H.M.S. *Firefly*, and reduced under the superintendence of the Rev. George Fisher, Principal of the Greenwich Hospital Schools, by the Officers of that Establishment,” communicated by the Astronomer Royal.—“Places of Comet II, 1861,” by N. M. R. Edmondson, Esq., Assistant, Armagh Observatory.—“Observations made at the Dudley Observatory, Albany, New York,” by G. N. Hough, Esq., Assistant.—“Observation of Minor Planets made with the Olcott Meridian Circle at the Dudley Observatory.”—“On a New Observing Clock,” by Prof. C. Piazzi Smyth.

GEOLOGICAL.—Dec. 4.—Sir R. I. Murchison, V.P., in the chair.—Messrs. S. Harradan, F. M. Burton, J. S. Crowley, W. H. Paine, H. T. Stainton, Capt. A. F. Lendy, E. Witchell, I. Booth and Don Ramon de Silva Ferro were elected Fellows.—The following communication was read: “On the Bracklesham Beds of the Isle of Wight Basin,” by the Rev. O. Fisher.

LINNEAN.—Dec. 5.—G. Bentham, Esq., President, in the chair.—F. A. Jesse, Esq., and C. J. Leaf, Esq., were elected Fellows.—The following papers were read, 'On a new Genus of Tunicata, occurring on one of the Bellona Reefs,' by J. D. Macdonald, Esq.—'Note on the Occurrence of the Crustacean, *Scyllarus Arctus*, in England,' by J. Couch, Esq.—'Note on the Formation of Pearls,' by R. Garner, Esq.

ZOOLOGICAL.—Dec. 10.—Prof. Busk in the chair.—Mr. A. Newton made some remarks on the recent additions to our knowledge of European Oology, and illustrated them by exhibiting a series of eggs from his own cabinet. Mr. Newton also exhibited one of the hybrid wild ducks commonly called *Anas bimaculata*, produced by a cross between the widgeon and wild duck.—The Rev. H. B. Tristram read a list of the Mollusks of the Bermudas, being the result of an examination of about 150 species in his own cabinet from these islands, and a collection of about thirty species presented to the Society by Col. Freeman Murray, late Governor of the Bermudas.—Dr. Günther described a new species of *Plectropoma* from Australia, which he proposed to call *P. Richardsonii*, and exhibited some specimens of Charr from Wales, Ireland and Cumberland, amongst which he had detected a new species proposed to be called *Salmo Grayii*. Dr. Günther also presented a paper by Dr. P. Bleeker, entitled 'Conspectus Generum Labroideorum.'—Dr. Sclater made some remarks on the Ocellated Turkey of Honduras, of which one example was living in the Society's Gardens; and read a paper on the genus *Elainea*, belonging to the family Tyrannidae, in which the characters of some new species were given. A paper was read, by Dr. Dunker, entitled 'Solenacea novæ Collectionis Cumingianæ.'—Mr. Bartlett exhibited and made remarks on a young Polar Bear born in the Society's Gardens.—Mr. G. R. Gray communicated a list of the Birds collected by Mr. Wallace, at Waigoin, Mysol, Matabello and Gaggie Islands, with descriptions of new species.—The Rev. H. B. Tristram exhibited a Snake from Pekin (*Bungarus sp.*) and a series of Pipits obtained in England, amongst which he believed himself able to recognize two, *Anthus obscurus* and *Anthus spinoletta*.—A letter was read from Mr. Robert Swinhoe, Corresponding Member, accompanying some specimens of Mammals from China.

CHEMICAL.—Dec. 5.—Dr. Miller, V.P., in the chair.—Papers were read, by Dr. Oppenheim, 'On Peppermint Camphor'; by Mr. G. C. Foster, 'On Piperic and Hydropiperic Acids'; by Dr. Daubeny, 'On the Power ascribed to the Roots of Plants of rejecting Poisons and other abnormal Substances presented to them'; and by Prof. Balley, 'On some Physical Properties of Tin-Lead Alloys, and 'On the Dangers arising from the Use of certain Waters for Feeding Steam-engine Boilers.' In this last paper the author described two cases in which, owing to the presence of fatty matter in the waters, deposits of carbonate of lime were not pulverulent, as usual, but assumed the form of hard cakes, impervious to water, so that those portions of the boilers on which they rested were liable to become red-hot.

INSTITUTION OF CIVIL ENGINEERS.—Dec. 10.—G. P. Bidder, Esq., President, in the chair.—The discussion upon Mr. Bailey Denton's paper, 'On the Discharge from Under-drainage, and its Effect on the Arterial Channels and Outfalls of the Country,' was continued throughout the evening.

SOCIETY OF ARTS.—Dec. 11.—Sir J. Rennie in the chair.—The paper read was 'Railway Management, from the Passengers' Point of View,' by Mr. T. Baker. The author said that at the time of the Exhibition of 1851 the railways having their termini in the Metropolis were capable of daily delivering and returning 40,000 passengers; but that the Exhibition of 1862 would find the capabilities of the London railways so extended, that instead of 40,000, upwards of 140,000 people might be carried to and from every day. The effective management of railways became, therefore, a matter of national importance, both as

bearing on the question of the comfort and safety of the passengers and the payment of fair dividends to the shareholders. The author touched on some of the principal reasons why ordinary railway traffic was not more largely increased; among which he referred to the inconveniences brought about by the disputes of rival companies in not running trains to suit each other, and the high rates of the ordinary fares, while the excursion fares were, in his opinion, often unnecessarily low. But the point to which he especially directed attention was that persons who were in the habit of travelling constantly found the violent shaking injurious to their health. The author mentioned numerous instances within his own knowledge of persons who had been obliged to give up the habit of travelling daily, owing to the effect of the vibration on the spine and nervous system. What appeared to confirm the author's view most strongly was the remarkable fact, that there were fewer season tickets by 2,000 issued in 1860 than in 1859, as shown by the Board of Trade returns. It was suggested that the present carriages were too much like those used on common roads, and that a totally different method of construction might advantageously be adopted. Various suggestions as to modifying the present springs and generally making the carriages much less rigid, so as to avoid the very serious evil above referred to, were put forward by the author, who also touched upon numerous other inconveniences of railway travelling which might be obviated.

SYRO-EGYPTIAN.—Dec. 10.—Dr. J. Lee in the chair.—Mr. Sharpe read the translation of three Petitions to King Ptolemy Philometor, from a religious Recluse in the Temple of Serapis, near Memphis, of which the first is dated in the year B.C. 157. From these we learn the state of the Egyptian Monks at this time, which had been before unknown to us, or only learnt by inference from their known state after Christianity had entered Egypt. The proceedings taken upon the Petitions show that the delays of office were then not less wearisome than now. The Petitions are on papyrus, of which one half is in the British Museum, and published by Boekh; and the other half in the Vatican, and published by Mai.—Mr. Harle made a communication regarding an Assyrian Cylinder found at Sherif Khan, near Mosul, and now in the British Museum; with an attempt made by Dr. Hincks to decipher the inscription, which contained a name unknown in the annals of the Assyrian Empire, and which name is found repeated in part on one of the bulls disinterred by Mr. Layard at Arban, on the River Khabur.

MEETINGS FOR THE ENSUING WEEK.

- Mon.** Royal Academy, 8.—'Anatomy,' Mr. Partridge.
- Tues.** Architects, 8.
- Tues.** Ethnological, 8.—'Osteology and Dentition, Andaman Islanders,' Prof. Owen.
- Wed.** Statistical, 8.—'Vital Statistics of Sweden,' Mr. Hendriks.
- Wed.** Civil Engineers, 8.—Annual General.
- Wed.** Society of Arts, 8.—'On the Improvements and Progress in Dyeing and Calico Printing since 1851,' Mr. Calvert.
- Geological, 8.—'Carboniferous Limestone, Clee Hills, Prof. Morris; 'Fossil Plants, Lancashire, Mr. Binney.**
- Thurs.** Zoological, 4.—General.
- Naturalists, 7.**
- Linnean, 8.—'Welwitschia mirabilis,' Dr. Hooker; 'Inocarpus,' Mr. Bentham; 'Hamamelidem.'**
- Chemical, 8.—'Hippuric and Uric Acids,' Dr. Bence Jones; 'Solubility of Sulphate of Lead,' Mr. Rodwell.**
- Royal, 8.**
- Antiquaries, 8.**

FINE ARTS

Church and Conventual Arrangement. By M. E. C. Walcott. (Atchley & Co.)

As far as it goes this is a useful compilation. How far short of completeness it is the reader will see who refers to the heading "Towers," which mentions the peculiarity of detached bell-towers thus:—"At both Chichester and Evesham (as once at St. Paul's, Salisbury, Tewkesbury, Bordeaux, Pistoja, Lichfield, Westminster, Worcester) there is a detached bell-tower." An enumeration of detached bell-towers which does not reckon Giotto's Campanile at Florence (to say nothing of others in North Italy) and those still remaining at Berkeley, Walton in Norfolk, Ledbury

in Herefordshire, and that very curious one, composed entirely of timber, with a frame for the bells springing from the ground, at Pembridge, in the last-named county, is incomplete, to use the mildest term. It is very true Mr. Walcott admits in his Preface that his book is incomplete, and solicits the aid of good-natured folks to contribute to the perfection of a second edition. Such politeness may be carried too far. It is a preposterous thing for a man to compile in this fashion, and expect others to fill up the blanks of his negligence. Nevertheless, the idea of the publication is excellent; and, conscientiously and fully carried out, we do not doubt it will pay. The plan of disposing of the materials got together—an immense mass—is also good; and the reader who needs a stark-naked fact, without a grain of critical judgment sticking to it, may dip his hand into this ocean-like index (for such the book is), and make the most of his capture. Myriads of bare facts are in the book, but so thoroughly denuded of all interest and illustrative matter as to be at times unintelligible to the tyro. Thus, the following burnt bone of a fact appears under the head of "Marshalling of Processions," where it is misplaced, by the way:—"A curious acoustic arrangement was found under the screen of Fountains" (Abbey). What this arrangement consists of the reader is left to guess. We believe it was similar to that so elegantly celebrated by Sir Thomas Browne, in the dedication of the 'Urn-Burial' to his friend, wherein he hoped that the urns which formed his theme might have like effect to "the theatrical vessels and great hippodrome urns in Rome, to resound the acclamations and honour due unto him." The textual portion of the book before us states certain facts, mere incidents indeed, upon Byzantine, Basilican, Lombardic, Continental and British architecture. Most of these are such as might be gathered by any student while searching for other matter, afterwards put together under separate headings, with no further attempt at arrangement. To what extent these notes go may be guessed when we state that seventy pages display all the author has to record upon the general arrangements of church architecture under those several headings. This matter is grouped into sub-divisions on such themes as the orientation of churches, the interior arrangement of Byzantine churches, conventual and caputular Byzantine buildings (the last comprised in five lines only), development of the Basilica, Old St. Peter's at Rome, the Lombardic, Italian and Sicilian Gothic styles (all three crammed into as many pages), the Greek Cross, Baptisteries and double churches, crypts, symbolism, &c. Part II., in thirty-eight pages, produces the notes on Conventual Church Arrangement; preceded by a bare summary of the peculiar disposition of the various monastic orders—Benedictines, Cistercians, Austin Canons, Premonstratensians, as well as those adopted by the friars—Franciscan, Dominican, Carmelite and Austin.

FINE-ART GOSSIP.—The three Gold Medals of the Academy have this year been earned and given. Mr. A. B. Donaldson took one for Historical Painting.—Mr. G. Slater one for the best Historical Group in Sculpture.—Mr. T. H. Watson for the best Architectural Design. Silver Medals were gained by Messrs. N. E. Taylor, T. Gray and W. B. Richmond for Drawing from the Life,—by Messrs. H. Bursill and J. S. Wyon, for Models from the Life,—by J. S. Callcott, for a painting from the Draped Model,—by Messrs. G. Smith, T. H. Thomas and W. Tomlinson, for Drawings from the Antique,—by D. Davis, for the best model from the Antique,—and by Messrs. G. Scappa and A. Ridge, for other drawings.

The inhabitants of Penzance are at length going to honour the memory of their illustrious townsman, Sir Humphry Davy. It is intended to erect a granite column in the town, surmounted by a statue of the great chemist; representing him holding his celebrated safety-lamp. Architects are invited to send in designs.

Queen Eleanor's Cross, at Waltham, should be looked to, or it will be beyond succour. Standing at the junction of a side road with the main highway, this erection is backed by a petty, modern brick cottage, on the front of which are placed many portions of the covering removed from the Cross at its last "restoration." This work is of peculiar interest to Englishmen, because the building accounts still existing prove it to be mainly the work of English artists. The documents in question, which have been printed by Mr. Beriah Botfield, testify that only one foreigner was employed upon it and the similar works erected in memory of Queen Eleanor. The successful restorations effected by Mr. Burges in Waltham Abbey Church, undertaken mainly from local subscriptions we believe, indicate a love of Art and respect for county antiquities which might find fit employment in insuring at least ordinary care of the famous, but ill-used, cross in the neighbourhood.

Messrs. Low & Co. publish 'The Psalms of David,' illustrated by Mr. John Franklin. With the exception of a few figure-designs of no merit whatever, the illustrations to this book are merely borders, which we can only describe as of a bold, rustic character. Running scrolls of leaves, flowers and intertwining stems, with occasional figures of men and animals, employed as a merely ornamental margin for the pages, without any aptitude to the text inclosed by them, seem to us lacking the very first condition of human interest, i.e. motive, and therefore hardly to be styled works of Art, but rather results of an elaborate idleness. To say these matters are cleverly and even vigorously done, is but to say that much technical skill has been wasted upon things which make no impression on the mind, and are only distinguished from one another by the more or less intricate nature of their details. The same publishers produce a little volume of illustrated poetry, styled 'The Poets of the Elizabethan Age.' The designs are by various artists, amongst whom Mr. J. Gilbert and B. Foster are most notable. They are pretty, pleasing and tastefully modest, without displaying any great merits or faults.

MUSIC AND THE DRAMA

SACRED HARMONIC SOCIETY, Exeter Hall. Conductor, Mr. COSTA.—FRIDAY NEXT, December 20, the usual Christmas Performance of Handel's MESSIAH.—Vocalists, Madame Guerrabella, Madame Sainton-Dolby, Mr. Haigh and Mr. Weiss, Trumpet Obligato, Mr. Harper.—The Band and Chorus, the most extensive available in Exeter Hall including among the instrumentalists sixteen Double Basses, will united number nearly Seven Hundred Performers.—Tickets, 3s., 5s. and 10s. 6d. The Offices of the Society are at No. 6, Exeter Hall.

ST. JAMES'S HALL.—THE SISTERS MARCHISIO.—Jan. 2, 1862.—Mr. LAND begs to announce a GRAND ORCHESTRAL CONCERT, on THURSDAY EVENING, Jan. 2, when the celebrated Vocalists, Mdlle. Carlotta Marchisio (Soprano) and Mdlle. Barbara Marchisio (Contralto), from the Grand Opéra, Paris, and the principal Continental Theatres, will have the honour of making their first appearance in this country.—Further particulars will be duly announced, to be obtained at Messrs. Cramer, Beale & Wood's, 201, Regent Street; at Messrs. Chapell's, 50, New Bond Street; and at Mr. Mitchell's, 33, Old Bond Street.

NEW PUBLICATIONS.

VOCAL MUSIC.

The Devonshire Melodist: a Collection of Original Songs, by Edward Capern. Transcribed for the Voice and Pianoforte, under the Author's Direction, by T. H. Murby (Boosey & Sons), has been already alluded to in this journal,—as showing the Bideford Postman in a new character. Some of his tunes display a feeling for rhythm and melody; though none have much originality. Generally, it may be said that there is no writing well for music without some conception of an air as well as of words. This many lyristes have mistaken for power to compose;—overlooking, too, the fact that what may be called uncultivated melody is rarer than the world dreams of—a fact which may be proved by the gain in freshness shown by many of

the most prolific writers as they have proceeded in their career of labour.—The origin of this volume, then, is its principal claim on interest.

Three Choral Songs,—"Good morrow to my lady bright," by C. A. Macirone (Novello), are more than ordinarily creditable specimens of music from a female hand. Without disdain of beauty, Miss Macirone here, as in her other music, eaches commonplace prettiness. There are thought and nerve in all she puts forth; and these songs are among her best.

Claribel, Part Song:—"O that we two were Maying," *Two-Part Song*:—"Ellen Adair, Canzonet," by G. O. Rutter (Melbourne, Wilkie), are the first notes from our far-off colony that we recollect to have seen. Certain quaintness will be found in the setting of 'Claribel' which recommends it, and is in harmony with the Old-World melancholy of the lyric.

Let us now group together some songs by better-known hands, most of which are above the average quality:—"Rest, where shall we rest?" by M. Silas (Cramer & Co.), is simpler than most of that gentleman's vocal compositions, and, in proportion, better.—"Come to thy lattice," by Jacques Blumenthal (same publishers), is, on the other hand, less happy than other songs by its author.—"*I dream of thee at morn*," by Henry Smart (same publishers), is an elegant canzonet.—"*On that far shore*" and *The Lorelei* (Addison & Co.) are by one whom we too seldom meet, Mr. John Barnett. The second is in the German rather than the English style, but has an elegance of cantilena often missing from the works of native Lied-writers.—*Echoes*, by John Hullah (same publishers), is an expressive setting of one of Miss Procter's beautiful lyrics.—"*Oh, send me back to dreamland*," by M. W. Balfé (Cramer & Co.), though slight, is graceful.—*Kathleen Aroon*, and "*O, ye tears!*" by Franz Abt (Cocks & Co.), lie nicely for the voice.—This cannot be said of "*Unto thee, O Lord*," a sacred song, by Beethoven (Cramer & Co.), which is not in any collection of Beethoven's songs, being the well-known melancholy *adagio* from the second *Sonata alla fantasia* tormented into union with words anything but pensive—an example of want of judgment and wasted industry.—*Christmas Bells*, by Niels W. Gade (Ewer & Co.), is not a bad carol—spoilt by the misfit of the English words.

The other vocal compositions before us may be disposed of by transcribing their titles. They are:—"Far, far away, my love," by Charles J. Hargitt.—*The Angel Mother*, by S. J. St.-Leger.—"*Only for thee*," "*Of thee, my heart*," a Tuscan air, with words, by George Linley.—*Bonnie Scotland*, by William Bridges.—"*To dream of thee*," by George Cral (Cramer & Co.).—*Waiting*, by Florence (Jeffreys).—"*Gentle ray of sunlight*," by W. T. Wrighton (Cocks & Co.).—"*The day of the Lord*," by C. Senorif.—"*O Jerusalem*," *The Captive Hebrew Maid*, "*God spake these words*," by R. Topliff.—*Alyce Bell*, by George Barker.—"*We, merry fairies*," *Duett*, by Stephen Glover (Addison & Co.).—*Watch and Pray, Duett*, by Thomas Thorpe (Lemare).—and *Meeting and Parting*, by G. R. Powell (Ollivier).

MUSICAL AND DRAMATIC GOSSIP.—Monday's *Popular Concert* was again devoted to Mozart's music, with Miss Arabella Goddard as pianist, and for singers Miss Banks and Madame Louisa Vinning. Beethoven's 'Septett' will be repeated next Monday.—The 'Messiah' weeks are set in. Among the singers advertised to take part in the performances have been Mrs. Merest (formerly Miss Maria B. Hawes), by Dr. Wylde, and Madame Guerrabella as soprano, at the *Sacred Harmonic Society*, where Mr. Wilbye Cooper sang as tenor, on his return from a considerable absence in Italy. Once more we must ask, whether nobody will treat us to a hearing of Sebastian Bach's Christmas oratorio?

A performance was advertised in the *Morning Post* of Saturday last, as under:—"CARDINAL WISEMAN.—To-morrow (Sunday), his Eminence Cardinal Wiseman will assist pontifically at the High Mass, which will commence at 11 A.M., at

St. Mary's, Moorfields. The music will be Haydn's No. 16, with full orchestral accompaniment. After Mass, the 'Te Deum' (Romberg's, with full band) will be sung in thanksgiving for his Eminence's restoration to health." To persons "beyond the pale," the performance, as above set forth, may seem to have an air of self-celebration which is singular.—On the same Sunday, which was one of Church Festival, Mendelssohn's 'Ave Maria' was performed at Vespers in the church at Southwark.

We are obliged to a member of the Covent Garden orchestra for a correction of what was said in respect of the overture to 'Le Philtre,' played to commence 'The Toymaker.' It has not, he assures us, been re-scored, as we had been told and had fancied.—Considerable curtailments have been made in 'The Puritan's Daughter,' by which the opera has gained greatly.

It is said that M. Meyerbeer's contribution to the Exhibition music of next year will not be an Anthem, but a March.

We hereby acknowledge communications from Oxford and Cambridge on the subject of Musical Professorships at the Universities,—which we shall publish with comments next week.

Attention may be called to an advertisement in the papers, of a revised Tune-Book, put forward by those interested in the 'Tonic Sol-fa' movement. They find it expedient, it appears, also to issue an edition in the "old notation." The comment on the value of the new one is not to be missed.

La France Chorale states that the deficit on the last meeting of the Orphéonists, at the *Palais d'Industrie*, will exceed 1,000l.—A vocal Mass, by M. Gounod, was to be executed by 400 of the Parisian contingent, on Sunday last, in the Church of St.-Eustache.

M. Leblicq, who has made his appearance as a composer at the *Théâtre Lyrique*, in the modest form of a one-act opera, is spoken of, in the *Gazette Musicale*, with so much serious praise, that it is worth recording. Still, we must recollect how M. Membrey was praised on the strength of his 'Page, Écuyer et Capitaine,' and the manner in which he seems to have since sunk into the ground. Still, we cannot overlook that, the other day, praise as serious was lavished on Prince Poniatowski's one-act opera, by a critic no less serious than M. Berlioz. The "play" of the Parisian press, in regard to like matters, is disabling to distant persons, who desire to know, in all honesty and love of Art, what has taken place.—A new three-act opera, by M. Lefebure Wely (the popular organist of St.-Roch Church), was to come off at the *Opéra Comique* this week; and a new two-act opera (apparently founded on a story of an invisible voice), by M. Alary, at the *Grand Opéra*.

At Saturday's *Crystal Palace Concert*, the directors once more ventured the daring measure of giving new music, in the form of Schubert's overture to 'Rosemonde,' and the overture to 'La Nuit de Noël,' by M. Reber. As we have fallen on the name of this elegant and correct composer, whose 'Père Gaillard' is one of the best among modern comic operas, it is impossible to avoid asking with regret why he has seemingly stopped short, at a time when every theatre wants new food? The failure of his 'Les Dames Capitaines' ought not to have daunted him, after the success of the work referred to, which was charming and real, in spite of a fault in the story.

Invention seems to be at a low ebb in Paris just now. At the *Théâtre Français* they have been trying the *proverbe*, in three acts, 'On ne badine pas avec l'Amour,' by M. Alfred de Musset.

There are noticed in the German papers a new Violin Concerto, by M. Rubinstein, which has been performed at one of the *Gewandhaus Concerts*, by Herr Becker; and an 'Ave Verum,' by Herr Brahms, brought forward at Cologne—the latter without much apparent success.—Mr. Benedict's 'Crusaders' is to be revived at Stuttgart.

The tragedy of 'Ion' was performed at Sadler's Wells on Wednesday. It is seldom now that this classical drama is acted; and it attracted a considerable audience. The revival was for the purpose

of introducing Mrs. F. B. Conway, as the representative of the temple-youth, the future monarch, and martyr to his country's welfare. Mrs. Conway, though rather below the middle height and slight in make, looked the character very interestingly, and spoke it better. Her voice was beautifully modulated, and every poetic epithet was distinctly marked with its appropriate emphasis. The highly-figurative style of the speeches was thus made perfectly intelligible to all. Of action, Mrs. Conway has little; of attitude, nothing. She acted with great simplicity, but with uniform effect. Mr. Phelps, in *Adrastus*, sustained the character with his usual force; and the interviews between the royal father and his foundling son were conducted with unquestionable pathos. The performance was deservedly applauded.

Mr. Alfred Wigan retires from the management of the St. James's Theatre, to be succeeded in it, after Christmas, by Mr. George Vining.

MISCELLANEA

Leop-Sea Sounding Apparatus.—In the notice respecting 'The Swedish Expedition to Spitzbergen,' published in the *Athenæum* of the 7th inst., it is stated that, by means of "the apparatus termed the *M'Clintock apparatus*, a compact mass of bottom clay was brought up from a depth of 2,800 yards," of sufficient volume to admit of the difference of temperature at two inches from the surface of such mass and its centre being estimated by the thermometer. I beg leave to state that the apparatus here spoken of as the "*M'Clintock apparatus*," was designed by me, in so far as every essential and novel feature is concerned; and that ample proof of the accuracy of this fact may be found on reference to a letter which appeared under my signature, in *The Mechanics' Magazine* of the 18th of January last. As maintained in that letter, I assert that my claim is, in reality, substantially borne out by the extract from his official letter which Sir Leopold M'Clintock had previously published, or permitted to be published, in the same journal of the 28th of December preceding. I had hoped that, by the narration of facts just alluded to, my claim as the inventor of the Sounding Apparatus in question—one now generally admitted to be superior to any previously employed instrument—had become recognized; and that the effort to overturn that claim, by designating *both this instrument and the previous one*, also suggested by me, the "*Bulldog apparatus*," had met with the reprobation it deserves. As might have been, and possibly was, anticipated, however, the "*Bulldog apparatus*" is now styled the "*M'Clintock apparatus*"; and an illustration is thus furnished of the "brain-squeezing" tendencies which Mr. Lovell Reeve, in a letter immediately preceding the notice on the Spitzbergen Expedition, denounces in such appropriate terms. In saying this much, I beg to state my fullest conviction that the writer of the notice of Mr. Torell's voyage had no intention of abetting the act of injustice of which I complain. In all probability, he knew nothing whatever of the true history of the machine which appears to have done him right good service. I had the pleasure of making Mr. Torell's acquaintance before he left England, and I rely as confidently on his personal candour as on his high scientific attainments. The mere credit appertaining to a simple mechanical combination, however novel, stands for little in my eyes: not so, however, the charge of endeavouring to appropriate my neighbour's property, no matter how trifling may be its value. In the magazine already referred to, I have stated my readiness to adduce the proofs of the justice of my claim before any competent mechanic; and, feeling confident that you, as one of the leading guardians of every kind of brain property, will view the matter in a just and impartial light, I crave a corner in your journal for these observations.

I am, &c., G. C. WALLICH.

Kensington, Dec. 9, 1861.

TO CORRESPONDENTS.—P. P.—W. F.—Cantor—J. T.—Senex—T. R. M.—S. K.—J. R.—J. H.—B. B.—received.

THE BEST CHRISTMAS PRESENT.

RE-ISSUE OF 'PUNCH.'

From its Commencement in 1841, to the end of 1860.

In Volumes, 5s. boards, uncut, monthly; and in double Volumes, 10s. 6d. cloth gilt, every other month.

In arranging this Re-issue, two modes of publication have been adopted. One in MONTHLY Volumes, each containing the Numbers for half-a-year, price 5s. in boards, with the edges uncut, so as to enable purchasers to rebind them according to their fancy.

The other, in Volumes published every ALTERNATE MONTH, and containing the Numbers for a year, so that each year forms a distinct volume. The price of these volumes is 10s. 6d., handsomely bound in cloth, gilt edges. As, however, 'PUNCH' was commenced in July, 1841, the volume for that year is half the size of the others, and the price 6s.*

To each Volume is prefixed an Introduction, furnishing a KEY to the events satirized or commented on; thereby perpetuating in its original freshness the wit and humour which have made 'PUNCH' so welcome throughout all lands.

A SURVEY OF HUMAN PROGRESS, from the Savage State to the Highest Civilization yet attained: a Progress as little perceived by the multitude in any age as is the slow growing of a tree by the children who play under its shade—but which is leading to a new condition of Mankind on Earth. By NEIL ARNOTT, LL.D. F.R.S. F.R.C.P. &c., Physician-Extraordinary to the Queen. London: Longman, Green, and Co. Paternoster-row.

THE OXFORD LOCAL EXAMINATIONS FOR 1862, AND THE LONDON UNIVERSITY B.A. EXAMINATIONS FOR 1862.

Nearly ready, in 12mo.

MILTON'S PARADISE LOST, BOOK II. with a Prose Translation or Paraphrase, the Parsing of the more difficult Words, Specimens of Analysis and numerous Illustrative Notes. Specially designed to prepare Junior Candidates for the Oxford and London Examination in 1862, and Candidates for the First B.A. Examination of the London University in 1862. By the Rev. JOHN HUNTER, M.A. By the same Editor, Book I. as above, price 1s. 6d. London: Longman, Green, Longman, and Roberts.

The First and Second Series, in crown 8vo. 12s. 6d. each,

VICISSITUDES OF FAMILIES: Essays and Narratives illustrating the surprising Mutability of Fortune in the History of our Noble Houses. By Sir BERNARD BURKE, Ulster King of Arms; Author of the "Peerage and Baronage," &c.

"Combining in harmonious proportions all the interest of romance with the accuracy of authentic history." *Falkirk Herald.*

London: Longman, Green, Longman, and Roberts.

Just published, in 8vo. price 12s.

THE LAW OF NATIONS CONSIDERED AS INDEPENDENT POLITICAL COMMUNITIES.

By TRAVERS TWISS, D.C.L., Regius Professor of Civil Law in the University of Oxford, and one of Her Majesty's Counsel.

Part I.—The Right and Duties of Nations in Time of Peace.

"Dr. Travers Twiss's book is a digest at once of the principles to which international law appeals, and of the treaties and decisions on the subject to which the civilised world have agreed to pay respect."—*Spectator.*

"There is much that is valuable and much that is new in this treatise, and therefore, without wishing to decry or disparage any other work, we can truly recommend it as a Manual of International Law."—*The Times*, November 4, 1861.

"If we may judge from the instalment which is now before us, the whole work will constitute one of the most luminous treatises on public law which our language affords."—*John Bull.*

"This book is eminently practical in its character. The author does not endeavour to present new speculative views, intended to show what in his opinion the law of nations ought to be. He founds himself on facts and the great authorities, and presents a clear and compact digest of the law as it is, so that the contents of the volume, admirably arranged in chapters and sections, may be compared to an elevated and comprehensive exposition of the law from a judge on the bench."—*Globe.*

"The diction and style of the treatise are easy, fluent and unambitious; caution, statement and refined analysis, without any bold attempt to grasp first principles, characterize the work throughout. Its practical merits, however, are very considerable. It is lucid and orderly in the arrangement of its parts, and appears to omit nothing that can throw light upon the practice of nations."—*Law Magazine*, November, 1861. Oxford: At the University Press. London: Longman, Green, Longman, and Roberts.

Elegant Presentation Volume.

In mauve cloth extra, and full gilt, price 7s. 6d.

"GOOD WORDS ARE WORTH MUCH AND COST LITTLE." Herbert.

Just published, in 1 elegant vol. of 750 royal 8vo. pages, extra cloth, full gilt, 7s. 6d.

Fine Frontispiece, &c. Complete Edition. London: William Tegg, Pancras-lane, Queen-street, Cheap-side, E.C.

WAR or PEACE with AMERICA.—See the

Opinions of the American, British and Continental Press in PUBLIC OPINION OF SATURDAY, Dec. 14. To make this journal a complete expositor of the opinions of the representative press all over the world on the momentous events and questions of the day, it will be enlarged on Saturday next to 32 pages. PUBLIC OPINION is the only journal that gives all sides of every important topic, at home and foreign, and in which the reader obtains, for a trifling sum, and at a small sacrifice of time, such a comprehensive selection from the arguments and reasoning adopted by the press at home and throughout the world, as enables him to form a fair and impartial judgment upon all great questions. The main object of the conductors of this novel medium of thought is to make it a complete and faithful exponent of all shades of political, social and commercial subjects; in short, what its name implies—the Mirror of Public Opinion. PUBLIC OPINION may be obtained of all Booksellers and News-agents, or by post direct from the Office on receipt of payment in advance, at the rate of 3d. per unstamp copy, for any period of time. Advertisements should be delivered early to insure insertion. Post-office Orders to be made payable to G. Cole, Publisher, 3, Savoy-street, Strand.

PAUL JERRARD & SON'S NEW GIFT-BOOK FOR
CHRISTMAS AND ALL SEASONS,
Price 21s. 6d.

THE NIGHT-FLYERS; Intended as a companion volume to 'Butterflies and their Floral Homes,' by the same Author. The habits and haunts of the Night-flying Moths are illustrated and described in this work as those of their cousins, the Butterflies, were in the previous volume. An entirely novel feature will distinguish the present volume, in those Plates which represent portions of woods and glades by night, in which the Moths are seen sporting among the foliage, in the half light of the moon or twilight.
In a handsome and novel cover, introduced especially for this elegant Gift-Book without regard to cost.
London: Paul Jerrard & Son, 170, Fleet-street.

John Van Voorst, 1, Paternoster-row.

NEW MONTHLY MAGAZINE AND CRITICAL REVIEW.

On the 1ST of JANUARY, 1862, will be issued, price ONE SHILLING, the FIRST NUMBER of

THE PLANET.

To be continued Monthly.

Conducted by THOMAS M'NICOLL,

LATE EDITOR of 'THE LONDON QUARTERLY REVIEW,' AND AUTHOR of 'ESSAYS ON ENGLISH LITERATURE.'

As the issue of another periodical can only be justified by some measure of usefulness and success, so its character and aims will be best appreciated by the sample afforded in its opening Number. A few words now will suffice to indicate that position in the literary hemisphere which THE PLANET is designed to occupy; at the same time, they will serve both to prompt and to qualify the expectations of those who wait with some interest for its appearance.

There will be no attempt on the part of the Editor of this new miscellany to emulate the extreme popularity of certain contemporaries; for that would involve an almost implicit yielding to the current taste, and frustrate the higher purpose of gradual elevation and improvement. No compound of fast and fine writing will be made a substitute for age will be treated as a branch of morals, not as a feature of the social picturesque; and strokes of satire will be sparingly employed. Yet, entertainment will be an object distinctly kept in view; and, happily, all the purer models of polite literature assure us that the highest gratification is consistent with a direct attempt at culture and instruction. Almost every topic of interest will in turn be brought before the readers of THE PLANET. Tediousness will be precluded by judicious brevity, and interest sustained by attention to variety.

The department of monthly criticism will receive especial care at the hands of the Editor. Every book that seems to merit attention will promptly receive it; and some, that may not merit it in any favourable sense, will be held up to point a moral or impress a salutary lesson. In the majority of these notices, the utmost brevity will be observed, the character and contents of every work will be fairly indicated, and such critical remarks offered as occasion may require. Conscientiousness will be the rule of every literary judgment; and the whole will furnish guidance, in the choice of books, to persons of limited opportunity and leisure.

The subject of the Fine Arts will receive frequent and systematic notice in THE PLANET. This novel feature will commend it to the attention of artists and amateurs. In every alternate Number the reader will be presented with a scientific paper, which will always be something more than a mere epitome of popular truths. The Great Exhibition of 1862 will furnish the topic of original studies in the various departments of Art and Industry.

THE PLANET will not assume a prominently religious aspect. But no Journal of the present day can claim to be either organ or leader of Public Opinion without taking a part in the controversy now waging betwixt Faith and Scepticism. The promoters of this new enterprise will take their stand with the advocates of Christian faith, as interpreted by the Orthodox Reformed Churches of Great Britain; yet they hope to show that some concession to the spirit of critical inquiry may be made, not only without danger, but with the effect of silencing a thousand plausible objections, and of strengthening the claims of Evangelical Religion. The Practical Theology of Protestantism may be left—with some crudeness and inconsistency, but a vast preponderance of good—to work out its important mission; but the Christian advocate in a literary sphere is called to special duty. He has to maintain the prestige and authority of Revelation in an age whose pride of Science has led towards a degrading naturalism, and whose super-subtlety of learning threatens to create a universal Pyrrhonism. It behoves him then to prove that the weapons of Pascal are still effective against the assailants of revealed truth, and that the analogical shield of Butler, broad as the world whose features it exhibits, is ample to receive and able to repel all the arrows of philosophical scepticism, already turned and blunted by their frequent use.

N.B.—Advertisements will be received till the 20th of the Month. Books and other Communications for the Editor to be forwarded through the Publishers,

GROOMBRIDGE & SONS, 5, Paternoster-row, E.C.

LINNEAN SOCIETY.

This day is published, price 21. 2s., the Second Part of Vol. XXIII. of the

TRANSACTIONS of the LINNEAN SOCIETY of LONDON.

Sold by Longman & Co., Paternoster-row; and by Mr. Kippist, at the Apartments of the Society, Burlington House, Piccadilly; of whom may be had all or any of the preceding Volumes. The Fellows of the Society are requested to apply to Mr. Kippist for their copies between the hours of 12 and 4 o'clock. Complete Sets of the first Twenty Volumes may be obtained at the Society's Apartments, by the Fellows, at the reduced price of 50s. The first Five Volumes of the Society's Octavo Journal are now complete, and may be purchased at the price of 12s. each for the entire Journal; or 8s. each for either the Zoological or Botanical Section separately.

THE ANALYTICAL HEBREW LEXICON

to the OLD TESTAMENT. By this work the student may ascertain with ease the correct parsing and the English equivalents of every word in the Old Testament Scriptures. This Lexicon serves also, to a great extent, the purpose of a Concordance, for all the words of the least frequent occurrence (which constitute three-fourths of the whole number) are supplied with a reference to their place in Scripture. Under each Root is given a summary of the whole of its derivatives. The Grammatical Introduction contains a complete series of Paradigms, which are referred to constantly throughout the work. Second Edition. Quarto, price 42s. "It is the ultimate of Hebrew Lexicography, and will leave the Theologian who still remains ignorant of the sacred tongue absolutely without excuse."

BAGSTER'S SERIES of CHURCH SERVICES; Elegant, Readable, and Durably Bound. Every Style of Binding and Mounting. To be had of all Booksellers.

BAGSTER'S CONSECUTIVE CHURCH SERVICE. In every style of Binding and Mounting. To be had of all Booksellers.

Catalogues, gratis, by post free, of Polyglot Bibles, Church Services, Books of Common Prayer, in Ancient and Modern Languages, Aids to the Study of the Old and New Testament, Concordances, Grammars, Lexicons, &c.

THE EXTRA VOLUME,

THOSE THAT WILL NOT WORK.

THE NON-WORKERS. By HENRY MATHEW.
PROSTITUTES. By BRACONNOR HENRY.

COMPRISING,

THIEVES and SWINDLERS. By JOHN BENNY.
BEGGARS. By ANDREW HALLIDAY.

With an Introductory Essay on the Agencies at present in operation in the Metropolis for the Suppression of Crime and Vice, by the Rev. WILLIAM TUCKNISS, B.A., Chaplain to the Society for the Rescue of Young Women and Children.

With Illustrations of Scenes and Localities.

This volume forms the "extra" or concluding volume of this extraordinary work. Its contents are entirely original, either supplied by the Police Authorities or gathered from the unfortunate parties themselves; and in addition to numerous deeply-interesting autobiographies, the work contains reliable statistical and social information, showing not only the actual state of the dangerous and vicious classes of the metropolis, but what is doing for their reformation and elevation.

The WORK is NOW COMPLETE, in 4 vols. price 11. 11s. 6d. cloth.

London: GRIFFIN, Bohn & Co. Stationers' Hall-court.

PAINTING in WATER COLOUR: The Theory and Practice of the English School.

By AARON PENLEY.

This work, alike invaluable to teacher and student, also addresses itself in a remarkable degree to those who, having gone through the usual course of teaching, desire to advance themselves to the perfect practice of the Art, whether as an elegant accomplishment, or as a means of professional livelihood: it treats from the first holding of a brush through a course of study of the most analytical and extended kind, up to the highly-finished landscape, with all the sentiment and poetry of effect that can be conceived and realized by an accomplished master mind, directing a cultivated brush. The author of the work has enjoyed for a long term of years the reputation of being one of the most eminent English Water-colour Painters; he has imparted instruction in the Art for 37 years to the noblest families in the kingdom, and has held, and still holds, high appointments under Government as Professor of Water-colour Painting. The Work contains 44 full-size Studies in Fac-simile, by Chromolithography, of the original Water-colour Drawings, 96 Specimens of Compound Tints, and 140 pages of instructive and descriptive Text; the whole got up in the best style, full-size folio, so as to form the handsomest Drawing-room Table Book of the season, as well as a work of inexhaustible and never-ending usefulness. Only a small Edition will be ready.

London: Day & Son, Lithographers to the Queen, No. 6, Gate-street, Lincoln's Inn-fields.

This, though under certain aspects a New Edition of Kitto's Cyclopædia, will be found to a large extent an ENTIRELY NEW WORK.

Specimens and Prospectuses are now ready, and may be obtained of all Booksellers.

Edinburgh: ADAM & CHARLES BLACK.

NEW WORK OF MESSRS. CHAMBERS.

Messrs. CHAMBERS will issue, in the beginning of January, No. 1, and at the end of January, Part I., of a New Work, entitled—

THE BOOK OF DAYS,

which, while periodical in the mode of its publication, will have the advantage of forming a complete Work in Two, or at the utmost, Three Volumes. It will consist of

I.
Matters connected with the Church Kalendar, including the Popular Festivals, Saints' Days and other Holydays, with Illustrations of Christian Antiquities in general.

II.
Phænomena connected with the Seasonal Changes.

III.
Folk-Lore of the United Kingdom—namely, Popular Notions and Observances connected with Times and Seasons.

IV.
Notable Events, Biographies and Anecdotes connected with the Days of the Year.

V.
Articles of Popular Archæology, of an entertaining character, tending to illustrate the Progress of Civilization, Manners, Literature and Ideas in these Kingdoms.

VI.
Curious Fugitive and Inedited Pieces.

It is the desire of the Editors, by this Work—while not discouraging the progressive spirit of the age—to temper it with affectionate feelings towards what is poetical and elevated, honest and of good report, in the old national life; while in no way discountenancing great material interests, to evoke an equal activity in those feelings beyond self, on which depend remoter but infinitely greater interests; to kindle and sustain a spirit of patriotism, tending to unity, peace and prosperity in our own state, while not exclusive of feelings of benevolence, as well as justice, towards others. It is the Editors' wish that these volumes should be a repository of old fireside ideas in general, as well as a means of improving the fireside Wisdom of the present day. They respectfully invite contributions from all who enter into their views.

The Work will be printed in a new, elegant and readable type, and will be illustrated with an abundance of Wood Engravings.

It will appear in Weekly Sheets, at 2d.; Monthly Parts, at 9d.; and in Yearly Volumes, at 10s. elegantly bound in cloth.

W. & R. CHAMBERS, 47, Paternoster-row, London, and 339, High-street, Edinburgh; and sold by all Booksellers.

Now ready,

Will be completed in March, when

A NEW NOVEL BY MR. WILKIE COLLINS

Will be commenced.

Published in Weekly Numbers, price 2d., also in Monthly Parts and Half-Yearly Volumes, at 26, Wellington-street, Strand, W.C.; and by Messrs. CHAPMAN & HALL, 193, Piccadilly, W.

UNITED KINGDOM LIFE ASSURANCE COMPANY,

8, WATERLOO-PLACE, PALL MALL, S.W.

The HON. FRANCIS SCOTT, Chairman.
CHARLES BERWICK CURTIS, Esq., Deputy-Chairman.

FOURTH DIVISION OF PROFITS.

SPECIAL NOTICE.—Parties desirous of participating in the Fourth Division of Profits to be declared on Policies effected prior to the 31st of December, 1861, should make immediate application. There have already been Three Divisions of Profits, and the Bonuses divided have averaged nearly 2 per cent. per annum on the sums assured, or from 30 to 100 per cent. on the premiums paid, without the risk of copartnership.

To show more clearly what these Bonuses amount to, the three following cases are given as examples:—

Sums insured.	Bonuses added.	Amount payable up to Dec. 1864.
£5,000	£1,987 10	£6,987 10
1,000	397 10	1,397 10
100	39 15	139 15

Notwithstanding these large additions, the Premiums are on the lowest scale compatible with security; in addition to which advantages, one-half of the premiums may, if desired, for the term of five years, remain unpaid at 5 per cent. interest, without security or deposit of the Policy.

The Assets of the Company at the 31st of December, 1860, amounted to £730,665 7s. 10d., all of which has been invested in Government and other approved securities.

No charge for Volunteer Military Corps whilst serving in the United Kingdom.

Policy stamps paid by the office.

For Prospectuses, &c. apply to the Resident Director, No. 8, Waterloo-place, Pall Mall.

By order,

E. L. BOYD, Resident Director.

EQUITABLE ASSURANCE OFFICE,

NEW BRIDGE-STREET, BLACKFRIARS.

ESTABLISHED 1762.

DIRECTORS.

THE RIGHT HON. LORD TREDEGAR, President.

William Dacres Adams, Esq.
Philip Hardwick, Esq.
William Samuel Jones, Esq.
John Aldin Moore, Esq.
William Frederick Pollock, Esq.

Charles Pott, Esq.
Rev. John Russell, D.D.
James Spicer, Esq.
John Charles Templer, Esq.
Right Hon. Lord Tredegar.

John Charles Burgoyne, Esq.
Lord George Henry Cavendish, M.P.
Frederick Cowper, Esq.
Richard Gosling, Esq.
Peter Martineau, Esq.

THE EQUITABLE is an entirely MUTUAL Office. The reserve, at the last "rest," in December, 1859, exceeded three-fourths of a million sterling, a sum more than double the corresponding fund of any similar Institution.

The Bonuses paid on Claims in the Ten Years ending on the 31st December, 1859, exceeded Three Millions and a Half, being more than 100 per cent. on the amount of all those Claims.

The amount added at the close of that decade to the Policies existing on the 1st January, 1860, was £1,977,000, and made, with former additions then outstanding, a total of £4,070,000, on Assurances originally taken out for £6,252,000 only.

These additions have increased the Claims allowed and paid under those policies since the 1st January, 1860, to the extent of 150 per cent.

The Capital at this time consists of

- £2,730,000—Stock in the Public Funds.
£3,006,297—Cash lent on Mortgages of Freehold Estates.
£300,000—Cash advanced on Railway Debentures.
£83,590—Cash advanced on security of the Policies of Members of the Society.

Producing annually, £221,482.

The total Income exceeds £400,000 per Annum.

POLICIES effected in the current year (1861) will participate in the distribution of Profits made in December, 1859, so soon as Six Annual Premiums shall have become due and been paid thereon; and, in the Division of 1869, will be entitled to additions in respect of every Premium paid upon them from the year 1862 to 1869, each inclusive.

On the surrender of Policies, the full value is paid, without any deduction; and the Directors will advance nine-tenths of that value as a temporary accommodation, on the deposit of a Policy.

No extra Premium is charged for service in any Volunteer Corps within the United Kingdom, during peace or war.

A Weekly Court of Directors is held every Wednesday, from 11 to 1 o'clock, to receive Proposals for New Assurances; and a Short Account of the Society may be had on application personally, or by post, from the Office, where attendance is given daily, from Ten to Four o'clock.

ARTHUR MORGAN, Actuary.

LISTER WORKS, HOLLOWAY.

WENHAM'S

BINOCULAR MICROSCOPE.

Having increased our facilities for the manufacture of the Prisms, as well as the other parts of this important improvement in the Microscope, we are now enabled to make the addition to any Microscope, when it is really practicable, at the cost of 7l. 10s. In the case of new Instruments, the extra price will be only 6l.

SMITH, BECK & BECK.

September, 1861.

CATALOGUES, giving full particulars respecting Microscopes, Stereoscopes, &c., may be had on application, or sent post free.

ACCIDENTS OF ALL KINDS,

AND FROM ANY CAUSE,
may be provided against by an Annual Payment of 2l. to the **RAILWAY PASSENGERS' ASSURANCE COMPANY**, which secures 1,000l. at death by Accident, or 6l. weekly for Injury.
NO EXTRA PREMIUM FOR VOLUNTEERS.
ONE PERSON in every **TWELVE** insured is injured yearly by ACCIDENT.

75,000l. has been already PAID as COMPENSATION.
For further information apply to the Provincial Agents, the Railway Stations, or at the Head Office, 64, Cornhill (late 3, Old Broad-street).

ANNUAL INCOME, 40,000l.

CAPITAL, ONE MILLION.

WILLIAM J. VIAN, Secretary.

64, Cornhill, E.C., January, 1861.

NORTH BRITISH INSURANCE COMPANY.

Head Office—64, Princes-street, Edinburgh.

London Office—4, New Bank-buildings, Lothbury.

LIFE DEPARTMENT.

Policies opened before 31st December will be entitled at next Distribution of Profits, in 1865, to rank for five years' bonus.

PROGRESS OF BUSINESS.

	Policies.	Sum Assured.
For five years, from 1853 to 1857 inclusive, the annual average was	307	£379,948
In 1858, the Policies issued	435	377,435
1859	605	449,913
1860	741	475,849

This increase in the business of the Company will be expected, beneficially affect the Bonus to be declared at next Division of Profits.

New and liberal conditions of Assurance have recently been adopted, particulars of which, together with Prospectuses and all necessary information, may be had as above, or will be forwarded.

ROBERT STRACHAN, Secretary.

4, New Bank-buildings, October, 1861.

UNIVERSAL LIFE ASSURANCE SOCIETY,

No. 1, KING WILLIAM-STREET, LONDON, E.C.

Established in the Year 1834.

Committees in Calcutta, Madras and Bombay.

Agents throughout India.

The last Annual Reduction of Premium amounted to 45 per cent., so that a person being assured for 1,000l. at the age of 50 is now paying 18l. 8s. 7d. instead of 24l. 8s. 7d.

INVESTED CAPITAL UPWARDS OF 750,000l.

M. E. IMPY, Secretary.

METROPOLITAN LIFE ASSURANCE SOCIETY.

No. 3, PRINCES-STREET, BANK, E.C. Established 1835.

Advantages of assuring with this Society:—
Economic management, no paid agents, and no commission allowed.

The whole of the profits applied to the reduction of the premiums of members.

The guarantee of an accumulated fund exceeding 925,000l.
A gross annual income of 145,000l.
Amount paid in claims without a single instance of dispute, 500,000l.

Returned to members in reduction of their premiums, 500,000l.
HENRY MARSHALL, Actuary.

THE SCOTTISH WIDOWS' FUND LIFE ASSURANCE SOCIETY,

Head Office: 9, St. Andrew-square, Edinburgh.

IS NOW,

IN ANNUAL REVENUE AND EXTENT OF BUSINESS,
THE LARGEST MUTUAL LIFE OFFICE IN THE WORLD.

I. BONUS SYSTEM.

The last Bonus for the Seven Years ending December, 1859, yielded additions on the Sum assured of from 1l. 12s. 6d. on the most recent Policies, up to 3l. 6s. per Cent. per Annum on the oldest Policies, which was equal, on an average, to from 50l. per Cent. to 107l. per Cent. of the Seven Premiums paid, and was one of the largest Bonuses ever declared by any Insurance Company.

II. CASH VALUE OF POLICIES PAYABLE ON DEMAND.

Cash value is allowed at any time from the issue of a Policy on a strictly equitable scale, by which neither retiring nor remaining members are benefited at the expense of the other.

III. FUNDS AND REVENUE.

Invested Funds, 3,700,000l.; Annual Revenue, 430,000l.

HUGH M'KEAN, Central Agent.

London, 4, Royal Exchange-buildings, Cornhill, November, 1861.

London Agents.

Major R. S. Ridge, 49, Pall Mall.

Benton Seely, Bookbinder, Pall Mall Green.

Robertson & White, Accountants, 4, Princes-street, City.

SPECIAL NOTICE.

Proposals lodged at the Head Office, or with any of the Agents, before 31st of December, will secure participation in the above advantages, and also one Bonus more than proposals of later date.

EMPOWERED BY ACT OF PARLIAMENT, 3 WILL. 4

THE ECONOMIC LIFE ASSURANCE SOCIETY,

6, NEW BRIDGE-STREET, BLACKFRIARS, LONDON.

Established 1833.

Directors.

ROBERT BIDDULPH, Esq., Chairman.

WILLIAM ROUTH, Esq., Deputy-Chairman.

Alfred Kingsford Barber, Esq. Sir Alexander Duff Gordon, Bt.
Henry Barnett, Esq. Rear-Admiral Robert Gordon.
The Right Hon. E. Pleydell Charles Morris, Esq.
Bouverie, M.P. George Kestley Rickards, Esq.
Edward Charrington, Esq. Augustus Keppel Stephenson, Esq.
Pascoe Charles Glyn, Esq.

Actuary—James John Downes, Esq. F.R.A.S.

Secretary—Alexander Macdonald, Esq.

The Society offers the following advantages:—
The Lowest Rates of Premium on the Mutual System.
The whole of the Profits divided every Fifth Year.
Reversionary Bonuses have been added to Policies to the extent of 1,385,000l.

The last Bonus, declared in 1859, which averaged 63l. per cent. on the Premiums paid, amounted to 475,000l.
8,471 Policies are now in force, yielding an annual income of 189,000l., assuring the sum of 6,697,572l., which, with 610,327 Bonus additions, makes a total liability of 7,308,399l.

The Invested Capital is 1,911,822l., increasing upwards of 74,000l.—thus making the present Annual Income of the Society 363,000l.

Service in the Militia, Yeomanry or Volunteer Corps will not affect the validity of Policies.

Prospectuses and further particulars may be obtained on application to ALEXANDER MACDONALD, Secretary.

ALEXANDER ROBB,

First-class quality—superior taste—low prices.
ALFRED B. PEARCE, 23, Ludgate-hill, E.C. Established 1760.

HARVEY'S SAUCE.—CAUTION.—The

admirers of this celebrated Sauce are particularly requested to observe that each bottle bears the well-known label, signed "Elizabeth Lazenby." This label is protected by perpetual injunction in Chancery of the 9th July, 1855, and without it none can be genuine.

E. LAZENBY & SON, of 6, Edwards-street, Portman-square, London, as sole Proprietors of the receipt for Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.

Sold by all respectable Grocers, Druggists and Oilmen.

E. LAZENBY & SON beg to offer to notice their selections of NEW FOREIGN PRESERVED FRUITS for Dessert—Apricots, Greenhouses, Peas, Strawberries, Angelica, and other kinds, Crystallised and Glaced; Dried Cherries, Almonds, Muscatel Raisins, Figs, French and Swiss Plums, Normandy Pippins, Valentin's and St. Remy's Currants, &c. Their Sauces, Pickles, Jams, Tart Fruits, Teas, Coffees, Sugars, Spices, Soaps, Colza and other Oils, Candles, and General Groceries, will also be found of the best descriptions.

6, Edwards-street, Portman-square, London, W.
N.B.—Sole Proprietors of the receipt for HARVEY'S SAUCE.

SAUCE.—LEA AND PERRINS

beg to caution the Public against Spurious Imitations of their world-renowned WORCESTERSHIRE SAUCE.

Purchasers should ASK FOR LEA AND PERRINS' SAUCE, Pronounced by Connoisseurs to be "THE ONLY GOOD SAUCE."

*** Sold Wholesale and for Export, by the Proprietors, Worcester; Messrs. CROSBY & BLACKWELL, London, &c. &c.; and by Grocers and Oilmen universally.

STOVES FOR ENTRANCE HALLS, SCHOOL ROOMS, CHURCHES, &c.

all made with fire-brick linings, and entirely free from the objections found to so many, which, from their liability to become overheated, are dangerous, and render the atmosphere offensive. These Stoves burn little fuel, may be had with or without open fire, and to burn through-out the cold season, if required, without going out. Illustrated Prospectuses forwarded. FREDERICK EDWARDS & SON, General Stove and Kitchen Range Manufacturers, 49, GREAT MARLBOROUGH-STREET, W. For 35 years in Poland-street, adjoining.

RUPTURES.—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is the most effective invention in the treatment of HERNIA. The use of a steel spring, so often hurtful in its effects, is here avoided: a soft bandage being worn round the body, while the requisite retaining power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn day and night.

A descriptive Circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the Manufacturer.

Price of a Single Truss, 16s. 21s. 26s. 6d. and 31s. 6d.; postage, 1s. Double Truss, 31s. 6d., 43s. and 52s. 6d.; postage, 1s. 6d.

P. O. C. made payable to JOHN WHITE, Post-Office, Piccadilly.

ELASTIC STOCKINGS, KNEE-CAPS, &c.

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s. 6d., 7s. 6d., 10s. and 15s. each; postage 6d.

JOHN WHITE, Manufacturer, 233, PICCADILLY, London.

DURABILITY OF GUTTA-PERCHA

TUBING.—Many inquiries having been made as to the Durability of Gutta-Percha Tubing, the Gutta-Percha Company have pleasure in giving publicity to the following letter:—From SIR RAYMOND JARVIS, Bart., VENTNOR, Isle of Wight.

"Second Testimonial.—March 10th, 1859.—In reply to your letter, received this morning, respecting the Gutta-Percha Tubing for Pump Service, I can state with much satisfaction, it answers perfectly. Many builders, and other persons, have lately examined it, and there is not the least apparent difference since the first laying down, now several years ago, and I am informed that it is to be adopted generally in the houses that are being erected here."

N.B. From this Testimonial it will be seen that the CORROSIVE WATER of the ISLE of WIGHT has no effect on Gutta-Percha Tubing.

THE GUTTA-PERCHA COMPANY, PATENTEES,
18, WHARF-ROAD, CITY-ROAD, LONDON.

COCKLE'S ANTIBILIOUS AND FAMILY

APERIENT PILLS.—These pills are composed of the mildest vegetable aperients, with the pure extract of the flowers of the Camomile, and combining aromatic and tonic properties, will be found the best remedy for indigestion, bilious attacks, sick headache, acidity or heartburn, flatulency, spasms, &c.

Prepared only by JAMES COCKLE, 18, New Ormond-street, and to be had of all Medicine Vendors, in boxes, at 1s. 12d., 2s. 6d., 4s. 6d., and 11s.

DENT, CHRONOMETER, WATCH and CLOCK MAKER to the Queen and Prince Consort, and **MAKER OF THE GREAT CLOCK FOR THE HOUSES OF PARLIAMENT**, invites attention to the superior Workmanship and elegance of Design of his extensive Stock of Watches and Drawing-room Clocks.

Guineas.		Guineas.

Gold and Silver Pocket Chronometers, Astronomical, Turret and Bracket Clocks of every description. An elegant Assortment of London-made Fine Gold Albert and Guard Chains, &c. DENT, 61, Strand (adjoining Coutts's Bank); 34 and 35, Royal Exchange; and at the Clock and Marine Compass Factory, Somerset Wharf, Strand, London.

ELKINGTON & CO. desire respectfully to call the attention of the Nobility and Gentry requiring PLATE, to their Manufactures, which may be obtained in great variety, both in SILVER and ELECTRO PLATE, from either of their Establishments.

LONDON—22, Regent-street, St. James's, S.W.; and 45, Moor-street, N.C.

DUBLIN—College Green.

LIVERPOOL—Church-street.

MANUFACTORY and SHOW ROOMS, Newhall-street, Birmingham.

Estimates, Drawings and Prices sent free by post. Replating and Gilding as usual.

STAINED GLASS WINDOWS for CHURCHES and DWELLINGS.

HEATON & BUTLER will forward, post free, on receipt of thirty stamps, their ILLUSTRATED PRICED CATALOGUE of Stained Windows, with a Treatise on the Principles and Practice of the Art.

STAINED GLASS WORKS, 24, CARDINGTON-STREET, Hampstead-road, London, N.W.

MORTLOCK'S CHINA WAREHOUSE, 250, OXFORD-STREET—SELLING OFF—in consequence of the Marquis of Westminster's refusal to renew the Lease of the above Premises (in connexion with Park-street), JOHN MORTLOCK is anxious to decrease his HIGH Stock, and is prepared to make a great allowance for Cash. 250, OXFORD-STREET, and 35, PARK-STREET, near Hyde Park.

ALLSOPP'S PALE ALE, in Bottle, recommended by Baron Liebig and all the Faculty, may now be had in the finest condition of Messrs. HARRINGTON PARKER & CO., 24, Pall Mall, and 142, Regent-street, Waterloo-place, S.W.

CAUTION.—SMEE'S SPRING MATTRESS. TUCKER'S PATENT, or SOMMER TUCKER. Comfortable, cleanly, simple, portable and inexpensive. Purchasers are respectfully warned against infringements and imitations, in which somewhat of the general appearance of the S.M.E.E.'S SPRING MATTRESS is carefully preserved, but all its essential advantages are sacrificed.

WILLIAM SMEE & SONS, having now the entire of the Patent Right, are able to announce the following considerably **REDUCED SCALE OF PRICES.**

Size No. 1 for Bedsteads 3 feet wide	35s. 0d.
" " " " " " " "	37s. 6d.
" " " " " " " "	45s. 0d.

Other sizes in proportion. "To be obtained of almost all respectable Upholsterers and Bedding Warehousemen."

SPECIAL NOTICE should be taken that each Spring Mattress bears upon the side the Label, "Tucker's Patent."

FENDERS, STOVES, FIRE-IRONS and CHIMNEY-PIECES.—Buyers of the above are requested, before finally deciding, to visit **WILLIAM S. BURTON'S SHOW-ROOMS**. They contain such an assortment of FENDERS, STOVES, RANGES, CHIMNEY-PIECES, FIRE-IRONS and GENERAL IRONMONGERY, as cannot be approached elsewhere, either for variety, novelty, beauty of design or excellence of workmanship. Bright Stoves, with ornamental ornaments and two sets of bars, 21. 15s. to 33l. 10s.; Bronzed Fenders, with standards, 7s. to 12s.; Steel Fenders, 3s. to 11l.; Ditto, with rich or plain ornaments, from 3s. to 18s.; Chimney-pieces, from 11. 8s. to 100l.; Fire-irons, from 3s. 3d. the set to 4s. 6d.—The BURTON and all other PATENT STOVES, with radiating hearth-plates.

BEDSTEADS, BATHS AND LAMPS.—**WILLIAM S. BURTON** has SIX LARGE SHOW-ROOMS devoted exclusively to the SEPARATE DISPLAY of Lamps, Baths and Metallic Bedsteads. The stock of each is at once the largest, newest and most varied ever submitted to the public, and marked at prices proportionate with those that have tended to make his establishment the most distinguished in this country.

Bedsteads, from	12s. 6d. to £30 0s. each.
Shower Baths, from	8s. 0d. to £6 7s. each.
Lamps (Moderator), from	6s. 0d. to £7 3s. each.
(All other kinds at the same rate.)	
Pure Colza Oil	4s. per gallon.

CUTLERY, WARRANTED.—The most varied assortment of TABLE CUTLERY in the world, all warranted, is on SALE at **WILLIAM S. BURTON'S**, at prices that are remunerative only because of the largeness of the sales. 3½-inch ivory-handled table knives, with high shoulders, 12s. 6d. per dozen; deserts to match, 10s.; if to balance, 6d. per dozen extra; carvers, 4s. 3d. per pair; larger sizes, from 20s. to 57s. per dozen; extra fine ivory, 32s.; if with silver ferrules, 40s. to 50s.; white-bone table knives, 6s. per dozen; deserts, 5s.; carvers, 3s. 3d. per pair; black-bone table knives, 7s. 4d. per dozen; deserts, 6s.; carvers, 3s. 6d.; black wood-handled table knives and forks, 6s. per dozen; table steel, from 1s. each. The largest stock in existence of plated desert knives and forks, in cases and otherwise, and of the new plated fish carvers.

WHEN YOU ASK FOR **GLENFIELD PATENT STARCH**, SEE THAT YOU GET IT.

AS INFERIOR KINDS ARE OFTEN SUBSTITUTED. WOTHERSPOON & CO., GLASGOW AND LONDON.

DR. DE JONGH'S (Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL, Prescribed by the most Eminent Medical Men throughout the world, as the safest, speediest and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS. Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart. M.D., Physician in Ordinary to the Queen in Ireland.—"I consider Dr. de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

Dr. LAWRENCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr. de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr. BARLOW, Senior Physician to Guy's Hospital.—"I have frequently recommended persons consulting me to make use of Dr. de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL is sold only in IMPERIAL Half-Pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 8s.; and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNMENT: **ANSAR, HARFORD & CO., 77, Strand, London, W.C.**

CAUTION.—Beware of proposed Substitutions.

MR. JEFFERY'S RESPIRATORS, the only effective Instruments. Wholesale Agency, 237, STRAND, W.C.

KEATING'S PALE NEWFOUNDLAND COD LIVER OIL has been analyzed and recommended by Professors Taylor and Thomson, also by Dr. Edwin Payne, who, in the words of the late Dr. Pereira, says, that "the finest oil is that most devoid of colour, odour and flavour," characters this Oil will be found to possess in a high degree. Half-pints, 1s. 6d.; pints, 2s. 6d.; quarts, 4s. 6d.; and five-pint bottles, 10s. 6d. Imperial measure.—79, St. Paul's Churchyard, London.

KEATING'S COUGH LOZENGES are daily recommended by the Faculty.—Testimonials from the most eminent of whom may be inspected—as the most effectual, safe, speedy and convenient remedy for COUGH and all Disorders of the Lungs, Chest and Throat. Sold in Boxes, 1s. 14d., Tins, 2s. 6d., 6d., and 11s. each. THOMAS KEATING, Pharmaceutical Chemist, 79, St. Paul's Churchyard, London.

TAIT'S ORIENTAL BALM.—The most efficacious means yet discovered for Strengthening, Preserving, Restoring and Beautifying the Hair. Prepared from a receipt by the late John Oldridge, Inventor of the celebrated Balm of Columbia, under the experienced superintendence of his daughter and son-in-law, Mr. and Mrs. Tait.—Sold by all Perfumers, in bottles, at 3s. 6d., 2s. 6d., and 1s. 6d. at the Manufactory, 6, Cosmo-place, Southampton-row, Russell-square, W.C.

FOR DEAFNESS, arising from the accumulation of Cerumen, SAYORY & MOORE'S PATENT EAR DOUCHE is a valuable substitute for ordinary Syringes. Patients use it without inconvenience, and the possibility of injury to the interior of the Ear, and the splashing and inconvenience attending the use of Syringes are entirely obviated.—SAYORY & MOORE, Chemists to the Queen, 143, NEW BOND-STREET, LONDON.

MANUFACTURERS OF IMPROVED ENEMAS.

ASTHMA SPECIFIC—DATURA TATULA.—By immediate contact with the air cells and passages, the fumes of this plant afford instantaneous relief. The remedy is adapted for use by all patients. Grown in this country, and prepared only by SAYORY & MOORE, Chemists to Her Majesty, 143, New Bond-street; 29, Chapel-street, Belgrave-square; and 1, Lancaster-terrace, Hyde Park.

PERFECT FREEDOM FROM COUGHS in 10 minutes, is secured by DR. LOCK'S PULMONIC WAFERS.—They give instant relief, and a rapid cure of Asthma, Consumption, Coughs and all Disorders of the Breath and Lungs. Have a pleasant taste.—Price 1s. 14d., 2s. 6d. and 11s. per box. Sold by all Medicine Vendors.

METCALFE, BINGLEY & CO'S New Pat- tern Brushes, and Penetrating unbleached Hair Brushes, Improved Flesh and Cloth Brushes, and genuine Smyrna Sponges, and every description of Brush, Comb, and Perfumery. The Tooth Brushes search between the divisions of the Teeth—the hairs never come loose. M.B. & Co.'s New and Delicious Perfumery.—The Rose Bouquet, Tuberose and Stange Bouquet, in bottles, 2s. 3d. and 3s. each. Metcalfe's celebrated Alkaline Tooth Powder, 2s. per box.—Sole Establishment, 130 and 131, OXFORD-STREET.

BLAIR'S GOUT and RHEUMATIC PILLS. Price 1s. 14d. and 2s. 6d. per box.

This Preparation is one of the benefits which the Science of Modern Chemistry has conferred upon Mankind; for, during the present twenty years of the present century, to speak of a Cure for the Gout was considered a romance; but now the efficacy and safety of this Medicine are so fully demonstrated, by unsolicited testimonials from persons in every rank of life, that Public Opinion prescribes this as one of the most important Discoveries of the Present Age.

These Pills require no restraint of diet or confinement during their use, and are certain to prevent the disease attacking any vital part.

Sold by all Medicine Vendors, and at 229, Strand, London.

DINNEFORD'S PURE FLUID MAGNESIA has been, during twenty-five years, emphatically sanctioned by the Medical Profession and universally accepted by the Public, as the Best Remedy for the acidity of the stomach, heartburn, headache, gout and indigestion, and as a mild aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescent Draught, in which its Aperient qualities are much increased. During Hot Seasons and in Hot Climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured (with the utmost attention to strength and purity) by DINNEFORD & CO. 172, New Bond-street, London; and sold by all respectable Chemists throughout the Empire.

FOR WEAKNESS, INFLAMMATION and IRRITATION OF THE EYES, caused by the Winds, Blight, Close Application to Literary and other Professional Occupations, the EYE-DOUCHE or FOUNTAIN, invented by SAYORY & MOORE, for the perfect application of Cold Water, Eye Lotions, &c. The effects produced are grateful and refreshing, and the sight is improved and permanently strengthened by the regular use of the Douche.—SAYORY & MOORE, Chemists to the Queen, 143, NEW BOND-STREET, LONDON.—N.B. As the imitation of these Douches causes confusion of the Visual of the Eye, it is necessary to consider that the name of SAYORY & MOORE are conspicuous on all instruments of their manufacture.

PERSONS who are SUFFERING from HEADACHE or INDIGESTION, whether arising from constitutional inaction, biliary disarrangement, or over-indulgence at the table, are particularly recommended to try PARR'S LIFE PILLS. They have never been known to fail in affording immediate relief. PARR'S Pills are highly efficacious in bilious ailments, scorbutic complaints, affections of the nervous system, lowness of spirits, palpitation of the heart, rheumatic pains in the head and limbs, oppression of the chest, indigestion, redundancy of bile, dizziness of the eyes, violent pains across the forehead, impaired memory, sick headache, restlessness and bad dreams, supine going, distention, costiveness, &c. &c. Boxes, price 1s. 14d., 2s. 6d.; and in family packets, 11s. each. Sold by all Chemists and Medicine Vendors.

RECENT PUBLICATIONS BY BLACKIE & SON.

New and Revised Edition, in 14 Divisions, cloth, 10s. each, Divisions 1 to 13 ready,

THE POPULAR ENCYCLOPÆDIA; OR, CONVERSATIONS LEXICON.

Being a GENERAL DICTIONARY of ARTS, SCIENCES, LITERATURE, BIOGRAPHY and POLITICS. With Preliminary Dissertations by distinguished Writers. Illustrated by 154 pages of Steel Engravings, and 14 Coloured Maps, besides many Engravings on Wood. In the present Edition alterations and corrections have been made, which render the work a satisfactory exponent of the state of knowledge in the present day.

AN ENTIRELY NEW SUPPLEMENT

Has been added, containing additional Biographies, Notices of Localities newly discovered, or that have recently risen into importance, of Substances and Processes new in Science and the Arts, of the Great Events of the World during the last twenty years, and other subjects of general interest.

In 4 vols. super-royal 8vo. cloth extra, 4l.

THE COMPREHENSIVE HISTORY OF ENGLAND, CIVIL AND MILITARY, RELIGIOUS, INTELLECTUAL AND SOCIAL.

From the Earliest Period to the Suppression of the Sepoy Revolt. By CHARLES MACFARLANE and the Rev. THOMAS THOMSON. Illustrated by above 1,100 highly-finished Engravings on Wood, Views, Costumes, Portraits, Maps, Plans, &c., and Frontispieces and Titles on Steel.

"This ought emphatically to be entitled the Family History of England."—*Morning Herald*.
"The illustrations of the text are supplied with a judgment that takes account of what readers are likely to require, and rejects the trivial and uninteresting."—*News of the World*.

"The arrangement is clear and judicious, the style graphic and vivid, the narrative resembling the hard-outlined, established histories only as a living, breathing form resembles the skeleton it covers. When completed, the volumes promise to form a work as useful to the student as agreeable to the reader."—*Globe*.

In 3 vols. super-royal 8vo. cloth extra, 21s. each, Volume III. in January,

A

COMPREHENSIVE HISTORY OF INDIA, CIVIL, MILITARY AND SOCIAL.

From the First Landing of the English to the Suppression of the Sepoy Revolt; including an Outline of the Early History of Hindoostan. By HENRY BEVERIDGE, Esq. Advocate. Illustrated by above 500 highly-finished Engravings on Wood, Views, Costumes, Portraits, Maps, Plans, &c., and Frontispieces and Titles on Steel.

"It is impossible to speak too highly of this admirable work. The more we see of it the more we are convinced that the favourable opinions expressed by the press in general on its first appearance, will be fully justified by the result, and that this will prove, when complete, one of those rare books that claim a position in every library."—*Cheltenham Journal*.

"The historian has well and carefully digested his materials, and the illustrators have greatly aided him by the numerous and beautifully executed engravings on steel and wood. Many excellent maps of military engagements and positions enhance its value, and render it peculiarly attractive and instructive."—*Civil Service Gazette*.

Imperial 4to. half morocco, gilt edges, 5l. 5s.

THE IMPERIAL ATLAS OF MODERN GEOGRAPHY:

A Series of above One Hundred carefully-coloured Maps, embracing the most Recent Discoveries, and the latest Political Divisions of Territory, in all Parts of the World. Compiled from the most authentic sources, under the supervision of

W. G. BLACKIE, Ph.D. F.R.G.S.

With an INDEX, containing references to nearly 120,000 places.

"A highly satisfactory publication....The Maps are everything that could be wished, so far as accuracy, distinctness, neatness and fullness of detail are concerned."—*Athenæum*.
"Beyond comparison the best collection of Maps which has yet been made."—*Morning Herald*.

"One of the largest and most complete Atlases ever attempted."—*Critic*.

In 2 vols. imperial 8vo. 2,760 pp. cloth, 4l. 6s.

IMPERIAL GAZETTEER: A GENERAL DICTIONARY OF GEOGRAPHY,

PHYSICAL, POLITICAL, STATISTICAL AND
DESCRIPTIVE.

Edited by W. G. BLACKIE, Ph.D. F.R.G.S.

Illustrated by nearly 750 Engravings on Wood, Views, Costumes, Maps, Plans, &c.

"This excellent book of reference....All the articles we have examined, whether long or short, exhibit a greater degree of correctness in minute detail than we should have thought practicable in so comprehensive a work."—*Athenæum*.

"By far the best Gazetteer in our language."—*Critic*.

In 2 vols. imperial 8vo. 2,888 pp. cloth, 4l.

IMPERIAL DICTIONARY: ENGLISH, TECHNOLOGICAL AND SCIENTIFIC;

Adapted to the Present State of Literature, Science and Art, with a SUPPLEMENT, containing an extensive Collection of Words, Terms and Phrases not included in previous English Dictionaries.

By JOHN OGILVIE, LL.D.

Illustrated by above 2,500 Engravings on Wood.

"Dr. Ogilvie has not only produced the best English Dictionary that exists, but, so far as the actual state of knowledge permitted, has made some approach toward perfection. We scarcely need say that the work has our cordial commendation."—*British Quarterly*.

BLACKIE & SON, PATERNOSTER-ROW, LONDON; EDINBURGH and GLASGOW.

Editorial Communications should be addressed to "The Editor"—Advertisements and Business Letters to "The Publisher"—at the Office, 30, Wellington-street, Strand, London, W.C.

PURITAN TIMES, in the Seventeenth Century. By the Rev. JAMES ANDERSON, Author of the 'Ladies of the Reformation,' 'Ladies of the Covenant,' &c. 2 vols. crown 8vo. cloth extra, price 12s. [In a few days.]

THE ATHENÆUM

Journal of English and Foreign Literature, Science, and the Fine Arts.

No. 1782.

LONDON, SATURDAY, DECEMBER 21, 1861.

PRICE
THREEPENCE
Stamped Edition, 4d.

NOTICE.

The price of THE ATHENÆUM is now THREEPENCE.

Thirty years ago, when THE ATHENÆUM came into the hands of its present Proprietors, its price was Eightpence, and its contents, with advertisements, forty-eight columns. Convinced that the circulation of Literary Journals was restricted by high price, and that every advantage offered to the public would bring increase of circulation and authority, the Proprietors reduced the price one-half—to Fourpence. The experiment succeeded, and cheap Literary Journals became the rule.

The Proprietors have always held to the principle then proved. They have given to the public the benefit of every change in the law, increasing the size of the paper without increase of price, until the average has become double its former size—above ninety-six columns.

The Proprietors, taking advantage of the abolition of the Paper Duty, therefore resolved that the price of THE ATHENÆUM should be reduced to THREEPENCE.

ATHENÆUM OFFICE.

NOTICE.—It is requested that Advertisements intended for insertion in the current week's publication be sent to this Office not later than Wednesday.

THE BRITISH MUSEUM will be CLOSED on MONDAY NEXT, the 23rd inst., being the day appointed for the Funeral of His late Royal Highness the Prince Consort. A. PANIZZI, Principal Librarian.

PAMPHLETS.

A CATALOGUE OF PAMPHLETS on nearly every topic of the day forwarded on application. ROBERT HARDWICK, Publisher, 129, Piccadilly, W.

WESTERTON'S LIBRARY, Hyde Park-corner.—Upwards of 125,000 Volumes of Standard Works in History, Biography, Travels, Fiction, &c., are in circulation at this Library, to which all the New Books are freely added. Books are sent regularly to Subscribers, or may be exchanged at pleasure. Single volumes, or a few of the Art in a Year. Subscription for Families, Book Clubs and Country Libraries, in proportion to the number of Volumes required.

LONDON NEWSPAPERS AT HALF-PRICE.—The Times, Illustrated London News, Saturday Review, London Review, and a few other Papers, regularly posted at Half-Price.—For particulars, inquire a stamp, and an envelope to H. HENRY, 12, Weymouth-terrace, Hackney-road, London.

WOOD ENGRAVING.—MR. GILKS respectfully announces to Publishers, Authors, Inventors, Manufacturers, &c., that he has increased facilities for executing every branch of the Art in the best style, and at moderate charges. London: 21, Essex-street, Strand, W.C.

MAYALL'S PORTRAIT GALLERIES, 224 and 226, REGENT-STREET. Photographs, Stereographs, and Daguerreotypes Taken Daily.

"Mr. Mayall stands supreme in Portraits, and is unrivalled for breadth, manner and finish. Either from the character of his sitters, or the taste of his composition, his portraits appear more dignified, self-possessed, and aristocratic, than those of any other photographer."—*Athenæum*.

GLOVER'S PORTRAITS OF POPULAR MEN.—No. 1. MR. WILLIAM KIDD, of HAMMERSMITH, The PHILANTHROPIST and ANIMALS' FRIEND. ALBUM PORTRAIT, on Card, (post free) 1s. 6d. EDWARD GLOVER, Photographic Artist, 41, Connaught-terrace, Edgware-road, London, W. (near the Marble Arch). Sold also by T. STEPHENSON, 99, Oxford-street (nearly opposite the Pantheon).

MR. KIDD'S NEW GRAND CHRISTMAS "GOSSIP." "FUNNY FACTS FOR FUNNY FOLKS." From the Morning Post.

"To hear WILLIAM KIDD address Children—children of all ages—and relate to them from his inexhaustible and ever-varying budget of delightful Anecdotes of Men and Animals, things (to them) before unknown, is, we hardly need say, an especial treat. Laying aside all pretension to dignity, Mr. Kidd becomes a child for the nonce. He evidently forgets everybody but the fun-loving children whom he sees and hears laughing joyously around him. This is true philosophy."

*Particulars on Application; and (early) Previous Engagement absolutely necessary. Apply, by letter only, to Mr. WILLIAM KIDD, 8, Great Castle-street, Regent-street, London, W.

"LOVE ME, LOVE MY BIRD!"—Fiftieth Thousand.

KIDD'S (W.) SHILLING CANARY BOOK is the only Practical Work on the Breeding, Feeding, Rearing, Keeping and Taming of this Universal Pet. Sent post free. N.B. Mr. KIDD'S BOOK OF BRITISH SONG BIRDS, &c., complete, splendidly bound and illustrated, 5s. post free.

"Whatever is worth doing at all, is worth doing well. Every lady, therefore, who keeps a bird, and would learn how to preserve it in health and in song, ought to read Mr. KIDD'S BOOK."—*Athenæum*.

London: GROOMBRIDGE & SONS, 5, Paternoster-row.

HOW TO TEACH A PARROT TO TALK; &c. &c.

MR. KIDD, in the LEISURE HOUR.—Mr. KIDD'S Contributions to the 'LEISURE HOUR' will be found in the following Numbers of that popular periodical. Nos. 488, 496, 500, 503, 508, 510, 518. Price 1d. each. The whole sent by post for 5 postage-stamps, and 10 for 10. Mr. J. JONES, 56, Paternoster-row; and all Booksellers and News-vendors.

"TO BE, OR NOT TO BE?"

KIDD'S (W.) CHARMED RING.—50th Thousand. Price 4d.; post free, 5d.

From the Standard.

"A Book on MATRIMONY, sensibly written, and with a thorough knowledge of the subject in all its many ramifications, cannot fail to be received with favour, inasmuch as it is a very delicate subject to handle, and one that very few men dare attempt. Mr. Kidd, however, has not only attempted it, but succeeded in producing a book that everybody ought to read, and with which all must be delighted."

"Excellent—most excellent! Well done, Mr. Kidd!"—*Daily News*. London: GROOMBRIDGE & SONS, 5, Paternoster-row.

NOW EXHIBITING, CHROMOTYPES, suitably framed and unframed, at low prices, including all ever published. No charge for packing-cases. PAUL JERNARD & SON, Fine Art Gallery, 170, Fleet-street, E.C. Catalogues on receipt of two stamps.

COLBURN'S UNITED SERVICE MAGAZINE, AND NAVAL AND MILITARY JOURNAL.

This popular periodical, which has now been established more than a quarter of a century, embraces subjects of such extensive variety and powerful interest as must render it scarcely less acceptable to readers in general than to the members of those professions for whose use it is more particularly intended. Independently of a succession of original papers on innumerable interesting subjects, personal narratives, historical incidents, correspondence, &c., each number comprised Biographical Memoirs of Eminent Officers of all Branches of Service—Reviews of New Publications, either immediately relating to the army or navy, or involving subjects of utility or interest to the members of either—Full Reports of Trials by Courts-Martial—Distribution of the Army and Navy—General Orders—Circulars—Promotions—Appointments—Births—Marriages—Obituaries, &c., with all the Naval and Military Intelligence of the month.
This is one of the ablest and most attractive periodicals of which the British press can boast, presenting a wide field of entertainment to the general as well as professional reader.—*Globe*.
Hurst & Blackett, Publishers, Successors to Henry Colburn, 13, Great Marlborough-street.

18. The Life of Jeanne d'Albret.
19. The Valley of a Hundred Fires.
20. Burke's Romance of the Forum.

"The publications included in this Library have all been of good quality, and give information while they entertain. The manner in which the cheap editions forming the series is produced deserves especial mention. The paper and print are unexceptionable; there is a steel engraving in each volume, and the outside of them will satisfy the purchaser who likes to see a regiment of books in handsome uniform."—*Examiner*.

HURST & BLACKETT, 13, Great Marlborough-st.

ARTS AND SCIENCES.

* * For full details, see Prospectus, which may be had from the Publishers, or through any Bookseller.

"As regards the contents of this Cyclopædia, it is, however, impossible to give any sufficient impression of an aggregate which includes somewhere or other all the information generally required upon every conceivable topic. A good Encyclopædia, as every one knows, is a compendious library; and though students may require further information upon some points than its summaries contain, even students will be surprised in this instance to find the materials at their disposal when they once adopt the habit of resorting to its pages. For all practical purposes, a large proportion of the articles may be said to be exhaustive; they are accurate to a degree which will strike even those who know what pains have been taken to render them so; and as they are concise as well as full, every column being rammed like a sky-rocket, the owner has a reservoir out of all proportion to the library-shelves it will occupy."—*Times*, Oct. 4, 1861.

In 1 vol. post 8vo. with Map, price 10s. 6d.

THE PRINCE OF WALES IN CANADA AND THE UNITED STATES.

By N. A. WOODS, Esq.

The *Times*' Special Correspondent.

"As the Prince of Wales's journey has become a political fact of great importance, coming so closely before the recent agitation in the States,—and as Mr. Woods has made his work very nearly exhaustive of the subject, we doubt not that it will now and hereafter become a work for historical reference."—*Court Journal*.

On the 24th inst. will be published, price 7s. 6d.

THE FIFTH VOLUME OF

THE BEST CHRISTMAS PRESENT.

PUNCH RE-ISSUE,

From its Commencement in 1841, to the End of 1860.

In Volumes, 5s. boards, uncut, monthly; and in double Vols. 10s. 6d. cloth gilt, every other month.

The DOUBLE VOLUME for 1846 (Vols. 10 and 11), cloth gilt, price 10s. 6d.; also Vol. 11, price 5s. in boards, will both be published on the 31st instant.

The following are already published:—

Vol. 1 (for 1841)	6s.
Vols. 2 and 3 (1842)	10s. 6d.
Vols. 4 and 5 (1843)	10s. 6d.
Vols. 6 and 7 (1844)	10s. 6d.
Vols. 8 and 9 (1845)	10s. 6d.

*. Any Volume or Double Volume may always be had separately.

"As a current comment on our social history, the volumes of *Punch* will have in their way as real, if not as grave, an interest to future students as the tomes of any serious historical compiler. The pencil sketches show the English year by year in their habits as they lived, and chronicle incidentally every shift and turn of outward fashion. Thus in a pleasant and handy volume one can recover the whole body of English gossip for a bygone year. To the shelves, then, of all household libraries not yet possessed of their enlivening store of wit and wisdom, we commend the volumes of *Punch* in this their complete re-issue. They are rich in wholesome comic thought, and they are, we believe, the best repository of comic sketches within the whole range of English and foreign literature."—*Examiner*.

Books for Presentation.

MEMOIRS, LETTERS and REMAINS of ALEXIS DE TOCQUEVILLE. Translated from the French by the Translator of 'Napoleon's Correspondence with King Joseph.' With large Additions. In 3 vols. crown 8vo. price 21s.

"The appearance of this book in an English dress will be welcomed by every politician and every Englishman capable of appreciating exhaustive and solid thought.... We do not know another writer, unless it be Pascal, who leaves precisely the same impression."—*Spectator*.

PICTURES of OLD ENGLAND. By Dr. REINHOLD PAULI. Translated, with the Author's Revision, by E. C. OTTÉ. Crown 8vo. cloth, 8s. 6d.

"Presents the facts of history with the pleasing accessories of a romance."—*Clerical Journal*.

LIFE of EDWARD FORBES, F.R.S., late Professor of Natural History in the University of Edinburgh. By Dr. G. WILSON and A. GEIKIE, F.G.S. 8vo. with Portrait, 14s.

"He was in every sense a philosopher; his endowments rose above mere talent into the higher atmosphere of genius."—*London Review*.

The PLATONIC DIALOGUES for ENGLISH READERS. By Dr. WHEWELL. Vol. I. 7s. 6d. Vol. II. 6s. 6d. Vol. III. 7s. 6d.

"There cannot be two opinions, we should think, as to the skill with which the work is executed."—*Press*.

FOOT-NOTES from the PAGE of NATURE; or, First Forms of Vegetation. By Rev. H. MACMILLAN, F.R.S.E. With numerous Illustrations and a Coloured Frontispiece. Fcap. 8vo. cloth, 5s. A popular work on Mosses, Lichens, Fresh-water Algae and Fungi.

"Written with considerable beauty of diction, and discovers an enthusiastic fondness for Nature upon the author's part, which has made the composition of it a real labour of love. Its descriptive passages are truly eloquent and graceful."—*Spectator*.

The HUMAN HAND and the HUMAN FOOT. By G. M. HUMPHRY, M.D. F.R.S. With numerous Illustrations. Fcap. 8vo. cloth, 4s. 6d.

"We cordially recommend the book to the public and the profession; the former cannot but be benefited by it, and the members of the latter, even though accomplished anatomists, will be both interested and amused by the novel way in which many of its points are brought forward."—*Lancet*.

SERMONS PREACHED in RUGBY SCHOOL CHAPEL.

By FREDERICK TEMPLE, D.D., Chaplain in Ordinary to the Queen, and Head-Master of Rugby School. 8vo. cloth, price 10s. 6d.

"They are fraught with much Christian doctrine, and overflowing with the genuine Evangelical spirit.... The boys of Rugby are highly privileged to listen to such discourses."—*The Homilet*.

WESTWARD HO! Fourth Edition. By PROFESSOR KINGSLEY. 6s.

"A good novel to an excellent purpose."—*Times*.

TWO YEARS AGO. Third Edition. By PROFESSOR KINGSLEY. 6s.

"Genial, large hearted, humorous."—*Guardian*.

The HEROES: Greek Fairy Tales. By PROFESSOR KINGSLEY. With Illustrations. 5s.

"Rarely have those heroes of Greek tradition been celebrated in a bolder or more stirring strain."—*Saturday Review*.

GEOFFREY HAMLYN. Second Edition. By HENRY KINGSLEY. 6s.

"Keeps up its interest from the first page to the last."—*Athenæum*.

GEORGE BRIMLEY'S ESSAYS. Second Edition. 5s.

"One of the finest critics of the present day."—*A. H.*

RUTH and HER FRIENDS: a Story for Girls. Third Edition, with a Frontispiece. 5s.

"We wish all the girls in the land the opportunity of reading it."—*Nonconformist*.

OUR YEAR. Prose and Poetry. By the Author of 'John Halifax.' With Illustrations. 5s.

"Just the book we should like to see in the hands of every child."—*English Churchman*.

CHRISTMAS, NEW YEAR'S & BIRTHDAY GIFTS,

Published by LOCKWOOD & CO.

THE BOY'S OWN BOOK: a Complete Encyclopædia of all the Diversions, Athletic, Scientific and Recreative, of Boyhood and Youth. With many Hundred Woodcuts and Ten Vignette Titles, beautifully printed in Gold. New Edition, greatly enlarged and improved, price 8s. 6d. handsomely bound in cloth.

* * * This is the original and genuine 'Boy's Own Book,' formerly published by Mr. Bogue, and recently by Messrs. Kent & Co. Care should be taken, in ordering, to give the exact title, or the name of either the former or present Publishers.

THE LITTLE BOY'S OWN BOOK of SPORTS and PASTIMES. With numerous Engravings. (Abridged from the above.) 16mo. 3s. 6d. cloth.

"MANY HAPPY RETURNS of the DAY!" A Birthday Book. By CHARLES and MARY COWDEN CLARKE, Authors of 'The Concordance to Shakespeare,' &c. Beautifully illustrated by the Brothers Dalziel. Small post 8vo. price 6s. cloth elegant, gilt edges.

"An unobjectionable child's book is the rarest of all books. 'Many Happy Returns of the Day' is not only this, but may rely, without shrinking, upon its positive excellencies for a long and deserved popularity."—*Westminster Review*.
"It will be as acceptable to the young as 'Sandford and Merton' was wont to be half a century since. The authors will henceforth share the affections of the young with Hans Andersen, Peter Parley, and the Brothers Grimm."—*Plymouth Journal*.

TRUTHS ILLUSTRATED by GREAT AUTHORS. A Dictionary of nearly Four Thousand Aids to Reflection, Quotations of Maxims, Metaphors, Counsels, Cautions, Proverbs, Aphorisms, &c. &c. In Prose and Verse. Compiled from the Great Writers of all Ages and Countries. Tenth Edition. Fcap. 8vo. cloth, gilt edges, 568 pp., 6s.

"The quotations are perfect gems; their selection evinces sound judgment and excellent taste."—*Dispatch*.
"We accept the treasure with profound gratitude—it should find its way to every home."—*Era*.
"We know of no better book of its kind."—*Examiner*.

THE PHILOSOPHY of WILLIAM SHAKESPEARE: delineating, in Seven Hundred and Fifty Passages selected from his Plays, the Multiform Phases of the Human Mind. By the Editors of 'Truths Illustrated by Great Authors,' &c. Second Edition. Fcap. 8vo. cloth, gilt edges, nearly 700 pages, with beautiful Vignette Title, price 6s.

* * * A glance at this volume will at once show its superiority to Dodd's 'Beauties,' or any other volume of Shakespearean selections.

SONGS of the SOUL during its PILGRIMAGE HEAVENWARD: being a New Collection of Poetry, illustrative of the Power of the Christian Faith; selected from the Works of the most eminent British, Foreign and American Writers, Ancient and Modern, Original and Translated. By the Editors of 'Truths Illustrated by Great Authors,' &c. Second Edition. Fcap. 8vo. cloth, gilt edges, 638 pages, with beautiful Frontispiece and Title, price 6s.

This elegant volume will be appreciated by the admirers of 'The Christian Year.'

THE BEAUTY of HOLINESS; or, the Practical Christian's Daily Companion: being a Collection of upwards of Two Thousand Reflective and Spiritual Passages, remarkable for their Sublimity, Beauty and Practicality; selected from the Sacred Writings, and arranged in Eighty-two Sections, each comprising a different theme for meditation. By the Editors of 'Truths Illustrated by Great Authors.' Third Edition. Fcap. 8vo. cloth, gilt edges, 538 pp., 6s. (large type, suitable for aged eyes).

TIMBS'S "THINGS NOT GENERALLY KNOWN" SERIES. By JOHN TIMBS, F.S.A. In Six Volumes, fcap. cloth, price 15s., viz.:—General Information (Things Not Generally Known), 2 vols.; Curiosities of Science, 2 vols.; Curiosities of History, 1 vol.; Popular Errors Explained, 1 vol.

* * * Each Volume is sold separately, price 2s. 6d.

"Any one who reads and remembers Mr. Timbs's encyclopædic varieties should ever after be a good tea-table talker, an excellent companion for children, a 'well-read person,' and a proficient lecturer."—*Athenæum*.

TIMBS'S SCHOOL-DAYS of EMINENT MEN. Containing School and College Lives of the Most Celebrated British Authors, Poets and Philosophers; Inventors and Discoverers; Divines, Heroes, Statesmen and Legislators. By JOHN TIMBS, F.S.A. With a Frontispiece by JOHN GILBERT, and 13 Views of Public Schools, &c., in a close-printed volume, price 3s. 6d. cloth.

* * * This book is extensively used, and specially adapted, for a Prize Book at Schools.

"A book to interest all boys, more especially those of Westminster, Eton, Harrow, Rugby and Winchester."—*Notes and Queries*.

TIMBS'S STORIES of INVENTORS and DISCOVERERS in SCIENCE and the USEFUL ARTS. By JOHN TIMBS, F.S.A. Numerous Illustrations. Fcap. 5s. cloth.

"These stories by Mr. Timbs are as marvellous as the 'Arabian Nights' Entertainments, and are wrought into a volume of great interest and worth."—*Atlas*.

TIMBS'S PAINTING POPULARLY EXPLAINED. With HIS- TORICAL SKETCHES of the PROGRESS of the ART. A Manual for Art-Students and Visitors to the Exhibitions. By THOMAS JOHN GULLICK, Painter, and JOHN TIMBS, F.S.A. With a Frontispiece and Vignette. Small 8vo. pp. 336, 6s. cloth.

* * * This Work has been adopted as a Text-book in the Schools of Art at South Kensington, in connexion with the Science and Art Department of the Committee of Council on Education.

"This is a book which all lovers of Art will rejoice in, as containing, in small compass, the very information which Exhibitions and Art-Unions must have made so many thousands sensible of their want of."—*National Magazine*.

SIDNEY GREY: a Tale of School Life. By the Author of 'Mia and Charlie.' Second Edition, with Six Illustrations. Fcap. 4s. 6d. cloth.

EVENTS to be REMEMBERED in the HISTORY of ENGLAND.

Forming a Series of interesting Narratives, extracted from the Pages of Contemporary Chronicles or Modern Historians, of the most remarkable Occurrences in each Reign; with Reviews of the Manners, Domestic Habits, Amusements, Customs, &c. &c. of the People, Chronological Table, &c. By CHARLES SELBY. Twenty-fifth Edition. 12mo. fine paper, with Nine beautiful Illustrations by Ansel, price 3s. 6d. cloth elegant, gilt edges.

VICTORIAN ENIGMAS; or, Windsor Fireside Researches: being a Series of Acrostics enigmatically propounded on Historical, Biographical, Geographical and Miscellaneous Subjects; intended in a novel manner to combine Amusement with Exercise in the Attainment of Knowledge. By CHARLOTTE ELIZA CAPEL. Royal 16mo. elegantly printed, price 2s. 6d. cloth.

* * * The idea for this entirely original style of Enigmas is taken from one said to have been written by Her Majesty for the Royal Children, which, with the Solution, is given.

London: LOCKWOOD & Co. 7, Stationers' Hall-court, Ludgate-hill.

BOOKS FOR PRESENTS.

ILLUSTRATED WORKS FOR THE YOUNG.

A BOY'S ADVENTURES in the WILDS of AUSTRALIA. By WILLIAM HOWITT. With Designs by Harvey. Cheap Edition, 2s. boards; fine paper, 4s. cloth gilt.

"All the boys in England, whether 'old boys' or young ones, will rejoice in this fascinating book, full of anecdote and wild adventure."—*Athenæum*.

"A capital book, full of humour, adventure, excitement and those incidents of peril and pleasure which seem indigenous to Australia."—*Church and State Gazette*.

NAOMI; or, the Last Days of Jerusalem. By Mrs. J. B. WEBB. New Edition, with Designs by Gilbert, and View and Plan of Jerusalem. Fcap. 8vo. 7s. 6d. cloth lettered.

"It is in truth an admirable little volume, and well worthy of a yet more extensive patronage than it has already received."—*Maidstone Journal*.

"One of the most interesting works we have read for some time. We are not surprised at the popularity it has attained—it deserves it; and we cordially wish it further success."—*Metropolitan*.

"The plot is easy, natural and well sustained. The narrative gracefully written....Seldom have we read a tale better adapted for its purpose."—*Monthly Review*.

SELECT POETRY FOR CHILDREN. With brief Explanatory Notes, arranged for the use of Schools and Families. By JOSEPH PAYNE. Tenth Edition, corrected and enlarged. 18mo. 6s. 6d. cloth; or 2s. scarlet, gilt edges.

"A very nice little volume, containing a charming collection of poetry."—*Spectator*.

"It is really a treat to see anything so simply good as the little volume before us."—*Metropolitan Magazine*.

"Pieces that are at once sprightly and instructive, pathetic and devout."—*Congregational Magazine*.

WINTER EVENINGS; or, Tales of Travellers. By MARIA HACK. New and Cheaper Edition, with Illustrations by Gilbert. Fcap. 3s. 6d. cloth.

CANADIAN CRUSOES: a Tale of the Rice Lake Plains. By Mrs. TRAILL. New and Cheaper Edition. Edited by AGNES STRICKLAND. Illustrated by Harvey. Fcap. 3s. 6d. cloth; or 5s. gilt edges.

"A very delightful book for young readers. The interest is deep and well sustained. Mr. Harvey has contributed some excellent woodcuts, and the book is altogether a pretty and interesting one."—*Guardian*.

"The book is exceedingly well calculated for children, to whom its interesting contents, its handsome appearance, and beautiful illustrations, will render it an acceptable present."—*Tail's Magazine*.

NURSERY RHYMES. An Illustrated Edition, in large type, with Sixteen Cuts by Gilbert. 16mo. 2s. 6d. cloth, gilt edges. New and improved Edition, with Frontispiece, 18mo. 1s. 6d. cloth gilt.

"These verses for children have never been surpassed for the happy union of fancy and precept, the simplicity and intelligibility of the ideas and words, and the fluency and conciseness of the rhyme."—*Spectator*.

ORIGINAL POEMS for INFANT MINDS. By the same Authors. New and Improved Edition, with Frontispiece. 2 vols. 18mo. 1s. 6d. each, cloth gilt.

The BOY and the BIRDS. By EMILY TAYLOR. With Sixteen fine Woodcuts, from Landseer's Designs. 16mo. gilt edges. 2s. 6d.

"A delightful book for children. The birds tell of their habits to a little inquiring boy, who goes peeping into their nests and watching their doings; and a very pleasant way they have of talking, sure to engage the young reader's attention. The designs are pretty, and nicely cut on wood."—*Spectator*.

THOMAS WRIGHT, M.A. F.S.A.

Extract from THE TIMES Notice of the First Series:—"The best is still to come, the last eight-and-twenty years of her life, when she had ennobled her, and when she moved about the world in it, but not of it. She had known everybody, and could talk to the rising generations of innumerable persons now existing but in name."

ANECDOTE LIVES OF WITS AND HUMOURISTS,

Swift, Steele, Sheridan, Porson, Foote, Goldsmith, The Two Colmans, Rev. Sydney Smith,

By JOHN TIMBS, F.S.A.,

Will be published immediately, in 3 handsome volumes, with Portraits, 18s. [Next week.]

A RESIDENCE AT NAGASAKI AND HAKODATE IN 1859-60. With some Account of Japan. By C. P. HODGSON, H.M.'s Consul at those Ports. With Letters on Japan, by his Wife. Crown 8vo. with numerous Illustrations, 10s. 6d. [Now ready.]

"This book corroborates that aphorism that 'truth is stranger than fiction.' We can safely aver that for original aspects of human society, as well as for impressive descriptions of nature, this work will not yield to any novel of the season."—*Daily News*.

THE AMERICAN UNION: Its Value and Real Effects on the Well-being of the American People; the Causes of its Disruption, and Probable Results of the Present Conflict; with an Examination of our own Interests in the Issue, and an Inquiry into Secession as a Constitutional Right. By JAMES O'BRIEN. 8vo. 10s. 6d. [Now ready.]

"In this excellent work the facts are recommended like diamonds, by their setting; the language is faultless, elegant, and pure English undefiled."—*Liverpool Journal*.

EAST LYNNE. 3 vols. Second Edition. [Ready.]

"A capital story, full of plot, passion, incident and character." [Illustrated News.]

NEW POPULAR WORKS.

LORD DUNDONALD'S (Lord Cochrane) AUTOBIOGRAPHY. Crown 8vo. 5s.

"Ought to be a prize-book in every military and naval school." *London Review*.

"We may safely predict for this work an unbounded popularity—a narrative of heroic adventure, every line of which should be perused by Englishmen."—*Times*.

"More full of interest than any one of Marryat's Novels." *Economist*.

THE INGOLDSBY LEGENDS; or, 'Mirth and Marvels. Crown 8vo. 5s.

"Abundant in humour, observation, fancy; in extensive knowledge of books and men; in palpable hits of character, exquisite grave irony, and the most whimsical indulgence of point and epigram; we doubt if even Butler beats the Author of these Legends in the easy drollery of verse. We cannot open a page of the book that is not sparkling with its wit and humour, that is not ringing with its strokes of pleasant and satire; and by a little gentle thought, a modicum of small reflection, how easy to discover beneath the careless, laughing surface of the Legends the sensible, manly purpose."—*Examiner*.

HURST & BLACKETT'S NEW WORKS.

TRAVELS in the HOLY LAND. By FREDRIKA BREMER. Translated by MARY HOWITT. 2 vols. 21s.

"This is one of the very best of Miss Bremer's works. We have read many accounts of Palestine, but never remember to have read in any author more charming descriptions of places, persons and events than occur in these volumes."—*Messenger*.

FRENCH WOMEN OF LETTERS. By JULIA KAVANAGH, Author of 'NATHALIE,' 'ADELE,' &c. 2 vols. 21s.

"Miss Kavanagh has shown taste and feeling in this agreeable book."—*Athenæum*.

"Miss Kavanagh has found a subject worthy of her recognized talents. The author gives analyses of the principal works of the ladies whose lives she sketches, and this is no mean part of the value of her book. We need hardly add, that the writing is beautifully correct and expressive."—*Daily News*.

THE LIFE OF J. M. W. TURNER, R.A.

From Original Letters and Papers furnished by his Friends and Fellow Academicians. By WALTER THORNBURY. 2 vols. 8vo. with Portraits, &c. 30s.

"Mr. Thornbury may be congratulated on the completion of an arduous task, the difficulties of which, however, have been alleviated by the ready co-operation he has met with on all hands from the friends of the deceased artist, who have only been too glad to place their stores at his disposal. Impressed with the importance of the subject, the author has treated it with reverence and earnestness. Mr. Thornbury has honestly endeavoured to paint Turner truly, regarding him neither with the eyes of an enthusiast nor with those of a cynic. Mr. Thornbury's work must not only be considered as the very best he has written, but as a valuable addition to our artistic biography. To the professional student it will be especially interesting."—*Spectator*.

THE LIFE OF Admiral Sir CHARLES

NAPIER, K.C.B.; with HIS CORRESPONDENCE. From his Private Papers. By Major-General ELESER NAPIER. 2 vols. 8vo. with Portraits and Charts. 30s.

"Sir Charles Napier will undoubtedly rank among the first of our sea worthies. This work brings all the incidents of the Admiral's life together, so as to create a story of great interest, with much that is amusing for the general, and more that is instructive to the professional, reader."—*Athenæum*.

LODGE'S PEERAGE AND BARONET-

AGE for 1862. Under the especial Patronage of H.M. MAJESTY, and corrected throughout by the Nobility. Thirty-first Edition, 1 vol. with the Arms beautifully engraved, handsomely bound, gilt edges, 31s. 6d. [This day.]

MEMOIRS OF QUEEN HORTENSE,

MOTHER OF NAPOLEON III. Edited by LASCELLES WRAXALL. 2 vols. with Portrait, 21s.

THE OKAVANGO RIVER. A Nar-

native of Travel, Exploration and Adventure. By CHARLES JOHN ANDERSON, Author of 'LAKE NGAMI.' 8vo. with Portrait of the Author and numerous Illustrations. 21s.

"Mr. Anderson's book, from the number of well-told adventures, its rich fund of information, and spirited illustrations, will command a wide circle of readers."—*Athenæum*.

TRAVELS in the REGIONS OF the

AMOO, and the Russian Acquisitions on the Confines of India and China. By T. W. ATKINSON, F.R.G.S., Author of 'Oriental and Western Siberia.' Dedicated, by permission, to Her Majesty. Second Edition. With Map and 58 Illustrations, 21. 2s. bound.

THE ROMANCE OF the FORUM; or,

NARRATIVES, SCENES AND ANECDOTES FROM COURTS OF JUSTICE. By PETER BURKE, Esq., at-Law. Price 6s. bound and illustrated, forming the New Volume of HURST & BLACKETT'S STANDARD LIBRARY OF CHEAP EDITIONS.

To this New Edition of 'The Romance of the Forum' is added the true narrative on which have been founded the drama and romances of 'The Colleen Bawn.'

THE NEW NOVELS.

The LAST OF the MORTIMERS. By

the Author of 'MARGARET MAITLAND,' &c. 3 vols.

"The Last of the Mortimers' is a charming book—simple, quaint and fresh. It is a novel 'come if you can' (the more's the pity), and it will go far to sustain the reputation of the author of 'Margaret Maitland.'"—*Athenæum*.

"The Last of the Mortimers' is not only good in itself, but is quite as clever in its way as 'Mrs. Margaret Maitland,' and has something stinger in the fibre of its romance. It is the most powerful and most interesting novel by this authoress; and the world will thank her for more tales as good and as amusing."—*Globe*.

The CASTLEFORD CASE. By

FRANCES BROWNE, Author of 'MY SHARE OF THE WORLD.' Dedicated to the MARQUESS OF LANSOWNE. 3 v.

WHITE and BLACK: a Story of the SOUTHERN STATES. 3 vols.

"This story is full of interest. The characters are life-like and free from exaggeration, and the style is vigorous, fresh and English. It is a clever novel, with a purpose fairly carried out. It will be read extensively, and richly abused on one side and admired on the other; but no party spirit can destroy its effect on an unprejudiced reader."—*Globe*.

SIR RICHARD HAMILTON.

"This story deserves a hearty welcome, for it is that pleasant rarity, a novel which evinces talent and taste."—*Post*.

FOREST KEEP. Dedicated to Lady

TRAVELMAN. 3 vols.

[Next week.]

CHRISTMAS PRESENTS.

English Sacred Poetry of the 16th, 17th, 18th, and 19th CENTURIES: Selected and edited by the Rev. ROBERT ARIS WILLMOTT. Illustrated by Holman Hunt, Watson, Gilbert, Wolf, &c. 4to. cloth elegant, 21s.

London: ROUTLEDGE, WARNE & ROUTLEDGE.

LONDON, SATURDAY, DECEMBER 21, 1861.

LITERATURE

Giovanni Maria Mastai, Pope Pius the Ninth
—[Pio Nono, per Francesco Dall' Ongaro].
(Turin.)

THE time is yet unripe for a comprehensive and well-balanced life of Pius the Ninth. Not a few years must pass before the horizon becomes clear enough, and the point of sight sufficiently distant, for the execution of a satisfactory portrait of the reformer of 1846; the friend of Austria in 1849; the weak and weary dupe of the Court of Rome. The political events which he alternately swayed and was swayed by, in Italy, do not, as yet, touch upon completion, and his negative influence still weighs too strongly upon her destinies to allow of an unprejudiced biography from the pen of either friend or foe.

The author of the little volume before us, Prof. Dall' Ongaro, is a dramatist, a lyric poet, whose works have been noticed in these columns. Besides being a writer and a poet, he has been for the last score of years a marked man among the partisans of the extreme left in the political events of Italy, and has gone through a chequered and picturesque career, from the pulpit and the confessional at Venice, passing through the battle-field and the siege of Rome, to a place in the journalistic and theatrical circles of Paris, and thence in brighter times back again to the tranquil honours of the Professor's chair, at Florence, which he now fills.

He is gifted with many qualifications which eminently fit him for a successful biographer: a clear eye, a vivid and characteristic way of handling the subject, a shrewd appreciation of the interests and motives which lie at the heart of the phases of historical change which he undertakes to examine, and a happy pictorial power of language, rare among modern Italian writers. Yet, with all this, he sketches the career of Pope Pius at a disadvantage, for in his anxiety to show himself impartial, the effort to look from a point of view not properly his own is apt to make his glance vague and his hand unsteady, while its results will hardly be quite acceptable to the hearty supporters of either side of the question, inasmuch as the one camp will hold him guilty of excessive leniency towards the subject of his story, and the other will make his lack of severity an excuse for the unscrupulous assertion that, since so little has been said in unqualified blame by so stout a Republican, who may reasonably be supposed to exaggerate rather than to palliate the Holy Father's shortcomings, the proper inference is, that these supposed shortcomings are a mere invention of the enemies of religion and morality as typified in the Pontiff.

The childhood and early life of Mastai were passed under the same influences as those of most of the young nobles of his country and day. He was born at Sinigaglia, a little old-world city of the Roman States, in the year 1792, and lived there under the heavy-browed roof of the family palace until he was eleven years old, when he was sent to Volterra for education at a college presided over by the well-known *padre* Inghirami. The young Mastai's abilities were by no means considerable; his character weak and irresolute; but he seems to have been "a good boy, who minded his book" and never got into trouble with his masters for insubordination or wilful idleness. At seventeen, he was attacked for the first time with the epileptic disease to which he has ever since been subject,

and the state of his health obliged his parents to recall him home, and release him, by medical advice, from every species of study. Thus passed the years of adolescence of the future Pope in the rather monotonous occupations and pastimes of the Italian provincial nobles of that day. Mastai's person was good; his address far from inelegant, and he especially prided himself on his proficiency in the manly exercises most in vogue among his compeers, such as riding, shooting, and *pallone* playing, a kind of game of ball much in favour with young Italians, especially of the lower provinces of the peninsula, requiring no small degree of skill and activity. How strangely to us now, through the haze of nearly half-a-century, shows the figure of Pio Nono, the young *élegant* of Sinigaglia; his smooth face all smiles of well-pleased vanity, and his cheeks and eyes a-light with strong exercise; coatless and hatless, his fine frilled shirt tied up with pink ribbons, as is still the costume of *pallone* players on "solemn" play-days in the towns of Italy, bounding along, or striking the ball high into the air, amid the applause of the admiring townsfolk, on a quaint, picturesque *pallone* ground, probably skirting the grey battle-mented wall of some small Romagnole city, which little dreamed then of harbouring the future Vicegerent of Heaven in the pleasant-spoken stripling whose address it admired!

Our author vaguely hints at some romantic love passage which found place in Mastai's early years. A beautiful Roman princess; a carriage overturned on its way to the shrine of Loreto; a fortunate rival who had the good luck to rescue the lady from peril, and, for a-while at least, was permitted to bask in her smiles; are the principal features of this episode, which are just touched on in passing, as, in truth, they seem to have left little or no after-impression on the heart of their hero. Ill-fortune appears to have dogged him in all his younger aspirations. A passing intimacy with some of the officers of the ill-starred Murat's army gave him a longing to try a military career, and his uncle, a prelate at the Court of the newly-restored Pope, obtained for him a lieutenant's commission in the Papal Guard. Before he had joined the corps, however, his unfortunate attacks of epilepsy became known to the military authorities, and again his hopes received a check in the intimation that he could not be permitted to serve in the army. It was then that Mastai, in disgust and bitter disappointment at the weary and aimless life which lay before him, resolved on entering the Church, and, soon after taking orders, retired into the *Ospizio di Giovanni*, a species of Seminary at Rome, where he gave himself up to the laborious duties of a teacher, and lived in a monotonous round of tranquil hourly employment, greatly improved in health, and absorbed in a trance of passive obedience and a superstitious fatalism, which made him look upon the change in his way of life as the fruit of a special interposition in his behalf of the Virgin, to whose service he had vowed himself, like the paladins of old to their ladies. A curious and characteristic scene is that mentioned by Prof. Dall' Ongaro as having taken place about this period of Mastai's life, and in which the young ecclesiastic took a principal part, at his native town of Sinigaglia. The scene in question was enacted on the occasion of a "Mission," which is described as follows:—

There was at that time living at Rome a Monsignore Odescalchi, a judge of the Ruota, and member of a company of Missionaries, who had the charge of certain dramatic representations, which

were still in vogue in the South of Italy; half sermons half dramas, a remnant of the old Mystery-plays, a powerful means of attraction to a people used to theatre-going and eager for everything that speaks to the imagination. These "Missions," then, were short plays, recited sometimes in church from the pulpit, sometimes in the public Piazza on a sort of platform, which resembled the Car of Thespis. The actors were two or three in number, according to the necessities of the play; the plot was always the conversion of the sinner, the confusion of the heretic, and a victory over the spirit of darkness. These missions are spectacles reserved for grand solemnities. When Cardinal Testa Ferrata was made Bishop of Sinigaglia, he celebrated his entry into the diocese by the performance of one of these sacred dramas, in which the young Mastai, who had recently taken orders, was invited to enact the part of the converted sinner. Sinigaglia once more beheld the unlucky suitor of the princess Albani, the brilliant *pallone* player, the young Count whose birth and personal accomplishments had seemed to prepare him for a very different career, clothed in the sober cassock of the priest. The people were surprised and moved at the sight. He was applauded with tears. Miracles were wrought and prophecies uttered. A young girl of the name of Ferretti, almost an idiot, recovered her reason, and predicted to the young missionary a future full of greatness and glory.

From this time forth Mastai began to devote himself with peculiar ardour to the worship of the Virgin; he became shortly afterwards a Canon of "Santa Maria Inviolata," and, very probably, began already to entangle his intellect in the theological subtleties of that dogma of the Immaculate Conception, the promulgation of which was to be the work of his declining years.

Another of the results of what may be called, in artistic phrase, the future Pontiff's "second manner," was his expedition to Chili, as the coadjutor of the Apostolic Vicar, Monsignor Muzzi. The new-born zeal of Mastai anticipated a halo of triumph to be won in the steps of the canonized missionaries of old time among the virgin solitudes of the New World. He spared no pains to obtain the appointment, utterly disregarding the entreaties and dissuasions of his family, and especially his mother, whose anxious forebodings sorely exaggerated the perils of the charge for her darling son.

The mission to South America, however, only added one more to the list of Mastai's early failures. Instead of finding himself called upon to do battle with the monstrous deities of heathen superstition, he was destined to take part in the thorny negotiations which were set on foot to free the privileges of the Romish clergy from danger of aggression at the hands of the ever-changing leaders of the Chilean Government. Monsignor Muzzi acquitted himself of his charge far more satisfactorily than his coadjutor, who was for urging exorbitant demands on the Republic.

On his speedy return to Rome, Mastai did not continue his diplomatic career, but was made Bishop of Castello and Director of the Hospital of St. Michael, which unites the various attributes of a college, a prison, a house of refuge and a penitentiary. The duties of this onerous post the newly-made Bishop is said to have discharged with a degree of hard methodical sternness, very unlike his previous easy and engaging, though shallow and unstable, disposition, which by no means endeared him to the inmates of the Hospital, but effectually pointed him out to the notice of the Court of Rome as a fit recipient for future favours and dignities; and shortly previous to 1831 he was advanced to the Archbishopric of Spoleto.

The insurrectionary movement which took

place in that year throughout Romagna and the Marches brought the Archbishop for the first time into full contact with the political currents of Italy. He met them, as Signor Dall' Ongaro well observes, in a manner which shadowed forth in little his later and more momentous rôle as the so-called leader of Italian nationality when seated on the throne of St. Peter. At first he lent a willing ear to the complaints and expostulations of his oppressed countrymen, assisted in the measures set on foot for raising the National Guard, and took a principal part in the dismissal of over-rigorous Government officials. But when the wave of revolt rose higher, and troops of volunteers began to rally round the Provisional Government established at Ancona, while Austria, longing to interfere, yet hesitated before pouring her ferocious soldiery into the rebellious Marches, Mastai's constitutional faint-heartedness got the better of his plausible good-nature; the ties between him and the ultra-Jesuit party, never broken, though for awhile relaxed, became once more his leading-strings of action, and he hastily passed the Roman frontier "and took refuge in a part of his diocese which extended into the Kingdom of Naples, intending to return when matters should have blown over." It was not until Austrian bayonets were gleaming through the delinquent provinces, the Provisional Government put to flight, and the volunteers dispersed, that the prudent Archbishop returned to his palace at Spoleto, full of gracious words and promises of pardon to the unhappy rebels, not a few of whom were thus tempted to lean upon the broken reed of priestly clemency and give themselves up to the mercy of the Papal Court. No sooner, however, was all danger from the Revolutionary party entirely over than, as if dreading the inferences to be drawn from his too great indulgence towards the "factious few," Mastai openly joined in the persecution with which they were visited, and made one of Cardinal Bernetti's Commission for the conviction and punishment of the revolutionaries and their accomplices.

A fearful reckoning was that of 1831, between the Romagnoles and their oppressors; a reckoning certainly unsurpassed, if equalled, in the records of the harshest and fiercest of military despotisms. The axe and the state-prison cell, worse a hundred times than any swift form of death; the penalty of fine and exile, dealt out stolidly and implacably as only a Cardinal Secretary knows how to deal them, cleared the land at last of the open disturbers of its stupor; and Mastai from first to last made one of that sanguinary Commission, thereby drawing down on himself such a measure of dislike and mistrust in his diocese of Spoleto that it was thought prudent very shortly to remove him to the less dignified but more lucrative See of Imola, which is considered a sure stepping-stone to the dignity of the Cardinal's hat.

It has been asserted that Mastai during these earlier years of probation never aspired to the crowning dignities which lay before him; but our author records a little anecdote of those first years at Imola which, if authentic, would point to a very different conclusion. The Cardinal's hat, he says, being slow in making its appearance, owing, probably, to the slight esteem in which the wavering Bishop was held as a public man, he was fain to muffle up the scarlet furniture and hangings with which he had newly set out his throne-room in expectation of his advance in dignity, under covers of a different and more sober tint. A little harmless simulation of heavenly-minded humility could hardly be difficult to

one who was wont (as Prof. Dall' Ongaro confesses while defending him as the scarcely responsible agent of a system) "to burn one taper to God and another to the devil; in other words, to cry down with the Liberal party the atrocious measures of the Roman Government, and to pray with the Jesuits for the total extermination of heretics and Carbonari."

The aversion with which, during the time preceding his pontificate, he regarded the *sbirri* of Gregory the Sixteenth, his biographer attributes partly to the effect produced on his mind by the horrible murder committed by them, under his own eyes, in the Cathedral of Imola, where a young man, pursued for some political crime, was poniarded while clinging for rescue to the Bishop's robe, whose white folds were sprinkled with the victim's blood. Truly, the difference is wide between signing a death-warrant and carrying it into execution, and Mastai's nerves shuddered,—very possibly his heart revolted at the sight of such butchery. From this time he passed into the phase of his "third manner," the fading out of which was destined to cost Italy such tears of blood.

In 1846 died Pope Gregory, the harsh, implacable, learned Epicurean, beside whose desolate death-bed it is said no humble attendant remained to minister in his long agony. The Pope's death checked a fresh insurrection in the Roman States and their capital at the very moment of its outbreak. The whole of Italy was seething for united action; but all parties paused an instant to watch the issue of the Conclave, confident that the new Pontiff, be he whom he might, must needs set out by a path of policy differing widely from that of the last reign.

At the death of Gregory, Prof. Dall' Ongaro's Memoir necessarily ceases to deal with matter less known, and, consequently, more attractive, especially to English readers, and proceeds to trace the public career of the new Pope, through which we have no intention of following him. The election of such a man at such a period of difficulty and confusion is by no means an unique case in the annals of the Papacy. Mastai's chief merit in the eyes of his brother cardinals, and that which certainly elevated him to the throne, was that very instability of character which pointed him out as a puppet, to be turned and shifted by the impulse of stronger wills than his own, and as the readiest means of excluding the wily, despotical Lambruschini, and the harsh, austere Micara, whom they dreaded equally, and who were the foremost candidates of all the Sacred College, from wearing the tiara.

Prof. Dall' Ongaro represents Pius the Ninth as having set out with towering pretensions to the obedience and submission due to infallible wisdom and irresponsible sway; and he tells us that the new-made Pope was, ere long, utterly distraught and dizzied by the whirlpool of intrigues and fierce conflicting influences in which he found himself helplessly involved. In illustration of the state of things at Rome, he records a good anecdote of Gregory the Sixteenth, who, when enraged one day beyond endurance by the obstinacy and litigiousness of some of the Cardinals, is said to have called out, after his rough, unmannerly fashion, to his red-robed councillors—"I say, gentlemen! how many Popes have we here?" To which Lambruschini drily and pithily made answer—"Just seventy-two, your Holiness,"—alluding to the number of the Cardinals. What chance, pleads the biographer, could the pliant, timid Mastai have to carry out his better inspirations

in such an atmosphere as that which constantly baffled his stiffecked predecessor?

Prof. Dall' Ongaro leads his readers conscientiously, if not minutely, through the splendours of the sweeping amnesty with which Pope Pius began his reign; and the first semblance of zealous reform, which, while it dazzled the whole Catholic world, was, in fact, hollow at the core, and devoid of all vitality, from the impossibility of its accomplishment by a power whose essence is its immobility and irresponsibility. The Pope's subsequent hesitations and backslidings, and his terror when the first pulses of the mighty forces he had set in motion, made themselves felt to the ends of Europe, while all Italy clung frantically to him as to its redeemer, are likewise skilfully touched; and so on runs the tale, through the well-worn but moving incidents of the epidemic of constitutional liberty which, taking its rise at Rome, kindled into vivid life the whole Peninsula; the heroic expulsion of Austria from Milan and Venice; the gallant but desperate chances of the Italian campaign; and the Pontiff's cowardly defection from the national cause, which began with the famous encyclical letter of April, 1848, and ended with his ignominious flight to Gaeta. To a mind constituted like that of Mastai, after the first false step in his political career, nothing could be easier nor more certain than his descent to the lowest depths of this degradation; for, vain and desirous of applause to excess, the very first symptoms of coldness and disapprobation on the part of his people, consequent on his desertion, impressed him with a sense of being sorely ill-used and treated by them with the deepest ingratitude, and made him more than ever plastic to the will of Austria and the efforts of the Cardinals to urge him back upon his steps. With Antonelli for his master in statecraft and conscience-keeper, and fanatical visions of the Madonna Immacolata and Santa Filomena for his inspiration, what better could have been expected of him than the speedy fading out of the cloud-castle he had evoked?

The story of his vacillations during the eventful 1848 has become, in twenty different shapes, matter of history, and as such we have no need to meddle with it, but we must find space for the fresh reading of that dark and mysterious episode of the troubled time, the assassination of Count Rossi, which Prof. Dall' Ongaro gives, as one who speaks with authority. The unfortunate Rossi had been, just previous to his murder, the statesman to whom Pope and Cardinals in the dilemma of their false position had turned for aid and counsel. Rossi, whose policy was thoroughly anti-Piedmontese, and opposed to that of the majority of the Roman Liberals, advised a coalition with Ferdinand of Naples, who had not as yet virtually revoked his new constitution by the massacre of the 15th of May. "Rossi thought," says Prof. Dall' Ongaro, "to be able successfully to organize lower Italy, and, by forming an alliance between Rome and Naples on the basis of moderate constitutional liberty, to change the place of the political lever of Italy and destroy the influence of Piedmont for ever."

Perhaps our author's republicanism goes for not a little in the view he takes of the crime which removed this enemy of "Piedmontese influence," and of its probable authors; but it must be confessed, that the following is a grave accusation against the party of his political opponents, far too grave to be put forth, unless backed up by stronger testimony than Prof. Dall' Ongaro thinks it needful to adduce to its truth. Gioberti, be it premised, was just then

most busily promulgating his vague doctrines of the confederation of the Italian States and the enlarged freedom of their peoples:—

A preparatory meeting on the subject was held, at which were present several deputies from the political clubs of Rome, such as Mamiani, Sterbini and Canino, and all those who had still faith in Piedmont. Here was planned I will not say the death, but the discomfiture, of Rossi. Here was the sentence passed, which was afterwards executed by an unknown hand. This occurred on the 15th of November, 1848. The programme of Rossi could not even be proposed to the Chambers, much less carried out by them. The torrent of Piedmontese influence, having broken its banks, thenceforth overflowed Central Italy anew. From every part of the Peninsula the youth of the country, full of courage and impatience, bent their eyes on Rome. The Cardinals trembled in their scarlet robes; the Pope, who had put faith in Rossi's experience, contented himself with saying, "It was sure to end so!"

We cannot help thinking that so grave an accusation as this ought to be either abandoned or more thoroughly brought home to those on whom it weighs.

On the whole, although this can by no means be considered as the definitive biography of Pius IX. it is, for the nonce, an extremely acceptable compendium, certainly the fairest and most impartial which has yet been given to the public of him.

A Residence at Nagasaki and Hakodate in 1859-1860. With an Account of Japan generally. By C. Pemberton Hodgson, late H.B.M. Consul at those Ports. *With a Series of Letters on Japan*, by his Wife. (Bentley.)

THE Empire of Japan is now entering upon a phase through which the greater part of Europe has happily passed: the overthrow of the feudal system. Independent of the differences existing between the temporal and the spiritual head of the realm, there are two political parties violently opposed to each other, and corresponding in some measure with our great Liberal and Conservative factions, with, however, this difference, that they are armed not only with the sharp word of eloquence, but the still more unscrupulous deadly weapon of immediate vengeance. The Liberal party, at the head of which stands the present Siegoon or Tycoon, the temporal Emperor, is for maintaining the various treaties recently concluded with foreigners, and the free admission of strangers to Japan; the Conservatives are, on the contrary, opposed to foreigners, wish to cancel the new conventions, expel all non-Japanese, and restore the pristine isolation of the country. It is thought that most of the murders and attempts at the murder of foreigners have been committed at the direct instigation of the re-actionary party, and that the present government is really sincere when deploring and disavowing these unhappy occurrences. As yet, the two parties are so nicely balanced that neither can attempt any strong measures. But rapid changes are taking place, and a great crisis is evident. Notwithstanding all the efforts made by the Conservatives, the Liberal party is gaining ground, and a new element is coming to its aid. The voice of the people, so long dormant, is, at last, beginning to be heard. A spirit of Radicalism seems to be rising up, viewed by the Conservatives with undisguised disgust. Intercourse with strangers has taught the merchants and people, both despised classes, to discontinue their implicit and blind obedience in their chiefs; former humility is decreasing, the belief that the laws and customs of the country are capable of some improvement is

gaining ground, and the stereotyped vocabulary of Japan will be compelled to admit the words "free, freedom, liberty." The feudal princes, seeing mighty changes everywhere agitating the minds of the people, tremble at the thought of losing their former almost despotic power. The merchants, suffering under serious social disabilities, have discovered that money has great weight, and that a man may rise from a humble position to a two-sworded dignity. They begin to envy the privileges their despised foreign brethren enjoy. Why should they not be allowed to ride on horseback? why not wear two swords? why not have a country house, and an office in town? why not read all books accessible?—are becoming every-day questions.

All may go well, and a civil war may be averted, if the foreigners are able to keep their ground. But should the numerous provocations offered, the open murders committed, and the restrictions placed on a freer commercial intercourse, wear out the patience of the strangers, and lead to an abandonment, or partial abandonment, of this newly-opened market, it is not unlikely that the re-actionary party may once more gain the upperhand, and make as clean a sweep of the new-fangled commercial and political notions as it made centuries ago of Christianity and its professors. Mr. Hodgson urges forbearance, patience, prudence, three qualities in which he thinks the foreign traders have been deficient. The Currency questions, which caused so much ill blood, he thinks might have been more amicably settled if the foreign community had shown more patience and less avariciousness. No standard of exchange had been previously agreed upon by treaty; all the moneys of the foreigners were new to the Japanese, and the question was on the point of being satisfactorily adjusted, thanks to the energy and tact of our minister and his colleagues, when—

"Merchants, or men calling themselves so, owning only some thousand dollars, put down applications for millions, under the gentlemanly names of 'Nonsense,' 'Snooks,' 'Jack Ketch,' 'Walker,' 'Brown,' 'Jones,' and 'Robinson.' Our minister nobly and instantly branded this outrage on the delicacy and respect due to the panic-struck officials with the epithets such ignoble conduct justly merited. Yet these were the men whom the unknown millions of Japan were to receive and welcome! They asked from the treasury of Kanagawa, on the 2nd Nov. 1859, only four months after the opening of the port, exchange in itabous for 1,200,666,778,244,601,066,953 dollars!!! Was this fair, was it honourable, was this the way to win them over;—to wring out of them a treaty, and then insult them in their own treasury and in the presence of their officials? Mockery has its limits, even where ignorance is speechless; patience and good-breeding may support, but cannot pardon, ridicule and coarseness. Can they like or respect such specimens of their new friends? What followed? No mint could meet such exorbitant demands. Paris, London, New York, all the capitals united, could not have supplied these exigencies. Exchange was stopped—then trade; then idleness on the part of the foreigners. On the part of the Japanese, one feeling predominated and still predominates—a regret that they conceded a treaty to the Americans, a bitter repentance of the signatures of 1854, which the voice of their gods told them plainly was the death-warrant of their former bliss and contentment. The Japanese have gained nothing. They have sold gold at 100 per cent. profit to the foreigner—they have received a few presents; but they are sick of us, and view with wonder no more our fleets, our arms, or ourselves. They may have bought a few yards of flannel, a few bales of Manchester goods, a few toys; in exchange they have offered us, at indescribable profit, nearly all they have to offer. So punctilious were they in carrying out the treaties, so ready are

we to profit by their generosity and abuse their confidence! They have been insulted; they have revenged themselves. Blood has reddened the Japanese sword, and yet we, unmindful of the provocation, already cry for vengeance. We are the lambs, the Japanese the butchers. Believe it not, my friends in England and France! The Japanese are a race worthy of our esteem and affection. The foreigners they have to meet with have disappointed and wounded them in their pride, their sensibility, their institutions, their habits, their hopes, and their desires. Let England and France pause, before ordering one gun to be fired on a Japanese! Passion may be difficult to control, but history will not be the less severe."

We have given the opinion of Mr. Hodgson *in extenso*, as expressed in the Introduction, because we think his voice ought to be heard at the present juncture, when we are about asking reparation for the outrage committed on our countrymen. We do not profess to admire the tone of the pleading, which somewhat reminds us of the language held by the Peace-at-any-price party, and which, moreover, is somewhat in contradiction to the facts furnished and the opinions advanced in the body of the work. We should think that the Japanese had gained a great deal if the treaties had done nothing more than rouse them from their stupor, and allow them to enter upon those reforms which will some day assimilate them to Europeans. Mr. Hodgson himself supplies instances where the officials had it perfectly in their power to effect the desired exchange, and yet preferred to refuse the favour asked. Was it to be wondered at that the foreign merchants waxed wroth when they found "a complete stagnation of all trade ensued. Ships which I had found in harbour on my arrival (June 4th), were still lying there on the 1st of August, although their expenses must have been very great." Nor are these the only contradictions apparent between the opinions contained respectively in the Introduction and the body of the book, making one almost fancy that the former had been supplied by a different hand.

Mr. Hodgson was appointed officiating Consul at Nagasaki on the 18th of June, 1859, and was the first who hoisted the British Jack in Japan on that day. His stay at this place lasted only a few months, when he was transferred to Hakodate. From the latter place he made four excursions in the interior, visiting parts which had never before been explored, and meeting with scenery of unsurpassed beauty. In some of these excursions he was accompanied by Mrs. Hodgson, a lady who has contributed to this volume a series of letters full of agreeable chit-chat and gossip. Ladies will be amused at all the by-play brought here to light—how the European dresses got mouldy,—what the Japanese ladies thought of them and the sweet bonnets,—how the nasty mosquitoes stung, the horrible serpents crawled about, and those dreadful rats danced in the rooms with which the party had been accommodated in a heathen temple. Then, of course, there are important revelations about culinary affairs—how the family was kept on short commons, and had to eat omelet for breakfast, dinner and supper,—how the Japanese beauties were dressed, and all the fuss made about Mrs. Hodgson's little girl,—how it was loaded with sweetmeats and toys by these islanders, how fondled by these child-loving people, and how the good-natured nurse would screen the little thing when it attempted to imitate these Pagans in smoking, or pushed its kind protectress into the water-pond. But perhaps our lady readers would like to hear Mrs. Hodgson relate when she, the first English lady, landed at Nagasaki:—

"The same day Mr. Hodgson took me, Eva, and Sarah on shore in one of the 'Sampson's' boats. It was very foolish of us, perhaps, but we were all desirous of seeing the people and shops. Unfortunately it was a great festival, and many thousands were in the streets. I believe I was the first lady who had been seen in the town,—certainly Eva was the first child,—so the curiosity was excessive, and eventually very distressing. My husband would not turn back at first, thinking the crowd would soon separate, but it was quite the reverse. We got so far that we really did not know what to do, and tried to get into a shop, as I was almost frightened to death, to escape from the multitude of our admirers; but this had no effect. The proprietor, instead of receiving us hospitably, was even brutal, making hideous grimaces, growing pale with fury, nor would he allow us to remain a minute or view anything in his shop. So we were obliged to make the best of it; and as it was no use being angry with 5,000 persons all around us, we determined on going back to the boat as soon as possible. On the way poor Eva began crying; but the brutes only laughed the more, and touched her frock and hat, trying to look at her hair and net, while another man was running by my side lifting my gown and flounces in order to take portraits of them. He ran by my side for several hundred yards, making hideous sketches of us, until we reached the landing-place, when, to our great vexation, we found the boat had left; but the custom-house officers behaved very well, invited us to sit down within their railings, and did their utmost to keep off the mob. This, however, was quite an impossibility even for Japanese officers, who generally can, singly, awe a large assemblage, so anxious were they to see the last of us. I believed it was only curiosity at first, but am not so sure now, since I have had time to reflect on board."

When our author commenced this book, on the 4th of April, he had read no other published work on Japan but Thunberg's 'Flora Japonica.' We are sorry to hear it, because that work does not hold a high rank in the branch of science to which it relates; and there are several publications on Japan, of recent date, that might have been perused with advantage, and prevented occasional blunders. As far as his own observations and experience go, we are ready to grant that he has furnished much valuable information that will help to fill up the broad gaps in our knowledge of Japan; but when he begins to speculate or draw conclusions, he is not always happy. From the well-known resemblance which many of the ceremonies of Buddhism bear to those of the Roman Catholic religion, he rashly concluded that they are the *débris* of the former power of the Jesuits; whilst it is an historical fact, that Buddhism is much older than the Roman Catholic form of worship,—and if there were any connexion between the two, it is certainly not Buddhism which has borrowed. For this reason, we believe our author deceives himself when he fancies there are more than 80,000 persons who still profess Christianity; nor do we share his supposition that the "Ainos," the humbled and humble aborigines of Japan, are disguised Christians. We are also sceptical about the success that would attend the spread of the Roman Catholic religion if it ever was openly tolerated. The Japanese are admitted by our author to be a thinking people. All the educated classes have, professedly, very little or no religion; the great bulk of the people is devoted to Buddhism—more a philosophical system than a religion, as modern researches seem to prove; whilst the State acknowledges "Sintoism," the basis of which, at all events, appears to be the belief in one great God, and a repugnance to all that bears a resemblance to idolatry. Under these circumstances, we think that Protestant missionaries stand quite as good a

chance as their brethren of the older denomination.

The Appendix contains a list of nearly all the Japanese plants at present known, drawn up by Mr. Black, the intelligent Curator of the Kew Herbarium, and communicated by Sir William Hooker. We are sorry to find that our author has not made use of this valuable catalogue in correcting the names he himself introduces. We meet with *Mimosa sensitiva*, a plant foreign to Japan; *Pæonia officinalis*, for *P. moutan*; and the antiquated name of *Bignonia tomentosa*, instead of *Parlownia imperialis* or *tomentosa*, a tree which, in conjunction with *Rhus vernix*, supplies the real Japanese lacquer.

When we have taken exception to several statements and opinions, we have no wish to speak slightly of the work as a whole. It will be valued as the production of an author who had good means of observation, but who does not shine in the second part, of which all true science is made up—speculation. Let him, by all means, tell us all he has seen and heard; but not spoil his labours by indulging in such wild dreams as that of Noah selecting Japan for colonization, after leaving the Ark, and advising his family to emigrate when becoming too numerous. A better book might be spoilt by such nonsense.

The Young Stepmother: a Chronicle of Mistakes. By the Author of 'The Heir of Redclyffe,' &c. (Parker, Son & Bourn.)

THERE is about as much reading in this one volume as in three ordinary three-volume novels, and no one can complain that, in making an investment in 'The Young Stepmother,' they have not got their money's worth of paper for their money. It would fill up a month of wet days in a country house. It is impossible not to become, to a certain degree, interested in the detail of the daily life of the luckless young stepmother; and yet it is real hard work to follow her through the minute history of every day, and almost of every hour of the day, in her dreary up-hill task of humanizing her step-children and taming and softening their melancholy, morose father. Albinia's is a fine character,—courageous, impetuous, full of life and spirit, with a restless craving for "work," and an unlimited supply of energy and good-nature. Full of ardour for "something to do," she leaves her bright and happy home in her brother's parsonage, where she is adored both by himself and his merry little Irish wife, for the sake of consoling an inconsolable elderly widower, in weak health, of a gloomy temperament, residing in a damp, dark, unwholesome house, in a dull country town, and possessing three of the most odious children it has ever been our fate to meet with, either in a book or in real life. At first Albinia looks forward with hope and resolution to her future fate. She intends to cure her husband of giving vent to "suppressed sighs," and speaking in "a voice of subdued melancholy." She makes up her mind that she "could bear to have his late wife's memory first with him," and she knows she "could not compensate to him for his loss," but trusts that in time he may appear a little less dejected. She vainly tries to coax the sulky schoolboy, with a toothache, into good-humour; to put sense into the foolish, affected, gossiping Lucy; even hopes in time to make something out of the languid, sickly Sophy, with her downcast looks and forbidding manner. Nothing can be more unpromising than her commencement. Though Gilbert takes a fancy to her, and soon becomes quite "her pet," he is weak, untruthful, and

fond of low company. Lucy gossips away right and left, makes mischief between Albinia and the Meadowses (mother and sister of the first Mrs. Kendal), and spreads reports of her stepmother's sayings and doings all over Bayford. As for Sophy, she baffles all attempts at sociability, and till (in the course of a year or two) she half kills Albinia's baby and nearly breaks her own neck, she remains as perverse and moody as before. Worried and dispirited, Mr. Kendal gives happiness up as a bad job, and retires to his study, where he locks his door upon all intruders—his young wife included,—and takes heed of naught that passes in his uncongenial household.

Out of doors things are very little better; the town is dirty, and fevers abound; the pond exhales thick poisonous vapours. The neighbours are second-rate and meddlesome; the Meadows family interfering and censorious, and the children aggravating. After her first confinement, poor Albinia completely breaks down in health and spirits, and her brother and sister-in-law come to her assistance. They keep her quiet, rouse Mr. Kendal, get Gilbert sent off to a private tutor's, and take Lucy away with them on a visit. Winifred takes the opportunity of telling Sophy, in very plain terms, what she thinks of her conduct, and Maurice fills up the obnoxious pond, and from that hour matters improve with the young Stepmother. Then the elderly Miss Meadows marries a former lover of the days of her youth, and the old lady is imported into the house at Willow Bank—a great infiction in itself, but a blessing, inasmuch as she deprives Mr. Kendal of his beloved study, and thereby obliges him to consort more with the rest of the family. Backed up by her brother and Mr. Dusanoy, the excellent clergyman of Bayford, Albinia next induces her husband to take a little interest in public affairs, and he becomes in time a churchwarden, a magistrate, and a useful man of business in the parish. The step-children gradually grow up, and cause much anguish and tribulation of mind to poor Mr. Kendal by falling in love with all the wrong people. Lucy makes what is called "a good marriage," and is wedded to a rich man and a conceited fool, in spite of the indignant remonstrances and tearful entreaties of Albinia. Gilbert becomes enamoured of a fascinating French teacher, who wins the hearts of all the young men within her reach, and is really a charming little thing, and deservedly beloved by everybody in the book. Poor, ugly, morbid Sophy forms an attachment to a rollicking young Irishman, but Ulick O'Moore has the good taste to prefer Gendéviève; and Sophy finds out she has chosen the Human and left the Divine, and makes up her mind to be a very hard-working old maid, and takes to Albinia's children and makes herself generally useful in the world. Of course, poor Mrs. Kendal takes blame to herself for everything that goes wrong, and her feelings of remorse at every slight *contretemps* are bitter and exaggerated. Her brother endeavours to persuade her, that, although she may have made a few blunders here and there, still, take it all in all, she has faithfully and earnestly done her best, and the result lies in other hands than her own. This is, we presume, the moral of the book; but we have our doubts whether these kind of books, good and useful as they doubtless are in many ways for young ladies who are not allowed to peruse regular novels, may not tend to encourage in others too close a scrutiny into the various shades of their own and their neighbours' characters. Each little failing, merit, tendency or habit, is here examined under a powerful microscopic lens, and analyzed and

commented on till one becomes fairly confused as to the relative degrees of right and wrong; and if the plan be acted upon and carried out in real life, the process can scarcely be a wholesome one to a young mind.

'The Young Stepmother' is far from being so interesting as 'Heartsease,' or 'The Heir of Redclyffe,' but it is much of the same calibre as 'Dynevot Terrace' and 'The Daisy Chain,' and as such will, we have no doubt, meet with its circle of admiring readers.

Memoir of Baron Larrey, Surgeon-in-Chief of the Grande Armée. From the French. (Renshaw.)

This absurd sketch of the first Napoleon's Chirurgien-en-Chief is at the same time an insult to the memory of the celebrated man its writer professes to admire, and an impertinence to "the officers of the Army Medical Department and to the members generally of the medical profession," to whom it is dedicated. It is to be observed that the author does not style his volume "a translation," but "a version," of a French memoir of Baron Larrey; leaving his readers to exercise their ingenuity in distinguishing between the materials of the original writer and the additions of the "versionist." In some cases it is not difficult to discern the unaided work of the English hand, though there are passages where the critic is at a loss in what proportions to distribute the deserved ridicule between the two labourers. It may be stated without hesitation that it was not the French biographer who introduced Sir James M'Grigor's name in every other page of this hybrid production, and who manifests a strong desire to exalt the British Director-General above the gallant little surgeon of the Grande Armée. A Parisian writer would not care or know enough about Scottish topography to discover by himself the astounding fact, that Sir James M'Grigor and Baron Larrey were both born in "mountainous districts." "Jean-Dominique Larrey," runs the version, "was born in 1776, at Baudéan, a village situated on the borders of the Adour and at the feet of the Hautes Pyrénées. Thus it happened that the English and French Directors-General of the Army Medical Department, who entered the service of their respective countries about the beginning of the French Revolutionary War, were both natives of mountainous districts. In short, Larrey was born near the Pyrenees in France, while Sir James M'Grigor was born amid the mountainous districts of Inverness-shire in Scotland!" Nor would a French author, commemorating the bravery and heroic devotion of the raw conscripts at the battle of Lutzen, be likely to run off into an eulogy of English rifle-volunteers, and an exhortation that "the spirit of such volunteer rifle regiments be respected, and not respected only, but approved and encouraged, when their object is defence, but not aggression." But the authorship of other passages is not so manifest. The following, for instance, is a perplexing one:—"It is here worthy of remark, that one of the most celebrated of modern historians, Carlo Botta, who had entered the French service as a medical officer in 1794, was present in Venice in 1797, and that he proceeded from thence to Corfu in his professional capacity with the French army. Carlo Botta, who has so well written the history of modern Italy and also of the War of Independence in America, had a sort of hereditary claim to ability, if such be hereditary, inasmuch as he was almost descended from a family of doctors!" Whether this outpouring of arrogance comes from an apothecary dwelling on the banks of the Seine, or

from the apothecary who takes so lively an interest in the mountains of Inverness-shire, it is equally naïve and piquant in its simplicity. It casts, indeed, an unkind reflection on those who have not the advantage of being "almost" descended from a family of doctors; but it stimulates the reader's curiosity to inquire what kind of imperfect relationship to "the faculty" confers "a sort of hereditary claim to ability." We presume that the step-son of a distinguished physician would have no difficulty in establishing his title.

When the composer of "the version" proceeds to tell the story of Larrey's services to his country, he does not display greater fitness for the task he has undertaken; the plan pursued being to go through the series of Napoleon's campaigns, and, after a confused and meagre account of each battle, to state that the celebrated surgeon, after the work of carnage had been completed, was busily employed for many hours in amputating limbs and dressing wounds. The volume, therefore, is less a sketch of Larrey, than of his Imperial master; the few particulars which are given of the surgeon's purely professional experiences, failing altogether to convey a just idea of his sagacity, promptness and inexhaustible fertility of resource. The reader may judge how imperfect the memoir in this respect is, when we say that it contains no mention of the cases in which Larrey restored the suspended sensation of his patients by closely covering them up, from head to foot, in the skins of sheep and other animals, —the hot interior surface of the hides, just stripped from the warm bodies of the fresh-slaughtered creatures, being clapped like huge plasters on the bare flesh of the exanimate soldiers.

Larrey's great service to the French army was the organization of the *ambulances volantes*, by which the wounded, after battle, were removed with greater speed from the scene of danger to the military hospitals. Both Wellington and Napoleon left it to the heads of their medical departments to provide for the transit of the wounded. In the Peninsula, Sir James M'Grigor, exercising an irregular and only half-recognized power, used, without consulting the Commander-in-chief on the subject, to lay his hand on empty waggons, and unemployed beasts of burden, for the removal of his sick and wounded under the protection of the retreating forces. When the mules and the waggons were not required for any other service, the Commander-in-chief was well enough pleased to have the living incumbrances of his army conveyed from place to place without his being troubled upon the subject; but when the doctor chanced to seize on instruments of transit required by pressing exigencies for other service, he was harshly called to order for his informal, but most laudable, conduct. In the same way, one of Larrey's chief functions was to make efficient arrangements for the conveyance, as well as the cure, of the sick; and it was by his important alteration in the method of removing fallen soldiers from the field of battle, that he obtained, whilst he was still a mere boy, the cordial approbation of Napoleon. Previous to the introduction of Larrey's *ambulances volantes*, the heavy ambulances which attended French armies for the accommodation of the wounded were obliged, by general orders, to remain a league in the rear of the army, whilst the wounded soldiers were compelled to suffer on the field of battle until after the combat. As a substitute for these old lumbering ambulances, and to put an end to the cruel obstructions placed by the system, of which they were part, between the wounded on the field and the medical staff in the rear, young Larrey origi-

nated, in 1797, the *cadre de l'ambulance volante*. Napoleon was greatly pleased with the young surgeon's carriages, which, placed on easy springs and running upon two or four wheels, went at a rapid speed along the lines during the hottest crisis of an engagement, and bore off those who had been struck down. "Your work," said the General to the surgeon, "is one of the most happy conceptions of our age; it will suffice for your reputation." Larrey's mode of practice was simple and somewhat rude, but perhaps the best that under the circumstances he could have adopted. His maxim was, "amputate without delay." "Une heure de délai," he often said, "est souvent la cause de la perte des malades." Acting on this principle, immediately the troops went out to action, the *ambulances volantes* started also, and hung upon their heels till the engagement began. As soon as the first charges had been made and the first volleys fired, the men in charge of the ambulances maintained a sharp look out for the fallen, and bore them straight off to the surgeon, who forthwith proceeded to an examination of their wounds. To operate instantly was so emphatically Larrey's rule, that he often amputated limbs on the field of battle. On the retreat from Moscow, he was seen performing an operation literally under the fire of the enemy, whilst a camp-cloak was held over the patient, in the manner of an awning, to protect him from the falling snow. The following incident, which occurred in Egypt, illustrates at the same time the mode of practice and the ardour of the dashing little surgeon:—

"The following anecdote is so characteristic of Larrey, that it deserves to be mentioned. Among the wounded was General Silly, whose knee was ground by a bullet. Larrey perceiving that fatal results might ensue unless the limb was amputated at once, proposed amputation. The general consented to the operation, which was performed under the enemy's fire in the space of three minutes. But lo! the English cavalry suddenly near their side. What was then to become of the French surgeon and his dear patient? 'I had scarce time,' said Larrey, 'to place the wounded officer on my shoulders and to carry him rapidly away towards our army, which was in full retreat. I spied a series of ditches, some of them planted with caper bushes, across which I passed, while the cavalry were obliged to go by a more circuitous route in that intersected country. Thus I had the happiness to reach the rearguard of our army before this corps of dragoons. At length I arrived with this honourably wounded officer at Alexandria, where I completed his cure.'

Doubtless, Larrey by his promptitude saved many lives; but by the light of modern surgery it is no less certain that his wholesale amputations sacrificed patients as well as limbs, that might have been preserved by a more discerning process. Not less daring than his amputations was his practice of lancing abscesses of the liver, during the period of his service in Egypt,—or, to use the biographer's language, his remedy "of plunging a sharp instrument into the belly in order to give a free course to suppuration."

The following is an interesting case of a gunshot wound:—

"Among the wounded in the French hospitals was a Russian soldier who had been struck in the forehead by an iron ball of the weight of 217 grammes. This projectile had pierced the frontal bone above the right eyebrow, and had penetrated into the interior of the skull. In spite of the bulk of this iron ball, the opening which was perceptible did not exceed six or eight millimètres, and by introducing across it a small probe, one might feel the ball. The smallness of the opening may be explained by the elasticity of the osseous fibres which the ball would have to push, after it had struck the bone of the forehead. These elastic

fibres would in such case yield and become distended; but as soon as the iron ball had ceased its depressive action by eating into the cavity of the brain, these fibres, by means of their elasticity, would no longer be distended, but would retire to their former place, so that a ball of iron more than an inch thick would be below an opening of the smallest diameter. Thus all the ordinary attempts at extracting the ball would be defeated. Larrey, however, caused the wound of the fleshy part to be greatly enlarged, unfolding the osseous aperture, and he applied three crowns of trepan communicating between themselves and with the opening produced by the iron ball. Having cut the osseous angles which they left, the surgeon obtained an opening which permitted him to extract the iron ball by aid of a strong pincer and of an elevator. A great quantity of coagulated blood and of little osseous fragments was then removed. The brain presented under these covers a depression of about seven millimètres. The cure of the wounded Russian under French surgical aid made progress, and in a little time it was complete."

But if Larrey's system of surgery partook too much of the qualities of butchery, he displayed on all occasions a lively anxiety for the welfare of his patients in the hospitals. To give the wounded soldier pure air and nutritious food, and to keep him in cheerful spirits, were the grand objects which he held steadily in view. If he could not get other meat for his sick soldiers, he did not hesitate to take possession of the regimental horses, kill them, and use their flesh for making strong horse-soup:—

"Though all the wounded in the island of Lobau received much attention from the French surgeons, they suffered greatly. The chief causes of their sufferings were the heat of the day and the icy coolness of the night. Moreover, the destruction of the bridges and the insufficient number of boats rendered it almost impossible to import the quantity of provisions and comforts requisite for the large number of wounded. The Surgeon-in-Chief Larrey, in order to prevent his patients being starved, ordered soup to be made of horse-flesh. Although Larrey endeavoured to spare the horses as much as possible, yet the French generals, who chiefly suffered, were loud in their complaints at their horses being turned into food. It was a wanton violation, as they thought, of the rules both of Epicurus and of humanity. Accordingly, they complained to Bonaparte of the manner in which their animals had been served up by order of Larrey. The Emperor summoned Larrey, and in the presence of his staff demanded an explanation with a most severe expression of countenance. 'What,' said he, 'have you on your own responsibility disposed of the horses of the officers in order to give soup to your wounded?'—'Yes,' answered Larrey. He added no more, and soon afterwards he heard of his elevation to the rank of Baron of the Empire. The want of food was not greater than the want of utensils, and among the expedients for remedying the deficiency was that of picking up cuirasses, on the field of battle. On these cuirasses, the owners of which had in most cases been killed, soup of horse-flesh was served, there being scarce any other nourishment for Larrey and his patients in the island of Lobau. Unfortunately, many of the wounded were about that time attacked with tetanus. Serving, as Larrey did, in numerous campaigns, he had frequent opportunities of observing this disease, and with his usual ability he profited by these observations. It is well known that by deep cauterization and other remedies he succeeded in restoring to health many of those in whom the disease appeared at first incurable. In his professional works this eminent surgeon has accurately detailed the causes of this disease and the best mode of preventing fatal consequences."

The ladies who a few years since sent off cargoes of scraped rag, cotton bandages and old linen to Miss Nightingale in the Crimea, will appreciate one point of the following description of the sufferings of the French soldiers in Smolensk:—

"On entering Smolensk, Larrey converted fifteen of the largest buildings which had not been devastated by the flames, into hospitals for the wounded. Unfortunately, all supplies or stores of any kind had either been destroyed by the enemy or removed by them in their orderly and premeditated retreat under Barclay. For the large number of wounded there was a deficiency of linen and splints; but Larrey discovered a store of archives in one of the buildings which had escaped the fire, and he substituted paper for linen and used the thick parchment for splints. In a state of so much want it became difficult and almost impossible for the French medical officers to perform their duties; especially as to save life it was necessary in many instances that amputation should be performed within twenty-four hours after the wound had been received. Larrey, however, not only displayed his usual energy and zeal, humanity and skill, on entering Smolensk, but amid the wreck of its buildings and the deficiency of its supplies he showed himself fertile in resources. He toiled with little intermission night and day, and the French surgeons generally, in imitation of their chief, were indefatigable in their attention to the wounded, who were about 10,000 in number."

The weakest part of this weak book is that which relates to the rewards conferred on the surgeon for his services, and to the fidelity which he maintained to his Imperial master in adversity. Medical writers are always too prone to harp on the imaginary grievances of their profession; and the author of the present "version" makes the most of Larrey's rank and pensions, and would seem to imply that an equal recognition is not afforded to distinguished medical services in this country. But how does the case stand? Larrey, after following his Imperial master through a series of campaigns, some glorious and some closing in disaster, and having, moreover, enjoyed that master's close personal acquaintance on the field of battle and on the march, was created a Baron of the Empire, and obtained pensions to the amount of 320*l.* per annum in our money. Sir James M'Grigor, on the other hand, for faithful and eminent, but still, unquestionably, less arduous services, was made a Knight Commander of the Bath and a Baronet, and received a pension of 1,095*l.* per annum;—he, like Larrey, being also advanced to, or retained in, posts of dignity and large emolument. Of the Baron's fidelity to Napoleon the author of the "version" says, "yet Larrey, the member of a profession which pretends to nothing more than a zealous discharge of the duties of humanity, though it does aim at mental excellence, stood faithful, while marshals and generals and men of lower grade appeared as if they were anxious to escape from some falling tower." There are other passages in which Larrey's magnanimity in not deserting the shaken commander is enlarged upon in similar high-sounding terms. Such praise would not be out of place if the surgeon had been tempted to "desertion" by the offers and invitations of Napoleon's enemies. But it is, of course, needless to say that no such overtures were made to him, for he could not have brought over to the Allied Sovereigns either physical or moral support.

Spoon and Sparrow, ΣΠΙΝΔΕΙΝ ἂνδ ΨΑΡ, FYNDERE and PASSER; or, *English Roots in the Greek, Latin, and Hebrew: being a Consideration of the Affinities of the Old English, Anglo-Saxon, or Teutonic Portion of our Tongue to the Latin and Greek; with a few Pages on the Relation of the Hebrew to the European Languages.* By the Rev. Oswald Cockayne, M.A. (Parker, Son & Bourn.)

Those who are interested in the study of language will be repaid by a perusal of Mr.

Cockayne's work bearing the above rather odd title. To feel an interest in this study, they must of course possess some knowledge of the subject; and it is for such readers only that the present publication is intended. It has no pretensions to that happy combination of popular style with philosophical method, for which Prof. Müller's Lectures are remarkable. There is much less of general principle and more of detail—indeed, it is almost wholly composed of detailed matters of fact, and may be described as rather containing the raw material of a satisfactory work, than a finished production. The same materials might have been worked up into a more readable result. In its present shape, the volume has too much the air of being a transcription of brief notes from a commonplace-book. But it bears evidence of a knowledge of the results attained by modern philologists, with an original research of extensive range. The author shows familiarity with old English writings, and turns it to good account in tracing out the affinities of the language with the Anglo-Saxon, German, Scandinavian, Moso-Gothic and other kindred tongues. Like Mr. Marsh, he makes much of the Gothic as a means of illustrating the parentage and history of English words. While he not unfrequently avails himself of Sanscrit, he is disposed to think its value has been overrated. He complains that students and professors of this ancient language make it a sort of idol and oracle, too often forgetting—that they themselves are compelled to admit—that it is not the primitive, unaltered language, but subject to change, like all other languages. To establish a connexion between Latin and Greek words and Sanscrit, he maintains, rightly enough, that there must be a similarity of form and sense, and the changes must be capable of being paralleled or explained in some way consistently with recognized laws.

As we have already remarked, the book is almost wholly made up of details. A number of English words are arranged alphabetically in groups, each illustrative of certain regular changes observable in the letters composing them, when compared with the equivalent or kindred words in other languages. Thus, the first group contains examples of vowel change, after which come instances of the various changes, interchanges and omissions to which the gutturals, labials, dentals and other letters are subject. A specimen or two will give a better idea of his method than any general description.—

"MID 'with, among'=germ. Mit=agls. Mid=mesog. Mij= Norse Með=Mera. Cf. sanskr. Madhyas=Medius=MID with MIDDLE, MIDST, Moiety, Merañ, Μεσοç. Since Mera implies change, we have allied words in lat. Mutare, mesog. Maidyan, especially in the compounds Inmaidyan translating μεταμορφουν, μετασχηματιζειν, ἀλλασσειν, and in Inmaideins, ἀνταλλαγμα 'compensation.' The german often has in compounds, like the greek, the sense of participation, as in Mitschuld, mera-scelus; but I do not know that this is the case in the mesogothic and Norse. From the sense of change comes Mutare, from participation Mutuus. As an example of old english Mid, take:—

With that he sholde the Saturday
Seven yer thereafter
Drynke but myd the doke
And dyne but ones.

Piers Ploughman, 2621."

"SAME, SAMN, Συν, Συν, Con, Ganz, Παν, Ἄμα, Ὀμος. The agls. has Sam 'with' as a prefix, Same 'alike' (adv.) Samnian, 'assemble,' Samod 'together.' Sinscipe 'coniugium,' which Lye, &c. erroneously explain: Schmeller has observed Sin=συν in the Heland: his first example is sufficient, Sinhtun, 'coniuges,' from our Hive 'a family.' The mesog. has Sama, with Samana, ἅμα, ἐπὶ το αὐτο, and Samah, ἐπὶ το αὐτο; the lat. has Simul

(same while) *Similis* (same like); the Sanskrit also has *Sam* *सम*, *Samas* 'equal, like,' and countless derivatives: as a prefix *Sam* denotes perfection like *सम* and *con*. Add probably *Some*=*agla*. *Sum*, and *'Eva*. The germ. has *Zusammen*, and we *Assemble*."

Mr. Cockayne is modest enough to claim no higher value for what he advances than that it is worthy of the reader's consideration,—a claim which he is certainly justified in making. In a work of this nature there cannot but be frequent occasion for difference of opinion or doubt. This is more particularly the case with the latter part, in which the author treats of Semitic roots and families of words. There is here more of unrestrained speculation and of unsupported, if not random, conjecture. In treating of families of words, Mr. Cockayne deviates from the sound principle, laid down at the commencement, of requiring a similarity of meaning as a condition of philological relationship, and groups together in a speculative way words of unlike signification,—a method which he confesses does not supply cogent argument in support of his conclusions. His mode of proving the connexion between *σποον* *σπειναι*, and *συνδερ*—the words at the head of the title-page—will hardly satisfy all readers. He commences the long article on this subject with a quotation from the prose Edda containing the word *spoon* in composition, which in Danish and Dutch assumes the form *spaan*. Considering the frequent interchange of the letters P and K, he connects with it, among others, the words *shingle*, *shin*, *shank*, *skates*, *sheath*, *scuttle*, *scot* in *vainscot*, *spindle*, *spit*, *spade*, *scale*, *shell*, *slate*, and thus continues:—

"The main object of this article is to bring us round to the conclusion that *Spoon* and *σπειναι* are related: and hence *Fundere*. For what is *σπειναι*? To make a libation was to take with a ladle, say *Spoon*, some wine unmixed with water out of the wine bowl, pour it with the ladle into the hand, and fling it towards the skies, or towards the deity invoked."

The results at which our author arrives in dealing with the Hebrew and cognate languages are such as—according to his confession—to startle even himself; but he trusts they will win the assent of all European scholars. We cannot pretend to share in his confidence. His modes of explaining away the radical dissimilarity of words are more ingenious than satisfactory to our mind: at the same time they are well worthy of perusal and consideration.

Memorable Women of Puritan Times. By the Rev. James Anderson. 2 vols. (Blackie & Son.)

THE attractive title of this compilation will induce persons to ask for it at their libraries, but no one will open its leaves and lay them aside without a feeling of disappointment. The sectarian readers to whom it is especially addressed will dislike it for being dull, whilst students whose sympathies have not been contracted by religious polemics will disapprove its acrimony and narrowness, not less than its inability to either instruct or amuse. A collection of memoirs, in which Blanche, Lady Arundel, the defender of Wardour Castle, the Countess of Derby, Lady Springett, and numerous other heroines of our historic drama, are deemed unworthy of biographic notice, is clearly deficient in much that may reasonably be looked for in a work which professes to give the lives of the 'Memorable Women of Puritan Times.' Such omissions awaken curiosity as to the mode of selection adopted by the author. In justice to Mr. Anderson, it must be admitted that he has a plan, though it may not be in all respects one that will meet the approval of a wide circle. He confines his portraits to women who were

either remarkable for their zeal in support of Puritanism, or who in their domestic lives were intimately connected with the parties which had for "their object the purification of the Church of Christ." A brief sketch is given, indeed, of Lady William Russell, who was throughout life a member of the Established Church, and never was known to manifest any concern for the religious side of Puritanism; but for this exception to his rule the author offers an apology in the following words:—"But her husband's politics and her own were the politics of the Puritans, the undoubted fathers of English liberty; and the struggle against arbitrary power in which he fell was just the struggle to which the Puritans had given the first impulse, and which they had vigorously and perseveringly maintained. Her life, then, which is closely interwoven with that of Lord Russell, is a touching episode in the history of civil and religious liberty in England."

Such being the scheme, the author introduces the biographies with a slight and very imperfect essay on the rise and growth of Puritanism. His fitness to handle such a subject may be demonstrated in a very few words. Powerless to appreciate the difficulties surrounding Elizabeth, who was placed at the head of affairs when the two mighty and almost equal parties of the nation were carrying on their long fierce conflict for religious and political supremacy, Mr. Anderson regards her energy and moderation in restraining, with strict impartiality, the most violent and mischievous fanatics of either side, as mere manifestations of a malignant determination to crush freedom of thought. "Queen Elizabeth," says the writer, "was the uncompromising enemy of Puritanism," and he proceeds to inveigh against her as the wilful persecutor of Puritans, whose estates she confiscated, whose persons she threw into prison, and whose blood she shed. When he comes in the course of the next few pages to glance at the intolerance of the Pilgrim Fathers, he adopts a widely different tone, and urges on students, ere they charge the New England settlers with "religious persecution" and "tyrannical oppression," to consider the propriety of regarding their conduct from the stand-point of the seventeenth and not the nineteenth century. It is to be regretted that Mr. Anderson does not display to the government of Elizabeth the same charity which he thinks ought to be extended to the measures of Mrs. Hutchinson's and Mrs. Dyer's judges. But the rancour of Mr. Anderson's temper does not reach its full height till it is roused by the recollection of the Act of Uniformity—"that grievous persecution of Black Bartholomew," as Dissenters are wont to call it. It is not enough for him to shed tears of commiseration over the 2,000 ejected clergy "who were generally the most orthodox, learned and devoted ministers of the Church," but he must also calumniate the pious scholars who were promoted to places left vacant by the Nonconformists. "That so large a number of ministers should voluntarily sacrifice their livings, with all their prospects of advancement in the Church, and should expose themselves and their families to poverty, contempt and persecution rather than do violence to their consciences, presented, indeed, an example of self-immolating devotion to duty honourable to the Puritan character and commendatory of the Christian faith. But the ejectment of so many excellent ministers, and the filling of their places with ignorant, profane, scandalous and erroneous men, was deeply injurious to the cause of religion at the time, and the melancholy effects are felt by the Church of England even at the present time." Such are the words of Mr. Anderson,—who, besides being an

appointed minister of a Christian persuasion, makes loud professions that he is a champion of religious tolerance. It seems scarcely credible that at this date a man of education should be found to display such vindictive resentment to the victors in a political contest, the strife and wrangling of which have been laid to rest and silence just two centuries. Hard words provoke retaliation. Mr. Anderson must therefore think we deal leniently with him when, instead of casting in his face the names of some of the men he thus holds up to odium, we only apply his own violent language to his own ignorant, profane, scandalous and erroneous teaching. As a biographer, Mr. Anderson does not appear to greater advantage than as an historian. Of his twenty-five memoirs, including sketches of Lady Vere, Lady Harley, Lady Fairfax, the mother, wife and four daughters of Cromwell, Lady William Russell and the wife of Richard Baxter, there is not one which is pleasantly readable. The notice of Lady Vere is the longest of the collection and the one on which the greatest literary pains have been expended, but the result achieved is little else, save the burial of Gurnall's charming portrait of that pious lady under cumbrous passages from letters that, dragged from the obscurity and quiet of the State Papers and Birch's MSS. are to no good purpose now for the first time printed. The best memoir in the two volumes is the last of the collection,—that, namely, of Cromwell's granddaughter, Bridget Ireton, who married Mr. Thomas Bendish, and, living to the advanced age of eighty, kept Yarmouth and its neighbourhood alive by her querulousness, piety and eccentricity, as late as the year 1729. The materials out of which Mr. Anderson has composed his two volumes are, for the most part, to be found in biographies and biographical collections that are well known to all persons conversant with modern English literature. As a book-maker he advances no claim to originality, but honestly mentions the shelf and the drawer from which he has taken each ingredient for his hotch-potch. It would therefore be as unfair to blame him for errors not his own, as it would be out of place to give him praise for the more or less interesting pieces of information which he has taken, without labour, from other investigators. When his authorities are in the right, he too is, usually, right; but when they are at fault, he is invariably wrong. The following commencement to the memoir of "Elizabeth Steward, mother of Oliver Cromwell," is a fair sample of Mr. Anderson's workmanship:—

"Elizabeth Steward, or Stuart, was the daughter of William Steward, Esq., in Ely, a man of wealth, who farmed the church tithes and lands around that city, and who was descended from the same stock with the royal family of the Stuarts. The descent of Charles I. is traced to Walter, the eldest son of James, Lord High Steward of Scotland. Walter married Marjory, the eldest daughter of King Robert Bruce, sister and heiress of David II., King of Scotland, who had no issue; and their son Robert II. was the first of the Kings of Scotland of the name of Stuart. The descent of Cromwell's mother is traced to Andrew Steward, the third son of James, Lord High Steward of Scotland. She was thus related by the father's side to Charles I., being his cousin in the eighth degree, as is now satisfactorily established, which it does not appear to have been in her own time. Neither she nor her son cared about inquiring into the exact degree of this relationship, and little or no inquiry having been made, it rested rather upon tradition than upon evidence derived from authentic documents. She was too humble a woman to lay much stress upon the fact that she was related to the sovereigns of England. This the admirers and flatterers of her celebrated son blazoned, but he himself

attached to it little importance. His relationship to the Stuarts was too distant to afford a basis to rest his authority upon, which, as he had acquired it by his own military and political abilities, required to be maintained by the same means; and to have made an ostentatious display of the connexion would only have tended to awaken feelings to his own disadvantage, by obtruding on the public view the fact that the monarch whom he had brought to the block was his own kinsman."

This imaginary relationship between the Lord Protector and Charles the First, though it has long since been only a subject of laughter with students, is so often alluded to in organs of respectability and weight as an unquestionable fact, that possibly some of our own readers may have accorded undue respect to a statement which Dr. Johnson would have designated "a wandering lie." The case for a blood-connexion between Cromwell and the king he dethroned rests on a supposed descent of the Cambridgeshire Stewards from the Scotch line. The story goes, or rather it used to go, that such descent was indisputably proved by ancient monuments of the Steward family in Ely Cathedral and various churches in the Eastern Counties, by ancient charters and the archives of heralds. Mark Noble, Cromwell's biographer, and no mean authority in his day on a question of pedigree, thus commenced his chapter on the Protector's maternal ancestors:—

"Mrs. Cromwell was descended from the Royal House of Stuart, which ruled for many years the kingdom of Scotland, and has given several Kings to England. Banquo, thane of Lochaber, and the chief officer of the crown, was assassinated, with his three sons, by Macbeth, the tyrant of Scotland, as it is said to evade the prediction that his race should succeed to the Scottish throne; Fleance, another son of Banquo, fled to Wales to avoid the same fate, where he found protection, and had Nesta, daughter of Griffith Llewellyn, Prince of Wales, given in marriage to him; Walter eldest son of this marriage having killed a person in the Welsh court, fled into Scotland, where the sovereign received him as a person whose ancestors had suffered much for the royal family, and created him lord-high-steward of Scotland, making that office hereditary, and by this means the family received their surname, in the same manner as the Botelers, or Butlers, and the Chamberlains, did in this kingdom. Alexander, lord-high-steward of Scotland, had 3 sons and 2 daughters: 1. John, or James, also lord-high-steward, who left that office to his eldest son Walter; who marrying Margery, eldest daughter of Rob. Bruce, king of Scotland, and heiress to her brother k. David II., his eldest son Rob. became k. of Scotland, in which line the crown ever afterwards continued, so long as it was a separate kingdom, and until k. Ja. VI. of the surname of Stuart succeeded to the English throne; 2. Sir John Stewart, who was killed at the battle of Falkirk in 1298; by marrying the daughter of Sir John de Bonkill, he made the place of that name his residence; he had 7 sons, from whom many families in Scotland are descended, and several which have been ennobled; 3. Andrew, of whom below; 4. Elizabeth married to Will. Lord Douglas; 5. Margaret, a nun. Andrew Steward of Dundavale, Esq., the youngest son of Alex., married the daughter of Ja. Bethe, by whom he had Sir Alex. Steward, surnamed the Pierce, who in the presence of Chas. VI. k. of France, encountering a lion with his sword, and that breaking, he seized a stick, and with it killed the creature; which so much pleased his majesty, that he immediately gave in addition to his arms (which were or, a fesse chequy argent and azure), a lion rampant gules, over all a band regurol or. Sir Alexander had two sons, Will., who was slain in the battle of Vernoile in Picardy, and, Sir John Steward, Knt., who settled in England, and was the founder of the first family of the name of Steward, or Stuart, in this nation; the occasion of his settling himself in this kingdom was singular; he was one of the attendants of Jas. pr. of Scotland, afterwards k. Ja. II. at the time he was passing into France, that he might avoid the

fate of his brother, who had fallen a victim to the ambition of his uncle; but, in the voyage the vessel was driven upon the English coast, and the prince was detained in England, contrary to every principle of honor; Sir John did not desert his master, but continued constant to the royal captive; and with his leave remained ever afterwards in this kingdom: for having obtained the regard of k. Hen. IV., who not only took him into his service, but knighted him in the 10th year of his reign, at a tournament held in Smithfield, he asked, and obtained from Joan, queen to k. Ja. II., Mary Tollemache, maid of honor to her majesty; the issue of this marriage—"

It is needless to follow Noble any further in his narrative; for we have only to concern ourselves with the source assigned by him to the Cambridgeshire Stewards, from whom Cromwell was descended, and who were reputed to have come from the Prince of Scotland's attached attendant, and Sir John's father—the valiant lion-killer. For several generations this magnificent and romantic story of Cromwell's remote origin, like many other genealogical fables, passed current as veracious history. The Cambridgeshire visitations countenanced it. Numerous ecclesiastical munimenta in Norfolk, Suffolk and Cambridge gave sanctity to it. Historians adopted it without question. Unfortunately, however, for the dignity of the Stuarts of the eastern counties, an avenger of insulted heraldry rose in the person of Mr. W. D'Oyly Bayley, who tracked out the fraud of their family pretension, and smote with the hard hammer of truth on the massive marble lies of their sepulchres. The substance of Mr. D'Oyly Bayley's criticism, communicated in a letter on 'Genealogical Fictions' to the *Gentleman's Magazine*, in the year 1846, will be best given in his own words:—

"The case, however, [he says] which has most attracted my attention is that of the Norfolk and Cambridgeshire Stewards, through which Oliver Cromwell pretended a maternal descent from the great Scottish house of Stewart. According to the story of his great-grand-uncle, Robert Styward or Steward, the Prior and first Dean of Ely, their ancestors came from Scotland to England, temp. Hen. IV., via France (after having performed marvels in the sight of the French king—slaying lions with sticks, &c.), and finally settled at Upwell, in Norfolk. But it is a very remarkable fact that there were Stywards or Stewards settled within a mile or two of Upwell co. Norfolk long prior to 16 Ric. II. William Steward or Styward married Joane, dau. of William, and sister and heiress of Laurence de Watlington, of Watlington, co. Norfolk (close to Upwell), and she was living his widow 16 Ric. II. 17. (see Blomefield's 'Norfolk,' VII. 481). They, it is clear, were the procreating ancestors of the Norfolk and Cambridgeshire Stewards. That they had issue is beyond all doubt, for a Laurence Styward was vicar of Sta. Ciric and Julitt the martyrs, at Swaffham Priors, co. Cambridge, 1393–1397, when he exchanged that preferment for the vicarage of Gaysale, in that county (see Blomefield's 'Collect. Cantabr.' 181); and 'Laurence' remained a family name with the Stewards of Stradset, co. Norfolk, down to 1605. Although the Scotch Steward or Stewart pedigrees gave not the slightest corroboration of Dean Steward's romances of his imaginary ancestors, the Cambridgeshire visitations are not satisfied with detailing the fictitious origin, or false affiliation and fabricated links, but must also set forth the marvellous romance of 'the stick and the lion'! No doubt, however, the first of the family was really 'Steward' to some great personage, or perhaps to an abbey, in the county of Norfolk, and as much akin to the Scotch Stewards, as to the French king himself."

The romance of the Cromwell-Stuart pedigree had been well nigh forgotten by the general public of the present generation. Noble was so little read as to be an almost unknown author, and the documents of the Heralds'

College do not enjoy a wide popularity. The fiction had therefore been lost sight of, when Carlyle resuscitated belief in the curious fabrication by his Introduction to 'Oliver Cromwell's Letters and Speeches,' in which he mentioned the statement with a certain amount of guarded respect,—taking, however, good care not to commit his critical judgment to a positive support of the absurd story. Mr. Carlyle's "say the genealogists" was, however, powerful enough to render the poor falsehood fashionable once again; and during the last few years it has frequently formed a point in the arguments of historic writers and grave essayists. So tenacious of life is "a wandering lie."

OUR LIBRARY TABLE

Flowers and Foliage for In-door Plant Cases; or, Hints for Arranging and Preserving Flowers in Cases and in Rooms. By E. A. Maling. (Smith, Elder & Co.)—Ladies who have purchased the first publication of this author—'In-door Plants, and How to Grow Them'—may find this supplement to it, 'Flowers and Foliage,' useful, by supplying them with hints for stocking and managing their plant-cases. The lady who has written these little books on home gardening is neither a botanist nor an horticulturist, and is therefore all the better fitted for being an instructor of ladies in the art of growing, arranging and preserving flowers; for true it is that the most efficient teachers often are those who are only a lesson in advance of their pupils. They have not forgotten their own difficulties, and therefore have most sympathy with the beginners who are grappling with them. The fair author puts her readers in possession of the results of her own experience in trying different cases, growing various plants, and arranging flowers picturesquely. The cases in question are the Warden cases, with heat applied to them. She tells ladies the precautions they must take to prevent their flowers from looking as if "they had been out to evening parties." It is from before Christmas to the end of May that in-door flower-growing may be made to make up somewhat to the inhabitants of large towns for their absence from the country and coast, by supplying them with the pleasure of witnessing the unfolding of a succession of the fairest flowers. In London, Birmingham, Manchester, Sheffield, Leeds and Glasgow, the in-door plant case is almost the only means of growing flowers well, by protecting them from cold, damp, glare, draughts and dust. And with the use of them glimpses of beauty may be obtained, which will be enhanced by the contrasting fogs and mud in the streets. Eyes weary with business and worry may be refreshed with the sight of heliotropes, lilies of the valley and cyclamens, and of azalias and camellias, spreading out masses of snowiest white or brightest pink. The crimson cups of the scented tulip may be seen contrasting with the white petals of the large narcissus, and the pendant red coral shreds of the begonias vieing with the white and rose of the primroses. It is always agreeable to watch growth, and in a case scilla may be seen thrusting up its wedge-shaped sheath out of the green moss and opening its pale bright blue eyes,—the snowdrop rising slowly, and as the shrouding leaves part with the snowy bell, first creeping out and then drooping gracefully,—and deutzias waving their petaled plumes, and poinsettias hoisting their red flags. The effect of the flowers by candlelight ought to be seen before they are chosen. Anything fountain-like is best for the centre; and a little palm-tree answers well for keeping up the illusion of a "jungle," or "nook from an Indian forest." The flowers being subordinate to the foliage, "only five plants in blossom," says the author, "one tall and graceful with brilliant crimson flowers, two low-growing, vividly-tinted plants, and two beautiful white flowers of the peculiar shelly-blue tint," produced when seen the exclamation, "What a brilliant jungle you have there!" By candlelight the green of these cases is darker, and "the flowers shine like rubies and like pearls."

Our Domestic Animals in Health and Disease. By John Gamgee. (Edinburgh, Jack.)—A com-

petent man has here collected and conveyed in simple and untechnical language a great deal of information useful to every man who keeps a horse, a cow or a pig. The number of such men is probably not greater now than it has been at any other time during the life of the present generation. Those of them, however, who are dissatisfied with their existing information, and who seek by reading and otherwise to increase it, are certainly more numerous now than they have ever previously been. Agriculturists and agricultural labourers are becoming readers faster, perhaps, than men of any other occupation. Let us hope, therefore, that Mr. Gamgee's present publication may satisfy a prevalent want,—and, finding a large number of purchasers, do good service to the agricultural interest.

The Prince's Visit: a Humorous Description of the Tour of His Royal Highness the Prince of Wales through the United States of America in 1860. By R. J. De Cordova. Illustrated by Stephens, Rosenberg and G. D. Smillie. (New York, Frodsham; London, Trübner & Co.)—With halting metre and infamously bad rhymes Mr. R. J. De Cordova gives what he conceives to be a comic account of the Prince of Wales's trip to Canada and the United States—as they used to be called. As is not unusual with such mirthful productions, the sprightliness of this humorous description is far from exhilarating. About the smoothest and strongest lines in the entire volume are the following:—

They've "received" him at church in magnificent state,
The Bishop and Clergy—all solemn, sedate,
With a farce only played on this single occasion
Forming a clerico-comic procession!

Here and there, on the broken road of Mr. De Cordova's doggerel, amongst sharp and ragged stones of false quantity and bad sense, the reader comes on a piece of trans-Atlantic slang, not altogether unworthy of remembrance,—such slang being explained in a note for the benefit of Europe. Thus, the line

"Dry up," says the Duke, "I'm not speaking to you," is illuminated by philological research. "Dry up," says the author, "with other expressions having the same meaning,—such as 'shut up,' 'evaporate,' 'stow it,'—owes its origin to the Western States. It implies that, although the party addressed may physically remain in the presence, he must not appear in the conversation." On the whole, Mr. De Cordova's Muse is neither an amusing nor a profitable companion. A very brief space of time spent in her society would make us ask the young lady to have the goodness to "dry up."

A Dream of Lost Love. By Edward Gray. (Kent & Co.)—Another wail over some lost Ellen Adair; but it lacks the Laureate's music, pathos and brevity. The author has not yet learned how to consume his own smoke till it bursts into flame. As a Yankee might say, what is the use of this screaming in the face of the eternal facts of the universe? Still we find some signs of power and a picturesqueness of epithet that lead us to look for better things.

Mr. Greenwood, in *Zeta; and other Poems* (Philip & Son), laughs at the usual prefaces in which books of verse are often heralded. What follows the Preface, however, is much about the same kind of thing as is generally thus prefaced. He will make no excuse for publishing, and indeed he is quite right,—his verses deserve none.—*Margaret; or, the Motherless*, by Mrs. Pfeiffer (Hurst & Blackett), indicates some talent for narrative, but has not the wealth of thought or freight of feeling demanded for poetry.—The Author of *Roseallan's Daughter* (Houlston & Wright) tells us that he publishes his drama because one or more manuscript copies have got beyond his control. He protects his work by publication,—a most sure and effectual method. If any one has been misled in the twilight of manuscript to think it of any value, the daylight of print will speedily undeceive. We need only quote a line or two by way of a hint:—

He has been seen, I tell thee, ha!
And acting fine, deceive me not, girl, ha!
Promise to smile, girl, ha!

This will be thought enough.

We have received the following publications and pamphlets on religious and other subjects:—*A Brief Examination of Prevalent Opinions on the Inspiration of the Scriptures of the Old and New Testaments*, by a Lay Member of the Church of England, with an Introduction by the Rev. H. B. Wilson (Longman).—*The Testimony of Sceptics to the Truth of Christianity: with the Evidence of Pagan Historians, and the Confirmation of Fulfilled Prophecy*, by the Author of 'Heroines of our Time' (Darton).—*The Bishop of Lincoln's Charge Delivered to the Clergy and Churchwardens of the Diocese of Lincoln* (Skeffington).—*Sunday: a Poem* (Manwaring).—*The Interest of the Diocese in the Restoration of its Cathedral, a Sermon*, by the Rev. J. W. Hewett (Parker).—*The True Translation of the Holy Scriptures*, by Herman Heinfetter (Heylin).—*Genesis, the Three First Chapters and their Meanings interpreted through the Study of the Connection of the Jewish Symbols with the Egyptian Hieroglyphics, accompanied by an Explanatory Vocabulary, chiefly from Young, Champollion and Bunsen* (Manwaring).—*Salvation by Grace*, by the Rev. J. Henry (Reed).—*On Penitentiary Work, Two Sermons*, by the Bishop of Oxford and the Rev. H. P. Liddon, with a *Short Preface on Sisterhoods*, by the Rev. W. J. Butler (Parker).—*Canticles for the Christian Seasons*, compiled by the Rev. J. W. Rumsey (Parker).—*Textual Criticism of the New Testament*, by C. E. Stuart (Bagster).—*A Psalm of Life*, by W. Nevill (M'Glashan & Gill).—*An Abridged Selection from Doddridge's Rise and Progress of Religion in the Soul*, by a Naval Officer (Taylor).—*God's Two Books; or, Nature and the Bible have one Author*, by Dr. Balfour (Nisbet).—*The Rev. W. W. How's Practical Sermons* (Morgan).—*Life Unfolding: a Poem for the Young*, by Elizabeth Anne Campbell (Wertheim).—*Primeval Symbols; or, the Analogy of Creation and New Creation*, by W. Featherston H. (Hodges, Smith & Co.).—*The Shadow of the Almighty*, by Newman Hall (Nisbet).—*The Church of England's Rotten Plank*, by Dr. Carlyon (Whittaker).—*What is the Faith of the Essayists and Reviewers?* (Parker).—*The Philosophy of the Divine Operation in the Redemption of Man*, by J. B. Walker (Ward).—*The Rev. A. Reed's Charges and Sermons* (Ward).—*Meet for Heaven*, by the Author of 'Heaven our Home' (Nimmo).—*The Work of God in Italy*, by the Rev. W. Owen (Shaw).—*Public Education, Why is a New Code Wanted?* by Omega (Bell & Daldy).—*Five Short Letters to Sir W. Heathcote on the Studies and Discipline of Public Schools*, by Dr. Moberly (Rivington).—*Revised Code of the Committee of Council on Education Dispassionately Considered*, by the Rev. Dr. Vaughan (Macmillan).—*Neuenahr: a New Spa on the Rhine*, by Prof. Miller (Simpkin).—*The Lunatic; or, English Clergymen and Scotch Doctors: an Autobiography*, by the Rev. H. J. Newcome (Pownceby).—*The Malays of Capetown*, by J. S. Mayson (Galt).—*A Letter to the Lord Chancellor on Law Consolidation*, by Sir J. N. Dickinson (Ridgway).—*A Notice of Menon: Supplementary to 'Nice and its Climate': with Remarks on the Influence of Climate on Tuberculous Disease*, by Dr. Lee (Adams).—*Has Sir B. Brodie spoken the Truth about Homoeopathy and its Practitioners? a Lecture*, by J. H. Smith (Treasider).—*A Popular View of the American Civil War*, by A. J. B. Beresford-Hope (Ridgway).—*Excelsior: an Ethical Poem*, by Bessie Douglas (M'Glashan & Gill).—*St. Mark's School by the Sea-side in the Summer of 1861; to which is prefixed a Suggestion*, by the Rev. S. Hawtreay (Hamilton).—*Venetia: a Letter to B. Price, Esq.*, by H. Grenfell (Ridgway).—*Two Great Men: one, in the Highest Position that was due to him; the other, in a very Humble Station of Life; but both of them—Galanti Uomini* (Ebers).—*Twenty Letters to Young Farmers* (Thorley).—*A Glean of the Spirit-Mystery*, by W. C. Denny (Bickers & Bush).—*Indian Railway and Indus Flotilla Guarantees*, by J. Mills (Wilson).—*Observations on the Amalgamation of the Regiments of Royal and Indian Artillery and Engineers*, by an Officer (Smith, Elder & Co.).—*Part I. of The Temperance Dictionary*, by the Rev. D. Burns (Caudwell).—*and Part I. of Mr. Bacon's Science of Memory* (Bateman).

CHILDREN'S BOOKS.

Rough Diamonds: a Story-Book. By John Hollingshead. Illustrated by H. Sanderson. (Low & Co.)—The six stories—collected from various serials, and here offered to the public with all the additional attractions of good type, humorous illustrations, smart cover and brilliant edges—form one of the best gift-books of the present season. The first story, entitled 'The Old House,' concerns itself with the achievements of two sagacious little "mud-larks," who make their way, through the intricate and hidden paths of the metropolitan sewerage, into a gentleman's nursery, and steal therefrom a baby,—conveying their luckless victim away by the same gloomy and mysterious route. Of course, the papa and mamma of the baby institute a search for their precious darling in every quarter save the right one. The narrative is one of harrowing interest; but, fortunately for the reader, it takes only twenty minutes to read it, and the conclusion is a happy one. After being conveyed backwards and forwards, through a labyrinth of drains of all sizes, the baby is restored to its native nursery, by the same grimy urchins who in the first instance abstracted her. Of course, all this is very absurd; but a laugh over absurd things is no unseasonable pleasure at Christmas time. And Mr. Hollingshead is a writer who can make his readers laugh heartily, and at the same time give them something to think about when the laugh is done.

The Gorilla Hunters: a Tale of the Wilds of Africa. By R. M. Ballantyne. (Nelson & Son.)—Mr. R. M. Ballantyne will not gain much reputation by this attempt to dress up Du Chailly's African fabrications for the entertainment of children. These gorillas are the same fabulous and impossible creatures as the new Munchausen delineated and Spurgeon believes in, save that here and there, either through undisciplined imagination or ignorance of the English language, the nursery tale-wright has added a few touches to the absurdities of his master. The public are only too familiar with the Mr. Gorilla who breaks double-barrelled rifles in his fingers, as if they were merely cedar-wood pipe-lights; handles the stems of forest trees as though they were nothing more than walking-sticks; and beats his chest with open hands "so that it sends forth a loud hollow sound as if it were a large drum." Not less widely known is the picture of this hirsute and grinning gentleman, squaring up for a fight after the fashion of Tom Sayers; but Mr. Ballantyne, not content with this too common process of pugilistic overtone, plants his King of the Gorillas on his fore-legs, whilst the royal combatant distributes death to his adversaries by means of his posterior extremities. "But we had," said Mr. Ballantyne, "little time to indulge in contemplation, for, the instant the brute beheld us, it renewed its terrible roar and attempted to spring up, but both its legs at once gave way, and it fell with a passionate growl, biting the earth, and twisting and tearing bunches of twigs and leaves in its fury. Suddenly it rushed upon us rapidly by means of its fore-legs and arms." Never, surely, was a more hideous beast of evil portent imagined than this vast Gorilla running rapidly forwards on its fore-legs,—its heels being meanwhile thrown up into the air, in the manner of a playful donkey. Ingenious and daring, however, as this variation of an old story is, Mr. Ballantyne may not hope that it will carry the ridiculous fictions of the gorilla-hunter from the drawing-room to the nursery.

Jack Manly: his Adventures by Sea and Land. By James Grant. With Illustrations. (Routledge & Co.)—In 'Jack Manly,' the author of 'The Romance of War,' has given all boys, capable of reading English, a book of adventures by sea and land, which they will peruse again and again. It contains some excellent writing, and the illustrations are so unusually good for a book of its description, that we do not know which to commend with greater warmth,—the author's pen or the artist's pencil. The verbal descriptions and the engravings of the 'Destruction of the Black Schooner,' 'The Death Ship,' 'A Perilous Adventure' and 'The Wood of the Devil,' deserve praise. By all means,

let the virtue of Mr. James Grant, as here displayed, find its appropriate reward!

Kingston's Annual for Boys. 1862. (Kent & Co.)—Mr. Kingston's 'Annual for Boys' contains an over-liberal quantity of type and illustrations, but further we cannot speak in its favour. For the little of its contents calculated to please high-spirited lads, there is an overwhelming proportion of writing that no child would care to look at twice. The funny stories are not well told, and the useful information is dressed up in a style that will not make it more than ordinarily attractive to juvenile readers. The subjects selected are less open to objection than their treatment. "The Rise and Progress of the British Navy," for instance, is a good subject, but Mr. Kingston's ten papers upon it are clumsy, and bad both in design and detail. In like manner the two papers on "Heraldry and Heraldic Devices" are instances of unartistic management. "A Boy's Own Book of Heraldry," comprising the more romantic stories connected with armorial bearings, and giving a bright pictorial view of feudal life, would be sure of popularity. We should not, however, advise Mr. Kingston to undertake the task.

Cortes and Pizarro. The Stories of the Conquests of Mexico and Peru. With a Sketch of the Early Adventures of the Spaniards in the New World. Retold for Youth. By William Dalton. With Illustrations by John Gilbert. (Griffin & Co.)—Mr. William Dalton, on the present occasion, does not do more justice to the learning of Prescott and the picturesque beauty of Washington Irving than he did last year to the nervous style and vigour of Will Adams's letters, which he then made up into what he was pleased to term "a romantic biography." Mr. Gilbert's illustrations are the best features of Mr. Dalton's volume.

My Travels in Many Lands. Narrated for My Young Friends. By William H. G. Kingston, Esq. With Numerous Illustrations. (Kent & Co.)—This closely-printed Christmas volume is made up of notes of travel made in Great Britain, France, Italy and Spain. There are signs that it was composed in the first instance for older readers, and has been since addressed by the author to his "little friends." It is not in our power to recommend it very heartily; but it might hit the taste of exceptional children, and be found useful in the school-room as "a book for reading lessons."

Eldon Manor: a Tale for Girls. By the Author of 'The Maze of Life.' (Routledge & Co.)—Domestic life in a Yorkshire manor-house, populous with happy, amiable children and attached servants, is faithfully and agreeably painted in this pretty little volume, which, while it aspires only to entertain young ladies, contains many passages that will command the critical approval of older and sterner readers. The concluding chapters are more artificial than the opening scenes; but so fresh and healthy a spirit pervades the story, taken as a whole, that we are able to speak heartily in its favour. Margaret is a most lovable specimen of English girlhood.

The Young Painters; or, Tales of the Studio. With Six Illustrations by T. Bolton. (Booth.)—Intending to make his narrative light and pleasant by the introduction of sprightly conversations, the author of these Tales has forgotten that simplicity and directness are indispensable requisites in biographies written for children. As it is, the incidents narrated of Michael Angelo are so disguised and hidden under the flourishes and tricks of the most artificial school of prose fiction, that no child will be able to find them, much less will he be able to discover the character of the painter whose life they are supposed to illustrate. This same criticism may be applied with equal justice to the other stories. We regret that we cannot give a better account of the volume, as it is at first sight a pretty little book.

The Life and Adventures of Robinson Crusoe. By Daniel Defoe. With One Hundred Illustrations, by Edward H. Wehnert. (Bell & Daldy.)—The floods of good stories for children, put forth every Christmas by publishers for many years past, have not driven Defoe's masterpiece of fiction from the field. They pass speedily to oblivion, but 'Robinson Crusoe' is still a house-

hold word—still as much "the schoolboy's book" as ever. As a tribute to the genius of the Father of the English Novel, we are disposed to afford a cordial welcome to every new edition of the famous narrative of adventure; but we cannot say much in favour of the volume before us. Apart from the gilding on its cover and leaves, it has no claim to commendation even as a mere library ornament. The type is too small, and the illustrations are, on the whole, far from good. A few of them have average merit, but the greater part of them are sketchy, feeble and careless. A score or more of the worst seem to have been only thrown in for the purpose of completing the round number of ten times ten.

Nursery Carols. Illustrated with One Hundred and Twenty Pictures by Ludwig Richter and Oscar Pletsch. (Bell & Daldy.)—The rhymes which give a name to this little volume are not very good; but the hundred and twenty illustrations are excellent, making it the liveliest and most attractive "Children's Picture-Book," that has come under our notice for many a day. The last carol runs—

Dear is this little book to me,
Full of pictures bright and gay,
Given to me by my mother
On a happy Christmas Day.
You may read it, if I lend it,
Laugh at all the little fun;
But you must be sure to send it
Back again when you have done.

—Most assuredly no little six-year-old, whom a munificent mamma may enrich with a copy of the 'Nursery Carols,' will like to lose sight for many days together of her treasure.

Among the Tartar Tents; or, the Last Fathers. A Tale. By Anne Bowman. (Bell & Daldy.)—Miss Anne Bowman has mistaken her vocation. Her romantic story will weary children, and gain very little commendation from the few adult readers who may chance to turn over its pages. The hero, Hector Desmond, after receiving an Addiscombe education, goes out to India, to join his father's regiment at Lucknow. On arriving at his destination, he hastens to his mother's dressing-room to embrace her, after an absence of years, when, to his chagrin, he finds that Oriental indolence and luxury have robbed the lady of natural affection. "Ah, Hector," murmured Mrs. Desmond in a languid voice, "how immensely tall you are! What rude health the climate of England does bestow on the people! You really look twice as old as you ought to do, and I feel ashamed to acknowledge you!"—Such is mamma's first greeting. Displeased with this reception, Hector moves off to the school-room, to ask Miss Strickland, the governess, to give his sister an afternoon's holiday.—"This is irregular, Miss Desmond," said she; "it is the office of Captain or of Mrs. Desmond to present to me Mr. Hector Desmond. I must, therefore, waive all acquaintance with the young gentleman till we meet under fitting circumstances. Now, I must request you to proceed to execute this sonata in a style superior to the last attempt, which was a complete failure."—Hector was for a moment petrified with this cool neglect, but soon rallied, and said boldly, "But, I say, Miss Strickland, it isn't every day that a friend drops in from Europe. Couldn't you give Clara a holiday, to hold a chat with me?"—"No one ever dictates to me the duties of my office, young gentleman," replied the stately lady. "Your demand is indecorous; as well as abrupt and rude. The noble language of England must be much deteriorated since I left the country, if such vile expressions as 'to hold a chat' or 'a friend dropping in' be accepted as the classical English of good society in these days."—The hair-breadth 'scapes, tiger attacks and perilous encounters, that enliven the later chapters of the novel are as untrue to nature and life as these domestic scenes.

The Interviews of Great Men: their Influence on Civilization; from the Meeting of Diogenes and Alexander to the Final Interview of Count Cavour and Victor Emmanuel. Developing the Characteristics of Men who influenced the Times in which they lived, and showing where their Example is worthy of Imitation. By the Author of 'Heroines of Our Time,' &c. (Darton & Co.)—The author of the

score of feeble memoirs of celebrated men, published under the presumptuous title transcribed above, and dedicated to Lord Brougham, is deficient alike in literary ability and in that information to be without which is disgraceful. "That portion of history," he says, "which promises, perhaps, the greatest interest is the *interviews* which have been held between celebrated men. These *interviews*, apparently accidental, and thought to be unimportant at the time, have largely moulded and shaped the destiny of the world. It requires but little imagination to call up many of these *interviews* which would have had an *interest* of the most absorbing kind, and which, had we been present, would have left a vivid impress upon our memory. It has been thought, in a diminished sense, that this *interest* may be re-awakened or created by the recital of a few of the more prominent of these *interviews*. Such recitals are not less important than they are *interesting*." After this announcement in the Preface (which may be taken as a fair sample of the writer's style) we were surprised in the body of the book to find the author bent, not on describing a series of *interesting interviews*, but on sketching the careers of certain remarkable men. Diogenes had an interview with Alexander; so the author gives a loosely-constructed and inaccurate sketch of Diogenes, and entitles it 'Interview of Diogenes and Alexander.' In the same way a worthless memoir of Lord Brougham is entitled 'The Interview between Lord Grey and Mr. Brougham,' and a notice of Penn is headed 'Penn's Interview with the North American Indians.' Criticism would be wasted on a writer who in one page speaks of "the strong influence that Martin Luther felt to expose and redress the evils existing in the Church of Rome," and in the next page mentions Roderic Borgia's "children, which were numerous."

LIST OF NEW BOOKS.

Adcock's Engineers' Pocket Book, 1862, 6/ roan.
Alinari's Tiger Slayer, illus. 4s. 6/ cl.

THE PRINCE CONSORT.

A MAN of gracious presence and gracious nature—handsome, nobly-bred and bountiful—in outward manner and in inward soul a gentleman—has passed from the public sight in Albert, Prince Consort of England. He is gone when the world can spare him least. A malign and foolish proverb says that no man is ever missed: we might as well say that a crop or vintage is never missed: it would be truer and more pious to say that every one is missed. How vast our loss no tongue can tell. Some part of it is at once apparent; not only in that dark and sacred chamber where the imagination of devoted millions pictures the widowed Queen as weeping in the midst of her children; but in the room of State, in the meeting halls of learned and scientific Societies, in the places where charity asks for aid; and, indeed, wherever a good and princely deed has to be done. For years to come there will be no day—no hour—in which that bright face, that kindly intelligence, that eloquent voice will not be missed in the London world.

Who will replace him on the inauguration day of the International Exhibition? It is, we believe, the express desire of her bereaved Majesty that everything shall be done which the Prince had projected, and most of all, that the noble works at South Kensington shall not suffer interruption. The desire is one in which the whole nation will sympathize, and which it will help to make good. For the sake of him, as well as for the sake of Art and Trade, we must all combine to make it the success with which he would have been content. The work will go on. Yet, not the less will he be missed on the inauguration day. Who will occupy the post he had so graciously accepted, as President, for the year, of the Royal Agricultural Society? Who will preside, as he had meant to preside, at the annual dinner of the Society of Arts? Will his Royal Highness the Prince of Wales? It may be hoped he will; substituting for the grace of experienced wisdom which we cannot have any more, the grace and good-will of youth. In the Prince who is gone the Arts and Sciences have lost their truest friend,—Manners and Morals their first example,—Education and Public Progress their strongest support; and if the loss shall prove to be not irreparable, it will be because his provident sagacity has trained his children for the task of guiding this great empire in the path of social and moral reform along which it is now travelling fast.

In the story of our Court and society, no Prince ever occupied a place in any degree analogous to that held by Prince Albert. Our political system has no room for Prince Consorts; of the personages who, before his time, held the office of Queen's husband, it is hard to say which was the more hated and reviled—the fanatical partner of Mary, or the drunken partner of Anne. Prince Albert had never been unpopular. Once or twice, some years ago, there was a growl and snap, as if the old mastiff spirit were still alive in the lower orders; and more recently there has been a hiss and simper in west-end clubs and at west-end dinner-tables; but the great public of England, which judges men by the realities of their lives, gave a Prince who paid his debts credit for his frugal liberality in common things, and heard

without surprise of his generous deeds done privately—in circumstances which justified generosity to a wise and thoughtful man—but where it was unlikely to become known and impossible to be returned.

The stories of this unpublished liberality are many and beautiful. A few weeks ago, in a provincial town, very far from London, we heard of an orphan who, at one of the Schools of Design, displayed a noticeable taste for drawing. By an accident the boy's case became known to the Prince, who, after careful inquiries into the orphan's character and talents, charged himself with his education, and placed him, at a considerable expense, under an eminent artist for instruction. In his personal dealings with artists, men of letters and musicians the Prince was cordial, simple and straightforward; as the most eminent of these artists, men of letters and musicians have been always forward to declare. If the relations were other than pleasant the fault lay elsewhere than with the Prince Consort. In simple truth, the distaste of a moment had no foundation in fact, and it passed away. The Prince's fortunes were, on the whole, as happy as his disposition; and the instant and unstudied grief of all classes, on the announcement of his death, is the truest test of the profound and universal popularity which surrounded him, unseen and unheard, in his daily life. Prince Albert understood his country and his time. Leaving the strife of ordinary politics to those who had the taste and the right to enter into such contests, he devoted himself to the higher range of scientific questions and social charities, in which no one could dispute his pre-eminence or interfere with his usefulness. Denied a material, he made for himself an intellectual and invisible throne.

In dealing with the social questions which lay open to his benign elucidation, it is remarkable how little of what is commonly called princely—and how much of what is felt to be philosophical—appeared in his views. He knew what Governments can do for people, and what they cannot do. He never entered into any public task because it was expected of him, or because it was the fashion. In every case he referred his activity to high principles, and only acted for others when he could do so with a safe and sure effect. To help those who were already helping themselves was his sagacious plan, and hence he achieved so much that will not pass away with him. First of all, perhaps, the arts and sciences found in him a friend, and the influence which he exercised upon them was of a kind no other man could have obtained. Into every branch of intellectual toil he sought to introduce sincerity and refinement, and into every community of intellectual workers gentleness. This was his true mission in our land; and to every one, on every fair occasion, he preached kindness. Kindness was the means to all his ends. Will any one who heard him ever forget with what earnest suavity he pleaded at the Royal Academy dinner for kindness: kindness of construction, kindness of criticism, kindness of manner; or the impression conveyed by looks and tones that the doctrine of his speech had a prior existence as a virtue in his life? He was the very soul of grace, of gentleness, of hope. An artist one day spoke to him of some

effect in his art which would be grand if it were only possible. "There is nothing in Art impossible," said the Prince. Everything that is worth doing, he believed, can be done with honest labour. Attainment all but universal—mastery of art, of language, science, music, literature—led him to believe, more strongly than men of fewer conquests, in the power of steady and sincere labour. His own knowledge was very great, and it lay in many unexpected nooks and corners. Of music he knew far more than an average man,—played on more than one instrument,—sang well,—and wrote down his thoughts in musical works of some length—if not with high creative power, yet with a steadiness and sensibility not to be found in the works of ordinary gentlemen who write. It is known to the public that he was a very good etcher. We have heard an Engineer declare that the Prince knew more of fortification than any non-professional person he had ever met; and the Secretary of the Photographic Society assures us he was a very admirable photographer.

It is no more than his due to say that all his eminent abilities—all his splendid opportunities—were devoted to the noblest ends. The Prince Consort had an instinctive love of peace, of industry, of progress. Progress was, indeed, his constant theme. What the word Duty was to Arthur the Great, the word Progress was to Albert the Good. No other word turns up so often in his speeches, no other idea was so constantly present in his mind. No sacrifice of time, labour, thought, money or responsibility seemed to him too great when he could make it in the cause of national or individual Progress. He willingly sat on a Fine-Art Commission in Westminster, ran down to the Docks at Grimsby, presided at an Agricultural Dinner at York, laid the first stone of a National Gallery in Edinburgh, or of an Actors' Almshouse at Woking; inaugurated a Servants' Provident Society, dined with the Merchant Taylors and opened the Manchester Exhibition of Art-Treasures,—labours in which few Princes would have found delight. Enough for the Prince if the work were one of Progress. In the name of Progress he raised the Crystal Palace in Hyde Park,—where we hope ere long to see a fitting monument to his name arise. In the name of Progress he was lending, to the hour of his death, his invaluable aid to those who are charged by Her Majesty and by the nation with the great task of erecting its successor at South Kensington. Every good cause might count on his voice, his hand and his purse. When the Domestic Servants' patrons asked him to take the chair at a meeting in their behalf, the case they put to him was—that the domestic servants of the metropolis often suffer great privations in old age; that they were making some efforts to help themselves; and that his appearance in their cause would be good for them; his reply was:—"After what you tell me, I should be wanting in my duty if I did not take the chair;" and he took it. One of his very last public acts was to subscribe a hundred pounds for the purchase of Shakespeare's house and garden. It was by genuine sympathy and genuine work that the Prince Consort gained the empire which he held over the best minds in all countries; an empire more extensive and more enduring than that visible empire on which the sun never sets.

CAPT. MAURY ON AMERICAN AFFAIRS.

THE intellectual voices of America have scarcely yet been heard on the great question of Secession and Civil War. These questions having suddenly acquired for ourselves a deep and mournful interest, readers will be glad to hear the opinion of a scientific man who is neither a partisan nor a politician. Capt. Maury's views are expressed in a letter to Rear-Admiral FitzRoy, but they are in fact addressed to the scientific men of England.—

Richmond, Virginia.

My Dear Admiral,—Since this nefarious war was forced upon us, my hands have been busy in preparing for it; and I have not had either the time or the opportunity to let my friends and former fellow-labourers on your side of the water know what is become of me. My country was torn; the Union was gone; a number of States had renounced it. In this breaking up of our once happy and great Republic, it became me to take sides. The path of right and duty was clear; and here I am.

On the 20th of April, finding that this my native State, in the exercise of her high prerogative, had withdrawn from the Federal Union and appealed to her sons to rally around her, I would not, I could not and did not hesitate to obey the call and hasten to her relief. On that day, after formally renouncing all allegiance to the now shattered Federal Government, and turning over to the officer next in command the trust that had by it been confided to my care, I left the Observatory at Washington once more a free citizen of Virginia. Its associations, the treasures there, which, with your help and that of thousands of other friendly hands had been collected from these, were precious to me, and as I turned my back upon the place a tear furrowed my cheek, for I could not but recollect that such things were.

The Yankees, as only those who are making war upon us are now called, have shown themselves vindictive to a degree; they have vilified me; they have set a price upon my head, and intercepted all my foreign correspondence, so that I have not been able to get a hearing in any part of Europe, or to communicate, since April last with any friend there.

It is becoming and proper that I should make known, to my friends abroad the course that I have thought right to pursue in this new state of things. And to be clear, I beg to interpolate here a few remarks explanatory of the relations of the several States to the Federal Union, and of the relations in which the citizen stands to his State and the Union.

At the end of the war which separated the thirteen colonies from the British Crown, each one was separately acknowledged and recognized as a free sovereign and independent State. When the States formed the Federal Union they did not renounce their sovereignty any more than Great Britain renounced her sovereignty when she formed the Holy Alliance. They only delegated a portion of it to be used by the trustee or agent, called the Federal Union for certain fixed and definite purposes, and no other. When Virginia agreed to this compact and adopted the Federal Constitution she accompanied the act with the following declaration asserting her right, for cause, to withdraw from it at will:—

Act of the State of Virginia adopting the Federal Constitution, passed the 20th day of June, 1788.

We, the delegates of the people of Virginia, duly elected in pursuance of a recommendation from the General Assembly, and now met in Convention, having fully and freely investigated and discussed the proceedings of the Federal Convention, and being prepared as well as the most mature deliberation hath enabled us, to decide thereon, DO, in their name and in behalf of the people of Virginia, declare and make known, that the powers granted under the Constitution, being derived from the people of the United States, may be resumed by them, whenever the same shall be perverted to their injury or oppression; and that every power not granted thereby remains with them, and at their will. That therefore no right of any denomination can be cancelled, abridged, restrained or modified by the Congress, by the Senate or House of Representatives, acting in any capacity, by the President or any department or officer of the United States, except in those instances in which power is given by the Constitution for those purposes; and that among other essential rights, the liberty of conscience and of the press cannot be cancelled, abridged, restrained or modified by any authority of the United States.

Pray, now, my friend, bear with me, while from the Southern stand-point, I explain to you the real nature of those influences which have led to this early disruption of the American Union:—You recollect that I told you when in London last November, when these difficulties were just beginning to loom up abroad, that all the right was on our side. You could not understand it then, for your information was derived chiefly through the Northern press. Few people in England, I believe, ever read a Southern newspaper; led astray by the apparently just, but really one-sided, statements and teachings of the Northern press, your people were induced to look upon our troubles and the complaints of the South merely as the empty ravings of a political party that had been turned out of power. The South, by some means, it was held, ruled the Government from the beginning; it had lorded over the North—and now that the North, having its patience worn out, had, by constitutional means, taken the power in its own hands, the South was simply acting the part of a spoiled child, in the overgrown boy, who had been allowed to play with a borrowed toy until he believed it his own, and who, when at last it was taken away and restored to its rightful owner, disturbed the family with his childish ravings. Such seemed to be the light in which the affair was looked upon generally in England and on the Continent—and such evidently was the light in which the Yankee press held it up to foreign view. But the real difficulty is one of another sort; and the causes out of which it has sprung are old and deep-seated. They are partly physical, partly industrial, partly social, and partly political; they have been cumulative.

The New England States are manufacturing, seafaring and commercial; the Southern States are agricultural. The most profitable labour in this country was the agricultural labour of the South. Your own commercial statistics prove this, for they show that about three-fourths of the national exports consisted of agricultural products of the South.

Here then were two sections of the country so invested with physical conditions, that labour in the field was very unprofitable in one; very profitable and highly remunerative in the other. Yielding to these conditions, the labouring man of the North, to earn a living, found it easier to go to sea than starve at home; while his fellow at the South found it easier to gather "enough and to spare" from the teeming soil and genial climate of his own sunny South. Therefore, at the formation of the Government the two sections presented themselves, one as seafaring, with fishing as its chief occupation; the other as agricultural.

But soon the Yankees came up with representations of this sort:—Fishing is a poor business, said they; it doesn't pay; but fishing ought to be encouraged for national purposes: therefore, let us not only protect Yankee-caught fish in our markets against the fish caught by the English, Dutch and French, but let us give the New Englanders a bounty on all fish that they can catch. In other words, let us tax this agricultural business of the South which is so profitable, for the benefit of our fishermen, whose business if left to itself won't pay. And so annually large sums of money were taken directly out of the common treasury, ostensibly, but originally and really from the pockets of the Southern planter, to pay the New Englanders for catching fish for their own uses. This went on many years under the plea that these fisheries were a nursery for seamen, and unless American seamen were fostered in such a nursery the nation, it was said, could not have a navy. But when it was obvious that we could get seamen in abundance without drawing upon any such nursery, the South sought, but the North steadily and persistently refused, their assent to a repeal of the Fishing-bounty Act.

The South held that in the eyes of the Federal Government all citizens were equal, that all the States stood on the same footing, that the Union was formed, not for individual, but for the common good, and that Congress had no right to tax any citizen or class of citizens for the benefit of another. The Federal compact required taxes to be equal,

and all citizens, labours and industry to be taxed alike. It was as much the duty of Congress to foster, encourage and protect the industry of South Carolina as of Massachusetts—one of the States as of another. Such was the Southern doctrine, and such were the teachings of the Fathers. But the country went on growing and prospering, and there was simply from the South a protest against this heresy.

Finally, in 1812, to protect Northern interests and to vindicate the commercial rights of New England—for the South had neither ships to be searched nor seamen to be impressed—we went to war with old England. The New England States ignobly backed out of that war, and left the others to bear the brunt of it.

With peace there arose a school of protectionists—men who unwisely said, "Let us not depend upon John Bull any more for anything whatever; let us henceforward do our own manufacturing, our own fetching and carrying. But, to enable us to do these, we must encourage and protect the workshops and artisans of New England. And as the agricultural labour of the South is so very profitable, we may charge it with the support of this New England interest also. They have stood annual bounties to our fishermen for years, and we 'guess' they will stand protection for awhile." Political Economists may say what they will, but legislate and theorize as they may, they cannot without robbery make any branch of labour profitable which is not self-sustaining: to make such industry profitable, somebody must pay; and as a rule, the money must come out of the pockets of those whose business is self-sustaining. But protection in this instance, they said, was only required to set this manufacturing business in New England on its legs; that it would soon be able to stand alone, when the power of protection might be withdrawn. So the South yielded, and consented again to be taxed; but, this time, the tax was under the form of a tariff, not of a bounty, though in the end it was the same, for it had to be paid by the self-sustaining labour of the country, and that was chiefly at the South.

New Englanders are proverbially sharp, keen and "cute"; so having once tasted of the treasury pap through cunningly-devised tariff bills, they soon discovered that heavy expenditures from the Federal Treasury would necessitate high tariffs; then they went for an extravagant government, and engineered with Congress for large appropriations. To create demands upon the national purse, they established navy-yards where they were not required; built forts where they were not wanted; erected lighthouses where they were not needed; and actually studded the Northern seaboard with establishments of this sort, while the whole Southern coast, from the Capes of Virginia all the way round to the mouth of the Rio Grande in Texas, was but badly lighted, though the navigation along the Southern Bays is most difficult and dangerous. There is also along the Southern coast a half-finished fortification here and there, and, as for a navy-yard, there is not one in which there could be found any of the usual facilities either for building or repairing; and neither of these operations could be performed except for double cost. As for lighthouses, compare those of the Florida coast with those of New England, and you will better appreciate the force of those remarks. Pray look at this somewhat attentively, for it is one of the points of difficulty in the quarrel that is not apt to be perceived by one outside the national family-circle. Though neither the sole nor the chief cause, it is, nevertheless, one of the many aggravating influences which helped to make it. Along the coast of the Northern States and within the distance of about 250 miles, they have no less than four magnificent dock-yards, where millions of public money are annually expended. But along the Southern coast from Cape Hatteras to the Rio Grande, a distance of nearly 2,000 miles, the South has but one navy-yard, and that only in name, for no vessel has ever been repaired there; and as for building, though it has been established about forty years, the first vessel constructed there has yet to be commissioned into service. In case of disaster to a man-of-war in the

Gulf of Mexico or the West Indies, she has to go to a Northern ship-yard to be repaired and paid off. This is only another one of the many 'cute little Yankee tricks to which the Northerners have resorted to get the public money disbursed among them. As a rule, the great mass of the public expenditures were made in the North, not in the South, so that the Southerners found themselves doubly taxed—taxed first for the benefit of the Northern manufactures, and then, in the disbursement of the public funds, denied an equal participation in the benefits accruing therefrom.

Thus fostered, pampered and petted, the Northerners began to think themselves altogether superior to the Southerners, for, said they, "look at our shipping and commerce, behold the beauty and magnificence of our cities, mark our workshops and railways, contrast them with the like at the South, and then say if these are not the evidences of a different and a better people, the indications of a superior race?" With this they took up the notion that they could not associate with us in the common territories because of our slaves. We held slaves when they sought our alliance. They knew that, for they kidnapped them in Africa, they and the English brought them over in their ships and sold them to us. But, notwithstanding this agreement, the Constitution and their obligations under it, they announced a "higher law," and pronounced their agreement with us under the Constitution "a covenant with hell." Will these people keep faith any better with money-lenders when debts pinch? With this temper in the Northern heart and mind the Federal Government found itself seized with a vast extent of unpeopled lands, the common property alike of all the states. Much of it had been given to the Federal Government by the Southern States for the benefit of the Commonwealth; some of it had been acquired from the Indians by treaty and purchase,—and some had been bought from France, Spain and Mexico,—but all was paid for out of the common treasury. Into these territories the North now insisted that the Southerners should not go unless they left their slaves behind. To this the South said "nay," for, continued we, these lands belong as much to us as to you; they are the common property of all the States; the Federal Government is only the trustee in the matter; it is bound to manage them for the good of the whole, it cannot discriminate between the heirs. Look at the deed and title and constitution, and you will see that we have the same right to go and settle upon these lands with our servants as you have with your "helps" and apprentices, or with your oxen and asses. But in reply they began to preach about their new-fangled doctrine of a law more sacred and binding than oath on the Holy Evangelists—and tell us that our slaves if carried into a territory would be degrading to them. Thus by mere force of numbers they voted us out of our lands, and appropriated them to speculation and their own purposes.

These public lands, instead of a blessing to the Government, have proved a curse; they have had more to do in hastening on the present unhappy state of affairs than people generally are aware. They have given to the country an apparent prosperity, by attracting to it hordes of emigrants from abroad, who, with their money, their industry and their policy, imparted to the Republic a progress in wealth and population which astonished the world. Puffing up the people with national vain-glory, the prosperity of the country induced them to overlook all else, and ascribe everything to our peculiar form of government and to Yankee enterprises. These emigrants, with their votes, have often turned elections. Before they had come to understand our institutions, their voice has had controlling influences with the Government. The public lands have caused the fall of the Republic while yet in the vigour of youth, by means of the policy which, within the last thirty years, has been pursued with regard to them. Up to that time, the practice was to organize them slowly into territories, to admit them sparingly into market, and so to regulate the settling of them up as to prepare for their reception into the Union in pairs—one State with slavery and one State without slavery, always together. This was done until the

number of States had been increased from thirteen to thirty, and the Union consisted of fifteen States with and fifteen States without slavery.

The reason for this practice is obvious. It is found in this consideration:—In the Senate, every State was entitled to two votes, and no more,—though the free States, by virtue of this land policy, and consequent more rapid increase of their population, had acquired the ascendancy in the Lower House; yet, so long as they were equal in the Senate, it was impossible for one section to combine for unfriendly legislation against the other, for all laws required for their passage concurrent majorities in each House. The House might be unanimously in favour of a measure, yet it fails to become a law if there be in the Senate even a majority of 1 against it.

General Washington, in his virtue and wisdom, had warned the people against the dangers of dividing the country geographically into sections. They might and had arranged themselves into parties; but these were irrespective of parallels of latitude, isothermal lines or the "peculiar institution." A division of parties by geographical lines, if it should take place, would, the fathers of the Republic saw, be most liable to take place on the Slavery Question. Hence, for two generations the policy was religiously adopted, and rigidly pursued, of equalizing the number of Free and Slave States, and preserving that equality in one branch of the Legislature. The law also forbade at least the immigration of slaveholders, with their slaves, from Brazil, South America, Cuba, Jamaica and elsewhere; but it encouraged the immigration of free white persons from all parts of the world.

Under these laws, the Free States increased in population more rapidly than the Slave States; for the emigrants generally, being anti-slavery in their opinions, preferred to settle in the Free States. Therefore, the growth of these in population was greatly assisted by the tide of new-comers from Europe, while that of the Slave States was left to its own natural increase. Yet, nevertheless, Congress, until a quarter of a century back, was slow to organize new territories on the anti-slavery side of 36° 30', or to open up the lands in these for settlement; and in order to preserve this equality of numbers between the States—pro and anti slavery—the public lands were brought so sparingly into market that the receipts therefrom were not more than sufficient to pay the expenses thereof. Such was the case until about thirty years ago. About that time, and in an evil hour, this wise policy was abandoned, and the people were tempted by the Government out into a sea of speculation upon the public lands such as the world never saw. Under it the laws of naturalization were relaxed. Ireland was drained of her increase, and all Europe was initiated, persuaded and tempted to come and help us to subdue, occupy and replenish the magnificent wilderness of America. In a single year the sales of the public lands, which had never reached more than \$3,000,000, went up to \$26,000,000. Land scrip and warrants were dispensed like waste paper. Every man who had ever served as much as two weeks in war had land for a farm given to him. Besides bounty lands to the soldiers and sailors of every war, donations of public lands, by millions of acres in the single grant, were made to the new States, or given to individuals and corporations, to aid in the construction of railways and canals and a variety of other enterprises. Companies for the sale of these lands were formed on both sides of the Atlantic. Drummers, to beat up purchasers, went out into all parts of Europe. Listening to their representations, and yielding to temptation, a throng of living souls, such as has been rarely seen, was put in motion for the wilds of America. The extravagants of the Mississippi scheme were realized.

Such a tide of emigrants soon swelled the population of the new territory to the number required to entitle it to one representative in the popular branch of Congress. Thereupon the new territory was admitted into the Union as a free, sovereign and independent State; it was, consequently, received into the Senate upon an equality as to votes and political power with the oldest and most populous of the original States. Instead of divid-

ing this free territory out into large States like Texas, it was divided into States only about one-fifth as large; consequently, the balance of power in the Senate could not be maintained long under the stream of in-flowing population from abroad, nor could it last a moment after parties had arranged themselves according to sectional lines. As soon as this balance was destroyed, the issue was made; and with eighteen Free States, as they are called, to fifteen that recognized African slavery, Lincoln, at the head of a sectional party, was brought into power regularly, according to the forms of the Constitution, but upon a platform entirely subversive of it. Thus the land policy hastened the destruction of the Union, by unwisely calling into play political powers that were bound to throw the Federal machinery out of adjustment. Nor is this all: it led political economists into error, and induced the world to ascribe to the so-called "indomitable energy and enterprise of the New England people" what, in the reclaiming of a wilderness, belongs really to a host of European emigrants.

The Northern Congress has imposed a direct tax upon its people of \$30,000,000. Our Congress has taxed us for \$20,000,000 to pay principal and interest on our debt. We at the South cheerfully and willingly submit to this tax, and every cent of it will be promptly paid. But, mark my word, the Northern people will be slow to put their hands into their pockets for this "rail splitter," as Abe Lincoln is called. Nevertheless, he may squeeze a portion of this tax out of them, but if so, it will be only a portion, and that will come with such writhings, grins and protestations, that he will never attempt to "raise the wind" again by any such process. But when the pinching time—the pay day—does come, will not the same motives which induced his people to proclaim a "higher law," and to denounce certain provisions of the Constitution as "a covenant with hell," induce them to repudiate this debt, principal and interest, which he is now seeking to create for his wicked purposes? I cannot but think so. Their faith was pledged to stand by the Constitution; yet, the moment they felt the Constitution operating as a restraint upon them, they violated it. Will they be more faithful to their promise to pay? Will they not, after the money is borrowed and spent, be more likely to turn upon the lenders and say, "This debt was created by a doubtful authority at best; it was created in the name of the United States, when there was no longer any such Government; it was created to support a war which the Constitution does not recognize: all this was known to you when you made the loan? Therefore, we won't pay." This debt, principal and interest, these Northern men will repudiate altogether, for already the war is beginning to be unpopular with the masses. Enlistments go on slowly in the North. The people are hanging back. It is worthy of remark, that almost every prisoner we have taken from them professes himself to have been deceived. He was entrapped into this war, and if he is ever permitted to reach home again, he will for one keep clear of any more such scrapes. Such is their language.

But after the public lands and the enormous influx of foreigners upon us had destroyed the checks and balances of the Government, the cry of the "irrepressible conflict" was raised in the North. Either, said their leading but deceitful statesmen, we must overrun and overturn the institutions of the South and root out slavery, or the South will impose upon us its negroes. Upon this the Northern or "Free States," as they are called, combined. Exceeding us in number of States and polls of people, they drew a geographical line, and formally divided the country into sections—North and South. This act, lawfully determined, placed, according to the forms of the Constitution, the whole Federal machinery—Executive, Legislative and Judicial—in the hands of a faction formed of fanatics, and banded together for the purpose of making war upon our rights, our property and our liberties. The end and aim of that Constitution was to "establish justice, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to

ourselves and our posterity." The Federal machinery having fallen into such hands, and the Constitution having thus wrought out a failure, my noble, my gallant, my native State, speaking through her people in Convention assembled, resolved to assert that precious right, which, though inalienable, and formally admitted so to be by all the States, yet, to prevent cavil, she had, by express declaration, as I have already shown, reserved to herself when she first joined the Federal Union. And that right was the right to withdraw from it. And now, what has the President of this party and the leader of this faction done? President Lincoln has, by his own mere dictum and that of his lieutenants, suspended the writ of *habeas corpus*. He has muzzled the press and abridged the freedom of speech. He has, without authority of law and against the Constitution, which he is sworn to defend and support, plunged the country into war, murdered our citizens, burned our houses and is wasting their substance. He has, without warrant, seized unfreeing citizens, and, without acquainting them with the nature of their offence, has imprisoned them in loathsome dungeons. He has set aside the civil authorities and declared martial law to rule in their stead, and, under the tyrant's plea, he is proceeding to do a great many acts and things which would more become the savage and the brute. He has sent against us an army, and provided them with manacles to bind us in his prisons. His Zouaves who fell at Manassas were equipped with halters already adjusted for our necks and the lamp-post; and, first having treated medicines, drugs and surgical instruments as contraband of war, he leaves after defeat in battle his wounded to be cared for by us whom he had sought to deprive of remedies. After his defeat in the Battle of Bull's Run, he sent neither flag to bury his dead nor physicians to treat his wounded. In short, Lincoln and his myrmidons are preparing to enact upon us the scenes of La Vendée in the French Revolution.

Though not so mighty in numbers nor so rich in warlike supplies as the enemy, we are eight millions of people thrice armed, in that our quarrel is just. Fighting for our homes, we are mighty in battle. In mere lust the enemy is fighting for power and conquest; we, for fire-sides, the graves of our fathers, dear life, and all that is precious to the heart and to civilization. Our cause is holy; theirs, hellish. We cannot, we will not, be subjugated.

The contrast is frequently drawn by our old men between the conduct of the English in the war of 1812 and the conduct of the hordes of Lincoln now. The English invaded us, but respected the property and regarded the rights of unarmed citizens. The same counties have been invaded by Lincoln. He has devastated and laid them waste, and for what? Why, simply to compel us to submit to his governance. Suppose he should succeed, would not success overturn the whole fabric of the Constitution? The Republic was founded on the consent of the governed. Failing in this, it is no longer either a Republic or any other form of government that has at its foundation the will of the people. It is a tyranny. We want nothing of the North. We choose not to submit to Northern domination; we are fighting simply to be let alone, and to be permitted to govern ourselves in our own way.

The South presents the remarkable spectacle of an army having in its ranks the first men and best talents of the country. To subdue or conquer such an army is simply an impossibility, for its soldiers are fighting for all that makes life dear to them. I fight with a price upon my head and a halter around my neck. Nor I alone, but every man of mark or substance among us. Lincoln's men are not made of such stuff; for they are for the most part mere hirelings, and their armies in battle are strengthened by no such hope, and moved by no such fears as those which inspire us. They talk of a re-construction of the government and a reunion of the people. Simply, and in few words, re-annexation to the British Crown is more possible.

I very much desire that the friends of free government in Europe should be correctly informed as to the true state of things with us; for your information being chiefly derived through our ene-

mies, it is of course one-sided, and generally, also, it is not only erroneous, but wilfully mendacious. The papers at the North that plead our cause, or dare tell the truth about this war, are suppressed by Lincoln's mere *sic jubeo*. A large majority of us, they would have you believe, are opposed to secession and this war. Saving some of the Western counties of this State, and a few in East Tennessee, I have never known the people so united upon any subject. The women, if possible, are more enthusiastic than the men; they are of one mind, and the clergy are as earnest as the women. In the week the clergy are, of their own free will, drilling and being drilled to arms: their churches are given up to the women, who, with needles and sewing-machines, congregate there to make clothing for the soldiers. On Sundays, from the pulpit, the holiness of the war and the righteousness of our cause are preached to the people. In battles, you find clergymen among the foremost of the fight. We have on our side a bishop for a general, holy divines for colonels, majors, captains and soldiers in the ranks. Never was a people more united and in earnest than the people of the Confederate States are at this moment.

Yes, you have heard something too of our starving—of our inability to produce breadstuffs and provisions enough for our own use, &c. To make you believe that would be requiring you to renounce your belief in physical geography, for that shows that within the Confederate States we have the finest of climates; our lands are unsurpassed in fertility; we are a grazing, and a farming, and a planting people. Educated in the South, I never saw a beggar until I entered the Navy and went to New York.—Such is the habitual abundance that the very few poor who are found among us are provided for without calling on the people for poor-rates. Our Southern laws recognize no such tax. The staples of Georgia are cotton and rice; yet the Census shows that, according to population, Georgia furnishes as much wheat as New York—and New York is one of the wheat-growing States of the North. Never have the grain crops of the South been more abundant than they now are. The blockade of our ports, admitting it to be effectual, would not interfere with us as to any of the necessities of life. It may cut off our supplies of tea and coffee, and the various articles of merchandise that we have been accustomed to receive from abroad; but this does not amount even to a privation, for we submit to these wants as a self-denial and a discipline that is all for our good.

I see no end to this wicked and savage war as long as the arch spirits which surround Lincoln remain in power. Before and after every battle, we hold out the olive-branch, demanding simply, "Let us go." We do not desire to subjugate or invade his people. We are simply trying to cut loose from them, and to have nothing to do with them or their institutions, one way or the other. As a proof which we wished to give them and the world of our forbearance and sincerity, behold the movements of the enemy since the Battle of Manassas. We have not been disposed to follow up that signal victory by a single act of invasion. Rely upon it, the old Union is irretrievably gone, and secession is rapidly gaining ground. The thinking men in several of the Free States are daily beginning to cast about for fresh compacts, for new political and social combinations; and among the new developments which the morrow may bring forth, be not surprised to find Pennsylvania, and perhaps New Jersey, seeking admission into our new Republic, as one of the States of the Confederacy.

Pennsylvania has always been clamorous for protection. The tariff that would set mills going in New England would not turn a wheel in Pennsylvania; and the old Government had not the power to discriminate in our markets between Pennsylvania productions and those of New England. They all stand upon the same footing. Our new Government can discriminate. If Pennsylvania be admitted, she will have free trade with us. The New England States and all other Free States will be taxed for every article they bring. For they will have to pay duties. Pennsylvania not. This will transfer from all other Northern States the capital and machinery that have been employed

there in manufacturing for the South, and set it down in Pennsylvania. Pennsylvania will then contain the Birmingham and Sheffield and Liverpools of the South. She will enjoy preference and protection also with us, in whose markets, the wants of not less than fifteen millions of people will have to be supplied. With these and other advantages Philadelphia, instead of New York, might become the great commercial emporium of America.

The bare suggestion of such a course by Pennsylvania opens up a vista that is full of thought. By that course Pennsylvania will escape her share of the \$500,000,000 with which Lincoln is burdening his people, in this the first year of the war. He will require as much more the next year, and the next, and, mark the prediction, you are yet to see Pennsylvania knocking at our doors for admission into our Confederacy; for if we were to admit her, she would by that means escape her quota of the Lincoln debt, and leave the other Free States "the bag to hold." If Pennsylvania were to withdraw, she would separate the Eastern from the Western Free States, for you observe that she with Delaware extends from the sea to the lakes. In that event, instead of one there would be two Free-State Republics; indeed, before the Yankees can lay the fell spirits they have raised by this wicked war upon us, they may be divided into a dozen petty powers, for their liberties are already gone, and they will be, both they and Lincoln, completely at the mercy of the first batch of successful generals that the fortunes of war may bring into their favour. Therefore, tell your countrymen from me to think twice, and look long at their sovereigns, before they touch either the loan, the bonds or the paper of that concern.

With the friendship and esteem of other days, my dear Admiral,

Yours truly, M. F. MAURY, C. Navy.
Admiral Robert FitzRoy, R.N., Meteorological Department, Board of Trade and Admiralty, London.

TURNER AND GIRTIN.

British Museum, Dec. 16, 1861.

Mr. Thornbury in his recently printed 'Life of Turner' states, in Vol. I. at page 101, "Mr. Chambers Hall purchased his fine collection of thirty-six Girtin drawings (which he afterwards left to the British Museum, where they lie buried); and at page 114, when quoting from an epitomist of Girtin's career, it is stated, "This fire destroyed many of Girtin's best works, and so scarce must we suppose these engravings of the Views of Paris to have become that the British Museum does not possess a copy." To this Mr. Thornbury appends the following gratuitous note, "This does not prove much."

May I be allowed, in reply to these observations, to inform the public through the medium of the *Athenæum* that the collection of Girtin's drawings given by the late Mr. Chambers Hall, though buried in the British Museum, is constantly exhumed at the request of those lovers of Art who seek to see it; and that the Print Room of that establishment possesses, and has done for some fifteen years, the series of Girtin's etchings of the Views in Paris, as also a set of the same plates aquatinted.

W. H. CARPENTER,
Keeper of the Prints and Drawings.

THE MAYER MANUSCRIPTS.

Liverpool, Dec. 13, 1861.

To reply to your rambling criticism upon my recent publication, would require talents of a very different order from any which I may possess, as I cannot meet railery and satire by corresponding abuse, and as I have to depend upon the translation of my ideas into a language whose idiom is so different to my own. I understand enough of your article to acquire the conviction, that it contains no critical investigation of the merits of a work, which can only be examined in a quiet and deliberate manner, and which cannot be disposed of, as you seem to imagine, in the flippant and off-hand style in which you may with impunity handle a third-rate novel; and as you have thought proper to occupy nearly half your article with your version of my antecedents, it will be as well for me in the

first place to challenge you to a proof of the matters which you allege against me as "certain," and which I once for all repel as utterly false. The little biography you have been pleased to draw up for me, is abridged from the account given in the late Mr. Sotheby's 'Principia Typographica,' and if, in alluding to statements made by you, I in any degree amplify your version, warrant will be found for so doing in the work referred to. If you have any curiosity to know the place of my birth, I may tell you that I was born in the town of Hydra, in the Island of Hydra, on the 11th of November, A.D. 1824. My father's family came from Stagira, my mother's from Syme: and if you think the authenticity of the Papyri which you have professed to review will be at all confirmed by the antiquity of the family of the individual who happened to unroll them, I shall be happy to furnish you with particulars of my genealogy, embracing on my father's side no less than thirty-seven bishops and archbishops. "The old gentleman," my late uncle, to whom you facetiously allude, was Benedict, the confidential adviser and spiritual father of John Capo-d'Istrias; and after his death, Superior of the Monastery St. Pantelemon (Rosicon), in Mount Athos; and inquiries made there, or of Gregorius, recently Patriarch of Constantinople, would convince you that he was not the unknown man you would have your readers imagine. So much for the not very important matter of my genealogy.

I now come to your charges. In reply to the first of these, I never produced at Athens, or elsewhere, any copy of Homer with the Commentary of Eustathius: the only MS. of that author I have ever shown is that now in the possession of Sir Thomas Phillips; and I have no doubt that gentleman will allow its collation for the purpose of ascertaining once and for ever, whether it contains "the text and errors of Wolf." That this is the copy alluded to, may be easily ascertained by a reference to No. 929 of the Athenian journal *Æon*, in which the meeting for the purpose of discussing this and other MSS. is reported. (A copy of this journal is in the possession of Sir Thomas Phillips.)

Secondly, I have the MS. of Sanconiaton, at my father's house in Syme. I did intend to publish it in Constantinople, and was only deterred by the expense of printing it in that city. I am now ready to publish it in London, if it be desired. Some of my enemies having declared in the Athenian journal *Pandora*, that a gentleman, who disbelieved in its existence, would give 10,000 drachms to see it, I inserted a notice in the *Elpis*, at Athens, and the *Telegraph of the Bosphorus*, at Constantinople, that if he would deposit in any Greek bank, 80,000 drachms, he might take 20,000 for his expenses, and come to Constantinople to see it, and that I would allow him a month for this purpose; but he has never appeared.

Thirdly, I did declare, and I now take the opportunity of repeating, that I have extremely important MSS. connected with hieroglyphics, viz., ten Books of *Horus* (commonly called *Horapollo*), including the two books already well known and often edited. These are written on papyrus; and I also possess a palimpsest copy of two of the same books, but of a different translation. Also the Dictionary of Chierimon,—Hieroglyphic, Demotic and Greek; and the work of Chenophis, which gives a philosophical explanation of the hieroglyphical characters.

Fourthly, I did publish in the *Telegraph of the Bosphorus* explanations of the hieroglyphics on some Egyptian figures, the property of M. Cayol and of Stephanus Caratheodori; these explanations I gave simply as a matter of friendship, and the latter gentleman made me a present of the figure I had examined, which, with the articles from the newspapers above mentioned, I have now with me. Whether the explanations given accord with the original can be ascertained by any of those gentlemen who accept the challenge which you will find at the conclusion of my letter. The history of this and most of the other charges which you have made is borrowed from the testimony of one Dr. Mordtmann, who is so freely quoted in the article by Mr. Sotheby before referred to. It will be well if you lay before your readers such information respecting this gentleman as will convince

them that he deserves the incontrovertible character for veracity which these quotations assume him to possess. It is on his authority that your next statement is founded, that "I did not exhibit some Cuneiform inscriptions in MS. with a transcript in Phœnician;" and it is further stated that his knowledge of the alphabets of these languages enabled him to decide that the MS. was not written in those characters at all. In reply to this, I can only say that Dr. Mordtmann did not at that time know anything of those languages, and, moreover, that the MS. in question is now in the library of Sir T. Phillips, and can bear its mute witness to the correctness of my original statement.

Fifthly, the *History of Armenia* alluded to is that of Cleobulus, written in the time of Justinian, a copy of which, of about the fourteenth century, I had in my possession in Constantinople, and showed to several of the Armenian residents. I published the Preface to this work, and also fac-similes of the inscriptions in Armenian and Greek which it contained. The latter were lithographed at the establishment of M. Cayol, and I have a copy of them by me. An inspection of these will show that the proper names are such as are to be easily met with as Armenian in the works of Strabo and Appian. Tigranes, son of Artaxius, Zariadres, &c., are familiar names of men; Tegrans-certa, Artaxata, Sophene, &c., of places: and there is no foundation whatever for the assertion, "that through my clumsiness they happen not to be Armenian."

Sixthly, your lively description of my "burrowing in the hole" would lose somewhat of its zest if your readers were informed that the hole was a deep well-like excavation, into which no one could enter but by a cord and a basket, and in which neither myself nor any of the gentlemen who witnessed the operations would have trusted ourselves. Much more was expected than the discovery of the MS. of the Koran referred to; but I had my own reasons for not wishing that all which I foresaw might come to light should fall into Turkish hands, and I discouraged further search by all the means in my power. M. Cayol published a long article on my discoveries at the house of Ismail Pacha, in the *Journal de Constantinople*. This will be found, I believe, under the date of August, 1857.

Seventhly, the next allegation is that the MS. exhibited to the Royal Society of Literature as Cuneiform and Greek, did not conform to the description I gave of it. As this is the same MS. to which you have already made allusion, I have only to repeat my assertion, that if any qualified scholar will inspect it in Sir Thomas Phillips's library, he will find that the Cuneiform characters are of exactly the same form as those hitherto discovered, and that the Phœnician (not Greek, as erroneously stated by you) interlineation is a translation of the Cuneiform, not to be despised by those who are endeavouring to read the inscriptions at Nineveh. I believe I have now touched upon all the phases of my history to which you have been pleased to allude. I have not space to enter here upon the question of the authenticity of Uranus, but it may as well be stated that I am prepared to meet any number of qualified scholars in London or elsewhere to discuss its authenticity and to hear any strictures they may wish to express.

The list of fragments of works written upon papyrus, and unrolled by me at Mr. Mayer's Museum, is correct. These papyri are all at Liverpool, and can be examined by those interested in the subject by a proper application to Mr. Mayer. Their number and importance is in your eyes a crime, which unfortunately it is not in my power to extenuate. That you should have come to an *a priori* decision that, from my presumed antecedents, they are not genuine, is an error which I think you will live to regret, and I am sure that those who are really interested in paleography will prefer the result of their own inspection to the *ipse dixit* of a writer who has never even seen what he writes of with so much confidence. It is to be regretted that you see no cause for thankfulness to God in the discovery of the earliest MSS. of the New Testament extant; and I fear Mr. Tischendorf came in for a share of your animadversions for the praise which he offered to God for his discovery of the 'Codex Sinaiticus.'

It is impossible here to discuss the question of the date of the portrait of St. Matthew or of the forms of the letters upon which you have pronounced so emphatic an opinion; these matters will receive the attention of scholars, who will perhaps devote to them a little more time, learning and research than you can be expected to afford, and it is possible that you may regret having taken so definite a position on grounds so slight. As however, you have assumed the post of instructor to the unlearned public, perhaps you will inform them in your next number on what authority you make the monstrous assertion, that "it may not be generally known, but is an undoubted fact, that no MSS. of any kind, if we except the Hieratic papyri, are known to ascend to the first or second centuries." What will your readers think when they are told that they have only to refer to Silvestre's *Palaéographie* to find that you have made the trifling error of half-a-dozen centuries, and that they may inspect in that work fac-similes of Greek MSS. on papyrus of as early a date as the third century before the Christian Era, viz. 1st. one of part of Dioscorides, second or third centuries B.C. 2nd. Fragments of Homer, &c. third century B.C. 3rd. A petition to Ptolemy, second century B.C. 4th. A musical treatise found at Herculaneum, first century B.C. 5th. A cursive MS. of the second century A.D. This gross and fundamental error may perhaps show on what sort of evidence you would crush out of existence documents which will nevertheless assert their right to critical investigation, and will hardly be pronounced spurious on the strength of your declamation, however impetuous.

I should have liked, had the space which I expect to be allotted been greater, to have touched on the last of your remarks; but I think I have said enough to show the public that your matter is not reliable: and I have now a word to add, in conclusion, as to your manner. This is intemperate, vindictive, unchristian. You adopt a scriptural euphemism to veil the name of *liar* which you seek to fasten upon me, and you present, as facts, to a public which has no means of checking your assertions, a mass of *ex parte* statements which I have easy means of controverting. This is not the temper in which to review a work, the sole object of which is to present to the English public fresh information on an all-important subject; and I should be sorry, though no one could be surprised, were I to reply in the same spirit.

Lastly, to bring to an issue the various questions concerning the Interpretation of Hieroglyphics and Cuneiform Letters which have been raised by you and by your contemporaries, I hereby challenge those who are learned in these matters to a public discussion of the subject in London at as early a period as can be arranged. Let any monument in the British Museum be selected, bearing inscriptions in either of these forms; and I will give, in writing, my interpretation of the same in the original languages and in Greek, with my authorities for such interpretation. Any committee of literary men who may be appointed shall also take the same inscription, and deal with it in the same manner, and the results of our investigation shall then be placed side by side before the public for their examination. An opportunity will thus be afforded for testing the real knowledge which is possessed upon these subjects, and those who believe me to have erroneous ideas will have the means of confuting me.

I beg to request your insertion of this letter in your journal of the 21st instant, and remain, Sir, your obedient servant,

C. SIMONIDES.

P.S.—Since my letter was written, I have seen, in the *Athenæum* of December the 14th, a letter from Mr. Stobart, in which that gentleman appears anxious to disclaim any previous property in the Greek MSS. which I have unrolled for Mr. Mayer. It was impossible that I should be able to speak from my own knowledge as to the sources from which Mr. Mayer obtained his papyri, and I was dependent upon his information; he was under the impression that all which were deposited in one case were purchased from Mr. Stobart, and all in another from Mr. Sams. As, however, no accurate distinction has been made, it is, probably,

almost impossible now to ascribe each papyrus to its original owner. Besides a considerable number of rolls which contain only Demotic characters, it will be remembered that I have unrolled two which contain Demotic writing and Greek translation, and three very large fragments of Hieratic writing only. It would puzzle Mr. Stobart or any other gentleman to tell, from the external appearance of a roll, in what language the *whole* of its contents would prove to be, as in very many instances several different documents are contained one within the other. There are several papyri not yet unrolled in Mr. Mayer's Museum, which may afford confirmation of my remarks.

* * To this note we have only one or two words to add. The facts about M. Simonides given in our article were published in Germany five or six years ago, and were not contradicted; they were reproduced in England two or three years ago, and were not then corrected. We treated these statements, therefore, as public property—gave them as we found them,—and our readers can now judge whether the attempt to qualify them has been successful in any material point. Last week we disposed of the misconception of our meaning about the age of ancient Manuscripts. We were speaking of the *fac-similes* of M. Simonides, and our words could have no other meaning than that no *such* Manuscripts are known to ascend so high as the first or second century. Dr. Mordtmann can defend himself; he is certainly one of the most learned men alive; and, as a linguist, has no rivals except Lord Strangford and Mr. Alison, our minister at Teheran. We will not affront him by a word in his defence against such an assailant. If M. Simonides is willing to exhibit his documents, in London, let him write to Mr. Norris, Secretary of the Royal Asiatic Society. We have no doubt the Society will give him a hearing, as the press has given him one.

OUR WEEKLY GOSSIP.

Rome, as we hear from that city, will be strongly represented at South Kensington in May, the Art Society there being all astir with life and preparation; from Saulini, who chips you a Medusa or a Hebe on a shell, to Tenerani, who strikes you a Jupiter from the rock. Among the English artists, Mr. Gibson stands alone in having no new work; he will be sufficiently represented by the sculptures already in England. His pupil, Miss Hosmer, will send a magnificent figure of Zenobia,—Mr. Cardwell will send two figures, Conquering Love and the Goddess Diana,—Mr. Shakespeare Wood, an Eleyne from a passage in the 'Idylls' and a Boy with a Trumpet,—Mr. Spence, a large group, the Finding of Moses, a work of many years, and a single figure, Jeannie Deans, a better companion to his celebrated 'Highland Mary' than the 'Lady of the Lake,' executed for Her Majesty,—Mr. Gatlley, a Lion Couchant and a huge Egyptian frieze, full of heroic figures,—Mr. Adams, the Walnut Player, a classical subject. Mr. Storey, an American gentleman, whose name will be better known to English readers as a writer than as an artist, is preparing two grand figures, an African Sibyl and a Cleopatra. These works will be sure to excite interest and controversy from their freedom, poetry and originality. Mr. Mozier, also an American, will send an Indian Girl at the Grave of her Lover, a Jephtha's Daughter, and a Prodigal Son. Signor Tenerani is engaged on a memorial of Castelfidardo; but whether the Roman Government will brave the epigrams of Europe by exposing the model of this monument in London is uncertain. The veteran sculptor will be better represented by some old work. Signor Saulini has a case of cameos ready—such as will make fair bosoms beat to glance at—and among the works in this artist's hands is a head of Ocean, from his own design, but so thoroughly antique in spirit that it looks like a lost work of Phidias. It cannot fail to be a favourite in Great Britain. Mr. Macpherson and Signor Cuccioni are busy with their cameras; and we shall have, with the old photographic favourites, views of many sites scarcely, if at all, known to the English tourist.

Mr. Macpherson is said to have made a great addition to his portfolio. These are good news from Rome.

The resolution to place all our historical State Papers under one roof in Fetter Lane, and under the one charge of Mr. Hardy, has been finally taken, and is on the point of completion. All documents of an earlier date than the accession of George III. will be transferred from St. James's Park to the new Record Office, where the calendarers will in future work, and where historical readers will have free access to the papers. Documents of a later date will be kept for convenience at Whitehall, where a couple of houses have been rented for them, and where Mr. Lechmere and Mr. Lemon will have charge of them.

During the Christmas Holidays Prof. Tyndall will deliver a course of six lectures on Light, adapted to a juvenile audience, at the Royal Institution. They will commence on the 26th and be continued on the 28th and 31st inst., and January 2nd, 4th and 7th.

The Members of the Numismatic Society have recently presented a testimonial to their President, W. S. W. Vaux, Esq., on the occasion of his marriage. The testimonial consists of a copy of Walton's Bible in nine volumes, a silver inkstand and a case for the books. The subscribers' names are inserted on a fly-leaf.

Drs. C. K. Ord and W. Macleod, of H.M. ships Hornet and Madagascar, have had awarded to each of them a Gold Medal, founded by the late Sir T. Blane, on the recommendation of the Director-General of the Naval Medical Department and the President of the Royal College of Surgeons of England.

Under the title of 'The Night-Flyers,' Messrs. Paul Jerrard & Son have produced a gift-book illustrative of the forms and habits of British Moths. The title is somewhat of a blunder, for the real Night-Flyers—the Nocturna—are comparatively few in number, and deficient in brilliancy and beauty. But the book—a pretty and showy one—will look gay on the Christmas table, even if it make a poor figure on the naturalist's shelves.

Messrs. Griffith & Farran publish as a Christmas book 'Spiritual Conceits,' extracted from the writings of the Fathers, the Old English Poets, &c., and illustrated by Mr. Harry Rogers,—a book for which we should have thought there would not be the smallest demand in these times. A hundred emblems of Christian life are, says the Preface, comprised in the volume. Mr. Rogers has illustrated them—most beautiful and holy many of them are—under what appears to us an entirely mistaken system, by adopting the clumsy, not to say coarse, manner of the emblematic art of the sixteenth and seventeenth centuries. The examples of Quarles' Emblems are of this order the most familiar to the public; but these have a humour, not irreverent, which is absent from Mr. Rogers's designs. To mistake directness of allusion for poetry and obvious incident for character were the dull characteristics of the style he would revive. Let us take but one example to see how he does his portion of duty. The Tree of Evil is seen with a serpent hanging out from its trunk against a butterfly: amongst the branches are human skulls in place of fruit. Is not this trite? Quaint, but dull in its coarse directness, is the representation of the Church endangered. By showing a cathedral (singularly like that of Salisbury) placed in a cock-boat upon a brisk sea, a dark rock in front, and a cross-bearing orb by way of buoy, he conveys the idea. Hearts, doves, butterflies, crowns, scythes, palms, serpents, masks, and all the cumbrous paraphernalia of trite allusion, are employed to rouse brains that must need hard knocks to wake them. The slow directness of the old pietist fancy loved an emblem and suspected a parable, forgetting who used the last. Such things pleased the people in old days, doubtless from an impression the emblem-dealing Church of Rome made upon the popular mind, and remaining even unsuspected, certainly unobliterated, for many years after the Reformation, may be seen in many ways of their life. In none more than in the emblemized books that have become curiosities rather than studies, such as this recent publication

attempts to revive. The book is notable as showing how the archaeology-loving spirit of the day turns to even the most sapless food.

On the question of an improved system of scientific nomenclature, we may give the following notes from our correspondence:—

"Bristol School of Chemistry.

"The system of chemical nomenclature having been recently adverted to in your pages, I would make one remark on those names assigned to complex organic compounds which seem so preposterous to the uninitiated, which are probably somewhat deterrent to the beginner, and which indeed require careful scanning before they can be quickly read aloud even by the experienced chemist. These would not look half so formidable if they were printed like other compounded words, that is, divided by hyphens into their separate elements as they have to be pronounced. Such names ("in linked sweetness long drawn out") as—Trimethyl-triethylethylenephosphammonium—succinylbisulphophenylbibenzamide—become intelligible, and can be read off at a glance, if separated into the simple words of which (in German fashion) they are built up; thus—trimethyl-triethyl-ethylene-phosph-ammonium—succinyl-bisulphophenyl-bibenzamide. Yours, &c., F. W. GRIFFIN."

Messrs. A. & C. Black, of Edinburgh, have purchased the copyright and stock of the late Mr. De Quincey's works.

A good reading or writing lamp has been made and published by M. Pillscher, optician, under the name of "The Queen's Lamp." The arrangements are simple, the appearance is picturesque. It is cheap and apparently durable,—burns common oil, without smell or smoke,—without offensive heat or drip, and emits a pure and steady white light. A reader has the advantage of increasing the light at pleasure, or throwing it on to his paper and shutting it off from his eyes.

The Committee of Art-Designs, which includes the names of the Marquis of Salisbury, Mr. M. Milnes, M.P., Mr. Maclean, R.A., Mr. Cole, C.B., and Mr. Digby Wyatt, are, we believe, about to throw open the class and seek aid from all owners of fine designs, be they private individuals, artists or manufacturers, and invite all possessors of drawings or models made by artists of the period (1762-1862) to which the Exhibition of Modern British Art extends, to communicate with their Secretary. It is much to be hoped that this class of Fine Art may meet with active co-operation, and that the original designs for well-known works will turn up. Works by such men as Flaxman, Stothard, Baily, Pitts, Soane and Pugin would have the greatest interest. Many beautiful things have been lost from the folios of a Rundell & Bridge, the model-room of a Wedgwood, the studio of a Bacon. Yet, with the aid of collectors, some of the best may still be recovered and preserved for posterity in accessible or at least in known places.

Letters from Florence report the death, in that city, of Dr. Southwood Smith, a writer well known by his 'Illustrations of the Divine Government,' and still better known by his earnest and continuous labours as a Sanitary Reformer. Dr. Smith had nearly completed his 74th year.

Mr. Massey will publish the fourth and concluding volume of his 'History of England during the Reign of George the Third' in the course of the ensuing spring.

Mr. Walcott wishes to explain, with reference to the omission of any notice of the detached bell-towers of Berkeley, Ledbury, Walton, &c., in his book on 'Church and Conventual Arrangement,' that the arrangement of parish churches did not enter into his design in that work.

We hear of a highly interesting literary discovery, the publication of which—near at hand—promises to create a sensation. It is nothing less than the second part of 'Candide,' and a comedy by Voltaire, which was acted at Madame Duchastellet's, and in which Voltaire himself performed a part. The genuineness of the manuscripts seems to have been established beyond a doubt by M. Octave Feuillet, Member of the Academy, and a

well-known writer of plays. This gentleman is in the possession of a collection of Voltaire's letters, from all periods of the great philosopher's life, and was enabled, therefore, to fix the year in which Voltaire wrote the play.

The disciples of Hegel, represented several years since by the *Jahrbücher der Wissenschaftlichen Kritik*, have once more a periodical organ, which bears the characteristic title, *Der Gedanke*. It emanates from the Philosophical Society of Berlin, founded by the leading Hegelians in 1843, but on account of serious obstacles, only commenced towards the end of last year. The celebrated Prof. Michelet is its editor, and it is conducted in a spirit of zealous propagandism, corresponding members being appointed in all parts of the world to report on the progress of German philosophy. Of late years the Hegelians have chiefly expressed their views through the medium of the *Zeitschrift für Philosophie und Philosophische Kritik*, a journal which, though belonging to the so-called Pseudo-Hegelian party, headed by Profs. J. H. Fichte, Weiser and Ulrici, is conducted on liberal principles, and is open even to adversaries who write in a courteous manner and avoid the peculiar form of polemics introduced by the late Herr Schopenhauer. Now they have an organ of their own, in which the "right" and "left" sections of the school may each manifest a voice.

The books and pamphlets, illustrative of the troubles under Charles the First, the Commonwealth and the Restoration, formed by the late Rev. Dr. Bandinel, so universally known by being Bodleian Librarian for so many years, were sold by auction at the rooms of Messrs. Sotheby & Wilkinson during the past week, producing nearly 1,000*l*. Amongst the many curious works dispersed on this occasion we must be contented with citing the following:—Prince Charles, his Letany and Prayers for the King, 2*l*. 15*s*.—Observations on Prince Rupert's White Dogge, called Boye, with other Tracts relating to the said Dog and the Prince's She-Monkey, 2*l*. 12*s*.—Earl of Bristol's Apologie, 1*l*. 11*s*.—Canterbury (Archbishop Laud), his Change of Diet, 1*l*. 16*s*.—Cavalier's New Common Prayer Book, 6*l*. 8*s*.—Collection of Pamphlets printed in the Years 1641–49, 40*l*.—Colchester's Teares, and twelve other curious Tracts relating to the Siege and Surrender of Colchester, 3*l*.—Cromwell's Declaration, &c., with the Broadside Proclamation of the Council nominating him Lord Protector, 5*l*. 5*s*.—Discours du bon et loial Sujet à la Reyne, with the Portraits, 15*l*.—A Series of the Proclamations issued by Charles I., 81*l*.—Cooper's History of the English Civil Wars in Verse, 13*l*.—Leycester's Civill Wars of England, 11*l*.—A Collection of Tracts respecting Archbishop Laud, 10*l*. 10*s*.—Archy's Dreame, and other Tracts, relating to Laud, 13*l*.—A Collection of Tracts written or published by the famous John Lilburne, 4*l*. 10*s*.—A curious Collection of Tracts, including E. Browne's Time well Spent, in which is to be found the last Will and Testament of Sir James Cambell, Knight, Senior Alderman of London, Citizen and Ironmonger, 12*l*. 5*s*.—Middleton's Civitatis Amor on Charles, in 1616, being created Prince of Wales, 3*l*. 8*s*.—England's Comfort and London's Joy in the Entertainment of King Charles at his Safe Return from Scotland, 10*l*. 15*s*.—Stirry's Rot among the Bishops, a Satire against Archbishop Laud, 8*l*.—A Collection of Tracts respecting the Trial and Execution of the Earl of Strafford, 9*l*. 15*s*.—The true Effigies of King Charles, Queen Mary and the Royall Progenie, a volume of extraordinary rarity, 99*l*.—Saltmarsh's Perfume against a Sulphurous Stinke, &c., 3*l*. 16*s*.

Closes Next Week.

HOLMAN HUNT'S Great Masterpiece of Sacred Art, "BEHOLD! I STAND AT THE DOOR AND KNOCK" (Rev. iii. 20), especially valuable as the highest and most complete expression of the genius of this eminent English Painter, is NOW ON VIEW at the GERMAN GALLERY, 108, New Bond Street, prior to its being returned to its private possessor, and final exclusion from public exhibition altogether.—Admission, Sixpence, from Ten to Five. A perfect light insured at all times.

SCIENCE

SOCIETIES.

ROYAL.—Dec. 12.—General Sabine, R.A., President, in the chair.—The following papers were

read:—'On a Series for Calculating the Ratio of the Circumference of a Circle to its Diameter,' by Mr. Clarkson.—'On the Production of Vibrations and Sounds by Electrolysis,' by Mr. Gore,—and 'On Perchloric Acid and its Hydrates,' by Mr. Roscoe.

BRITISH ARCHEOLOGICAL ASSOCIATION.—Dec. 11.—G. Godwin, V.P., in the chair.—J. Hardy, Esq., M.P., the Rev. J. B. Hughes and Mrs. Sotheby were elected Associates.—Mr. Pettigrew and Mr. Cuming made remarks on an inscribed Stone Axe found in the neighbourhood of Newark, Ohio, and considered the characters as produced by playfulness.—The Dean of Worcester forwarded the particulars of a discovery made at Worcester Cathedral, during the restorations on the north side of the chancel, by which a stone coffin had been brought to light containing the remains of a bishop, supposed to be *De Constantius*, of the twelfth century.—The Rev. Mr. Kell communicated an account of the discovery of curious Roman Remains in a cutting now in progress for a railway at Newport, Isle of Wight, which will, when completed, be arranged. The same gentleman also sent for exhibition a Medallion of the *Mater Dolorosa* and *Ecce Homo*, of Italian workmanship, of the early part of the eighteenth century, found at Netley Abbey; also a very minute gold Coin weighing 29½ grains, a quarter Philipus, of Gaulish coinage, found at Dover. Mr. Evans gave a description of this specimen, and stated that he possessed a half coin of the same, which was found at Margate.—Dr. Palmer sent a notice of the examination of a supposed Sepulchral Mound at Stanmore, Berks.—Mr. Dewe sent a bronze Celtic Dagger-blade, with one of the rivets remaining. It measured 7½ inches in length, and was found under a round barrow at Rowcroft, in the parish of Yotterdon.—Mr. Cecil Brent exhibited a bronze Celtic Spear-head, 6 inches long, in very fine preservation, found upon deepening the furrow of a water-wheel at Chartham Paper-mill, Kent.—Mr. Forman exhibited a large silver Bracelet, having for its centre the fine seal of Thomas Burton, Bishop of Sodor and Man, 1452–1480; the bracelet weighs 4 oz. 7 dwts.—Dr. Pridham sent a Canterbury Token of the sign of the Chequers so celebrated by Chaucer.—The Rev. Mr. Kell exhibited a Brass Tobacco-box of the seventeenth century, having engravings of the Virgin and Child, with a Dutch inscription. On the bottom is "S. Antonius Don Padua," with the infant Saviour.—Mr. Previtt exhibited a gold Venetian Zecchino, which had formed the decorations of the head of a Sepoy killed in the late Indian mutiny.—Dr. Palmer sent Roman Remains obtained from a Villa in Berkshire, belonging to Mr. H. Bunbury. The pottery was apparently from the Durobrivion Kilns. Horn Cores of the *Boa longirostris* were also found, and a Coin of Tetricus the Elder.—Mr. Solly exhibited two fine Miniatures of Prince Henry, eldest son of James the First. They were the work of Isaac Oliver. He also exhibited a Miniature in oil on copper of James Stuart, the Old Pretender, which was formerly in Dr. Mead's collection.—Mr. Tugall exhibited a minute Miniature of Charles the First.—Mr. Brent produced a Miniature of Charles the Second, set in a gold ring, a copy of Sir P. Lely's portrait in Bridewell Hall. The remainder of the evening was occupied in the reading of and discussions on a paper 'On Ogham Inscriptions,' by Mr. Pettigrew.

ARCHEOLOGICAL INSTITUTE.—Dec. 6.—Octavius Morgan, Esq., M.P., V.P., in the chair.—This being the first Meeting of another Session, Mr. Morgan opened the proceedings with a few observations on the satisfactory progress of the Society during the previous year, alluding to the series of special exhibitions which had been formed in London, the agreeable results of the Annual Meeting held at Peterborough, and the encouraging prospects for the ensuing year at Worcester, where it had been determined that the Congress in 1862 should be held. Mr. Morgan announced also the intention of forming for the London Meeting, in June next, a special Exhibition illustrative of the Art of Enamel and Niello, tracing its history in

all countries and periods.—A memoir, by Mr. G. Petrie, of Kirkwall, was read, describing the extensive chambers, of cruciform plan, discovered lately in the tumulus known as Maes How, in the Orkneys; and also of the numerous inscriptions in Rones, which are traced upon the massive slabs of which this curious structure is formed.—Lord Talbot de Malahide pointed out the striking analogy in the plan and structure of Maes How with that of certain chambered tumuli in Ireland, at New Grange, the Hill of Dowth, &c. In these, however, no inscriptions had been noticed.—Mr. Hewitt read a notice of some rare portions of armour, probably English.—Mr. Pritchett gave a short description of some examples of timbered houses in Sussex, on some of which he had traced inscriptions, dating as far back as the reign of Elizabeth. He also described some monumental slabs, of cast-iron, bearing epitaphs and ornaments in relief; these relics of the ancient iron-foundries in Sussex, where stone slabs were not readily procured, are chiefly of the beginning of the seventeenth century. Mr. Pritchett gave also an account of the bombard, a huge cannon formerly to be seen at Eridge, where it was annually fired on some rural festivity, and 5*s*. appropriated as a reward for bringing back the massive ball, which was thrown to a distance of about 800 yards. This curious piece of ancient artillery is no longer to be found.—Mr. Bloxham gave an account of a bronze helmet, which he sent for examination, found in 1854, by R. B. Oakley, Esq., in the river Tigris, near the line of the retreat of the 10,000 Greeks. It may, however, be a relic of the expedition of Alexander the Great and his conquest of Bactria, about B.C. 330.—Amongst other communications were, a 'Report on the recent Excavations at Wroxeter,' by Dr. Henry Johnson,—notice of a fine mural painting in St. Gregory's Church, Norwich, of which an admirable coloured drawing was exhibited, by Robert Fitch, Esq.,—and an account of recent discoveries at Stonehenge, and of an engraved symbol or device of unknown signification, noticed on one of the fallen impostes of the trilithons, by Dr. Tate.—Col. Lefroy exhibited a very singular bronze, supposed to be of Roman work, found in railway cuttings near Basingstoke.—Some curious objects connected with the early use of fire-arms were brought by Mr. Bernhard Smith, and a collection of family documents, some fine embroideries, ancient seals, &c., by Miss Harrington, of Worden.

MEETINGS FOR THE ENSUING WEEK.

THURS. Philological, & Royal Institution, 3.—'Light,' Juvenile Lecture, Prof. Tyndall.
SAT. Royal Institution, 3.—'Light,' Juvenile Lecture, Prof. Tyndall.

FINE ARTS

FINE-ART GOSSIP.—Many of the artists engaged upon the frescoes in the Houses of Parliament lament the injurious effect of the immense quantity and strong hues of the stained glass in the windows lighting their works. The pictures in the Commons Corridor and Royal Gallery are seriously affected by this architectonic extravagance. The designer must have wished to get as much coloured light as possible, excluding all pure daylight. Consequently, the paintings are badly seen, from the deficiency of light; and, what is even a greater evil than this, their colour is completely ruined by patches of brilliant tints, which travesty the intention of the painter in the most ridiculous manner. As each day progresses, bolts, bars, and oddly-shaped spaces of vivid light follow one another over the frescoes, to a result of chromatic bewilderment that is no less strange to see than annoying and discouraging to the painters. It is as difficult to comprehend why Sir Charles Barry darkened the interiors, as to discover anything like an architectural precedent for thus overcharging the windows with strong colour. No domestic buildings of the middle ages, and scarcely any of ecclesiastical character, were so loaded. The truly Gothic artists understood the function of stained glass in a far chaster spirit, and, even with unlimited means, used white glass where light alone was demanded; or, when window decoration seemed imperative, restricted them-

selves to grisaille in a far greater degree than Sir C. Barry did. We hope the latter means of decoration may be substituted for much that is really absurd and indefensible in his work. The architect's idea of colour must have been a peculiarly unfortunate one, as is felt by all who know that he actually had the whole of the interior stonework at Westminster painted of a bad drab,—to the ruin of the naturally fine tint of the stone, making it look like that of stucco, and destroying the clear sharpness of the carving.

The series of photographs from Turner's *Liber Studiorum*, published by Messrs. Cundall & Downes, would be more valuable if extended to embrace the whole number of seventy-one drawings made by the artist towards the one hundred of his original intention. Many more of these works are, we understand, in possession of the Trustees of the National Gallery than those already reproduced from the series at South Kensington. Is there any reason why the photographed *Liber* should not be completed for the benefit of the public and artists? Renewed examination of the series has strengthened our conviction that these marvellous works should be disseminated in the widest possible range. The publishers deserve credit for what they have done towards this end; and, aided by public authority, we hope they may complete the series in question.

The Dean and Chapter of St. Paul's have granted a site in the south aisle of their Cathedral for a statue of the late Bishop of London, to be erected after a design by Mr. G. Richmond.

New School-Rooms are building at Eton, in connexion with the College, at a cost of about 10,000*l*. By the end of next year they will be completed, as the first tangible instalment, let us hope, towards a thorough re-modelling of the great school.

MUSIC AND THE DRAMA

ROYAL ENGLISH OPERA, COVENT GARDEN.—Under the Management of Miss LOUISA PYNE and Mr. W. HARRISON. Unprecedented Combination of Attractions for the Christmas Holidays. **BALLET'S GREATEST SUCCESS**—the NEW OPERA and the NEW COMIC PANTOMIME.—On Box Night, THURSDAY, December 26, and following Evenings, will be presented the New and Original Grand Romantic Opera, in Three Acts, entitled *THE PURITAN'S DAUGHTER*. The Libretto by J. V. Bridgman. Supported by Miss Louisa Pyne, Miss Susan Pyne; Mr. Santley, Mr. H. Corri, Mr. George Honey, Mr. Patey, Mr. A. St. Albans, Mr. T. Distin, Mr. Wallworth, Mr. Eugene Dusek, Mr. C. Lyall and Mr. W. Harrison. Conductor, Mr. ALFRED MELLON.—After which will be produced (written expressly by J. V. Bridgman) a Grand Comic CHRISTMAS PANTOMIME, entitled *HARLEQUIN GULLIVER*; or, a Trip to Broodingmag, a Peep at Lilliput, and a Flying Visit to Laputa, with entirely new Tricks, Transformations, Decorations, Machinery, Dresses, new splendid Scenery, including the Grand Transformation Scene, by W. Cullott, which will be represented new and patent effects never before attempted on the stage. Gulliver, Mr. W. H. Payne; Mrs. Gulliver, Mr. F. Payne. Principal Dances, Mdlle. Lamoureux, supported by the Ladies of the Corps de Ballet. The Harlequinade sustained by the Eminent Pantomimists, Messrs. H. Payne, F. Payne, H. Lauri, E. Lauri, S. Lauri and Miss Jenny Lauri.

NOTICE.—A Morning Performance of the New Pantomime will take place on WEDNESDAY, January 1, and on every succeeding Wednesday till further notice, commencing at Two o'clock. Carriages to be in attendance at the following times:—Box Office, 10*o*. 6*d*. to 4*o*. 4*o*. Dress Circle, 5*o*.; Upper Boxes, 4*o*.; Amphitheatre Stalls, 3*o*.; Pit, 2*o*. 6*d*.; Amphitheatre, 1*o*. Box-office open daily from Ten till Five. Commence at Seven. Places booked without charge.

THE SISTERS MARCHISIO.—ST. JAMES'S HALL.—MR. LAND begs to announce an EVENING ORCHESTRAL CONCERT, on THURSDAY Jan. 2; also (for the convenience of suburban residents) a MORNING CONCERT, on SATURDAY, Jan. 4, when the celebrated Vocalists, Mdlle. Carlotta Marchisio (Soprano) and Mdlle. Barbara Marchisio (Contralto), will have the honour of making their first appearance in this country, assisted by Miss Arabella Goddard, Arthur Napoleon, M. Viout, tempo and other eminent Artists. Further particulars will be duly announced, to be obtained at Austin's Ticket-office, 23, Piccadilly; at Cranley, Beale & Wood's, 201, Regent Street; and at all the principal Music and Book Sellers.

MUSIC AT THE UNIVERSITIES.

We have received the following communications from the rival Universities, on the subject of Musical Professorships and the duties of those holding them:—

"Oxford.

"Is not the theory of music the fittest subject for the lectures of the Professor of Music at either University? This was the view of his duties taken by the late Dr. Crotch, most of whose lectures were, in fact, lessons on harmony. His classes were certainly attended by but few undergraduates, and eventually he gave them up. At the present day it is probable that a greater number would avail themselves of the opportunity of studying the grammar of music, though not of course one twentieth of those who so eagerly crowded the Sheldonian Theatre to hear the vocal illustrations of a lecture

which, however interesting, learned and well-written, is hardly adapted to the wants of students;—and should not the Professor's aim be the instruction of such? Murmurs may here seem ungracious when the small amount of musical nourishment supplied at the sister University is considered; but from Sir Frederick Ouseley's talents and zeal something more—at least something different—might be expected. His Inaugural Lectures were 'On the History of Music,' and he has since read papers of a more decidedly instructive character, 'On the Construction of the Organ'; 'On Form in Composition'; 'On Fugue Writing'; and 'On Instrumentation,' neither of much use to those who, as far as the lecturer knew, were unable to compose or write down the four parts of a chant. Such is not the normal method at the University. To the Professors of Greek, Latin, &c., it is needless to allude; but Chemistry, Botany, and even the French and some other modern languages are there taught, not merely lectured on agreeably. Could eight or ten young men, or even fewer, be gathered together each term at a lecture upon harmony, they might become afterwards a useful sprinkling of theorists in the large class of singing curates.

"Yours, &c.,

P. P."

We are hardly prepared to admit that the Professorship of an art which can only take an accessory place in academical studies, involves the necessity of giving elementary lessons, or that it would be possible under the circumstances to furnish more than the merest smattering of knowledge, to those who relied on such discourses for their musical education. A course of *solfeggi* would be as essential to the well-doing of singing curates "as the knowledge" how "to compose or write down the four parts of a chant." The second letter speaks for itself, and, we have no doubt, states the facts of the case correctly from the writer's point of view:—

"Cambridge.

"Allow me to correct a misapprehension that must arise in many or most of your readers from your remarks on Sir Frederick Ouseley's late visit to Cambridge. 1. The Lecture was not given to the University, but to a private Society, and therefore rather without than within the province of our own Professor; and it was only on that circumstance being distinctly understood that Sir Frederick himself, after much hesitation, consented to give his Lecture. 2. Away with 'sinecures' by all means; but is it generally known that our Musical Professorship is 'honorary' also? And how can the University expect to obtain from a non-resident, unpaid Professor what it never received when he was resident? Let the University take the initiative. Let it express real substantial interest in the matter, and our distinguished Professor will perform all duty that may be imposed upon him, and more. But while it can make new Chairs, and add new comforts to those in existence, all the while preserving to that of Music, and to that alone, the distinction of 'honorary' neglect, we can have no claim on services so plainly declined. 3. The fact is, that Prof. Bennett has already expressed his wish to give us lectures, but his preliminary question is, *where* are they to be given? He has received no answer at present. At Oxford the Professor of Music can assert his right to a local habitation; at Cambridge we can only give him a name.

"Allow me to add, that Prof. Bennett has refused scarcely one of many invitations he has received to conduct performances of the principal musical societies in Cambridge, sometimes accompanied by a strong auxiliary of professionals brought down at his own expense. This naturally makes us scrupulous about inviting him still more often, as we should wish. "De mortuis nil nisi bonum." Prof. Bennett has been far more mixed up with musical affairs in Cambridge than his *resident* predecessors. I am, &c., CANTOR."

With regard to the facts of the Musical Lecture given in Cambridge by the Oxford Professor, it must be recollected that our comment was on regret expressed in print by one who, it may be presumed, wrote from Cambridge.—It seems clear that some advantage of position, at least, must appertain to the Professorship of Music at

Cambridge, else it would hardly be accepted by any musician of distinction.

MUSICAL AND DRAMATIC GOSSIP.—This week has been one of mournful silence in London. The second performance of the 'Messiah,' by the *Sacred Harmonic Society*, to have been given last night, in which Mr. Haigh was to have sung the tenor music, did not take place.

The sixth of Herr Pauer's Selections of Piano-forte Music included a Sonata by Cherubini. The series (which was one of no ordinary interest) is to be repeated early in the year at Willis's Rooms.

At last week's performance of Gluck's 'Orpheus,' in Manchester, as concert-music, by Mr. C. Halle, Madame Sainton-Dolby took the principal part. This week *Mr. H. Leslie's Choir* was to go down there.

Our Glasgow friends of the *Choral Union* announce for New Year's Day a Sacred Morning and a Secular Evening Concert. The programmes of both are good: of the former, particularly so. The innovation (for such it may be called) of introducing instrumental symphonies into sacred concerts is to be approved; though the symphony selected—Beethoven's, in C—is more joyous in character than can be considered as in harmony with psalms and selections from oratorios. Mr. Lambeth's setting of the 'By the Waters of Babylon' is to be repeated.

'Les Recruteurs,' the new opera by M. Lefebvre Wély, produced a few days ago at the *Opéra Comique* of Paris, seems to have "missed fire."—Méhul's 'Joseph' (which as an opera we are unable to relish, in spite of its fame in foreign parts) is to be revived at the *Théâtre Lyrique*.

MISCELLANEA

Cambrian and Border Literature.—You were good enough some time since to call attention to my collection of Cambrian and Border County Literature; and also to my intention of publishing a Catalogue of the same. I have devoted the whole of my spare time in 1859, 1860 and 1861, to a compilation of the proposed work, and now have the satisfaction of saying that the full titles of *four thousand volumes* have been copied in manuscript; and that the whole of the duplicates, necessarily found in such a collection, have been weeded out and put aside for sale. I have been at work on this collection for twenty years, and my experience has shown what must, I think, be obvious to collectors, that next to "scarce works" the greatest difficulty lies in getting together Welsh Magazines, and in completing sets of them. I shall have to reprint some odd numbers of several to perfect sets, and before I do so I venture, in the interest of Literature, to suggest that some effort should at once be made to fix a clear and definite period down to which the collector may with something like satisfaction confine himself. With this view, I think it must be useful to have supplied through the press a concise list of defunct and existing Welsh Serials. And that collectors should then address themselves, through some committee, to publishers of existing works, asking them to close the running series of Serials at the end of 1862; commencing with January 1863 new and distinct series of their respective works. I have no doubt, but that this must be a wise thing to them in a commercial point of view, for it must act as a stimulant to two classes: the collector of the present day in making his collection perfect; the collector of the coming generation who, with a new literary period at his command, would be induced to buy all up, from a desire to get together perfect and complete sets of current literature. I write this letter with considerable diffidence; but I am so persuaded of the necessity for some such effort as that indicated, that I have ventured to ask you to lend your valuable aid in bringing it about.

E. R. G. SALISBURY.

Glas-Aber, Chester, Dec. 7, 1861.

TO CORRESPONDENTS.—A. R.—A. F. H.—E. T.—A. B.—H. R.—R. N. S.—M.—T. J. G.—J. E. S.—Felix—W. M.—J. H. B.—R. C. W.—received.

* At the moment of going to press, we have received, from the Author of 'Whitefriars,' a reply to Capt. Mayne Reid, on the subject of the 'Octoroon.' It is unavoidably postponed until next week.

WORKS ON SCIENCE.

Vol. I. New Series, with Plates, 8vo. cloth, 17s.

The JOURNAL of MICROSCOPICAL SCIENCE. Edited by EDWIN LANKESTER, M.D. F.R.S., and JOHN BUSK, F.R.O.S. F.R.S.

*. No. V., being the First Number of the Second Volume, will be published on the 1st of January, 1862.

With nearly 1,300 Engravings on Wood, fcap. 8vo. cloth, 12s. 6d.

A MANUAL of BOTANY. By Robert Bentley, F.L.S., Professor of Botany, King's College, and to the Pharmaceutical Society.

Second Edition, with 378 Engravings on Wood, fcap. 8vo. cloth, 12s. 6d.

The MICROSCOPE and its REVELATIONS.

By W. B. CARPENTER, M.D. F.R.S., Registrar to the University of London.

By the same Author, Fourth Edition, with numerous Engravings on Wood, 8vo. cloth, 24s.

COMPARATIVE PHYSIOLOGY.

Eleventh Edition, Illustrated, post 8vo. cloth, 7s. 6d.

VESTIGES of the NATURAL HISTORY of CREATION.

Eighth Edition, carefully revised, fcap. 8vo. cloth, 12s. 6d.

FOWNES' MANUAL of CHEMISTRY. Edited

by H. BENCE JONES, M.D. F.R.S., and A. W. HOFMANN, Ph.D. F.R.S.

8vo. cloth, 14s.

The GENEALOGY of CREATION, newly

Translated from the Unpointed Hebrew Text of the Book of Genesis: showing the general Scientific Accuracy of the Cosmogony of Moses and the Philosophy of Creation. By HENRY F. A. PRATT, M.D.

8vo. cloth, 2s. 10s.

An EXPOSITORY LEXICON of the TERMS,

ANCIENT and MODERN, in MEDICAL and GENERAL SCIENCE: including a Complete Medical and Medico-Legal Vocabulary, and presenting the Correct Pronunciation, Derivation, Definition and Explanation of the Names, Analogues, Synonyms and Phrases in English, Latin, Greek, French and German, employed in Science and connected with Medicine. By R. G. MAYNE, M.D.

FRESENIUS' CHEMICAL ANALYSIS.

Edited by LLOYD BULLOCK, F.C.S.

QUALITATIVE. Fifth Edition. 8vo. cloth, 9s.

QUANTITATIVE. Third Edition. 8vo. cloth, 16s.

Third Edition, fcap. 8vo. cloth, 5s.

The FIRST STEP in CHEMISTRY. By

ROBERT GALLOWAY, F.C.S., Professor of Practical Chemistry in the Museum of Irish Industry.

By the same Author, Third Edition, post 8vo. cloth, 5s.

A MANUAL of QUALITATIVE ANALYSIS.

By the same Author, on Five large Sheets, Second Edition, 4s. 6d.

CHEMICAL TABLES for SCHOOLS and LECTURE ROOMS.

Second Edition, crown 8vo. cloth, 3s. 6d.

The OPHTHALMOSCOPE: an Essay on its

Value in the Exploration of Internal Eye Diseases. By JABEZ HOGG, M.R.C.S., Assistant-Surgeon to the Royal Westminster Ophthalmic Hospital.

Third Edition, 1,250 pages, 8vo. cloth, 36s.

The CYCLOPÆDIA of PRACTICAL RE-

CEIPTS, and COLLATERAL INFORMATION in the ARTS, PROFESSIONS, MANUFACTURES and TRADES. By ARNOLD J. COOLEY.

Fcap. 8vo. 2s.

The EASTERN, or TURKISH BATH: its History, Revival in Britain, and Application to the Purposes of Health. By ERASMUS WILSON, F.R.S.

With an Iso-Thermal Chart, post 8vo. cloth, 12s.

MEDICAL CLIMATOLOGY; or, a Topographical and Meteorological Description of the Localities Resorted to in Winter and Summer by Invalids of Various Classes, both at Home and Abroad. By R. E. SCORESBY-JACKSON, M.D. F.R.S.E.

Post 8vo. cloth, 3s. 6d.

MENTONE and the RIVIERA as a WINTER

RESIDENCE. By J. HENRY BENNET, M.D.

Third Edition, post 8vo. cloth, 7s.

The CLIMATE of PAU; with a Description

of the Watering Places of the Pyrenees, and of the Virtues of their respective Mineral Sources in Disease. By ALEXANDER TAYLOR, M.D., F.R.S.E.

Post 8vo. cloth, 5s.

TORQUAY in its MEDICAL ASPECT as a

RESORT for PULMONARY INVALIDS. By C. RADCLIFFE HALL, M.D., Physician to the Torquay Hospital for Consumption.

Second Edition, much enlarged, 8vo. cloth, 20s.

INFLUENCE of TROPICAL CLIMATES in

PRODUCING the ACUTE ENDEMIC DISEASES of EUROPEANS; including Practical Observations on their Chronic Sequelæ under the Influences of the Climate of Europe. By SIR RANALD MARTIN, K.C.B. F.R.S., Physician to the Council of India.

With Fifty Engravings on Wood, post 8vo. cloth, 6s. 6d.

PHOTOGRAPHIC MANIPULATION: treat-

ing of the Practice of the Art, and its Various Appliances to Nature. By LAKE PRICE, Esq.

Sixth Edition, with Engravings, fcap. 8vo. cloth, 7s. 6d.

PHOTOGRAPHIC CHEMISTRY, including

the PRACTICE of the COLLODION PROCESS. By T. FREDERICK HARDWICH, late Lecturer on Photography at King's College, London.

Fifth Edition, with numerous Engravings on Wood, fcap. 8vo. cloth, 12s. 6d.

ELEMENTS of NATURAL PHILOSOPHY;

being an EXPERIMENTAL INTRODUCTION to the STUDY of the PHYSICAL SCIENCES. By GOLDING BIRD, M.D. F.R.S., and CHARLES BROOKE, F.R.S.

Second Edition, 18mo. cloth, 6s.

The BOOK of PRESCRIPTIONS: containing

3,000 Prescriptions, collected from the Practice of the most eminent Physicians and Surgeons, English and Foreign. By HENRY BEASLEY.

By the same Author, Fifth Edition, 18mo. cloth, 6s.

The DRUGGIST'S GENERAL RECEIPT-

BOOK: Comprising a Copious Veterinary Formulary and Table of Veterinary Materia Medica; Patent and Proprietary Medicines, Druggists' Nostrums; Perfumery, Cosmetics; Beverages, Dietetic Articles, and Condiments; Trade Chemicals, Miscellaneous Preparations and Compounds used in the Arts.

Fcap. 8vo. 2s. 6d.

A CATECHISM of the PHYSIOLOGY and

PHILOSOPHY of BODY, SENSE and MIND. For Use in Schools and Colleges. By WHARTON JONES, F.R.S.

With numerous Illustrations, Third Edition, fcap. 8vo. cloth, 6s. 6d.

PRACTICAL CHEMISTRY, including ANA-

LYSIS. By JOHN E. BOWMAN. Edited by CHARLES L. BLOXAM, Professor of Practical Chemistry in King's College, London.

Post 8vo. 1s. 6d.

HOMŒOPATHY: a Rejoinder to the Replies

to Sir B. Brodie's Letter to 'Fraser's Magazine.' Supplementary to the Fourth Edition of 'Homœopathy and Hydropathy Impartially Appreciated.' By EDWIN LEE, M.D.

Fcap. 8vo. cloth, 6s.

The CHEMISTRY of WINE. By J. C. Mulder,

Professor of Chemistry in the University of Utrecht. Edited by H. BENCE JONES, M.D. F.R.S.

Contents.

On the Grape—On the Fermentation of Grape Juice—On Clearing—On Cellaring—On the Diseases of Wine—On the Constituents—On the Amount of Alcohol—On the Colouring Matters—On the Fatty Matter—On the Free Acids—On the Albuminous Matter—On the Ammonia or Ammoniacal Salts in Wine—On the Sugar in Wine—On the Odoriferous Constituents—On the Analysis—On Tests—On Adulteration—On Fruit Wines.

JOHN CHURCHILL, NEW BURLINGTON-STREET.

BOOSEY'S MUSICAL CABINET: A SHILLING LIBRARY OF POPULAR MUSIC.

1. Twenty Songs by Mendelssohn, 1s.
2. Twenty Songs by Balfe, 1s.
3. Fourteen Songs by Verdi, 1s.
4. Twenty Christy's Minstrel's Songs (1st selection), 1s.
5. Fifty Popular Waltzes, 1s.
6. Twelve Sets of Quadrilles, 1s.
7. Fifty Polkas and Galops, 1s.
8. Twenty-five Gems by Verdi, for Pianoforte, 1s.

EVANS'S ENGLISH HARMONIUMS for Cottages, Schools, Drawing-Rooms, Churches, Literary and other Public Institutions, are made in every possible variety at Prices from 6 to 140 Guineas. The Manufacturers have to announce the complete success of a New Patent Self-Acting Blowing Machine, the only self-acting blower that has ever succeeded, which may be seen in operation at Holles-street.

The most distinguished living Musicians, including Balfe, Sterndale Bennett, Cipriani Potter, Best, Henry Smart, &c., have testified to the extraordinary merits of Evans's Harmoniums. See Testimonials attached to Illustrated Catalogues of Harmoniums, to be had gratis of the Manufacturers, Boosey & Ching, 24, Holles-street, London, W.

EVANS'S ENGLISH MODEL HARMONIUM, with Two Rows of Keys, price 60 Guineas in Oak Case, or 70 Guineas in Rosewood Case, combines every modern improvement. The most beautiful and varied orchestral effects can be produced upon this Instrument, which possesses every gradation of tone from the greatest power to the most delicate Pianoissimo. The English Model Harmonium is managed with that facility which characterizes all Evans's Harmoniums, and is equally effective both in the Drawing-room and Church.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

EVANS'S PEDAL HARMONIUMS, with Independent Pedal Reeds, can be had either with a Single or Double Row of Keys, at Prices from 51l. to 130 Guineas. Also, with the New Patent Self-Acting Blowing Machine.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

Missionary at Old Calabar.

Crown 8vo. 3s. 6d.

CONSOLATION.

By the Rev. JAMES W. ALEXANDER, D.D.
Edinburgh: Andrew Elliot. London: Hamilton, Adams & Co.

PAINTING IN WATER COLOUR:
The Theory and Practice of the English School.

By AARON PENLEY.

This work, alike invaluable to teacher and student, also addresses itself in a remarkable degree to those who, having gone through the usual course of teaching, desire to advance themselves to the perfect practice of the Art, whether as an elegant accomplishment, or as a means of professional livelihood: it treats from the first holding of a brush through a course of study of the most analytical and extended kind, up to the highly-finished landscape, with all the sentiment and poetry of effect that can be conceived and realized by an accomplished master-mind, directing a cultivated brush. The author of the work has enjoyed for a long term of years the reputation of being one of the most eminent English Water-colour Painters; he has imparted instruction in the Art for 37 years to the noblest families in the kingdom, and has held, and still holds, high appointments under Government as Professor of Water-colour Painting. The Work contains 44 full-size Studies in Fac-simile, by Chromo-lithography, of the original Water-colour Drawings, 35 Specimens of Compound Tints, and 140 pages of instructive and descriptive Text: the whole got up in the best style, full-size folio, so as to form the handsomest Drawing-room Table Book of the season, as well as a work of inexhaustible and never-ending usefulness. Only a small Edition will be ready.

London: Day & Son, Lithographers to the Queen, No. 6, Gato-street, Lincoln's Inn-fields.

EMILY FAITHFULL & CO.

"The Museum of Science and Art" is the most valuable contribution that has ever been made to the scientific instruction of every class of society."

Str David Brewster, in the North British Review.

GUESSES AT TRUTH. By TWO

BROTHERS. Fifth Edition. Small 8vo. 10s. 6d. cloth, red edges.

"Various, however, as are the matters discussed or touched on in the following pages, I would fain hope that one spirit will be felt to breathe through them. It would be a delightful reward, if they may help the young, in this age of the Confusion of Thoughts, to discern some of those principles which infuse strength and order into men's hearts and minds. Above all, I would desire to suggest to my readers, how in all things, small as well as great, profane as well as sacred, it behoves us to keep our eyes fixt on the Star which led the Wise men of old, and by which alone can any wisdom be guided, from whatsoever part of the intellectual globe, to a place where it will rejoice with exceeding great joy."

J. C. H.—From the Preface.

LARDNER'S HANDBOOK OF

ASTRONOMY. A New and Revised Edition, brought down to the Present Time. By EDWIN DUNKIN, F.R.A.S., of the Royal Observatory, Greenwich. Complete in 1 vol. with 35 Plates and 105 Woodcuts, small 8vo. 7s. 6d.

SOPHY. By Dr. LARDNER. 1,234 Illustrations, complete—4 vols. 30s. Sold separately as under:—

MECHANICS. With 257 Illustrations. 1 vol. 5s.

HYDROSTATICS, PNEUMATICS and HEAT. 202 Illustrations. 1 vol. 5s.

OPTICS. With 290 Illustrations. 1 vol. 5s.

ELECTRICITY, MAGNETISM and ACOUSTICS. 305 Illustrations. 1 vol. 5s.

LIEBIG'S FAMILIAR LETTERS

on CHEMISTRY, in its RELATIONS to PHYSIOLOGY, DIETETICS, AGRICULTURE, COMMERCE and POLITICAL ECONOMY. Fourth Edition, 7s. 6d.

"This work of Baron Liebig is one of those books from which the mind desiring healthy philosophical instruction can receive it, in a most pleasant and yet most perfect form. There is no necessity for an acquaintance with all the intricacies of scientific nomenclature and terminology; with a moderate amount of chemical knowledge as a basis, no man of ordinary intellect will rise from the perusal of these 'Letters' without the feeling that he has partaken of a wholesome intellectual feast."

British Medical Journal.

1 vol. 233 Illustrations, 5s. cloth.

COMMON THINGS EXPLAINED.

By Dr. LARDNER. Containing Air, Earth, Fire, Water, Time, the Almanack, Clocks and Watches, Spectacles, Colour, Kaleidoscope, Pumps, Man, the Eye, the Printing-Press, the Potter's Art, Locomotion and Transport, the Surface of the Earth, or First Notions of Geography.

NEW ATLASES by WILLIAM HUGHES, F.R.G.S.
 Just published, Imperial 8vo. handsomely bound in cloth,
 price 10s. 6d.

PHILIP'S SCHOOL ATLAS of PHYSICAL
GEOGRAPHY, comprising a Series of Maps and Diagrams
 in illustration of the Features, Climate, Various Productions and
 Chief Natural Phenomena of the Globe.
 Edited by W. HUGHES, F.R.G.S.
 And designed as a Companion to Hughes's 'Class-book of Physical
 Geography.'

Lately issued, New and Enlarged Edition, medium folio,
 price 15s. bound in cloth.

THE TRAINING-SCHOOL ATLAS.
 By W. HUGHES, F.R.G.S.

The Training-School Atlas consists of a series of Maps (Sixteen
 in number) designed to illustrate, on a scale of large size, and in a
 strictly clear and methodical manner, the leading features in
 Physical Geography:—1st, Of the World at large; 2ndly, Of the
 Great Divisions of the Globe (Europe, &c.); 3rdly, Of the British
 Islands; and, lastly, Of the Holy Land. The political divisions
 of the earth at the present time are embodied upon the information
 thus afforded, but in such a manner as not to interfere with its
 clear and distinct exposition.

London: George Philip & Son, 32, Fleet-street; and Carlton-
 buildings, Liverpool.

 morocco.

BUNYAN'S PILGRIM'S PROGRESS.
 New Edition, with a Memoir, by J. M. HARE. The
 Allegory illustrated with Outline Engravings, drawn by J. R.
 Clayton; and the Biographical Sketch illustrated with Engravings
 of interesting Relics and Recollections of Bunyan, from Drawings
 by J. L. Williams.

"This edition is one of remarkable excellence. It is hand-
 somely got up, and very cheap. But its principal charm lies in
 its beautiful outline engravings, which are extremely elegant,
 appropriate, and classical. We strongly recommend this as the
 best and most useful family edition of 'The Pilgrim's Progress'
 with which we are acquainted."—*Constitutional Pulpit*.
 London: Simpkin, Marshall & Co.

SHAKESPEARE, 1623.

Now ready,

PART I, CONTAINING the WHOLE of the COMEDIES, price 10s. 6d., in appropriate binding.
A FAC-SIMILE REPRINT of the FIRST EDITION of SHAKESPEARE; "the famous Folio of 1623."

In the production of this reprint the endeavour has been that as regards general appearance, the contents, and the peculiarities of each page, it may be truly said:—

"One man and another
Not more resembles"

than it the original; alteration being alone in respect to size, so that it may be placed uniformly on the shelves with all good library editions of the Poet.

To be completed in Three Parts, each at the same price. There will also be printed in royal 8vo. a full and complete edition of the Poet. A very limited edition of each Play that was printed before the Folio of 1623 will be published separately, to match with those "Early Quartos."

L. Booth, 307, Regent-street, W.

DR. PROSSER JAMES ON THE THROAT.

NEW WORK BY THE AUTHOR OF 'SELF-HELP.'

Now ready, with 5 Portraits and 200 Illustrations, Vols. I. and II. 8vo. 42s.

LIVES OF THE ENGINEERS; WITH AN ACCOUNT OF THEIR PRINCIPAL WORKS, and A HISTORY OF INLAND COMMUNICATION IN BRITAIN.

By SAMUEL SMILES,
Author of 'Life of Stephenson,' &c.

"Mr. Smiles may fairly claim the merit of having produced one of the most interesting and instructive works. He has discovered almost unbroken ground, and has worked it with so much skill and success, that his readers will recognize in his volumes an illustration of the truth of Lord Macaulay's saying, that history, personal or national, may, when properly written, be rendered as interesting as any novel."—*London Review*.

JOHN MURRAY, Albemarle-street.

NOTICE.—'THE SEVEN SONS OF MAMMON,' by GEORGE AUGUSTUS SALA, Author of 'William Hogarth,' 'Dutch Pictures,' &c., in 3 vols., is now ready at every Library.

Now ready, price 5s.

DUTCH PICTURES:

With SOME SKETCHES in the FLEMISH MANNER.

By GEORGE AUGUSTUS SALA,

Author of 'Seven Sons of Mammon,' 'Twice Round the Clock,' &c.

"There is a genuine air of homespun earnestness about such a picture as the following, which, though it might have been written by Dickens, has more in it of Mr. Sala's personal bias."—*Spectator*.

London: TINSLEY BROTHERS, 18, Catherine-street.

Now ready, at every Library, in 2 vols. price 12s.

THE SELF-DIVORCED;

Or, THE SCHOOL FOR WIVES.

By Capt. CURLING,

Author of 'The Soldier of Fortune,' &c.

Ready this day,

THE CORNHILL MAGAZINE.

(Published on the 1st of January, April, July and October.)

THE BRITISH QUARTERLY REVIEW has acquired for itself a permanent place as an organ of public opinion in this country and in our Colonies.

The recent cheapening of Newspapers, and of Periodical Literature generally, has made it more than ever expedient that the less hurried and less fragmentary criticism proper to a Quarterly Review should hold its position among us.

THE BRITISH QUARTERLY is Liberal in its politics, and impartial in its estimate of current publications. In regard to Religion, it is in harmony with the faith of Bishop Butler and Dr. Chalmers, of John Howe and Robert Hall; and it stands alone among the Quarterlies in enunciating that this faith should be left to benefit the world purely by means of its own spiritual power.

The questions with which this Journal deals are eminently the questions of the age; the men who so regard them exist as powerful organizations in England and in Scotland; and they are prepared, it is believed, to give increased strength to an agency devoted to such ends.

No. LXIX. JANUARY, 1862.

CONTENTS.

NEW ILLUSTRATED GIFT BOOKS

PUBLISHED BY

GRIFFITH & FARRAN.

Beautifully printed by Whittingham in Old English Letter, with Borders and Initials in Red, square 8vo.
 price 21s. cloth elegant; 27s. calf extra; 31s. 6d. morocco antique,

Spiritual Conceits

Extracted from the Writings of the Fathers, the Old English Poets, &c.

WITH ONE HUNDRED EMBLEMATICAL ILLUSTRATIONS.

By W. HARRY ROGERS.

"There is more thought in this beautiful book than is seen at a glance. The central emblem on its singularly elegant cover is of cross and crown; its central thought is that through struggle against evil we attain to good. . . . Apart from its meaning, nearly every drawing pleases the eye as a choice ornament by the arrangement of its lines and shadows. . . . Printed throughout in black letter, with red initial letters, it is by far the most complete and beautiful specimen of modern black letter we have ever seen."—*Examiner*.

"The illustrations, in the broad bold style of the Albert Dürer school, are from the graceful hand of Mr. Rogers himself, and leave one in doubt which more highly to estimate—the fertility of his imagination, or the facility of his execution."—*Morning Post*.

The Wisdom of Solomon.

From the Book of Proverbs. Every page richly illuminated in Gold and Colours from Designs by SAMUEL STANESBY. With a Photographic Group of the Queen of Sheba before Solomon, from a Statuette by Beattie. Small 4to. price 14s. cloth elegant; 18s. calf extra; 21s. Turkey morocco antique.

"Solomon's pearls are here adorned with settings worthy of them." For old or young this ought to prove a welcome gift-book."—*Art-Journal*.

"A brilliant specimen of the pitch to which printing and illumination can be brought. It is in every respect superb."—*Illustrated London News*.

NEW ILLUSTRATED WORKS FOR THE YOUNG.

WALPOLE'S ANECDOTES OF PAINTING IN ENGLAND;

WITH SOME ACCOUNT OF THE PRINCIPAL ENGLISH ARTISTS,

And INCIDENTAL NOTICES of

SCULPTORS, CARVERS, ENAMELLERS, ARCHITECTS, MEDALLISTS, &c.

ALSO,

A CATALOGUE of ENGRAVERS Who have been born or resided in England.

WITH ADDITIONS

By the Rev. JAMES DALLAWAY.

New Edition, revised, with Additional Notes
 By RALPH N. WORNUM, Esq.
 Complete in 3 vols.

With upwards of 150 Portraits and Plates,

* * As it would be inconvenient to sell these three volumes separately, they are, contrary to the usual practice in serials, published together.

HENRY G. BOHN, York-street, Covent-garden, London, W.C.

Now ready, price 5s. cloth.

THE HISTORY OF SHORTHAND WRITING. By MATTHIAS LEVY, Shorthand Writer. To which is prefixed, the System used by the Author. Trübner & Co. Paternoster-row.

PAUL JERRARD & SON'S NEW GIFT-BOOK FOR CHRISTMAS AND ALL SEASONS, Price 31s. 6d.

THE NIGHT-FLYERS; Intended as a companion volume to 'Butterflies in their Floral Homes,' by the same Author. The habits and haunts of the Night-flying Moths are illustrated and described in this work as those of their cousins, the Butterflies, were in the previous volume. An entirely novel feature will distinguish the present volume, in those Plates which represent portions of woods and glades by night, in which the Moths are seen sporting among the foliage, in the half light of the moon or twilight.

In a handsome and novel cover, introduced especially for this elegant Gift-Book without regard to cost.
London: Paul Jerrard & Son, 170, Fleet-street.

SIR EDWARD BULWER LYTTON'S NEW SERIAL,
A STRANGE STORY,

Will be completed in March, when

A NEW NOVEL BY MR. WILKIE COLLINS

Will be commenced.

Published in Weekly Numbers, price 2d., also in Monthly Parts and Half-Yearly Volumes, at 26, Wellington-street, Strand, W.C.; and by Messrs. CHAPMAN & HALL, 193, Piccadilly, W.

EQUITABLE ASSURANCE OFFICE,

NEW BRIDGE-STREET, BLACKFRIARS.

ESTABLISHED 1762.

DIRECTORS.

THE RIGHT HON. LORD TREDEGAR, President.

William Dacres Adams, Esq.
Philip Hardwick, Esq.
William Samuel Jones, Esq.
John Aildin Moore, Esq.
William Frederick Pollock, Esq.

Charles Pott, Esq.
Rev. John Russell, D.D.
James Spicer, Esq.
John Charles Templer, Esq.
Right Hon. Lord Tredegar.

John Charles Burgoyne, Esq.
Lord George Henry Cavendish, M.P.
Frederick Cowper, Esq.
Richard Gosling, Esq.
Peter Martineau, Esq.

THE EQUITABLE is an entirely MUTUAL OFFICE. The reserve, at the last "rest," in December, 1859, exceeded three-fourths of a million sterling, a sum MORE THAN DOUBLE the corresponding fund of any similar Institution. The Bonuses paid on Claims in the Ten Years ending on the 31st December, 1859, exceeded **Three Millions and a Half**, being more than 100 per Cent. on the amount of all those Claims.

The amount added at the close of that decade to the Policies existing on the 1st January, 1860, was **£1,977,000**, and made, with former additions then outstanding, a total of **£4,070,000**, on Assurances originally taken out for **£6,252,000** only.

These additions have increased the Claims allowed and paid under those policies since the 1st January, 1860, to the extent of 150 per Cent.

The Capital at this time consists of

- £2,730,000**—Stock in the Public Funds.
£3,006,297—Cash lent on Mortgages of Freehold Estates.
£300,000—Cash advanced on Railway Debentures.
£83,590—Cash advanced on security of the Policies of Members of the Society.

Producing annually, **£221,482**.The total Income exceeds **£400,000** per Annum.

POLICIES effected in the current year (1861) will participate in the distribution of Profits made in December, 1859, so soon as Six Annual Premiums shall have become due and been paid thereon; and, in the Division of 1869, will be entitled to additions in respect of every Premium paid upon them from the year 1862 to 1869, each inclusive.

On the surrender of Policies, the full value is paid, without any deduction; and the Directors will advance nine-tenths of that value as a temporary accommodation, on the deposit of a Policy.

No extra Premium is charged for service in any Volunteer Corps within the United Kingdom, during peace or war. A Weekly Court of Directors is held every Wednesday, from 11 to 1 o'clock, to receive Proposals for New Assurances; and a Short Account of the Society may be had on application personally, or by post, from the Office, where attendance is given daily, from TEN to FOUR o'clock.

ARTHUR MORGAN, Actuary.

J. H. DALLMEYER (Son-in-Law and Pupil of the late ANDREW ROSS)
Respectfully begs to inform the Scientific Public that he exclusively manufactures the ASTRONOMICAL TELESCOPE according to A. R.'s processes, who has also bequeathed to him the whole of that faculty.
For particulars of J. H. D.'s recent IMPROVEMENTS in MICROSCOPIC OBJECT-GLASSES, PHOTOGRAPHIC LENSES, &c. see Catalogue, which may be had on application at 19, BLOOMSBURY-STREET, Oxford-street, W.C.

SMITH, BECK & BECK,

OPTICIANS,

AND

MANUFACTURERS OF ACHROMATIC
MICROSCOPES,
&c. &c.

6, COLEMAN-STREET, London, E.C.,

AND

LISTER WORKS, HOLLOWAY.

WENHAM'S**BINOCULAR MICROSCOPE.**

Having increased our facilities for the manufacture of the Prisms, as well as the other parts of this important improvement in the Microscope, we are now enabled to make the addition to any Microscope, when it is really practicable, at the cost of 7l. 10s. In the case of new Instruments, the extra price will be only 6l.

SMITH, BECK & BECK.

September, 1861.

CATALOGUES, giving full particulars respecting Microscopes, Stereoscopes, &c., may be had on application, or sent post free.

NORTH BRITISH INSURANCE COMPANY.

Head Office—64, Princes-street, Edinburgh.

London Office—4, New Bank-buildings, Lothbury.

LIFE DEPARTMENT.

Policies opened before 31st December will be entitled at next Distribution of Profits, in 1865, to rank for five years' bonus.

PROGRESS OF BUSINESS.

	Policies.	Sums Assured.
For five years, from 1853 to 1857 inclusive, the annual average was	307	£276,948
In 1858, the Policies issued	435	577,435
1859 " "	802	449,913
1860 " "	741	475,649

This increase in the business of the Company will, it is expected, beneficially affect the Bonus to be declared at next Division of Profits.

New and liberal conditions of Assurance have recently been adopted, particulars of which, together with Prospectuses and all necessary information, may be had as above, or will be forwarded.

ROBERT STRACHAN, Secretary.

4, New Bank-buildings, October, 1861.

THE LIVERPOOL AND LONDON FIRE and LIFE INSURANCE COMPANY.

The Annual Fire Premiums £315,000.

Maritime risks in London and elsewhere, at Home and Abroad, freely insured by Floating Policies and otherwise.

FIRE Policies falling due at CHRISTMAS should be renewed by the 9th of January.—20 and 21, Poultry.

THE STANDARD LIFE ASSURANCE COMPANY.

ESTABLISHED 1833.

The Directors invite particular attention to the system of "Free Assurance" introduced by this Company, under which Policies are relieved from all liability for payment of extra Premium for Foreign residence, and are subject to no other condition than the payment of the ordinary Premium.

Forfeited Policies can be revived within thirteen months under certain conditions. Surrender values granted after one annual payment on those with profit Policies, or after three annual payments on those without profit.

Loans granted on such Policies to the extent of their value. The Standard has transacted a larger amount of Assurance business during the last Fifteen Years than any other Office.

Annual Revenue upwards of £315,000

Accumulated and Invested Fund £1,350,000

Next Division of Profits in 1865.

WILL THOS. THOMSON, Manager.

H. JONES WILLIAMS, Resident Secretary.

LONDON—King William-street.

EDINBURGH—3, George-street (Head Office).

DR. DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world, as the safest, speediest and most effectual

remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS,

RHEUMATISM, GOUT, GENERAL DEBILITY, DYSPEPSIA

OF THE SKIN, RICKETS, INFANTILE WASTING,

AND ALL SCROFULOUS AFFECTIONS,

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart. M.D., Physician

in Ordinary to the Queen in Ireland.—"I consider Dr. de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

Sir JOSEPH OLLIFFE, M.D., Physician to the British Embassy at Paris.—"I have frequently prescribed Dr. de Jongh's Light-Brown Cod Liver Oil, and I have every reason to be satisfied with its beneficial and salutary effects."

Dr. LAWRENCE, Physician to H.R.H. the Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr. de Jongh's Oil in preference to any other, feeling assured that I am recommending a genuine article, and not a manufactured compound, in which the efficacy of this invaluable medicine is destroyed."

Dr. BARLOW, Senior Physician to Guy's Hospital.—"I have frequently recommended persons consulting me to make use of Dr. de Jongh's Cod Liver Oil. I have been well satisfied with its effects, and believe it to be a very pure Oil, well fitted for those cases in which the use of that substance is indicated."

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL is sold only in medicinal Half-Pint, 3s. 6d.; Pint, 4s. 9d.; Quart, 9s.; and impounded and labelled with his stamp and signature, without which none can possibly be genuine, by respectable Chemists and Druggists.

SOLE CONSIGNERS:
ANSAR, HARBORD & CO. 77, Strand, London, W.C.

CAUTION.—Beware of proposed Substitutions.

MR. HOWARD, SURGEON-DENTIST, 52, FLEET-STREET, has introduced an **ENTIRELY NEW DESCRIPTION OF ARTIFICIAL TEETH**, fixed, without springs, wires or ligatures. They so perfectly resemble the natural teeth as not to be distinguished from the originals by the closest observer; they will never change colour or decay, and will be found superior to any teeth ever before used. This method does not require the extraction of roots, or any painful operation, and will support and preserve teeth that are loose, and is guaranteed to restore articulation and mastication. Decayed teeth rendered sound and useful in mastication.—At home from Ten till Five.

THE FAIRY BOUQUET.—Dedicated

(by Special Permission) to the **QUEEN OF THE FAIRIES**. It is made from Wild Flowers, culled by Fairy hands from "the bank whereon the wild thyme grows." The authenticity of the receipt is vouched for with the same degree of certainty as is the existence of Titania herself. In bottles, 2s., 3s., 6d., and 5s. each.

METCALFE, BINGLEY & CO'S NEW PATTERN TOOTH BRUSHES, Penetrating Hair Brushes, Genuine Smyrna Sponges, and every description of Brush, Comb, and Perfumery. Metcalfe's Chartered Alkaline Tooth Powder, 2s. per box.—180s and 181, Oxford-street.

KEATING'S PALE NEWFOUNDLAND

COD LIVER OIL has been analyzed and recommended by Professors Taylor and Thomson, also by Dr. Edwin Payne, who, in the words of the late Dr. Pereira, says, that "the finest oil is that most devoid of colour, odour and flavour," characters this Oil will be found to possess in a high degree. Half-pints, 2s. 6d.; pints, 5s. 6d.; quarts, 10s. 6d.; and 12 bottles, 10s. 6d. imperial measure.—79, St. Paul's Churchyard, London.

KEATING'S COUGH LOZENGES are daily

recommended by the Faculty.—Testimonials from the most eminent of whom may be inspected—as the most effectual, safe, speedy and convenient remedy for **COUGH** and all Disorders of the Lungs, Chest and Throat. Sold in Boxes, 1s. 1d., Tins, 2s. 6d., 4s. 6d., and 10s. 6d. each.—**THOMAS KEATING**, Pharmaceutical Chemist, 79, St. Paul's Churchyard, London.

CAPTAIN WHITE'S

CURRY or MULLIGATAWNY PASTE,

Curry Powder, Curry Sauce, and Oriental Pickle, may be obtained from all Sauce Venders, and wholesale of

CROSSE & BLACKWELL, Parveyers to the Queen, Becho-square, London.

FOR DEAFNESS, arising from the accumulation

of Cerumen, **SAVORY & MOORE'S PATENT EAR DOUCHE** is a valuable substitute for ordinary Syringes. Patients use it without assistance, and the possibility of injury to the interior of the Ear and the splashing and inconvenience attending the use of Syringes are entirely obviated.—**SAVORY & MOORE**, Chemists to the Queen, 143, NEW BOND-STREET, LONDON.

MANUFACTURERS of IMPROVED ENEMAS.

COCKLE'S ANTIBILIOUS and FAMILY

APERIENT PILLS.—These pills are composed of the mildest vegetable purgatives, with the pure extract of the flowers of the Camomile, and combining aromatic and tonic properties, will be found the best remedy for indigestion, bilious attacks, sick headache, acidity or heartburn, flatulency, spasms, &c.—Prepared only by **JAMES COCKLE**, 18, New Ormond-street, and to be had of all Medicine Vendors, in boxes, at 1s. 1d., 2s. 6d., 4s. 6d., and 11s.

TAIT'S ORIENTAL BALM.—The most

efficacious means yet discovered for Strengthening, Preserving, Restoring and Beautifying the Hair. Prepared from a receipt by the late John Oldridge, Inventor of the celebrated Balm of Gilead, the experienced superintendent of his daughter and son-in-law, Mr. and Mrs. Tait.—Sold by all Perfumers, in bottles, at 2s. 6d., 5s. and 8s. 6d., and at the Manufactory, 6, Cusmo-place, Southampton-row, Russell-square, W.C.

NO CHRISTMAS GIFT is more VALUABLE

than **OLDRIDGE'S BALM OF COLUMBIA**, which has been established upwards of thirty years. It is the best and only certain REMEDY ever discovered for **PRICKLY HEAT, STRENGTHENING, BEAUTIFYING, or RESTORING the HAIR**, Whiskers or Moustaches, and preventing them turning grey. Sold in bottles, 3s. 6d., 6s. and 11s., by C. & A. OLDRIDGE, and all the most distinguished Perfumers. For Children's and Ladies' hair it is most efficacious and unrivalled.

DINNEFORD'S PURE FLUID MAGNESIA

has been, during twenty-five years, emphatically sanctioned by the Medical Profession and universally accepted by the Public, as the Best Remedy for acidity of the stomach, heartburn, headache, gout and indigestion, and as a mild aperient for delicate constitutions, more especially for Ladies and Children. Combined with the Acidulated Lemon Syrup, it forms an agreeable Effervescent Draught, in which its Aperient qualities are much increased. During Hot Seasons and in Hot Climates, the regular use of this simple and elegant remedy has been found highly beneficial. Manufactured with the utmost attention to strength and purity by **DINNEFORD & CO.**, 173, New Bond-street, London; and sold by all respectable Chemists throughout the Empire.

FOR WEAKNESS, INFLAMMATION and

IRRITATION of the EYES, caused by the Winds, Blight, Close Application to Literary and other Professional Occupations, the **SAVORY & MOORE'S EYE DOUCHE**, invented by **SAVORY & MOORE**, is the most effectual application of the Eye, &c. The effects produced are grateful and refreshing, and the sight is improved and permanently strengthened by the regular use of the Douche.—**SAVORY & MOORE**, Chemists to the Queen, 143, NEW BOND-STREET, LONDON.—N.B. As the imitation of these Douches causes congestion of the vessels of the Eye, it is important to observe that the names of **SAVORY & MOORE** are conspicuous on all instruments of their manufacture.

HENRY'S CALCINED MAGNESIA con-

tinues to be prepared, with the most scrupulous care and attention, by Messrs. **THOS. & WM. HENRY**, Manufacturing Chemists, Manchester. It is sold, in bottles, price 2s. 9d., or with glass stoppers at 4s. 9d., stamp included, with full directions for its use, by the various Agents in the Metropolis and throughout the United Kingdom; but it cannot be genuine unless their names are engraved on the Government Stamp which is fixed over the cork or stopper of each bottle. Sold in London, wholesale, by Messrs. Barclay & Sons, Farringdon-street; Sutton & Co., Bow Churchyard; Newbery & Sons, 2, Edwards's; Thos. Butler, St. Paul's Churchyard; Savory & Co., New Bond-street; Saenger, Oxford-street. And of most of the vendors of the Magnesia may be had, authenticated by a similar stamp, **HENRY'S AROMATIC SPIRIT OF VINELIC**, the invention of Mr. Henry, and the only genuine preparation of that article.

THE
ALEXANDRE HARMONIUM,
 AT
CHAPPELL'S, 50, NEW BOND-STREET.

NEW ALEXANDRE HARMONIUMS.

	GUINEAS.
THE FIVE-GUINEA HARMONIUM, 4 Octaves, in Oak Case	5
THE SIX-GUINEA HARMONIUM, 5 Octaves, in Oak Case, with 2 Foot-boards	6

These Instruments are lower in price and superior to all other cheap Harmoniums.

THE NEW CHURCH HARMONIUM,

WITH TWO ROWS OF KEYS.

THESE Instruments are a perfect substitute for the Organ; the upper keyboard has a Venetian Swell, and acts as a Soft or Choir Organ, on which a perfect diminuendo and crescendo can be produced; and the lower keyboard answers the purpose of a Full Organ. The tone of these Instruments more closely resembles that of an Organ than any Harmonium yet produced, being rich and pure in quality. The construction is of a simple character and not likely to be affected by damp, rendering them peculiarly suited to Churches. An additional blower is attached to each Instrument.

NO.		GUINEAS.
1.	EIGHT STOPS (<i>Three and a-half rows of Vibrators</i>), Rosewood Case	45
2.	TWENTY-TWO STOPS (<i>Six rows of Vibrators</i>), Rosewood Case	70
3.	TWENTY-TWO STOPS (<i>Eight rows of Vibrators</i>), Rosewood Case, 2½ Octaves of Pedals	85

ALEXANDRE & SON have taken out a new Patent for the Drawing-Room Harmonium which effects the greatest improvement they have ever made in the Instrument. The Drawing-Room Models will be found of a softer, purer, and in all respects more agreeable tone than any other instruments. They have a perfect and easy means of producing a diminuendo or crescendo on any one note or more; the bass can be perfectly subdued, without even the use of the Expression Stop, the great difficulty in other Harmoniums.

THE DRAWING-ROOM MODEL

IS MADE IN THREE VARIETIES:—

NO.		GUINEAS.
1.	THREE STOPS, Percussion Action, additional Blower, and in Rosewood Case	25
2.	EIGHT STOPS, ditto ditto ditto	35
3.	SIXTEEN STOPS, ditto ditto Voix Céleste, &c. (<i>The best Harmonium that can be made</i>)	60

Messrs. CHAPPELL have an **ENORMOUS STOCK** of all Varieties of the ordinary kind, which are perfect for the Church, School, Hall, or Concert-Room:—

NO.		GUINEAS.	NO.		GUINEAS.
1.	ONE STOP Oak Case	10	7.	ONE STOP (<i>With Percussion Action</i>) Oak Case	16
2.	Ditto Mahogany Case	12		Rosewood	18
3.	THREE STOPS ... Oak, 15 guineas; Rosewood	16	8.	THREE STOPS ditto	20
4.	FIVE STOPS (<i>Two rows of Vibrators</i>) ... Oak	22	9.	EIGHT STOPS ditto Oak or Rosewood	32
	Rosewood Case	23	10.	TWELVE STOPS ditto Oak	40
5.	EIGHT STOPS ditto Oak, 25 gs.; Rosewood	26	11.	Ditto ditto Rosewood	45
6.	TWELVE STOPS (<i>Four rows of Vibrators</i>)		12.	PATENT MODEL ditto Oak or Rosewood	55
	Oak or Rosewood Case	35			

Testimonials from the Professors of Music of the Universities of Oxford and Cambridge, the Organists of St. Paul's and Westminster Abbey, the Professor of the Harmonium at the Royal Academy of Music, &c. &c., together with full descriptive Lists (Illustrated), may be procured on application to

CHAPPELL & CO., 49 and 50, NEW BOND-STREET.

Editorial Communications should be addressed to "The Editor"—Advertisements and Business Letters to "The Publisher"—at the Office, 30, Wellington-street, Strand, London, W.C.
 Printed by JAMES HOLMES, of No. 4, New Ormond-street, in the county of Middlesex, at his office, 4, Took's-court, Chancery-lane, in the parish of St. Andrew, in said county; and published by JOHN FRANCIS, 30, Wellington-street, in said county, Publisher, at 30, Wellington-street aforesaid.—Agents: for SCOTLAND, Messrs. Bell & Bradfute, Edinburgh;—for IRELAND, Mr. John Robertson, Dublin.—Saturday, December 21, 1861.

TO EDITORS AND PUBLISHERS.—A GENTLEMAN, whose regular occupation leaves him considerable leisure, and who is well read in the literatures of France, Germany, Italy and Spain, is ready to undertake the TRANSLATION of FOREIGN PAPERS, and WORKS OF INTEREST.—Address G. G. G., Post-Office, Ayr, N.B.

THE PRESS.—A GENTLEMAN has recently come into possession of a small Newspaper and Jobbing Business, capable of much extension, and having engagements at a distance, would be happy to give a competent Manager a PARTNERSHIP in it, in consideration of his taking the entire management of the business. The concern has been established some years, and the Paper has a large circulation. The Manager could live on the premises. He would be expected to put into the business 50*l.*, as a guarantee of good faith, and give some reasonable security for the proper fulfilment of his contract. As he is wanted immediately, he could enter on the duties at once on trial.—Apply immediately (with references) to Mr. JOHN BURMAN, Advertising Agent, 26 A, Moorgate-street, E.C.

TO PUBLISHERS.—The First Number of THE WEEK, a New Ecclesiastical Journal, will be published on Friday, the 3rd January, 1862. Several of the most eminent Ecclesiastical Writers in Scotland are to be among its contributors. A circulation of 5,000 copies of the First Two Numbers is guaranteed, and from the nature of that circulation, THE WEEK may be regarded as specially eligible for Publishers' Announcements. THE WEEK Office, 377, High-street, Edinburgh.

TO ADVERTISERS.—The Circulation of the EDINBURGH DAILY REVIEW is now 14,000 Copies daily. From the character, as well as the amount of circulation, the DAILY REVIEW is one of the most eligible mediums of advertising in Scotland, especially for Publishers' announcements.—DAILY REVIEW Office, Edinburgh, 377, High-street.

CHEAP BOOKS at MUDIE'S LIBRARY.—PURCHASERS OF BOOKS for PUBLIC or PRIVATE LIBRARIES are recommended to obtain C. E. MUDIE'S Revised List of Surplus Copies of Recent Works withdrawn from his Library for Sale. The December List comprises many of the best books of the past season, cut and unsold; also a selection of Works, well bound and adapted for Presents and School Prices.—CHARLES EDWARD MUDIE, New Oxford-street, London; Cross-street, Manchester; and New-street, Birmingham.

FOREIGN SCIENTIFIC BOOKS.—WILLIAMS & NORGATE'S NEW SCIENTIFIC and MEDICAL CATALOGUE. The Publications of the last six years. Now ready, post free one stamp. WILLIAMS & NORGATE, Importers of Foreign Books, 14, Henrietta-street, Covent-garden, London; 30, South Frederick-street, Edinburgh.

CHEAP BOOKS at BULL'S LIBRARY.—Surplus Copies of De Chailly's 'Africa'—Atkinson's 'The Armour'—Gaiton's 'Venetian Tourist'—Lord Elgin's 'Mission to China'—and many other Books now on Sale, at greatly reduced prices. Catalogues sent gratis.—BULL'S LIBRARY, 19, Holles-street, Cavendish-square.

PAMPHLETS.—A CATALOGUE OF PAMPHLETS on nearly every topic of the day forwarded on application. ROBERT HARDWICK, Publisher, 182, Piccadilly, W.

WESTERTON'S LIBRARY, Hyde Park-corner.—Upwards of 125,000 Volumes of Standard Works in History, Biography, Travels, Fiction, &c., are in circulation at this Library, to which all the New Books are freely added. Books are sent regularly to Subscribers, and may be exchanged at pleasure. Single Subscription, One Guinea a Year. Subscription for Families, Book Clubs and Country Libraries, in proportion to the number of Volumes required.

A.D. 5028.—WE are now to be entertained by Mr. Spurgeon on the *Gordale* (laughter); but in after ages, according to the development theory, we shall doubtless have a Gordilla lecturing on Mr. Spurgeon's (Roars of laughter).—(Extract from the Speech of the Right Hon. J. H. LAYARD, M.P., at Mr. Spurgeon's Lecture.) This witty and amusing idea is now embodied in the most humorous, laughable 'Carte de Visite' ever photographed, price 18 stamps, post free. Orders executed according to priority. Entered at Stationers' Hall. LONDON STEREOSCOPIC COMPANY, 54, Chapside.

LONDON NEWSPAPERS at HALF-PRICE.—The Times, Illustrated London News, Saturday Review, London Review, and a few other Papers, regularly posted at Half-Price.—For particulars, inclose a stamped directed envelope to E. HUNT, 12, Weymouth-terrace, Hackney-road, London.

BOOKCASES.—TWO WANTED, about 3½ feet wide, of Mahogany, very best quality.—Send particulars directed to LINN, Graham Club, City.

CHRISTMAS PRESENTS.—SETS of PHOTOGRAPHIC APPARATUS, fitted in Cabinet-Case, complete, with the new Universal Objective. Price, from 10 guineas to 25 guineas, including Instruction.—M'LEAN, MELNISH & HAZ, 36, Haymarket, S.W.

CHRISTMAS PRESENTS.—PHOTOGRAPHIC ALBUMS for CARTE-DE-VISITE PORTRAITS either Unfilled or Filled with the Portraits of Eminent Men and Women, English and Foreign.—M'LEAN, MELNISH & HAZ, 36, Haymarket, S.W.

CHRISTMAS PRESENTS.—PHOTOGRAPHS.—A Magnificent Series of Views of the Alps, including Monte Rosa, Mont Blanc, &c. Views in China and Australia.—Views of Rome, including all Architectural Remains of Interest in the Ancient City.—English and Foreign Cathedrals, and all Photographs recently published. A Series of the above in a Portfolio form a very interesting Collection, many of them being of a uniform size.—M'LEAN, MELNISH & HAZ, 36, Haymarket, S.W.

PICTURES.—MR. FLATOU'S LAST EXHIBITION OF HIGH-CLASS MODERN PICTURES, at Messrs. HAYWARD & LEGGATT'S GALLERY, 28, CORNHILL.—MR. FLATOU begs to announce that he HAS OPENED the above GALLERY with his choice Collection prior to his retiring from picture-dealing, as in future he intends devoting his entire attention to the Exhibition and Publication of the forthcoming important work by W. P. FRITH, R.A., 'The Railway Station.' The Collection includes some of the choicest specimens by the most distinguished Members of the Royal Academy and other Eminent Artists. Admission Free on presentation of private address card.

CHEERFULNESS—GOODNESS—HAPPINESS.—MR. KIDD'S GENIAL "GOSSIPS." SUNNY PICTURES OF HUMAN LIFE FOR ALL TIMES, ALL PLACES AND ALL SEASONS.

From the *Liverpool Mercury*. "WILLIAM KIDD is now an old stager, and wherever he goes he, of course, finds himself 'at home.' Who better knows his work, or performs it nearly so well? Who could be more in earnest? And yet, who more humorous and lively? Instructive and full of the most delightful Anecdotes, his Practical Lessons in the Philosophy of Life effectually tell upon every heart." Particulars of Mr. Kidd's New Anecdotal "Gossips" post free.—Apply, by letter only, to Mr. WILLIAM KIDD (of Hammersmith), 5, Great Castle-street, Regent-street, London, W.

WOOD ENGRAVING.—MR. GILKS respectfully announces to Publishers, Authors, Inventors, Manufacturers, &c., that he has increased facilities for executing every branch of the Art in the best style, and at moderate charges. London: 21, Essex-street, Strand, W.C.

WHAT WILL THIS COST TO PRINT?—Is a thought often occurring to Literary Men, Public Characters and Persons of Benevolent Intentions. An immediate answer to the inquiry may be obtained. A SPECIMEN BOOK of TYPES, and information for Authors sent on application, by Richard Barrett, 13, Mark-lane, London.

ESTIMATES FOR LITHOGRAPHY, ENGRAVING AND PRINTING.—Promptly furnished by ASHBEE & DANGERFIELD, Lithographic Artists and Printers in Colours, Engravers on Wood and Copper, Copper-plate and General Printers, 22, BEDFORD-STREET, COVENT-GARDEN.

BOOKBINDING.—in the MONASTIC, GROTIER, MAIOLI and ILLUMINATED styles, in the most superior manner, by English and Foreign workmen. JOSEPH ZAEHNDOERF, BOOKBINDER TO THE KING OF HANOVER, English and Foreign Bookbinder, 30, BRYDGES-STREET, COVENT-GARDEN, W.C.

BOOKBINDING.—JOHN POWNCEBY, Working Bookbinder, of 243, Euston-road, N.W.; SOLICITORS BOOKS Bound, with the Best Materials and Workmanship, at the Lowest Charges.—Bookbinding, Binding and Finishing for the Trade.

ILLUMINATED AND ILLUSTRATED BOOKS (at reduced prices) of Marvellous Beauty and Value, suitable for CHRISTMAS GIFTS, &c., and some of the choicest productions of Day & Son, Lithographers to the Queen, 6, Gate-street, Lincoln's Inn-fields, London. Catalogues post free on application.

ILLUMINATION.—Boxes of Colours and Materials, Outlines, Lafin's Manual on the Subject, and every requisite.—WILSON & NEWTON, 23, Rathbone-place, London.

PRESENTS in GEOLOGY and MINERALOGY.—A series of useful Elementary Collections may be had at prices from One Guinea upwards (according to size of specimens), each consisting of from 100 Specimens of either Rocks, Minerals or Fossils, packed in a neat, polished Mahogany Cabinet from One Guinea upwards, adapted for the above; also Books, Maps, Hammers, &c., of JAMES R. GRANT, 23, Golden-square, London.

 Edinburgh: Oliver & Boyd. London: Simpkin, Marshall & Co.

CONVERSATION IN FRENCH FOR PUPILS IN CLASSES.
 Corrected to 1861, and Improved, 14th Edition, 2s. 6d.

THE NEW FRENCH MANUAL, and
TRAVELLER'S COMPANION; containing an Introduction to French Pronunciation; a Copious Vocabulary; a very complete Series of Dialogues on Topics of Every-Day Life; Dialogues on the Principal Continental Tours and on the Objects of Interest in Paris; with Models of Epistolary Correspondence. With a Map. By GABRIEL SURENNE, F.A.S.E., Author of 'The Standard Pronouncing Dictionary of the French and English Languages', &c.
 Edinburgh: Oliver & Boyd. London: Simpkin, Marshall & Co.

NEW EDITION OF STEWART'S GEOGRAPHY.
 Now ready, 2s. 6d. bound, with 11 Maps.
A COMPENDIUM OF MODERN GEOGRAPHY, POLITICAL, PHYSICAL and MATHEMATICAL; with a Chapter on the Ancient Geography of Palestine, Outlines of Astronomy and of Geology, a Glossary of Geographical Names, Descriptive and Pronouncing Tables, Questions for Examination, &c. By the Rev. ALEX. STEWART, LL.D. Eighteenth Edition, Revised and Enlarged.
 More than usual labour has been bestowed on this Edition, in order to adapt it to the many important geographical discoveries and political changes of the last few eventful years. It is enlarged in size by the introduction of a considerable quantity of new matter, and by the use of a more distinct type; while advantage has been taken of the thorough revision to which every page was subjected, to improve it in several other respects. Among the additions will be found an Alphabetical Table of the Chief Seats of Geographical Names.
 Edinburgh: Oliver & Boyd. London: Simpkin, Marshall & Co.

CHRISTMAS PRESENTS.

Each Work complete in 1 vol. price 5s. elegantly printed, bound and illustrated, by

MILLAIS, LEECH, BIRKET FOSTER, &c.

HURST & BLACKETT'S STANDARD LIBRARY

OF CHEAP EDITIONS OF POPULAR MODERN WORKS.

18. The Life of Jeanne d'Albret.
19. The Valley of a Hundred Fires.
20. Burke's Romance of the Forum.

"The publications included in this Library have all been of good quality—many give information while they entertain. The manner in which the cheap editions forming the series is produced deserves especial mention. The paper and print are unexceptionable; there is a steel engraving in each volume, and the outside of them will satisfy the purchaser who likes to see a regiment of books in handsome uniform."—*Examiner.*

HURST & BLACKETT, 13, Great Marlborough-st.

NEW ATLASES BY WILLIAM HUGHES, F.R.G.S.

Just published, imperial 8vo. handsomely bound in cloth, price 10s. 6d.

PHILIP'S SCHOOL ATLAS OF PHYSICAL GEOGRAPHY, comprising a Series of Maps and Diagrams in illustration of the Features, Climates, Various Productions and Chief Natural Phenomena of the Globe.

Edited by W. HUGHES, F.R.G.S.

And designed as a Companion to Hughes's 'Class-book of Physical Geography.'

Lately issued, New and Enlarged Edition, medium folio, price 15s. bound in cloth.

THE TRAINING-SCHOOL ATLAS. By W. HUGHES, F.R.G.S.

The Training-School Atlas consists of a series of Maps (Sixteen in number) designed to illustrate, on a scale of large size, and in a strictly clear and methodical manner, the leading features in Physical Geography:—1st, Of the World at large; 2ndly, Of the Great Divisions of the Globe (Europe, &c.); 3rdly, Of the British Islands; and, lastly, Of the Holy Land. The political divisions of the earth at the present time are embodied upon the information thus afforded, but in such a manner as not to interfere with its clear and distinct exposition.

London: George Philip & Son, 23, Fleet-street; and Caxton-buildings, Liverpool.

Now ready, price 5s. cloth.

THE HISTORY OF SHORTHAND WRITING. By MATTHIAS LEVY, Shorthand Writer. To which is prefixed, the System used by the Author.

Tribner & Co. Paternoster-row.

PAUL JERRARD & SON'S NEW GIFT-BOOK FOR CHRISTMAS AND ALL SEASONS,

Price 31s. 6d.

THE NIGHT-FLYERS; Intended as a companion volume to 'Butterflies in their Floral Homes,' by the same Author. The habits and haunts of the Night-flying Moths are illustrated and described in this work as those of their cousins, the Butterflies, were in the previous volume.

An entirely novel feature will distinguish the present volume, in those Plates which represent portions of woods and glades by night, in which the Moths are seen disporting among the foliage, in the half light of the moon or twilight.

In a handsome and novel cover, introduced especially for this elegant Gift-Book without regard to cost.

London: Paul Jerrard & Son, 170, Fleet-street.

On January 6th, fcap. 8vo. printed on toned paper, handsomely bound in cloth, price 6s.

LIVES OF THE ENGINEERS;

WITH AN ACCOUNT OF THEIR PRINCIPAL WORKS, and A HISTORY OF INLAND COMMUNICATION IN BRITAIN.

By SAMUEL SMILES,

Author of 'Life of Stephenson,' &c.

"Mr. Smiles may fairly claim the merit of having produced one of the most interesting and instructive works. He has discovered almost unbroken ground, and has worked it with so much skill and success, that his readers will recognize in his volumes an illustration of the truth of Lord Macaulay's saying, that history, personal or national, may, when properly written, be rendered as interesting as any novel."—*London Review*.

JOHN MURRAY, Albemarle-street.

THE PHOTOGRAPHICALLY ILLUSTRATED GIFT-BOOK.

Ornamental binding, cloth, 21s.; morocco, 31s. 6d.

RUINED ABBEYS AND CASTLES OF GREAT BRITAIN.

By WILLIAM AND MARY HOWITT.

The Photographic Illustrations by BEDFORD, SEDGFIELD, WILSON, FRETTON and others.

"One of the most pleasing volumes published this season. In printing, paper, illustration and binding, it is a triumph of the graphic arts."—*Daily News*.

"A beautiful volume."—*Art-Journal*.

"To collect photographs of the Abbeys and Castles of Great Britain into a volume was a happy thought."

Publishers' Circular.

London: A. W. BENNETT, 5, Bishopsgate-street Without.

CIVILIZATION CONSIDERED AS A SCIENCE IN RELATION TO ITS ESSENCE, ITS ELEMENTS and its END. By GEORGE HARRIS, F.S.A., Author of 'The Life of Lord Chancellor Hardwicke,' &c.

The necessity for a more liberal and general Education, but for supplying in conjunction with it all those various institutions and requirements which together constitute the Elements of Civilization; and the different Measures, Legislative and Social, essential for its complete accomplishment are pointed out.

Contents.

The REAL NATURE and ESSENCE OF CIVILIZATION. The ELEMENTS which CONTRIBUTE to the PROMOTION OF CIVILIZATION.

- | | |
|---|---|
| 1. National Education. | 6. National Commemorations and Festivals. |
| 2. Religious Influences. | 7. Dignities and Honorary Rewards. |
| 3. Introductory Institutions. | 8. Modern Jurisprudence. |
| 4. Cultivation of Art and Science. | 9. Internal Communications. |
| 5. Liberty of the Press and Toleration. | 10. International Intercourse. |

The END RESULTING from the ESTABLISHMENT OF CIVILIZATION.

"Contains many sound and instructive statements, and is evidently the result of much reading and thought."—*Daily News*. "The work, as a whole, is calculated to have a useful effect in directing attention to the various systems of education; and in inducing thoughtful men and women to examine in a philosophical spirit those evidences or results of civilization with which they are surrounded."—*Observer*.

London: Bell & Daldy, 106, Fleet-street.

"A perfect gem."—*Edinb.* "Most valuable and interesting well adapted for self-instruction."—*The West Brit.*—*Aris's Gazette*. Longmans.

GIFT BOOK, NEW.

SONGS and TUNES FOR EDUCATION, Edited by JOHN CURWEN. The Harmonies by JAMES TURLE, Esq., Organist of Westminster Abbey. The Pianoforte Edition in handsome cloth binding, with gilt title, price Half-a-Crown.

This Work is the fruit of the Editor's residence in Germany. He collected books of music for young people in every town he visited. With the aid of Mr. James S. Stallybrass, the whole of this collection was analyzed, and the choicest translated or adapted for English use. The Editor, however, never preferred a German piece when an English one would do as well. He aims to educate the feelings and sympathies of childhood by the habit of singing good songs. This he considers the proper office of music in schools. He takes care that the three school ages (childhood, boy-and-girlhood and youth) are suited with songs on the following subjects:—Country Scenes, the Seasons, Fancy and Humour, Kindness to Animals, Home Sympathies, Patriotism, Industry, Integrity, Religion, &c. There are two hundred and sixty-seven songs. This Work will doubtless supersede the Editor's widely-known 'School Music' and 'School Songs.'

An Edition in the Tonic-Sol-fa Notation, containing the Treble Voice "parts" only, price, in paper, 1s.; in cloth, 1s. 6d. The 'Education Songs' containing the words only, price 6d.

Ward & Co. 37, Paternoster-row.

Just published, in small 8vo. price 5s. bound in cloth.

HINTS TO MOTHERS ON HOME EDUCATION. By FREDERICK BRIDGES, Author of 'Phrenology made Practical,' &c.

Also, lately issued, Second Edition, profusely illustrated, price 3s. 6d.

PHRENOLOGY MADE PRACTICAL, and POPULARLY EXPLAINED.

"Mr. Bridges is a true Baconian philosopher; the very strongest antithesis to the scientific pretender.... We have no hesitation in recommending this treatise as the most reliable and perfect in any language on the subject of phrenology."—*Morning Herald*.

"Mr. Bridges is a master of the theory he undertakes to expound. We have been interested in his book, which we commend to public notice, as presenting the latest views of phrenological science."—*Leader*.

London: George Philip & Son, 23, Fleet-street; and Caxton-buildings, Liverpool.

In 1 thick vol. The Twelfth Edition, price 16s.

MODERN MODESTIC MEDICINE. Forming a comprehensive Medical Guide for the Clergy, Families and Emigrants. By T. J. GRAHAM, M.D., Licentiate of the Royal College of Physicians of Edinburgh.

"Of all the Medical Guides that have come to our hands, this is by far the best. For fullness and completeness they all yield the palm to Dr Graham's."—*Banner*.

"Far exceeding every publication of its class."—*British Standard*, February, 1862.

Also, by the same Author, price 10s. in cloth,

2. ON INFANCY and CHILDHOOD; embracing the whole subject of Medical and Physical Management from Birth, with Hints to Young Mothers for the Management of themselves as well as their Offspring, &c.

Written in a clear and interesting manner; and the author displays, as in his previous works, much judgment.

"Broad principles and rules, the adoption of which by parents will materially conduce to the health and happiness of their children in after years."—*Witness*.

London: published by Simpkin, Marshall & Co. Stationers' Hall-court; and by all Booksellers.

THE ROMANCE of a DULL LIFE. By the Author of *Morning Clouds and the Afternoon of Life*. Post 8vo. 3s. 6d.

"This is a novel standing somewhere between those of Miss Austen and those of Miss Brontë. It has affinities with each of the schools which they represent. The treatment of the central figure is a good deal after the manner of the latter authors. Apart from this, there is a great deal of the same descriptive power, the same picturesque style which may be found in 'Jane Eyre'." *Saturday Review*.

THE TALE of the GREAT PERSIAN WAR, from the Histories of Herodotus. By the Rev. GEORGE W. COX, M.A., late Scholar of Trinity Coll., Oxford; Author of *Tales from Greek Mythology*. With 12 Illustrations. Fcap. 8vo. 7s. 6d.

HURST & BLACKETT'S NEW WORKS.

TRAVELS in the HOLY LAND. By
FREDRIKA BREMER. Translated by MARY HOWITT.
3 vols. 11s.

"This is one of the very best of Miss Bremer's works. We have read many accounts of Palestine, but never remember to have read in any author more charming descriptions of places, persons and events than occur in these volumes."—*Messenger*.

FRENCH WOMEN of LETTERS.
By JULIA KAVANAGH, Author of 'NATHALIE,'
'ADELE,' &c.

"Miss Kavanagh has shown taste and feeling in this agreeable book."—*Athenæum*.

"Miss Kavanagh's book is a very good one. It will obtain not only a popular success, but also a permanent place in the library of the literary student. It covers ground new to most English readers. Ten women—all very famous in their day—are taken as centres of literary history in successive periods; and in the story of their lives, still more in the analysis given of their leading works, we have the several stages of French life truly reflected."—*Examiner*.

The LIFE of J. M. W. TURNER, R.A.

From Original Letters and Papers furnished by his Friends and Fellow Academicians. By WALTER THORNBURY.
3 vols. 8vo. with Portraits, &c. 30s.

"Mr. Thornbury may be congratulated on the completion of an arduous task, the difficulties of which, however, have been alleviated by the ready co-operation he has met with on all hands from the friends of the deceased artist, who have only been too glad to place their stores at his disposal. Impressed with the importance of the subject, the author has treated it with reverence and earnestness. Mr. Thornbury has honestly endeavoured to paint Turner truly, regarding him neither with the eyes of an enthusiast nor with those of a critic. Mr. Thornbury's work must not only be considered as the very best he has written, but as a valuable addition to our artistic biography. To the professional student it will be especially interesting."—*Spectator*.

The LIFE of Admiral Sir CHARLES

NAPIER, K.C.B.; with HIS CORRESPONDENCE. From his Private Papers. By Major-General ELMERS NAPIER.
3 vols. 8vo. with Portrait and Charts. 30s.

"This personal history of another of England's great sea worthies is sure to be warmly welcomed by the British public. The book possesses an interest which will not pass away with the present generation. We know of no book so likely to excite the enthusiasm of English youth as Southey's Life of Nelson and these Memoirs of Admiral Napier."—*Daily News*.

LODGE'S PEERAGE and BARONET-

AGE for 1862. Under the special Patronage of HER MAJESTY, and corrected throughout by the Nobility. Thirty-first Edition, 1 vol. with the Arms beautifully engraved, handsomely bound, gilt edges, 31s. 6d.

MEMOIRS of QUEEN HORTENSE,

MOTHER of NAPOLEON III. Edited by LASCELLES
WRAXALL. 2 vols. with Portrait, 11s.

The OKAVANGO RIVER. A Nar-

rative of Travel, Exploration and Adventure. By CHARLES
JOHN ANDERSSON, Author of 'LAKE 'NGAMI.' 8vo.
with Portrait of the Author and numerous Illustrations. 11s.

"Mr. Anderson's book, from the number of well-told adventures, its rich fund of information, and spirited illustrations, will command a wide circle of readers."—*Athenæum*.

The ROMANCE of the FORUM; or,

NARRATIVES, SCENES and ANECDOTES from COURTS
of JUSTICE. By PETER BURKE, Sergeant-at-Law. Price
5s. bound and illustrated, forming the New Volume of
HURST & BLACKETT'S STANDARD LIBRARY of
CHEAP EDITIONS.

To this New Edition of 'The Romance of the Forum' is added the true narrative on which have been founded the drama and romances of 'The Colleen Bawn.'

THE NEW NOVELS.

The LAST of the MORTIMERS. By

the Author of 'MARGARET MAITLAND,' &c. 3 vols.

"The Last of the Mortimers' is a charming book—simple, quaint and fresh. It is a novel 'comme il y en a peu' (the more the pity), and it will go far to sustain the reputation of the author of 'Margaret Maitland.'"
—*Athenæum*.

"The Last of the Mortimers' is not only good in itself, but is quite as clever in its way as 'Mrs. Margaret Maitland,' and has something stronger in the fibre of its romance. It is the most powerful and most interesting novel by this authoress; and the world will thank her for more tales as good and as amusing."—*Globe*.

FOREST KEEP. Dedicated to Lady

TRAVELMAN. 3 vols.

The CASTLEFORD CASE. By

FRANCES BROWNE, Author of 'MY SHARE OF THE
WORLD.' Dedicated to the MARQUESS of LANSDOWNE. 3 v.

"A good novel. The characters are ably conceived and well worked out, and the plot—an uncommon one—is carried on with ingenuity and spirit."—*John Bull*.

**WHITE and BLACK: a Story of
the SOUTHERN STATES.** 3 vols.

"This story is full of interest. The characters are life-like and free from exaggeration, and the style is vigorous, fresh and Eng-
lish. It is a clever novel, with a purpose fairly carried out. It will be read extensively, and richly abused on one side and admired on the other; but no party spirit can destroy its effect on an unprejudiced reader."—*Globe*.

LADY HERBERT'S GENTLE-

WOMEN. By 'SILVERPEN,' Author of 'MAINSTONE'S
HOUSEKEEPER,' &c. 3 vols. [Just ready.]

BOOSEY'S

MUSICAL CABINET:

EVANS'S ENGLISH HARMONIUMS for
Cottages, Schools, Drawing-Rooms, Churches, Literary and
other Public Institutions, are made in every possible variety at
Prices from 6 to 140 Guineas. The Manufacturers have to announce
the complete success of a New Patent Self-Acting Blowing Machine,
the only self-acting blower that has ever succeeded, which may be
seen in operation at Holles-street daily.
The most distinguished living Musicians, including Balfe,
Sterndale Bennett, Cipriani Potter, Best, Henry Smart, &c., have
testified to the extraordinary merits of Evans's Harmoniums.
See Testimonials attached to Illustrated Catalogues of Har-
moniums, to be had gratis of the Manufacturers, Boosey & Ching,
24, Holles-street, London, W.

**EVANS'S ENGLISH MODEL HARMO-
NIUM,** with Two Rows of Keys, price 66 Guineas in Oak
Case, or 70 Guineas in Rosewood Case, combines every modern
improvement. The most beautiful and varied orchestral effects
can be produced upon this instrument, which possesses every
gradation of tone from the greatest power to the most delicate
Pianissimo. The English Model Harmonium is managed with
that facility which characterizes all Evans's Harmoniums, and is
equally effective both in the Drawing-room and Church.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

EVANS'S PEDAL HARMONIUMS, with
Independent Pedal Reeds, can be had either with a Single or
Double Row of Keys, at Prices from 51l. to 120 Guineas. Also,
with the New Patent Self-Acting Blowing Machine.

Boosey & Ching, Manufacturers, 24, Holles-street, London, W.

LONDON, SATURDAY, DECEMBER 28, 1861.

LITERATURE

Woman's Rights under the Law. In Three Lectures, delivered in Boston in 1861. By Caroline H. Dall. (Boston, U.S., Walker & Co.)

Experiences of an English Sister of Mercy. By Margaret Goodman. (Smith, Elder & Co.)

HERE are two books, written by two women, each sincerely anxious to do her best for the promotion of female perfectibility. They are in complete contrast. Nothing can be more opposed than the mode in which each tries to work her problem. Mrs. Caroline Dall, whose Lectures on Woman's Right to Labour have been reviewed in this journal in no unkindly spirit, again takes the field, with larger claims and in a more defiant attitude. We are sorry to say that, on the present occasion, she scolds more than usual. Woman's right to labour conceded, she argues that woman's right "to a seat in the legislature, a vote to control appropriation and taxes," would follow as a matter of course. The whole scope of the present work is to show the extreme injustice of all the laws which exclude women from the polling-booth as voters and from the hustings as candidates. She begs her questions with the imperturbable assurance of an Irishman, and draws her conclusions as undoubtingly as though they were based upon accomplished facts; after which she proceeds to abuse men in general for not carrying out her views. On the text, 'Woman's civil equality,' she writes:—"If all the fields of human labour are thrown absolutely open (and you admit they ought to be), if women enter and grow wealthy therein, if every second woman, for instance, were an intelligent property-holder, is it credible that she, or her husband for her, would rest content in her present minority? Would she not want a seat in the Legislature to protect her property—a vote to control appropriation and taxes?"

When a majority of women, she contends, find the means of thorough education open, then a much greater number will seek actual employment, and immediately the interests of property will compel them to "*clamour for suffrage*." As Mrs. Dall puts it:—"Five thousand female property-holders calling their own caucus, and storming the City Hall with well-concerted words, would compel any Government to listen—would compel committees to sit and departments to act. Let it be your first duty, then, to add to the number of intelligent female workers."

"*La providence des chats n'est pas celle des souris*," says a witty French tale we read once; and decidedly the millennium for women will not be "a good time coming" for the government of the day, that is to be "compelled to listen to the well-concerted words of five thousand female property-owners" in their own caucus assembled! The heart of the sternest Radical must relent at such a retribution in store for tyrants: only a woman could have devised it. However, *that* hare is still to catch; the five thousand female property-holders who have become millionnaires by their own industry are, as yet, only a theory. When women can make a fortune, the rights and duties consequent upon it will become theirs likewise; meanwhile, let the threatened men live long, and consider that they have received "*leur premier avertissement*," as M. de Persigny would say.

The other book at the head of our article, the '*Experiences of an English Sister of Mercy*,' is

in every respect a contrast to the work of the American lady. It is full of a deep and touching interest,—it is written in a spirit of the truest Christian charity. Although the narrative is personal, the author with graceful ingenuity avoids speaking of herself. There is not an unkind or censorious expression throughout, and yet it is not sweetly amiable and insipid; on the contrary, in spite of convent discipline and the rigours of penance, the author has a sense of humour and love of fun which relieves and brightens the painful details of many of the "experiences." It reveals the touching earnestness with which numbers of women desire not "their rights under the law" or otherwise, but to spend their lives in the endeavour to ameliorate the lot of those who are poor and helpless and wretched. "Led chiefly," says Miss Goodman, "by the wish to minister to untended suffering, in the summer of 1852 I joined the Sisters of Mercy at Devonport." There is a brief but very interesting sketch of the rise of the Institution of the Sisters of Mercy, from the first unpretending endeavour on the part of Miss Sellon to mitigate the wretchedness of the poor, "especially in our maritime towns," and the adoption of fantastic mediæval conventual rules, which she gradually developed till they altogether changed the nature of her first intentions. Miss Goodman remained six years with Miss Sellon. At the end of that time the conventual rules became too hard and the severities too unreasonable, and she left the sisterhood to return to her former avocations. This little book contains her own experiences and her observations on the working of the conventual discipline on others. These observations are very valuable, as indicating a mode of life in which the practical good may be effected without the mediæval and monastic element. There were several orders connected with Miss Sellon's society of various degrees of severity, but all tended to the exaggeration of ancient monastic discipline. Here is a description of one of the orders, the Order of the Sacred Heart, to which Miss Goodman seems for a time to have belonged:—

"The Sister of the Order of the Sacred Heart wore but one under garment, a long, rough, flannel chemise, of which article she possessed two. Those who kept the rule in all its integrity wore no stockings, and sandals in the place of boots; their dress was of white serge, over which they wore, out of doors, a cloak of brown serge topped by a bonnet of black alpaca, to which was suspended a long alpaca veil: the colour of the dress was afterwards changed to brown. On a wet day, when it was necessary to hold up the dress, our great enemies, the little boys, were in a state of considerable excitement; but sisters of this order seldom went abroad except to church. * * The daily rule of the 'Order of the Sacred Heart,' throughout the year, was as follows. I speak from memory:—Rise at 3 A.M. and proceed to chapel immediately, continuing there until 4:30; return to cell for private prayer and meditation for one hour; at six re-enter chapel for the service called *Prime*, which lasted about half an hour; and then self-examination until seven, when all went to their several occupations: these were not usually such as called the sisters from their cells, where each one worked silently and alone. *Terce*, at nine, occupied about fifteen minutes: this service was followed by a sister reading aloud one of the rules of the order, appointed for special meditation on that day. Work was resumed until ten, when came *Sext*, and then came the long-looked-for breakfast, in which dinner was also included: the meal consisted of an ordinary dinner of meat and vegetables, with tea; except on the fasts of the Church, when for meat was substituted rice-pudding or bread and cheese. I cannot tell why it is supposed that fasting, besides being a mortification, is likely to prove a means of making us indifferent to the

promptings of the flesh; why it should be thought that under such circumstances the soul should be less dragged down by the body, and, therefore, capable of higher flights. I have heard those who had tested this by experience, say that, during a severe fast, when walking the streets, engaged in their work, in Church, or wherever they might be, their thoughts would run off from that in which they ought to be occupied, and in imagination they were counting the loaves in some baker's shop with which they were familiar, or something of that kind. The breakfast-table was not left until eleven, the time being spent in reading the Bible generally. From eleven to twelve was allowed for recreation, and until this hour, silence was to be unbroken in the house; but when assembled in the recreation-room, the novices, &c., might speak on certain subjects, if a sister were present. At twelve, *Nones* and meditation until one: then the sisters worked each in her cell until four, which was the time for *Vespers*; after this service we had tea, when there was reading again for an hour. Another hour's recreation was followed by *Complin*, and the household were supposed to be in bed by 7:3 P.M.; a sister going round to see that the lights were extinguished."

It is difficult to imagine how the severity of this discipline could be increased; but it was not the bodily severities which pressed the hardest; it was the gradual attempt to suppress the human element—the affections, the social sympathy—which made the life impossible. Miss Goodman says from experience:—

"Setting aside the question whether such a life causes us to neglect social duties, it is doubtful if a life directed by these rules really trains the soul to any high degree of holiness, or is elevating to the character. It appeared to some who watched it to have the effect of narrowing the sympathies, of engendering ignorance, self-conceit and spiritual pride, and of altogether destroying simplicity and self-forgetfulness. If these observances are really conducive to holiness, it is not worth while speaking of the suffering they entailed, though that was something very real: at least mentally."

"The rule of silence" enjoined by Miss Sellon contrasts curiously with the "female caucus," and the right of women to speak in the senate, sighed for by the American lady. That habit of silence was worth going through a few years of hardship to obtain; but under Miss Sellon's passion for conventual rules, it came to be considered as something sacred for its own sake. One of the sisters, we are told, attained to such a perfection of silence, that, except to the superior and the senior sister, at rare intervals, and in the responses of the prayers, she had not spoken for years!

No friendships were allowed. If a friendship between two of the members be discovered, they are carefully separated. One of the main rules of a nun's life is, that she is to walk loose from human friendship, and she is counted to fall from her rule if she looks for human sympathy. There is the story of the death of a young nun, which is tragic in its pathos, dying in the midst of all the unrelaxed petty rules of self-torment, not because those around her were cruel, but because they had got a morbid idea that if self-denial were good, it was therefore wicked to feel any bodily necessities, and inexcusable to yield to them. Miss Goodman's vocation was for the active, not for the contemplative life. In the record of her experiences as a nurse among the very lowest and most destitute poor during the cholera, as a searcher of the "city Arabs," as a nurse at Scutari, the real use and value of the severe training and discipline she had undergone are made very manifest. No women, unless trained to habits of savage self-denial, hardness of living, and implicit obedience to the rules of their order, could have been equal to the calls made upon them. The mistake lay in considering the train-

ing as *in itself* the end and aim of the lives of the sisters, instead of the work which their training enabled them to do. The sisters were encouraged to think that the privations themselves were something excellent, and to study how to make them more intense and more minute, instead of understanding that their only use was to train them to support hardship, so that, keeping nothing tender about themselves, except their pity and charity, they might be able to give themselves up to the comforting and assisting of all who are in any way afflicted or distressed. No one can read this little book without feeling roused by its quiet heroism to the wish to do something for those who are suffering. The unpretending record of Miss Goodman's experiences, as a Sister of Mercy, will make every reader feel ashamed to lead a life of self-indulgence and ease. The incidents of the hospital life at Scutari are full of heroism. Sir Philip Sydney has come down to us as a type of chivalrous self-denial,—but there are soldiers mentioned who instinctively did like him. Heroes seem to be a race, not wonders and exceptions. The great charm of Miss Goodman's book is the modesty with which she avoids all mention of herself, and the generous, unaffected recognition of everybody else. At last, when the war was ended and the last ship was homeward bound, Miss Goodman and her companions returned to the Home at Plymouth. They arrived at midnight, weary in body, but rejoicing in the prospect of seeing their old companions. They found that during the twenty months they had been absent strict conventual rules had been developed. They found that they who had shared so many dangers and privations together were to bid each other good-bye in the corridor of the Abbey, to meet henceforth as strangers, without exchanging a word or even a glance—for that would have been a breach of rule.

The extended intercourse of the last two years had, it would seem, opened Miss Goodman's eyes to the mistake that lay at the root of this mode of life. She and several others quitted Miss Sellon's community,—and they are now, we trust, using their experience and doing good amongst those who need their help, working under the conditions of being human creatures, and not seeking to be wiser than their Creator. Certainly, of the two modes of elevating women—Mrs. Caroline Dall's and Miss Goodman's—we prefer that of the English lady. In spite of all the mistakes she records in the organization of the Sisters of Mercy, the self-abnegation, the devotedness, the courage called forth, give us a glimpse—

To show us how divine a thing
A woman may be made.

The Lady of Garaye. By the Hon. Mrs. Norton.
(Macmillan & Co.)

Mrs. Norton's new poem is not a great one, nor a long one, nor a brilliant one. But it is a poem that will be very welcome in these days of lengthy epic and blazing drama, whose every line is strung with coloured glass beads for mile on mile together. The author has not lost the cunning of her hand for writing verse that moves in measured music with a stately flow. The stream is not very deep nor rapid; it does not threaten its banks; but it is deeper and swifter than it appears from its exceeding clearness.

The book opens with a portrait of the Lady of Garaye, drawn by Mrs. Norton. The dim sweet mystery of her brooding beauty, stealing softly and nun-like through a veil of sorrow that has fallen over the face, is very tender and touching, and will draw the reader to listen

eagerly for any story that is to be told concerning her. It is curious to notice how like is this portrait to a type of face and features, an ideal—if pre-Raphaelites ever have such a thing—that seems to have been a favourite with Mr. Arthur Hughes. Passing on to the poem, we find that the author has not much of a story to tell, but such as it is, it is related simply and well. Being in Brittany last year, Mrs. Norton came upon the ruined château of the De La Garayes, who founded the Hospital of Incurables at Dinan. The story of their good deeds and noble natures was green and fresh in the memory of the people, though the old château was fast crumbling with decay. Musing among the ruins that are now a home for the bat, the owl, the ivy without, and for desolation and its doleful creatures within,—the author felt a desire to re-kindle in her song the human life that bloomed and faded there long ago. The Count de La Garaye was of noble family, younger son of Guillaume Marot, who was governor of the town and castle of Dinan. He married Mademoiselle de La Motte-Piquet, niece of the Chevalier de La Motte-Piquet who so greatly distinguished himself in the American war. They were matched nobly and lovingly, and dowered by fortune with some of her proudest gifts and graces. Life was all heyday and holiday, and love in their light hearts kept up its May-dance all the year. Here is a picture of the happy wife ready for the hunt, for she was a famous horsewoman, in a waiting attitude, with her gay, brilliant spirits reined into the repose of perfect beauty:—

Like a sweet picture doth the lady stand,
Still blushing as she bows: one tiny hand,
Hid by a pearl-embroidered gauntlet, holds
Her whip and her long robe's exuberant folds.
The other hand is bare, and from her eyes
Shades now and then the sun, or softly lies,
With a caressing touch upon the neck
Of the clear glossy steed she loves to deck
With saddle-housings worked in golden thread,
And golden bands upon his noble head.
White is the little hand whose taper fingers
Smooth his fine coat, and still the lady lingers,
Leaning against his side; nor lifts her head,
But gently turns as gathering footsteps tread;
Reminding you of doves with shifting throats,
Brooding in sunshine by their sheltering cotes.
Under her plumed hat her wealth of curls
Falls down in golden links among her pearls,
And the rich purple of her velvet vest
Slims the young waist, and rounds the graceful breast.

The proud husband may well gaze on her, and fill his eyes and overflow his soul with her beauty, for this is the last time he will thus see her a picture of life, set in so gracious a shape, of love clothed in loveliness. They mount for the chase. She has been accustomed to keep at his side, follow where he leads, or face any difficulties with a challenge to him in her smiling eyes. A chasm lies in the way. His horse crosses it at a desperate spring. He looks back and sees her taking the flying leap with a triumphant look. But her horse fails to land; both go crashing down the stony steep, and all her beauty lies broken in a moaning heap of helplessness, and all her hunting, happy, out-door days are done.

Readers must seek the poem to know what changes this fatal fall wrought in the lives of these two, and how the flushing magic lights and colours of the dawn died into the sad grey and tearful day, and how a more enduring beauty was slowly created out of the lady's suffering embodied in good deeds and charitable works that at length closed and crowned her life as with a solemn sunset, leaving a starry memory that will not pass away.

One of the strongest and fullest passages of the poem occurs in reply to the lady's question when told that she is a suffering cripple thenceforth.—

"What have I done to earn such fate from heaven?"
What have the Poor done who, instead of these,
Suffer in foulest rags each dire disease,
Creep on the earth and lean against the stones,
When some disjuncting torture racks their bones,
And groan and grope throughout the weary night,
Denied the Rich Man's easy luxury—light?
What has the Babe done, who, with tender eyes,
Blinks at the world a little while and dies,
Having first stretched in wild, convulsive leaps,
His fragile limbs, which ceaseless suffering keeps
In ceaseless motion, till the hour when death
Clenches his little heart, and stops his breath?
What has the Idiot done, whose half-formed soul
Scarce knows the seasons as they onward roll,
Who flees, with gibbering cries and bleeding feet,
From idle boys that pelt him in the street?
What have the fair girls done, whose early bloom
Wasting like flowers that pierce some creviced tomb,
Plants that have only known a settled shade,
Lives that for others' uses have been made,
Toll on from morn to night, from night to morn,
For those chance pets of fate, the wealthy born,
Bound not to murmur and bound not to sin,
However bitter be the bread they win?
What hath the Slandered done, who vainly strives
To set his life among untarnished lives,
Whose bitter cry for justice only fills
The myriad echoes lost among life's hills?

We consider the concluding lines to be amongst the best in the book. They offer a tribute in remembrance of that kindly man and quiet hero for a working-day, the late Lord Herbert. At the present moment, when we are in the mood to sum up our great personal losses, they will be read with another application, overshadowed with another meaning. We instinctively turn to him who has lately left us a memory beneficent and beautiful in Peace, and should we have to stand foot to foot in battle for old England—another dear grave to keep!—

Even as I write before me seem to rise,
Like stars in darkness, well remembered eyes,
Whose light but lately shone on earth's endeavour,
Now vanished from this troubled world for ever.
Oh! missed and mourned by many,—I being one,—
Herbert, not vainly thy career was run:
Nor shall death's shadow, and the folding shroud,
Vell from the future years thy worth allowed.
Since all thy life thy single hope and aim
Was to do good,—not make thyself a name.
'Tis fit that by the good remaining yet,
Thy name be one men never can forget.
Oh! eyes I first knew in our mutual youth,
So full of limpid earnestness and truth;
Eyes I saw fading still as day by day
The body, not the spirit's, strength gave way:
Eyes that I last saw lifting their farewell
To the now darkened windows where I dwell,—
And wondered as I stood there sadly gazing,
If Death were brooding in their faint uprising;
If never more thy footstep light should cross
My threshold stone,—but friends bewail thy loss.
And She be widowed young, who lonely trains
Children that boast thy good blood in their veins;
Fair eyes,—your light was quenched while men still thought
To see those tasks to full perfection brought!
But Good is not a shapely mass of stone,
Hewn by Man's hands and worked by him alone;
It is a seed God suffers one to sow,—
Many to reap; and when the harvests grow,
God giveth increase thro' all coming years,
And lets us reap in joy seed that was sown in tears.
Brave heart! true soldier's son, set at thy post,
Deserting not till life itself was lost;
Thou faithful sentinel for others' weal,
Clad in a surer panoply of steel,
A resolute purpose,—sleep, as heroes sleep—
Slain, but not conquered! We thy loss must weep,
And while our sight the mist of sorrow dims,
Feel all these comforting words die down like hymns
Hushed after service in cathedral walls;
But proudly on thy name thy country calls,
By thee raised higher than the highest place
Yet won by any of thy ancient race.
Be thy sons like thee! Sadly as I bend
Above the page, I write thy name, lost friend!
With a friend's name this brief book did begin,
And a friend's name shall end it: names that win
Happy remembrance from the great and good;
Names that shall sink not in oblivion's flood,
But with clear music, like a church-bell's chime,
Sound thro' the river's sweep of onward rushing time!

The publishers have done their best to make 'The Lady of Garaye' acceptable for the drawing-room table, where its sombre richness, darkly golden, will make it more in keeping with the feeling of the time than many gay-gilt gaudy books of the season.

Iceland: its Land and People—[*Island: seine Bewohner, Landesbildung und vulkanische Natur*, von G. G. Winkler.] (Braunschweig, Westermann; London, Thimm.)

Nor long ago appeared in these pages a notice of 'The Oxonian in Iceland'; and now we have the diary of a painstaking German Professor, who departed from all his habits, in order to be most uncomfortable for a season in Iceland. The difference between English and German tourists is thoroughly visible in a comparison of these two works: the former are always the discoverers, while the latter follow in their footsteps, and display that "thoroughness" which is the characteristic of the Teutonic mind. Prof. Winkler, at every jolt he received from his merry little pony, indubitably asked himself, with repining, "*Que diable allais-je dans cette galère!*"—but he bravely endured the detriment he suffered, in the consciousness that he was enriching his Fatherland with new material for study. His researches into the nature of the Geysers, his geological descriptions of Iceland, are undoubtedly valuable, but heavy,—and we will have none of them. With Mr. Metcalfe's book lying before us, we purpose to institute comparisons, and supplement the information that reverend traveller has offered intending Icelandic tourists, from the pages of this most learned of German Professors, who regards humanity from too elevated a stand-point ever to condescend to a joke.

With an uneasy movement in his easy chair, at the mere thought of what he has endured, the Professor tells us of the perils that environ the traveller in Iceland. In the first place, there is the "Heidi," or plateau, which is terrible work for the horses, as they stumble at every step; and if their burden be a bad horseman (as the Professor confesses himself), he has abundant opportunities for making a furrow with his nose. Next comes the "Hraun," or lava stream, on which the pony certainly does not stumble, but makes up for it by slipping with all four feet simultaneously, which must be anything but agreeable for a German Professor. The next pleasurable excitement is produced by the fact, that Icelandic travellers have to pass an infinitude of mountain torrents; and there is only one bridge in the island, and that happens to be under water. Lastly, may be quoted the "Myri," or morasses, which the traveller constantly comes upon, and finds very difficult to pass, because he is unable to imitate Baron Munchausen, and drag himself and his steed out of the bog by seizing the hair of his own head.

Travellers in Iceland have two alternatives: they can either take their own tent, or trust to the hospitality of the peasants. As in either case they will come frequently into contact with the population, Prof. Winkler is quite right in devoting a large portion of his volume to the people. One of the most prosperous of the peasant class Prof. Winkler came across at Ríykjahlid, in the Northland; and the following extract will give an idea of an Icelandic Paradise:—

The walls of the room are still of the colour of the wood, but it is easy to see that they are new. Within a year, the peasant remarks, they will be handsomely painted. In the background our searching glance detects a small alcove, and a clean bed is visible between the half-drawn chintz curtains. The space between the windows is occupied by a table and several easy-chairs. Against the walls, to the right and left, stand chests, a newly-polished commode, and a species of secretaire in oak. The conversation between ourself and the peasant certainly progresses but poorly, as

we both maltreated Danish; but, ere long, his daughter appears, an underset girl, with bright red, plump cheeks, and the stumpy nose peculiar to the daughters of the land. She is busy in preparing the meal. The tablecloth is of snow-white linen, the service of the finest china, and the spoons of heavy silver. Soon a tureen of rice-soup steams on the table. The following dishes are magnificent:—trout, with their yellowish-red meat—smoked mutton—eggs, supplied by the ducks dwelling on the adjoining lake—some of the well-tasted national dish, *skyr*—and, as the finale, coffee. A gourmet might possibly have had some fault to find with the cookery; but the hungry traveller is not dainty. When, besides these enjoyments, he has the certainty that a bed of down is awaiting him, such as can only be met with in princely palaces, he has everything combined to make him comfortable.

Unfortunately, all farm-houses in Iceland are not equal to this, and our Professor saw the reverse of the medal at a place called Stabbaruacstadir, where he had to pig in what the Icelanders call the *Badstoba*, or sleeping-room. In this small windowless hole ten people spent the night, and the effluvium was stifling, though even here our Professor had a silver spoon to eat with. At night the room was converted into one huge bed, and the sight was the more remarkable because the Icelanders have a fashion of sleeping so that the feet of one are against the head of the other.

The houses of the better class in Iceland are generally built of pieces of trapp, tuff and lava, loosely bound together with patches of turf, for there is no lime on the island to make mortar. Wood is very sparingly used in the poorer houses, as it is so expensive, being all brought from across the sea. The consequence of this use of turf is, that the houses are nearly all excessively damp, and the wood lining is very soon destroyed. The rooms in the houses are not large, but the whole family employ them for sleeping. Young and old, master and servant, male and female, lie together. The beds generally consist of woollen blankets, and from a feeling of economy, every article of clothing is doffed on retiring to rest. In the small Westmanns Islands, to the south of Iceland, during the winter the sheep occupy the *Badstoba* with the inhabitants; for, curiously enough, throughout Iceland the stove, which might be supposed indispensable, *brille par son absence*. It is only visible in the houses of the officials and the merchants; for seaborne coal is fearfully expensive, and there is no wood or coal on this island. The only substitute is peat; but the islanders have not yet discovered its value. As a natural result, the inhabitants employ the most extraordinary firing material. The commonest is the dung of sheep and cows; the latter, which lies during the winter on the meadows, is collected in spring, and burnt in the kitchen. Sheep dung requires some preparation. The sheep-houses are never cleaned out during winter, so that the dung is trodden into a compact crust by the animals. This is removed in spring, and cut into small pieces, which are laid out in front of the houses to dry. The poor fishermen are not even blessed with this fuel, and hence they burn fish-bones, dried seaweed, &c. The inhabitants of the Westmanns Islands are the worst off of all, and they burn the bones of birds. Two kinds of birds assemble in extraordinary numbers on these islands—the sea parrot (*Mormon fratricula*) and the stormy petrel (*Procellaria glacialis*). The meat of these is cut off and salted, while the bones, entrails, &c. are dried and used as fuel. It requires an Icelandic nose to endure the stench thus produced.

We have mentioned a favourite dish called "Skr," and may here state that it is half-made cheese of sheep's milk, and, when fresh, is not

particularly sour. The winter stock is prepared in summer; and the older and more sour the skyr becomes, the more healthy it is considered. Most of the butter eaten on the island is made of sheep's milk. There are old rules in vogue settling how much butter the farmer must give his men and maids daily. During the fishing season each man receives 3½ lb.; at ordinary times the man has 2½ lb.: the maid half that quantity. The use of meat, however, appears to be limited:—

The Icelanders generally eat only mutton. In September and October is killing time, for then all animals must die that cannot be fed during the winter. The greater portion of the meat is smoked or pickled. The well-to-do peasants eat meat on Sundays and holidays; and there are certain laws, too, how the master is to treat his servants in this matter. They must receive meat at Christmas, the beginning of Lent, the beginning of summer, and a few other days. The Icelanders prepare smoked mutton excellently, and it is a very nourishing article of food, especially useful for travelling. Capital sausages are made of the sheep's blood; but they are spoiled by the introduction of almonds and raisins, after the Danish fashion.

Next to the sheep the most important animal is the horse,—although these poor animals never know the taste of oats, and fare terribly, especially in the Southland, where no stables are allotted them. They are compelled to dig up the grass from under the snow; and, if that resource fail, put up with seaweed. Many, of course, perish; for blankets and the other precautionary measures we employ with our horses are utterly ignored in Iceland. About 80 per cent. of the Icelandic population live by cattle-breeding; one-half of these also turning their attention to fishing in the season; while one-sixth live solely by the produce of the fishery. The piscine wealth of Iceland is so great that it would be able to support the entire population, were it properly worked. At present, however, the sea only possesses the value of a productive river, flowing past the western side of the island. The Dutch and French fishermen reap a fine harvest here in the summer months. The social condition of the fisherman is very lamentable; for he is exposed to the icy weather with no other nourishment but chewing tobacco and skyr. If he be successful in fishing, and catch any fish not suited for trade, he boils them for supper; if not, he cuts off the heads of the cod-fish, and boils them for himself, but dries the fish and sells them to the dealer:—

The most favourite food of the Icelanders after skyr is cod dried in the air. So soon as the fish is caught, it is split up, and, after being cleaned, is hung up to dry in cabins built for the purpose. When it has attained the state of dryness that renders it edible, it is so hard that it defies the best teeth; and, before eating, it has to be beaten. In front of every house there is a large stone with a flat surface, on which this operation is effected, with another stone. This beaten fish, covered with a thick layer of butter, is preferred by the Icclander to the best bread.

The rivers of Iceland are also full of the most splendid trout, but they are completely neglected. Not long ago poor men starved, while the river that ran before their huts swarmed with food. At the present time Englishmen have hired the rivers, and export the trout in large quantities. The Eyder duck also breeds in various parts of Iceland; and, as there is a heavy fine against shooting one of them, the birds are quite tame, and do not even quit their nests when you walk among them. A few grouse are shot in winter, when they come near enough to the houses, and are sent to Copenhagen; but the wild duck and woodcock are left at peace. On some parts of the coast the seals are placed under the protection

of the law, the young being caught in traps during spring; and the oil they produce forms a considerable article of trade. Lastly, we may mention the collection of Iceland moss, which is also exported.

As there is only one artisan on the island, and he is a saddler, the farmers must necessarily be jacks-of-all-trades, and they have but little idle time on their hands. Still, they are remarkably attentive to their guests, and, as a rule, hospitable, although the affluence of strangers is producing a marked change. In Iceland, attention is paid to the guest up to the moment when he gets into bed. He is also helped in taking off his clothes, and the Professor had been told, before beginning his trip, that this office was left to the daughters. This, however, he found incorrect, for wherever anybody attended to him it was sure to be a man or old woman. If the number of boot-jacks offered a gauge of the civilization of a country, Iceland must stand very low in the scale. During the whole tour our friend only saw one, and it was decidedly a nuisance to have to pull off long riding-boots without the aid of that useful adjunct. To English tourists troubled by this we commend a plan still in vogue in remote parts of Germany. You sit down and elevate your foot; Boots, with his back turned to you, gets astride your leg in a stooping posture, and you kick him violently with the other toe till the boot comes off,—*probatum est*. It is gratifying to learn that the Icelanders, through their contact with travellers, are becoming cleaner in their habits, though, now and then, in their zeal, they make matters worse instead of better. For instance:—

A clergyman in Westland, whose guest I had been, escorted me on my departure. In spite of the most unpleasant weather, he rode for an hour with me. When the time for parting arrived, we dismounted, and the clerical gentleman produced the two articles which keep the Iclander erect in the most desperate moments, his snuff-box and brandy-flask. First came the turn of the mull; with his back to the wind, to keep the snuff from being blown away, he poured a lot upon my hand and his. The snuff was followed by the dram-flask, and a hearty pull at that dispersed the last shadow of seriousness on his inflamed face. When about to hand the vessel to me, the thought suddenly occurred to him that it ought not to pass from his lips to mine without being first wiped. But this idea produced one embarrassment after the other. First, he pulled out his handkerchief, but at the moment of using it it occurred to him that this article was not remarkable for its cleanliness, and the same was the case with waistcoat, trousers and cloak, so that he was compelled to use the handkerchief after all.

Snuff is greatly used in Iceland, especially by women, and they carry it in a contrivance resembling a moderately sized powder-horn. In-doors, they spread the snuff on the back of the hand and slowly inhale it; but when riding, they throw their heads back and thrust the end of the horn into each nostril in turn. A way of cleansing plates peculiar to Iceland is having them licked by the dogs. At Skalholl, this brought the Professor into a dilemma; a splendid trout smoked on the board, but the plates bore the too plain marks of the passage of the dog's tongue which he had seen engaged on them a few moments previously. Hunger gained the victory over disgust.

As a general rule, the Professor found the Iceland farmers good-humoured and simple. When you stop at the door of a house you must not enter, however, till one of the inmates has come out to greet you. Of the educated classes the author gives a quaint account:—

Among these, generally represented by the clergy, you notice a strange mixture of civilization and what would be regarded as coarse habits else-

where. Thus, I spent the day with a venerable pastor, from whose button-hole the cross of the Danebrog hung by a red and white ribbon. He was well versed in German literature, and every now and then wove passages from the Latin classics into his conversation. At the same time, though, the absence of a handkerchief entailed a well-known manipulation with the fingers; and the brown juice of his quid constantly streamed out of his mouth. At another pastor's house where I spent the night, a bed was made up for me in the gentleman's study, in which some French lady's bonnets were hung up. Just as I got out of bed in the morning, the Frau Pfarrer walked in. I naturally thought she would retire on seeing a man in the deepest *négligé*, but, nothing of the sort. She gently shut the door, as if no one was in the room, and quietly knelt down to search in a drawer.

Our Professor protests against the notion that a tour through Iceland is cheap. Each traveller must have six horses: two for himself, two for the guide and two for the baggage. You are obliged to pay for your lodging and food, and more expensively than at a German hotel, for it is given in the name of hospitality. The general rule is to make a present to the children; but the Professor frequently asked what he had to pay, and was charged more than he expected. He calculates that the simplest mode of travelling entails an expense of 15s. a day. Although, as a rule, people expect to be paid, there are exceptions:—

In the Westland I had occasion to enter a valley, and a peasant I found making hay accompanied me as guide. On our return we passed his farm, and on parting I gave him a piece of money for his trouble. The man turned pale, and regarded me with such a melancholy expression, that I fancied I had given him too little. Gradually, however, he regained his tongue, and asked how I could think him capable of taking money from a man who had come so far, and for such an object. He was so affected that my only way of appeasing him was by insisting on his taking the money as a recompense for his loss of time.

The farmer only consented when Prof. Winkler agreed to drink coffee with him. On the other hand, the clergy, who are the general travellers' friends, appear to have taken lessons from Mine Host of the Raven, at Zurich,—that bird with a long bill. The fact is, that the Icelanders went to the school of the Danish traders, and were attentive students; for they boast that they are quite equal to their masters as regards cunning in money matters.

Among the Icelanders a lively national pride is universally found. They like to speak of themselves as a nation, though the European finds a difficulty in giving that title to a people of 60,000 shepherds and fishermen. To this pride they join the deepest love for their home; they never emigrate, though, curiously enough, a Mormon priest a few years back induced a Westland farmer to leave the island with a band of girls. As there are no schools, the duty of educating the children falls on the parents, the clergy exercising a control. This duty is excellently performed, and there is certainly nobody in the land who cannot read and write. The Icelanders are faithful followers of the Evangelic Lutheran Church; and the French missionaries will hardly succeed in perverting one of them, for they seem to have no inclination to manifest piety by external symbols. Still the clerical class is the only one addressed by the title of "Siera," or Sir. With these exceptions, no distinctions are kept up.

We will not visit the Geysers with our Professor, or accompany him to Hekla (which, by the way, he did not ascend), for it would be a twice-told tale. Our object has been to supply some idea of the social condition of the Icelanders; but to those of our readers who wish

to know more of the island itself, we can honestly recommend the work under notice, as giving an exhaustive account of a most interesting country and people.

The Story of King Arthur, and his Knights of the Round Table. Compiled and arranged by J. T. K. (Griffith & Farran.)

IN the twelfth century, William of Malmesbury, the painstaking historian, dedicated his noble work to Robert Consul, the natural son of Henry the First, and the first Earl of Gloucester. Camden says of this Robert, who died in 1147, at the early age of thirty-eight years, that "he was the only worthy of his age in England." The historian and the noble stand about half-way between the period of King Arthur, the sixth century, and that in which we live. By aid of the literary monk writing for the information of the intellectual Earl, we are enabled to learn what was thought of Arthur and his history, six hundred years after the hero's death. "It is of this Arthur," he says, "the Britons fondly tell so many fables, even to the present day; a man worthy to be celebrated, not by idle fictions, but by authentic history. He long upheld the sinking state, and roused the broken spirit of his countrymen to war." The writer believed in the man and in his deeds, lamenting only the admixture of these with fables, invented by the very excess of popular love and admiration. Of the reality of the patriotic chief he entertained no doubt. When recording the discovery of the grave of Walwin, the nephew of Arthur, in the time of King William, the writer adds,—"He deservedly shared with his uncle the praise of retarding, for many years, the calamity of his falling country." Thus, at the end of six centuries the intelligent and inquiring minds of the nation had faith in the being and the doing of Arthur; and when more than six more have passed away, and fiction has dislodged a brilliant amount of fact, we find a competent authority such as Dr. Giles, who has thoroughly inquired into the subject, censuring the indiscretion of admirers, who by exaggerations have marred the honest fame of a patriotic prince; but denying entirely that because of the existence of the myth we are authorized to deny that of the man.

The very myth itself is, in some cases, war-rant for the being of the man. Fable informs us of the conquests of Arthur, not merely in England, over the invading Saxons, but in Scotland and Ireland, in Norway and in Gaul, and of his triumph and his crowning in Rome itself, whence he returned home, to quell treason; in combating with the authors of which he lost his life. Now, it is certain that wherever fable carries him, fame perpetuates his name. He has seats and hills and towers called after him in various parts of these islands. In Brittany, his title is preserved in popular songs, as it is indeed, in Germany, in popular tales; in Italy, "Arturo" is not yet forgotten, though Orlando is the heir of much of his renown; and in the North, ballads of the Great King contrive to cherish his reputation. There must have been some foundation for this universality of fame; and for the latter reason we may accept the declaration that Arthur lived, though the life and the alleged acts cannot be reconciled by proof. Out of the dark periods his name has arisen, surrounded by a marvellous brightness and consecrated by an abiding love. If we believe, as there is reason for believing, that Vortigern invited the Saxons hither, in the latter half of the fifth century, there is no good reason for disbelieving that they were terribly harassed by Arthur, in the

first half of the sixth century. Nennius may be accounted as, at least, the transmitter of good evidence in this respect. It is not necessary to look for testimony of Arthur's passage in other countries, where perhaps his renown alone, and not his person, passed. Black Hugh was about to slay King Diarmuid, when Arthur is said to have conquered Ireland; in Scotland, he had small grounds for interference, seeing that the Third Eugenius reigned there, of whom it was remarked that none excelled him in justice. In Norway, he may, or may not, have appeared, for conjecture itself is vain on that point; and there is no "history" even, properly so called, till the infant Olaf Shotkonung reigned, above five centuries after Arthur was laid in his unrecognizable grave. When our hero carried his enchanted sword into Gaul, the four sons of Clovis were struggling for the sole inheritance of their father; and when the same form of romance conveys the same hero to Rome, Totila was burning and pillaging amid the very wreck of the Western Empire, and nobles and ladies were begging their bread at the doors of the Goths. In the very Poppedom there was dire confusion also; for Vigilius must have been, about that time, striving against his adversaries, and enduring banishment which was easier to bear than the anxieties succeeding his restoration. Altogether, it will have been seen that the world was in such confusion, bards and minstrels may have sent any favourite hero anywhere, and settled on him any amount of impossible deeds,—there was no writer to examine and confute them. The favourite hero was this son of Uther Pendragon, and they rewarded him for his patriotism at home by making him the conqueror and liberator of the world at large.

Some writers, who deny the existence of the Great King altogether, take his story as a series of symbols and allegories. Gryphius is at the head of those writers who affect to recognize in Arthur a personification of the Sun, and discover in his Round Table and its Twelve Paladins, a poetized figuring of the Zodiac and its twelve signs. That the romance connected with his name is in many parts an allegory, may be easily conceived. The young boy, watched over by Merlin, shadowed forth a training by wisdom; and when the youthful but unknown heir proved his right to the crown of Britain, by drawing from the block of stone in which it was imbedded, the sword at which ambitious and full-grown men tugged in vain, we have a picture of the combined triumph of purity, innocence and right. The invincible sword Excaliber, given him by the Lady of the Lake, is the guerdon of beauty to animate youthful valour; but when Arthur, hotly pressed in the fight at Badon Hill, kneels, red as the rising sun from spur to plume, kisses the cross on the hilt of the sword, and then sweeps in bloody victory through a thousand foes, the lesson implied is, that the thought of worldly beauty will not inspire, nor an arm of flesh accomplish conquest, but that reliance must be had upon the Power which can award the glorious issue of battle to the weaker side. The trusting on strength derived from ladies is often censured throughout the volume. Sir Balin, by relying on the strength thus improperly derived, came to grief, and struck that famous "dolorous blow," whereat a castle fell into ruins, and the Sangreal, or "most holy cup, wherefrom the wine was drunk at the Last Supper of our Lord, disappeared therewith." Thereby were candidates for chivalric distinction warned of the ruin, bodily and spiritually, that would follow too much devotion to the fair sex, particularly when the latter were no better than they should be, a condition

which distinguishes several in this romantic record of knighthood, its perils and its duties. Again, when Pallinore administers that terrible drubbing to Arthur, the latter acknowledges his defeat with such frankness, and does justice to his vanquisher with such alacrity, that we see therein the duty and dignity of fair dealing with the most obstinate of enemies.

We have said that among the most significant lessons conveyed in this romance, is the one which teaches man to be particularly on his guard with respect to the ladies. The utter weakness of the wisest, who can administer caution to others and are unable to exercise it themselves, is illustrated in the story of Merlin, who warned Arthur against espousing that fair piece of mischief Queen Guinevere, and yet became such a Sir Amorous Feeble to be toyed with, tricked, cajoled out of his secrets, and permanently ruined by that pert and pretty hussy Vivien. This is a fine apologue for all old lions in love; and the age of the apologue shows at how early a period the old and doting lion was apt to make an ass of himself. It is in his love affairs that the heroic Arthur was the least of a hero. A pretty face and a bright pair of eyes took his mind prisoner. See the consequences of his not caring for blamelessness of reputation on the part of his bride, and of his carelessness in exposing her, in his absence, to the seductive story-tellings and pleasant pastimes of that wicked Sir Lancelot! Such mischief came of it as only a dozen Sir Cresswell Cresswells in the courts of chivalry could have dealt with. The anonymous romancer makes but an unbecoming conclusion to this story of illicit love and marital negligence. When Arthur returns home, to find his wife eloped, and to hear of the facile Sir Lancelot making oath in support of her truth and her purity, some sharp words ensue; but Sir Lancelot, sorry for his misdeeds or weary of his mistress, whom he had rescued from the stake to which she had been condemned, undertakes to restore her in a week! At the end of that time the seducer brings her to her lord, who receives her sitting on his throne; and Lancelot leaves her in that good company with the cheerful and encouraging remark,—Not to fear; to have the kindness to pray for him; and "if ye ever," he adds, "be defamed of any, let me hear thereof; and as I have been ever thy true knight in right and wrong, so will I be again"! A pleasanter observation, in the presence of the deluded husband, can hardly be imagined. Arthur here loses all dignity, according to our ideas, for he gives his hand to Sir Lancelot to kiss, and bursts into tears as his false friend turns his face homeward!

The womanly character is certainly not elevated in this chivalrous romance. Even Elaine, the lady of Astolat, is a forward minx, who is not ashamed to inform Lancelot that she desires to marry him, and that she will be exceedingly ill, and perhaps die, if he does not become her husband. Guinevere herself is a poor sample of what even repentant wives should be; for though she retires to the convent at Ambresbury, it is not very clear if duty, or the want of it, to her afflicted and easily-forgiving lord, impels her. As for Lancelot, when he hears of this final step, he turns hermit, and is just the sort of man to have hired a ready-furnished cell adjoining the Queen's convent in Wiltshire.

The poet has soared far above the romancer, and, by his narrative of the last scene between Guinevere and Arthur, has touched the hearts and opened the fountains of tears in the bosoms of thousands. A misty halo of dignity, grandeur, grace, majesty, enwraps the royal hero of the Idylls as he departs from the sinning

wife whom he forgives—not like a husband in Wycherly's comedies, but as an angel might. In the romance, he sallies forth to his last battle; and when his wounded body is borne by water to the Vale of Avilon, there is a feeling—whatsoever may have been the merits of the real man—that we are very much relieved by this departure of the hero of the romance.

Chivalry could have had little in it that made men great or kept women pure, if, in spite of the implied instruction, they were not superior to the boasting, swaggering, lying and intriguing knights, and the rather impudent and inconsistent women of this old romance—which has been very well abridged and adapted for modern readers, in the handsome volume before us. It would seem, however, as if chivalry could yield little that is for our edification. Tennyson has touched it to the most delicate refinement of which it is susceptible. Coleridge, as we fancy, attempted to do so in his fragmentary poem of 'Christabel.' But what does that tale of chivalry teach? That a young lady, with a latch-key in her pocket, who wanders about alone at night, and takes home to sleep with her the first houseless girl she encounters, is likely to pay dearly for her freak, and to bring a world of trouble both upon herself and upon that very respectable gentleman, her father!

NEW NOVELS.

White and Black: a Story of the Southern States. 3 vols. (Hurst & Blackett.)

ENGLAND has pretty well recorded her views upon slavery. There are various ways of testing a man's practical faith in his own opinions. No belief can get itself established until it has had martyrs who have dared to die for it:—people have ventured to suffer shame, ignominy and "the loss of all things" sooner than depart from what they believe to be right. Short of these extreme testimonies, but still a tolerably sharp practical test of a man's sincerity in his profession of faith, is his willingness to pay down an inconveniently large sum of *ready money* for it. Men may sign bills as they run up bills, without realizing the fact; but to pay ready money is a dead lift out of a man's pocket, about which there is no charming illusion, except in those old-fashioned plays, where Mr. T. P. Cooke, as a sailor on shore, representing the old British Navy, used to take out a long purse, stuffed at each end with *soldisant* Bank notes and guineas, and hand it, with an inimitable heartiness, saying, "Here, messmate, take this: it is prize-money taken by the Timbuctoo!" and his virtue was enthusiastically rewarded by the whole house. But when it comes to paying the conscience-money to a gruff, stoney-visaged tax-collector, who never says or feels a "thank you kindly":—then paying for a principle sustains a tolerably strong test for everyday wear and tear. Now, England *has* done this, and more than this, to express her detestation and abhorrence of slavery; and England, more than any other nation, has that quality which jockeys call "stay" in a horse, and without which no generous enthusiasm is worth more than a flash in the pan,—good to kindle, but worthless for warmth. Now, what England has done once she can hold on by in all its consequences, without weariness or fickleness. The hatred of slavery by Englishmen is a thing said and done and settled. We have no more enthusiasm to bestow upon it: all that goes now to feed our persistence in our opposition to it. We do not talk about it,—we do not discuss it;—*but* we continue to pay taxes to suppress it wherever we find it. Whilst doing this like Britons,

we must enter an emphatic protest against being bored with it in our novels and books of amusement. Exquisite white heroines, who somehow turn out to be black in the course of the story, and so can legally be treated as if they were tables or chairs, or dogs or horses, are to be pitied, and we do pity them, and we have pitied them accordingly; but when, under the pretence of amusing us, we are presented with three volumes full of abolition speeches and details of all that a delicately-nurtured and highly-educated young lady must feel, who, having been brought up as an heiress and in ignorance that she has Negro blood in her veins, and whose father is a furious brute, who, to revenge himself on an Abolitionist, "sells his daughter down South,"—or to have details of all the domestic misery, jealousy and cruelty which the female Quadroon slaves bring to the lawful wives, may be all very true; but it is a great bore to listen to a sermon on doctrines we have lived by, and accepted absolutely, for years. "Prêcher un converti" is the deadliest infiction that human ingenuity can devise, short of bodily torment.

'White and Black' is a good, sensible novel of the kind; the arguments and illustrations are all of our own persuasion. Irene is a heroine who is very troublesome to her friends, and who might have kept out of all the adversities and dangers which befell her, if in the beginning she had listened to advice and used some common sense; but as she was predestined by the author to point his moral and adorn his arguments, of course she could not help it. She was born to ill luck. We confess to feeling great sympathy with Chauncey Burgoyne, the fine, high-spirited planter, who becomes converted to Abolitionist views, and loses his life in their defence. The story is as well done as a story of the kind can be; but we protest against being dragged through details of the evils of slavery, from brutal floggings to more brutal love. Besides which, our sympathy for Irene is entirely destroyed by the last page in the book, which casts a doubt on her ever having been good for anything: "It may be that death has already removed the bonds of the young American girl; it may be that she still lives degraded, broken-hearted." We can only feel that if she could "live degraded" after all she had known and felt, and the sacrifices of noble lives that had been made for her, she deserved her fate. The Slave-question is avenging itself fearfully, at this moment, in America. The half-hearted North is trying "to go two ways" at once in regard to slavery; it wants all the credit of repudiation, and all the convenience of cotton-growing slaves freed by others. It degrades men of colour, and makes their condition, to the utmost generation, that of pariahs; pretends to afford them liberty, whilst it insults them as human beings. Has the North dared to accept its own principles and act on them? Has it dared even to fight for its belief in the right of slaves to freedom? and fighting for a point is the very easiest and most primitive form of faith. In conclusion, we beg to enter our own protest against anti-slavery literature. The perverseness of human nature is great, and a few more books like 'Uncle Tom's Cabin' and 'White and Black' would go far towards turning the current in favour of the masters, instead of the slaves.

The Seven Sons of Mammon: a Story. By George Augustus Sala. 3 vols. (Tinsley Brothers.)

Norman Sinclair. By W. Edmonstone Aytoun, D.C.L. 3 vols. (Blackwood & Sons.)

THE above are both reprints, Mr. Sala's novel having appeared in the *Temple Bar* and 'Nor-

man Sinclair' in the pages of *Blackwood*. They are both very good in their way, although their ways are as opposite as can be imagined. 'The Seven Sons of Mammon' is a most exciting spirited romance: all the characters, all the incidents, all the accessories, taken separately, are graphic and life-like sketches, yet the story, as a whole, is as much like real life as a display of fireworks is like daylight. It is very clever, very spirited, full of "go"; no reader will leave off until he reaches the end. The mysteries and complications are inscrutable up to the last page; and yet they are so gently and firmly wound up that no reader who is reasonable can be dissatisfied. It is true that everything is not explained at full length; but enough is indicated to be sufficient: indeed, we have never seen a winding up of a complicated web of incidents so artistically and satisfactorily managed. Mr. Sala has had patience to the end,—there is nothing huddled, nothing slovenly,—the end is worked as carefully as the beginning. The picture of Sir Jasper Goldthorpe and his wife after their misfortunes is admirably painted and true to nature. Nearly all the people in the book are somehow or other *aux prises* with justice; but there are subtle redeeming traits introduced, which link them to our sympathy, without spoiling their rascality, which would have been a pity. As to Florence Armytage, there was some one who answered very much to her description tried at the last Cour d'Assises; and at the time it struck us she might be the person we were reading about as Florence Armytage; but there is a class, and Florence Armytage is only a specimen brick. The reader is more inclined to be sorry for her, than to rejoice when she comes to her "agony." 'The Seven Sons of Mammon' proves that Mr. Sala is capable of a sustained effort, and we recognize his claims accordingly.

'Norman Sinclair' is a compact and thoroughly careful work; it is well written, and it is a vehicle for working the author's own thoughts and opinions rather than a work of fiction. It might all have happened,—perhaps it is a life that is now actually going on. No fault can be found with it. The reader lays it down with a feeling of respect for the author; but he also feels that he has been reading a very sensible book. He may or may not sympathize with the politics; but that will make no difference to his great respect; only from first to last he will never believe that he has been reading a work of light literature, or that the author had the remotest intention to amuse him. That point once conceded, the reader will have no complaint.

The Law of Nations considered as Independent Political Communities. On the Rights and Duties of Nations in Time of Peace. By Travers Twiss, D.C.L. (Oxford, University Press; London, Longman & Co.)

No division of legal or historical science suggests more frequently than International Law, the analogy subsisting between individuals and states,—between the rules which regulate the dealings of private persons and those which govern the intercourse of independent communities. Indeed, of the various forms of profitable amusement in which an intelligent student will find his reward for perusing Dr. Twiss's treatise, the principal will be that of detecting and surveying these numerous points of comparison. Even as men are but children of larger growth, nations are but men of greater capabilities and nobler proportions; and in their history we see on a magnificent scale the same sequences of cause and effect that rouse

our interest in the petty dramas of private affairs. In the absence of any principles in Feudal or Ecclesiastical Law, out of which a system of International Law might be constructed, Grotius sought inspiration and guidance in the State-system to which the early jurisprudence of Rome had given sanction. Taking a retrospect beyond the total disorganization of national relations, consequent on the Reformation and the religious alliances of the Thirty Years' War, and beyond the uncertain darkness of the Feudal epoch, he fell back on Cicero's definition of a state as "*cœtus multitudinis juris consensu et utilitatis communione sociatus*." It is true that Cicero's treatise, lost to Europe from the close of the twelfth century, was not before Grotius; but the '*De Civitate Dei*' of St. Augustine had preserved to the jurists of the seventeenth and eighteenth centuries the words placed by the Roman jurisconsult in the lips of Scipio Africanus,—words that might otherwise have remained without effect until the fragments of the Vatican Palimpsest were deciphered in the earlier part of the present century. The phrase accurately transmitted by St. Augustine was developed by Grotius, who defined a state to be "*cœtus perfectus liberorum hominum juris fruendi et communis utilitatis causâ sociatus*," the introduction of the word "*perfectus*" being probably due to Aristotelian influence, and the substitution of "*liberorum hominum*" for "*multitudinis*," pointing to that freedom of the individual man which, as Dr. Twiss expresses it, is "the keystone of the arch upon which the whole system of Grotius rests." Thus constituted, nations were invited by the jurists to act upon certain recognized principles and adopt certain particular rules in conducting their mutual intercourse. The same motives animated Grotius, Puffendorf and Christian de Wolff which, in 1815, inspired the Emperors of Russia and Austria and the King of Prussia to enter into the famous personal league known as the Holy Alliance. It became manifest to the different independent powers of Christendom that they formed in the aggregate a family whose interests would be greatly advanced by their living as far as possible on a friendly footing with each other, and that such amicable relations could not by any possibility be maintained unless they as free nations would frame and uphold a body of laws by which to guide and arrange affairs of international concern. It only remained therefore to set out the general principles to be observed on all questions, and to prescribe the line of action to be adhered to in particular cases. To arrive at conclusions on these points, the jurists made immediate reference to those primary rules of equity which in the conduct of individuals amongst themselves had obtained the force of ancient respect and usage. Hence arose the practice of attributing personality to nations, and discussing points of international dispute as though the parties concerned were persons. "A civil state," says Puffendorf, "is a compound moral person, whose will being united and tied together by those covenants which before passed amongst the multitude, is deemed the will of all, to the end that it may use and apply the strength and riches of private persons towards maintaining the common peace and security." In the same way, Vattel forms a metaphysical conception of the being of a state, when he says, "such a society has its affairs and its interests; it deliberates and takes resolutions in common: thus becoming a moral person, which possesses an understanding and a will peculiar to itself, and is susceptible of obligations and rights."

International Law stands in the same rela-

tion to nations that moral philosophy holds to independent persons. The object of all its provisions is the welfare of the entire family of nations; and as it was with a simple reference to this object that the provisions were in the first instance ordained, so also by a similar reference they can only be at the present day defended. The Natural Law of Nations divides itself into Natural or Necessary Law and Positive or Instituted Law; the analogy between the two divisions of International Law on the one hand, and the two grand divisions of Moral Law on the other, being pointed by the modes in which nations, under strong temptation and with adequate opportunity, set aside the restrictions of the former code, just as individuals, under similar circumstances, disregard the prohibitions of the latter. It is from the tendency of powerful states to break the laws of International Morality, and the consequent opposition on the part of rival communities, that we obtain those strongest expressions of personality, and those most marked exhibitions of feeling which give individuality to the policy and career of nations. Hence comes the long struggle of independent powers, reproducing on the great arena of civilized countries the jealousies and combinations of domestic strife, and after centuries of conflict and defeat and re-arrangement and fresh dissatisfaction, presenting us with the various incidents and modifications of international life, which are found amongst the state-systems of Europe.

The chapters of Dr. Twiss's volume which are richest in the results of personal investigation, and will consequently best repay the attention of the general reader, are those on "The Incidents and Modifications of International Life," and "The National State-Systems of Christendom." The chapters on the "Right of Legation" and the "Right of Treaty" contain also much that will induce readers, for whom treatises on Law have, under ordinary circumstances, few attractions, to peruse a work, the erudition and power of which will add to its writer's high and well-earned reputation.

Rambles in Western Cornwall, by the Footsteps of the Giants. By J. O. Halliwell. (J. R. Smith.)

Mr. Halliwell writes under the disadvantage of having had the most picturesque and popularly interesting materials for his subject already dealt with by Mr. Blyth. He confines himself to the strictly archaeological aspect of the county. In Cornwall still linger many ancient superstitions and heathenish practices. The natives still believe in the deeds of giants, show their footsteps in the rock, and boast the strength which cast many a granite boulder, tons in weight, from one rocky promontory to another. Not far from Lanyon is a perforated stone, through which Mr. Halliwell's guide, a boy, had been pulled, "to cure some complaint." Crippled and maimed children are still brought to the Well of St. Euny, stripped, made to drop a pin into it, and then immersed three times. The whole land is full of stories of the giants, from great Gogmagog to "the fable of Bellorus old." In Queen Elizabeth's time, at Plymouth, the figures of Corineus and Gogmagog, wrestling, were cut in the turf and annually renewed, somewhat after the fashion of the "Scouring of the White Horse." Full of fun these old monsters are reputed to have been before the arrival of Brutus, their destroyer; they played at quoits, ate deer, wild boar, and drank water, like sober fellows as they were; they were happy as flowers in May;

they chatted and frolicked and laughed so loudly that fissures opened in the cliffs, and toppling rocks fell with the vibration of their roars. A fine, jovial old race this was, rendered sulky by persecution in the after-time.

A relic of the worship of the Sun, derived from the Phœnicians it may be, still keeps in practice at Penzance, where, on the eve of St. John, the people hold a sort of fire-dance, waving wildly burning torches round their heads, welcoming the Solstice with fire and shouts and laughter. If the custom be rightly derived from this source, we have that which is older by many a century than King Arthur himself, whose fame, by the way, does not seem widely diffused in Western Cornwall, for our author's account mentions him but once, and that in reference to a circumstance now ninety years old, when, at Marazion, an old native gravely rebuked a person for aiming at a raven with his gun, "telling him that he ought on no account to have shot at a raven, for that King Arthur was still alive in the form of that bird.—This seems," says Mr. Halliwell, "to be a curious relic of the Druidic belief in the transmigration of souls." The land of Cornwall—the Lyonesse, with which King Arthur was most concerned—lay more to the north-east than that district examined by Mr. Halliwell; moreover, it has been long ago lost by encroachments of the sea. Cornwall is strewn all over with the remains of works performed by some early race—cromlechs, cairns and kistvaens. An incident illustrating the early condition of the first class of erections occurred in 1790, when a land-owner in the neighbourhood of Lanyon, taking shelter from rain behind a bank of earth, observed it to be of a very rich quality. Sending men to remove the mass—which they did to the extent of nearly a hundred cartloads—he discovered the supporters of a cromlech from which the covering-stone had slipped off. That these remains were originally thus buried under tumuli, is affirmed by this and other discoveries. Under the cromlech was found a broken urn, with ashes and human bones. "It is a singular fact," says Mr. Halliwell, "that the idea of the circular stone-inclosed barrow has dwelt in the minds of Cornishmen even up to the present day. In the churchyard at Sennen I was surprised to notice the flat top of a modern grave, which was circularly formed and edged with small stones. This is a nearer approach to the stony tumulus than is the rectangular altar-tomb to the ancient cromlech."

Mr. Halliwell says, and with good reason, that we must be careful not to assign, without good evidence, a high antiquity to the circular inclosures called Druidical Circles of the district he traversed. It does not seem impossible that some of them may be the remains of rustic habitations of a comparatively recent date. The ancient amphitheatre at St. Just, wherein was performed the ancient mystery or miracle plays of the kind peculiar to Cornwall, which were acted, one at a time, for several days together, is described as exhibiting faint traces of a circular spot in the centre, "in which, perhaps, the prompter was located, and whence the actors issued to perform in the wide concentric space around it, a conjecture which appears to be supported by diagrams in the Bodleian MS. of the Cornish mysteries." This construction is in a sad state of neglect, being apparently used as the common dusthole of the town. Borlase described it as exhibiting stone benches. It was an exact circle of 120 feet in diameter; the perpendicular height of the bank, in his time, 7 feet from the area within, from the bottom of the ditch without

10 feet, formerly more. The seats consist of six, 14 inches wide, 1 foot high, with one on the top of all, where the rampart is 7 feet wide.

Ample justice is done to the county historian just named, whose book is, indeed, one of the best of the old topographical histories. He was of a good Cornish family. Nicholas Borlase, of Treludra, colonel of horse against the Parliament, after the defeat of the cause of Charles, was refused to be admitted to composition and kept out of the greater part of his splendid estate till the restoration of the monarchy. He seems to have been a shifty personage, for there is a tale told here, of how, being within an ace of starving, he practised a stratagem upon the Protector by getting into his seat one Sunday under a pretended mistake for another, shifting to get out of it when Oliver entered. The latter said, "No, no, cousin Borlase, I am glad to see you here" (for he was a professed papist), and kept him with him during the sermon, and withal, smelling a joke, promised his assistance on his preferring a petition for a maintenance, which he accordingly performed. He appears to have been still more shifty in the following case. "One day he waylaid the Protector in St. James's Park to solicit his signature to a recommendation of his humble self to certain persons in power. Oliver told him he had no pen and ink. These Mr. Borlase produced on the spot. 'But I have no desk here, or any conveniency to write upon,' says the Protector. 'Write upon my back, then, please you, Sir,' says Mr. Borlase. The petition was granted." Borlase, the historian, is shown to have been most egregiously imposed upon by the famous Dolly Pentreath, believed to have been the last depository of the ancient Cornish tongue, when she reported herself to him of an age which made her at death to have lived 102 years. "Dorothy, the daughter of Nicolas Pentreath, of this parish, was baptized May 17th, 1714," says the baptismal register of Paul, first unearthed by Mr. Halliwell to the confusion of Dolly's reputation, showing she had not attained her sixty-fourth birthday on dying in December 1777. If this discovery be conclusive, and Mr. Halliwell has not erred in his examination of the register, this old woman deserves a place in the next collection of singular impostors' lives. more than doubt may be thrown upon her other claims to credit as the last possessor of the Cornish tongue,—a distinction which attracted crowds of folks to visit her, brought her little birthplace into note, and, no longer ago than 1860, got her a handsome monument in the churchyard of Paul. The poor old wretch when she lied so, little thought that she should not escape the odious baptismal register, but that 84 years after death she would be exposed.

The provincial dialect of the Cornish of the present day, Mr. Halliwell truly says, is hardly a dialect, but a singularly pure English; indeed, we know it to be much purer than that which is spoken around Oxford. The imitations that have been published recently as specimens thereof are, as the example quoted here makes abundantly evident, concocted by persons better acquainted with a Saxon than a Celtic provincialism. The example is good for nothing which shows how Aunt Betty, coming home from a Christmas party,

"had a ben too forthey en teeming out her licker, and p'raps were a little boozey, and she were found pon the sea-shore, laid down as ef she were to bed, and the waater were come op to her feace and flopping agen et, and she were a saying quite genteelly like,—'Nat a drap more, nat a drap more, thankee.'"

How pilchards absorbed the attention at the

fishery at Trereen Bay, during our author's visit, when about 500,000 fish had been caught the day before, we may learn from the following:—

"At St. Ives as many as 75,000,000 of pilchards have been captured in a single day; but here were enough to surprise any one unaccustomed to the spectacle,—the boats heavily laden with their silvery looking freight, the flaskets drawn up from them by pulleys into a platform on a level with the fish-cellars, and, then, on a level with these cellars, to see the women salting and piling the fish in tiers of layers, waggon-loads of pilchards with salt, and cart-loads of pilchards without salt in every direction, men and women standing upon pilchards, flasketing pilchards, bartering for pilchards, talking of pilchards, quarrelling about pilchards, and, in short, doing everything that could be done with pilchards, excepting only frying and eating them. One gets infatuated with the overwhelming and absorbing single idea of pilchards, and, before long, you enter into the fun of the thing, and bargain for a hogshead to be delivered to you, cured and fit for winter consumption in about six weeks."

At the Land's End, Mr. Halliwell trod in the footsteps of Jack the Giant-killer. This local hero's fame is reported to be dying out at home, the chronicle thereof being no longer perused; nor do the Cornish fathers of men enjoy their recital. What substitute can they have, we should like to know? Grown up children have versions of the famous epic, varying from the best printed one. One story speaks of two giants living on the mount, and that they had a quarrel, whereupon one slew the other, the survivor being, no doubt, the illustrious Cormoran, who himself met his fate by the hand of great Jack. There was a woman in this case (for one of the giants had a family); hence, no doubt, the quarrel, the particulars whereof female nursery domination has meanly suppressed in those parts of England where the hero's fame is still honoured. The frail memories of those whom he delivered are less retentive than is the rock styled the "Armed Knight" for that, probably named after him, preserves his glory in men's mouths. To boil a celt, making what is styled a "boiled thunderbolt," as those antiquities are conceived to be, by way of cure for rheumatism, may seem an equivocal remedy; nor less equivocal is the reported wonderment of the old woman who, after keeping the weapon in the pot for a long time, found it did not boil away. Mr. Halliwell concludes his book, which will be very handy to the tourist, with an account of the Scilly Isles.

History of the Colonial Empire of Great Britain.

By Browne H. E. Roberts, B.A. (Longman & Co.)

THE writer who a few years hence shall give us a complete and accurate history of the origin and growth of our British Colonies, aided by the new light thrown on the subject by the State Papers, which are at the present time being calendared by gentlemen peculiarly fitted for their task, will make a valuable contribution to literature, and secure to himself a permanent reputation. Mr. Browne H. E. Roberts is not, however, a person from whom we can look for the satisfactory accomplishment of such an undertaking. Anxious, to use his own words, for "the extension of useful knowledge generally in the community of his fellow men," he here presents his fellow men with a work that is deficient, ill written and full of errors. His knowledge of his subject is quite superficial, being gained from a few popular works of history which he has used with singular carelessness, neither reconciling the apparent nor avoiding the real contradictions of his

various authorities. Any attempt to trace the course to prosperity or decay of the plantations he cursorily notices is altogether beyond his scheme, which never aims at imparting information that cannot be obtained from the ordinary inaccurate topographical dictionaries. A very few words will show his style of workmanship. In the introductory chapter the reader is informed "Barbadoes was founded in 1624, and Bermuda in 1609; the Bahama Islands in 1672; Antigua, Montserrat and St. Christopher's in 1632." There was enough novelty in this brief announcement to induce us to look at his chapter more particularly devoted to the places thus mentioned. Referring to Chapter iv., on "Barbadoes, the Windward Islands and Trinidad," we read: "Barbadoes was discovered by the Portuguese about the year 1518, and received its peculiar name, signifying a long-bearded man, from a kind of fig-tree found there, from the branches of which hangs down a kind of hairy matter. The island was early drained of its native population by the Spaniards, who carried them off to work in the mines of Cuba, and in this deserted state became a prey for the first European power which thought it worth while to make use of it. This was England, by whose emissaries it was formally taken possession of in the reign of James the First, in 1605. It remained uncolonized, however, for some twenty years from that period, until, on the 17th of February 1625, forty English persons and seven or eight negroes were landed on its shores from a vessel by Sir William Cortruen, a London merchant." We leave it to Mr. Roberts to decide which of the dates, 1605, 1624, or 1625 he prefers for the foundation of the colony, but we cannot allow that the settlement was planted at all three. Referring to the notice of the "Bermuda Islands," we found the plantation of these islands shifted from 1609 to 1641, when a settlement was formed "by a brother of Sir George Somers, one of those who had been formerly wrecked on this shore." In the chapter on "The Bahama and Bermuda Archipelagos," instead of being again assured that the Bahamas were colonized in 1672, we learned "that the whole Bahama archipelago became ere long uninhabited, and remained in that condition until the year 1629, when New Providence was settled by the English, and continued to be held by them till 1641, when they were expelled in a very barbarous manner by the Spaniards. Our countrymen colonized the island again in 1666; but in 1703 they were once more driven away from it by a French and Spanish expedition. Again we say to Mr. Roberts, Choose your date. Were the Bahamas colonized in 1629, 1666 or 1672? In like manner the date of 1632, assigned in the introductory chapter to the plantation of St. Christopher's, is disposed of in the particular memoir of that island by the following passage:—"Some writers have claimed for St. Kitt's the honour of being the first territory in the West Indies colonized by Great Britain. The Spaniards certainly never took possession of the island, which is said to have been first settled in the year 1623, by Mr. Thomas Warner and fourteen other persons, who immediately set about the cultivation of tobacco there." The next paragraph informs the reader how the Spaniards, who never took possession of the island, "in the year 1629 asserted their right to the island of St. Kitt's," and took possession of it. The vagueness of this historian of the colonial empire of Great Britain is charming. Of the career of Mr. Thomas Warner (spoken of in various places as "a certain Sir Thomas Warner"), he is in a most amusing state of ignorance. We cannot stay to enlighten him thereon; but would suggest, that before put-

ting forth a second edition of this sample of "useful information," he should glance at the recently-published 'Calendar of State Papers,' where a *précis* is given of the Royal Commission, dated September 1625, which, after reciting "the discovery of St. Christopher's, Merwar's Hope, Nevis, Barbadoes and Montserrat, by Thomas Warner, who, set forth and supplied by Ralph Merrifield, hath also begun a plantation and colony of those islands, until then inhabited only by savages, and not under the government of any Christian state,"—and after taking the said islands and inhabitants under the royal protection, appoints Thomas Warner the King's Lieutenant of the said islands; and in case of Thomas Warner's decease, confers the said lieutenancy on Warner's comrade, John Jeaffreson, who, like Warner, was one of "the primitive planters of St. Kitt's." The blunders made by Mr. Roberts in the pages relating to the West Indies are a fair sample of his work. If Mr. Roberts again appears before the public as an author, he had better not do so as a disseminator of "useful information."

OUR LIBRARY TABLE.

The History of Modern Music. A Course of Lectures delivered at the Royal Institution of Great Britain. By John Hullah. (Parker, Son & Bourn.)—These Lectures are far above average merit, having been combined by one who possesses general cultivation as well as sufficient musical science. Thus they escape from that aridity and tameness which too often impair the interest of discourses on like subjects. The field is a wide one,—too wide, perhaps, to admit of more than outline work; hence, especially, in proportion as modern times are approached, omissions are to be noted,—such, for instance, as the forgetfulness of the merit of Weber, whose 'Der Freischütz' marked a period in the history of German opera, with as deep a point as ever was made by any new work in the world of music. There is some want of precision, too, in Mr. Hullah's appreciation of Handel, Bach, Gluck and Beethoven; arising, it appears, from incomplete acquaintance with their works, especially of the second and third named writers. The old Cantor of Leipzig is less soulless and adust than he is here represented. The great poet of 'Armida,' 'Alceste' and 'Orphée' had more science than he is here credited with—witness his admirable writing for the voice and the many points in his instrumentation, which Mozart had obviously studied closely. But it is easier to admire without limit, as Mr. Hullah admires Mozart, than to touch with an acute and discriminating finger on the special higher excellencies of an artist less universally perfect. More, too, should have been made of Beethoven, whose *Mass* in c is, we think, undervalued; and with many of whose latest works the Lecturer professes himself unfamiliar. But, laying together omissions and commissions, we find no reason to qualify the good opinion expressed of this work, as one containing much information, neatly arranged, and if not marked by any original thoughts or passages of rivetting eloquence, meritoriously clear of commonplace.

Witch Stories. Collected by Eliza Lynn Linton. (Chapman & Hall.)—A more ghastly German book than this could not be imagined,—nor yet one more admirably calculated to keep readers awake at the hour when "churchyards yawn"—a strange task to muster this terrible squadron of cruel and revolting dreams for the Author of 'Realities.' The result is tiresome, because of its monotony. Betwixt cowardice on the one side and craziness on the other, there is only a plot of ground, narrow as a monastery garden, for any foot to tread threadbare. The tales are all one, like to the other. The yearning, ignorant creature, greedy to extort from life that which life can afford to no one, conceiving that by bribery and corruption, and a mad bartering of his future hopes, he might obtain a short reign of enjoyment or of

vengeance,—and finding in the moment of imaginary satisfaction the coveted fruit, a mere growth of Dead Sea apples, is in all of them prominent; and, of course, by the dupe stands, in the shadow, the knave. What makes such a book all the more sickening is the conviction that all our boasted advance in intelligence has, up to the time present, carried us only a short distance beyond the verge of that old world, in which fanatical credulity was rebuked by fanatical cruelty. The punishment of death, it is true, has ceased to be frequent. The Witch-finder, with his investigating needles and judicial thumbscrews, has gone the way of the Ketches. But the intense, morbid curiosity, the resolution to pry into all those mysterious relations of sense with spirit, which, ever and anon, elude precise inquiry (and may continue to do so until imperfect humanity shall be perfected) are neither dead nor asleep.

Madame Récamier, with a Sketch of the History of Society in France. By Madame M***. (Chapman & Hall.)—Madame M*** who professes to have been during many years an intimate guest in Madame Récamier's circle has been displeased by the biography of Madame Le Normant, with which the world had to deal not very long ago,—calls it a "*hortus siccus*," and has taken up her pen to set matters to rights as regards the sorceress of L'Abbaye aux Bois. We do not find in her rectification the power equal to the will. Madame M*** is not clear as a describer. She is bent on being subtle when tracing the character of a woman in whom charm, grace and gentleness were more prominent than force of understanding or brilliancy of wit; but if she be always sure of her own meaning, she does not always convey it to her public. There are few things which produce a more wearisome and blanking impression than attempted acuteness which is in reality pointlessness. We meet with the stories of Madame Récamier's love affairs recounted anew, but without any new matter in the telling. Then, the men are but faintly sketched with whom in the latter years of life she contracted deep and constant friendships. In brief, the absence of brightness and discrimination is to be felt in every page of the memoir. It is succinct, however; because we were at its close to be favoured with essays on the position of women in French society. Of this French Woman's question we have heard nearly enough; until a new Lady Morgan shall turn up who can throw the life and light of a quick genius on an exhausted subject, or unless such a graver observer as Mrs. Austin should some day allow the world to profit by her experiences of Continental literature and intercourse. Madame M*** is not half so effective as the last English lady who took French Ladies in hand—we mean Miss Kavanagh, possibly because she is less initiated into the mysteries of literary composition.

The Law of Bankruptcy, including the Law as to Private Arrangements between Debtors and Creditors, and as to the Release of Prisoners for Debt. By W. A. Holdsworth, Esq., Barrister-at-Law (Routledge & Co.)—This little book is described by its author as an attempt to popularize the Law of Bankruptcy. A resort so popular as the Court of Bankruptcy has become, should have a cheap and readable guide-book. Law, Physic and Divinity already rush to benefit by the destruction of the monopoly so long enjoyed by the trading classes. Bankrupts and candidates for bankruptcy may gain a very fair idea of the law from this book. There is another class to whom the new law is a matter of interest. This class may be called the gaol-barnacles. To them the law is the enemy which would force them from their quiet retreat into the free debtor-and-creditor air of the world without. They boast of their long imprisonment as conferring dignity, as many a nobleman prides himself alone on long descent through discreditable ancestors. To any of the persons desirous of studying this branch of the law—bankrupts, aspirants to bankruptcy, or gaol-barnacles—this book is worth a shilling.

Jerusalem: a Sketch of the City and Temple from the Earliest Times to the Siege by Titus. By Thomas Lewin, Esq. (Longman & Co.)—Although Mr. Lewin has never seen Jerusalem, he writes

about its antiquities with the precision and fullness of one who had inhabited the Holy City in every period of its eventful history. In opposition to Robinson, Mr. Lewin argues that Sion was not the south-western hill; that the site of the Temple was not that now occupied by the Mosque of Omar; that the ancient tower, just south of the Jaffa Gate, was not Hippicus; and that the Damascus Gate was not in the second wall. It would be out of our way to trace Mr. Lewin in his reasoning, step by step, but we can testify that those who are interested in the archaeology of Jerusalem will find him a learned and cautious guide. That a lawyer, with many clients and much practice, should find time for, and pleasure in, such critical investigations is a creditable and significant fact.

Ocean Sprays. By Commander W. Igglesden. (Chatham, Taylor.)—A sailor on horseback will give a lively image of this author on Pegasus, with his surplus energy and plenteousness of words. He is free as the breeze and boundless as the waves in his range of subjects. The great want of the verses is "salt," and in such a case we feel that to be out of keeping and character. We have no doubt that the writer is a Christianly good fellow and a thorough sailor, but he does not look at ease when aboard Pegasus.

Rab and his Friends. By John Brown, M.D. (Edmonston & Douglas.)—Printed on fair pages, the clear type being set off by the white of the ample margin, well illustrated and bound in light, glazed boards, Dr. Brown's story of 'Rab and his Friends' (published in the '*Horæ Subsecivæ*') forms a pretty but somewhat too perishable ornament for the drawing-room table. As a delineator, Dr. Brown has much pathetic force, and under the guidance of his heart tells a sad story with admirable effect. His great failing is want of humour,—though, like so very many other Scotchmen labouring under the same deficiency, his chief ambition is to be esteemed a humorist. As a philosophical critic, the doctor is altogether beyond us. The following sentence we have read over six times with increasing perplexity:—"And though in all works of Art there should be a *plus* of delectation, the ultimate overcoming of evil and sorrow by good and joy,—the end of all Art being pleasure,—*whatsoever things are lovely first, and things that are true and of good report afterwards in their turn*,"—still there is a pleasure, one of the strangest and strongest in our nature, in imaginative suffering with and for others,—

In the soothing thoughts that spring
Out of human suffering;

for sympathy is worth nothing, is indeed not itself, unless it has in it somewhat of personal pain." Does Dr. Brown mean that in works of Art evil and sorrow should be overcome through the agency of "*whatsoever things are lovely first, and things that are true and of good report afterwards in their turn*"? If such be his meaning, he ought at least to have helped his rambling involutions, in their task of stating a simple matter in an obscure manner, with an insertion of "by" before "*whatsoever*." The story itself has no ordinary merits. The Introduction, in which the author attempts at the same time to be funny and profound, is so awkward and in such bad taste that it will prevent many from reading on. As he approaches the heart of his tale, however, the narrator becomes simple, nervous and powerful. When the honest, time-worn village carrier takes his dead wife in his arms, wraps her in the same white blankets she made long years before for her bridal bed, bears her from the hospital (in which she has expired), puts her in his cart, and drives home over the cold, bleak, desolate moor,—the heart of the reader goes forth after the wretched man, and prays God to take him to his keeping. The saddest tale of human suffering, where the suffering is distinct for human sin, has in it an unspeakable sweetness; and Dr. Brown, who in depicting such sorrow can stir the depths of feeling with the power of a master artist, does a wrong to society when he exercises his ingenuity and pains his readers with attempting to be a humorist.

Old Vauxhall: a Romance. By W. H. Marshall, Esq. 3 vols. (Skeet.)—This is a "Romance" made altogether of pasteboard, tinsel, torches, masks; libertine noblemen; Jacobin conspirators meeting in a cellar; heroes and heroines made out of dressed dolls, stuffed with bran; a few murders and encounters with sword and pistols; a mystery which enwraps the heroine like an impenetrable fog, and which, indeed, is never quite cleared up. But in spite of revenge, mystery, conspiracy and adventures, it is nothing but the play of a puppet-show—the marionettes not being particularly well made or appointed; whilst for the libretto and plot, the flat flavour of dish-water is all that can be discerned. Even "making believe very much," which the "little Marchioness" gave to Dick Swiveller as her receipt for making wine out of orange-peel and water, will not transform 'Old Vauxhall' into anything but a bandbox full of old rubbish.

Among our New Editions we have—from Messrs. Smith, Elder & Co., Miss Harriet Martineau's *Household Education*; and *Lavinia*, by the Author of 'Lorenzo Benoni,'—from Messrs. Blackwood & Sons, Mr. Scott's *Tom Cringle's Log*,—from Mr. Bohn, Part VII. of Lowndes's *Bibliographical Manual*,—Mr. Johnson's *Extraordinary Adventures of the Seven Champions of Christendom* (Griffin, Bohn & Co.), and *How to Make the Best of It*, by Anne Bowman (Routledge).—We have Reprints, edition not specified, from Messrs. Groombridge, Mr. Hollingshead's *Underground London*,—from Messrs. Smith, Elder & Co., *Selections from the Writings of John Ruskin*,—from Messrs. Longmans, the Rev. G. W. Cox's *Tale of the Great Persian War*, from the '*History of Herodotus*'; and *Church Expansion and Liturgical Revision*,—from Messrs. Bell & Daldy, their handy, well-edited, and well-printed pocket volumes of *Longfellow's Poems*, *Herbert's Poems and Works*, *Southey's Nelson*, *Lamb's Tales from Shakespeare*, *Milton's Paradise Lost and Paradise Regained*,—from Messrs. Black, Mr. Westgarth's *Australia*.—Messrs. Ward & Lock have added to their "Shilling Volume Library," Mr. Marston's *Family Credit*, Mr. Braddon's *Lady Lisle*, and M. Ullbach's *Which Wins—Love or Money?*—Mr. Coleman on *Spiritualism in America* (Pitman),—Mr. Street on *Some Account of the Church of St. Mary Stone, near Dartford* (J. R. Smith),—Mr. Kennedy's *Essays, Ethnological and Linguistic* (Williams & Norgate),—the Rev. W. H. Beever's *Notes on Fields and Cattle* (Chapman and Hall),—Mr. Hopkins on *Peace or War? an Unbiased View of the American Crisis* (Diprose),—and *Choice Poems and Lyrics* (Whittaker).—Our Translations include—*Love the Greatest Enchantment*,—*The Sorceries of Sin: the Devotion of the Cross*, from the Spanish of Calderon, by D. F. MacCarthy (Longman),—*The Odyssey of Homer*, translated into English verse, in the Spenserian stanza, by P. S. Worsley (Blackwood),—*The Odyssey of Homer*, in English Hendecasyllable Verse, by the Rev. H. Alford (Longman),—*The Koran*, translated from the Arabic by the Rev. J. M. Rodwell (Williams & Norgate),—and *Solomon's Song*, translated and explained, by Mr. Withington (Boston, Tilton).—Our Second Editions include—Professor Owen's *Paleontology; or, a Systematic Summary of Extinct Animals and their Geological Relations* (Black),—Mr. Archbold's *Law of Bankruptcy and Insolvency* (Simpkin),—Mr. Jervis's *Proposed Emendations of the Text of Shakespeare's Plays* (Longman),—*Narrative of a Remarkable Transaction in the Early Life of John Wesley*; to which is added, *A Review of the Work*, by the late Rev. J. Hunter (J. R. Smith),—*Bradshaw's Invalid's Companion to the Continent*, by Dr. Lee (Adams),—and Dr. Benisch's *Travels of Rabbi Petachia* (Longman).—Our Third Editions—Mr. T. R. Jones's *General Outline of the Organization of the Animal Kingdom* (Van Voorst),—*The Monks of Kilcrea, and other Ballads and Poems* (Bell & Daldy),—*The Book of Familiar Quotations* (Whittaker),—and *Poems by Fritz* (Kent).—Our Fifth Editions—Mr. Goldsmith's *Doctrine and Practice of Equity* (Butterworth),—and Mr. Farrar's *Eric; or, Little by Little* (Black).—We have, besides, a Tenth Edition of Dr. Maddock's *Diseases of the Chest* (Simpkin),—an Eleventh Edition of Cobbett's *French Grammar*, revised by J. P.

Cobbett (Griffin, Bohn & Co.),—and an Eighteenth Edition of Mr. E. Routledge's *Riddles and Jokes* (Routledge).

Among Miscellanies which require announcement are—*The Victoria Regia*, edited by Adelaide A. Procter (Emily Faithfull & Co.), put forth as a specimen of woman's printing, and a very admirable one it is,—Mr. Frenau's *Poems on Various Subjects* (J. R. Smith), illustrative of an American war which has now lost its chief interest, the dynasty of Washington being broken, and the political system which he founded dissolved,—*Franklin: a Poem* (Mann & Nephew), which has the merit of a good intention and the warmth arising from an affectionate heart,—Mr. G. Masson's *Class-Book of French Literature* (Black),—Volume VI. of the Rev. Dr. Wardlaw's *Posthumous Works* (Fullerton),—*The Footsteps of Shakespeare; or, a Ramble with the Early Dramatists* (J. R. Smith),—*Victorian Enigmas*, by Charlotte E. Capel (Lockwood),—*A Letter to Sir B. C. Brodie, in reply to his Letter in Fraser's Magazine*, by Dr. Sharp (Turner),—*Horace at the University of Athens* (Palmer),—*The Wreck of the Homeward-Bound; or, the Boat of Mercy*, by N. Michell (Tegg),—Parts I. to III. of Mr. Jones's *One Hundred Lectures on Ancient and Modern Drama and Dramatic Poets* (Lacy),—*Seasoning for a Seasoner*, by Mr. Stevens (Tribner),—Volumes I. to III. of Chambers's *Encyclopædia* (Chambers),—Mr. Kerridge's *Eden, and Other Poems* (Buck),—*Handbook for Emergencies* (Cassell),—*A Literal Extension of the Text of Domesday-Book, in relation to the County of Cornwall* (Vacher),—*Riddles in Rhyme*, edited by E. S. Fulcher (Hogg),—*Double Acrostics*, by various Authors, edited by K. L. (Hogg),—*A Christmas Gathering of Leaves for the Little Ones* (Simpkin),—Mrs. Copleston's *Canada: Why we Live in It and Why we Like It* (Parker),—Volume VI. of *The Book and its Missions* (Kent),—Volume XI. of *The Penny Post* (Parker), and Volume I. of Quaritch's *Military Library* (Quaritch),—Mr. Greenwood's *Wild Sports of the World* (Beeton),—Chambers's *Encyclopædia: a Dictionary of Universal Knowledge for the People* (Chambers).

Among our usual Year-Books and Diaries, we have, as the first in bulk and usefulness, *The Post-Office London Directory for 1862* (Kelly & Co.),—the useful and humorous *Mr. Punch's Pocket-Book*,—the well-compiled *British Almanac and Companion* (Knight),—Dunn and Duncan's *Law and Commercial Remembrancer*,—Vacher's *Parliament Almanack*,—Dietrichsen and Hannay's *Almanack*,—Whistcraft's *Weather Almanac*,—*The Rural Almanac*,—*The Bolton Almanack*,—Watson's *Housekeeper's Diary*,—Rees's *Diary*,—and *The Newcastle Memorandum-Book* (Lambert).

LIST OF NEW BOOKS.

Alexander's Christian Thought and Work, post 8vo. 5/6 cl.
Alexander's Consolation, cr. 8vo. 3/6 cl.
Anne Elton; or, the Cottage and the Farm, 8vo. 3/6 cl.

Carruthers & Chambers, Vol. 4, 3/6 Statutes, Public General, passed in 1861, ed. by Bigg, cr. 8vo. 18/ cl.
Stewart's Rosedale; or, the Deserted Manor-House, cr. 8vo. 5/ cl.
Storm-Beaten; or, Christmas-eve at the Old Anchor Inn, 8vo. 1/ Trench's Com. on Epistles to Seven Churches in Asia, 2nd edit. 8vo. 5/6 Trench's Story of Justin Martyr, and other Poems, 5th ed. 8vo. 6/ Tulloch's Beginning Life, cr. 8vo. 3/6 cl.
Tyler's Papers for Thoughtful Girls, cr. 8vo. 5/ cl.
Vance's Romantic Episodes of Chivalric & Medieval France, 10/6 What-Nob, The, 1861, 8vo. 4/ cl.
Wilson's Church of Israel, cr. 8vo. 7/6 cl.
Wordsworth's Theophilus Anglicanus, ed. Godfrey, post 8vo. 5/ cl.
Young's Night Thoughts, with Life by Dr. Doran, 4th ed. 8vo. 4/ cl.

THE MAYER MANUSCRIPTS.

Liverpool, Dec. 18, 1861.

You have in your review of the recent publication of Dr. Simonides made use of my name. I therefore claim the insertion of a few lines defining my own position in reference to the Papyri which you have thought proper to notice in such unqualified terms of distrust. The simple facts are, that the MSS. of which the fac-similes are before the public, are part only of a collection which I acquired from two different sources, viz. from the late Mr. Sams and from the Rev. H. Stobart, and as they have been disarranged more than once in my museum, it is not in my power to state with perfect accuracy from which of these two sources any particular Papyrus was derived.

Dr. Simonides was introduced to me, as stated by him, at my museum; and after we had been acquainted for some time, and he had given me in writing his interpretation of several of the Hieroglyphical Inscriptions in the Museum, I requested him to unroll and decipher for me some of many rolls of Papyrus which were on my shelves; and he shortly afterwards commenced his operations in the Library of the Museum, the necessary materials for the unrolling, such as linen, starch, &c., being supplied by the Curator, who attended on him, and with myself saw many of the MSS. opened.

Dr. Simonides told me during the time that he was thus engaged that the Papyri were of extreme Biblical interest, and from time to time the results of his discoveries were communicated to the papers.

I leave to Dr. Simonides himself the vindication of his character from the charges brought against him; but it is absolutely necessary that the public should be made aware that the Papyri in question are in no way connected with Dr. Simonides, except in as far as he has unrolled and illustrated them, and that they are, and have been for some years, the property of, yours respectfully,

JOSEPH MAYER.

THE OCTOORON.

December 18, 1861.

THE Author of 'The Quadroon' seems now to consider the question of the invention of the story of 'The Octoroon' of extremely little consequence; nevertheless, great principles may be involved in points of the smallest importance in themselves, and truth, the moral salt of the world, is worth ascertaining from its opposite in the most trivial matters of investigation. If for no other reason, in this instance, from the degree of relief to the feelings of compassionate sympathy, we are called upon to feel for a person robbed of his goods, so likely to ensue should it be found that the complainant has come by them much in the style he has lost them—"the good old rule, the simple plan"—of annexation, which Mr. Bouicault seems to have learnt to practise in the New World, and which is expressed with the gayest impudence in nature in the French plagiarist's line:

Le bon est mon bien, que je réclame partout.

It is true that, at the date of my former note on the subject to the *Athenæum*, I had not read 'The Quadroon'; but it was enough that the author of the latter production claimed the story of 'The Octoroon' as identical with his own, to establish,

in my mind, *prima facie* evidence either of a case of plagiarism much more indefensible than that denounced against the Adelphi dramatist, or of a coincidence so remarkable as to be scarcely within the limits of possibility. But I have since rectified this prematurity of judgment. I have read 'The Quadroon'; and, as a first result, let me admit a most decided inferiority in one description of literary activity to its gallant author: for I confess it was to me the occupation of a whole day, with only the most needful intervals for exhausted nature to rally in, to peruse the three volumes of that work, while the former appears to have been enabled to devour the tale of 'Masks and Faces' (which would undoubtedly fill eight or nine volumes of the common novel size) in the course of that single "yesterday" which lighted him to the conclusion, and distinct affirmation, that he was unable to find any the least resemblance between his own tale of a Slave Lady and the one included in the romance of 'Masks and Faces.' On the contrary, on my part, I find, and assert in the most positive manner, that the stories of these two works are, as far as relates to that personage, in all but mere minor points of detail, *absolutely and literally identical*. The scene of both is laid partly in New Orleans, and partly at a plantation some distance from the city—thirty miles in 'The Quadroon,' sixteen in 'Masks and Faces.' In both there is a lady of the greatest beauty and accomplishments, but with a slight infusion of coloured blood in her veins, the offspring of a French-descended planter of Louisiana, who is intended to be manumitted by her father and owner—is in reality manumitted, only the writings are confided to a rascally attorney and agent, who has conceived a passion for her, and who makes it appear that the estate of his deceased employer is insolvent, in order that this beautiful damsel may be brought to the hammer, with the view of possessing himself of her charms by purchasing her as a slave. In both, this rascally purpose is effected in the same degree, the lady being put up for sale, and "knocked down" to the highest bidder under circumstances of shameful injustice and Lynch-law mobbing on the part of the excited planters. In both, there is a subsequent rescue and flight. In both, the letters of manumission and forgeries of the lawyer and his fellow-conspirators are discovered; and the catastrophes differ only in this respect—that 'The Quadroon' ends in a rose-smoke illumination of bridal happiness apparently come to pass on that blessed republican soil, while the lover in 'Masks and Faces' makes off with his heroine for ever from what it styles "the gorgeous but cancer-bosomed Queen of the Mississippi" to Africa first (for a particular purpose of the main story), and thence home to his native British Devonshire.

Thus far there stands assertion against assertion. But the proof is not so difficult of attainment—not buried so deeply in the "ample archives of the *London Journal*" as the Author of 'The Quadroon' complacently supposes. The tale of 'Masks and Faces' was subsequently condensed by its author into a three-volume novel, which, under the designation of 'The City Banker,' is to be found, I believe, at most general libraries. And though it is true that this latter novel—as its title denotes—is chiefly devoted to the home part of the adventures of the "long, exciting" romance in question, still the episode of the Slave Lady, in greatly reduced dimensions, is to be found in it; and "Suum Cuique" stakes his character for veracity as a literary witness (inclosing his card to the Editor of the *Athenæum*), that the legend above recited will be circumstantially found in it. Any reader, indeed, willing to take the trouble, may satisfy himself on the point.

The question of dates resumes, then, all its importance, and the transparent juggle attempted by the Author of 'The Quadroon' in this matter needs scarcely any other exposition than his own. He states that he read this latter romance (his own composition) in the year 1852, and this, to the eye of a cursory reader, would seem to be the date of publication—antecedent, then, certainly, to the date of 'Masks and Faces.' But how did the Author of 'The Quadroon' "read" his work? In the profound seclusion of a desk to which he had

consigned it, in despair at finding his originality anticipated by 'Uncle Tom's Cabin!'—an objection which it required an interval of four years only to dissipate, though how effected, even in that long space in the life of a popular novel, I am at a loss to conceive, since 'Uncle Tom' is decidedly not yet by any means wholly forgotten, and was not published in the *London Journal*, whose quarter of a million readers, of course, forget everything they read as fast as they read it—or, at all events, are not supposed to be in many cases patrons of the Circulating Library! A little farther on, however, the Author of 'The Quadroon' admits it was not published till 1856, nor "finished" writing until 1855. By what gift of fictitious clairvoyance, then, did he "read" it in 1852? In any case, how can it be so triumphantly stated that a book not finished until 1855 was written "long before" a work that was published in that year!—or, at all events, commencing with the Midsummer of 1855, and running in an unbroken sequence (not in parts, with an addition!) for seven or eight subsequent months, could hardly be said to have entered 1856.

It is not "necessary"—it is altogether beside the point at issue—for the Author of 'The Quadroon' to inform "Suum Cuique" that he resided a long time in the now dis-United States of America, and attended many slave-auctions, and particularly of "beautiful Quadroon girls," in the city of New Orleans. One might, indeed, feel some faint curiosity to know what satisfaction he took in such exhibitions, as it is impossible to impute to an English gentleman the motives which he declares so scandalously frequent among intending purchasers there. But as well might the Author of 'The Quadroon' imagine he proved a good claim to the invention of the tragedy of 'Othello,' by announcing that he had been to Venice, and had been rowed in a gondola! Nay, the most exact description of the Dogana, and a list of all the seaweeds cast on the Lido, with their Latin and "trivial" names appended (whatever that means—and it is of frequent occurrence in the carefully-catalogued descriptions of scenery in 'The Quadroon'), would fail to establish the point.

With regard to minor matters of misrepresentation, it is, perhaps, hardly worth while to remark, that the story of the Long Tom practice is based simply on the statement in 'Masks and Faces,' that a 9-pound shot, discharged from a piece of ordnance of that calibre, pierced the launch-boat of a man-of-war, shattered the leg of one of the persons in it, and sent all the rest into the water. I know not in what wars the gallant Author of 'The Quadroon' may have figured; but in those of the British Empire this is by no means an uncommon feat to be performed by a piece of metal of the weight mentioned, properly propelled by ignited powder, even in the good old times when cannon balls were cast round.

With regard to the concluding paragraph of the letter of the "Author of 'The Quadroon'" (who seems desirous to go to posterity by that title), it is only "necessary" to say that, although the tale of 'Masks and Faces' was commenced and carried on for a few chapters by Mr. J. F. Smith, the sudden secession of that gentleman to a rival publication induced the proprietors of the *London Journal* to place it in what they doubtless considered the most competent hands they could find for the purpose, and that no particle of the invention in dispute, or of the staple story of 'The City Banker,' which appeared under the accustomed *nom de plume* of 'the Author of 'Whitefriars,' owes its creation to any other pen.

SUUM CUIQUE.

HAMILTONIAN LOGIC. (No. 4.)

December, 1861.

I proceed to extenuate Hamilton's statement [ante, p. 51], that "some at least" is "possibly all or none"; so that "some Xs are Ys" takes in a possibility of either of the logical contraries—"every X is Y" and "no X is Y." This is not what he meant; but it is what he said. I repeat the passage ('Discussions,' 635*, 690):—

... The Aristotelic contradiction only proceeds on a certain arbitrary hypothesis of particularity: to wit, that "some" is to mean only "some at least," (possibly, therefore, all or none); thus constituting, both in affirmation

and in negation, virtually a double proposition,—a proposition comprising, in effect, two contraries.

I trace this assertion to diminished energy of reference caused by illness; and this combined with hurry. I shall presently prove that these causes existed, whether I state their effect rightly or not; but I first point out how I suppose them to have acted.

1. In Hamilton's doubly partitive system, the affirmative and negative particulars are equivalents. That "some (only) are" means that "some (the rest) are not." Hence, as he truly says, *some* will "be both affirmative and negative" ('Logic' ii. 280). And the word *some*, by definition, implies both "some at least" and "some at most."

2. The ordinary logician makes no use of "some at most, possibly none"; his "*some*" is "some at least, possibly all." Had he used both, he would have had four particulars, identical two and two: for "some-at-least-possibly-all Xs are Ys" is equivalent to "some-at-most-possibly-none Xs are not Ys." I suspect that Hamilton, in his wide reading, had met with a few logicians who have discussed "some at most" as a possible phase of quantity. He actually affirms that "the logicians" (ii. 280, again) give "some" the meaning "negatively, not all, perhaps none, some at most; affirmatively, not none, perhaps all,—some at least." This is too short; but it is only his own note: the appendix I cite is his private paper, published by his editors, who give due warning of its character. Had he lived to publish for himself, he probably would have expanded this note, and would have indicated "the logicians" who have dealt with "some at most."

3. In the next page (ii. 281; but this is a new section, no doubt on a different paper), Hamilton sums up, and sums up badly, even for a private memorandum. Biassed by recollection of his own "*some*," which is both "at least" and "at most," he forgets to note that this is not the case with "the logicians." Accordingly, he describes them as using "some, meaning some at least, some perhaps all, some, [] perhaps not any." In the space [] he ought to have inserted the words "meaning some at most"; and he ought also to have noted that here we have the two "*some*s" attributed to "the logicians" in his previous section. All this I am sure was in his head: and deliberate reading of his imperfect note would at any time have brought it all back.

4. In process of time arose the assumed necessity of preparing—in a hurry, as I shall show—an eradicating article against a stray mathematician who would write logic, though warned again and again that he neither did know, could know, nor ought to know, anything about the matter. I see clearly that he referred to the imperfect note above exposed in great hurry. And by trusting too much to the wording of his rapid extract, he added the intensifying assertion about the two contraries.

I have now to establish, independently, the decline of the habit of reference, and the hurry of the article from which I have quoted. Of the first I shall take three marked instances out of his controversy with myself.

1. In this journal of August 24, 1850, speaking of the form "Any X is any Y," Hamilton says of me, "He wisely omits the form. But what an omission!" It is the first of my forms in the very table he was criticizing, from which he himself shortly afterwards produces it.

2. In my 'Formal Logic' (p. 311) the reader will see how Hamilton joined into one phrase words from two different writings of mine, and put the total under marks of quotation, as a portion of one passage. This was the most mischievous trick he ever played me: no reference was given; and it cost me six hours of wonderment and puzzlement over my own writings before I could solve the riddle.

3. In my third Cambridge paper I have exposed the manner in which Hamilton gained his belief, which he expressed in several places, that I confounded the middle term of a syllogism with its conclusion. My words are, "... quantity of the conclusion, there called the middle term." If he had looked "there,"—that is, two or three pages back,—he would have seen that I was speaking

elliptically of the extent which is *middle*,—that is, which is common to both premises,—as being the extent of the conclusion. All these instances show negligence of reference: though the third is otherwise blameworthy. As in some other cases, the obvious meaning of words is our protection against grammatical ambiguity. In "Philo of Byzantium, afterwards called Constantinople," we know that it is not the engineer who underwent change of name: in "Paul of Tarsus, the Apostle of the Gentiles," we know that the Epistle to the Romans was not written by a city.

I now come to the proofs of hurry. Of these there are enough in the paper of the *Discussions* which I have quoted: I shall cite two. The first is the mistake, now well known, which I shall designate as that of the *countermarching identicals*: the quantities which are one and the same quantity, but the greater the one the less the other. It has been shown that Hamilton was not strong at notions of quantity: but even he could not have made such a stumble at his ordinary pace. There must have been hurried writing: and we may suspect that he did not himself correct the press.

Secondly, Hamilton has inserted, from the manuscript notes which his editors afterwards published and I have already cited, a table of the relations of his propositional forms. Both in the notes, and in the *Discussions*, the table has this memorandum:—"This table may not be quite accurate in details." How are we to explain the inventor and promulgator of a logical system putting forth the connecting relations of his own forms of enunciation with a warning that perhaps some of them are wrong? Not quite accurate in details in a matter of which every detail must be either as sure as "X is X" or as doubtful as "X is not X"! Nothing but hurry can explain this: deliberation would have re-examined the table, and made sure of its accuracy. To digress for a moment:—"As sure as eggs is eggs"; are these eggs anything but a corruption of X, a letter not uncommon even among old logicians to represent a term? I appeal to the Caesar of folk-lore, the *Notes and Queries*.

But the most direct presumption of hurry is as follows. The first edition of the '*Discussions*' has 758 pages. At page 121 there was no intention even of reprinting the letter to this journal: for the reader is directed to consult the *Athenæum* itself. When more than 621 pages had been printed off, so that duly-paged interpolation was impossible, a new passage of arms was resolved on: the article from which I have quoted was prepared, and inserted in the logical appendix between pages 620 and 621, with asterisked paging running from 621* to 652*. This kind of addition is almost always drawn up in a hurry. I have the honour to be the subject of the whole; as appears by the following extract from the Index:—"De Morgan (Prof.), as a logical critic and reasoner, 621*-652*."

It is to the point to inquire why this attack was made, and how the sarcasms with which it teems came to be so much more racy than those of the pamphlet of 1847 and the letter of 1850; neither of which lacked seasoning. It will help the extenuation if it can be shown that there was a probable reason for sudden action, especially if it were one which might excite irritation. There had been no immediate provocation from me. Hamilton had had the last word in this journal full eighteen months before; and since that time nothing to which I had been a party had taken place. When I looked through the accounts of myself in the copy forwarded to me, "with the author's compliments" written in it,—as if any copy of that book could have failed to contain the author's compliments, otherwise than by a binder's omission,—I thought I saw the meaning of the whole disclosed in this last and parting shot:—

And be it remembered, that mathematics and dram-drinking tell, especially, in the long run. For a season, I admit, Toby Philpot may be the Champion of England, and Warburton testifies,—"It is a thing notorious, that the oldest mathematician in England is the worst reasoner in it." So much for Mathematical Logic; so much for Cambridge Philosophy.

I reprint this pleasant colophon in the service of the writer. But those who have not read the

controversy must take notice that all writing of this kind came from my opponent alone, except one passage in the Appendix to my 'Formal Logic,' written with the expressed purpose of showing that such weapons were at my command, if it had pleased me to use them. I have very recently met with a sarcasm upon Hamilton, against the severity of which I must protest. Mr. Robert Chambers, in his 'Cyclopædia of English Literature,' makes extracts from the authors whom he introduces. For his sole specimen of Hamilton's manner and matter he has given the passage quoted above, with some preceding sentences, in which a mathematician is compared to an owl by daylight, &c. I hope that to the next edition will be added one of those lucid and powerful little bits of psychological explanation with which the Lectures on Metaphysics abound. It is not enough to show how small Hamilton appears when he talks about mathematics: no one can thence infer how great he is when he turns to subjects which his mind and his reading qualify him to handle. It is true that at Cambridge we used to assume that the wooden spoon of the mathematical tripos would be high in the classical tripos; but this was mercy, not logic. When I saw Bishop Warburton and Mr. Tobias Filpot—I follow the authorities; the etymon is more homely than φιλοσοφίας—brought together by main force that I might be tied up between them, I was reminded of the old logician Pitagorampes, who made travellers take both horns of a very uncomfortable dilemma. The portrait was a feature nearer to true likeness than Hamilton knew it to be. The thirsty old soul to whom I am compared was given to beer, not to drams. The song in which he lives—be his *vates sacer* Francis Hawkes, O'Keefe, or another—is made upon a brown jug the clay of which was once a part of his mortal coil, and which, in both existences, "foamed with mild ale." So that Hamilton—as by moral rule of three it was fit he should do—made the same blunder about the mathematician as about the mathematician: he mistook a nutritious stimulant for a stimulating poison. But this is not the point. Hamilton lets out that his drunken antagonist is to be for a time the Champion of England. I suspect he was excited by information that my objections to his system had staggered many, especially south of the Tweed; and that this was the secret of the sudden attack upon the uncareworthy opponent whom he delighted to represent as an intellectual cripple. Little he foresaw that my first—very likely my last—direct notice of lampoons on the effect of which he placed an innocent reliance, would be taken on his behalf, not on my own: as helping to show how he came to write in a hurry what, had the same writing been deliberate, would have proved that he had never understood either Aristotle or his followers. A. DE MORGAN.

LITERARY FUND.

WHISPERS of a reform in the management of this Society reached us in the early part of the year; but we thought it better, before we referred to the subject, to await the publication of the accounts. Here they are, positive and comparative, after the fashion of the *Athenæum*:—

Literary Fund.		Artists' General Benevolent Fund.	
From 1844 to 1859 (16 years), 783 applicants were relieved at a cost (exclusive of Collector's Pounage, Advertisements, and expenses attending the Anniversary Dinner) of.....£8,177 9 8		From 1844 to 1859 (16 years), 974 applicants were relieved at a cost (exclusive of Collector's Pounage, Advertisements, and expenses attending the Anniversary Dinner) of....£1,444 7 8	
To this we now add the account for another year:—			
1859.		1859.	
51 Applicants relieved.		69 Applicants relieved.	
Charges for Salary, for rooms for meeting of Committee and Subscribers (exclusive of Collector's Pounage, Advertisements, and expenses attending the Anniversary Dinner) £881 15 8		Charges for Salary, for rooms for meeting of Committee and Subscribers (exclusive of Collector's Pounage, Advertisements, and expenses attending the Anniversary Dinner) £56 12 7	
For Printing, Stationery, Postage and Miscellaneous.....£115 12 7		For Printing, Stationery, Postage and Miscellaneous.....£51 0 2	
£497 8 3		£107 12 9	

These accounts, in detail, bear witness to the nature of that change which was reported as a reform, and of the value of all reforms which may be expected from the Committee.

The object for which the reformers so long contended was two-fold—either reduce the expenses, or extend the usefulness of the Society. The Society has arrived at the maturity which the Founder contemplated: it not only receives a large income from donors and subscribers, but it has a freehold estate of more than 200*l.* a-year, and a reserved fund of more than thirty thousand pounds. Yet the Society does no more for literary men than was done fifty years since, when it was struggling for existence, although the expenditure has risen from 47*l.* 6*s.* to more than 500*l.* a-year. Such a cost for the mere distribution of the funds of a benevolent Society is extravagant beyond all precedent—other like Societies distribute like funds to a larger number of applicants, at less than one-fourth the cost. But the Society would neither extend its usefulness nor reduce its expenses. A house, in a good situation, was, we were told, essential for the respectability of the Society; and, though the Committee met but nine times a-year, there was an absolute necessity for a resident Secretary. Of course, if a house, in a good situation, was essential, there was no objection to the particular house; and if a resident Secretary was required, the Society must pay for his services whether it employed him or not.

We come now to the reform, which originates with the Committee; and from this it appears that the argument about a house was, as the reformers stated, all moonshine,—for the Society has removed from the corner of Bloomsbury Square to chambers in the back settlements of the Adelphi; that the argument about the absolute necessity for a resident Secretary was, as the reformers stated, all moonshine, the Secretary having retired to a villa some dozen miles from London; and the Committee, which gave to its Secretary *four times the income* paid to the Secretary of the Artists' General Benevolent Fund, because they enforced residence, now give him 50*l.* a-year additional *not to reside*. The fact is so strange, that we think it right to record it in the very words of the Auditor's Report:—

Secretary's salary ..	£200
Secretary, in lieu of residence (half a year) ..	25

GREAT ERUPTION OF VESUVIUS.

Naples, Dec. 17, 1861.

IT is with sorrow that I describe another of those awful phenomena which have so often desolated this fair land. Within the course of a few years I have witnessed several violent eruptions of Vesuvius, even more brilliant than the present, and have felt my house rocking beneath me from the upheavings of that mysterious and insidious enemy, earthquake, but I never witnessed such consternation as that which was depicted on the faces of a population of 22,000 souls who fled from Torre del Greco.

When I first saw the eruption I was walking with a friend, and happening to look over the inclination of a mountain which cut the sea and the distant prospect, I saw what appeared to me to be a vast pine, and yet I said, rubbing my eyes, I do not remember one on that spot; it cannot be a pine, it must be smoke from Vesuvius; and so it was; and at this, the commencement of the eruption, we could see the mighty mass from the roots, which were fixed in the base of the mountain, growing up with wonderful rapidity to a gigantic tree which touched the very heavens, and then spread its branches south and east and west, until the coast, sea, everything, was hidden from view. I never witnessed anything grander than the vast masses of smoke which rose and rolled over one another in magnificent involutions, nor anything which gave me a deeper consciousness of the powers of nature than the loud artillery which preceded every impetus of the mountain, shaking our windows and doors at the distance of many miles, and even at sea, as sailors told me, making their boats tremble in the water. As night set in, the spectacle changed its aspect; it was a confusion of black and deep-red colour, only at intervals it being pos-

sible to see distinctly the column of fire and smoke. Forked lightning and other electric exhibitions played about the mountain and formed a scene which no pen can describe. Great numbers of people went over from Naples on the same night; and I am told that it was a piteous thing to see the inhabitants rushing out panic-struck from their houses, and carrying off all their household goods by the glare of the fires which threatened their ruin. "By ten o'clock on Sunday night," said one of the chief authorities of the district to me, "five thousand persons had arrived in Torre dell' Annunziata; others fled to Naples, and some pushed further on to Castellamare,"—and so the flight continued throughout the hours of darkness; and all this anxious time we could hear, at intervals, rounds, as it were, of artillery, which shook our very houses. About two o'clock after midnight, the grand crater which has been so long comparatively dormant, opened its fires, giving hopes to the despairing population that their dwellings might yet be saved; but by what infatuation is it, that people still cling to a locality which, within the historic period, has been destroyed nine times! On Monday morning, I went over to examine on the spot the devastation which had been committed. As in 1848 and 1855, the road from Naples to Portici was lined with people watching the carriages which rolled down one after another to Torre. It was a perfect fair, and the ruin of the little town a few miles further on had created an unexpected amusement for the Neapolitans. On arriving we found Torre del Greco, a thriving place of 22,000 inhabitants, desolate,—the streets, usually crowded with urchins, were empty, and the windows, commonly filled with women, attracted by the shrill whistle of the railway train, were all shut up. There was no fisherman on the beach, and the masters of the coral boats had all vanished, for, as you know, Torre del Greco is the great depot for coral, the port from which sail out, in the month of March, I know not how many barks to fish up the bright wonders of the deep on the coast of Sardinia or Africa. All was as silent as death within the houses; it was another Pompeii, with the roofs on, though, unlike Pompeii, there were yet remaining signs of recent life and of a hurried flight. Melons and pomei-d'oro, in rich profusion, hung on the walls of the untenanted houses; they had been carefully husbanded for the feasts of Natale and Capo d'Anno; but Christmas and New Year will be a sad season to this unfortunate people! At the station there was a vast and mingled crowd of Bersaglieri, National Guards, curious strangers and panic-struck inhabitants, who had lingered longer than some others to carry off a few articles of furniture. Every one had a bundle, and mattresses and cradles, and their usual tenants crowding at the "fun," were piled up ready to be carried off somewhere, anywhere. A little beyond the station the road turns off to the left, which leads into the city and up to the mountain. There were patrols of the National Guards in the streets, watching the property of the fugitives, for hosts of thieves might well be expected down from the capital, as misfortune awakens the worst as well as the best qualities of human nature. There were crevices opened in the streets sufficient to interrupt the passage of carriages in some places, and showing the fearful struggles which the imprisoned giant had been making to get out. Houses were riven from top to bottom and opened across the roofs,—few appeared to be habitable in their present state, and one gentleman, unable to effect an entrance by the door of his house, was breaking in the windows. Altogether, the number of houses up to that time, which had suffered elisions, according to the official statement, amounted to from 400 to 500; but my opinion is that scarcely a house is secure. The road ascends through the city to the mountain, and after walking about a quarter of a mile from the outskirts you arrive at the stream of lava, which at this point is about 28 palms high and nearly half a mile across. It had risen to the roofs of several houses, and was slowly proceeding onwards, though its course had slackened much since the morning, in consequence of the opening of the principal crater. About half a mile further on, the

fiery mouths were visible vomiting forth fire, and smoke and pumice-stone; but so intense was the heat, and so thick the cloud of fine dust that fell around, that it was painful, if not dangerous, to advance. To count the number of mouths would be difficult, for new ones were opening continually, and it was just as likely as not that we ourselves might have been let in.

The trains still run, and we go on to Torre dell'Annunziata, where 5,000 persons had arrived the night before by 10 o'clock. The roofs once so clean were now covered with thick dust, instead of fine grain and *pasta* turned out to dry. The streets were blocked up with every species of vehicle which had been engaged all night in bringing in the fugitives, for whose reception the magazines of the tower had been opened; and here I saw them huddled together by the hundred. The more respectable classes had been quartered about amongst the inhabitants in the proportion of five to fifteen in a house; but all distinctions of rich and poor were now broken down, for misfortune had made them fellows, and they met each other as man and man. Beyond the confines of this place we began to leave the dust behind us; there was a clearer sky above, and by the time we got to Castellamare the atmosphere was clearer; but what a scene! Boats were coming in as at Torre dell'Annunziata, with numbers of poor creatures and such articles of furniture as in their panic they had been able to carry off. Mattresses were scattered about the quays and the squares, and cradles and chairs and a few other household articles which had been caught up in haste. Many women sat on logs of timber, knitting, others lay along on the ground with their children around them. Groups of men were standing about recounting to the bystanders the horrors of the past night; I saw sick and aged people supported by their friends, and being led to some place of refuge. There was an old woman especially who appeared to have been paralyzed by fright, and who excited the compassion of the crowd. All these had been involved in ruin by the events of the last few hours,—and who can foresee the miseries to which they will now be exposed for life? "We have done the best we can for them," said the *Sotto-Prefetto*; "we have put many of them in the Seminary, and others have been quartered on the inhabitants, whilst a subscription has been opened for the supply of their immediate wants." Though there were hundreds of carriages and other vehicles, all were so occupied in the service of the poor sufferers that it was almost impossible to get one to push on to Sorrento, and yet we desired to see what the eruption had done along the coast. The air was tolerably clear in Castellamare; but on approaching Vico we got beneath the column of smoke which the north wind was driving over the Bay, and all the country appeared to be clothed in deep mourning. Black fine dust had fallen everywhere and covered everything. The roads were covered several inches deep; on the houses in Torre del Greco it was ascertained by measure to be 4½ inches in depth. Gardens full of vegetables were blackened; the monthly rose had changed its hues; the olive its silvery white for black; the oranges had a corona of dust upon them as clearly defined as that of the acorn. The foliage was so laden that the branches hung down with the weight, and it is not improbable that the orange and lemon crops will suffer greatly from the breaking down of the trees. I saw men sweeping the cabages, and shaking the trees; and in one olive-tree a peasant who was performing this operation was lost to view in the cloud which came down around him. And all this time the dusty shower was falling rapidly. On the parapets of the walls the literary juveniles had written their names in the dust, as we when boys did in the sand and ashes. Ash was everywhere: it clothed all nature in mourning, and we bit it, and breathed it, and our eyes ran with water from its effects. At Sorrento the aspects were the same; the streets and the gardens looked as smooth as a sandy beach after the tide has receded; the ashes had penetrated into the innermost rooms of the houses, and plates and dishes gave evidence of the fact. "Our boats," said the people, "were obliged to carry the compass with them, or they never would have found

Naples." So it was at the Piano, and so at Capri. I do not exaggerate when I tell you that the obscurity was such as is produced by an eclipse of the sun; but in the centre of the column it was so deep that it was impossible to see much before you. I went on the sea and marked the surface—usually azure, blue and clear, so much so that it is possible to see the rocks several fathoms deep and the fish disporting amongst them; it was now the colour of one of our muddy rivers, and as the mariners dashed their oars into the sea the flakes of coke receded right and left. "And we felt the sea vibrate beneath us during the whole night," said the men, "at every roar of the mountain." Poor fellows! it was piteous, though laughable, to see how much they suffered from the action of the dust on their eyes, which literally streamed with water. "Put up your umbrella, sir," said they, "or you will be blinded," and so I did; but the enemy got under it, and then, fairly beaten, I turned my back upon it. Push into shore, and let us back to Naples. The details were the same returning as coming, though the prospect was different. The mighty column of smoke we might have imagined had supported the very heavens, except that when it attained a vast height it turned south and spread over the sea, covering the entire Bay, and reaching how far we cannot yet say, though we know that Capri and Salerno were covered with the dust. We could see it falling like ballast from a balloon, and heaven knows that we felt it and gulped sometimes too much for easy respiration. On Sunday night the column from the lower mouths just above Torre del Greco was calculated to have risen 10,000 feet in height, whilst that from the upper crater was estimated at 3,000, and by some, at 5,000 feet.

Towards the evening the artillery which had been thundering all the day ceased, and nothing remained to excite our wonder but the grand electric lights which played around the crater on the summit,—columns of fire and smoke continually rose up, intermingled with forked lightning and globes of pure electric light. During the night and the next morning there were fresh shocks of earthquake, which added to the work of devastation. As Tuesday broke the sun to us in Naples was eclipsed by the black cloud which still rolled between us and the mountain; but as the orb of day gained a greater height the brilliant effects which were produced on the edges of the column were wonderfully grand. On Wednesday morning the column was much reduced,—the smoke from the lower mouths crept like mist over the surface of the land; two or three sharp shocks of earthquake were, however, felt in Torre, and several houses fell in. On Thursday morning I went over again, and now that the volcano had subsided into a sulky kind of repose, I proceeded to examine more in detail the different parts of the town. The train stopped short of the usual point, and passengers to Castellamare were compelled to walk half a mile to meet another train which was waiting for them; and, for two reasons: the road had received several elisions, and it was feared that the vibration of the carriages would bring down the tottering houses on the line. For myself, I took possession of a National Guard, as it turned out a most stupid animal, but whose red cap I thought might be a protection. Happily we picked up with the "Parrocco" who had returned to look after his property and his parishioners, and who did the honours of the desolate city to us. "Let us go to the sea first," he said. "Look at these mighty rocks; they are of the lava of 1794, and observe that the earthquake has now riven them." The flint-like substances had been cleft as with a knife, and through the middle of them were gushing down streams of imprisoned water set free. The sea had retired twenty palms, from the elevation of the ground, and a little way out it was boiling violently,—I believe from the effect of subterranean streams gushing up through the openings which had been made. We went into a ruined house close at hand, and looked into a well, and listened to the streams of water which were gushing through, from the upper mountain; the sides of the well having been opened by the earthquake. Torre del Greco is formed of a number of streets running parallel and at right angles to one

another; it lies at the base of the mountain; and up the Strada della Ripa I first bent my steps. As every house on the line parallel to the rail was fissured, so was it here, and even worse—the ruin had been much advanced since Monday. There were large gaps opening throughout the length of this street, and of every other, in an ascending direction, but I observed no transverse openings; yet in all directions the houses had suffered, and seemed to stand erect by special permission. "Let us come down this street on the left," said the Parrocco. It was the Strada Fontana, and there, at the bottom, the large fountain which had supplied the wants of the city was boiling up with disimprisoned streams, which gushed out from beneath. It had risen several palms in height; and though the quality of the water was here but little changed, in several other places I visited it had a sharp, acid taste. Most of the houses had suffered in this street perceptibly, and all, I believe, in fact. Against some, ladders were placed, and workmen were breaking holes in the façades, in which to rest the poles that were to be their props; others had fallen, and were a mass of rubbish; whilst a wide gap yawned in the interval. There was one cut so cleanly through the middle that a section was presented to the eye; and on the very edge of the precipice trembled a bed, ready-made, but which had not been slept in; whilst chairs stood around the one wall that remained, and a gridiron and baskets and vegetables still hung against it. Two cats which had been imprisoned there had been liberated, but there was little chance of the furniture being got down, as the probabilities are that what remained of the house would fall inevitably with a touch. Retracing my steps, I got into the Strada Ripa again, and, following the course of the fissure in the centre, mounted by some steps to the next street, which runs at right angles,—for Torre del Greco lies on so sharp a declivity that the town is terraced. The continuation of the road upwards, now called the Strada Santa Croce, exhibits the same sad scenes as that which we have just left: handsome houses cut right through, and showing yawning gaps—some so crippled that another shock might do for them; others but shells, the interiors having fallen in. There was one especially I remarked, for it was large and handsome, and the fragments of the fallen masonry protruded through the doors. In front of it was a large crater, which had opened with one of the recent shocks; and looking in, I marvelled at the force which must have split the solid blocks of flint-like lava of which the substratum was formed. This was the old lava of 1794, and on this the new city is built. The sons had erected their dwellings on the tombs of their fathers, and the grave seemed to have opened to swallow up the grandsons.

It was obvious to me that the ground around Torre del Greco is hollow, for through the gaps which had been formed in the riven lava, it appeared as if the site on which Torre stood was a thin crust in the form of a vault, and so the Parrocco evidently thought, for one of the reasons which he assigned for the escape of the inhabitants was, that they were apprehensive of the city falling in. I did not visit all the side streets at right angles, contenting myself with a peep, but all the houses were in the same state as those I have described, and some had fallen in. Nearly at the top of this street stands the church from which it takes its name, one of those pale-faced plaster, characterless edifices which abound in Southern Italy. The "Santa Croce," which stood erect and replaced one that was destroyed in 1794, but happier than its neighbour the Campanile or Belfry, had manfully withstood the storm, with this exception, however, that whereas it had formerly consisted of four floors, the two lower ones had been swallowed up by the lava, and the third and fourth still remain to tell the tale. Thus proceeding through such scenes of desolation as I have never witnessed before, sometimes warned away from the sides of the houses, lest they might fall, and at others standing a chance of being overwhelmed by the ocean of dust which was being swept off in order to lighten the houses, I got into the direction of the country; and, passing by fertile and smiling

vineyards, found myself shortly on the old lava beds which Time had not yet pulverized nor man had built upon. It was rough walking for some distance, and our stupid guide, not the Parrocco, but a man rejoicing in the title of a National Guard, kept on trying to cover his ignorance by saying that he wanted to show us everything. And so he did, and a vast deal more than we cared to see. Patience, however, and our legs soon brought us to the foot of the great crater, above which rose the lord of the surrounding district. Here at the base we marked the new mouths which had been so recently opened. There are four larger ones. Several were formed on the hill side as we stood there, and one or two were close by us. Decked out they were in all the colours of the rainbow, and hungry-looking men were collecting specimens for sale. Beneath our feet the smoke continually ascended, and a quivering heat that made us move from one spot to another. To cross the bed of lava, which is here full a quarter of a mile across, would have been therefore impossible, to say nothing of the possibility of our breaking through the black crystallized cream which just covered the glowing stream,—so that we returned by the road by which we came, over the old lava again, and which had been uplifted and cleft in many places by the several earthquakes of the week. A quarter of a mile before entering the city we turned off a few steps from the road, and came at once upon the new bed just at the point where it terminated, or rather diverged, for had it not done so, so rapid is the declivity that I am persuaded that by this time a great part of Torre would be under the liquid fire. At this point it stands full twenty-eight palms above the level of the ground, and none but those who have seen it can imagine how that blackened mass could have moved on so regularly and swiftly. I mounted to the top, and found myself on the roof of a peasant's house which had been overwhelmed, and from which I could obtain an extensive view over the surrounding district. All was black, and everywhere vineyards and olive-grounds, and fruit-trees and the white mulberry were all gone; and where, a few days before, there existed indications of the highest cultivation, sterility had laid its curse for a century. The old bed which I had just passed over was formed in 1794, and yet there it was as black and hard as ever, except where a rush or a reed had struggled up through some small fissure. How many years must pass away before the lately smiling district shall again produce its oil and wine! There were several singular features in the scene; a house close by us had just escaped destruction, the lava flowed by it at no greater distance than a yard or two, and looked in at the windows, whilst several trees that were buried to the branches still retained their verdure. Here, of course, the bed was wider than in any other direction; the lava had come rollicking down in its mad mirth, and had spread right and left to the width of two-thirds of a mile, and then its course was arrested. But here we are again in the city, which is full of bustle, for now that the mountain is in comparative repose, the inhabitants are returning to carry off the goods which in their hasty flight they had left behind them. "None will remain here," said the Parrocco; "we fear another disaster,"—and besides this the houses are not safe. I sent off all my friends on Sunday night, and for myself I slept on board a boat out at sea last night. I cannot describe the remarkable scene which presented itself, and which can only be likened to what Naples is on the 4th of May, when every one thinks it almost a duty to change his house. Some were bringing out their furniture, and with every precaution lest their houses should fall upon them; in some cases it was too dangerous to enter, and the furniture was left behind; household goods, chairs, tables, mattresses, were piled up on every street and at every doorway, and the proprietors sat in guard before them. Then there were porters and cabmen and sailors by the hundred, driving bargains or carrying the goods away to the boats or the carts, as the case might be. From the lower part of the town articles were sent off by sea or the line; whilst in the upper part they were despatched by carriages

by the old road. The poor people had put up rude engravings of the Madonna on their houses; and though Torre were destroyed ninety-nine instead of nine times, they would do the same.

I should ill discharge my duty if I did not say that both the Government and the people have risen with the occasion and done honour to the Italian name. Two steamers run backwards and forwards twice a day for the convenience of these unfortunate persons. Two regiments have been put to work to transport furniture and carry food. The Government has given 160,000 francs, the King 40,000, and General La Marmora 3,000, for the relief of the inhabitants. The barracks of the Granier di Nocera, Cava and Salerno, or, at least, a portion of them, have been devoted to the occasion, as also one of the Palaces.

Yesterday we had much rain; but this morning the same weather which we have had for so long a time has re-appeared—a northerly wind with a clear blue sky. The barometer is high, and the snow and what our sailors call the cotton on the mountains, promise a continuance of the same weather. As I conclude my letter Vesuvius has just burst out again with great violence, and the ashes are sweeping again over the Bay. W.

OUR WEEKLY GOSSIP.

A few personal traits may be added to our brief sketch of the Prince, who was on Monday laid in his splendid tomb. Prof. Goldstücker, a fellow-student with him at Bonn, remembers him as the only Prince who was a real reader there. "I believe," says the Professor, in a letter which we are allowed to quote, "he never missed a single lecture." It was not the way with princes at Bonn. During the first years of Prince Albert's residence in England, he gave much time to a thorough study of English Law and of our Constitutional History—reading the best authors, abstracting their accounts, and, by help of good guides, discussing the principles contested and established in our several Civil Wars. Few English gentlemen know the Statute Book so well as he knew it. It is no great secret that in the interviews between Prince Albert and the Emperor Napoleon the former thought it his duty to Europe to endeavour by arguments drawn from the history of events in England to engage the Emperor in a more constitutional course than he has yet adopted in France. The Emperor had, we believe, the highest respect for the intelligence of his illustrious adviser.

In thinking of what was most characteristic and individual about the late Prince Consort, we feel in the same difficulty as one who would point out the characteristic features of a beautiful face and head, where every part is perfect and all the parts are in equilibrium. That which, perhaps, most characterized Prince Albert mentally was his singular power in acquiring knowledge; he was truly "wax to receive and marble to retain" impressions. Though of late he had not much time, he read the best books and papers—knew the last literary and artistic gossip—could chat about the lion of the season with the familiarity of a club lounge. His knowledge of personality was very great; of portraits, of biography, of family history, and of all the illustrations of such studies, engravings, memoirs, caricatures, ballads and the small scraps of literature he was amazingly fond. The trait which personally distinguished him from other men was his daily and hourly interest in the education of his children: not only the moral education, which no English parent ever does or, under any circumstances, ought to neglect; but the ordinary training of the school-room. Of course, the Royal Princes and Princesses had many masters and mistresses, but their chief instructor was the Prince. He not only furnished a general plan for their instruction, but superintended it himself,—not only appointed to each one his and her teachers, but thought it his duty to read every book which any of them was about to read. Of how few English gentlemen could the same be said.

The Manchester Local Committee have handed to Mr. John Taylor, General Treasurer of the

British Association, the magnificent balance of 3,658*l.* 9*s.* 8*d.* We spoke, at the time, of the financial success of the Manchester meeting, but we were not prepared for such a balance-sheet. That the local spirit may be properly understood, we must explain that this sum is not the net profit on the week's transactions, but, as nearly as possible, the gross income. All the local expenses were defrayed by a local subscription, these expenses amounting to 3,481*l.* 0*s.* 5*d.* The net profit is, therefore, very small; and the large balance is due to the spirited exertions of the citizens.

Mr. Sutherland Edwards's 'History of the Opera' is printed, and nearly ready for publication.

'Down South; or, An Englishman's Experiences at the Seat of the American War,' is the title of a book by Mr. S. P. Day, Correspondent of the *Morning Herald*, which Messrs. Hurst & Blackett are preparing for publication.

An order made by Sir John Romilly on a reference to the Court of Chancery of the late Mr. George Biggs's will, defines the position of that portion of the deceased gentleman's estate which he had meant to leave for the benefit of aged and decayed printers and printers' widows. The property in question, about 12,000*l.*, had been paid into court. Sir John decided "that the money should be transferred to the four Trustees of the Printers' Almshouse Society; the capital to be retained intact, and the income to be applied according to Mr. Biggs's will; it being declared that the participants are not to be confined to the inmates of the almshouses, or members of the Society, though these are not excluded—the Court holding the trust to be for the benefit of printers and widows of printers generally." A little time may pass before the intentions of the testator can be carried out, though not much, it is to be hoped. Some of the almshouses, we hear, are now empty for want of funds. The Trustees should at once proceed to exercise the powers conferred upon them by the Master of the Rolls.

Mr. Punch "About London," would be an advertisement after the late Mr. Batty's own heart. This renowned entertainer of the public used to say to his authors, "Hang your piece; give me a bill that looks well on a wall." Mr. Punch "About London," would have looked uncommonly well on the wall. It is the same thing, we suppose, when we read "Mr. Mark Lemon about London;" for Mr. Mark Lemon, it is said, is but another name for Mr. Punch, as Charles Dickens is for Boz and Francis Mahony for Father Prout. After amusing the public for many years by his pen, as playwright and story-teller, Mr. Lemon is about to try a more personal entertainment, in the manner of Albert Smith, gossiping about the valley of the Thames instead of the valley of Chamonix, and taking his hearers up to Westminster, instead of up to the summit of Mont Blanc. We are promised a profusion of maps, models and illustrations, as aids in this new attempt to amuse or instruct the public.

It is remarkable, that while the Cotton Trade with the Southern States of America is nearly at an end, another trade, which bids fair to be of equal importance, is rapidly springing up in the Northern States and in Canada. All accounts concur in stating that the Oil Springs in Pennsylvania and in Canada are yielding petroleum with continually increasing abundance. Montreal is now lighted by gas distilled from this mineral oil, and so rapidly is it usurping the place of coal-gas, that instead of England exporting coals to America to manufacture gas, it is probable that we shall import petroleum largely to be distilled into gas. There are already 20,000 barrels of petroleum on their way to England; and although a war with America will, of course, stop the supplies to some extent, yet the exports from Canada *via* St. John's in New Brunswick will continue. The great value of petroleum will be understood when it is stated that besides producing a beautiful gas, wax for the manufacture of paraffine candles, benzoline, from which the fashionable dyes of Magenta and Roseine are produced, and excellent lubricating oil, can be obtained.

Messrs. Cundall & Downes have produced a photographic fac-simile of a copy of 'Gray's Elegy in a Country Churchyard.' The original copy belongs to Mr. R. C. Wrighton, by whom it was purchased seven or eight years ago, at the sale of Mr. Penn's Gray MSS., for 121*l*. It is in the autograph of Gray, and the folding and creasing of the paper show that it was a copy carried about in a pocket-book, probably to be read at tea-drinkings and sentimental gossip. Some of the verses were afterwards cut away by the poet, and many expressions altered, to the manifest improvement of his work. Thus we read in this draft of his memorable lines—

Some mute, inglorious Tully here may rest,
Some Cæsar, guiltless of his country's blood.

A critic, Mason, as is well known, suggested the alteration from Tully to Milton and from Cæsar to Cromwell; every reader will at once perceive that the critic was, in this instance, a true poet. We are much obliged to Mr. Wrighton for his agreeable present.

Under the title 'Christmas with the Poets,' Messrs. Bell & Daldy have produced an illustrated book of some pretensions, not warranted by the care bestowed in selecting the literature, or the enterprise bestowed upon the art. Not a third of the poets have been read for the subjects; and the illustrations are, for the most part, beneath criticism. Weak as Mr. Birket Foster often is, he has here surpassed himself in feebleness—his feebleness not being "pretty." The binder and printer have done their duty by the publishers: no one else.

Messrs. Edmonston & Douglass publish a series of drawings by Mrs. Hugh Blackburn, entitled 'Birds, drawn from Nature.' These are amongst the most perfect and conscientiously executed works we have ever met with. The lady has taken the sensible and honest view of the only genuine way of executing the task she has chosen, in declining the aid of stuffed specimens of the creatures to be portrayed, which, as she truly says, are, however skillfully stuffed, but fallacious guides for the devoted student. Her plan has been, to study as well as possible the habits and nature of the birds, —and from the living, where practicable in captivity, or from the dead specimens recently shot, when nothing of a preferable sort was at command, to draw with the utmost care and precision every detail of bone, beak, feather, claw or eye that presented itself. Originally an able executant, Mrs. Blackburn, under such a system of practice, has produced such a series as must make glad the eyes of every naturalist who sees them, and beautiful enough for us to wish that she might be compelled to illustrate some grand work in the same admirable manner. The form and textures of the beak and plumage of a gannet, in this series, are in the perfection of rendering. Hardly less should be said for two blackbirds; while there is one of a swimming guillemot, which for beauty of execution has never been surpassed. Hardly less complete are two "blue tits," perched and swinging amongst hop-line on the fine head of a heron with sword-sharp bill and piercing eye.

The following letter needs no introduction:—

"Weston-super-Mare, Somerset.

"My dear —,—A public meeting took place a few days since in this rapidly rising town, for the object of taking into consideration the establishment of a diocesan or county school for placing within the reach of farmers, tradesmen and others forming the middle classes, a sound and comprehensive education for their children on the lowest possible terms, corresponding very much in character to the one recently established in Devonshire under the auspices of the indefatigable Mr. Acland and the noble house of Fortescue. The object was ably introduced by Lord Taunton, who practically exhibited his interest in the scheme by presenting the Treasurer with 100*l*. towards the preliminary expenses. An interesting discussion followed, in which Archdeacon Laud and Archdeacon Denison, formerly belligerents in a theological controversy, met on friendly ground, and argued in a most catholic and able spirit for the establishment of schools which would give to the children of the farmer and tradesman better

opportunities for obtaining a more sound and useful education than at present enjoyed. That the farmers are beginning to see the importance of a superior education was manifested by the fact that the meeting was called at the urgent solicitation of a few respectable tenant farmers. If the county should prove successful in carrying out a Model Middle School, others of the like nature will speedily follow, and thus will be realized the opinion of our excellent Prelate, Lord Auckland, that there is room in Somersetshire for half-a-dozen such schools. I am, &c.

ARTHUR KINGLAKE."

The following works are in progress for the Palæontographical Society:—A Monograph of the Fossil Crustacea of Great Britain, by Prof. Bell. —The Polyzoa of the Chalk Formation, by Prof. Busk. —British Carboniferous Brachiopoda, by Mr. Davidson. —Eocene Mollusca (Univalves), by Mr. Edwards. —The Fossil Elephants of Great Britain, by Dr. Falconer. —A Monograph of the British Fossil Estheridæ (Univalve Entomostraca), by Mr. T. R. Jones. —The Entomostraca of the British Wealden, Oolitic and Liassic Deposits, by Mr. T. R. Jones. —A Monograph of the British Cretaceous Foraminifera, by Mr. T. R. Jones and Mr. W. K. Parker. —A Supplementary Monograph of the Testacea of the Cornbrash, Forest Marble and the Great Oolite, by Dr. Lyceet. —A Monograph of the Placoid Fishes of the Mountain Limestone of Great Britain, by Prof. Melville. —A Monograph of the Carboniferous Fossils of Great Britain, exclusive of the Corals, Brachiopoda and Trilobites, by Prof. Melville. —Fossil Reptilia of Great Britain, by Prof. Owen. —The Trilobites of the Mountain Limestone, Devonian and Silurian Formations, by Mr. J. W. Salter. —A Monograph of the Fossil Graptolites of Great Britain, by Prof. Wyville Thomson. —Eocene Mollusca (Bivalves), by Mr. Searles Wood. —The Radiaria of the Oolitic Formations, by Dr. Wright. —and The Radiaria of the Cretaceous Formations, by Dr. Wright.

The Ninth Annual Report of the Manchester Free Libraries, prepared by Mr. Smiles, the principal Librarian, and reporting the working of the different departments from September, 1860, to September, 1861, has been recently printed. It shows that the issues for the year have been, from the Reference Library, 142,433 vols., or a daily average of 478 vols.; from the Chief Lending Library, 78,464 vols.; and from the three Branch Lending Libraries, 188,124 vols., or 891 vols. lent per day, being a mean daily aggregate of 1,369 vols. put into the hands of borrowers and of persons referring to books. The mean daily average for the preceding year, 1859-60, was 1,250 vols. The stock of books now possessed by the Corporation of Manchester, and at the call of the public in the Reference and the four Lending Departments, aggregates 56,554 vols. Of these 30,935 belong to the Reference Department, and are read or consulted on the premises, the remainder are for circulation through the Lending Departments. The collection at the Reference Library includes an assemblage of popular educational books, maps, charts, &c., contributed by publishers, and open to the examination of schoolmasters and others interested in practical instruction—open, indeed, to any one who desires to inspect the collection, which embraces above 1,000 books, sets of books and lessons, maps, charts, &c., for class or collective teaching. The additions to the Library during the past year have been 2,909 vols., which include many valuable works from local donors, and authors, local and other.

Closes shortly.

HOLMAN HUNTS Great Masterpieces of Sacred Art, "BEHOLD! I STAND AT THE DOOR AND KNOCK" (Rev. III. 20), specially valuable as the highest and most complete expression of the genius of this eminent English Painter, is NOW ON VIEW at the GERMAN GALLERY, 168, New Bond Street, prior to its being returned to its private possessor, and final exclusion from public exhibition altogether. —Admission, Sixpence, from Ten to Five. A perfect light insured at all times.

SCIENCE

SOCIETIES.

ASIATIC.—Dec. 14.—Lord Strangford, President, in the chair.—J. H. Macalister, Esq., M. Lewin,

Esq., J. Milligan, Esq., Major-Gen. Anstruther, H. D. Seymour, Esq., M.P., J. Westwood, Esq., and the Rev. W. J. Beaumont, were elected Resident Members; and J. E. Blunt, Esq., N. Moore, Esq., H. S. Freeman, Esq., H. A. Churchill, Esq., C.B., the Hon. A. Gordon, and G. K. Nieman, Esq., were elected non-resident Members. — Besides various donations of books made to the Society by different contributors, a selection of seventy-seven silver coins was presented in the name of His Highness the late Rao of Kutch, who had intrusted to General Jacob the whole of his large collection, from which the Society might choose any that would usefully augment the series in their possession. They are principally coins of the Sâh and Gupta dynasties of Surâshtra. —A paper, by J. Muir, Esq., 'On the Indian Materialists,' with remarks on freedom of speculation in India, was read by the Secretary.

ENTOMOLOGICAL.—Dec. 2.—J. W. Douglas, Esq., President, in the chair.—Mr. Barnard exhibited an extensive series of Coleopterous insects from Smyrna.—Mr. D'Urban exhibited a large collection of Lepidoptera, formed by him in South Africa, amongst which were beautiful series of the Pieridæ, and other butterflies of that country.—Mr. Stevens exhibited some splendid butterflies, collected by Mr. A. R. Wallace in Mysol, near New Guinea; he announced that Mr. Wallace, who has spent several years in investigating the Natural History of the Indian Islands, would probably return to England in the spring of next year.—Mr. Adam White exhibited a species of Mantispa, bred in some numbers from a nest of *Polybia scutellaris*, a South American wasp, said to collect honey. The nest, which is a remarkably fine one, has lately arrived at the British Museum from Monte Video, and, on being opened, a number of the Mantispe were found alive therein. Of the economy of this singular insect nothing is known; it is presumed to be parasitic on the wasp, and the examples exhibited during their brief existence at the British Museum displayed all the carnivorous propensities of the family to which they belong, eagerly devouring the small insects presented to them. Mr. White also called attention to a small beetle of the family Buprestidæ, having the epistomata projecting and developed into two short horns; a form quite novel in that beautiful family of Coleoptera. For the reception of this insect, which is allied to the genus *Anthraxia*, Mr. White proposed to found a new genus.—Mr. Machin exhibited a specimen of *Ethia emortualis*, a moth of the family Pyralidæ, taken in Epping Forest, near Loughton. This species, which is found sparingly in southern Europe, has only been previously taken on one occasion in this country, by the Rev. H. Birks, at Henley-on-Thames.—Mr. Waterhouse read a paper 'On the British Species of the Genus *Gyrophana*,' and exhibited a specimen of *Ischnoglossa corticina*, a species unrecorded as British, which he had discovered in the collection of the late Mr. Heysham, of Carlisle.—Mr. F. Walker communicated descriptions of exotic Lepidoptera in the collections of Messrs. Saunders and Fry.—The Secretary read a paper, by Mr. R. Trimen, of Cape Town, South Africa, 'On the Lepidoptera of that Country, including Species belonging to the families Satyridæ, Lycaenidæ and Hesperidæ.—The President announced that in compliance with the almost unanimous wish of the Members of the Society, the chair at the monthly meetings would for the future be taken at seven o'clock in the evening, instead of eight o'clock, as heretofore.

INSTITUTION OF CIVIL ENGINEERS.—Dec. 17.—Annual General Meeting.—G. P. Bidder, Esq., President, in the chair.—The President gave his address. The Council presented their Report. Telford Medals were presented to Messrs. W. H. Preece, G. P. Bidder, jun. and F. Fox; Council Premiums of Books to Messrs. W. H. Preece, F. Braithwaite, G. Hurwood, and W. Hall; and the Manby Premium, in Books, to Mr. G. P. Bidder, jun. The following gentlemen were elected to fill the several offices on the Council for the ensuing year:—President, J. Hawkshaw; Vice-Presidents,

J. E. Errington, J. Fowler, C. H. Gregory and J. R. M'Clellan; *Members*, Sir W. Armstrong, J. Cubitt, T. E. Harrison, T. Hawksley, G. W. Hemans, J. Murray, J. Scott Russell, G. R. Stephenson, C. Vignoles and J. Whitworth; *Associates*, Mr. J. Cochrane and Col. Simmons, R.E.

MEETINGS FOR THE ENSUING WEEK.

PINE ARTS

The Fables of Perrault—[*Les Contes de Perrault. Dessins par Gustave Doré*]. (Paris, Hetzel.)

M. Gustave Doré has chosen a theme the reverse of the 'Inferno' of Dante. Like that, these works are of unequal character, some of them rising to the sublime, in the manner which is habitual with the artist—in impressive and suggestive treatment of light and shade, in gloomy vistas of forest trees, tall pine trunks whose hanging boughs take the eye into mysterious depths where no light is, sunny avenues chequered with shadow, or melancholy forests seen at night. Less happy, but less ordinary with M. Doré, are other designs, wherein common daylight is the leading effect. This is often adopted with a vigour that is only comparatively inferior to that of the first-named class. The drawings before us, containing figures on a large scale, render evident that want of a sound artistic power of drawing on the part of the artist which we have before regretted. The limbs of the child who stands before the gigantic wolf, in the first illustration to 'Le Petit Chaperon Rouge,' are drawn with little feeling for beauty, and infelicitously express the action. An artist, from heedlessness, may omit all detail; but it is obviously of the first importance that expressive action, at least, should be rendered in all good work. Again, in 'Le Petit Poucet,' where the giant is pulling out the terrified children from under his own bed, the huge creature's body is absolutely without foreshortening; so that the figure stooping, with its head towards us, looks flat;—nor is the figure of the monster's wife, in the same illustration, better executed. Equally bad is the arm of the giant, with which he is about to pluck a little nestling child from the bed, in the next design to the above. The babes sleep like a nest of birds, innocent and pretty as they can be, in all attitudes of childlike repose. Here is the redeeming feature of the design in question; for little can be said for the manner in which the great brute himself has been treated.

It has been often remarked, that an artist displays the true character of his genius in dealing with the grotesquely terrible aspect of Art. A wide field for exercise of this faculty, had M. Doré possessed it in original strength, is to be found in the themes he has thus chosen to illustrate. The ogres and monstrous giants of the nursery legends offer to the strong imagination something which is infinitely terrible, at the same time that it is enriched, so to speak, with the grotesque and strange aspect appropriate to such bizarre creatures. The representation of a giant that is merely a lumbering, bottle-nosed mass of flesh—such as we see so often depicted at country fairs in England, and borne about the streets in effigy at certain festivals in France and Belgium—shows but the coarse, commonplace conception of a brutal fellow, magnified enormously. Every one who has entered into the spirit of the legends respecting them knows there was that which is far more individualized and

distinct in the big fellows. They had peculiar tastes—cannibalism, for example—and points of character which need to be expressed by something beyond the big and vulgar mouth, huge teeth and goggle eyes the limited imaginations of dull nursery-maids delight to endow them with. It is in representing this generic character that the power of design held by an artist will never fail to manifest itself. If he gives no more than these commonplaces, dull and stupid as they are, we are justified in thinking that he has no competence for representing the grotesquely terrible. Grandville dealt with the great folk in another manner. Our own Blake would have done better still. Turner did best of all. M. Doré's work is ambitious, and his name is great; therefore, he cannot object to have his works tried by the highest standard. It requires a strong and penetrative imagination to give us a satisfactory ogre. Picking bones and bolting children are not all his faculties. The artist's shortcomings when dealing with similar grotesque subjects have been pointed out by us when commenting on his conception of Dante's 'Geryon.'

If we take M. Doré on his more familiar grounds, not alone in regard to treatment of suggestive effects of atmospheric condition, but where he puts before us childhood, manhood, womanhood or old age, the verdict to be pronounced is to a very different effect. There is a group of children in the admirable frontispiece to this book which is charming for its true perception of infantile and childish character. An old lady—whose figure is odiously drawn, by the way—holds a huge book of faëry legends upon her lap, while around her gather awe-stricken girls and interested boys, whose looks augur more curiosity and wonder than mere fear. One plump little girl, totally overcome by the terrible matters that are being told, clings with fearful eyes to the neck of the reader. Another—amazed, bewildered—stares, the personation of credulity. A dainty little damsel, with eyes whence tears of awe will soon fall, trembles at the knee of her senior. The toys are neglected; a boy clammers over the back of the chair, tilting over to see the wondrous page. The face of Little Red Riding Hood, when we see her awake by the side of that strange and dark-visaged bedfellow who has so startlingly assumed the head-gear of "grand-mamma," is really beyond smiling at, so intense is its fearful wonder—so deep the shudder shown by her action of drawing the little nightgown over the bare childish shoulder. Grandmamma's own face, when she wakes out of her cosy nap, to find the grim beast's claws clutching the sheets from under her own chin, is admirably shown in another design. Here one recognizes nature in the artist's mind; there is a terror, not unmixed with indignation, in the old eyes that meet the sharp orbs of the beast, which we never saw more finely expressed. The rush of the house-cat under the bed, the snuffbox falling from where it was placed to be handy for the owner's delectation, are little points of incidental illustration well worthy of praise. The meeting between 'Chaperon Rouge' and the false grim one, after the catastrophe which concludes the last scene, is full of character and expression.

'Le Petit Poucet' has several designs, which derive their merit chiefly from the exercise of the artist's peculiar and distinct faculty—i.e., the power of expressing the feelings of the mind by those portions of the picture which painters usually treat as subordinate. Nevertheless, nothing could render the ideas of loneliness, intricacy and confused misfortune

better than the work which shows the little one stooping down beside the river, shadowed over as the whole scene is with multitudinous boughs, intricate foliage and innumerable trunks in an endless maze. Nor could anything be better than the deep forest glooms into which the hapless family are led—the little hero at the tail of the line scattering paper—it is like an arboral cavern, hopeless of release. After all the wanderings of the children, and they present themselves at the refuge, they are seen in M. Doré's design as standing in the light of a lantern, whose cone of rays falls from the flame in a manner which must be seen and carefully studied before due praise can be given to the execution of so difficult a theme. The stream of light, seemingly mote-full or powdered, as it falls from the bearer's hand to the crowd of little fellows who are gathered about the steps on which she stands, is a triumphant piece of imitative art.

'La Belle au Bois Dormante' has several beautiful illustrations—that is, beautiful in so far as they exemplify a not novel conception of the subject. The design showing the distant palace, with gleaming sunlight along its sleeping towers, taken from without amongst the wild underwood, is delightful. The hero going up the avenue with the bright terrace-steps beyond, is finely suggestive of hope and a welcome triumph. This is a beautiful study. Where the victor comes amongst the sleepers is commonplace in treatment; nor is the kissing scene otherwise. The Ball in 'Cendrillon' is full of vivacity. One or two of the illustrations to 'Le Maître Chat' border upon caricature; a Castle scene is infinitely the best of these. There is a great deal of humour in 'Peau d'Ane,' but most admirable is a troubled moonlight sky seen over the pinnacles of the palace—a truly grand and beautiful work. 'La Barbe-Bleue' is distinguishable for the clever rendering of the heroine's face, with an expression of girlish wilfulness that shows a just reading by the artist of the story. This is just the woman to do what she ought not to do—to disobey out of mere idle selfishness, and feel sure to escape punishment because of her silly charms. We are sorry to observe, however, from the ogreish look M. Doré has imparted to the much-maligned nobleman's countenance, that he will not disturb the popular ideas respecting his personal character. It will be seen, from our estimate of these designs, that we consider the artist to have thrown away the chance he had of dealing with his theme in an entirely original manner. However, it is certain that fable and fairy history were never illustrated so magnificently as they have here been by M. Doré.

FINE-ART GOSSIP.—Mr. Adams's statue of Sir Charles Napier, of Scinde, recently placed at the left hand of the north entrance in St. Paul's, is an unfortunate combination of the Napier and the Havelock in Trafalgar Square. In looking at the new figure, it is impossible not to feel that Mr. Adams has refused to benefit his designs by the infusion of more vitality and honest care, ignoring thereby the spirit of criticism which cried out against the disproportion, heaviness and tameness of the most remarkable of the failures in Trafalgar Square. Characterless and impassive as the Hero of Scinde appears there, the second figure is even more dull and inane. All who saw him know how full of fire, of energy and of life the man was, seeming parched with a hot vitality, earnest, eager, swift to perceive and do. All who see the statues which we are ashamed to think must carry so tame a presentment to posterity will feel amazed at the dull incapacity that could treat such a subject without inspiration, placing the man stiffly with his sword and gloves in the

one case, or the eternal cloak and sword in the other; both with the big, blunt nose, the flabby cheeks, heavy ears, stolid, soulless air and jointless limbs. This want of feeling for the theme is not redeemed by any conscientious workmanlike care in the execution of the new design, for that is blunt in handling, from want of finish, commonplace, from want of study of nature, and coarse, from want of artistic perception. We trust the statue of Sir W. Napier the historian, which is being prepared in Mr. Adams's studio, for the same cathedral, may show some sort of artistic power. If not, that gentleman's reputation will be irretrievably damaged.

Baron Marchetti's monument to the memory of Lord Melbourne and his brother, which has been for some time past in course of erection in St. Paul's Cathedral, is now sufficiently completed to enable us to give an opinion of its merits. Although not less out of keeping with the surrounding architecture than in the majority of the companion statues erected in the building, it is more interesting than the general run of such works. The design is simple enough—an angel on each side of a black portal as of a tomb. These figures have a character and expression which may be styled that of Romantic Art, that is to say, they are by no means such as are peculiar to Classic Art, nor that dreadful imposture called Modern Classic. The draperies are spirited and not ungraceful; the features formed are an expressive, if not an ideally-beautiful, model. On the whole, as we may say for many of the sculptor's better works, this design is more effective than beautiful, more telling than sound, yet, with many faults of execution, having a redeeming look of individuality and purpose not very common in sculptural art. Those who draw their opinion of Baron Marchetti's powers from such failures as the 'Richard Cœur de Lion' at Westminster, will be agreeably surprised to find much that is valuable in this new work.

'Waifs and Strays from a Scrap-Book' is the title of a series of beautiful designs drawn by the Hon. Mrs. Boyle, better known as "E. V. B.," a signature having delightful memories for all who saw her 'Nursery Rhymes,'—a charming book, noticed by us some months since. The set of drawings now in question have been previously printed for private circulation; the present issue is therefore styled a second edition. As far as the public are concerned this is a new work, consisting of a selection, made without much relation of themes, from the original sketch-book of a gifted lady, whose taste leads her to delight in a sweet and poetic pathos of a high order of feeling. The designs are executed with delicacy and purity of style, and even the technical errors of their execution are such as do not mar the fanciful grace and elegant earnestness with which they abound. One design to Mr. Tennyson's lines in 'In Memoriam,' "Strong Son of God, immortal Love,"—an earnest-eyed child-angel seated beneath a leaf-denuded tree and above a grave,—though not without a suggestion of Guercino's feeling, is very beautiful. Another, of knights and ladies descending a flight of stairs, with the motto *Facilis descensus*, has the expressive suggestiveness of an early Italian picture about it. Without lengthened quotation, it is impossible to render clear the feeling of a lovely drawing of a child-genius, who is supposed to be commissioned by some wearied human soul to fill again at the fountain of life and love the joy-vessels of a life that has been drained too soon. This design is exquisitely beautiful. Another, of some happy children at play in a garden, is pleasant to see. The series is very unequal in execution, and even in conception, sometimes trite. A few such charming designs as those we have enumerated redeem all shortcomings.

MUSIC AND THE DRAMA

NEW PUBLICATIONS.

Trio (No. 3) pour Piano, Violon & Violoncello. Composé par E. Silas. Op. 46. (Cramer & Co.)—This is a noticeable work by a superior man, who has not yet found his public. In our days of monotonous frivolity as regards publication, such a composition as this *Sonata* for three instruments should not wait for its recom-

mendation. It ought to have a hearing at the *Popular Concerts*; since it has style, science and a certain originality distinct from extravagance, which should make it welcome, by way of a variety, even in places where Mozart's, Beethoven's and Mendelssohn's *Trios* have been enjoyed. Such acceptance, however, does not preclude examination. The opening of the *Allegro non troppo* for the pianoforte alone, with a real musical phrase at first delivered in the enriched modern style, has a certain novelty, grandeur and climax which are attractive. The episode, or second subject, is less good. There is a want of change in it,—the same as is to be found in Pre-Raphaelite pictures where no air is let in.

The mind of man claims rest, and cannot bear (Though next in power to God's) continual care.

—A "second part" is the hardest portion of any melody or composition for melodist or for composer to make. This necessity, we know, Mendelssohn (no born tune-maker) wonderfully evaded by aid of the strength of his resource and knowledge of effect; but without such ingenuity, if imagination be not forthcoming, music must become either dry or patchy,—as fatiguing as Spohr's, or else as fragmentary as M. Meyerbeer's. This point of sagacity (the world is tired of hearing about "points of departure") M. Silas has till now failed to hit: hence his *Trio*, however well cemented,—however much betokening a loving student of the best things in music,—is, in effect, heavy. In his second movement—*Scherzo*—a recollection of the last movement of Beethoven's *Solo Sonata* in G (Op. 14) is to be traced, not obtrusively. The close is bold and natural,—a *coda* which could only have been thrown off by a thorough artist.—The theme of the third division of this *Sonata* (*Andante*) is gracious and tuneful. Here, again, the want of "air" (to return to our painter's parallel) is as obvious as the like deficiency which spoils Schubert's instrumental music. In the *Finale Allegro molto vivace* M. Silas has (as in other works) confounded figure of notes with fancy of ideas. He has ingeniously worked this figure out to satiety. This is the least happy quarter of his *Trio*,—but the work, as a whole, is one too meritorious to be passed over,—one which ought to be heard in public.

MUSICAL AND DRAMATIC GOSSIP.—"Bearing in mind," writes one from Paris, worthy of being heard, "that you desired me to write to you about Signor Rossini's 'Chant des Titans,' I seize the five minutes that remain between the conclusion of the performance and the departure of the poet, to tell you my impression,—shared, I believe, by the party of artists with whom I was,—which is one of disappointment. The effect was not great. The four basses were quite insufficient to give the only effect of which the piece is susceptible,—that of imposing sonority. *Motif suivi* there is none. It is a large rugged strain of rather uncouth defiance, and in the Crystal Palace, with fifty or a hundred bass voices, and a proportionate orchestra, would, no doubt, be imposing; but in the *Salle du Conservatoire*, sung by four voices, it was like a colossal statue in a greenhouse. Of course, the hand of the master is perceptible, and there are reminiscences of the second finale of 'Guillaume Tell' and of the 'Inflammatus' of the 'Stabat Mater'; but it can add nothing to the reputation of the author, and I believe few will in their hearts think it quite worthy of him. I am sorry he has broken his long silence by such a composition. It is as though a great orator, for whom all ears were open, rose up and said, 'Good-night, ladies and gentlemen.' Of course the piece was well received, and *encored*—but, believe me, it was not effective.—We had a pretty little *début* last night at the *Italiens* in 'Rigoletto'—of a very pretty Mdle. Guerra who sang some years ago at the *Opéra Comique*, I believe without success, but who decidedly pleased last night. Her voice is an agreeable light *soprano*, equal, true and capable of high culture, naturally flexible and sufficient in power. She has much to learn, but I did not perceive that there was anything to unlearn. To-night a new German tenor, Herr Braun, appears in 'Norma,'

under the name of Brini. He is said to have a fine voice. The contract has been signed for the construction of a new Italian Opera House, on the Boulevard Malesherbes, to be ready by next October.—Signor Rossini is always at the piano, and continually doing something."

Dr. Marschner's death leaves a vacancy in the ranks of worthy second-rate German artists. He was born at Zittau, in 1795, during the great period of music; and early showed remarkable dispositions. Family circumstances did not admit of his receiving a very genial or complete education; but he soon distinguished himself as a pianoforte-player, and as the owner of a lovely boy's *soprano* voice,—he began to write in every form of composition ere he had mastered the rules of writing. About 1816, he had gathered skill enough to produce a small opera, 'Der Kiffhäuser Berg,' which opened the theatres to him; and from that time forth, was heard of in Germany as one pouring out musical dramas without stint, the fame of some among which (such as 'Der Vampyr' and 'Der Tempel') led to his installation at Hanover as Chapel-Master in the year 1830. A third opera, 'Hans Heiling,' produced a year or two later, bade fair to continue its writer's successes, but from that time forward Marschner's name may be said to have begun to perish; nor—left at a considerable interval behind Spohr's—is there anything in the voluminous mass of his music which will keep it alive. There is no "style" in his operas or his pianoforte music. 'Der Vampyr' was a second-hand emulation of Weber's fantastic manner, but Weber's melody (so justly called "flattering" by Mendelssohn) was wanting to it.—Though Marschner is said to have tried hard to mould his fancies so as to make them vocal,—and, in particular, to have studied Signor Rossini's music with this view,—there hardly exists any opera music more crabbed than his, the impurity in his part-writing for voices making remembrance so difficult as to be next to impossible. The first *finale* to his 'Falkner's Braut' is a miracle of difficulty hardly to be mastered save by machines. Life went on with him something drowsily as regarded his acceptance in German favour—and of late days he made attempts in London and Paris to ascertain if no chance was to be found in those livelier capitals for some recognition of his efforts. It may be feared that these ended merely in disappointment, and that the busy life of a diligent worker did not produce to him that result of satisfaction which ought (did one not know the lot to be unequal) to attend all honest labour.

Madame Laborde, whose masterly and florid singing some years ago, in a Belgian Opera Company here, is not forgotten, announces her arrival in London—to remain.

We are requested by Herr Bernsdorf, of Leipzig, to state that a Supplement to his 'Musical Lexicon' (a work which, so far as it has gone, bears a high character) is in preparation, to appear in the course of 1862.—With the view of making this as complete as possible, he is desirous of receiving information in the form of biographical particulars from the musicians of England.

Handel's 'Athalia' was a few weeks ago performed at Munster.—The oratorio, though full of beauty, is well nigh unknown in England.

The year dying out has been the poorest musical year in our experience. There has not been one new work produced that is likely to last long—not one new artist has appeared of any value or charm (Mdle. Patti excepted, by courtesy). Let us hope for something better from the year to come, 1862.

MISCELLANEA

Popular Customs in Bavaria.—A singular popular custom, of long standing in one part of Bavaria, re-appeared the other day; and though I was not on the spot to witness it, I have gathered some strange details which may be worth perusal. So orderly a country as Germany is the last place in which one would expect to find a sort of Lynch law, a reprobation by public opinion of crimes scarcely punishable by justice. I believe the only place where anything similar exists is the Southern States of America, where, however, people who make themselves ridiculous by marrying

young wives when themselves are old, or notable for stinginess, are punished in the same way as those who make themselves obnoxious in Bavaria. *Haberfeldtreiben* is the name given to this process, which exists in that part of the Bavarian highlands inclosed between three rivers, the Mangfall, which flows from the Lake of Tegernsee and joins the Inn by Rosenheim, the Isar and the Inn. If any one misbehaves in that country, and does not amend on receiving warning, a sudden tumult is raised outside his house. One or two hundred men in disguise, armed and provided with instruments of noise, assemble. The whole neighbourhood is informed of the person at whom this is directed; carriages are stopped, and spectators are requested to keep aloof from the performers. Then the list of the assembly is read in the name of the Emperor Charlemagne in the Untersberg. All the *Treibers* have feigned names, to which they must answer. Next the culprit is called up, and never fails to appear, generally in his shirt. One of the maskers reads him a long despatch, as ambassador from Charlemagne, while the others hold torches round to light the paper. In this the causes of the popular expression are recorded in doggerel verse, which is read so loud that the whole neighbourhood can hear. Every crime of the man has its verse; after each of which the assembly break into loud taunting laughter, and make a fearful noise with pans, bells, trumpets, whips cracking, shouts and stamping. At the end the culprit has another admonition; and other sinners are warned that if they do not improve the next meeting will be held at their houses. With this the gathering separates, as mysteriously as it came together. Usury, stinginess and avarice are chiefly punished by this tribunal, especially if of a kind that escapes the tribunal of law. It is much to be observed that great sinners are more apt to be punished than small ones, so that the common sayings, and King Lear's, about the impunity of great criminals are contradicted. On the last occasion the parish priest of Gmund, near Tegernsee, was thus brought to censure, and the judgment had an unfortunate effect, for a gendarme, who, with the confidence and self-reliance of a Bavarian minister of the law, fired upon the mass of two hundred men, was killed. But generally no damage is done, and if any window be broken, or hedge trampled down, the full value is forwarded to the owner. Once when a fine was imposed on a community because such a disturbance had taken place, the fine was paid anonymously. This alone would recall the guinea laid on the stall from which the rope was taken to hang Porteous. The history of this custom is obscure. It seems to have had a clerical origin, and was early applied to cases of seduction; but the secrecy that has always attended it affects its origin: and it is no more possible for the police to come on its traces than the antiquaries. The meetings are always conducted with the profoundest mystery; and it is supposed that members are always selected from a great distance, that their voices may not be recognized. The clergy formerly considered the institution most excellent in its working, but they have changed their opinion since they themselves have been subjected to it. An old peasant gave some details on the matter to Herr Steub, who has treated it in his book on the Bavarian highlands. He said the custom was a very good one; but, unhappily, now, unmarried young men were allowed to take a part, instead of staid old married men, which greatly detracts from its respectability. He added, that no one ever suffered by it, and it was never unjustly applied; though some dissent from this favourable verdict, and censure the punishment of unmarried girls merely for having relations with the foresters. E. W.

TO CORRESPONDENTS.—An Old Subscriber—W. H. K.—E. A. M.—J. E. V.—received.

ONOPHIS.—Our Correspondent should remember that the consecutive twelfth parts of the ecliptic have always borne, and still bear, the names of the constellations which occupied them when the Greek Zodiac was formed. Thus the first twelve degrees which come next after the retrograding equinox, are still called *Aries*, though the celestial constellation of that name is now in advance of them. The symbols ♈, ♉, &c., always refer to parts of the ecliptic, never to the old clusters of stars.

Just published, in 4to. price 8s. 6d. cloth,
THE CLIMATE OF ENGLAND. By GEORGE SHEPHERD, C.E. This Work foretells the general Meteorological Character of each succeeding Year; also when the Wet Years will again re-occur in England.
London: Longman, Green, Longman, and Roberts.

The First and Second Series, in crown 8vo. 12s. 6d. each,
VICISSITUDES OF FAMILIES: Essays and Narratives illustrating the surprising Mutability of Fortune in the History of our Noble Houses. By Sir BERNARD BURKE, Ulster King-of-Arms; Author of the 'Peerage and Baronetage,' &c.
"Combining in harmonious proportions all the interest of much by presenting some striking features of genealogy to the world in an easy, agreeable and authentic history."
Falkirk Herald. "Athenæum."

Morocco Silver Lock 4s.
And in a variety of other bindings suitable for presents.

SIR GEORGE RAMSAY'S NEW WORK.
Now ready, small 8vo. 5s. cloth,
INSTINCT and REASON. By Sir GEORGE RAMSAY, Bart.
By the same Author,
PRINCIPLES of PSYCHOLOGY. 8vo. 10s. 6d.
London: Walton & Maberly. Edinburgh: Blackwood & Sons.

BEWICK'S HISTORY of BRITISH BIRDS.
London: sold by Longman & Co.; Simpkin, Marshall & Co.; and by all Booksellers.

Now ready, in 8vo. cloth, 7s. 6d.
RIGHTS of NATIONS; or, the New Law of European States. By COUNT MAMIANI, Minister of Public Instruction in the Kingdom of Sardinia. Translated from the Italian, and Edited, with the Author's Additions and Corrections, by ROGER ACTON, and dedicated, by special permission, to EARL RUSSELL.
London: W. Jeffs, 15, Burlington Arcade, Foreign Bookseller to the Royal Family.

NEW GRAND HISTORICAL ROMANCE.
MARY TUDOR; or, the QUEEN, the PRIEST and the MAIDEN. will commence in the JANUARY NUMBER of the 'WHAT-NOT; or, LADIES' HANDY-BOOK,' an Illustrated Magazine of Fiction, Fashion and Fancy Work. Price 3d. Monthly.
The Annual Volume, cloth extra, gilt, forming a most appropriate Christmas Present, is now ready, price 4s.
London: Wm. Kent & Co. Paternoster-row, and all Booksellers.

REPRODUCTION of a FAMOUS LITERARY CURIOSITY; SPECULUM HUMANÆ SALVATIONIS;
le plus ancien Monument de la Xylographie et de la Typographie Humaines: reproduit en Fac-simile avec Introduction historique et bibliographique. Par J. PH. BERJEAU. Folio, 63 Plates, 41. 4s.
The original of this volume is supposed to have been printed about 1430. It is the first rude attempt in movable types in combination with wooden blocks. The pictures at the top of each page are productions of the school of Van Eyck. The text is supposed to emanate from the Brethren of Common Lot, and is here given at length in ordinary type.

London: C. J. Stewart, 11, King William-street, Strand, W.C.

THE SHAKSPEARE ALBUM, for the PIANOFORTE, containing Airs illustrative of Shakspeare and his Time. In addition to the Music in Masbeth, Tempest, Hamlet and various ancient and traditional pieces, the Volume will contain a selection of the choicest illustrative music from the Shakspearian Works of Purcell, Arne, Haydn, Stevens, Shield, Cooke, Rossini, Verdi, Schubert and Mendelssohn. Richly illustrated, &c., price 10s.
Subscribers' Names received by C. Lonsdale, Musical Circulating Library, 35, Old Bond-street, and at J. Mitchell's Royal Library, 38, Old Bond-street.

Now ready, price 2s. 6d. (pp. 423),
Vol. XV., JULY to DECEMBER, 1861, of
THE BRITISH CONTROVERSIALIST:
Containing LEADING ARTICLES of great value on Definition, Controversy, Plato as a Controversialist, and Hugo Grotius. Debates on the following Questions:—Is the Mosaic Account of the Deluge consistent with the Facts of Science? Are the Modern Phenomena of Spiritual Manifestations genuine? &c. Are the Results of Sunday School Instruction satisfactory? Are the Poles justified in endeavouring to regain their National Independence? Essays on William Cullen Bryant; 'Essays and Reviews'; 'Used Up'; Hints to Essayists, &c. OUTLINE DRAWINGS respecting the Southern Confederation of America, Church-rates, Corporal Punishment in Schools, Blondin. Reviews; Reports of Literary Societies, &c.
London: Houlston & Wright, 65, Paternoster-row; and all Booksellers.

CHAMBERS'S JOURNAL of POPULAR LITERATURE, SCIENCE, and ARTS.
Weekly at 11d., and Monthly at 7d.

Commenced in 1832—the first cheap periodical in which an attempt was made to present original literature of the first class—Chambers's Journal has persevered in its plan and design to the present time.

It has been the constant aim of its Conductors to give it a character for Moral Purity, Soundness of Instruction, and Innocent Entertainment, at the same time avoiding all points calculated to awake Controversial feelings, and by a scrupulous attention to these principles of management, they have been so fortunate as to procure for their paper a circulation co-extensive with the prevalence of the English language.

The abolition of the paper-duties enables the Conductors to announce their resolution to make certain improvements (to date from January, 1862) in the quality of the paper: as well as of immediately improving, as far as possible,

THE CHARACTER of the LITERARY CONTRIVERS.
W. & R. Chambers, 339, High-street, Edinburgh; and 47, Paternoster-row, London.

On Saturday, January 4, 1862, will be issued No. I. of a New and IMPORTANT WORK of MESSRS. CHAMBERS,

ENTITLED
THE BOOK OF DAYS.
It will consist of—
I. Matters connected with the Church Calendar, including the Popular Festivals, Saints' Days, and other Holidays, with Illustrations of Christian Antiquities in general.
II. Phenomena connected with the Seasonal Changes.
III. Folk-Lore of the United Kingdom—namely, Popular Notions and Observances connected with Times and Seasons.
IV. Notable Events, Biographies, and Anecdotes connected with the Days of the Year.
V. Articles of Popular Archaeology, of an entertaining character, tending to illustrate the Progress of Civilization, Manners, Literature, and Ideas in those Kingdoms.
VI. Curious Fugitive and Inedited Pieces.
This Work will be a repository of old fireside ideas in general, and will tell us of the manners and customs of our ancestors, and brush up our memories with regard to things that are passing or that have passed away.

Printed in a new, elegant, and readable type, and Illustrated with an abundance of Wood Engravings.

It will appear in Weekly Sheets, at 9d.; Monthly Parts, at 6d.; and in Yearly Volumes, at 10s., elegantly bound in cloth.

W. & R. Chambers, 47, Paternoster-row, London; and 339, High-street, Edinburgh; and sold by all Booksellers.

SMITH, ELDER & CO.'S LIST.

Now ready,

THE CORNHILL MAGAZINE,

No. XXV. for JANUARY, price ONE SHILLING, with Two Illustrations.

CONTENTS.

THE ADVENTURES OF PHILIP ON HIS WAY THROUGH THE WORLD. (With an Illustration.)
 Chapter XXVII.—I Charge you, Drop your Daggers.

London: WARD & LOCK, 158, Fleet-street.

SHAKESPEARE, 1623.

Just published, Part I.

Containing the whole of the COMEDIES,

Price 10s. 6d. in appropriate binding.

A FAC-SIMILE REPRINT OF THE FIRST EDITION
OF SHAKESPEARE.

"THE FAMOUS FOLIO OF 1623."

In the production of this Reprint the endeavour has been, that as regards general appearance, the contents, and the peculiarities of each page, it may be truly said,—

"One sand another
Not more resembles"

than it the original, alteration being alone in respect to size; so that it may be placed uniformly on the shelves with all good Library Editions of the Poet.

To be completed in Three Parts, each at the same price. There will also be impressions in Royal Octavo and in Folio.

A A very limited Edition of each Play that was printed before the Folio of 1623 will be published separately, to match with those "Early Quartos."

L. BOOTH, 307, Regent-street, W.

NOTICE IS HEREBY GIVEN to the Shareholders of the **SCOTTISH UNION INSURANCE COMPANY**, that a **DIVIDEND** of 10 per cent. (free of income-tax) on the capital stock of this Corporation will become payable on the 2nd January next, and Proprietors resident in and near London can receive the same at the Office, 37, Cornhill, on that or any subsequent day, between the hours of 10 and 4 o'clock. The printed Report of the Directors and Account last is now ready, and may be had at the Office, together with Prospectuses and Forms for Fire and Life Proposals.

By order of the Board,
 Scottish Union Office, 37, Cornhill, F. G. SMITH, Secretary.
 December, 1861.

THE SCOTTISH WIDOWS' FUND LIFE ASSURANCE SOCIETY,
 Head Office—9, St. Andrew-square, Edinburgh,
 IS NOW,
 IN ANNUAL REVENUE AND EXTENT OF BUSINESS
 THE LARGEST MUTUAL LIFE OFFICE IN
 THE WORLD.

I. BONUS SYSTEM.

The last Bonus for the Seven Years ending December, 1859, yielded additions on the Sum assured of from 11 1/2 to 6d. on the most recent Policies, up to 3 1/2 per cent. per Annum on the oldest Policies, which was equal to an interest last is now 100, per cent. to 100, per cent. of the Seven Premiums paid, and was one of the largest Bonuses ever declared by any Insurance Company.

II. CASH VALUE OF POLICIES PAYABLE ON DEMAND.

Cash value is allowed at any time from the issue of a Policy on a strictly equitable scale, by which neither retiring nor remaining members are benefited at the expense of the other.

III. FUNDS AND REVENUE.

Invested Funds, 3,700,000; Annual Revenue, 430,000.

Local Agents.

Major R. S. Ridge, 40, Pall Mall.
 Benton Seely, Bookseller, Islington Green.
 Robertson & White, Accountants, 4, Princes-street, Bank, E.C.

SPECIAL NOTICE.

Proposals lodged at the Head Office, or with any of the Agents, before 31st of December, will secure participation in the above advantages, and also one Bonus more than proposals of later date.

HUGH M'KEAY, Central Agent.

London, 4, Royal Exchange-buildings,
 Cornhill, November, 1861.

UNIVERSAL LIFE ASSURANCE SOCIETY,
 No. 1, KING WILLIAM-STREET, LONDON, E.C.

Established in the Year 1834.

Committees in Calcutta, Madras and Bombay.
 Agents throughout India.

The last Annual Reduction of Premium amounted to 45 per cent. so that a person being assured for 1,000, at the age of 30 is now paying 18 1/2 to 7d. instead of 24 1/2 to 4d.

INVESTED CAPITAL UPWARDS OF 750,000.

M. E. IMPEY, Secretary.

THE STANDARD LIFE ASSURANCE COMPANY.
 ESTABLISHED 1835.

The Directors invite particular attention to the system of "Free Assurance" introduced by this Company, under which Policies are relieved from all liability for payment of extra Premium for Foreign residence, and are subject to no other condition than the payment of the ordinary Premium.

Forfeited Policies can be revived within thirteen months under certain conditions.

Surrender values granted after one annual payment on those with profit Policies, or after three annual payments on those without profit.

Loans granted on such Policies to the extent of their value. The Standard has transacted a larger amount of Assurance business during the last Fifteen Years than any other Office.

Annual Revenue upwards of £315,000.

Accumulated and Invested Fund £1,980,000.

Next Division of Profits in 1863.

WILL THOS. THOMSON, Manager.

H. JONES WILLIAMS, Resident Secretary.

LONDON—King William-street.

EDINBURGH—3, George-street (Head Office).

DUBLIN—66, Upper Sackville-street.

EMPOWERED BY ACT OF PARLIAMENT, 3 WILL. 4.

THE ECONOMIC LIFE ASSURANCE SOCIETY,
 6, NEW BRIDGE-STREET, BLACKFRIARS, LONDON.

Established 1833.

Directors.

ROBERT BIDDULPH, Esq., Chairman.

WILLIAM BOUTH, Esq., Deputy Chairman.

Alfred Kingsford Barber, Esq.
 Henry Barnett, Esq.
 The Right Hon. E. Playdell
 Bouvier, M.P.
 Edward Charrington, Esq.
 Pascoe Charles Glynn, Esq.

Secretary—James John Downes, Esq. F.R.S.

Secretary—Alexander Macdonald, Esq.

The Society offers the following advantages:—

The Lowest Rates of Premium on the Mutual System.

The whole of the Profits divided every Fifth Year.

Reversionary Bonuses have been added to Policies to the extent of 1,365,000.

The last Bonus, declared in 1859, which averaged 65 per cent. on the Premiums paid, amounted to 475,000.

8,471 Policies are now in force, yielding an annual income of 189,000, assuring the sum of 6,697,574, which, with 610,827 Bonus additions, makes a total liability of 7,308,399.

The Invested Capital is 1,911,000, producing upwards of 74,000.

—thus making the present Annual Income of the Society 253,000.

Service in the Militia, Yeomanry or Volunteer Corps will not affect the validity of Policies.

Prospectuses and further particulars may be obtained on application to

ALEXANDER MACDONALD, Secretary.

NORTH BRITISH INSURANCE COMPANY.

Head Office—64, Princes-street, Edinburgh.

London Office—4, New Bank-buildings, Lothbury.

LIFE DEPARTMENT.

Policies opened before 31st December will be entitled at next Distribution of Profits, in 1862, to rank for five years' bonus.

	Policies	Sum Assured
For five years, from 1853 to 1857 inclusive,	307	£276,948
In 1858, the Policies issued	455	377,428
1859 " "	885	669,913
1860 " "	741	476,649

This increase in the business of the Company will, it is expected, beneficially affect the Bonus to be declared at next Division of Profits.

New and liberal conditions of Assurance have recently been adopted, particulars of which, together with Prospectuses and all necessary information, may be had as above, or will be forwarded.

ROBERT STRACHAN, Secretary.

4, New Bank-buildings, October, 1861.

METROPOLITAN LIFE ASSURANCE SOCIETY.

No. 3, PRINCES-STREET, BANK, E.C. Established 1835.

Advantages of assuring with this Society:—
 Economical management, no paid agents, and no commission allowed.

The whole of the profits applied to the reduction of the premiums of members.

The guarantee of an accumulated fund exceeding 925,000.

A gross annual income of 1,000,000, and a reduction of the premiums after seven years' payments have been made.

Amount paid in claims without a single instance of dispute, 600,000.

Returned to members in reduction of their premiums, 500,000.

HENRY MARSHAL, Actuary.

LONDON LIFE ASSOCIATION,
 31, KING WILLIAM-STREET, E.C.

Instituted 1860.

President—CHARLES FRANKS, Esq.

Vice-President—JOHN BENJAMIN HEATH, Esq.

Trustees.

Francis Henry Mitchell, Esq. | Robert Hanbury, Esq.
 Alfred Head, Esq. | Bonamy Dobree, Esq.

The London Life Association was established more than fifty years ago, on the principle of Mutual Assurance, the whole of the benefits being shared by the Members assured. The surplus is ascertained each year, and appropriated solely to a reduction of the premiums after seven years' payments have been made.

If the present rate of reduction be maintained, persons now effecting Assurances will be entitled, after seven years, to a reduction of 73 1/2 per cent., whereby each 100 of annual premium will be reduced to 26 1/2.

This Society has paid in claims more than £4,150,000.

Its accumulated fund exceeds £4,500,000.

Its gross income is upwards of £340,000.

Assurances may be effected up to 10,000 on the same life.

The Society has no agents and allows no commission; nevertheless the new assurances effected in the last financial year amounted to 387,340, and the new annual premiums to 10,567.

EDWARD DOCKER, Secretary.

SUN FIRE OFFICE, ESTABLISHED 1710,

Joseph Hoare, Esq. | Edmund George Thornton, Esq.

Henry R. Tomkinson, Esq.

All persons insured in this Office, the Premiums on whose Policies fall due at the Christmas Quarter, are hereby reminded to pay the said Premiums, either at the Offices in Threadneedle-street; Craig's-court, Charing Cross; at No. 40, Wigmore-street, Cavendish-square; or to the Agents in the Country, on or before the 31st day of JANUARY, 1862, when the fifteen days, allowed by this Office, over and above the time for which they are insured, will expire.

Insurances may be made for more years than by a single payment, and in such cases there will be a discount allowed on the premium and duty for every year, except the first.

RATES OF PREMIUM.

FIRST CLASS. SECOND CLASS. THIRD CLASS.

1s. 6d. per cent. 2s. 6d. per cent. 4s. 6d. per cent.

Farming Stock may now be insured at 5s. per cent. if covered to a fair value, and situate in a district free from Incendiarism.

This Office insures Property in Foreign Countries, and the Rates are regulated by the nature of the risks.

The Duty paid to Government by the Sun Fire Office in 1860 amounted to 216,376.

Special Announcement.—The Policies of this Company now extend to cover Losses occasioned by Explosion of Gas.

WHITMORE & CRADDOCK.—The City Agency,

16, BISHOPSGATE-STREET WITHIN, E.C., London.

Families regularly waited upon for orders in all parts.

FOR WEAKNESS, INFLAMMATION and

IRRITATION of the EYES, caused by the Winds, Blight,

Close Application to Literary and other Professional Occupations,

the EYE-DOUCHE or FOUNTAIN, invented by SAVORY &

MOORE, for the perfect application of Cold Water, Eye Lotions,

&c. The effects produced are grateful and refreshing, and the

sight is improved and permanently strengthened by the regular

use of the Douche.—SAVORY & MOORE, Chemists to the Queen,

143, NEW BOND-STREET, LONDON.—N.B. As the imitation

of these Douches causes congestion of the Vessels of the Eye, it is im-

portant to observe that the names of SAVORY & MOORE

are conspicuous on all instruments of their manufacture.

HARVEY'S SAUCE.—CAUTION.—The

admirers of this celebrated Sauce are particularly requested to observe that each bottle bears the well-known label, signed "Elizabeth Lazenby." This label is protected by perpetual injunction in Chancery of the 9th July, 1858, and without it none can be genuine.

E. LAZENBY & SON, of 6, Edwards-street, Portman-square, London, as sole Proprietors of the receipt for Harvey's Sauce, are compelled to give this caution, from the fact that their labels are closely imitated with a view to deceive purchasers.

Sold by all respectable Grocers, Druggists and Oilmen.

E. LAZENBY & SON beg to offer to notice

their selections of NEW FOREIGN PRESERVED FRUITS for Dessert—Apples, Greenapples, Peas, Strawberries, Angelica, and other kinds, Crystallized and Glazed Dried Cherries, Almonds, Muscatel Raisins, Figs, French and Elvas Plums, Normandy Pippins, Valencia and Sultan's Raisins, Currants, &c. Their Sausages, Pickles, Jams, Tart Fruits, Teas, Coffee, Sugars, Spices, Soap, Colas and other Oils, Candles, and General Groceries, will also be found of the best descriptions.

6, Edwards-street, Portman-square, London, W.

N.B.—Sole Proprietors of the receipt for HARVEY'S SAUCE.

SAUCE—LEA AND PERRINS

beg to caution the Public against Spurious Imitations of their world-renowned

WORCESTERSHIRE SAUCE.

Purchasers should

ASK FOR LEA AND PERRINS' SAUCE,

Pronounced by Connoisseurs to be

"THE ONLY GOOD SAUCE."

* * * Sold Wholesale and by Export, by the Proprietors, Worcester; Messrs. GROSE & BLACKWELL, London, &c. &c.; and by Grocers and Oilmen universally.

RUPTURES.—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is

allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA.

The use of a steel spring, so often hurtful in its effects, is here avoided: a soft bandage being worn round the body, while the requisite supporting power is supplied by the MOC-MAIN PAD and PATENT LEVER, acting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive Circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body, two inches below the hips, being sent to the Manufacturer.

Price of a Single Truss, 16s., 21s., 26s. 6d. and 31s. 6d.; postage, 1s. Double Truss, 31s. 6d., 42s. and 52s. 6d.; postage, 1s. 6d.

P. O. O. made payable to JOHN WHITE, Post-Office, Piccadilly.

ELASTIC STOCKINGS, KNEE-CAPS, &c.

for VARICOSE VEINS, and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light in texture, and inexpensive, and are drawn on like an ordinary stocking. Price 4s. 6d., 7s. 6d., 10s. and 16s. each; postage 6d.

JOHN WHITE, Manufacturer, 238, PICCADILLY, London.

TAIT'S ORIENTAL BALM.—The most

efficacious means yet discovered for Strengthening, Preserving, Restoring and Beautifying the Hair. Prepared from a receipt by the late John Oldridge, Inventor of the celebrated Balm of Golumba, under the experienced supervision of his daughter and son-in-law, Mr. and Mrs. Tait.—Sold by all Perfumers, in bottles, at 2s. 6d., 5s. and 8s. 6d., and at the Manufactory, 6, Combe-place, Southampton-row, Russell-square, W.C.

STAINED GLASS WORKS, 24, CARDINGTON-STREET, Hampstead-road, London, N.W.

MORTLOCK'S CHINA WAREHOUSE, 250, OXFORD-STREET—SELLING OFF.—In consequence of the Marquis of Westminster's refusal to renew the lease of the above Premises in connexion with Park-street, JOHN MORTLOCK is anxious to decrease his RICH STOCK, and is prepared to make great allowances for Cash.—250, OXFORD-STREET, and 53, PARK-STREET, near Hyde Park.

ALLSOPP'S PALE ALE, in Bottle, recommended by Baron Lobley and all the Faculty, may now be had in the finest condition of Messrs. HARRINGTON PARKER & CO., 24, Pall Mall, and 14, Regent-street, Waterloo-place, S.W.

CAUTION.—SMEE'S SPRING MATTRESS. TUCKER'S PATENT, or SOMMER TUCKER. Comfortable, elastic, durable and inexpensive. Purchasers are respectfully warned against imitations and imitations, in which somewhat of the general appearance of the S.M.E.E.'S SPRING MATTRESS is carefully preserved, but all its essential advantages are sacrificed.

WILLIAM S.M.E.E. & SONS, having now the entire of the Patent Right, are able to announce the following considerably REDUCED SCALE OF PRICES.

Size No. 1 for Bedsteads 3 feet wide	35s. 6d.
" " " " " " " "	37s. 6d.
" " " " " " " "	39s. 6d.

Other sizes in proportion. "To be obtained of almost all respectable Upholsterers and Bedding Warehousemen.

ESPECIAL NOTICE should be taken that each Spring Mattress bears upon the side the Label, "Tucker's Patent."

FENDERS, STOVES, FIRE-IRONS and CHIMNEY-PIECES.—Buyers of the above are requested, before finally deciding, to visit WILLIAM S. BURTON'S SHOW-ROOM. They contain such an assortment of FENDERS, STOVES, IRONS, and CHIMNEY-PIECES, that cannot be approached elsewhere, either for variety, novelty, beauty of design or excellence of workmanship. Bright Stoves, with ornamental ornaments and two sets of bars, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.

BEDSTEADS, BATHS AND LAMPS.—WILLIAM S. BURTON has SIX LARGE SHOW-ROOMS devoted exclusively to the SEPARATE DISPLAY of Lamps, Baths and Metallic Bedsteads. The stock of each is at once the largest, newest and most varied ever submitted to the public, and marked at prices proportionate to those that have tended to make his establishment the most distinguished in this country.

Bedsteads, from	12s. 6d. to 220 0s. each.
Shower Baths, from	5s. 6d. to 25 0s. each.
Lamps (Modern), from	5s. 6d. to 27 7s. each.
(All other kinds at the same rate)	
Pure Colza Oil	4s. per gallon.

CUTLERY, WARRANTED.—The most varied assortment of TABLE CUTLERY in the world, all warranted, is on SALE at WILLIAM S. BURTON'S, at prices that are remarkable for the beauty of the goods. 21-inch ivory-handled table knives, with high shoulders, 12s. 6d. per dozen; dessert knives, 10s.; if to balance, 6d. per dozen extra; carvers, 4s. 3d. per pair; larger sizes, from 20s. to 72s. 6d. per pair; extra fine ivory, 32s.; if with silver ferrules, 40s. to 60s.; white-bone table knives, 6s. per dozen; dessert, 3s.; carvers, 2s. 3d. per pair; black-bone table knives, 7s. 6d. per dozen; dessert, 6s.; carvers, 3s. 6d.; black wood-handled table knives and forks, 6s. per dozen; table steels, from 1s. each. DR. DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD LIVER OIL,

Prescribed by the most Eminent Medical Men throughout the world, as the safest, speediest and most effectual

remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS,

HEMORRHOID, GOUT, GENERAL DEBILITY, DISORDERS

OF THE SKIN, RICKETS, INFANTILE WASTING,

AND ALL SCROFULOUS AFFECTIONS.

Is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart. M.D., Physician

in Ordinary to the Queen in Ireland.—"I consider Dr. de Jongh's

Light-Brown Cod Liver Oil to be a very pure Oil, not likely to

create disgust, and a therapeutic agent of great value."

Sir JOSEPH OLLIFFE, M.D., Physician to

the British Embassy at Paris.—"I have frequently prescribed

Dr. de Jongh's Light-Brown Cod Liver Oil, and I have every

reason to be satisfied with its beneficial and salutary effects."

Dr. LAWRENCE, Physician to H.R.H. the

Duke of Saxe-Coburg and Gotha.—"I invariably prescribe Dr.

de Jongh's Oil in preference to any other, feeling assured that

I am recommending a genuine article, and not a manufactured

compound, in which the efficacy of this invaluable medicine is

destroyed."

Dr. BARLOW, Senior Physician to Guy's

Hospital.—"I have frequently recommended persons consulting

me to make use of Dr. de Jongh's Cod Liver Oil. I have been

well satisfied with its effects, and believe it to be a very pure Oil,

well fitted for those cases in which the use of that substance is

indicated."

DR. DE JONGH'S LIGHT-BROWN COD LIVER OIL is sold only in

IMPERIAL Half-Pints, 2s. 6d.; Pints, 4s. 9d.; Quarts, 6s.; capuled

and labelled with his stamp and signature, WITHOUT WHICH WORK

CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE COMMISSIONERS:

ANSAR, HARFORD & CO. 77, Strand, London, W.C.
